Ranun'culus, *Crowfoot,* (F.) *Renoncule,* (Sc.) *Yel'low gow'an; Ord.* Ranunculaceæ; *Sex. Syst.* Polyandria Polygynia, (dim. of *rana,* 'a frog,' because found in marshy places where frogs abound.) A genus of plants, most of the species of which, when taken internally, act as acrid poisons. They are, also, acrid and vesicant when applied to the skin, and have accordingly been often used as counterirritants. In the Pharmacopœia of the United States, *Ranunculus* is the cormus and herb of *Ranunculus bulbosus.*

The following species answer to the above description:

Ranun'culus Aborti'vus, *Smallflowered Crow'foot, Chick'enpepper;* —

Ranun'culus A'cris, *R. praten'sis* seu *Steven'ii* seu *ru'fulus* seu *sylvat'icus* seu *sic'ulus, Up'right Mead'ow* or *Tall Crow'foot, But'ter Cups,* (Prov.) *Crai'sey, Guilt'y Cups, Yel'lowweed, Blis'terweed, Pile'wort, Bur'wort, Mead'owbloom, Yel'lows,* (F.) *Bouton d'or;* —

Ranun'culus Al'bus, Anemone nemorosa — r. Aquaticus, R. sceleratus; —

Ranun'culus Bulbo'sus, *R. læ'tus, Bul'bous* or *Bulbousrooted Crow'foot, But'ter Cups,* (F.) *Renoncule bulbeuse. Bassinet;* —

Ranun'culus Digita'tus, R. sceleratus — r. Declinatus, R. flammula; —

Ranun'culus Fica'ria, *R. ver'nus* seu *præ'cox, Chelido'nium mi'nus, Scrophula'ria mi'nor, Fica'ria ranunculoï'des* seu *ver'na* seu *commu'nis, Chelido'nia rotundifo'lia mi'nor, Cursu'ma hæmorrhoida'lis her'ba, Ægole'thron, Less'er cel'andine, Pile'wort,* (F.) *Petite Chélidoine, Petite Éclaire, Ficaire, Herbe aux hémorrhoïdes.* The leaves and root have been used medicinally; the leaves as an antiscorbutic, the root as a cataplasm in piles; —

Ranun'culus Flam'mula, *R. declina'tus, Flam'mula, Surrec'ta al'ba, Small'er Wa'ter Crow'foot, Less'er Spear'wort,* (F.) *Petite Douve;* —

Ranun'culus Illyr'icus; —

Ranun'culus Læ'tus, R. bulbosus — r. Nemorosus, Anemone nemorosa — r. Palustris, R. sceleratus; —

Ranun'culus Lin'gua; —

Ranun'culus Pennsylva'nicus, *Bristly Crowfoot;* —

Ranun'culus Præ'cox, R. ficaria — r. Pratensis, R. acris; —

Ranun'culus Pubes'cens. Grows in ditches and marshes in South Africa. The expressed juice is used by the Cape Colonists in cancerous ulcers; —

Ranun'culus Re'pens, *Creeping Crowfoot;* —

Ranun'culus Ru'fulus, R. acris; —

Ranun'culus Scelera'tus, *R. palus'tris* seu *umbella'tus* seu *digita'tus* seu *aquat'icus, Ri'sus A'pium, Her'ba Sardo'nia, Her'ba Scelera'ta, Hecato'nia palus'tris, Marsh* or *Crushed* or *Cel'eryleared Crowfoot;* —

Ranun'culus Sic'ulus, R. acris — r. Stevenii, R. acris — r. Umbellatus, R. sceleratus — r. Vernus, R. ficaria — r. Virginianus, Lobelia syphilitica.

Ra'pa, *Rapum, Rapus, Rapys, Raphis, Raphus, Raph'anus, Raphys, Rhaphis, Rhaphus, Rhaph'anus, Rhapys,* and *Rhaphys.* These terms were applied, of old, to the cabbage or turnip kind.

Ra'pa Na'pus, (*ραπυς,*) Brassica rapa — r. Rotunda, Brassica rapa.

Rape, (*rapa,*) Brassica napus; also, Stuprum, (from *rapio,* 'I ravish.')

Raphane'don, (*ῥαφανηδον,* from *ῥαφανις,* 'a radish,' 'like a radish,') *Rhaphanedon.* A transverse fracture of a long bone, leaving no splinters — what has been called, in France, *Fracture en rave.*

Rapha'nia, *Convul'sio Raphania, Rhapha'nia, Mor'bus spasmod'icus malig'nus* seu *popula'ris* seu *Silesi'acus, Eclamp'sia typho'des, Syn'clonus Raph-a'nia.* Linnæus gives this name to a convulsive disease, *Ergotis'mus,* not uncommon in Germany and Sweden, and which has been attributed to the seeds of the *Raph'anus Raphanis'trum* seu *sylves'tris, Raphanis'trum seg''etum* seu *arven'sē, Rapis'trum,* being mixed with the corn. The convul-

sions are seated in the limbs, and are attended with acute pain. See Convulsio cerealis.

Raphan'nia Maïz'tica, Pellagra.

Raph'anis, (*ῥαφανις,*) Raphanus hortensis — r. Magna, Cochlearia armoracia.

Raphanis'trum Arven'sē, see Raphania.

Raph'anus, Rapa, R. hortensis.

Raph'anus Horten'sis, *Raph'anus, R. sati'vus* seu *ni'ger, Raph'anis, Rhaph'anus, Radic'ula, Rha'phys, Ra'phys, Rhaps, Ra'pys, Rad'ish,* (F.) *Raifort, Radis. Ord.* Cruciferæ. *Sex. Syst.* Tetradynamia Siliquosa. The root of this plant is a common esculent. It has also been given as a diuretic in calculous affections. The juice, made into a syrup, is exhibited to relieve hoarseness. Radishes have long been celebrated as antiscorbutics.

Raph'anus Mari'nus, Cochlearia armoracia — r. Raphanistrum, see Raphania — r. Rusticanus, Cochlearia armoracia — r. Sylvestris, see Raphania.

Ra'phē, *Rha'phē,* (*ῥαφη,* 'a suture.') A name given to prominent lines resembling a raised stitch. Such is the raphe or *tramis* which divides the scrotum into two parts, and which extends from the anterior part of the anus to the extremity of the penis. The name *Ra'phē* seu *Ra'phē supe'rior* seu *Lin'ea media'na* seu *Sutu'ra cor'poris callo'si exter'na* seu *chor'da longitudina'lis Lancis'ii* is also given to two prominent lines which are longitudinal and parallel, and are seen at the upper surface of the corpus callosum, extending from the anterior to the posterior extremity of that commissure.

Ra'phex, Chenopodium vulvaria.

Raphiankis'tron, (*ῥαφιον,* 'a needle,' and *αγκιστρον,* 'a hook.') An instrument employed in the formation of artificial pupil.

Ra'phion, (*ῥαφιον,* dim. of *ῥαφις,* 'a needle,') Needle.

Ra'phis, (*ῥαφις,*) Needle, see Rapa.

Ra'phus, Rapa.

Ra'phys, Rapa, Raphanus hortensis.

Rapis'trum, (from *rapa,*) see Raphania.

Rapontic, Rheum rhaponticum.

Rapport (F.), (*re,* and *portare,* 'to bring,') *Rela'tio, Renuncia'tio,* 'a report.' A deposition made by a physician or surgeon, to prove the condition of a person, the nature of a disease, the existence or non-existence of pregnancy, sudden or violent death, &c. Formerly, there were the *Rapports dénonciatifs,* made at the desire of the injured or their friends, and intended to point out to the judges the details of the crime or misdemeanor; the *Rapports provisoires,* the object of which was to obtain *provisions* for the injured individual, both as regarded food and medicine, and to defray the expenses of proseeution; and *Rapports mixtes,* or those which were both *dénonciatifs* and *provisoires.* At present, reports or depositions are generally divided into *judiciary,* or those which serve to throw light on the subject-matter of any civil or criminal cause, and *administrative,* which afford information on subjects relating to any branch of the public administration, as on the nuisance, or otherwise, of certain establishments, the character of any epidemic, &c.

Rapport, Eructation, Regurgitation.

Rap'tus, gen. *Raptûs,* (*rapio, raptum,* 'I seize violently and suddenly.') A violent and sudden attack or seizure.

Rap'tus Hæmorrhag''icus. A hemorrhagic attack or seizure.

Rap'tus Melanchol'icus. A sudden and violent seizure of melancholy.

Rap'tus Nervo'rum. A sudden and violent nervous seizure. A spasm or cramp.

Rap'tus Posterga'neus, (*raptus, post,* 'behind,' and *tergum,* 'the back.') Opisthotonos.

Ra'pum, Rapa — r. Majus, Brassica rapa.

Rapun'tium Syphilit'icum, (from *rapum,*) Lobelia syphilitica.

Râpure, Rasura.

Ra'pus, Rapa.

Ra'pys, Rapa, Raphanus hortensis.

Raquette, Cactus opuntia.

Rare (F.), *Rarus,* 'rare.' An epithet for the respiration and pulse when less frequent than in health.

Rarefa'ciens, *Rarifa'ciens, Arœot'icus,* (F.) *Raréfiant,* (*rarus,* 'rare, thin,' and *facere,* 'to make.') Medicines were so termed which were supposed to be possessed of the power of giving more bulk or extension to the blood or other humors.

Raréfiant, Rarefaciens.

Rarifa'ciens, Rarefaciens.

Ra'ritas, (F.) *Rareté.* Rarity; scantiness; fewness.

Ra'ritas Den'tium. A large space between the teeth which appear to be, and may be, too few.

Raroo, Ramala.

Rasca'tio, Excreation.

Rasce'ta, Carpus, Malleolus — r. Pedis, Tarsus.

Ras'cha, Carpus, Malleolus.

Rase'ta, Carpus, Malleolus.

Raset'ta, Carpus, Malleolus.

Rash, Exanthem — r. Canker, see Cynanche maligna — r. Fever, Scarlatina — r. Lichenous, Lichen.

Rash, Medic''inal. An eruption following or dependent upon the administration of medicines, as the blue condition of skin from nitrate of silver, &c.

Rash, Mercu'rial, Eczema mercuriale — r. Mulberry, see Typhus — r. Nettle, Urticaria — r. Rose, Roseola — r. Summer, Lichen tropicus — r. Tooth, Strophulus — r. Wildfire, Ignis sylvaticus.

Rasion (F.), *Ra'sio,* (from *radere, rasum,* 'to shave, scrape.') In Pharmacy, the division of substances by the rasp or file.

Rasoir, Razor.

Raso'rian, see Controstimulus.

Raso'rism. The Italian medical doctrine of controstimulus, of which Rasori was the founder.

Raso'rium, (*radere, rasum,* 'to scrape,') Raspatorium.

Raspato'rium, (from *râper,* [old F.] *rasper,* 'to rasp,') *Raso'rium, Rat'ula, Scal'prum raso'rium, Xys'ter, Xyste'rium, Xys'trum, Rad'ula, Runci'na, Runcin'ula, Scal'prum, Ras'patory,* (F.) *Rugine, Grattoir.* An instrument used for rasping bones, to detach the periosteum,— either in certain surgical operations, or for anatomical purposes.

Rasp'berry, Rubus idæus—r. Black, see Rubus strigosus — r. Ground, Hydrastis Canadensis — r. Wild, Rubus strigosus.

Rasp'ing, Eructation.

Rasps, Rubus idæus.

Rasse'ta Pe'dis, Tarsus.

Raste'ta, Carpus, Malleolus.

Rasu'ra, *Xys'ma, Xys'mus,* (F.) *Rapure,* (*radere, rasum,* 'to scrape.') A rasure, or scratch, or erosion. Also, the rasping or shaving of any substance; as *Rasu'ræ cor'nu cer'vi, Harts'horn sha'vings.*

Rasu'ra, Scobs.

Ratafi'a, (pron. *Ratafe'a,* and *Rat'afec,*) (F.) *Alcoolé sucré, Saccharo-alcoolé.* A liquor, prepared by imparting to ardent spirits the flavor of various kinds of fruits, adding sugar.

Rat'anhy, Krameria ratanhia — r. of the Antilles, Krameria ixina — r. Savanilla, Krameria ixina.

Rate, Spleen.

Rateleux, Spleneticus.

Râtelier, (from *rateau,* 'a rack,') see Dentier.

Ra'tio, *Rational'itas,* (*reor, ratus,* 'I think.') A reason, a cause, an explanation, a mode or manner; as *Ratio symptom'atum,* an explanation

of the symptoms — *Ratio meden'di, Ge'nus curatio'nis, Vi'a curan'di;* the reason, mode or manner of cure.

Ra'tio Meden'di, see Ratio—r. Symptomatum, see Ratio — r. Victûs, Dietary.

Ra'tion, (from *ratio,* 'a proportion,') *Dia'rium.* The daily allowance of necessaries, especially of food, to a soldier or sailor. Diet rations are founded on principles laid down under Dietary; and in all civilized countries are, in essential respects, the same. They vary in time of peace and during active service.

The following details exhibit the provisional amounts of dietary articles allotted by each of the more important governments to the soldier in the field. The figures given for the United States army are based on very recent information; those for the Austrian, Prussian, and French armies on official tables published within the past ten years, although it is possible that in the recent Franco-German war these figures may have been somewhat modified. The Russian ration varies in time of peace, there being 196 meat days and 169 fast days in the year; on 117 of the latter, besides other articles, Schtschi (soup and sourcrout well boiled together) and gruel are furnished, and on the remaining 52 days peas and gruel. There is no accessible table of rations issued for the Russian soldier in time of war. The amount allotted to the British soldier is given, in the following table, from Crimean and East Indian experience, as no regular scale of diet has been established, especially as the British army has now been for some time on a peace footing. Such changes as are based on the experience of recent wars may be found in various professional and non-professional works.

	United States Army.	Austrian Army.	British Army in Crimea.	British Army in India.	French Army.	Prussian Army.	Russian Army in Crimea.
Flour	18 oz. or	2 oz.....	.....	.....	.....	8 oz.....

Soap	{ 64 oz. to 100 rations						
Wood	.....	.....		48 oz.....			

*In exceptional cases.

The reduction of the "marching ration" in bulk and weight, without impairing its nutritive power, has received much attention. Professor Horsford, for instance, proposed one consisting of roasted and ground wheat or self-raising flour, — prepared by intimately incorporating bicarbonate of soda and pulverulent acid phosphate of lime with flour, and forming a dough with water, — and boiled or roasted whole beef, sausaged, dried and compressed.

Rat''ional, *Rationa'lis,* (F.) *Rationnel.* That which is conformable to reason. This epithet is often opposed to *empirical;* as *rational treatment.* The French, also, say *Signes rationels,* in opposition to *Signes sensibles.* See Organic.

The *Rational method* of treating disease, in the language of Dr. Bigelow, recognizes nature as the great agent in the cure, employing art as an auxiliary, to be resorted to when useful or necessary, and avoided when prejudicial.

Rational'itas, Ratio.

Rats'bane, Arsenious acid.

Rat'tle, ([G.] Rattel,) Râle.

Rat'tles, The, see Râle.

Rat'tlebush, Sophora tinctoria.

Rat'tlesnake, Crotalus horridus — r. Leaf, Goodyera pubescens — r. Plantain, Goodyera pubescens — r. Root, Nabulus albus, Polygala senega, Trillium latifolium — r. Weed, Hieracium venosum.

Rat'tlesnake's Mas'ter, Agave Virginica, Liatris scariosa, Nabalus albus.

Rat'tleweed, Actæa racemosa.

Rat'ula, Raspatorium.

Rauce'do, gen. *Rauce'dinis, Rau'citas, Paraphoni'a rau'ca, Asper'itas Arte'riæ as'peræ, Vox rau'ca, Bran'chus, Hoarseness,* (Sc.) *Roup,* (Prov.) *Rawp,* (F.) *Enrouement, Raucité, (raucus,* 'hoarse.') A change in the voice, which loses its smoothness and becomes low and obscure. It is a com-

mon symptom in diseases of the larynx and trachea.

Rauce'do Catarrha'lis. Hoarseness from cold.

Rauc'itas, Raucedo.

Raucité, Raucedo.

Rau'cous, *Raucus,* (F.) *Rauque,* 'hoarse;' as a *raucous* voice — *Vo.c rauca* seu *raucis'ona.*

Rauque, Raucous.

Rave, (from *rapa,*) Brassica rapa.

Ra'very, Delirium.

Rawp, Raucedo.

Ray, Diarrhœa.

Rayonné, (from [F.] *rayon,* [L.] *radius,* 'a ray,') Radiated.

Rayons sous-iriens, Ciliary processes.

Ra'zor, *Cul'ter tonso'rius, Machæ'ris, Novac'ula, Xy'rum, Xy'rus,* (F.) *Rasoir,* (*radere, rasum,* 'to shave.') An instrument for shaving. Used in surgery to remove hairs, where they would interfere with any operation.

Re (L.), in composition,' back, in return, again.' Before vowels at times, and before *h* and *d,* it becomes *red.*

Reach'ing, (from [Sax.] *ræcan,* 'to reach,') Vomituriti̇on.

Reäc'tion, *Reäc'tio,* (*re,* 'again,' and *agere, actum,* 'to act.') An action of resistance to a power applied. A species of vital movement or excitement, tending to prevent or destroy the effects of any noxious power applied to the animal economy, and which by some has been attributed to the *vis medicatrix naturæ.* It is certainly dependent on the organic instinctive actions of the frame. It is the state of activity which succeeds the action on the nervous system of certain morbific influences.

Read, Rennet.

Read'y Meth'od, *Marshall Hall's Method.* A mode of restoring respiration in cases of apnœa, proposed by Dr. Marshall Hall. It consists in placing the body in the prone position, making gentle pressure on the back; then removing the pressure, and turning the body on its side and a little beyond, executing these movements sixteen times in the minute. It is also termed the method of *prone and pos'tural respira'tion* in apnœa.

Real'gar, *Realgal, Arlada, Arladar, Auripigmen'tum ru'brum, Arsen'icum ru'brum facti''tium, Abessi, Sandar'acha Græco'rum, Red Sul'phuret of Ar'senic.* A violent poison. See Poison.

Ream, Cream.

Reas'on, *Ra'tio, Lo'gos,* (F.) *Raison.* The faculty or property of the mind by means of which man perceives the distinction between right and wrong, in physics as well as in morals. *Reason* is a just conclusion resulting from the comparison of two ideas, by virtue of which we form a judgment.

Rebolea, Mummy.

Rebona, Mummy. Also, dried fæces, *Ster'cus adus'tum.*

Rebouteur, (*re,* and *bouter,* 'to put,') Renoueur.

Recamier's Caus'tic. An escharotic solution of *chloride of gold,* gr. vj., in *dilute nitromuriatic acid,* f℥j.

Receiv'er, *Ampul'la, Recip'ient,* (F.) *Ballon,* (*recipere, receptum,* — *re,* and *capere,* 'to take,' — 'to take, to receive.') In Pharmacy, a wide-necked globular vessel, the neck of which widens gradually outwards, to receive the tapering beak of the retort, in distillation. Like the retort, the receiver may be *plain* or *tu'bulated.*

A *quilled receiver* is one that has a tapering tube from its lower surface, which is inserted into a graduated bottle through a cork joint, when it is desirable to know accurately the amount of fluid that has passed over.

Recep'ta, Prescription.

Receptac'ula Du'ræ Ma'tris, (from *recęptare, receptatum,* 'to receive.') Sinuses of the dura mater.

Receptac'ulum Chy'li, 'receptacle of the chyle,' *R. Pecquet'i* seu *Pecquetia'num, Diverso'rium* seu *Stag'num chy'li, Sac'culus chy'lifer* seu *ro'rifer* seu *lac'teus, Al'veus ampullo'sus* seu *ampulles'cens, Utric'ulus lac'teus, Vesic'ula chy'li, Ampul'la chylif'era* seu *chy'li, Cister'na lumba'ris* seu *chy'li, chylocys'tis, Chylodochi'am, Lat'ices lac'tei, Lum'bar cis'tern, Res'ervoir or Cis'tern of Pec'quet,* (F.) *Réservoir du chyle, R. de Pecquet, Citerne lombaire.* A considerable dilatation of the thoracic duct, in front of the lumbar region of the vertebral column. It is the commencement of the duct.

Receptac'ulum Cotun'nii. A triangular space, formed by a separation of the two laminæ of the dura mater of the internal ear, near the middle of the posterior surface of the pars petrosa of the temporal bone, where the aquæductus vestibuli terminates. It is always filled with the *Fluid of Cotugno.*

Receptac'ulum Pecque'ti, R. chyli — r. Sellæ equinæ lateribus appositum, Cavernous sinus.

Recepta'rii Med'ici, (from *receptum.*) Physicians, according to Langius, who, without any reason, collect from pharmacopœias and chemical works masses of receipts (*recepta*) sufficient to load wagons, ("*quibus palustra onerare possent.*")

Receptiv'ity, *Recęptiv'itas,* (F.) *Réceptivité,* (*recipere, receptum,* 'to receive.') A word used by Tissot to express the susceptibility of certain organs to receive morbific impressions.

Recep'tum, Prescription.

Reces'sus, gen. *Recessûs,* 'a retreat,' Abscess, see Lingula, Sinus — r. Ampullaceus, Cavitas elliptica — r. Labyrinthi, see Crista vestibuli — r. Sulciformis, see Fovea vestibuli.

Recette, Prescription.

Rechamelca, Rachamelca.

Rechute, (*re,* and *chute,* 'a fall,') see Relapse.

Recidi'va Mor'bi, (*recidere,—re,* and *cadere,*— 'to fall back,') Relapse.

Récidive, see Relapse.

Rec''ipē, (L.) (*re,* and *capere,* 'to take.') A Latin word which signifies 'take,' (F.) *Prenez,* and with which prescriptions are commenced. It is, often, represented by R, ℞, and was formerly by ♃, the symbol of Jove. See Abbreviation, and R.

Substantively, *Recipe* means a prescription or receipt.

Récipient, Receiver.

Reciproca'tion, Vibra'tions of, see Sound.

Rec''ipro-laryn'goscopy, (*reciprocus,* 'mutual,' *larynx,* and *σκοπεω,* 'I view.') A hybrid term. Demonstration of a patient's larynx to others.

Reclina'tio, Reclination—r. Palpebrarum, Ectropion.

Reclina'tion, *Reclina'tio,* (*reclinare, reclinatum,—re,* and *clinare,* 'to bend,'—'to bend back.') A mode of operating for the cataract, which consists in applying the needle in a certain manner to the anterior surface of the cataract and depressing it into the vitreous humor in such a way that the front surface of the cataract is the upper, and its back surface the lower one.

Reclu'sor Palpebra'rum, (from *recludere, reclusum,* 'to open,') Levator palpebræ superioris.

Recoa'ro, Min'eral Wa'ters of. A town in Venetia, at the foot of the Alps, at which there are chalybeate springs.

Recollectio'nis Jactu'ra, Amnesia.

Recomposit''ion, Metasynchrisis.

Reconvalescen'tia, (*re,* and *convalescere,* 'to get well,') Convalescence.

Recorda'tio, (from *recordari, recordatus,* 'to remember,') Memory.

Recorda'tus, Memory.

Recorporati'vus, (*re,* and *corporare,* 'to form into a body,') Metasyncritic.

Recov'ery, (from *recuperare,* — *re,* and *capio,* 'I take,' — 'I regain,') Restauratio.

Recrea'tio, (*re,* and *creare,* 'to create,') Restauratio.

Rec'rement, *Recremen'tum,* (*re,* and *cernere, cretum,* 'to sift.') Of old, dross, excrement. With the moderns, a humor, which, after having been separated from the blood, is again returned to it; such as the saliva, the secretion of serous membranes, &c. Such fluids are said to be *recrementit''ial.* (F.) *Récrémenteux, Récrémentitiel; Humo'res inquili'ni.*

Recremen'ta (pl. of *recrementum*) **Vesi'cæ,** Urine.

Récrementeux, see Recrement.

Recrementit''ial Flu'ids, see Recrement.

Recremen'to-excrementit''ial. Applied to secreted fluids, as the saliva, bile, &c., which are in part reabsorbed and in part excreted.

Recremen'tum, Recrement.

Recrudescen'tia, *Palincote'sis, Recrudes'cence,* (*re,* and *crudus,* 'raw.') An increase of a disease after a temporary remission.

Rec'tal, *Recta'lis.* Appertaining or relating to the rectum, — as '*rectal* tube.' See Tube, rectal.

Rec'tal Pouch'es, Inflamma'tion of. These pouches become inflamed, enlarged, especially in old people, and ulcerated. The condition is sometimes called *Encys'ted rec'tum, Sac'iform dis'ease of the a'nus* (Gross).

Rectifica'tion, *Rectifica'tio,* (*rectum,* 'right,' and *facere,* 'to make.') An operation by which certain liquids are purified by distilling them, either singly or after admixture with other substances.

Recti'tis, gen. *Recti'tidis,* (*rectum,* and *itis,*) properly *orchitis* or *proctitis.* Inflammation of the rectum, *Proctal'gia inflammato'ria.*

Rec'to. In composition, relating or belonging to the rectum.

Rectoce'lē, (*recto,* and κηλη, 'rupture,') *Rec'tocele of the Vagi'na, Vag''inal Rec'tocele, Rec'tovag''inal Her'nia, Her'nia rec'ti in Vagi'nam.* Prolapsus of the posterior wall of the vagina, constituting a hernia of the rectum.

Rectococcyge''us, *Retrac'tor Rec'ti.* A muscle, which originates on the anterior surface of the second and third coccygeal vertebræ, and is inserted into the posterior wall of the rectum. It draws the rectum backwards.

Rectola'bial. Appertaining or relating to the rectum and labium.

Rectosteno'sis, (*recto,* and στενος, 'contracted,') Stricture of the rectum.

Rec'totome, (from *rectum,* and τομη, 'an incision.') A hybrid term for an instrument devised by Amussat for incising the rectum in cases of stricture of that bowel.

Rectoure'thral. Appertaining or relating to the rectum and urethra.

Rectoü'terine, *Rectoüteri'nus,* (*recto,* and *uterus.*) Appertaining or relating to the rectum and uterus.

Rectoü'terine Cul-de-sac, see Uterus — r. Folds, see Uterus — r. Pouch, see Uterus.

Rectovag''inal, (*recto.* and *vagina,*) *Rectovagina'lis.* That which relates or belongs to the rectum and vagina.

Rectovag''inal Cul-de-sac or Pouch is formed by the reflection of the peritoneum from the upper third of the vagina to the rectum.

Rectovag''inal Fis'tula is owing to a preternatural communication between the rectum and vagina through the above septum.

Rectovag''inal Sep'tum, (F.) *Cloison recto-vaginale,* is formed by the junction—back to back (or by what the French term *adossement*) — of the rectum and vagina. It separates these two canals from each other.

Rectoves'ical, (*recto,* and *vesica,* 'the bladder,') *Rectovesica'lis.* Having relation to the rectum and bladder; as the '*rectovesical fold* or *pouch* or *cul-de-sac*' of the peritoneum, between the rectum and bladder. See Urinary bladder.

Rec'tum, from *rectus,* 'straight,' so called from a notion that it is straight, which it is not, *Intesti'num Rec'tum, Apeuthys'menos, Euthyen'teron, Lon'gaon, Lon'gas, Lon'ganon, Ar'chos, Cys'saros, Prin'ceps, Monoco'lon* [?], *Bumgut,* (Prov.) *Jotgut.* The third and last portion of the great intestine. It forms the continuation of the sigmoid flexure of the colon, occupies the posterior part of the pelvis, and extends from the left side of the sacro-vertebral articulation to the coccyx, before which it opens outwards by the orifice called the *anus.* It is cylindrical, but saccated, as it were, at its inferior portion, where it is consequently larger, and is attached to the sacrum by the mesorectum. Like the other portions of the canal it is formed of three membranes. Towards the lower extremity, some parallel and longitudinal wrinkles are observable on its inner surface: these are the *Col'umns, Colum'næ car'neæ of the Rec'tum* or *of Morgagni,* (F.) *Colonnes du rectum* ou *de Morgagni.* They are merely folds of the mucous membrane, between which is a number of *Lacunæ.* The arteries of the rectum are numerous. They proceed from the inferior mesenteric, hypogastric, and internal pudic, and are called *hemorrhoidal.* The veins open, partly into the hypogastric vein, partly into the inferior mesenteric. The nerves proceed from the sciatic and hypogastric plexuses. The rectum receives the fæcal matters, as they pass from the colon, which serves as a reservoir for them.

Rec'tum, Strict'ure of the, Strictura recti.

Rec'tus, 'straight,' (F.) *Droit.* A term, used in anatomy for parts that pursue a straight course; — as

Rec'tus Abdom'inis, (F.) *Pubio-sternale, Sterno-pubien* (Ch.), *Droit de l'abdomen.* A long flat muscle, situate at the anterior part of the abdomen, and separated from that of the opposite side by the linea alba. It is attached, above, to the cartilages of the last three true ribs; and, below, to the pubis by a very strong tendon, the outer edge of which is continuous with the fascia transversalis. This muscle is inclosed in an aponeurotic sheath; and, in its course, has three or four transverse aponeurotic intersections. It bends the chest on the pelvis, and conversely.

Rec'tus Ante'rior Bre'vis, Rectus capitis internus minor — r. Anterior longus, R. capitis internus major — r. Capitis anticus longus, R. capitis internus major.

Rec'tus Cap'itis Inter'nus Ma'jor, *R. inter'nus ma'jor* seu *ante'rior lon'gus* seu *cap'itis anti'cus lon'gus, Lon'gus cap'itis,* (F.) *Trachélo-basilaire, Grand droit antérieur de la tête.* This muscle is long in proportion to its breadth, flat, and broader above than below. It is situate at the anterior and lateral part of the neck, and arises from the transverse processes of the third, fourth, fifth, and sixth cervical vertebræ. It is inserted into the basilary process of the occipital bone.

Rec'tus Cap'itis Inter'nus Mi'nor, *R. inter'nus mi'nor* seu *ante'rior bre'vis, Ren'uens, An'nuens,* (F.) *Petit trachélo-basilaire, Petit droit antérieur de la tête.* This is situate deeper than the last. It is thin, flattened, irregularly quadrilateral, and passes from the anterior surface of the body of the first vertebra, near the origin of the transverse process, to be inserted into the basilary process.

Rec'tus Cap'itis Latera'lis, *R. latera'lis* seu *latera'lis Fallo'pii, Transversa'lis anti'cus*

pri'mus, (F.) *Trachélo-atloïdo-basilaire, Atloïdo-sous-postérieur* (Ch.), *Droit latéral de la tête.* There is a muscle of this name on each side of the head. It is flat, quadrilateral, and passes from the transverse process of the atlas to the occiput, behind the jugular fossa. It inclines the head to one side.

Rec'tus Cap'itis Posti'cus Ma'jor. *R. ma'jor cap'itis posti'cus mi'nor* (Albinus), *Spini'axoïdo-occipita'lis*, (F.) *Axoïdo-occipitale* (Ch.), *Grand droit postérieur de la tête.* A flat, triangular muscle, situate at the posterior and superior part of the neck. It extends from the spinous process of the second cervical vertebra to the external surface of the lower semicircular ridge of the occipital bone. This muscle extends the head, inclines it to one side, and causes it to experience a rotary motion, which directs the face to its side.

Rec'tus Cap'itis Posti'cus Mi'nor, *R. mi'nor*, (F.) *Tuber - atloïdo - occipital, Atloïdo - occipital* (Ch.), *Petit droit postérieur de la tête.* A flat, triangular muscle, situate beneath the last, which passes from the posterior arch of the atlas to the occipital bone. It extends the head. See also Rectus capitis posticus major.

Rec'tus Cru'ris, R. femoris.

Rec'tus Exter'nus Oc'uli, *Abduc'tor oc'uli, Indignabun'dus, Indignato'rius, Iracun'dus, Oc'ulum mo'vens secun'dus*, (F.) *Droit externe, Irascible* ou *Abducteur de l'œil, Orbito-extus-sclérotici'en.* All the recti muscles of the eye, four in number, arise from the bottom of the orbit, and are inserted into the sclerotic coat of the eye. The *Rectus externus* is divided, at its posterior extremity, into two portions, one of which is attached to the outer part of the foramen opticum, and the other to the sphenoid bone.

Rec'tus Fem'oris, *Rec'tus* seu *Grac''ilis ante'rior* seu *cru'ris, Extensor cru'ris me'dius superfici-a'lis*, (F.) *Ilio-rotulien, Droit antérieur de la cuisse.* A straight muscle, seated at the anterior part of the thigh. It extends from the anterior and inferior spine of the ilium and the cotyloid cavity of the patella. This muscle extends the leg upon the thigh, and conversely. It can, also, bend the thigh upon the pelvis or carry the pelvis forward.

Rec'tus Infe'rior Fem'oris, Gracilis.

Rec'tus Infe'rior Oc'uli, *Depres'sor oc'uli, Tim'idus, Dep'rimens, Hu'milis, Oc'ulum mo'vens quar'tus*, (F.) *Sous-optico-sphéno-sclératicien, Droit inférieur* ou *abaisseur de l'œil, Muscle humble*, arises below the optic foramen from the sphenoid bone. It depresses the eye.

Rec'tus Inter'nus Ma'jor, R. capitis internus major — r. Internus minor, R. capitis internus minor.

Rec'tus Inter'nus Oc'uli, *Addu'cens* seu *Adduc'tor oc'uli, Bibito'rius, Oc'uli ad'ductor, Oc'ulum mo'vens pri'mus*, (F.) *Orbito-intus-sclératicien, Droit interne de l'œil* ou *adducteur* ou *buveur.* It arises from the sphenoid at the inferior part of the foramen opticum. It turns the eye towards the nose.

Rec'tus Latera'lis, R. capitis lateralis — r. Lateralis Fallopii, R. capitis lateralis — r. Major, R. capitis posticus major — r. Minor, R. capitis posticus minor.

Rec'tus Supe'rior Oc'uli, *Attol'lens oc'uli* seu *oc'ulum, Leva'tor* seu *Eleva'tor oc'uli, Super'bus, Oc'ulum mo'vens ter'tius*, (F.) *Superbe, Sus-optico-sphéno-sclératicien, Droit supérieur* ou *Élévateur de l'œil, Dédaigneux*, is attached to the circumference of the foramen opticum.

All the recti muscles are concerned in the voluntary motions of the eye. The oblique muscles have been supposed by Sir C. Bell to execute the involuntary.

Recubito'rium, (*recumbere, recubitum*, 'to recline,') Anaclinterium.

Recupera'tio, Restauratio.

Recupera'tion, (from *recuperare, recuperatum*, 'to recover,') Restauratio.

Recu'perative, *Recu'peratory.* Restorative. Recovering. Belonging to recovery.

Recur'rent, *Recur'rens*, (from *recurrere* — *re*, and *currere*, — 'to run back.') A name given to several arterial and nervous branches, which seem to reascend towards the origin of the trunk whence they emanate; also, to a disease that relapses, — a *recurrent tumor*, for example.

Recur'rent Ar'teries. This name has been given to several arteries of the forearm, and to one of the leg. In the *forearm*, there are, 1. The *Ra'dial recur'rent, Artère récurrente de l'épicondyle* (Ch.), which arises from the superior part of the radial, and ascends between the supinator longus, supinator brevis, and brachialis internus. 2. The *ante'rior cu'bital recur'rent, A. récurrente de l'épitrochlée* (Ch.), which arises from the upper and inner part of the cubital, and ascends between the pronator teres and brachialis internus. 3. The *poste'rior cu'bital recur'rent*, which arises from the preceding artery, or from the cubital itself, and ascends between the olecranon and internal tuberosity of the humerus. 4. The *poste'rior ra'dial recur'rent, A. récurrente olécranienne* (Ch.). It arises from the posterior interosseous, and ascends between the posterior cubital and anconeus muscles.—In the *leg*, the *Arte'ria recur'rens tibia'lis, A. récurrente du genou* (Ch.), is furnished by the anterior tibial, and ascends to the tibialis anticus muscle.

Recur'rent Band'ages are formed by convolutions of bandages, which make a kind of cap for the part — as the head — to which they are applied.

Recur'rent Fe'ver, see Relapse — r. Sensibility, see Vertebral nerves — r. Stricture, see Stricture.

Recurva'tio, (*re*, and *curvus*, 'crooked,') see Hump.

Recuti'tus, (*re*, 'back,' and *cutis*, 'skin,') Apella.

Red'bean, Abrus precatorius.

Red'berry, Arbutus uva ursi, Gaultheria, Panax quinquefolium — r. Bitter, Cornus Florida — r. Swamp, Vaccinium oxycoccos.

Red'gown, see Strophulus.

Red'gum, see Strophulus.

Red Head, Asclepias Curassavica.

Red'mailkes, Papaver rhœas.

Red'rod, Cornus sericea.

Red'root, Celastrus, Lachnanthes tinctoria, Sanguinaria Canadensis.

Red'shanks, Polygonia persicaria.

Red'water Tree, see Sassy Bark.

Red'weed, Phytolacca decandra.

Redib'ia, Paronychia.

Redimic'ulum, ('a chaplet,') Diadema.

Redingotes Anglaises, 'English riding coats, frock coats,' see Condom.

Redintegra'tio, (*re*, and *integer*, 'entire,') Regeneration, Restauratio.

Rédondance, (*re*, and *unda*, 'a wave,') Plethora.

Redou, Coriaria myrtifolia.

Redoublement, (*re*, and *doubler*, 'to double,') Exacerbation, Paroxysm.

Redoul, Coriaria myrtifolia.

Redresseur Utérin, (*re*, and *dresser*, 'to make straight,') Pessary, intrauterine.

Reds, (from the color,) Menses.

Reduc'tio, (*reducere, reductum*, — *re*, and *ducere, ductum*, 'to lead,' — 'to bring back,') Reduction, Taxis — r. Præputii impedita, Phimosis.

Reduc'tion, *Reduc'tio, Reposit''io, Restitu'tio, Diap'lasis, Diaplas'mus, Syntax'is.* A surgical operation, the object of which is to restore displaced parts to their original situation. Thus,

we say the reduction or *setting* of a fracture, when the displaced parts are again brought to their proper relative situation. The reduction of a hernia is the restoration of the protruded parts to the cavity of the abdomen. This is, also, called *Taxis*.

In Pharmacy, the process of restoring oxides, chlorides, sulphurets, &c., to the metallic state.

Redundan'tia, (*re,* and *unda,* 'a wave,') Plethora.

Reduplica'tio, Anadiplosis.

Redu'via, Paronychia.

Reed Mace, Typha latifolia.

Refec'tio, (*reficere, refectum,* 'to restore,' from *re,* and *facere,* 'to make,') Restauratio.

Refecti'va, Analeptica.

Refec'tus, gen. *Refec'tûs,* Restauratio.

Reficien'tia, Analeptica.

Réflectif, Reflex.

Reflec'tion, (*re,* and *flexere, flexum,* 'to bend,') *Reflex'io,* (F.) *Reflexion.* A bending or turning back. Duplicature. The act of turning the mind back on its actions; so as to constitute contemplation, deliberation.

Reflec'tor Epiglot'tidis. A muscle, which arises from the arytenoid cartilage and inner part of the thyroid, and is inserted into the lateral edges of the epiglottis.

Re'flex, *Reflex'us,* (F.) *Réflexe, Réflectif,* (same etymon as *Reflection.*) A term applied to an action, which consists in the reflection by an efferent nerve of an impression conveyed to a nervous centre by an afferent nerve; hence reflex movement, reflex paralysis, reflex epilepsy, &c.

A *reflex action* is generally regarded to be one executed without consciousness; like the 'reflex or excito-motory movements' of Dr. Marshall Hall.

Re'flex Move'ments, see Motion — r. Spinal, see Motion — r. System of nerves, see Excito-motory, and Nerves.

Reflex'io, Reflection — r. Palpebrarum, Ectropion.

Réflexion, Reflection.

Réforme, Invaliding.

Refrac'tion, *Refrac'tio, Photocamp'sis, Dia'clasis,* (*re,* and *frangere, fractum,* 'to break.') The change of direction which rays of light experience when they pass obliquely from one medium into another of different density. If the light passes from a rarer to a denser medium, it approaches the perpendicular raised at the point of immersion. The contrary occurs, when it goes from a denser to a rarer medium. The theory of lenses, telescopes, and of the eye, rests entirely on this property of light.

Refrac'ture, *Refractu'ra,* (F.) *Reproduction de la Fracture.* A term applied to the fracture by the surgeon of bones already broken, which have been badly united, &c.

Réfrigérant, see Alembic.

Refrig"erants, *Refrigeran'tia, Psyc'tica, Antither'ma, Frigefacien'tia,* (F.) *Rafraîchissants, Refrigératifs, Desaltérants,* (*re,* and *frigere,* 'to cool.') Medicines which depress the morbid temperature of the body. The chief reputed refrigerants are the Potassæ nitras (?), the Sodæ boras (?), but chiefly the abstraction of caloric by ice and iced drinks, cold water, cold lemonades, soda water, and effervescing draughts internally; and externally, cool air, cold water, evaporating lotions, and frigorific mixtures.

Réfrigératifs, Refrigerants.

Refrigera'tor, see Alembic.

Regenera'tio, (*re,* and *generare, generatum,* 'to beget,') Regeneration, Reproduction.

Regenera'tion, *Regenera'tio, Palingen'esis, Palingene'sia, Redintegra'tio, Anagenne'sis, Anaph'ysis.* Reproduction of a part of the body, which has been destroyed, as the skin, nerves, &c. See Nerves, regeneration of.

Régime Sanitaire, see Regimen.

Reg"imen, gen. *Regim'inis,* (F.) *Régime,* (*regere,* 'to govern.') The rational and methodical use of food, and of everything essential to life, both in a state of health and disease. It is often restricted, in its meaning, to *Diet.* It is sometimes used synonymously with *Hygiene.*

Régime Sanitaire and *Système Sanitaire* mean the measures and regulations adopted to prevent the development and propagation of diseases reputed to be pestilential, — especially plague, yellow fever, and cholera.

Regim'ina, *Regimina'lis,* (from *regimen,* gen. *regim'inis.*) Relating or appertaining to regimen, — as '*regiminal* treatment,' or treatment by regimen.

Regi'na Pra'ti, 'queen of the meadow,' Spiræa ulmaria.

Re'gio, Region.

Re'gio Auricula'ris. The region of the ear.

Re'gio Bucca'lis. The region of the cheek.

Re'gio Cardi'aca, Epigastric region.

Re'gio Cervica'lis. The region of the neck. The cervical region.

Re'gio Epigas'trica, Epigastrium.

Re'gio Facia'lis. The facial region.

Re'gio Fronta'lis. The frontal region.

Re'gio Gas'trica, Umbilical region—r. Hypochondriaca, Hypochondre — r. Hypogastrica, see Hypogastrium—r. Iliaca, Iliac region—r. Inguinalis, Inguinal region — r. Ischiadica, Ischiadic region — r. Jugalis, Jugal region — r. Lumbalis, Lumbi—r. Mentalis, Mental region—r. Mesogastrica, Umbilical region — r. Nasalis, Nasal region —r. Nuchæ, Nuchal region—r. Nuchalis, Nuchal region—r. Occipitalis, Occiput—r. Occipitalis inferior, Nuchal region—r. Olfactoria, see Locus luteus — r. Perinæi, Perinæum — r. Præcordiaca, Præcordial region — r. Pubis, Pubic region — r. Stomachalis, Epigastric region — r. Stomachica, Epigastric region — r. Temporalis, Temple — r. Umbilicalis, Umbilical region.

Re'gion, *Re'gio,* (*regere,* 'to direct.') Anatomists have called *regions* determinate spaces on the surface of the body or of different organs. Thus, the abdomen has been divided into several; to which different names have been given. See Abdomen, Epigastrium, Hypochondrium, Hypogastrium.

Région Ombilicale, Umbilical region—*r. Trachéale,* see Suprasternal.

Re'gional Anat'omy, see Anatomy.

Règles, (from *regula,* 'a rule,') Menses—*r. Déviés,* Menstruation, vicarious — *r. Difficiles,* Dysmenorrhœa.

Réglisse, Glycyrrhiza.

Règne Animal, (from *regnum,* 'a kingdom,') see Animal.

Reg'ular, *Regula'ris,* (F.) *Régulier,* (from *regula,* — *regere,* 'to govern,' — 'a rule.') According to rule. Applied to the types of a disease, and to the pulse, when according to rule.

Reg'ular Practit"ioner. One who practises his profession according to the rules established by law or professional custom.

Reg'ulus, (dim. of *rex,* gen. *regis,* 'a king.') A pure metal. One reduced from its ore.

Reg'ulus Antimo'nii, Antimonium.

Regurgita'tion, *Regurgita'tio,* (*re,* and *gurges,* gen. *gurgitis,* 'a gulf.') The act by which a canal or reservoir throws back substances accumulated in it. *Mitral regurgitation,* for example, means the reflux of blood through the left auriculo-ventricular opening, during the contraction of the left ventricle. Regurgitation is also applied to the *pu'king* or *poss'etting* of infants; and to the *rising* of solids or fluids into the mouth in the adult,— from *re,* and *gorge,* (*gurges,*) 'the throat,' (F.) *Rapport.* What is called "vomiting at pleasure" is regurgitation.

The substance brought into the mouth by regurgitation, the French call *Renvois.*

Reichenhall. There are 19 saline springs at this town, in Upper Bavaria. They are used for bathing purposes, by those laboring under scrofula and incipient phthisis, and also for inhalation.

Reif, (from [Sax.] hpeop,) Psora.

Reil, Island of, Insula cerebri.

Reil, Mod'erator Band of. One of the columnæ carneæ passing from the interventricular septum to the yielding wall in the right ventricle.

Rein, (from [L.] *ren,* gen. *renis,*) Kidney.

Rein Cardiaque. Passive congestion of the kidney from disturbance of the circulation, as by affections of the heart and lungs, mechanical obstacle to the circulation, &c.

Reine des Prés, 'queen of the meadows,' Spiræa ulmaria.

Reinerz, Min'eral Wa'ters of. Reinerz is a small town in Silesia, three German miles from Glatz. The waters are acidulous chalybeates. The principal springs are the tepid drinking spring, the cold spring, and three bathing springs.

Reïnforce'ment, Fascic'ulus of, *F. Cunea'tus.* A band of fibres from the *corpus innominatum* or lateral part of the antero-lateral column of the medulla, which is continued up behind and around the corpus olivare, is lined on its inner or central surface with cineritious substance, enlarges as it ascends, passes over the upper surface of the pons Varolii, and is expanded into the optic thalamus. It thus forms, in its course, the anterior paries of the fourth ventricle, and is brought into view by brushing away the *tuberculum cinereum* or gray matter of the ventricle. This band has received the name owing to its constantly increasing as it ascends, and being mixed up with gray matter on its inner face, from which it seems to derive new fibres.

Reins, (from [L.] *ren,* pl. *renes,*) Kidneys, Lumbi.

Reins Succenturiés ou ***Succenturiaux,*** Capsules, renal.

Reiss'ner's Mem'brane, see Lamina denticulata.

Rejec'tio, *Anago'gē,* (*rejicere, rejectum,* — *re,* and *jacere,* 'to cast,' — 'to cast back.') Every excretion by the mouth,—spitting, expectoration, regurgitation, or vomiting.

Rejec'tio San'guinis e Pulmo'nibus, Hæmoptysis.

Rejuvenes'cence, *Rejuvenescen'tia,* (*re,* and *juvenescens,—juvenis,* 'a youth,'—'growing young.') A renewal of youth. The state of being young again. The assumption of the characteristics of youth by the aged.

Relâchant, Relaxant.

Relâchement, Relaxation.

Relapse', *Hypot'ropē, Epis'trophē, Hypos'trophē, Mor'bi Recidi'va, Hypotropias'mus,* (*re,* and *labor, lapsus,* 'I fall down.') The return of a disease during, or shortly after, convalescence. The French use *Rechute* in this sense; and *Récidive* (*Morbus recidi'vus*) for the return of a complaint, at a greater or less period after the complete recovery of health.

The terms *Relap'sing* or *Recur'rent fe'ver, Short fever, Five-day fever, Seven-day fever, Seventeen-day fe'ver, Irish Fam'ine Fe'ver, Typhin'ia, Syn'ocha, Fam'ine ty'phus, Fam'ine fe'ver, Bil'ious Remit'tent fe'ver, Remitting Icter'ic fe'ver,* and *Mild Yel'low fe'ver, Typhus* seu *Febris recur'rens* seu *recidi'va, Hun'ger Pest,* (F.) *Fièvre à rechutes,* have been given to a form of continued fever, which has occasionally appeared epidemically, as in Edinburgh, in 1843 and 1847, and afterwards in some portions of the United States, and was generally attended with icteric symptoms. The main phenomena disappear at about the end of a week; but in many cases a relapse occurs about the end of a fortnight. Few die of the affection.

Relap'sing Fe'ver, see Relapse.

Rela'tio, (*re,* and *ferre, latum,* 'to carry,') Rapport.

Rela'tion, Func'tions of, see Function.

Relax'ant, *Lax'ans, Malact'icum, Chalas'ticum, Paret'icum,* (F.) *Relâchant,* (*re,* and *laxare,* 'to loosen.') A medicine which diminishes the tension of organs. Mucilaginous and fatty substances are relaxants.

Relaxan'tia, Emollients.

Relaxa'tio, Relaxation — r. Cordis et Arteriarum, Diastole.

Relaxa'tion, *Relaxa'tio, Chala'sis, Chalas'mus,* (F.) *Relâchement.* In Physiology, relaxation is opposed to contraction. In Pathology, it means great looseness of a part.

Relève Paupière, ([L.] *re,* and *levare,* 'to raise.') An instrument for raising the eyelid.

Releveur de l'Anus, Levator ani — *r. de la Lèvre inférieure,* Levator labii inferioris — *r. du Menton,* Levator labii inferioris — *r. de l'Omoplate,* Levator scapulæ — *r. de la Prostate,* Levator prostatæ — *r. de l'Urèthre,* Levator urethræ.

Relig''ious Diseases, (F.) *Maladies religieuses.* Diseases affecting the nervous system, and arising from the excitement of religious emotions. See Convulsionnaire.

Reliquat (F.), (from [L.] *relinquere, relictum,* 'to leave.') The *remnant* or remains of a disease.

Remak' Fi'bres, (after Remak, the German physiologist,) see Fibres, Remak.

Reman'sio Men'sium, (*re,* and *maneo, mansum,* 'I stay,') Amenorrhœa.

Remède, ([L.] *remedium,*) Clyster, Medicament — *r. du Capuchin,* Liquor hydrargyri nitrici — *r. du Duc d'Antin,* Liquor hydrargyri nitrici — *r. de Durande,* Liquor anodynus terebinthinatus.

Reme'dial, Medicinal.

Reme'diate, Medicinal.

Rem'ediless, Incurable.

Remed'ium, (*re,* and *mederi,* 'to heal,') Juvans, Medicament — r. Dentifricium, Dentifrice.

Rem'edy, Medicament—r. English, Cinchona.

Rem'etic, Medicament.

Remis'sio, (*re,* and *mittere, missum,* 'to send,') Decline, Remission — r. Cordis et Arteriarum, Diastole—r. Morbi, Remission—r. Virium, Atony.

Remis'sion, *Remis'sio, Epan'esis, An'esis, Submis'sio, Aph'esis, En'dosis, Mcio'sis.* In a more extensive signification, a temporary diminution of the symptoms of a disease, either acute or chronic, *Remis'sio mor'bi.* Diminution in the febrile symptoms, such as occurs in a remittent fever between the exacerbations.

Remit'tens, Remittent — r. Icterodes, Fever, yellow.

Remit'tent, *Remit'tens, Remit'ting.* Any disease which presents *remissions.*

Remit'tent Fe'ver, *Fe'bris remit'tens, Epan'etus, Exac''erbating, paroxys'mal, subcontin'ual, endem'ic, endem'ial* or *endem'ical fever,* (F.) *Fièvre rémittente,* is one which strikingly exacerbates and remits, but without intermission. The ordinary bilious fever of the United States is a simple remittent — *Epan'etus mi'tis,* (F.) *Fièvre rémittente simple.* Remittent fevers frequently vary in severity with the climate, being more fatal in tropical regions on account of complications, as cerebral derangement, irritable stomach, &c.

Remit'tent Fe'ver, Bil'ious, Remittent fever, see Relapse.

Remit'tent Fe'ver of Chil'dren, Fever, infantile, remittent.

Remit'ting Icter'ic Fe'ver, see Relapse.

Rem'ora, (*re,* and *mora,* 'delay.') Stoppage, stagnation,—as of blood. Also, the name of two

surgical instruments, intended to retain parts *in situ*. The one was used, formerly, in castration, to prevent the intestines from protruding at the inguinal ring; the other, called *Remora Hilda'ni*, (F.) *Arrêt d'Hildan, Echene'is*, was employed to maintain fractures and luxations reduced. It is not now used.

Rem'ora Ara'tri, Ononis spinosa — r. Hildani, see Remora.

Ren, Kidney — r. Mobilis, Kidney, movable — r. Unguiformis, Horseshoe kidney.

Re'nal, *Rena'lis*, (from *ren.*) That which relates to the kidney.

Re'nal Al'teratives, see Alteratives.

Re'nal Ar'teries, *Emulg''ent ar'teries*, are very large and short, and commonly two in number — one to each kidney. They arise from the sides of the abdominal aorta, forming with it a right angle. The left is commonly a little more anterior and elevated than the right. After a short course, they arrive at the fissure of the kidney, where they divide, before entering it, into three or four very considerable branches.

Re'nal Cap'sule, Capsule, renal — r. Nerve, see Splanchnic nerves.

Re'nal Plex'uses, *Emulg''ent Plex'uses*. These are two, one on each side. They proceed from fasciculi of the solar and cœliac plexuses; from the outer side of the semilunar ganglion and the final expansion of the small splanchnic nerves. These plexuses begin by three or four ganglions, situate at the commencement of the renal artery, and they give off from their circumference many fine, straight filaments, which do not anastomose, and which enter the kidney with the divisions of the renal artery. These divisions they accompany.

Re'nal Veins, *Emulg''ent Veins*. These are very large. Their roots follow the same course as the arteries in the substance of the kidney. In the fissure, or pelvic portion of the kidney, they unite into a single trunk, which passes transversely inwards, and opens at the side of the vena cava descendens.

Ren'chus, (ῥεγχος,) Snoring, Stertor.

Ren'culus, *Renic'ulus, Ren'ulus*, (dim. of *ren.*) A small kidney. A lobe of the kidney.

Ren'dering, (as lard,) see Adeps præparatus.

Ren'dles, Rennet.

Reneal'mia Exalta'ta, (after P. and M. L. Rénéaulme, botanical writers of France,) *Alpin'ia exalta'ta* seu *tubula'ta*, (F.) *Rénéaulme*. A plant of British Guiana, which is possessed of diaphoretic and diuretic properties, and, in large doses, is emetic. It is much used there in dropsy, rheumatism, dysentery, &c. The bruised rhizoma is the part employed.

Re'nes (pl. of *ren*) **Succenturia'ti,** (*succenturio*, 'a subcenturion,') Capsules, renal.

Renic'ulus, (dim. of *ren,*) Renculus.

Ren'iform, (*ren,* and *forma*, 'shape,') Nephroid.

Rennes, Min'eral Waters of. Thermal salines in the department of Aube, France, containing carbonic acid and chloride of magnesium. Temperature, 103° to 121° of Fah. Season, from the 1st of May to October.

Ren'net, *Run'net, Coägulum, Py'tia, Pyet'ia*, (from [G.] gerinnen, 'to coagulate' [?],) (F.) *Présure, Caille-lait*. When the fourth stomach or *Abomasus* of the calf is salted and dried, it possesses the property of coagulating milk when a portion of it is soaked in water, and the infusion — *Ren'net, Ren'dles, Ron'ning*, (Prov.) *Heslop, Cheeselope, Yernin, Earning, Preaser, Read, Run'uing, Steep* — is added to milk. *Liquid rennet* or *Rennet wine* may be made, according to Mr. Wm. Procter, Jr., of fresh *rennets*, (about three,) ℥xxiv., *chloride of sodium*, ℥iij., *alcohol*, f℥vj., *white wine*, f℥xvj., *water*, q. s. A tablespoonful of this solution coagulates a quart of milk to a firm curd.

Ren'net Whey, see Serum lactis.

Renoncule, Ranunculus — r. *Bulbeuse*, Ranunculus bulbosus.

Renouée, (*re,* and *nouer*, 'to knot,') Polygonum aviculare — r. *Âcre*, Polygonum hydropiper.

Renoueur, (F.) *Rebouteur, Rhabilleur*, (*re,* and *nouer*, — *nodus*, 'a knot,' — 'to tie or knot.') A *bone'doctor*, a *bone'setter*. One who makes a *trade* of reducing fractures and dislocations.

Renova'tio, (*re,* and *novare, novatum*, 'to make new,') Ananeosis.

Rensselae'ria Virgin'ica, (after General Van Rensselaer, of Albany,) Peltandra Virginica.

Ren'uens, (*renuo*, 'I deny by a motion of the head,') Rectus capitis internus minor.

Ren'ulus, (dim. of *ren,*) Renculus.

Re'num Aton'ia, 'atony of the kidneys,' Nephratonia — r. Paralysis, Nephratonia.

Renuncia'tio, (*re,* and *nunciare, nunciatum*, 'to tell,') Rapport.

Renunc'uli Succenturia'ti, (dim. of *ren,*) see Capsule, renal.

Renversement de la Langue, (*re,* and *vertere, versum*, 'to turn,') Paraglossa — r. *de la Matrice*, Uterus, inversion of the — r. *des Paupières*, Ectropion — r. *du Rectum*, Proctocele — r. *de la Vessie*, Exocyste, Exstrophia of the bladder.

Renvois, (*re,* and *envoyer*, 'to send,') see Regurgitation.

Réophore, (ῥοη, 'a current,' from ῥεω, 'I flow,' and φερειν, 'to carry,') Electrode.

Repanda'tio, (*repandus*,— *re,* and *pandere*, 'to spread,'— 'spread backwards,') Lordosis.

Repara'tion, (*re,* and *parare, paratum*, 'to set in order,') Restauratio.

Repar'ative, *Repar'atory*. Having the power of restoring or repairing.

Repellen'tia, Repellents.

Repel'lents, *Repellen'tia, Repercutien'tia, Apocrus'tica, Stal'tica, Repercus'sives*, (F.) *Répercussifs*, (*re,* and *pellere*, 'to drive.') Medicines which, when applied to a tumefied part, cause the fluids that render it tumid to recede, as it were, from it. Astringents, cold water, ice, &c., are repellents.

Répercussifs, (*re,* and *percutio, percussum*, — *per,* and *quatere*, 'to shake or batter,'— 'I strike back.') Repellents.

Repercus'sio, Contrafissura, Repercussion.

Repercus'sion, *Repercus'sio, Anac'lasis*. Disappearance of a tumor or cutaneous eruption, in consequence of the application of a repellent. The action of a repellent remedy. The French writers use the term *Délitescence, Delitescen'tia*, for the sudden disappearance of a tumor, inflammation, eruptive disease, or purulent collection, without the disease occurring in any other part of the body. In this respect delitescence differs from metastasis. *Délitescence* of an inflammation or 'sudden disappearance' is distinguished by certain French pathologists from *Resolution*. Repercussion also means *Ballottement*.

Much unnecessary apprehension has existed in regard to repelling, or '*driving in*,' as it is called, different morbid affections — gout, and cutaneous eruptions, for example.

Repercus'sives, Repellents.

Repercutien'tia, Repellents.

Reple'tio, (*re,* 'again,' and *pleo*, 'I fill,') Fulness, Plethora.

Repli Longitudinal de la Méninge, (*repli*, 'a fold,' from [L.] *re,* and *plicare*, 'to fold,') Falx cerebri.

Reposit''io, (*re,* and *ponere, positum*, 'to place,') Anaplasis, Reduction, Taxis.

Repos'itor, (*re,* and *ponere, positum*, 'to place.') An instrument intended to replace the uterus in its proper position in case of displacement.

Repoussoir, (*re,* and *pellere, pulsum,* 'to drive,') Punch — *r. d'Arêtes,* Probang.

Rep'rimens, (*re,* and *premere,* 'to press,') Epischeticus.

Reprise. A protracted whistling, sipping inspiration heard in hoopingcough.

Reproduc'tion, *Reproduc'tio, Regenera'tio,* (*re,* and *producere, productum,* — *pro,* and *ducere,* 'to lead,' — 'to bring forth.') The function by which living bodies produce bodies similar to themselves. See Generation. As a general remark, it will be found true, that the larger animals are uniparous, and the smaller, which are more exposed to destruction, multiparous.

Reproduction Mérismatique, see Generation — r. Parthenogenetic, Parthenogenesis.

Reproductiv'itas, (F.) *Reproductivité.* Capability of reproducing.

Repulso'rium, (*re,* and *pellere, pulsum,* 'to drive,') Punch.

Repurga'tio, *Anacathar'sis,* (*re,* and *purgare, purgatum,* 'to cleanse.') According to Castelli, purgation by transpiration or by expectoration. Medicines producing this effect are called *Repurgan'tia.*

Re'quies, gen. *Requie'tis,* (*re,* and *quies,* 'rest,') Acinesia.

Requie'tio, (*re,* and *quiescere, quietum,* 'to become at rest,') Acinesia.

Res Con'tra Natu'ram, 'things against nature,' (F.) *Choses contre nature,* are those things which tend to destroy man; — as disease, and everything connected with it.

Res Culina'ria, Culinary art—r. Medica, Medicina.

Res Natura'les, 'natural things,' (F.) *Choses naturelles.* Those things which, by their union, were conceived to constitute the nature of man; such as the elements, temperaments, humors, spirits, &c.

Res non Natura'les, 'things not natural,' (?) (F.) *Choses non-naturelles.* Those things which, anciently, formed the matter of hygiene. See Non-naturals.

Res Vene'rea, Coition—r. Vestiaria, Vestitus.

Rescision, (*re,* and *scindere, scissum,* 'to cut asunder,') see Amputation.

Réseau, (from *reticellum,* dim. of *rete,* 'a net,') Rete, Reticulum—*r. Admirable,* Rete mirabile—*r. Intermédiare,* see Corpus spongiosum urethræ—*r. Merveilleux,* Rete mirabile.

Reseo'tio, Resection — r. Articulorum, see Resection.

Resec'tion, *Resec'tio,* (*resecare, resectum,* — *re,* and *secare,*—'to cut off.') Act of cutting or paring off. A name given, especially by the French surgeons, to operations in which the carious extremities of long bones, or the unconsolidated extremities of fractured bones forming irregular joints, are removed with the saw. — *Resec'tio articulo'rum, Decapita'tio articulo'rum.*

Rese'da Crispa'ta, (from *resedo,* — *re,* and *sedare,* 'to settle,' — 'I calm or assuage,') R. luteola — r. Lanceolata, R. luteola.

Rese'da Lute'ola, *R. lanceola'ta* seu *crispa'ta, Lute'ola, Weld, Dy'er's Weed.* A European plant naturalized in the United States, which was at one time used as a diaphoretic and diuretic.

Res'erans, (from *resero,* 'I open,') Aperient.

Reserve' Air, see Respiration.

Réservoir de la Bile, ([L.] *re,* and *servare,* 'to keep,') Gall-bladder—*r. du Chyle,* Receptaculum chyli—*r. des Larmes,* Lachrymal sac—r. of Pecquet, Receptaculum chyli — *r. de Pecquet,* Receptaculum chyli — r. of the Thymus, see Thymus.

Reshther, Dracunculus.

Residen'tia, (*resido,* 'I settle or sink down,') Sediment.

Resid'ual Air, see Respiration.

Resi'mus, 'turned up, bent back,' Camus.

Res'in, *Resi'na, Rheti'nē,* (F.) *Résine,* (from *ῥεω,* 'I flow.') A vegetable product, commonly dry and concrete, more or less brittle, inodorous or slightly odorous, insipid, or of an acrid warm taste; of a smooth, glassy fracture, heavier than water, inflammable, insoluble in water, soluble in alcohol, ether, and yolk of egg, and negatively electrifiable by friction. Many resins are used in medicine; the greater part are purgative and irritating. Some act like acrid poisons. See Pinus sylvestris.

Res'in, Ac'aroid, see Xanthorrhœa—r. Botany Bay, see Xanthorrhœa — r. Cayenne, Caoutchouc — r. Cowdie or Cowrie, see Pinus damarra — r. of New Holland, see Xanthorrhœa—r. of the Spruce fir, see Pinus abies — r. of Jalap, Extractum jalapæ resinosum — r. of Mayapple, Resina podophylli — r. of Xanthorrhœa, see Xanthorrhœa.

Resi'na, Resin, see Pinus sylvestris — r. Abietis, see Pinus abies, Pinus picea — r. Abietis humida, see Pinus abies—r. Abietis sicca, see Pinus abies — r. Acaroides, see Xanthorrhœa — r. Alba, see Pinus sylvestris — r. Alba humida, see Pinus abies — r. Benzoës, Benjamin — r. Cayennensis, Caoutchouc—r. Copal, Copal—r. Elastica, Caoutchouc — r. Flava, see Pinus sylvestris — r. Fluida Canadensis, see Pinus balsamea — r. Jalapæ, Extractum jalapæ resinosum—r. Juniperi, Sandarac — r. Laricis, see Pinus larix — r. Lentiscina, see Pistachia lentiscus—r. Liquida pini balsameæ, see Pinus balsamea—r. Liquida pini laricis, see Pinus larix—r. Lutea Novi Belgii, see Xanthorrhœa—r. Nigra, Colophonia — r. Pini, see Pinus sylvestris — r. Pini empyreumatica liquida, see Pinus sylvestris — r. Pini abietis sponte concreta, see Pinus abies.

Resi'na Podophyl'li, *Resin of Mayapple, R. of Podophyllum,* (Ph. U. S., 1863,) *Podophyl'lin.* Prepared from the powdered rhizoma of Podophyllum by the action of alcohol, muriatic acid, and water, a modified formula for which is found in the last edition of the Ph. U. S. (1873). See Podophyllum peltatum. Dose, gr. ¼. to gr. j.

Resi'na Scammo'nii, Extractum scammonii—r. Strobilina, see Pinus balsamea, and Pinus mughos — r. Terebinthi, see Pistacia terebinthus.

Resina'tum, *Rhetini'tes.* Wine impregnated with resin, used by the ancients as a stomachic.

Résine, Resin — *r. de Cayenne,* Caoutchouc — *r. Élastique,* Caoutchouc—*r. de Gaïac,* see Guaiacum — *r. Gomart,* see Bursera gummifera — *r. de Lierre,* see Hedera helix — *r. de Turbith,* see Globularia alypum.

Résinéine, Résinone, Résinéone, (from *resin.*) A solid or liquid product obtained by the distillation of rosin and lime or an alkali.

Resinoce'rum, *Rhetinoce'ron,* (*ῥητινη,* 'resin,' and *κηρος,* 'wax.') A mixture of resin and wax.

Résinone, Résinéinc.

Resino'sa. In Pharmacy, resinous substances.

Res'inous, *Resino'sus, Rhetino'des,* (from *resin.*) Containing resin; like resin.

Résolutifs, (*resolvere,* — *re,* and *solvere, solutum,* 'to loosen,') Discutients.

Resolu'tio, Resolution — r. et Diabrosis Ventriculi, Gastromalacia — r. Membrorum, Paralysis.

Resolu'tio Mor'bi. The resolution or disappearance of a disease; especially when without any critical evacuation.

Resolu'tio Nervo'rum, Paralysis — r. Ventriculi autopeptica, Gastromalacia — r. Virium, Dialysis.

Resolu'tion, *Resolu'tio, Discus'sio.* Removal or disappearance, as of a disease. Resolution is one of the terminations of inflammation, in which the inflamed part returns gradually, and without suppuration, to the healthy condition. Certain inflammatory affections, which terminate in this manner, as mumps, gout, rheumatism, and some

forms of scrofula, have been termed by Mr. J. H. James, *resolving inflammations*. Also, looseness, weakness.

Résolution des Membres, Paralysis.

Resolven'tia, (from *resolvere,* 'to loosen, to dissipate,') Discutients.

Resolv'ing Inflamma'tions, see Resolution.

Res'onance, (F.) *Retentissement, Résonnance, Résonnement,* (*re,* and *sono,* 'I sound.') A return of sound; a resounding; a reverberation of sounds. A thrilling of the voice more loud than natural; or its existence in a part where it is not heard in health,—as detected by auscultation. A thickened and hardened state of the lungs, caused either by a mass of crude tubercles, or by inflammation, is generally considered to produce this phenomenon, by rendering the lung a better conductor of the murmur of the voice in the bronchi. Hence the origin of the term *Bronchoph'ony,* (*bronchus,* and *φωνη,* 'voice,') (F.) *Voix bronchique, Voix tubaire, V. bourdonnaute.*

Resonance is also used in the sense of resounding; as when the chest is said to be resonant on percussion.

Res'onance, Vesic'ulo-tympanit'ic, see Vesiculo-tympanitic — r. Vibrations of, see Sound.

Res'onant, *Res'onans, Res'onus,* (F.) *Retentissant, Résonnant.* Resounding. See Resonance.

Reson'itus, gen. *Resoni'tûs,* Contrafissura.

Résonnance, Resonance.

Résonnement, Resonance.

Resor'bens, (*re,* and *sorbere, sorptum,* 'to suck up,') Absorbent.

Resorp'tio, Absorption, Resorption — r. Cutanea, see Absorption — r. Cutis, see Absorption.

Resorp'tion, *Resorp'tio.* Absorption of a fluid which has been previously deposited in a part, as of pus, blood, serum, &c. See Absorption.

Res'pirable, *Respirab'ilis,* (*respiratio,* and *habilis,* 'fit.') Capable of being breathed. Adapted for respiration.

Respira'men, gen. *Respiram'inis,* (*respiro,* — *re,* and *spiro,* — 'I take breath,') Respiration.

Respiramen'tum, Respiration.

Respirateur, Respirator, Respiratory.

Respira'tio, Respiration — r. Abolita, Apnœa — r. Brevis, Dyspnœa — r. Difficilis, Dyspnœa — r. Stertens, Stertor — r. Stertorosa, see Stertor — r. Stertuosa, Stertor.

Respira'tion, *Respira'tio, Anap'noē, Anapneu'sis, Pneu'sis spira'tio, Respira'men, Respirament'um, Respira'tus, Respir'itus, Spir'itus.* A function proper to animals, the object of which is, to place the materials of the blood — the mixture of the venous blood with lymph and chyle — in contact with atmospheric air, in order that it may acquire the vivifying qualities which belong to arterial blood. The organs for executing this function are, in the mammalia, birds, and reptiles, the *lungs.* In man, the respiration consists of mechanical and chemical phenomena. The mechanical are *Inspiration* and *Expiration.* The evident chemical phenomena consist in the formation of a certain quantity of carbonic acid, the absorption of a part of the oxygen of the air, and the disengagement of a quantity of water in the state of vapor. In the healthy condition the respiration is easy, gentle, regular, and without noise. In man, the respirations are generally about 35 per minute in the first year of life; 25 during the second; 20 at puberty; and 18 in the adult age.

The air of respiration has been divided into *first,* the *residual air,* or that which cannot be expelled from the lungs, but remains after a full and forcible expiration, estimated at 120 cubic inches; *secondly,* the *supplementary* or *reserve* air, or that which can be expelled by a forcible expiration, after an ordinary outbreathing, valued at 130 cubic inches; *thirdly,* the *breath, tidal* or *breathing* air, valued at 26 cubic inches; and *fourthly,* the *complementary* or *complemental* air, or that which can be inhaled after an ordinary inspiration, which amounts to 100 cubic inches. This estimate gives 250 cubic inches as the average volume of air which the chest contains after an ordinary expiration.

Respira'tion, Artific''ial. The attempt to supply the place of natural respiration, when the latter is in abeyance from any cause, as asphyxia.

Respiration Bronchique, see Murmur, respiratory.

Respira'tion, Broncho-vesic'ular, (F.) *R. vésiculo-bronchial.* A morbid modification of the respiratory murmur, having more or less of the characters of the bronchial and vesicular respiration combined. It denotes incomplete solidification of the lung, as from the presence of tubercle.

Respira'tion of the Cells, Murmur, respiratory — r. Coggedwheel, Respiration, jerking — r. *Empêchée,* Respiration, jerking — r. *Entrecoupée,* Respiration, jerking — r. *Exagérée,* see Puerile — r. *Hypervésiculaire,* see Pucrile — r. Interrupted, Respiration, jerking.

Respira'tion, Jerk'ing, *Interrup'ted, Coggedwheel,* or *Wavy respiration,* (F.) *R. Saccadée* ou *Entrecoupée* ou *Empêchée.* When the murmur of inspiration, in place of being continuous, is interrupted as by starts, it is called 'jerking.' It is a concomitant of incipient pleurisy, pleurodynia, spasmodic asthma, and tubereulosis of the lung with corresponding pleuritic adhesion.

Respiration Luctueuse, see Luetueux — r. Metallic, Tintement métallique — r. *Nulle,* see Murmur, respiratory.

Respira'tion, Pos'tural, see Ready method — r. Prone, see Ready method — r. Proof, Docimasia pulmonum.

Respiration Puérile, see Puerile — r. *Râpeuse,* see Murmur, respiratory — r. *Rude,* see Murmur, respiratory — r. *Saccadée,* R. jerking — r. *Sileucieuse,* see Murmur, respiratory — r. *Sufflante,* Murmur, respiratory — r. *Supplémentaire,* see Puerile — r. Tubal, see Murmur, respiratory.

Respira'tion, Vag''inal. The movement of rise and fall of the vagina under the influence of similar movements on the part of the diaphragm.

Respira'tion, Vesic'ulo-bron'chial, Respiration, broncho-vesicular — r. Wavy, Respiration, jerking.

Respiratoire, Respiratory.

Res'pirator, (F.) *Respirateur.* Various instruments, under this name, have been contrived for the purpose of tempering the air before it reaches the lungs in winter. One of the best is that of Jeffrey, which is made of several layers of fine wire tissue. A *charcoal respirator* has been devised to act as a kind of air-filter and prevent noxious effluvia from entering the lungs. The air is said to be made several degrees warmer in this way.

Respirato'rium Ven'tris, Diaphragm.

Res'piratory, *Respirato'rius,* (F.) *Respirateur, Respiratoire.* Appertaining to respiration. An epithet applied to the *murmur* heard by auscultation in a healthy adult, during inspiration and expiration. It marks the entrance of the air into the cells, and its passage out of them. See Murmur.

Res'piratory Cav'ities, Cavities, respiratory — r. External. Nerve, see Thoracic nerves — r. Ganglia, see Encephalon — r. Internal, Nerves, Diaphragmatic nerves — r. Nerve of the face, Facial nerve — r. Nerve, Superior, Spinal nerve.

Res'piratory Pe'riod. The time from the commencement of one inspiration to the occurrence of the next. If this period be regarded as four seconds; a half second, it has been considered, may be occupied in health by inspiration;

a half second in expiration, and two seconds in repose.

Res'piratory Pulse, Pulse, respiratory.

Res'piratory Tract, *Trac'tus respirato'rius.* A middle column of the spinal marrow, described by Sir Charles Bell as that whence the respiratory nerves originate. See Nerves.

Respira'tus, Respiration.

Respir'itus, gen. *Respiritûs,* Respiration.

Resserrant, (*re,* and *serrer,* 'to lock up,') Constipating.

Resserré Ventre, Constipation.

Res'ta Bo'vis, Ononis spinosa.

Restagna'tio, (*re,* and *stagnare, stagnatum,* 'to overflow,') Eructation.

Res'taurans, Analeptic, Corroborant.

Restauran'tia, Analeptica.

Restaura'tio, *Refec'tio, Refec'tus, Analep'sis, Anatrep'sis, Anacom'idē, Anacte'sis, Apocatas'tasis, Recupera'tio,* (*restaurare, restauratum,* 'to repair.') Restoration of strength, after disease or great fatigue; *Epanortho'sis, Recrea'tio, Redintegra'tio, Restaura'tio virium.* Return of the organs to their normal condition, *Recov'ery, Recupera'tion, Repara'tion.*

Restaura'tio Vir'ium, see Restauratio.

Restharrow, Ononis spinosa.

Res'tiform, *Restifor'mis,* (*restis,* 'a rope,' and *forma,* 'shape.') Shaped like a rope, as the *corpora restiformia,* restiform bodies.

Restifor'mis Proces'sus, Coracoid.

Restitu'tio, (*restituo, restitutum,* — *re,* and *statuo,* 'I set up,' — 'I set up again,') Reduction — r. Animæ, Resuscitation—r. Organica, Morioplastice — r. Partium deperditarum, Morioplastice.

Restitu'tion, (*re,* and *statuere,* 'to place.') The act by which, after the head is born, the child's face turns again to the side of the pelvis towards which it was directed at the beginning of labor.

Rest'lessness, Agitation.

Restora'tion, Restauratio.

Restor'ative, Analeptic, Corroborant.

Restraint' Neuro'ses, see Inhibitory.

Restric'tio Intesti'ni Rec'ti seu **A'ni,** (*re,* and *stringere, strictum,* 'to tighten,') Stricture of the rectum.

Resumpti'vum, (*re,* and *sumere, sumptum,* 'to take.') Any agent calculated to restore flesh and strength to one who has been reduced.

Resumpti'vus, *Resumpto'rius,* (*re,* and *sumere, sumptum,* 'to take.') Causing to resume or restore, as the strength.

Resumpto'rius, Resumptivus.

Resurrec'tion Man, Resurrectionist.

Resurrec'tionist, *Resurrec'tion man, Body-snatcher,* (*re,* and *surgere, surrectum,* 'to arise.') An individual who violates the sanctuary of the grave to obtain subjects for dissection.

Resuscita'tion, *Resuscita'tio, Restitu'tio An'imæ,* (*resuscitare,* — *re,* and *suscitare,* — *sursum citare* seu *ciere,*—'to move up,' 'to stir up anew,') *Revivifica'tion.* The restoration of persons, apparently dead, to life. See Asphyxia and Suffocation.

Retch'ing, (Sax. pæcan, 'to retch,') Vomiturition.

Re'tē, 'a net,' *Dic'tyon,* (F.) *Réseau.* A name given to the interlacing and decussation of blood-vessels, lymphatics, fibres, and nerves when they form a kind of network. Plexus. *Rete* has also been applied to the *epiploon.*

Re'tē Ma'jus, Epiploon, gastrocolic — r. Malpighii, Corpus mucosum.

Re'tē Mirab'ilē, (F.) *Réseau admirable, R. merveilleux.* A name given to the ramifications and anastomoses of the internal carotid and vertebral arteries at the base of the brain. In a general manner, the term has been applied to the dense, interlacing network of capillary vessels, made by the sudden breaking up of larger vessels.

Re'tē Mirab'ile seu Re'tē Vasculo'sum Malpig'hii is the plexus formed on the cells of the lungs by the minute ramifications of the pulmonary artery.

Re'tē Muco'sum, Corpus mucosum.

Re'tē Tes'tis, *Re'te Vasculo'sum Tes'tis* seu *Halleri, Plex'us semina'lis.* An irregular plexus or network, formed by the communication of the *Vasa recta, Tu'buli* seu *Duc'tuli rec'ti, Tu'buli seminif'eri recti,* (F.) *Vaisseaux droits,* at the upper and back part of the testicle. These vasa recta are sent out at the back part of the testicle, from the convoluted seminal tubes. The rete vasculosum testis sends out from twelve to eighteen straight tubes, called *Vasa efferen'tia,* which convey the semen from the testis to the epididymus.

Reten'tio, Retention — r. Aerea, Dyspnœa — r. Alvina, Constipation — r. Bilis, Ischocholia.

Reten'tio Flux'us Hæmorrhoïda'lis. Suppression of the hemorrhoidal flux.

Reten'tio Fœ'tûs, Dystocia — r. Lactis, Ischogalactia — r. Lochiorum, Ischiolochia — r. Mensium, see Amenorrhœa — r. Spermatis, Ischospermia — r. Sudoris, Hydroschesis.

Reten'tion, *Reten'tio, Apolep'sia, Apolep'sis,* (*retinere, retentum,* — *re,* and *tenere,* 'to hold,' — 'to hold back.') Accumulation of a solid or liquid substance in canals intended for its excretion, or in a reservoir intended to contain it for a short period.

Reten'tion Cyst, *Reten'tion Tu'mor, Dilata'tion Cyst* or *Tumor.* A cystic formation having its origin in obstruction and dilatation of the larger gland ducts, and retention of the natural secretion in a modified form. (Virchow.)

Reten'tion Tu'mor, Retention cyst.

Reten'tion of U'rine, *Paru'ria Retentio'nis vesica'lis, Ischu'ria vesica'lis, Reten'tio Uri'næ,* (F.) *Rétention d'urine.* A disease in which the urine accumulated in the bladder cannot be evacuated, or, at least, cannot be passed without extreme difficulty. In the former case, the retention is said to be *complete;* in the latter, *incomplete.* Many writers have distinguished three degrees of this affection, to which they have given the names *Dys'ury, Strau'gury,* and *Is'chury.* Retention of urine may depend upon loss of contractility, paralysis of the bladder, &c., or on some obstacle to the passing of the urine, as in cases of pressure of the womb on the bladder, of tumors in its vicinity, foreign bodies in its cavity, inflammation of the urethra, swelling of the prostate, stricture, &c. The pain is extremely violent, and the bladder may be found distended above the pubis. The treatment consists in introducing the catheter or puncturing the bladder, and in combating the cause which has produced the retention by particular means adapted to each case.

Retentissant, (*re,* and *tinnire,* 'to tinkle,' 'to ring,') Resonant.

Retentissement, Resonance — *r. Autophonique,* see Autophonia.

Re'tia (pl. of *Rete*) **U'teri,** see Uterus.

Retic'ular, *Re'tiform, Reticula'ris, Ret'inus, Amphiblestroï'des, Dictoï'des, Retifor'mis,* (from *reticulum,*) (F.) *Réticulaire.* That which resembles a net. An epithet applied to many structures in the body, as *reticular* cartilage.

Retic'ular Bod'y, Corpus mucosum — r. Substance, Cellular tissue — r. Tissue, Cellular tissue, Adenoid tissue.

Reticula'ria Officina'lis, Lichen pulmonarius.

Retic'ulum, (dim. of *Rete.*) The *Bonnet* or *Honeycomb bag* or *stomach,* (Sc.) *Kingshood,* (F.) *Bonnet, Réseau* — the second stomach of the ruminant animal. See, also, Epiploon, and Rete. Also, a delicate framework of adenoid tissue supporting the proper nervous substance of the brain and spinal cord.

Retic'ulum Cuta'neum, Rete mucosum — r. Mucosum, Rete mucosum.

Re'tiform, (*rete,* and *forma,* 'shape,') Reticular.

Re'tiform Tis'sue, Adenoid tissue.

Ret'ina, (from *rete,*) *Tu'nica ret'ina* seu *amphiblestroï'des* seu *reticula'ris* seu *vetifor'mis* seu *in'tima* seu *ner'vea oc'uli, Involu'crum ve'ti compara'tum, Verricula'ris membra'na, Amphiblestroï'des membra'na,* (F.) *Retine.* A soft, pulpy, grayish, semitransparent, very thin membrane, extending from the optic nerve to the crystalline, embracing the vitreous humor, and lining the choroid, without, however, adhering to either of those parts. It terminates by a defined edge — *mar'go denta'tus* — at the posterior extremities of the ciliary processes. It is constituted, according to most anatomists, by the expansion of the optic nerve. The retina appears to be formed of several laminæ, so joined together that it is difficult to discriminate them.

The following are the retinal elements as given by Kölliker and Müller and by Henle: —

Kölliker and Müller. — 1. Layer of rods and cones; 2. Outer granule layer; 3. Intergranule layer; 4. Inner granule layer; 5. Fine molecular layer; 6. Nerve-cell layer (ganglionic); 7. Optic nerve expansion; 8. Ends of radial fibres inserted into 9. Membrana limitans.

Henle. — 1. Mosaic layers, including rods and cones, external limiting membrane, granule layer; 2. Fibre layer (outer fibre layer); 3. Nerve layers, including external granular layer, external ganglion layer, internal granular layer, internal ganglion layer, optic nerve expansion; and 4. Limiting membrane (membrana limitans hyaloidea).

The thin layer of transparent nucleated cells continued from the indented border, near the outer ledge of the ciliary processes, is called the *pars ciliu'ris ret'inæ.*

The retina is the essential organ of vision; on it the images of objects are impressed. Both it and the optic nerve are devoid of general sensibility. They may be punctured or lacerated without pain being experienced. The nerve of general sensibility distributed to the eye is the fifth pair.

The retina is liable to various morbid conditions, as hyperæmia, inflammation — *retinitis* — apoplexy, anæmia, atrophy, fatty degeneration, tumors, embolism of its central artery, separation or detachment, &c.

Ret'ina, Anæ'mia of. A peculiar pallid condition of the retina, dependent on contraction of the retinal vessels. It has sometimes been termed *Epilepsy of the retina,* when occurring during an epileptic attack.

Ret'ina, At'rophy of. An occasional result of inflammation of the structures of the eye, glaucoma, &c. It may be partial or complete, and accompanied with degeneration and atrophy of the optic nerve.

Ret'ina, Em'bolism of the Central Ar'tery of. A condition produced by obstruction from emboli, characterized by sudden and total blindness, and usually dependent on valvular disease of the left side of the heart.

Ret'ina, Ep'ilepsy of, see Retina, anæmia of — r. Glioma of, see Glioma — r. Ischæmia of, Ischæmia retinæ.

Ret'ina, Separa'tion of. Detachment of the retina from excessive elongation of the coats of the eye in severe myopia, diminution in the bulk of the vitreous humor, tumors, effusion, &c.

Retinac'ula, see Retinaculum — r. of Ileocæcal valve, see Fræna of the valve of Bauhin — r. Morgagnii, see Fræna of the valve of Bauhin.

Retinac'ulum, (*retinere,* — *re,* and *tenere,* 'to hold,'—'to hold back.') A surgical instrument formerly used in the operation of castration, and in that of hernia, to prevent the intestines from falling into the scrotum. *Retinac'ula* are also band-like extensions of a cellulo-membranous structure, which seem to suspend the ovum in the follicle of De Graaf. They correspond to the chalazæ of the egg of the bird. See Bride.

Retinac'ulum Ten'dinum Peroneo'rum, *Vagi'na malleola'ris exter'na.* The ligamentous sheaths that retain *in situ* at the outer ankle the tendons of the peroneal muscles.

Ret'inal, *Retina'lis.* Relating or appertaining to the retina.

Ret'inal Ap'oplexy, see Retinitis.

Rétine, Retina.

Retini'tis, gen. *Retini'tidis, Inflamma'tio ret'inæ, Amphiblestroïdi'tis, Dictyï'tis,* (F.) *Retinite,* (*retina,* and *itis.*) Inflammation of the retina. When it occurs, it is usually an accompaniment of other ophthalmic affections. When there is an extreme tendency to extravasation of blood into the retina, the affection is called *Retinitis apoplectica, Ret'inal ap'oplexy.*

Retinitis may be associated with syphilis, and is then called *Retinitis syphilit'ica.* When this form is confined to the region of the yellow spot, and has a marked tendency to recur, it is termed *Cen'tral recur'rent retini'tis.*

A form of retinitis often met with in Bright's disease of the kidney is designated *Retini'tis albumino'rica, Nephrit'ic retinitis.*

Retinitis Leucæ'mica is an affection of the retina connected with leucocythæmia.

Retini'tis pigmento'sa, R. hemeralop'ica, is characterized by a deposit of black pigment in the retina, which encroaches on the field of vision, the patient seeing better in the daytime than at night. In *Retinitis nyctalop'ica,* the patient's vision is better in the dusk than in the bright light.

In *Retini'tis Hæmorrhag''ica,* there is infiltration of the nerve-fibre layer by extravasation, congestion of the veins, &c.

Retini'tis Albumino'rica, see Retinitis — r. Apoplectica, see Retinitis — r. Central recurrent, see Retinitis—r. Hæmorrhagica, see Retinitis—r. Leucæmica, see Retinitis—r. Nephritic, see Retinitis—r. Nyctalopica, see Retinitis—r. Pigmentosa, see Retinitis — r. Syphilitica, see Retinitis.

Rétinoïde, see Rhétinolé.

Rétinolé, see Rhétinolé.

Ret'inoscopy, *Retinoscop'ia,* (*retina,* and σκοπεω, 'I view.') Examination of the retina.

Ret'inus, (from *rete.*) Reticular.

Retombet, Gros, Passerina tartonraira.

Retort, *Retor'ta, Ba'tia, Cor'nu, Cornu'ta, Cornes'ta, Cornumu'sa,* (F.) *Cornu,* (*retorqueo,* — *re,* and *torqueo, tortum,* — 'I bend back.') A vessel, commonly of glass or earthenware, employed in distillation. It may have a *tubulure* for admitting substances while distillation is going on; it is then said to be *tu'bulated,* (F.) *Cornue tubulée.*

Retrac'tion, *Retrac'tio,* (*retrahere,* — *re,* and *trahere, tractum,* — 'to draw back.') State of a part, when drawn towards the centre of the body or backwards; — as retraction of the testicles. Sometimes it is used synonymously with *shortening* or *drawing up;* as in *retraction* of the thigh.

Rétraction de la Matrice, Retroversio uteri.

Retrac'tor. A piece of muslin split into two tails, applied around the bone or bones to prevent the soft parts from being injured by the saw.

Retrac'tor An'guli O'ris, Buccinator — r. Recti, Rectococcygeus.

Ret'rahens Aur'is, (from *retrahere,* 'to draw back,') *Poste'rior* seu *Tri'ceps Aur'is, Tricauda'lis, Ret'rahens Auric'ulæ* seu *Auric'ulam, Secun'dus proprio'rum Auric'ulæ, Bicauda'lis, Dep'rimens Auric'ulæ, Pro'prius Aur'is exter'nus,* (F.) *Mastoïdo-conchinien, Mastoïdo-auriculaire* (Ch.), *Auriculaire postérieur.* It consists of one or more small fasciculi, or fleshy, thin, somewhat irregular fibres, situate behind the ear. These are attached to the mastoid process, and pass horizontally forwards, to terminate at the convexity formed by the concha of the ear. If this muscle

had any use, it would carry the ear backwards.

Retrait Ventriculaire, Heart, hypertrophy of.

Rétrécissement, (*re,* and *étrécir,* [old F.] *estrécir,* from [L.] *stringere, strictum,* 'to make narrow,') Arctatio, Stricture — *r. de l'Urèthre,* Urethrostenosis.

Retrimen'ta Vesi'cæ, Urine.

Retrimen'tum, ('dregs,' from *re,* and *terere,* 'to cleanse as by rubbing.') Excrement.

Re'tro (L.), in composition, behind, backwards.

Ret'roceps, (*retro,* and *capio,* 'I take.') A form of obstetric forceps, which grasps the back portion of the fœtal head.

Retroces'sion, *Retroces'sio, Retroces'sus, Retrogres'sus,* (*retrocedere, retrocessum,* — *retro,* and *cedere,*—'to give place.') The act of going back. A disappearance or metastasis of a tumor, eruption, &c., from the outer part of the body to the inner.

Retroces'sus, gen. *Retroces'sûs,* Retrocession.

Retroflex'io U'teri, (*retro,* and *flectere, flexum,* 'to bend,') see Retroversio uteri.

Retrogres'sus, gen. *Retrogres'sûs,* (*retro,* and *gradior, gressus,* 'I step,') Retrocession.

Retrocœsophage'al. Behind the œsophagus, as in the areolar tissue, — *retrocœsophageal* abscesses, for example.

Retroperitone'al. Relating or belonging to internal parts behind the peritoneum, as *retroperitoneal* hernia.

Retropharynge'al, *Retropharynge'us,* (*retro,* and *pharynx,* gen. *pharyngis,* 'the pharynx.') Relating to parts behind the pharynx, — as *retropharyngeal* abscess, — an abscess in the areolar tissue behind the pharynx.

Rétropulsion de la Matrice, (*retro,* and *pellere, pulsum,* 'to drive,') Retroversio uteri.

Retroü'terine, *Retroüteri'nus,* (F.) *Rétro-utérin,* (*retro,* and *uterus.*) Behind the uterus, as *retroüterine* abscess, (F.) *Abcès rétro-utérin ;*— an abscess seated behind the uterus.

Retrovaccina'tion, (*retro,* and *vaccination.*) Vaccination with matter obtained from the cow, after inoculating the animal with vaccine matter from the human subject.

Retrover'sio U'teri, (*retro* and *vertere, versum,* 'to turn,') *Retrover'sion of the U'terus, Ædopto'sis U'teri retrover'sa, Anapod'isis* seu *Anapodis'mus U'teri,* (F.) *Rétroversion, Rétraction, Oblicquité* ou *Rétropulsion de la Matrice.* A change in the position of the uterus, so that the fundus of the organ is turned towards the concavity of the sacrum, while the neck is directed towards the symphysis pubis. This displacement is commonly attended with constipation, tenesmus, and retention of urine. Its usual period of occurrence is between the third and fourth months of pregnancy, before the uterus has escaped above the superior aperture of the pelvis. In the treatment, the catheter must be regularly used twice a day, until the uterus, by its growth, rises above the pelvis. The catheter should be small, flat, and curved considerably more than common, in consequence of the distorted course of the urethra. The bowels must be kept open; and absolute rest, in a recumbent posture, be enjoined. Should it be impracticable to draw off the urine, attempts must be made to replace the uterus. The woman being on her hands and knees, the fore and middle fingers of the accoucheur's left hand are to be passed up the rectum to the fundus uteri; which they must elevate, while the cervix uteri is carefully depressed by two fingers of the right hand in the vagina. Should the fingers employed to elevate the fundus not be long enough to effect this object, a piece of whalebone may be substituted, to which a small piece of sponge is attached as a pad, or a repositor may be used.

A simple inclination or bending of the uterus backwards is called *Retroflex'ion of the U'terus, Retroflex'io U'teri;* not unfrequently, however, this term is employed synonymously with Retroversion of the Uterus.

Rétroversion de la Matrice, Retroversio uteri.

Reü'nio, (*re,* and *unire,* 'to unite,') Synthesis— r. Partium separatarum, see Synthesis — r. per Primam intentionem, see Intention — r. per Secundam intentionem, see Intention — r. Vasorum, Anastomosis.

Réunion Primitive, see Intention — *r. Secondaire,* see Intention.

Revaccina'tion, see Vaccina.

Revalen'ta Arab'ica, see Ervum.

Révasserie, (from *rêve,*) Incoherence; see Somnium.

Rêve, Somnium.

Réveil, (*re,* and *éveiller,* 'to awaken,') see Sleep — *r. en Sursaut,* see Sleep.

Réveilleur, (from *réveil,*) see Baunscheidtismus.

Revel'lent, (*re,* and *vellere,* 'to pluck,') Derivative.

Réverie, (from *rêve,*) Aphelxia.

Rev'ery, Aphelxia.

Revivifica'tion, (*re, vivere,* 'to live,' and *facere,* 'to make,') Resuscitation.

Révulsif, (*re,* and *vellere, vulsum,* 'to pluck,') Derivative.

Révulseur, see Baunscheidtismus.

Revul'sion, *Revul'sio, Antis'pasis.* The act of turning the principle of a disease from the part in which it seems to have taken its seat. Rubefacients, vesicatories, bleeding in the foot, &c., are often used for this purpose. See Derivation.

Revul'sive, Derivative—r. Bleeding, see Bloodletting.

Revulso'rius, Derivative.

Rex Amaro'rum, 'king of bitters,' Soulamen amara — r. Metallorum, Aurum.

Reynolds's Specif'ic, see Vinum colchici.

Rezzle, Wheeze.

Rha, (ῥᾶ, and ῥῆ, called, however, after the Rha or Wolga in Pontus,) Rheum.

Rhabar'barum, (ῥᾶ, and βαρβαρος, 'foreign,') Rheum — r. Album, Convolvulus mechoacan — r. Antiquorum, Rheum Rhaponticum — r. Dioscoridis, Rheum Rhaponticum — r. Monachorum, Rumex patientia—r. Nigrum, Convolvulus jalapa — r. Pauperum, Thalictron — r. Plebeiorum, see Rhamnus frangula — r. Sibericum, Rheum — r. Tartaricum, Rheum — r. Turcicum, Rheum.

Rhabarbe, Rheum — *r. Blanche,* Convolvulus mechoacan — *r. Fausse,* Thalictron — *r. des Indes,* Convolvulus mechoacan — *r. des Moines,* Rumex alpinus — *r. Sauvage,* Rumex patientia.

Rhabdoï'des (Sutu'ra), (ῥαβδοειδης, from ῥαβδος, 'a rod or staff,' and ειδος, 'resemblance,') Sagittal suture.

Rhabdomyo'ma, (ῥαβδος, 'a stripe,' and *myoma.*) Myoma involving the striped muscular fibres.

Rhabilleur, (*re,* and *habiller,* 'to dress,') Renoueur.

Rhache'tæ, Rhachitæ.

Rhach'etrum, (ῥαχετμον, from *rhachis.*) The middle of the spine.

Rhachiæ'i, Rhachitæ.

Rhachi'agra, Raehisagra.

Rhachial'gia, Raehialgia, Rhachiodynia, Spinal irritation.

Rhachialgi'tis, gen. *Rhachialgi'tidis,* (*rhachis,* αλγος, 'pain,' and *itis,*) Spinal irritation, Myclitis.

Rhachid'agra, Rachisagra, Rachialgia, Rhachiodynia.

Rhachiocypho'sis, Gibbositas, Hump.

Rhachiodyn'ia, (*rhachis,* and οδυνη, 'pain,') *Rhachial'gia.* Pain in the vertebral column.

Rhachiomyeli'tis, gen. *Rhachiomyeli'tidis,* (*rhachis,* and *myelitis,*) Myelitis.

Rhachiomyelophthi'sis, (*rhachis*, μυελος, 'marrow,') Tabes dorsalis.

Rhachioparal'ysis, (*rhachis*, and *paralysis*,) Paraplegia.

Rhachiople'gia, (*rhachis*, and πληγη, 'a stroke,') Paraplegia.

Rhachioscolio'ma, gen. *Rhachioscolio'matis*, (*rhachis*, and *scolioma*,) Scoliosis.

Rhachioscolio'sis, (*rhachis*, and *scoliosis*,) Scoliosis.

Rhachiostropho'sis, (*rhachis*, and στρεφω, 'I turn,') *Contor'tio colum'næ vertebra'lis.* Deviation of the vertebral column.

Rhachiot'omus, *Rhachiot'omum*, (*rhachis*, and τομη, 'incision.') An instrument for opening the vertebral column.

Rhachipa'gia, *Rachipa'gia*, (*rhachis*, and παγω, 'I fasten.') A monstrous union of two fœtuses, in which they are connected at the spine.

Rhachiparal'ysis, (*rhachis*, and *paralysis*,) Paraplegia.

Rhachiphy'ma, gen. *Rhachiphy'matis*, Rachiphyma.

Rhachirrheu'ma, gen. *Rhachirrheum'atis*, (*rhachis*, and ῥευμα, 'a defluxion, rheumatism,') Lumbago.

Rha'chis, gen. *Rha'chidis*, (ῥαχις, gen. ῥαχιδος,) Vertebral column — r. Nasi, see Nasus.

Rhachis'agra, Rachisagra.

Rhachi'tæ, (from *rhachis*,) *Rhachiæ'i, Rachi'tæ, Rhache'tæ,* or *Rachiæ'i.* The muscles of the spine.

Rhachi'tes, Spinal; Medulla spinalis, (ῥαχιτης μυελος.) See also Rachitis (ῥαχιτης νοσος).

Rhachit'icus, Rachiticus.

Rhachi'tis, gen. *Rhachi'tidis*, Rachitis — r. Adultorum, Mollities ossium — r. Spinalis, Rachisagra.

Rhachitis'mus, (from *rhachis*,) Rachitis.

Rhacho'sis, Rachosis.

Rha'chus, (ῥαχος,) *Rha'cus, Rha'gus,* (from ῥαγω, or ῥηγνυμι, 'I break.') A wrinkle. A laceration of the skin. A lacerated ulcer — *ul'cus lac''erum.*

Rha'cus, (ῥαχος,) Rhachus, Wrinkle.

Rhæbauch'en, (ῥαιβος, 'crooked,' and αυχην, 'neck,') Torticollis.

Rhæbocra'nia, (ῥαιβος, 'crooked,' and κρανον, 'skull,') Torticollis.

Rhæbod'erē, (ῥαιβος, 'crooked,' and δερη, 'neck,') Torticollis.

Rhæboscel'ia, (ῥαιβος, 'crooked,' and σκελος, 'leg,') see Rhæbosis.

Rhæbo'sis, (from ῥαιβος, 'crooked,' and *osis*.) Crookedness, as of the legs, — *Rhæboscel'ia, Scelocambo'sis.*

Rhag'ades, pl. of *Rha'gas,* (ῥαγας, gen. ῥαγαδος,) *Rhaga'dia,* (from ῥαγω, or ῥηγνυμι, 'I break or rend,') *Scissu'ræ, Fissu'ræ, Fi'mæ.* Ruptures, chaps, or narrow and long ulcers, which form near the origin of mucous membranes, especially around the anus, and which are generally owing to the syphilitic virus.

Rhag'ades, see Fissure.

Rha'gē, *Rhag''ia, Ra'gē,* (ῥαγη.) Suffixes denoting violent rupture or discharge, as in Hemor*rhage,* Menor*rhagia,* &c. Also, a fissure.

Rha'ges, (from ῥαξ, gen. ῥαγος, 'a grape,') Uvæ passæ.

Rhag'icus, (ῥαγικος,) Rhagoides.

Rhagoidei'tis, gen. *Rhagoidei'tis,* (*rhagoides—tunica,*—and *itis*,) Uveitis.

Rhagoï'des, *Rhago'des, Rhagoïdeus, Rha'gicus,* (ῥαγοειδης, from ῥαξ, gen. ῥαγος, 'a berry,' 'a grape.') Grape-like; as *Tunica rhagoides;* the uvea. Also, the choroid coat of the eye.

Rha'gus, (ῥαγος,) Rhachus, Wrinkle.

Rham'ni Bac'cæ, see Rhamnus — r. Succus, see Rhamnus.

Rham'nus, (ῥαμνος,) *R. cathar'ticus, Spi'na cervi'na* seu *domes'tica* seu *infecto'ria, Rham'nus soluti'vus, Cervispi'na, Buck'thorn, Purg''ing buck'thorn,* (F.) *Nerprun purgatif, Bourguépine, Épine de cerf. Family,* Rhamnaceæ. *Sex. Syst.* Pentandria Monogynia. The berries — *Rhamni Baccæ* — have a faint and disagreeable odor, and bitterish, nauseous taste. Their juice — *Rhamni Succus* — is cathartic, and apt to excite griping, which must be obviated by the use of diluents. The name *Cathartin, Cathartic acid,* has been given to a purgative principle derived from the buckthorn.

Rham'nus Alater'nus, *R. Hispan'icus, Alater'nus latifo'lius, Com'mon alater'nus,* (F.) *Alaterne.* The leaves have been used as detergents and astringents, in the form of gargle especially.

Rham'nus Fran'gula, *Black Al'der, Frangula al'nus, Al'nus ni'gra,* (F.) *Aune noir, Bourdane, Bourgène.* All the parts of this tree, as well as of the common alder, are astringent and bitter. The bark is most so. The inner, yellow bark of the trunk or root, once called *Rhabar'barum plebeio'rum,* acts as a cathartic. It has also been employed as an anthelmintic.

Rham'nus Hispan'icus, R. alaternus — r. Jujuba, see Jujube — r. Lotus, see Jujube — r. Ziziphus, see Jujube.

Rhan'ter, gen. *Rhante'ris,* (ῥαντηρ, from ῥαινω, 'I besprinkle,') Canthus (greater).

Rhaphane'don, Raphanedon.

Rhapha'nia, Raphania.

Rhaph'anis, Raphanus hortensis.

Rhaph'anus, Rapa, Raphanus hortensis.

Rha'phē, Raphe, Suture.

Rhaphidago'gus, (ῥαφις, gen. ῥαφιδος, 'a needle,' and αγω, 'I lead,') Porte-aiguille.

Rhaph'ion, (ῥαφιον, dim. of ῥαφις,) Needle.

Rhaph'is, gen. *Rhaph'idis,* (ῥαφις,) Needle. Also, Rapa.

Rhaphosym'physis, (ῥαφη, 'suture,' and συμφυσις, 'union.') Union by suture, — as of the bones of the cranium.

Rha'phus, (ῥαφος,) Rapa.

Rha'phys, (ῥαφυς,) Rapa, Raphanus hortensis.

Rhapon'ticum, (*rha*, or rhubarb, of Pontus,) Rheum Rhaponticum — r. Vulgare, Centaurea centaurium.

Rhapontique, Rheum rhaponticum.

Rhaps, (ῥαπυς,) Raphanus hortensis.

Rha'pys, (ῥαπυς,) Raphanus hortensis.

Rhata'nia, Krameria rhatania.

Rhat'any, Krameria.

Rhax, gen. *Rha'gis,* (ῥαξ, gen. ῥαγος,) see Vitis vinifera.

Rhe'gē, (ῥηγη,) Cramp, Contusion, Laceration.

Rheg'ma, gen. *Rheg'matis,* (ῥηγμα,) Cramp, Contusion, Laceration, Rhexis — r. Ligamentare, Apospasma.

Rheg'mus, (ῥηγμος,) Cramp, Contusion, Laceration.

Rhembas'mus, (ῥεμβασμος, from ῥεμβω, 'I wander about.') Somnambulism.

Rhem'bē, *Rhem'bus,* (ῥεμβη, 'a wandering about,' from ῥεμβεω, 'to wander about.') Irregularity in the return of febrile paroxysms.

Rhem'bus, (ῥεμβος,) Rhembe.

Rhen'chus, (ῥεγχος,) Rattle, Snoring.

Rhenx'is, (ῥεγξις,) Rattle, Snoring.

Rhe'on, Rheum.

Rheophore, (from ῥεω, 'I flow,' and φερειν, 'to carry,') Electrode.

Rhe'tinē, (ῥετινη, from ῥεω, 'I flow,') Resin.

Rhetini'tes, (ῥετινιτης,) Resinatum.

Rhetinoce'ron, (*rhetine*, and κερος, 'wax,') Resinatum.

Rhetino'des, (ῥητινωδης, from *rhetine*,) Resinous.

Rhetinoïdes, see Rhétinolé.

Rhétinolé, (from *rhetine*.) A name given by M. Béral to a medicine which results from the union of a resin with other medicinal substances.

The *Rhétinolés* of Béral differ from the *Rhétinoïdes* in containing but one resin, whilst in the latter there are several.

Rhetoran'chē, (*ῥήτωρ,* 'a public speaker,' and *ἀγχω,* 'I strangle,') see Pharyngitis, follicular.

Rheum, (pronounced *room,*) *Rheu'ma,* (F.) *Rhume,* (*ῥευμα,* from *ῥεω,* 'I flow.') Any thin watery discharge from mucous membranes or skin; as the thin discharge from the air-passages arising from cold.

Rheum, Salt. A popular name in the United States, like 'tetter,' for various cutaneous affections, of the eczematous and herpetic forms more especially. It is at times applied to a kind of chronic psoriasis; and likewise to cutaneous affections in those who immerse the hands in metallic or acid solutions. It has been defined "a vague and indefinite popular name, applied to almost all the non-febrile cutaneous eruptions which are common among adults, except ringworm and itch."

Rhe'ŭm, *Rhabar'barum, Rhe'on, Rha, Rhœ'um, Lap'athum orienta'lē* seu *Chinen'sē, Rhabar'barum ve'rum* seu *Tartar'icum* seu *Siber'icum* seu *Tur'cicum, Rhu'barb,* (F.) *Rhabarbe, Rhubarbe,* (from *Rha,* ['Ρη, 'Pa.] now called Wolga, a river in Russia, from which it was first brought.) *Ord.* Polygonaceæ. *Sex. Syst.* Enneandria Trigynia. The root—*Rhe'um* (Ph. U. S., 1873) *Rhe'i Ra'dix* (Ph. B., 1867)—is the part used in medicine. Its odor is aromatic, peculiar, and rather nauseous; taste, somewhat aromatic, subacrid, bitterish, and astringent. It colors the saliva and the urine yellow. It is easily pulverized, and forms a powder of a bright buff-yellow color. Both water and spirit extract its virtues. Rhubarb root is purgative, stomachic, and astringent. [?] It is chiefly used for the properties first mentioned. Externally the powder is sometimes sprinkled over ulcers, to assist their granulation. Dose, ℈j. to ʒss. of the powder. In a smaller dose it is stomachic. Numerous species of Rheum, *R. palmatum, R. undulatum,* and *R. compactum,* yield rhubarb-root.

The rhubarbs most used in the United States are the *Chinese'* or *In'dia Rhu'barb* — *Rhe'um Sinen'sē* seu *In'dicum;* the *Rus'sian, Tur'key* or *Bucha'rian Rhu'barb* — *Rhe'um Rus'sicum* seu *Tur'cicum;* and *Europe'an Rhu'barb.*

Rhe'um Compac'tum, Rheum—r. Indicum, see Rheum — r. Palmatum, Rheum.

Rhe'um Rhapon'ticum, *Rhapon'tic Rhu'barb, Rhapon'ticum, Rhabar'barum Dioscor'idis* seu *Antiquo'rum,* (F.) *Rhapontique, Rhapontic, Rapontic.* The root of this seems to have been the rhubarb of the ancients. It is more astringent than that of the rheum palmatum, and less purgative; for the latter purpose, two or three drachms being required for a dose. *French, Rhapontic,* or *Krimea Rhubarb,* is obtained from this species, as well as from *R. undulatum,* and *R. compactum.*

Rhe'um rhapon'ticum is the *Pie rhubarb* or *Pie plant,* cultivated for its fleshy esculent leafstalks.

Rhe'um Rus'sicum, see Rheum—r. Sinense, see Rheum—r. Turcicum, see Rheum—r. Undulatum, see Rheum.

Rheu'ma, gen. *Rheu'matis,* (*ῥευμα,* gen. *ῥευματος,* from *ῥεω,* 'I flow.') Catarrh, Diarrhœa, Rheum, Rheumatism. Also, inflammation of a fibrous tissue, as in rheumatism and gout. In composition, a flow, a defluxion; also, rheumatism.

Rheu'ma Catarrha'lē, Bronchitis, chronic — r. Epidemicum, Bronchitis, chronic; Catarrh, epidemic — r. Pectoris, Catarrh — r. Uteri, Leucorrhœa.

Rheumap'yra, (*rheuma,* and *πυρ,* 'fever,') Rheumatism, acute.

Rheumarthri'tis, (*rheuma,* and *arthritis,*) see Rheumatism, acute.

Rheumarthro'sis, (*rheuma,* and *arthrosis,* 'an affection of the joints,') see Rheumatism, acute.

Rheumatal'gia, (*rheuma,* and *ἀλγος,* 'pain,') Rheumatism, chronic — r. Arthritica, see Rheumatism, acute.

Rheumat'ic, (*ῥευματικος.*) *Rheumat'icus, Rheumatis'mal,* (F.) *Rhumatismal, Rhumatique.* Belonging to rheumatism: as rheumatic fever. Also, applied to one affected with rheumatism, (F.) *Rheumatisant.*

Rheumat'ic At'rophy, Atrophy, rheumatic.

Rheumat'ic Diath'esis, *Diath'esis rheumat'ica.* The special condition of the body that gives occasion to rheumatism. It may exist without presenting the usual phenomena in the joints, whilst the heart may be seriously affected.

Rheumat'ic Gout, see Rheumatism, acute.

Rheumat'ics, Rheumatism.

Rheu'matism, *Catarrhœ'a,* (from *rheuma,*) *Do'lor Rheumat'icus et arthrit'icus* (Hoffman), *Rheumato'sis, Myoso'tis, Rheu'ma, Myodyn'ia,* (vulg.) *Rheu'matiz, Rheumat'ics,* (F.) *Rhumatisme.* A kind of shifting phlegmasia or neuralgia, sometimes seated in the muscles, sometimes in the parts surrounding the joints; and at others, within them, *Flying gout.* Hence the names *Muscular, Articular,* and *Synovial,* which have been applied to it. The disease may be *acute* or *chronic.*

Rheu'matism of the Abdo'men, Cœliorrheuma.

Rheu'matism, Acute', *Rheumatis'mus acu'tus* seu *articulo'rum acu'tus* seu *universa'lis febri'lis* seu *inflammato'rius* seu *hypersthen'icus, Arthro'sia acu'ta, Rheumatop'yra, Rheumap'yra, Fe'bris rheumat'ica inflammato'ria, Syn'ocha rheumat'ica, Myoso'tis, Myi'tis, Cau'ma* seu *Arthri'tis rheumatis'mus, Arthrorheumatis'mus, Synovi'tis rheumatisma'lis, Hæmoärthri'tis, Rheumat'ic Fe'ver,* (F.) *Rhumatisme aigu, R. articulaire aigu, Fièvre rhumatismale,* usually comes on with the ordinary symptoms of fever; soon after which, or simultaneously, or even before the appearance of febrile signs, excruciating pains are felt in different parts of the body, particularly in the larger joints, which are more or less red and swollen; the pain shifting from one to the other, at times with great rapidity. The disease rarely terminates in less than six weeks, during the greater part of which period the febrile symptoms remain severe; and, what is peculiar to the disease, the skin, although it feels extremely hot, may be covered daily with a profuse perspiration, and the pulse appears in no way modified by it. It is one of the essential symptoms of the affection, and consequently affords no relief. The only danger to be apprehended from acute rheumatism, notwithstanding the apparent severity of the symptoms, is the translation or extension of the disease — *metastat'ic rheu'matism* — to some internal part, especially to the heart. This tendency must always be borne in mind. *Acute* rheumatism seldom terminates in *chronic;* they who are liable to the former are rarely so to the latter, and conversely. Sometimes it assumes a *subacute* form, *Rheumatis'mus subacu'tus,* (F.) *Rhumatisme subaigu.* The disease will generally run its course in spite of treatment. The usual antiphlogistic plan had better be pursued during the first days of the disease. Bloodletting may be employed, if the vigor of the patient and of the disease seem to require it; but, although the blood is generally buffy, bleeding does not usually seem to afford much relief. The bowels must be kept open, effervescent draughts be administered, and opium be given in full doses to allay pain. This is generally all that is necessary during the first week; after which, advantage will usually be obtained from the exhibition of the sulphate of quinia with sulphuric acid. It does not augment the excitement, and will be found proper in almost all cases. Rheumatic in-

flammation is very different from other varieties, and this may account for the anomaly. After a few weeks the disease usually goes off, but leaves the patient very liable to a recurrence on slight exposures or errors of diet. At times acute rheumatism of the joints puts on the appearance of gout, and seems to be a complication of the two affections. It is then called *Gout'y* or *Arthrit'ic rheumatism*, *Rheumat'ic gout*, *Rheumatal'gia arthrit'ica*, *Rheumarthro'sis*, *Rheumarthri'tis*, *Arthri'tis rheumat'ica* seu *juveni'lis*, *Chron'ic Ostearthri'tis*, *O. lon'ga*, *Rheu'matoid* or *Rheumatic arthritis*, *Nod'ular rheumatism*, (F.) *Rhumatisme Noueux*, *Arthrite Rhumatismale Chronique*. When accompanied with deformity of a joint, it is called *Arthri'tis deformans;* of several joints, *Polyarthri'tis deformans*. When it affects the hip-joint of old people, it is called *Morbus coxæ senilis*.

Rheu'matism of the Arm, Brachiorrheuma — r. Arthritic, see Rheumatism, acute — r. of the Bladder, Cystorrheuma — r. of the Bowels, Enterorrheuma.

Rheu'matism, Cap'sular, *Rheumatis'mus capsula'ris*. Rheumatism seated in the lining membrane of the joints and bursæ of the tendons. The parts most liable to its attacks are the feet and hands, where it is generally easily recognized by the enlargement of the joints; but the peculiar characters of the disease are, perhaps, most strikingly seen when it attacks the knee.

Rheu'matism, Cer'ebral, *Rheumat'ic Meningi'tis*, *Rheumatic Ap'oplexy*. Meningitis occurring during the progress of acute rheumatism, probably from metastasis.

Rheu'matism of the Chest, Pleurodynia.

Rheu'matism, Chron'ic, *Arthro'sia chron'ica*, *Rheumatismus chron'icus* seu *nonfebri'lis* seu *vulga'ris* seu *invetera'tus* seu *habitua'lis* seu *frig''idus* seu *lon'gus*, *Rheumatal'gia*, *Rhumatal'gia*, *Rheumatodyn'ia*, *Arthrodyn'ia*, *Arthri'tis arthrodyn'ia*, (F.) *Rhumatisme chronique*, *Rhumatalgie*, is attended with pains in the hips, shoulders, knees, and other large joints. These are at times confined to one joint; at others, shift from one to another, without occasioning inflammation or fever. In this manner the complaint often continues for a great length of time, and then goes off. There is no danger attendant upon it; but the patient may become lame, and is always liable to painful recurrences. Neither variety generally terminates in suppuration; but effusion of coagulable lymph is apt to occur, so as to occasion permanent thickening of the parts. The great preventive of chronic rheumatism, and one of the most valuable curative agents, is flannel worn next the skin. The whole class of rubefacients may, also, be used with advantage. The warm bath, especially the natural warm bath, the temperature of which does not vary, is, perhaps, the most successful remedy of all.

Rheu'matism of the Extrem'ities, Acrorrheuma — r. of the Face, Prosoporrheuma.

Rheu'matism, Gonorrhœ'al, *Rheumatis'mus gonorrho'icus*, (F.) *Rhumatisme blénnorrhagique*. Rheumatism associated with gonorrhœa.

Rheu'matism, Gout'y, see Rheumatism, acute — r. of the Heart, Cardiorrheuma — r. of the Hip, see Neuralgia femoropoplitæa — r. Lead, see Lead rheumatism — r. of the leg, Scelorrheuma — r. of a Limb, Merorrheuma — r. Local, Merorrheuma — r. of the Loins, Lumbago — r. Metastatic, see R. acute.

Rheu'matism, Mus'cular, *Rheumatis'mus musculo'rum* seu *muscula'ris*, (F.) *Rhumatisme musculaire*. Pain in the muscular structures, increased by motion.

Rheu'matism of the Neck, Torticollis.

Rheu'matism, Nod'ular, see Rheumatism, acute.

Rheu'matism, Par'tial, Merorrheuma.

Rheu'matism, Preäbdom'inal, (F.) *Rhumatisme pré-abdominal*. Rheumatism of the muscles of the anterior and lateral portions of the abdomen; supposed by MM. Génest and Requin to be the same as the *nervous affection of the peritoneum* of Gooch.

Rheu'matism of the Skin, see Dermalgia — r. Subacute, see Rheumatism, acute.

Rheu'matism, Syno'vial, *Rheumatis'mus Synovia'lis*, (F.) *Hydrarthrose Rhumatismale*. A rheumatic affection, in which an accumulation of non-purulent fluid occurs in the synovial sacs, especially of the knee-joints.

Rheu'matism, Top'ical, Merorrheuma.

Rheu'matism, Ure'thral, *Ure'thral Fe'ver*, *Stric'ture Fe'ver*. A peculiar affection, apparently pyæmic, probably due to absorption of morbid materials from the urethra; accompanied with subacute inflammation of the synovial membranes and fibrous tissues about the ankle, heels, &c.

Rheu'matism of the U'terus, Metrorrheuma.

Rheu'matism, Vis'ceral. Rheumatism affecting the muscular or fibrous tissues of the viscera.

Rheu'matism Root, Jeffersonia Bartoni.

Rheu'matism Weed, Pyrola maculata, P. umbellata.

Rheumatis'mal, Rheumatic.

Rheumatis'moid, (*Rheumatismoï'des*, *Rheu'matoïd*, *Rheumatoï'des*, (*rheumatism*, and *εἶδος*, 'resemblance.') Resembling rheumatism.

Rheumatis'mus, Rheumatism — r. Abdominis, Cœliorrheuma — r. Acutus, Rheumatism, acute — r. Articulorum acutus, Rheumatism, acute — r. Brachii, Brachiorrheuma — r. Cancrosus, Neuralgia faciei — r. Cervicis, Torticollis — r. Colli, Torticollis — r. Cordis, Cardiorrheuma — r. Cruris, Scelorrheuma — r. Dorsalis, Lumbago — r. Extremitatum, Acrorrheuma — r. Faciei, Prosoporrheuma — r. Febrilis, Dengue — r. Gonorrhoicus, Rheumatism, gonorrhœal — r. Inflammatorius seu hypersthenicus, Rheumatismus acutus — r. Intestinorum, Enterorrheuma — r. Intestinorum cum ulcere, Dysentery — r. Larvatus, Neuralgia faciei — r. Localis, Merorrheuma — r. Longus, Rheumatism, chronic — r. Membrorum singulorum, Merorrheuma — r. Metallicus, see Tremor — r. Muscularis seu Musculorum, Rheumatism, muscular — r. Nonfebrilis, Rheumatism, acute — r. Partialis, Merorrheuma — r. Pectoris, Pleurodynia — r. Phlegmonodes, Myositis — r. Spurius nervosus, Neuralgia — r. Subacutus, see Rheumatism, acute — r. Synovialis, Rheumatism, synovial — r. Universalis febrilis, Rheumatism, acute — r. Uteri, Metrorrheuma — r. Vesicæ urinariæ, Cystorrheuma — r. Vulgaris seu inveteratus seu habitualis seu frigidus, Rheumatism, chronic.

Rheu'matiz, Rheumatism.

Rheumatodyn'ia, (*rheuma*, and *ὀδύνη*, 'pain,') Rheumatism, chronic.

Rheu'matoid, Rheumatismoid.

Rheumatophthal'mia, *Rheumophthal'mia*, (*rheuma*, and *ophthalmia*.) Rheumatic ophthalmia.

Rheumatop'yra, (*rheuma*, and *πυρ*, 'fever,') Rheumatism, acute.

Rheumato'sis, (from *rheuma*, and *osis*,) Rheumatism.

Rheumophthal'mia, (*rheuma*, and *ophthalmia*,) Rheumatophthalmia, Sclerotitis.

Rhex'is, (*ῥῆξις*, from *ῥηγνυμι*, 'I break,') *Rheg'ma*, *Dirup'tio*, *Rup'tio*, *Ruptu'ra*, *Rup'ture*. Rupture of a vessel or organ. Spontaneous opening of an abscess.

Rhex'is Oc'uli. Bursting of the eye from any cause, spontaneous or excited.

Rhicno'sis, (*ῥικνωσις*, from *ῥικνοομαι*, 'I become wrinkled,') *Cu'tis corruga'tio*. Wrinkling of the skin from extenuation of the body; opposed to *ἔκτασις*, or distension from repletion.

Rhig'olene, (from *ῥιγος*, 'cold.') A petroleum naphtha, proposed by Dr. H. J. Bigelow, of

Boston, as a local anæsthetic. It boils at 70° Fah., s. g. 0·625, and is applied in the form of spray in the smaller operations, the evaporation of the rhigolene producing a temperature 15° below zero.

Rhi'gos, (*ῥίγος,*) Rigor.

Rhin, gen. *Rhi'nis,* (*ῥίν,* gen. *ῥινός,*) Nasus.

Rhinal'gia, *Rhinodyn'ia,* (*rhin,* and *ἀλγος,* 'pain.') Pain in the nose.

Rhinal'gia ab Intru'sis. Pain in the nose from foreign bodies.

Rhinal'gia Vermino'sa. Pain in the nose from worms.

Rhinan'chonē, *Rhinan'gia, Rhinostegno'sis,* (*rhin,* and *ἀγχονη,* 'narrowness.') Contraction of the nose. Snuffles.

Rhinan'gia, Rhinanchone, Snuffles.

Rhinencéphale, (*rhin,* and *ἐγκεφαλη,* 'brain.') A term applied by Robin to a monstrosity characterized by a prolongation of the soft parts of the nose in the form of a tube, with monopia and absence of the olfactory nerves of the nasal fossæ and the cribriform plate of the ethmoid.

Rhinencepha'lia, (*rhin, ἐν,* 'in,' and *κεφαλη,* 'head,') Cyclopia, see Rhinencephale.

Rhinen'chysis, *Rhinenchys'ia,* (*rhin, ἐν,* 'in,' and *χυω,* 'I pour.') An infusion or injection, made into the nostrils, with a syringe called *Rhinen'chites.*

Rhi'nes, (pl. of *rhin,*) Nares.

Rhin'eurynter, (*rhin,* and *ἐυρεννω,* 'I dilate.') An apparatus consisting of a bag or sac to be inflated after its introduction into the nose in epistaxis. It resembles the colpeurynter of the obstetrician.

Rhini'tis, gen. *Rhini'tidis, Nasi'tis,* (*rhin,* and *itis.*) Inflammation of the nose. Coryza.

Rhini'tis Ulcero'sa, Ozæna.

Rhino'bion. An instrument consisting of a tube and bladder of goldbeaters' skin, intended for tamponing the nasal fossæ.

Rhinoblennorrhœ'a, Rhinorrhœa.

Rhinoc'acē, *Cory'za scarlatino'sa,* (*rhin,* and *κακος,* 'evil.') The offensive discharge from the nose, and other symptoms indicating a morbid condition of the Schneiderian membrane, that accompany the worst forms of scarlatina.

Rhinocatar'rhus, Coryza.

Rhinocéphale, (*rhin,* and *κεφαλη,* 'head.') A term applied by Robin to a monstrosity characterized by a projection of the nose, without any appreciable congenital lesion of the encephalon or of the eyes.

Rhinocnes'mus, (*rhin,* and *κνησμος,* 'itching') Itching of the nose.

Rhinodacryol'ithus, (*rhin, δακρυον,* 'a tear,' and *λιθος,* 'a stone,') see Dacryolite.

Rhinodyn'ia, (*rhin,* and *ὀδυνη,* 'pain,') Rhinalgia.

Rhin'olite, (*rhin,* and *λιθος,* 'a stone,') see Dacryolite.

Rhin'olith, see Dacryolite.

Rhinopho'nia, (*rhin,* and *φωνη,* 'the voice.') A nasal voice, called, also, *Dysphо'nia immodula'ta nasa'lis, Porapho'nia nasa'lis* seu *resonans, Psellis'mus na'sitas, Mycteropho'nia, Na'sitas, Vox* seu *Parala'lia nasa'lis.* Speaking through the nose.

Rhi'noplasty, *Rhinoplas'tia, Rhinoplas'tica* (*ars*), (F.) *Rhinoplastie,* (*rhin,* and *πλασσω,* 'I form.') The operation for forming a new nose, which dates far back. Three chief methods have been described: 1. The *method of Celsus,* which consists in bringing forward the skin of the cheeks, and forming a septum, if necessary, from the upper lip. 2. The *Italian* or *Taliacotian method* or *operation,* called, also, the *German method,* on account of the application made of it by Von Gräfe, which consists in paring the edges of the nostrils, and uniting them to a graft taken from the arm, but left attached to it, until union has taken place. 3. The *Indian method* — practised for ages in the East Indies, where cutting off the nose has been a common punishment for criminals — now generally adopted, in which the graft is taken from the forehead.

Rhinopol'ypus, (*rhin,* and *polypus,*) Polypus of the nose.

Rhinop'tia, (*rhin,* and *οπτομαι,* 'I see.') The act of seeing over the nose. Squinting over the nose.

Rhinorrhag''ia, (*rhin,* and *ῥαγη,* 'a breaking forth,') Epistaxis.

Rhinorrhagie, Epistaxis.

Rhinor'raphy, *Rhinorraph'ia,* (*rhin,* and *ῥαφη,* 'a suture.') An operation for the removal of epicanthis, which consists in pinching up a longitudinal fold of the skin, including this fold in two elliptical incisions, removing it, and bringing together the edges of the wound by harelip suture.

Rhinorrhœ'a, *Rhinoblennorrhœ'a,* (*rhin,* and *ῥεω,* 'I flow.') A discharge of limpid mucus from the nose without any inflammatory symptom. A gleet from the nose.

Rhinosclero'ma, *Rhinoscler'ma,* (*rhin,* and *σκληρος,* 'hard.') Under this name Hebra describes an extraordinary chronic tuberculous induration of the nose and its vicinity, slowly developed and unaccompanied with œdema or inflammatory symptoms.

Rhi'noscope, *Rhinoscop'ium,* (*rhin,* and *σκοπεω,* 'I view.') An instrument of the speculum kind for inspecting the nasal passages. The operation is termed *Rhi'noscopy, Rhinoscop'ia.*

Rhi'noscopy, see Rhinoscope.

Rhino'sis, (*ῥινος,* 'a skin, leather,' — or from *ῥικνος,* 'rugous.') The state of looseness and excess of skin observed in phthisis.

Rhinostegno'sis, (*rhin,* and *στεγνωσις,* 'a constriction or obstruction,') Rhinanchone.

Rhiptas'mus, (*ῥιπτασμος,* from *ῥιπτω,* 'I throw,') Jactation.

Rhiptolu'sia, (*ῥιπτω,* 'I throw,' and *λουω,* 'I wash,') Affusion.

Rhis, gen. *Rhi'nis,* (*ῥις,* gen. *ῥινος,*) Nasus.

Rhi'za, (*ῥιζα,*) Radix.

Rhi'zagra, (*ῥιζαγρα,* from *rhiza,* and *αγρα,* 'seizure,') Punch.

Rhizodon'trypy, *Rhizodontot'rypy,* (*rhiza, ὀδους,* gen. *ὀδοντος,* 'a tooth,' and *τρυπαω,* 'I perforate.') Perforation of the root of a tooth for the discharge of fluid.

Rhizo'ma, gen. *Rhizo'matis, Rhizome',* (from *rhiza.*) The part of the root of a plant, which consists of wood or flesh, as in the carrot.

Rhizonych'ia, (*rhiza,* and *ονυξ,* gen. *ονυχος,* 'a nail,') see Nail.

Rhizoph'agus, (*ῥιζοφαγος,* from *rhiza,* and *φαγω,* 'I eat.') One who lives on roots.

Rhizot'omist, (*ῥιζοτομος,* from *rhiza,* and *τομη,* 'incision,') Radiseca.

Rhizot'omus, Apothecary.

Rho'a, (*ῥοα,*) Punica granatum.

Rhodelæ'on, *Oleum rosa'rum,* (*rhodon,* and *ελαιον,* 'oil.') Oil of roses, or oil impregnated with roses.

Rho'dia, *Rhodi'ola ro'sea, Ro'sea, Rose'wort,* (F.) *Rhodiole,* (*rhodon,* owing to its odor.) *Sex. Syst.* Diœcia Octandria. The root, *Roseroot,* when dry, has a very pleasant smell, and is slightly astringent. It is not used.

Rho'dinus, (*ῥόδινος,*) *Rho'dius, Rosa'ceus, Ro'seus, Rosa'tus,* (F.) *Rosat,* Rosy. Formed of, or containing, roses.

Rhodi'ola Ro'sea, (dim. of *rhodia,*) Rhodia.

Rhodiole, Rhodia.

Rhodi'tes Vi'num, (*ῥοδιτης οινος.*) Wine in which roses have been macerated.

Rho'dium Lig'num, *Rho'dium* or *Rose'wood,*

(from *rhodon.*) The wood or root of a tree supposed to be *Genis'ta Canarien'sis* of Linnæus, (F.) *Bois de rose, Bois de Chypre.* *Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. The essential oil is a perfume, and possesses cordial and tonic virtues. Its smell is attractive to fish, rats, &c.

Rho'dius, Rhodinus.

Rhododaph'nē, (ῥοδοδαφνη,) Nerium oleander.

Rhododaph'nis, Nerium oleander.

Rhododen'dron Chrysan'themum, *R. chrysan'thum* seu *aur'eum* seu *officina'lē, Olean'der, Rose-bay, Yel'low* or *Yellow-flowered rhododen'dron, Moun'tain Lau'rel.* (F.) *Rosage, R. chrysanthe, Rose de Sibérie,* (ῥοδοδενδρον, from *rhodon,* and δενδρον, 'a tree.') *Nat. Ord.* Ericaceæ. *Sex. Syst.* Decandria Monogynia. This plant has been recommended in rheumatism, gout, and syphilis. In an overdose it produces acronarcotic symptoms.

Rhododen'dron Max'imum, *Great Lau'rel, Amer'ican Rosebay.* An indigenous shrub, *Ord.* Ericaceæ, which flowers in July. It is stimulant and astringent, and has been used by the Indians in gout and rheumatism.

Rhododen'dron Puncta'tum. Indigenous; has similar properties.

Rhodome'la Palma'ta, *Dulse, Sac'charine Fu'cus.* One of the Algæ, eaten in large quantities throughout the maritime countries of the north of Europe, and in the Grecian Archipelago.

Rhodom'eli, (*rhodon,* and μελι, 'honey,') Mel rosæ.

Rho'don, (ῥοδον,) Rosa, Rosa centifolia.

Rhodosac'charum, (*rhodon,* and σακχαρον, 'sugar,') Confectio rosæ Gallicæ.

Rhodostac'ton, (ῥοδοστακτον,) Mel rosæ.

Rhodostag'ma, gen. *Rhodostag'matis,* (*rhodon,* and σταγμα, 'that which has been dropped,') Aqua rosæ.

Rhœ'a, (ῥοια,) Punica granatum.

Rhœadi'na. An alkaloid obtained from all parts of Papaver rhœas, the ripe capsules of Papaver somniferum, and from opium, soluble and in white prisms. *Rhœ'ageuine* is derived from it.

Rhœ'ados Pet'ala, Papaver.

Rhœ'agenine, see Rhœadina.

Rhœ'as, gen. *Rhœ'adis,* see Papaver rhœas.

Rhœbde'sis, (ῥοιβδησις, from ῥοιβδεω, 'I sup up,') Absorption.

Rhœ'um, Rheum.

Rhog'mus, (ῥωγμος,) Râle.

Rhoï'tes, (ῥοιτης,) a wine impregnated with the pomegranate, (from ῥοα, the *pomegranate.*) A confection, made by boiling the juice of the pomegranate in honey.

Rhom'boid, (ῥομβος, 'a rhombus, whose sides are equal with two obtuse and two acute angles,' and ειδος, 'resemblance.') Having the shape of a rhombus.

Rhom'boid Lig'ament, Costo-clavicular ligament.

Rhomboïde'us, (same etymon as Rhomboid,) *Rhomboïdeus major* and *minor, Rhomboï'des, Cervici-dorso-scapulaire.* A muscle situate at the posterior inferior part of the neck, and at the posterior part of the back. It has a rhomboidal shape, and is attached, by its inner edge, to the posterior cervical ligament, and to the spinous processes of the last cervical vertebræ, and of the first four or five dorsal. By its outer edge, it is attached to the spinal or posterior edge of the scapula. It is divided into two fasciculi, constituting the *Rhomboidens major* and *R. minor,* the latter being situate higher than the other. This muscle draws the scapula backwards and upwards, and impresses upon it a rotary motion, which brings its inferior angle nearer to the spine; and, consequently, depresses the anterior angle and the shoulder.

Rhom'bos, (ῥομβος.) A bandage mentioned by Galen; so called on account of its rhomboidal shape.

Rhon'chal, *Rhoncha'lis,* (*rhonchus,* 'rattle.') Relating or appertaining to rhonchus —as '*rhonchal* fluctuation.' The fremitus that occurs through the influence of respiration as an attendant on cavernous rhonchi.

Rhon'chus, (ῥογχος,) Râle, Snoring, Stertor—r. Cavernous, see Gurgling — r. Cavernulous, see Gurgling.

Rhon'chus, Click'ing. A rhonchus which has been considered positively indicative of the existence of tubercles in the lungs. [?]

Rhon'chus Crep'itans, see Crepitant—r. Crepitans redux, see Crepitant — r. Mucous, see Râle muqueux — r. Sibilans, see Râle crépitant — r. Sibilus, Râle sibilant—r. Sonorus, Râle sonore — r. Subcrepitant, see Râle muqueux.

Rhopalis'mus, (ῥοπαλισμος,) Priapismus.

Rhopalo'sis, (ῥοπαλον, 'a club,' the hair being matted like a club, and *osis,*) Plica.

Rhop'alum, (ῥοπαλον,) Penis.

Rho'pē, (ῥοπη, 'a moving forwards or downwards,') Congestion.

Rhotacis'mus, (ῥοτακισμος,) Rotacism.

Rhox, (ῥωξ, gen. ῥωγος, 'a fissure,') Pupil, Uvea.

Rhu'barb, (*rha,* and βαρβαρος, 'foreign,') Rheum — r. Chinese, see Rheum — r. French, Rheum Rhaponticum—r. India, see Rheum—r. Krimea, Rheum Rhaponticum—r. Monk's, Rumex Alpinus, Rumex patientia — r. Pie, Rheum Rhaponticum — r. Poor man's, Thalictron — r. Rhapontic, Rheum Rhaponticum — r. Russia, see Rheum — r. Turkey, see Rheum — r. Wild, Convolvulus panduratus.

Rhubarbe, Rheum — *r. Fausse,* Thalictron — *r. des Indies,* Convolvulus mechoacan — *r. des Pauvres,* Thalictron — *r. Sauvage,* Rumex patientia.

Rhue, Ruta.

Rhum, Rum.

Rhu'ma, in composition, see Rheuma.

Rhumap'yra, Rheumatism, acute.

Rhumatal'gia, Rheumatism, chronic.

Rhumatalgie, Rheumatism, chronic.

Rhumatique, Rheumatic.

Rhumatisant, Rheumatic.

Rhumatismal, Rheumatic.

Rhumatisme, Rheumatism — *r. Aigu,* Rheumatism, acute — *r. Articulaire aigu,* Rheumatism, acute — *r. Blennorrhagique,* Rheumatism, gonorrhœal — *r. Chronique,* Rheumatism, chronic — *r. Musculaire,* Rheumatism, muscular — *r. Noueux,* Rheumatism, nodular — *r. Préabdominale,* Rheumatism, præabdominal — r. Subaigu, see Rheumatism, acute — *r. de l'Utérus,* Metrorrheuma.

Rhume, Rheum — *r. de Cerveau,* Coryza — *r. de Poitrine,* Catarrh.

Rhus (gen. *Rhoïs*) **Bel'gica,** (ῥους,) Myrica gale — r. Copallina, see Rhus typhina.

Rhus Coria'ria, *Adu'rion, Sumach, Shumach, Elmleaved Sumach,* (F.) *Sumac, Sumac des Corroyeurs, Roure* ou *Rouvre.* *Ord.* Anacardiaceæ. *Sex. Syst.* Pentandria Monogynia. This is the only species of the genus rhus that is innocent. Both the leaves and berries have been used as astringents and tonics.

Rhus Gla'bra, *Smooth Sumach.* Indigenous and officinal in the Pharmacopœia of the United States. An infusion of the fruit, — *Rhus glabrum* [?] Ph. U. S.,— which is acid and astringent, has been used as a cooling drink, and as a gargle. An infusion of the inner bark of the root has been recommended in mercurial ptyalism.

Rhus Radi'cans, *R. ver'nix, Poison vine* (*America*). This plant is poisonous (see Poisons, Table of), and is extremely acrid, when applied to the skin, producing erysipelas and vesications, and has been used, like R. toxicodendron, in paralysis and other nervous affections.

Rhus Succeda'nea, see Wax, Japan.

Rhus Sylves'tris, Myrica gale.

Rhus Toxicoden'dron, *Toxicodendron, Poison Oak (America,)* (F.) *Sumac vénéneux.* The leaves — *Toxicodendron* (Ph. U. S.) — have been used in paralytic affections and eruptions. It is poisonous, like R. radicans. Dose, gr. ss. to gr. iv.

Rhus Typhi'na, *Stag's Horn Sumach*, and Rhus Copalli'na, *Mountain Sumach*, have similar properties with Rhus glabra.

Rhus Venena'ta, *Poison Sumach*, and Rhus Pu'mila, have similar properties with Rhus toxicodendron.

Rhus Ver'nix, R. radicans.

Rhy'as, gen. *Rhy'adis*, (ῥυας, gen, ῥυαδος, from ῥεω, 'I flow,') *Rhy'sis*. An ulceration of the lachrymal carunele with a constant flow of tears.

Rhy'ma, gen. *Rhy'matis*, (ῥυμα,) Medicament.

Rhynchop'rion Pen'etrans. The pulex penetrans, sand-flea, or chique.

Rhinophy'ma, (*rhin*, and φυμα, 'growth.') Acne rosacea of long standing, in which, by cell-infiltration and hyperplasia of connective tissue deep in the skin, a red lobulated tumor of considerable size has been formed.

Rhypa'ria, (ῥυπαρια, from ῥυπος, 'dirt,') Rupia, Sordes primarum viarum.

Rhy'pia, (ῥυπια,) Rupia.

Rhy'pus, (ῥυπος,) Sordes.

Rhyp'tica, (from ῥυπτικος,) Detergents.

Rhyp'ticus, Abstergent.

Rhyptolu'siæ, (ῥυπτω, 'I cleanse,' and λυσις, 'solution,') see Affusions.

Rhy'sis, (ῥυσις,) Flux, Rhyas.

Rhysse'ma, gen. *Rhysse'matis*, (ῥυσσημα,) Wrinkle.

Rhythm, *Rhyth'mus*, (ῥυθμος,) (F.) *Rhythme*, 'measured movement.' The order of proportion, as regards time, which reigns between the different movements of an organ, or of the organism in health and disease. Thus, rhythm is applied to the diurnal variations of the pulse, and to the paroxysmal movements of an intermittent.

Rhyth'mical, (ῥυθμικος,) Periodical.

Rhyth'mical Contrac'tions of Muscles are those that succeed one another after regular intervals.

Rhyth'mus, (ῥυθμος.) Rhythm.

Rhytido'sis, (ῥυτιδωσις,) Rutidosis.

Rhy'tis, (ῥυτις,) Wrinkle.

Rib, ([Sax.] rib,) Costa — r. False, see Costa — r. Floating, see Costa — r. Sternal, see Costa — r. True, see Costa.

Ribbail's Bandage, see Figure of 8, and Spica.

Ri'bes (of Arab. origin) **Glossula'ria**, R. uva crispa.

Ri'bes Ni'grum, *R. ol'idum, Grossula'ria ni'gra, Cas'sis, Black Cur'rant, Gazel*, (F.) *Groseillier noir. Ord.* Grossulaceæ. *Sex. Syst.* Pentandria Monogynia. The berries — *Black currants* — have been recommended in sorethroat, and as diuretics. The leaves have been advised for the same purpose. They are chiefly used as preserves.

Ri'bes Officina'lē, R. rubrum — r. Olidum, R. nigrum.

Ri'bes Ru'brum, *R. officina'lē* seu *vulga'rē, Grossula'ria non-spino'sa* seu *ru'bra, Red cur'rant*, (F.) *Groseillier rouge*, of which the *White* is only a variety. It is cultivated, and affords an agreeable fruit — *Red cur'rants*, (F.) *Groseilles*. It possesses the qualities of the subacid fruits in general, and makes an excellent preserve.

Ri'bes U'va Cris'pa, *R. grossula'ria, Common gooseberry*. The fruit — *Grossula'ria*, (F.) *Groseille à maquereau, Gooseberry, Feaberry* — is agreeable, and makes a good preserve.

Ri'bes Vulga're, R. rubrum.

Rib'grass, Plantago lanceolata.

Ribs, see Costa — r. Neck of the, Collum costarum — r. Short, see Costa.

Rib'wort, Plantago Virginica.

Rice, Oryza — r. Canada, Zizania aquatica — r. Disease, Cholera — r. Ground, see Oryza — r. Jelly, see Oryza.

Rice-wa'ter, see Oryza. The evacuations of cholera have been termed, from their resemblance to rice-water, '*rice-water* discharges,' and in India '*congee* discharges' — *congee*, in Hindoostanee, meaning 'riee-water.'

Rice, Wild, Zizania aquatica.

Richardso'nia, (after Richardson, an early English botanist,) see Ipecacuanha.

Rich'leaf, Collinsonia Canadensis.

Rich'weed, Actæa racemosa, Ambrosia trifida, Collinsonia Canadensis, Pilea pumila.

Ricin, Ricinus communis.

Ricinoï'des, (*ricinus*, and ειδος, 'resemblance,') Jatropha curcas.

Ricino'lein. A saponifiable oil like olein, one of the component parts of castor oil; stearin and palmitin being the other ingredients.

Ric''inus Commu'nis, (from *ricinus*, 'a tick,' which its seed resembles,) *Ricinus vulga'ris* seu *vir'idis, Pal'ma Christi, Catapu'tia major, Faba purga'trix, Cerva, Kerva, Cici, Castor-oil plant*, (F.) *Ricin, Fève purgatif. Ord.* Euphorbiaceæ. *Sex. Syst.* Monœcia Monadelphia. Castor seeds, whence the oil is obtained, are inodorous; taste nerid and slightly sweetish. One or two seeds — *Sem'ina Catapu'tiæ majo'ris* seu *Ric''ini vulga'ris* — will act as a cathartic; but the oil is alone used. It is obtained by bruising the castor seeds, previously decorticated, and then expressing the oil without the application of heat. Recently-drawn castor oil, *Oleum de kervâ* seu *kervi'num, Alker'va, O. Ric''ini* seu *Cic''inum* seu *Palmæ liq'uidum* seu *de Palmâ Christi, Carapat, Karapat*,— in the United States often called simply *Oil*, (F.) *Huile du Ricin*, — is inodorous and nearly insipid. It is cathartic, operating speedily, and may be used in all cases where powerfully stimulating purgatives would be injurious. Dose, fʒj. to fʒjss. Hufeland recommends that a drop of croton oil be added to an ounce of the oil of poppy, and that the mixture be called *O'leum Ric''ini Officina'lē*.

At the Cape of Good Hope, the oil is obtained from *Ricinus liv'idus*.

A variety of Ricinus at Cape Verd is employed by the inhabitants to increase the secretion of milk. It is applied in the form of poultice, made with the green leaves, to the mammæ, or of a strong decoction, with which the mammæ and the external parts of generation are washed. See Ricinolein.

Ric''inus Liv'idus, see Ricinus communis — r. Major, Jatropha cureas — r. Minor, Jatropha manihot — r. Viridis, R. communis — r. Vulgaris, R. communis.

Rick, Malleolus.

Rick'ets, (see *Rig.*) Rachitis.

Rick'ety, Rachiticus.

Ricord's Pills. Antisyphilitic pills suggested by this celebrated French practitioner, and composed as follows: *Hydrarg. protiodid., Lactuc., Gallæ.*, āā ʒjss., *Extract. opii aquos.*, gr. ix., *Extract. gniac. aquos.*, ʒj. Divide into 36 pills.

Ric'tus, gen. *Ric'tūs*, (from *ringor, rictus*, 'I open the mouth wide,') Yawning — r. Lupinus, (*lupus*, 'a wolf,') see Harelip.

Ride, Wrinkle.

Ridē, Wrinkled.

Ri'der's Bone. See Drill bone.

Ridge'wood Disinfectant, see Powder, disinfecting, Ridgewood.

Ri'ding (of Bones), *Os'sium superposit''io*, (F.) *Chevauchement*. Displacement of the fragments of a bone, chiefly produced by the contraction of muscles, which occasions shortening of the limb; the fractured extremities *riding* over each other instead of being end to end.

Ri'ding Hag, Incubus.

Rieur de Santorini, Risorius novus.

Rife, (Sax. ꝑÿꝛe,) (Prov.) *Brief.* Prevailing; as applied to diseases.

Rift, (from *rive, rived,*) Eructation.

Rig, ([Sax.] ꝛıcʒ or hꝛıc,) Dorsum.

Righthand'edness, *Dex'tral Preëm'inence.* By some this is considered to be due to the greater development of the left side of the brain, to the larger size of the arteries on that side, and to the left carotid being less tortuous, and, therefore, more direct than the right.

Rigid'itas, Rigidity.

Rigid'itas Articulo'rum, *Ankylo'sis spu'ria.* Stiffness of the joints. False ankylosis.

Rigidité, Rigidity—*r. Cadavérique,* see Rigidity.

Rigid'ity, *Rigid'itas, Ri'gor,* (*rigere,* ῥιγεω, 'I stiffen,') (F.) *Rigidité, Roideur, Raideur.* Great stiffness of fibre, or want of suppleness. The stiffness of the dead body, *Cadav'eric rigid'ity,* (F.) *Roideur* ou *Rigidité cadavérique,* is one of the signs of the cessation of life. It may be removed, however, for a time, by the injection into the arteries of oxygenated defibrinated blood. See Rigor mortis.

Ri'gor, gen. *Rig'oris, Rhi'gus, Al'gor, Cold'ness, Cheim'ia,* (F.) *Frisson,* (from ῥιγεω, *rigeo,* 'I stiffen,' especially from cold.) Rigidity. Sensation of cold, with involuntary *shivering* or *shaking* of the whole body:—a symptom of fever. A slighter degree, and at times full rigor, is occasionally termed a *chill,* (Prov.) *cream, fri'gus ten'uē, perfrigera'tio.*

Ri'gor Ar'tuum, Contractura—r. Cadaverosus, Rigor mortis—r. Congestivus, Chill, congestive—r. Corporis mortui, Rigor mortis — r. Emortualis, Rigor mortis — r. Maxillæ inferioris, Trismus.

Ri'gor Mor'tis, *R. cor'poris mor'tui* seu *cadavero'sus* seu *emortua'lis, Necronarce'ma,* (F.) *Roideur* ou *Raideur* ou *Rigidité cadavérique.* 'Stiffness of death.' Death stiffening. The rigidity of limbs that occurs on dissolution. See Rigidity.

Ri'gor Nervo'rum seu Nervo'sus, Tetanus.

Ri'ma, *Schis'ma, Schi'za.* A fissure, a cleft; as *Ri'ma* seu *Ri'mula Glot'tidis* seu *Laryn'gis,* the opening of the glottis.—*Ri'ma* seu *R. mag'na vul'væ, Intro'itus vagi'næ, Si'nus vul'væ, Sca'pha, Sca'phus* seu *Fissu'ra mag'na* seu *Scissu'ra* seu *Schi'za vul'væ, Ri'ma* seu *Fissu'ra pudendi;* the opening of the vulva. See Vulva.—*Ri'ma o'ris,* the opening of the mouth.

Ri'ma Cana'lis Orbita'rii, Suborbitar fissure — r. Clunium, see Nates — r. Glottidis, see Rima and Glottis—r. Hyperglottica, see Larynx—r. ad Infundibulum, Vulva cerebri—r. Laryngis, Rima glottidis—r. Magna vulvæ, see Rima—r. Oris, see Rima—r. Palpebrarum, see Palpebra—r. Pudendi, see Rima — r. Transversa magna cerebri, Fissure, transverse, of the brain — r. Vocalis, Glottis — r. Vulvæ, see Rima.

Ri'mæ, pl. of *Rima,* Rhagades.

Ri'mula, (dim. of *Rima.*) A small fissure or cleft.

Ri'mula Glot'tidis, see Rima — r. Laryngis, Rima glottidis.

Rinæ'us, (from *rhin,*) Compressor naris.

Rin'derpest, (*rinder,* 'cattle,' and *pest,* 'plague.') The cattle-plague is so called by the Germans. It is the *Steppe disease, Russian cattle-plague, Contagious typhoid fever, Pestilential fever, Typhus contagiosus bovum* of different writers.

Ring, ([Sax.] hꝛınʒ, ꝛınʒ,) *Cri'cos,* (F.) *Anneau.* A name given to natural circular, or roundish apertures, with muscular or aponeurotic parietes, which serve for the passage of some vessel or part: — as the *umbilical ring, inguinal ring,* &c.

Ring, Abdom'inal, see Obliquus externus abdominis—r. Arthritic, see Sclerotic zone—r. Crural, Crural canal—r. Cramp, see Cramp rings.

Rings, Festooned, Annuli fibrocartilaginei—r. Fibrocartilaginous, Annuli fibrocartilaginei.

Ring'finger, Annular finger.

Ring'man, Annular finger.

Ring'worm, Herpes circinatus — r. of the Scalp, Porrigo scutulata — r. Ulcerative, Herpes exedens — r. Vesicular, Herpes præputii.

Rio Vinaigro, *Passambio.* A stream of some size in New Granada, which is strongly impregnated with sulphuric acid.

Rip'poldsau. Tonic purgative waters in Baden, containing bicarbonates of iron, manganese, lime and magnesia; sulphates of soda, potash, lime and magnesia; phosphate of lime, chloride of magnesium, alumina, &c.

Rire ou *Ris,* Risus—*r. Canin,* Canine laugh—*r. Moqueur,* Canine laugh — *r. Sardonien,* Canine laugh, Risus sardonicus — *r. Sardonique,* Canine laugh.

Ri'sagon, Cassumuniar.

Rish'teh, Dracunculus.

Risigal'lum, Orpiment.

Ri'sing, Abscess, see Regurgitation—r. of the Lights, Cynanche trachealis.

Ri'sing or Eleva'tion of the Pulse, *Pul'sûs eleva'tio.* The pulse is said to rise, when it becomes more full and frequent, as occurs in the exacerbation of acute diseases.

Risip'ola, Erysipelas—r. Lombarda, Pellagra.

Riso'rius No'vus, (from *ridere, risum,* 'to laugh,') *R. Santorini,* (F.) *Rieur de Santorini.* Santorini gives this name to a portion of the platysma myoides, which passes from the cheek towards the commissure of the lips.

Rissigal'lum, Orpiment.

Ri'sus, gen. *Ri'sûs,* (*ridere, risum,* 'to laugh,') *Ge'lus, Laugh'ing, Laugh'ter, Laugh,* (F.) *Rire* ou *Ris.* An involuntary movement of the muscles of the face, and of the lips in particular, accompanied with a sonorous and interrupted expiration, commonly indicating mirth and satisfaction.

Ri'sus A'pium, Ranunculus sceleratus—r. Caninus, Canine laugh — r. Involuntarius, Canine laugh — r. Sardonius, Canine laugh — r. Sardonicus, Canine laugh — r. Spasticus, Canine laugh.

Ri'ta-Christi'na. A celebrated double monster, born in Sardinia, in 1829. It lived to be nearly nine months old. Two distinct bodies were united at the pelvis. Below, the monster was single.

Rivallie's Caus'tic, *Solid'ified Ni'tric Ac'id.* A gelatinous paste made by adding nitric acid in its highest degree of concentration to lint in an earthen vessel. It is usually left on a part for 15 or 20 minutes, or even, as in encephaloid cancer, for 24 hours.

Riv'erweed, Conferva rivalis.

Ri'ving, (from *rive, rived,*) Eructation.

Rivi'nus, Duct of, see Sublingual gland.

Ri'vus Lacryma'lis, (*rivus,* 'a small stream,') see Palpebra.

Riz, Oryza.

Roan Tree, Sorbus aucuparia.

Rob, *Ro'ob, Rob'ub, Ro'hob, Ro'hab,* (F.) *Extrait des fruits.* This word, of Arabic extraction, means the juice of any fruit thickened to the consistence of honey by evaporation, before it has fermented. The juice of the grape, boiled to this consistence, was called *Sa'pa,* and, when not quite so thick, *Defru'tum.*

Rob Antisyphilit'icum de Laffecteur, see Syrupus de sarsaparillâ et sennâ compositus — r. Cynosbatos, Confectio rosæ caninæ — *r. de Laffecteur,* see Syrupus de sarsaparillâ et sennâ compositus — r. ex Moris, Diamorion — r. Nucum, Diacaryon.

Rob'in-run-away, Glechoma hederacea.

Rob'in-run-the-hedge, Galium aparine.

Robin'ia Ama'ra, (after the *Robins,* French botanists.) *Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. The roots of the *Robinia*

amara of Cochin China are bitter, and have been recommended, especially in that country, in diarrhœa and dyspepsia.

Robin'ia Pseudoäca'cia, *Pseudoäca'cia odora'ta, False Aca'cia, Black Lo'cust, Lo'cust tree;* native of America. The flowers are said to possess antispasmodic properties, and the bark of the root to be emetic and cathartic.

Rob'orans, (from *roborare,* 'to make strong,') Corroborant.

Roboran'tia, Tonics.

Ro'bub, Rob.

Roccel'la, (dim. of [S.] *roca,* 'a rock or stone,') Lichen roccella — r. Tinctoria, Lichen roccella.

Roche's Embroca'tion for Hoop'ingcough. An empirical preparation, composed of *ol. oliv.,* ℥xvj., *ol. succin.,* ℥viij., *ol. caryoph.,* q. s. to scent it strongly. It is also used for chronic rheumatism and paralysis.

Rochelle' Pow'ders, see Powders, soda, and Sedlitz, mineral waters of — R. Salt, Soda, tartrate of.

Rocher, ('a rock,') see Temporal bone.

Rochet'ta Alexandri'na, Soda.

Rock'bridge Al'um Springs, see Virginia, mineral waters of.

Rock Fern, Adiantum pedatum — r. Rose, Helianthemum Canadense, H. corymbosum.

Rock'ett Gar'den, Brassica eruca — r. Roman, Brassica erucea.

Rocou, Terra Orleana.

Rod'dikin, Abomasus.

Ro'dens, see Sorbus aucuparia.

Ro'dentree, Sorbus aucuparia.

Ro'dent, (from *rodere,* 'to gnaw,') Phagedenic — r. Cancer, see Ulcer, rodent — r. Ulcer, Ulcer, rodent.

Rods of Cor'ti, see Corti.

Rodschied'ia Bur'sa Pasto'ris, (after Dr. D. Rodschied, of Hanau,) Thlaspi bursa.

Rogne, (from Celt. *rong,* 'itch,') Psora.

Ro'hab, Rob.

Rohe'na Bark, Swietenia.

Ro'hob, Rob.

Ro'hun, see Strychnos nux vomica.

Roideur, (from [L.] *rigidus,*) Rigidity — r. *Cadavérique,* Rigor mortis.

Roisdorff, Min'eral Wa'ters of. Alkaline waters in Germany, which contain carbonic acid and carbonate of soda.

Rolan'do, Fis'sure or **Fur'row of,** Fissure of Rolando — R. Tubercle of, Tubercle of Rolando.

Roll'er, Bandage, Fascia.

Romarin, Rosmarinus — r. *des Marais,* Statice limonium — r. *Sauvage,* Ledum sylvestre.

Rome, Cli'mate of. The climate of Rome, as regards its physical qualities, is considered to be one of the best in Italy. It is peculiarly still; and, hence, has been esteemed favorable as a winter climate in pulmonary diseases, and for invalids generally, as it admits of their taking exercise in the open air at a lower temperature than they otherwise could do. In the early stages of consumption, Sir James Clark generally found the climate favorable.

Rompeure, (from *rumpere, ruptum,* 'to break or burst,') Hernia.

Rompt-pierre, 'breakstone,' Pimpinella saxifraga.

Ronce, Rubus idæus — r. *Bleue,* Rubus cæsius — r. *de Montagne,* Rubus chamæmorus — r. *Noire,* Rubus fruticosus.

Ron'chus, (ῥογχος,) Snoring, Stertor.

Rond, Round — r. *Grand,* Teres major — r. *Petit,* Teres minor.

Rone, Sorbus aucuparia.

Ronflement, (formed by onomatopœia,) Snoring, Stertor; see Rattle — r. *de Diable,* Bruit de Diable.

Ron'nachs, Triticum repens.

Ron'ning, Rennet.

Roob, Rob.

Roof of the Mouth, Palate.

Room, Pityriasis.

Root, (Dan. *rod,*) Radix — r. Ague, Aletris farinosa — r. Bitter, Apocynum androsæmifolium — r. Canada, Asclepias tuberosa — r. Colic, Aletris.

Root, Red, Celastrus, Lachnanthes tinctoria — r. Rough, Liatris.

Root of Scarc''ity, Beta hybrida.

Root, Squaw, Actæa racemosa — r. Sweet, Acorus calamus — r. Unicorn, Aletris farinosa — r. White, Ligusticum actæfolium — r. Yellow, Jeffersonia Bartoni, Xanthorriza apiifolia.

Rootdoc'tor, Herb doctor.

Rope, Nanus.

Rope'bark, Dirca palustris.

Roquette, (from *eruca* [?],) Brassica eruca, Soda.

Rorel'la, (dim. of *ros,* gen. *roris,* 'dew,') Drosera rotundifolia.

Rorif'erous, *Ror'ifer,* (F.) *Rorifère,* (*ros,* 'dew,' and *ferre,* 'to carry.') An epithet given to vessels which pour exhaled fluids on the surface of organs.

Rorif'erous Duct, Thoracic duct.

Ros, gen. *Ro'ris,* 'dew,' Sperm — r. Calabrinus, see Fraxinus ornus — r. Syriacus, see Fraxinus ornus — r. Solis, Drosera rotundifolia.

Ro'sa, 'rose,' R. centifolia, Erysipelas — r. Afzeliana, R. canina.

Ro'sa Al'ba, *R. usitatis'sima* seu *leucan'tha.* The *White Rose,* (F.) *Rosier blanc. Ord.* Rosaceæ. *Sex. Syst.* Icosandria Polygynia. The flowers of this species possess similar but inferior qualities to the damask.

Ro'sa Arma'ta, R. canina — r. Asturica, see Pellagra — r. Austriaca, R. Gallica — r. Calycina, R. canina.

Ro'sa Cani'na, *R. sylves'tris* seu *sentico'sa* seu *Swartzia'na* seu *Afzelia'na* seu *arma'ta* seu *calyci'na* seu *ru'bra vulga'ris, Cynor'rhodon, Caniru'bus, Cani'nus Sen'tis, Cynocyt'isus, Cynospas'tum, Cynos'batos, Dog'rose, Wild Bri'er, Hip Tree,* (F.) *Rose du chien, Eglantier de chien, E. Sauvage.* The fruit of this variety, called *Heps* or *Hips, Hops,* (Sc.) *Doghip, Rosæ Caninæ Fructus,* has a sourish taste, and is formed into a conserve. See Confectio cynosbati. It is seldom employed, except to give form to more active remedies; as to pills, boluses, linctuses, &c.

Ro'sa Centifo'lia, *Ro'sa, R. Damasce'na* seu *Pal'lida, Hecatophyl'la, Dam'ask, Pale, Hun'dred-leaved* or *Cab'bage rose,* (F.) *Rosier à cent feuilles, Rhodon.* The petals of this rose, *Rosæ Centifoliæ Petalæ,* have an extremely fragrant odor, and subacidulous taste. They are laxative; but are scarcely used for any purposes except for the distillation of rose-water, *Oil of Roses, Oleum Rosæ, Attar, Otto* or *Essence of Roses,* and the formation of a syrup.

Ro'sa Damasce'na, R. centifolia.

Ro'sa Gal'lica, *R. Austri'aca* seu *ru'bra, Red Rose,* (F.) *Rosier de Provins.* The petals of this variety, *Rosæ Gallicæ Petala,* are astringent; and are used in infusion, conserve, &c.

Ro'sa Leucan'tha, R. alba — r. Pallida, R. centifolia — r. Rubra, R. Gallica — r. Rubra vulgaris, R. canina — r. Saltans, Essera — r. Senticosa, R. canina — r. Swartziana, R. canina — r. Sylvestris, R. canina — r. Usitatissima, R. alba.

Rosace, Roseola.

Rosa'ceus, (from *rosa,*) Rhodinus.

Rosage, Nerium oleander, Rhododendron chrysanthemum.

Rosa'go, gen. *Rosag''inis,* Nerium oleander.

Rosa'lia, (from *rosa,* 'the rose,' from its color,) Scarlatina. See Rubella.

Rosa'liæ, Scarlatina.

Rosat, (from *rosa,* 'the rose,' from its color,) Rhodinus.

Rosa'tus, Rhodinus.

Rose, Erysipelas, (from its color,) Rosa — r. Cabbage, Rosa centifolia — r. Campion, Lychnis githago.

Rose Catarrh', *Rose fever.* An affection analogous to hay asthma, prevailing in some parts of the United States where the rose is largely cultivated.

Rose, Christ'mas, Helleborus niger—r. Copper, Papaver rhœas—r. Corn, Papaver rhœas—r. Damask, Rosa centifolia — r. Dog, Rosa canina — r. Dog, Conserve or Confection of, Confectio rosæ caninæ.

Rose Drop, Gutta rosea — *r. du Chien,* Rosa canina.

Rose-gar'land, Rachit'ic, see Rachitic.

Rose, Hun'dred-leaved, Rosa centifolia — *r. Marine,* Rosmarinus — r. Pale, Rosa centifolia — r. Rash, Roseola—r. Red, Rosa Gallica—r. Rock, Helianthemum corymbosum.

Rose de Sibérie, Rhododendron chrysanthemum.

Rose Spots, Spots, red — r. Water, Aqua rosæ — r. White, Rosa alba.

Ro'sea, Rhodia.

Rose'balm, Scar'let, Monarda coccinea.

Rose'bay, Amer'ican, Rhododendron maximum.

Rosée du Soleil, 'sundew,' Drosera rotundifolia.

Roselli'na, (from *rosa,* 'the rose,' on account of its color,) Roseolæ.

Rose'mary, Rosmarinus — r. Marsh, Statice limonium, and S. Caroliniana — r. Wild, Eriocephalus umbellulatus.

Ro'senheim, Min'eral Wa'ters of. Rosenheim is 34 miles S. E. from Munich, in Bavaria. The waters contain sulphuretted hydrogen, carbonic acid, carbonate of lime, chlorides of calcium and magnesium, carbonate of soda, and oxide of iron. They are used as tonics.

Ro'senmüller, Or'gan of, Parovarium.

Rose'ola, *Exanthe'sis Rose'ola, Rose Rash,* (F.) *Roséole, Éruption anomale, Rosace, Fièvre rouge, Efflorescence érysipélateuse,* (from *rosa,* 'the rose,' on account of the color.) An efflorescence in blushing patches, gradually deepening to a rose-color, mostly circular or oval; often alternately fading and reviving; sometimes, with a colorless nucleus; and chiefly on the cheeks, neck, or arms. It is frequently found, as a symptom, *Rose'ola Symptomat'ica,* in dentition, *Rose'ola Infantilis,* dyspepsia, rheumatism, &c., and is of no consequence. *Infantile rose, Summer rose,* &c., are all forms of rose rash. See Roseolæ, Rubeola, and Scarlatina.

Rose'ola Acno'sa, Gutta rosea.

Rose'ola Æsti'va. The form of the affection which prevails in summer. The eruption is of a darker color, and is attended with more itching. When occurring in autumn, it is called *Rose'ola autumna'lis.*

Rose'ola Annula'ta. Characterized by patches in the form of rose-colored rays, with central areas of the color of the skin.

Rose'ola Autumna'lis, see Roseola æstiva — r. Cholerica, Erythema papulatum — r. Febrilis, R. miliaris — r. Ficosa, Sycosis — r. Infantilis, see Roseola.

Rose'ola Milia'ris, *R. Febri'lis.* A rosy blush accompanying miliary fever.

Rose'ola Puncta'ta. Roseola characterized by a punctated appearance.

Rose'ola Rheumat'ica. A rose rash accompanying rheumatism and gout.

Rose'ola Symptomat'ica, see Roseola — r. Typhosa, Spots, red — r. Variolosa, Roseolæ.

Rose'ola Vaccin'ia. An eruption coexistent with the formation of the vaccine vesicle, and commencing around and about the seat of the vaccination, *Vaccine lichen.*

Rose'olæ, *Rose'ola, Roselli'na, Rube'ola spu'ria* seu *no'tha, False* or *French measles,* (F.) *Roséole, Fausse rougeole.* This name is given by some to an acute exanthem, midway between measles and scarlatina, and which belongs to neither one nor the other, as it affords no protection against either. It is, also, called *Rube'ola* by some, and *Rube'oloid,* a term which is applicable to any eruption resembling rubeola. An eruption which often precedes that of small-pox is termed *Roseola Variolo'sa, Erythe'ma Variolo'sum.*

Roséole, Roseola, Roseolæ.

Rose'pink, Chironia angularis.

Ro'ses, Milk of. A cosmetic wash, formed, according to one method, of *Subcarbonate of potassa,* gr. vj., *Oil of almonds,* ℥j., *Essence of bergamot,* ʒij., *Rose water,* ℥iij., *Orange flower water,* ℥ij. Mix.

Ro'seus, (from *rosa,*) Rhodinus.

Rose-wa'ter, Aqua rosæ.

Rose'wood, Rhodium lignum.

Rose'wort, Rhodia.

Rosier Blanc, Rosa alba — *r. à Cent Feuilles,* R. centifolia — *r. de Provins,* Rosa Gallica.

Ros'in, Black, (from *resina,*) Colophonia — r. Brown, Colophonia — r. White, see Pinus sylvestris — r. Yellow, see Pinus sylvestris.

Ros'in Weed, Silphium laciniatum.

Ro'sio Stom'achi, (from *rodere, rosum,* 'to corrode,') Cardialgia — r. Ventriculi, Cardialgia.

Rosmari'num, Rosmarinus.

Rosmari'nus, (*ros,* 'dew,' and *marinus,* 'marine,') *R. officina'lis* seu *latifo'lius* seu *horten'sis, Alchachil, Libano'tis corona'ria, Dendrolib'anus, Rose'mary,* (F.) *Romarin, Rose marine, Encensier. Ord.* Labiatæ. *Sex. Syst.* Diandria Monogynia. The tops of this plant, *Rosmari'nus,* (Ph. U. S.,) *Herba Anthos,* have a fragrant, grateful smell; and an aromatic, warm, bitterish taste, which is dependent upon an essential oil, combined with camphor. Rosemary has been recommended in nervous headaches, in the form of infusion. It is now rarely used, except for its odor. The flower is called *Anthos,* ἄνθος. Its oil — *O'leum Rosmari'ni* — is officinal. From two to six or ten drops are given in nervous complaints, rubbed up with sugar.

Rosmari'nus Horten'sis, Rosmarinus—r. Latifolius, Rosmarinus — r. Officinalis, Rosmarinus — r. Stœchadis facie, Teucrium creticum — r. Sylvestris, Ledum sylvestre.

Rossa'lia, (from *rosa,* 'the rose,' from its color,) Scarlatina — r. Squamosa, Scarlatina.

Rossignol, (pron. *Rossiniol.*) A name given, in France, to an affection to which pressmen are subject. It is a sprain, followed by tumefaction of the radiocarpal joint.

Rosso'lio, see Spirit.

Ros'trum, *Ram'phos,* 'a beak,' (F.) *Bec.* A name given to several old forceps, on account of their resemblance to the beaks of different birds. The principal were the *Rostrum corvi'num, anati'num, psittaci'num, vulturi'num, cyg'neum* seu *olori'num, grui'num, lacerti'num,* &c.

Ros'trum, see Lamina spiralis — r. Externum, Olecranon — r. Porcinum, Acromion — r. Posterius, Olecranon—r. Sphenoidale, Azyges processus.

Ro'sy Bet'ty, Erigeron bellidifolium—r. Bush, Spiræa tomentosa — r. Drop, Gutta rosea — r. Whelk, Gutta rosea.

Rot, (from [Sax.] rotian, 'to putrefy,' 'to decay.') Wasting disease in man or animals, especially affecting the lungs. See Distoma hepaticum.

Rot, (from [L.] *ructus,*) Eructation.

Rot, Grind'ers', Asthma, grinders'.

Rot'acism, *Rotacis'mus, Rottacis'mus,* properly *Rhotacis'mus, Psellis'mus rhotacis'mus,* (F.) *Grasseyement.* A vicious pronunciation of the letter R, common in the northern parts of England, especially near Newcastle. Called, there, the *Burr* or *Burrh.*

Rotacis'mus, (ῥωτακισμος,) Rotacism.

Rota'tio, (*rotare, rotatum,* 'to turn round,') Diarthrosis.

Rota'tio Spi'næ, *Revolv'ing spine.* A congenital disposition in some animals, as the calf, similar to the twist of the spinal column seen in lateral curvature.

Rota'tor, (*rotare, rotatum,* — *rota,* 'a wheel,'— 'to turn round,') (F.) *Rotateur.* A name given to several muscles that turn the parts to which they are attached upon their axes; — such as the oblique muscles of the eye, the pronators, supinators, &c.

Rota'tor, Trochanter.

Rotato'res Dor'si. Eleven small muscles on each side of the dorsal vertebræ, which arise from the point or upper edge of each transverse process, and pass to the lower edge of the arch of the vertebra above, as far as the base of the transverse process. Their action is to rotate the individual vertebræ on each other.

Rotato'res Fem'oris, Obturatores — r. Oculi, Oblique muscles of the eye.

Rot'coll, Cochlearia armoracia.

Rotheln, Rubella.

Rottacis'mus, Rotacism.

Rottle'ra Schimpe'ri, (after Dr. Rottler, a Danish missionary.) A large tree of Abyssinia, *Nat. Ord.* Euphorbiaceæ, the bark of which, called *Cortex muse'næ,* and formerly known as *Cortex braye'ræ anthelmin'ticæ,* mixed with koosso, is used in that country against tapeworm.

Rottle'ra Tincto'ria. A euphorbiaceous plant of India. A powder is attached to the fruit capsule of this plant, which is brushed off and collected when the fruit is dry. It is called *Kameyla, Rottle'ra,* (Ph. U. S., 1863,) *Kameela, Kama'la,* (Ph. B., 1867,) *Kame'la,* (Ph. B., 1864;) is used in Northern India as a vermifuge for dogs; and has proved effectual against tapeworm in man. The purgative dose is two or three drachms.

Rot'ula, (dim. of *rota,* 'a wheel,') Patella, Trochiscus — r. Genu, Patella.

Rot'ulad, see Rotular aspect.

Rot'ular, (from *rotula.*) Relating or appertaining to the patella.

Rot'ular As'pect. An aspect towards the side on which the patella is situated. (Barclay.) *Rot'ulad* is used by the same writer adverbially, to signify 'towards the rotular aspect.'

Rotule, Patella.

Rotu'lian, *Rotulia'nus,* (F.) *Rotulien.* Relating or belonging to the rotula or patella.

Rotun'dus, (from *rota,* 'a wheel,') Round.

Roucou, Terra Orleana.

Rou'en, Min'eral Wa'ters of. This water, known under the name *Eau des fontaines de la Maréguerie,* is cold, and contains carbonate of iron, carbonic acid, carbonate of lime, chloride of calcium, &c. It is tonic.

Rouge, 'red,' (from [L.] *rubeo,* 'I am red,') see Colcothar — r. *d'Angleterre,* Colcothar — r. *de Prusse,* Colcothar — r. *du Sang,* Hæmatin.

Rougeole, (from [F.] *rouge,* 'red,') Rubcola — r. *Fausse,* Roseolæ.

Rougeurs, (from [F.] *rouge,* 'red,') Flush.

Rough'root, Liatris.

Rouillé, (originally from *rubigo,* 'rust,') Rubiginous.

Roulement du Lambeau, 'rolling of the flap,' see Flap.

Round, *Te'res, Rotun'dus,* (F.) *Rond,* (from [L.] *rotundus.*) Anatomists have given this name to many organs whose fibres are collected in round fascieuli. See Teres.

Round Fora'men, *Fora'men rotun'dum.* A foramen of the sphenoid bone, a little behind the *foramen lacerum superius,* which gives passage to the second branch of the fifth pair of nerves, called *superior maxillary.*

Round Lig'aments of the U'terus, *Ligamen'ta rotun'da u'teri,* (F.) *Cordons sus-pubiens,* (Ch.) *Cordons vasculaires, Ligaments ronds de l'utérus.* Two cords, which arise from the lateral and superior parts of the uterus, whence they proceed towards the abdominal rings, which they pass through, and terminate by vanishing in the areolar tissue of the groins, mons veneris, and labia majora. These cords are whitish, flattened, and narrower in the middle than at the extremities. According to Mr. Rainey, they are composed chiefly of the striped muscular fibre. See Teres ligamentum.

Round'heart, Thaspium atropurpureum.

Round'tree, Sorbus aucuparia.

Roup, (like croup, by onomatopœia [?],) Cynanche trachealis, Raucedo.

Roure, Rhus coriaria.

Rous'seau's Laud'anum, Laudanum Abbatis Rousseau.

Routine' Practit''ioner, Routinist.

Routin'ist, pronounced *routeen'ist,* (F.) *Routinier,* (from *routine,* 'a regular habit or practice, unvaried by circumstances,' from *route,* 'a road.') One who practises in such an unvaried manner: — a *routine practitioner.*

Rouvre, Rhus coriaria.

Rove, (from *rive,*) Scab.

Ro'ving, 'wandering,' Delirium.

Row'antree, Sorbus aucuparia.

Row'land's Springs, see Georgia, mineral waters of.

Row'ting, (from [Sax.] hputan, 'to snore,') Snoring.

Roy'al Touch, see Touch.

Rub'ber, In'dian, Caoutchouc.

Rub'bing, ([G.] reiben, 'to rub,') Friction — r. Dry, see Friction — r. Moist, see Friction.

Rub'bing Sound, Bruit de Frottement.

Rube'do, gen. *Rube'dinis, Ru'bor,* 'redness,' (from *rubere,* 'to be red.') A diffused, but not spotted, redness on any part of the skin; like that which arises from blushing. Blushing.

Rubefa'cient, *Erethis'ma, Erethis'ticum, Rubefa'ciens,* (*ruber,* 'red,' and *facio,* 'I make,') (F.) *Rubéfiant.* That which produces redness. A medicine which produces redness of the skin. The action is called *Rubefaction.*

Rubéfiant, Rubefacient.

Rubel'la, (from *rubeo,* 'I am red,') *Rosa'lia, Rube'ola notha, Erythe'ma scarlatiniforme, Rotheln, Bastard* or *German measles, Scarlati'na morbillo'sa, Hybrid of measles and scarlatina, Anomalous exanthem.* A form of eruption resembling measles, sometimes not unlike scarlatina, dusky red, uniformly distributed, without catarrhal symptoms, not contagious, and of very favorable prognosis: by some regarded as coexistent measles and scarlatina. It was at first confounded with variola. It was called *Rubeola* by Hildenbrand, but this term in England and the United States is generally restricted to measles.

Rube'ola, *Rube'ola vulga'ris,* (from *rubeo,* 'I am red,') *Roseolæ, Exanthe'sis, Rube'olæ, Vetera'na, Blac'iæ, Fer'sæ, Blac'tiæ, Bavil'læ, Morbil'li, Scarlati'na pustulo'sa* seu *milia'ris, Febris morbillo'sa, Typhus morbillo'sus, Phœnicis'mus, Ecphy'mata, Measles,* (Sc.) *Mirles,* (Prov.) *Creas, Crewds, Malls, Maules, Measlings,* (F.) *Rougeole, Fièvre morbilleuse.* One of the major exanthemata; generally affecting individuals but once, and produced by specific contagion. The rash usually appears on the fourth, but sometimes on

the third, fifth, or sixth day of a febrile disorder; and, after a continuance of four days, gradually declines with the fever. The disease generally commences from ten to fourteen days after the contagion has been received. The eruption first shows itself in distinct, red, and nearly circular spots, somewhat less than the ordinary areolæ of fleabites. As these increase in number, they coalesce; forming small patches of an irregular figure, but approaching nearest to that of semicircles or crescents. These patches are intermixed with single circular dots and with interstices of the natural color of the skin. On the face they are slightly raised, so as to give the sensation of inequality of surface to the finger passed over the cuticle. The disappearance of the eruption is followed by desquamation of the cuticle. Measles is not dangerous of itself; but it is liable to induce pneumonia in winter, and dysentery in summer, which are, at times, very fatal. These are apt to come on at the time of, or soon after, the disappearance of the eruption. When they supervene, they must be treated as idiopathic affections. Rubeola demands a general antiphlogistic treatment. A fungus, *Mu'cor mucedo*, was discovered by Hallier in the blood and sputa of patients attacked with rubeola.

Willan has pointed out a *Rubeola Spuria*, which he calls Rubeola sine Catar'rho. In this the rash runs its regular course, with little fever or catarrhal affection; affording no certain security against the common or regular disease. He also gives the name Rubeola Ni'gra or Black Measles, to an unusual appearance of the measles about the seventh or eighth day, when the rash becomes suddenly livid, with a mixture of yellow. In the uncomplicated forms of measles but little treatment is required.

Epidemic measles has occasionally prevailed largely in the military service, and has been called *Camp Measles*.

Rube'ola German'ica, Rubella — r. Notha, Rubella, Roseolæ — r. Spuria, see Roseolæ, and Rubeola.

Rube'olæ, Roseolæ.

Rube'oline, (from *rubeola*.) A term proposed by Dr. Wm. Farr for the specific zymotic principle by which measles is propagated.

Rube'oloid, (*rubeola*, and *εἶδος*, 'resemblance,') see Roseola.

Ru'bia, (from *ruber*, 'red,') *R. tinctо'rum* seu *peregri'na* seu *sylves'tris* seu *ma'jor*, *Erythrod'anum*, *Ra'dix ru'bra*, *Dyer's Mad'der*, *Mad'der*, (F.) *Garance*. *Family*, Rubiaceæ. *Sex. Syst.* Tetrandria Monogynia. The root, *Ru'bia*, (Ph. U. S.,) has a bitterish, somewhat austere, taste, and a slight, not agreeable, smell. It was formerly considered deobstruent, detergent, and diuretic.

Rubig''inous, *Rubigino'sus*, (from *rubigo*, gen. *rubig''inis*, 'rust,') (F.) *Rouillé*. Rusty. Having the color of rust. An epithet given to the sputa in certain cases of pneumonia.

Rubi'nus Ve'rus, (from *ruber*, 'red,') Anthrax.

Ru'bor, 'redness.' Rubedo.

Rubri'ca Fabri'lis, (from *ruber*, 'red.') A red, heavy, earthy matter, formerly employed for making drying plasters — *Hard Ruddle*, *Red Chalk*.

Rubri'ca Sinop'ica. A heavy, compact, reddish earth from Sinope, formerly used in diarrhœa.

Ru'brin, (from *ruber*, 'red,') Hæmatin.

Ru'bus, (from *ruber*, 'red.') The pharmacopœial name (Ph. U. S. 1873) of the bark of the root of *Rubus Canadensis* and *Rubus villosus*.

Ru'bus Affi'nis, R. fruticosus.

Ru'bus Arc'ticus, *Shrub'by Straw'berry*, *Bac'cæ Norland'icæ*. *Ord.* Rosaceæ. *Sex. Syst.* Icosandria Polygynia. The fruit is recommended by Linnæus as possessing antiseptic, refrigerant, and antiscorbutic qualities.

Ru'bus Ba'tus, R. cæsius.

Ru'bus Cæ'sius, *R. Ba'tus*, *Dew'berry plant*, (F.) *Ronce bleue*. The fruit resembles the blackberry in appearance and properties. The bark of the root of *R. trivia'lis* seu *Canaden'sis* seu *procum'bens* seu *flagella'ris*, *American Dewberry*, *Low Blackberry*, is astringent.

Ru'bus Canaden'sis, see R. cæsius.

Ru'bus Chamæmo'rus, *Cloud'berry Tree*, *Chamæmo'rus*, *C. Norvæ'gica*, *Chamæ'drys*, *Cloud'berries*, *Knotberries*, (F.) *Ronce de Montagne*. The ripe fruit is sometimes prepared as a jam, and used in fevers, &c., to allay thirst. It has been much extolled as an antiscorbutic.

Ru'bus Flagella'ris, see R. cæsius — r. Frambœsianus, R. idæus — r. Frondosus, R. fruticosus.

Ru'bus Frutico'sus, *R. affi'nis* seu *paniculа'tus* seu *ni'ger* seu *frondo'sus* seu *vulga'ris*, *Com'mon Bram'ble*, which affords *Black'berries*, *Bram'bleberries*, (Prov.) *Bum'blekites*, (F.) *Ronce noire*. The berries are eaten as a summer fruit, of which they form a poor variety. The bark of the root of the *Ru'bus villo'sus*, *American blackberry*, *High* or *Standing blackberry*, *Hairy American bramble*, is astringent, and has been used in the last stages of dysentery, and in cholera infantum.

Ru'bus Idæ'us, *R. frambœsia'nus*, *Ba'tos*, *Rasp'berry*, (F.) *Framboise*, *Ronce*. The fruit of the best varieties — *Rasps*, (Prov.) *Hindberries* — is extremely agreeable, and is much used. It was formerly called *Batinon moron* (*βατινον μορον*).

Ru'bus Ni'ger, R. fruticosus — r. Occidentalis, see R. strigosus — r. Paniculatus, R. fruticosus — r. Procumbens, see R. cæsius.

Ru'bus Strigo'sus, *Wild red rasp'berry* of the United States. The leaves are often used as a mild astringent, as well as those of *Ru'bus occidenta'lis*, *Black rasp'berry*.

Ru'bus Trivia'lis, see Rubus cæsius — r. Villosus, see Rubus fruticosus — r. Vulgaris, R. fruticosus.

Ruck'ing, (from *ructus*,) Eructation.

Ructa'men, (from *ructare*, *ructatum*, 'to belch,') Eructation.

Ructa'tio, Eructation.

Ructua'tio, Eructation.

Ructuos'itas, see Eructation.

Ruc'tus, Eructation — r. Acidus, Oxyregmia — r. Nidorosus, Cnissoregmia.

Rudbeck'ia Lacinia'ta, (after the Rudbecks, of Upsal,) *Coneflower*, *Thimbleweed*; indigenous; *Order*, Compositæ; is diuretic, and has been given in nephritic affections.

Rud'dle, **Hard**, Rubrica fabrilis.

Rudimen'tal, *Rudimenta'lis*, (F.) *Rudimentaire*, (*rudimentum*,— from *rudis*, 'rude,'— 'the first beginning.') That which is but slightly developed.

Ru'dius, **Ex'tract of**, Extract of Rudius.

Rudolph'ia Frondo'sa, (after C. A. Rudolphi, a botanist of Jena,) Butea frondosa.

Rue, Ruta — *r. de Chèvre*, Galega officinalis — r. Common, Ruta — r. Goat's, Galega officinalis — r. Goat's, Virginia, Galega Virginiana — r. Meadow, Thalictron — *r. des Murailles*, Asplenium ruta muraria — *r. des Prés*, Thalictron — *r. Sauvage*, Ruta.

Ruelles, Wrinkles.

Ruft, (from *rive*, *rived*,) Eructation.

Ru'ga, pl. *Rugæ*, Wrinkle. A term especially applied to the rugæ of the stomach and vagina.

Ru'gæ Pennifor'mes, Palmæ uteri plicatæ.

Rugine, (from *Runcina*,) Raspatorium.

Rugissement, Rugitus.

Rugi'tus, gen. *Rugitûs*, *Brycheth'mus*, (*rugire*, *rugitum*, 'to roar,') (F.) *Rugissement*. A Latin word, which ordinarily expresses the roaring of the lion, and which is used by some medical writers to designate a particular species of borborygmus compared to it.

Ru'gose, (from *Ruga*,) Wrinkled.

Ru'gous, Wrinkled.

Rum, *Taf'ia, Spir'itus Jamaicen'sis, Molas'ses Spirit,* (F.) *Rhum.* A spirit distilled from sugar or molasses. See Spirit.

Rum, Bay, Spiritus myrciæ.

Rum Buds, Gutta rosea.

Ru'ma, Mamma.

Ru'men. The paunch of animals. See Plenalvia.

Rumenot'omy, (*rumen,* and *τομη,* 'section.') The operation of opening the rumen or paunch of animals in case of impaction, &c. of that organ.

Ru'mex (gen. *Ru'micis*) **Acetosel'la,** (from *rumo,* 'I suck,' in allusion to the Romans sucking it to allay thirst [?],) *Sheep Sorrel, Field Sorrel;* indigenous; has similar virtues with

Ru'mex Aceto'sus, *R. tubero'sus* seu *interme'dius, Lap'athum praten'sē, Ox'alis Aceto'sa, Aceto'sa vulga'ris* seu *praten'sis* seu *nos'tras, Anax'yris, A. arven'sis, Sour dock, Sor'rel, Com'mon Sor'rel,* (Sc.) *Docken,* (F.) *Oseille, Vinette, Aigrette, Surelle. Ord.* Polygonaceæ. *Sex. Syst.* Hexandria Trigynia. The leaves are sour, and are used in cookery, and also as a refrigerant.

Ru'mex Acu'tus, *Sharp-pointed wild dock, Oxylap'athum, Lap'athum, L. sylves'trē* seu *acu'tum, Ru'mex, R. paludo'sus* seu *pusil'lus, Lap'athus,* (F.) *Patience sauvage.* A decoction of the root has long been used in cutaneous affections. It is sometimes employed for the cure of the itch.

Ru'mex Ætnen'sis, R. scutatus.

Ru'mex Alpi'nus, *Aceto'sa Alpi'na.* The systematic name of the plant that affords *Monk's Rhubarb,* (F.) *Rhabarbe des Moines.* See Rumex patientia.

Ru'mex Aquat'icus, Rumex hydrolapathum — r. Britannica, Rumex hydrolapathum — r. Confertus, R. patientia — r. Digynus, Oxyria reniformis.

Ru'mex Gigante'a, *Ascle'pias gigante'a, Veg''etable mer'cury, Mudar, Muddar, Mudarrh.* The bark of the root has a reputation in the East Indies for the treatment of leprosy, elephantiasis, &c.

Ru'mex Glau'cus, R. scutatus — r. Hastatus, R. scutatus — r. Hastifolius, R. scutatus.

Ru'mex Hydrolap'athum, *Water Dock,* (old Eng.) *Brokeleak, Hydrolapathum, Ru'mex aquat'icus* seu *Britan'nica, Her'ba Britan'nica, Lap'athum aquat'icum,* (F.) *Parelle, Patience d'eau.* The leaves of this plant are subacid, and said to be laxative. The root has been used as a tonic, astringent, and antiscorbutic. It has also been employed externally in some cutaneous affections.

Ru'mex Interme'dius, R. acetosus.

Ru'mex Obtusifo'lius, *Lap'athum sylves'trē, Bluntleaved Dock, Bit'ter Dock.* The root of this, as well as of R. Cris'pus, *Curled,* or *Sour,* or *Yel'low Dock — Rumex,* (Ph. U. S.,) — has similar virtues to those of the other species. Both have been used in decoction in the same cases as sarsaparilla.

Ru'mex Oxyo'tus, R. scutatus — r. Paludosus, R. acutus.

Ru'mex Patien'tia, *R. confer'tus, Lap'athum horten'sē, Rhabar'barum monacho'rum, Hippolap'athum, Patien'tia, Gar'den Pa'tience, Monk's Rhu'barb,* (F.) *Patience, Rhubarbe sauvage, Parelle.* This root, which is supposed to possess the virtues of rhubarb, but in an inferior degree, is, according to Linnæus, obtained from the *Rumex patientia;* according to Murray, from the *Rumex alpi'nus.*

Ru'mex Pusil'lus, R. acutus.

Ru'mex Sanguin'eus. The root of the *blood'y dock* or *bloody veined Dock,* has an austere and astringent taste; and has been employed in dysentery. It is called, also, *Lap'athum sanguin'eum,* (F.) *Oseille* ou *Patience Rouge, Sangdragon.*

Ru'mex Scuta'tus, *R. glan'cus* seu *hastifo'lius* seu *Ætnen'sis* seu *oxyo'tus* seu *hasta'tus, Aceto'sa* seu *Scuta'ta rotundifo'lia* seu *Roma'na* seu *rotundifolia horten'sis* seu *scuta'ta, Lap'athum scuta'tum* seu *rotundifo'lium, Ro'man* or *Gar'den Sor'rel, Green Sauce, French Sor'rel,* (F.) *Oseille boucher, Oseille ronde, Petite Oseille.* Virtues the same as those of the common sorrel.

Ru'mex Tubero'sus, R. acetosus.

Rumina'tion, *Rumina'tio,* (*ruminare,* 'to chew again,' from *ruma* or *rumen,* 'the ingluvies,') *Merycis'mus.* A function peculiar to ruminating animals, by which they chew a second time the food they have swallowed. An analogous phenomenon is sometimes seen in man. One who ruminates is termed, in French, *mérycole.*

Ru'mis, Mamma.

Rum'met, Pityriasis.

Rump, ([D.] Romp, [G.] R u m p f,) Croupon — r. Bone, Coccyx.

Run'ches, Sinapis arvensis.

Runci'na, 'a plane,' Raspatorium.

Runcin'ula, (dim. of *runcina,*) Raspatorium.

Run'kill, Wrinkle.

Run'kle, Wrinkle.

Run'net, Rennet.

Run'ning, *Cur'sus,* (F.) *Course.* A succession of leaps, executed with rapidity, to transport the body quickly from one place to another.

Run'ning, Rennet.

Run'round, see Paronychia.

Runsh, Sinapis arvensis.

Ru'pes, 'cliffs,' Lips of the Vulva. See Lip.

Ru'pia, *Rhy'pia, Ul'cus atou'icum, Ec'phlysis Rhy'pia, Rhypa'ria,* (from *ῥυπος,* 'filth.') An eruption of large flattish blebs, which contain a fluid — at first serous, afterwards puriform, and often bloody, which rapidly concretes into crusts, at the base of which are ulcers of variable depths. If the spots are of inconsiderable size, it is called *Rupia simplex;* if the crusts are large and prominent, *Rupia prominens.*

It requires the use of tonics internally, and of stimulating ointments externally.

Ru'pia Escharot'ica, *Pem'phigus infau'tilis* seu *gangræno'sus, Ec'thyma gangræno'sum,* known in Ireland under the names *white blis'ters, eat'ing hives,* and *burnt holes.* An affection which bears a close similarity to pemphigus, particularly in the absence of a thick rugous crust, while in its chief feature, that of ulceration, it evidently belongs to Rupia.

Ru'pia Prom'inens, see Rupia — r. Simplex, see Rupia.

Ru'pial, *Rupia'lis.* Appertaining or relating to rupia.

Ruptibil'itas, (*ruptio,* and *habilis,* 'able,') Fragilitas.

Ruptil'itas, Fragilitas.

Rup'tio, (from *rumpere, ruptum,* 'to break,') Rhexis.

Rupto'rium, (from *rumpere, ruptum,* 'to break,') Cauterium — r. Commune, Potassa fusa.

Ruptu'ra, (from *rumpere, ruptum,* 'to break,') Ecrexis, Hernia, Laceration, Rhexis — r. Arteriæ, Aneurism — r. Corneæ, Ceratorrhexis — r. Herniosa, Hernia — r. Ovarii, Oariorrhexis — r. Uteri, Uterus, rupture of the — r. Vaginæ, Colporrhexis.

Rup'ture, (from *rumpere, ruptum,* 'to break or burst,') Hernia, Rhexis — *r. du Cœur,* Cardiorrhexis — r. of the Groin, Bubonocele — r. of the Heart, Cardiorrhexis — *r. de la Matrice,* Uterus, rupture of the.

Rup'ture Wort, Herniaria glabra.

Rup'tured, see Hernial.

Rus'cus, *R. aculea'tus, Brus'cus, Oxymyr'rhinē, Oxymyr'sinē, Myrtacan'tha, Catan'gelus, Myacan'tha, Sco'pia re'gia, Wild Myr'tle, Centramyr'inē, Butch'er's Broom,* (Prov.) *Knecholly,* (F.) *Petit houx, Fragon. Ord.* Smilaceæ. *Sex. Syst.* Diœcia Monadelphia. The root has been recommended as an aperient and diuretic.

Rus'cus Aculea'tus, Ruscus.

Rus'cus Hypoglos'sum, *Uvula'ria, Hypoglos'sum, Hippoglos'sum* [?], *Bislin'gua, Bonifa'cia, Lau'rus Alexandri'na angustifo'lia,* (F.) *Laurier Alexandrin, Langue de cheval.* Formerly used against relaxed uvula.

Rush, Sweet, ([Sax.] ριγc, ρυγc, 'a reed.') Acorus calamus, Juncus odoratus.

Rush, U'terine, ([D.] *ruischen,* 'to murmur,') Bruit placentaire.

Rus'ma, see Orpiment.

Rusot, see Oxyacantha Galeni.

Ruspi'ni's Styp'tic, (pron. *Ruspeen'i's,*) see Styptic, Ruspini's.

Ruspi'ni's Tinc'ture for the Teeth. An empirical preparation, composed of *Florentine orris,* ℥viij., *Cloves,* ℥j., *Rectified spirit,* Oij., *Ambergris,* ℈j.

Rus'wut, see Oxyacantha Galeni.

Rut, (from *rugitus,* 'the exclamation of animals in heat,') Heat.

Ru'ta, (ῥυτη,) *R. Grave'olens* seu *horten'sis* seu *al'tera, Peg'anum, Besa'sa, Com'mon Rue,* (F.) *Rue, Rhue, Rue sauvage, Herbe de grace. Ord.* Rutaceæ. *Sex. Syst.* Decandria Monogynia. The plant has a strong, ungrateful odor, and bitter pungent taste. It is so acrid as to blister the skin. Its properties are reputed to be tonic, stimulant, antispasmodic, and emmenagogue. Dose, gr. xv. to ℈ij. The leaves are officinal — *Ru'ta,* (Ph. U. S.)

O'leum Ru'tæ, (Ph. U. S.,) *Distill'ed Oil of Rue,* is antispasmodic; and, externally, rubefacient. Dose, gtt. ij. to vj.

Ru'ta Al'tera, Ruta — r. Capraria, Galega officinalis — r. Graveolens, Ruta — r. Hortensis, Ruta — r. Muraria, Asplenium ruta muraria.

Rutab'ulum, Penis.

Ruta'ceum, (from *ruta.*) Vinegar of rue.

Rutido'ma, gen. *Rutido'matis,* see Rutidosis.

Rutido'sis, *Rytido'sis, Rhytido'sis,* (ῥυτιδωσις, from ῥυτιδω, 'I wrinkle,' and *osis.*) The act of wrinkling; as *Rutido'ma* means a shrivelled or wrinkled body. A destruction or atrophy of the eye. Corrugation and subsidence of the cornea.

Ruysch, Glom'erule of, Malpighian corpuscles.

Ruyschia'na Tu'nica, (F.) *Lame* ou *Membrane Ruyschieune.* According to Ruysch (pron. *Rīsch*), the Dutch anatomist, and the greater part of his disciples, the choroid coat of the eye is formed of two laminæ. His son gave to the inner the name *Tu'nica Ruyschia'na* or *Membra'na Ruyschia'na* seu *Ruysch'ii.*

Tu'nica Cellulo'sa Ruyschia'na is the areolar substance under the peritoneal covering of the stomach. It is not numbered among the coats of that organ.

Rye, (Sax. ριγe,) Secale — r. Horned, Ergot — r. Robbin's, Polytrichum juniperinum — r. Spurred, Ergot.

Rytido'sis, Rutidosis.

Ry'tis, (ρυτις,) Wrinkle.

S.

S, S. A., &c., see Abbreviation.

S. Romanum, Sigmoid flexure of the colon.

Saag, Urine.

Sabadil'la, ([S.] *Cebadilla,*) Veratrum sabadilla, see Veratrina.

Sabadil'lin, see Veratria.

Sabadil'line, see Veratria.

Sabatil'la, Veratrum sabadilla.

Sabba'tia, (after *Sabbati,* an Italian botanist,) Chironia angularis — s. Angularis, Chironia angularis.

Sabi'na, Juniperus sabina.

Sabi'næ Cacumina, Juniperus sabina.

Sabine, Juniperus sabina.

Sablé, 'sanded,' (from *sabulum,* 'sand.') Having the appearance as if strewed with sand. The terms *sablé* and *piqueté* are sometimes applied to the brain, when a slice of it exhibits red points as if it had been strewed with red sand. Such is the case in cerebral hyperæmia.

Sabot de Vénus Jaune, 'yellow sabot of Venus,' Cypripedium luteum.

Sabu'cus, Sambucus.

Sab'ulous, *Sabulo'sus, Areno'sus, Psammo'des,* (*sabulum,* 'sand.') The sandy deposit often seen in the urine.

Sab'ulum Cona'rii, see Pineal gland.

Sabu'ra, Saburra.

Sabur'ra, *Sabu'ra, Sor'des,* (F.) *Saburre.* This word signifies, by derivation, 'coarse sand, or ballast,' *sabulum.* In its common acceptation it means *foulness of the stomach,* as it is sometimes called, from vitiated matters supposed to be retained and accumulated in the stomach—the result of imperfect digestion—and which have been sometimes considered as a morbid product of the mucous secretion of that organ, or of the biliary secretion; at others, as a residuum from alimentary substances badly digested. The *Sabur'ral condition* or *state, Collu'vies gas'trica, Crudita'tes ventric'uli, Sta'tus gas'tricus, Gastris'mus,* (F.) *Embarras gastrique, État saburral,* is an accumulation of saburræ in the stomach, (F.) *Saburres gastriques,* which the Humorists considered to be the cause of a number of diseases.

Sabur'ra Vermino'sa, Helminthiasis.

Sabur'ral, *Suburra'lis.* Relating or appertaining to saburræ; as the '*saburral* state.'

Saburra'tio, Arenatio.

Saburre, Saburra.

Saburres Gastriques, see Saburra.

Sac, see Sack — *s. Herniaire,* Sack, hernial — s. Lachrymal, see Lachrymal puncta — s. of the Omentum, see Epiploon, gastrohepatic — s. Serous, Sack, serous.

Saccadé, see Respiration, jerking.

Sacca'ted, *Sacca'tus,* (from *saccus,* 'a sac,') Encysted. Also, pouched, as the colon. *Sacculated, Saccula'tus,* are diminutives of Saccated and Saccatus.

Sac'char, (σακχαρ,) Saccharum.

Saccharhydrolé, Syrup.

Sac'chari Fæx, 'dregs of sugar,' Melasses.

Sacchari'na, Saccharolés.

Sac'charine, *Sacchari'nus,* (F.) *Saccharin, Glucosique, Glycosique,* (from *saccharum,* 'sugar.') Having the nature of, or containing, sugar.

Saccharo-alcoolé, Ratafia.

Saccharogum'mita, (*saccharum,* and *gummi,*) see Glycyrrhiza.

Saccharolé Liquide, Mellitum, Syrup — *s. Mou,* Conserva, Electuarium — *s. Solide,* see Pastel, and Tabella.

Saccharolés (F.), *Sacchari'na,* (from *saccharum.*) A name given by MM. Henry and Gui-

bourt to medicines which have sugar or honey for excipient, or for predominant principle. M. Béral so calls an exact mixture of pulverized sugar with other substances also in powder, but in less quantity.

Saccharom'eter, (F.) *Saccharomètre, Pèse-sirop,* (*saccharum,* and *μετρον,* 'measure.') A hydrometer adapted for determining the density of syrups. See Areometer.

Saccharom'yces, (*saccharum,* and *μυκης,* 'fungus,') Torula cerevisiæ.

Saccharorrhœ'a, (*saccharum,* and *ῥεω,* 'I flow,') Glycyrrhœa — s. Cutanea, Sudor dulcis.

Saccharorrhœ'a Lac'tea, *Galactorrhœ'a saccharo'ta.* A secretion of unusually sweet milk.

Saccharorrhœ'a Pulmona'lis, *Spu'tum dul'cē* seu *saccharo'tum.* The copious expectoration of unusually sweet matter from the lungs.

Saccharorrhœ'a Urino'sa, Diabetes mellitus.

Sac'charum, (*σακχαρον,*) *Sac'char,* (*σακχαρ,* from Arabic, or rather Sanserit, *Sakar,* 'white earth,') *Su'char, Suc'char, Sut'ter, Zu'char, Zu'caro, As'sakur, Ti'gala, Zac'charum, Zo'zar, Zu'charum, Zuc'carum, Zu'chra, Mel arundina'ceum, Sugar,* (F.) *Sucre.* The produce of the juice of *Sac'cha'rum officina'rum* seu *officina'lē* of Linnæus, *Cal'amus In'dicus* seu *sacchari'nus, Arun'do saccharif'era* of Sloane; *Sugar-cane,* (F.) *Canne à Sucre, Cannamelle ; Ord.* Graminеæ; *Sex. Syst.* Triandria Digynia; and also of the beet maple, *Chinese Sugar-cane,* (*Sorg'hum saccharo'tum,*) &c. *Sac'charum,* (Ph. U. S., 1873,) *S. Purifica'tum,* (Ph. B., 1867,) is refined sugar.

True Sugars are those with which alcoholic fermentation *may be* effected by the addition of yeast and water. They are:

Species.	*Varieties.*
1.....	Hard sugar of the cane, maple, beet, chestnut, &c.
2.....	Liquid sugar, sugar of malt, of the sweet potato, molasses, honey, &c.
3.....	Hard sugar of the grape, ripe fruits, starch, diabetes, &c.
4.....	Hard sugar of the mushroom.

Imper'fect Sugars are those in which alcoholic fermentation *cannot be* effected by means of yeast and water.

Species.	*Varieties.*
1.....	Manna.
2.....	Sugar of milk.
3.....	Sugar of jelly or glue.
4.....	Liquoriee.
5.....	Picromel.

Sugar, *Cane-sugar, Su'crose,* is prepared from the expressed juice of the sugar-cane, boiled with the addition of quicklime or common vegetable alkali. It is used, in Pharmacy, for the preparation of syrups, conserves, lozenges, &c. It is nutritious, and is employed as an aliment, and as a eutrophic demulcent and antiseptic. Dissolved in small quantities in water, as in tea, it is apt to disagree with dyspepties; an evil which does not always occur when the same substance is taken more largely.

Liv'er or *Hepat'ic Sugar,* (F.) *Sucre du Foie,* has been found to be a normal formation by the liver. It is more readily assimilated than other varieties of sugar. See Glucose and Glycogenic matter.

Sac'charum Acer'num, *S. Canaden'sē, Ma'ple Sugar,* is often used as a demulcent.

Sac'charum Al'bum, *S. purifica'tum, Sac'charum,* (Ph. U. S.,) *Sal In'dus, White Sugar, Refined' Sugar,* is the *Loaf Sugar. Double-refined Sugar* has been called *Tabar'zet.* See Saccharum.

Sac'charum Alumina'tum. Equal parts of *white sugar* and *alum,* powdered. Used as a styptic.

Sac'charum Can'didum, *S. can'dum* seu *can'tum* seu *can'thum, Al'phenic, Na'bot, Sugar-can'dy, Sugar can'died,* (F.) *Sucre Candi,* is the crystallized juice of the cane.

Sac'charum Can'dum, S. candidum — s. Canthum, S. candidum — s. Cantum, S. candidum—s. Commune, Saccharum non-purificatum.

Sac'charum Hordea'tum, *Bar'ley Sugar,* (Prov.) *Sugar bar'ley, Pen'ides, Penid'ium, Sac'charum penid'ium,* is a variety of sugar-candy.

Sac'charum Lac'tis, Sugar of milk.

Sac'charum Non-purifica'tum, *Muscova'do, raw, brown,* or *moist Sugar,* is the *Saccharum commu'nē, S. ru'brum, Mel can'næ,* or *coarse sugar.*

Sac'charum Officina'rum, see Saccharum—s. Penidium, S. hordeatum — s. Purificatum, see Saccharum — s. Rosaceum, Confectio rosæ Gallicæ — s. Saturni, Plumbi superacetas.

Saccharure, (from *saccharum.*) A medicine resulting from the intimate union of sugar with the medicinal principles of alcohol or ethereal tinctures.

Sac'ci (pl. of *Saccus*) **Co'li,** see Colon.

Sac'ciform Disease of the A'nus, see Rectal pouches.

Sac'culated, Encysted, see Saccated.

Saccula'tus, Encysted, see Saccated.

Sac'culi (pl. of *Sacculus*) **Adipo'si,** Fatty vesicles — s. Chalicophori, see Lacunæ of bone — s. Laryngei, Ventricles of the larynx.

Sac'culi Medicina'les. Bags containing medicinal substances.

Sac'culi Medulla'res, see Medullary membrane.

Sac'culus, dim. of *Sac'cus,* 'a sac.' This name has been given to two sacs formed by the membranous vestibule, which open into each other, and contain the *otolithi* and *otoconia:* one of these is termed the *sacculus vestib'uli ;* the other *sacculus.* See Semicircular canals.

Sac'culus, Marsupion — s. Cephalicus, Cucupha — s. Chylifer, Receptaculum chyli — s. Communis, see Semicircular canals — s. Cordis, Pericardium — s. Ellipticus, see Semicircular canals — s. Hemiellipticus, see Semicircular canals — s. Lactiferus, see Lactiferous vessels.

Sac'culus Laryn'gis. A cæcal pouch, of variable size, formed by the mucous membrane in the ventricles of the larynx. Its laryngeal surface is covered by the *Arytæno-epiglottidens inferior muscle,* or *Compressor sacculi laryngis,* (*muscle of Hilton.*)

Sac'culus Medicina'lis, Pulvinar medicatum — s. Oblongus, see Semicircular canals — s. Proprius, see Semicircular canals — s. Rorifer, Receptaculum chyli — s. Rotundus, see Semicircular canals — s. Semiovalis, see Semicircular canals — s. Sphæricus, see Semicircular canals—s. Vesical, see Bladder, sacculated — s. Vestibuli, Semicircular canals, see Sacculus.

Sac'cus, (*σακκος,*) Sac — s. Cæcus, see Stomach — s. Cæcus coli, Cæcum — s. Coli, Cæcum — s. Cordis, Pericardium — s. Epiploïcus, Epiploon — s. Herniosus, Hernial sac — s. Intestini crassi, Cæcum — s. Lacrumalis, Lachrymal sac — s. Lacrymalis, Lachrymal sac — s. Lacteus, Receptaculum chyli — s. Mucosus, see Bursæ mucosæ — s. Peritonæi retroventricularis, see Epiploon, gastrohepatic — s. Pleuræ, Pleura — s. Venarum cavarum, Sinus dexter cordis — s. Venarum pulmonalium, Sinus pulmonalis — s. Ventriculi, see Stomach.

Sa'cer, 'sacred, holy,' Sacral — s. Ignis, Herpes zoster — s. Morbus, Epilepsy — s. Musculus, Transversalis dorsi.

Sacerdo'tis (gen. of *sacerdos,* 'a priest') **Pe'nis,** Arum maculatum.

Sachet (F.), (from *sac,*) *Sac'culus.* A small bag containing perfumes to be placed among clothes, to communicate to them an agreeable

odor. The following is a formula for the powder they contain: — *Powdered cloves* and *powdered cassia*, each one ounce; *powdered orris root*, an ounce and a half; *powdered yellow sandal wood*, one drachm; *otto of roses*, twenty-four drops; *oil of lavender, oil of bergamot*, each one drachm; *musk*, six grains. A scentbag.

Sack, (F.) *Sec*, 'dry.' A dry wine used by our ancestors, *Vin sec*. Probably *Sherry*.

Sack, *Sac*, *Sac'cus*, *Secluso'rium*, ([Sax.] sac.) A bag or pouch.

Sack or Sac, Her'nial, *Sac'cus hernio'sus*, (F.) *Sac herniaire*. An envelope or pouch, formed by the serous membrane of the cavity, whence a viscus has escaped. We distinguish, in a hernial sac, its *orifice* or the opening by which it communicates with the great cavity lined by the serous membrane: its *cervix* or *neck*, (F.) *Collet*, the narrow portion on the outside of the orifice, where strangulation sometimes occurs: the *body*, (F.) *Corps*, which is the round, prominent part: and the *fundus* or *bottom*, the part opposite to the orifice.

Sack Pos'set, (from *sack*, and *posset*.) A posset made of sack, milk, and other ingredients.

Sack or Sac, Se'rous. The shut cavity formed by any serous membrane, as by the pleura or peritoneum.

Sack Whey, Wine whey.

Sa'cra Fis'tula, Vertebral column.

Sa'crad, see Sacral aspect.

Sa'cral, *Sa'cer*, *Sacra'lis*, (F.) *Sacré*. That which belongs or relates to the sacrum. A name given to several parts.

Sa'cral Ar'teries are distinguished into, 1. The *Ante'rior* or *mid'dle sa'cral*, *Me'dian ar'tery of the sa'crum* of Chaussier, which arises from the posterior part of the abdominal aorta, in front of the 4th lumbar vertebra. It descends, in a serpentine manner, upon the sacrovertebral articulation, and on the anterior surface of the sacrum it furnishes many lateral branches, which unite with the lateral sacral arteries, and enter the anterior sacral foramina, to be distributed to the membranes of the marrow, &c. 2. The *Lateral sacral arteries*, which are two in number, one on each side. They arise from the hypogastric, from the iliolumbar, or from the gluteal; and descend before the anterior sacral foramina, anastomosing in an arched manner, towards the coccyx, with the middle sacral. They give off *external* and *posterior branches*, which enter the sacral foramina; and *internal branches*, which are distributed to the pyramidalis, sacrum, &c.

Sa'cral As'pect. An aspect towards the region where the sacrum is situated. (Barclay.) *Sacrad* is used by the same writer adverbially to signify 'towards the sacral aspect.')

Sa'cral Extrem'ities. The lower limbs.

Sa'cral Grooves, (F.) *Gouttières sacrées*. Two longitudinal excavations, slightly marked, at the posterior surface of the sacrum; which appear to terminate the vertebral grooves or gutters.

Sa'cral Nerves, (F.) *Nerfs sacrés*, are generally six in number. They arise from the termination of the spinal marrow. The first, united with the great cord which descends from the lumbar plexus, concurs with the three others in the formation of the sacral or sciatic plexus. The third and fourth, with branches of the great sympathetic, form the hypogastric plexus. The fifth and sixth (*coccyge'al nerve*) are distributed to the ischiococcygeus muscle, and to the sphincter and levator ani.

Sa'cral Plex'us, *Sciat'ic plex'us* — the *sa'cral por'tion of the cru'ral plex'us* of Chaussier, constituted as just mentioned, is situate in front of the pyramidalis. It gives off, backwards, two branches, called the *pudic*, (F.) *honteux*, and the *lesser sciatic*. It terminates in the great sciatic nerve.

Sacré, Sacral.

Sa'cro. In composition, relating or belonging to the sacrum.

Sacrococcyge'al, *Sacrococcyge'us*. Relating to the sacrum and coccyx.

Sacrococcyge'al Articula'tion is that of the lower extremity of the sacrum with the superior *facette* of the coccyx. It is closed by two ligaments, — an *anterior* and a *posterior sacrococcygeal*.

Sacrocosta'lis, (*costa*, 'a rib,') Sacrolumbalis — *s. Fémoral*, Glutæus major.

Sacrocoxal'gia, (*sacro*, *coxa*, 'the hip,' and ἀλγος, 'pain.') Some authors have called thus a rheumatic affection of the sacroïliac symphysis.

Sacroïl'iac, *Sacroïli'acus*. That which relates to the sacrum and ilium.

Sacroïl'iac Articula'tion, Sym'physis or Synchondro'sis, *Iliosa'cral articula'tion*, *sym'physis* or *synchondro'sis*, is the union of two surfaces, — two inclined planes, broader above than below; one formed by the sacrum, the other by the ilium. Both surfaces are incrusted by an articular cartilage. The bands which strengthen them are the two *sacrosciatic ligaments*, the *sacrospinal*, a *sacroïliac* ligament, and some irregular fibres. The *sacroïliac* ligament is a very thick assemblage of short, dense, irregular fibres, occupying the space which the sacrum and ilium leave between them, behind their articular surface. Some authors have termed some irregular fibres, situate in front of the sacroïliac articulation, *anterior sacroïliac ligaments*, in opposition to the preceding fasciæ, which they call *posterior sacroïliac*.

Sacroïl'iac Disease. A painful acute or chronic inflammatory condition of the sacroiliac articulation, dependent on local injury, accidents of pregnancy or parturition, and a strumous diathesis.

Sacroischiat'icus, Sacrosciatic.

Sacrolombaire, Sacrolumbar.

Sacrolumba'lis, Sacrolumbar.

Sacrolum'bar, *Sacrolumba'lis*, (F.) *Sacro-lombaire*. That which belongs to the sacrum and loins.

Sacrolum'bar, *Sacrolumba'lis*, *Sacrolumba'ris Mus'cle*, *Sacrocosta'lis*, *Dorsotrache'lian portion of the Sacrospinal*, of Chaussier, (F.) *Lombo-costo-trachélien*, *Sacro-lombaire*, is seated at the posterior part of the trunk; is thick and triangular below; flat and thin in the remainder, and terminates in a point at its upper extremity. It is attached to the posterior surface of the sacrum; to the corresponding portion of the crista ilii; to the extremities of the transverse processes of the lumbar vertebræ; to the angles of the eleven inferior ribs; to the tuberosity of the first, and the posterior tubercle of the transverse processes of the last five cervical vertebræ. The sacrolumbalis straightens the vertebral column when bent forwards, and maintains it straight. By means of its insertion into the ribs, it can elevate or depress these bones, according as it contracts from above to below, or from below to above. It acts, consequently, sometimes as an inspiratory, at others as an expiratory muscle.

From six or eight of the lower ribs arises an equal number of fleshy portions, which terminate at the inner side of this muscle, and are called *Mus'culi Accesso'rii* seu *Additamen'tum ad Sacrolumba'lem*, (F.) *Accessoires du Sacro-lombaire*.

From the upper part of the sacrolumbalis a fleshy slip, called *Cervica'lis descen'dens*, *Cervicalis descendens Diemerbroeck'ii*, *Transversa'lis collatera'lis col'li*, *Accesso'rius ad Sacrolumba'lem*, (F.) *Transversaire grêle*, runs up, to be fixed to the transverse processes of the fourth, fifth, and sixth cervical vertebræ, by three distinct

tendons. These last parts, though separated by some anatomists, belong to the sacrolumbalis.

Sacrosciat'ic, *Sacroïschiat'icus.* That which belongs to the sacrum and ischium.

Sacrosciat'ic Lig'aments are two ligaments which assist in securing the sacroïliac articulation. The *great* or *posterior sacrosciatic ligament* extends from the crista ilii and the sides of the sacrum and coccyx to the tuberosity of the ischium. The *less* or *anterior sacrosciatic ligament* arises from the same point, and terminates in the spine of the ischium.

Sacrospi'nal, Dorsotrachelian portion of the sacrolumbalis.

Sacrospina'lis. That which relates to the sacrum and spine. Under this name, Chaussier describes the sacrolumbalis, longissimus dorsi, transversalis, transversospinalis, and intertransversalis muscles. He divides it into three portions. It includes the *Erec'tor spi'næ, Exten'sor dorsi commu'nis, Lumbocosta'lis.*

Sacrotrochantérien, Pyramidalis.

Sacrover'tebral, *Sacrovertebra'lis.* That which relates to the sacrum and the vertebræ.

Sacrover'tebral Articula'tion is the junction of the last vertebræ of the loins with the sacrum. The angle which these two bones form at the anterior part has been called the *Prom'ontory of the Sa'crum,* or the *Sacrover'tebral An'gle.*

Sacrover'tebral Lig'ament is a strong ligament, which passes from the anterior part of each of the transverse processes of the last lumbar vertebra to be attached to the base of the sacrum. Its use is to maintain the articulation of those two bones *in situ.*

Sa'crum, (neuter of *sacer,*) *Os sacrum* seu *basila'rē* seu *al'agas* seu *la'tum* seu *clu'nium, Ver'tebra mag'na, Albagia'zi, Hi'eron os'teon, Clu'nis, Subver'tebra, Subver'tebrum, Vet'ula,* (from *sacer,* 'sacred;' because it contributes to protect the genital organs, which were considered sacred; or because it was offered in sacrifice.) The bone which forms the posterior part of the pelvis, and is a continuation of the vertebral column. The sacrum is symmetrical and triangular, situate at the posterior part of the pelvis, and concave anteriorly. It has: 1. A *pel'vic* or *ante'rior sur'face,* which corresponds to the pelvic cavity, and has four transverse furrows, that point out the parts where the primitive portions of the bone were separated from each other. On each side there are four foramina, called *anterior sacral;* these are oblique, and decrease in size from above downwards. Through them pass the anterior branches of the sacral nerves. 2. A *spi'nal* or *poste'rior sur'face,* which is convex, rough, and covered by muscles. Upon the median line are four horizontal, tubercular eminences, forming a continuation of the spinous processes of the vertebræ; and below, a triangular notch, where the *sacral canal* terminates. On each side of the surface are four foramina, called *posterior sacral,* which are smaller than the anterior, and give passage to the posterior branches of the sacral nerves. 3. The *ver'tebral sur'face* or *base.* Its greatest extent is transversely. It is articulated with the last lumbar vertebra. On it is seen the orifice of the *sacral canal,* of a triangular shape, which decreases in width from above downward; terminates the vertebral canal; is lined by a prolongation of the cerebral membranes; contains the fasciculi of the sacral nerves; communicates, externally, by the sacral foramina; and terminates at the triangular notch on the posterior surface of the bone. At the sides of the upper orifice of the sacral canal are two articular processes, which receive the articular processes of the last lumbar vertebra. The projection formed by the union of the base of the sacrum with the last lumbar vertebra is called the *prom'ontory, promonto'rium os'sis sa'cri, great an'gle of the sa'crum* or *sacrover'tebral an'gle.* 4. A *coccyge'al face* or *a'pex,* (F.) *Face coccygienne* ou *sommet,* which is very narrow, and is articulated with the coccyx. 5. *Two lateral margins,* which have, above, a broad, oblique surface, articulated with the ilium.

The sacrum is developed by 30 to 36 points of ossification.

Sad'dle, Turk'ish, Sella Turcica.

Sad'dlehead, Clineccphalus.

Sæ'pes, Sepes.

Saf'flow, Carthamus tinctorius.

Saf'flower, Carthamus tinctorius.

Saf'fron, (Arab. *zafaran,* 'yellow' [?],) Crocus — s. Bastard, Carthamus tinctorius — s. Dyers', Carthamus tinctorius.

Saf'fron Flow'er, Carthamus tinctorius.

Saf'fron, Mead'ow, Colchicum autumnale.

Safran, Crocus—*s. Bâtard,* Carthamus tinctorius, Colchicum autumnale—*s. des Indes,* Curcuma longa — *s. de Mars apéritif,* Ferri subcarbonas — *s. de Mars astringent,* Colcothar—*s. des Prés,* Colchicum autumnale—*s. Racine de,* Curcuma longa.

Saf'ranum, Carthamus tinctorius.

Saf'rē, Smalt.

Sa'ga, Midwife. In ancient Rome, the Sagæ exercised, also, the calling of magicians, procurcsses, and perfumers, and were more especially called upon to induce abortion. Also, Sago.

Sag'aban, Apios tuberosa.

Sagape'num, (σαγαπηνον,) *Sag'apin, Serapi'non,* (F.) *Gomme séraphique.* A gumresin, supposed to be obtained from the *Fer'ula Per'sica. Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. Its odor is fetid and alliaceous, taste pungent, bitterish, nauseous. It is in small, agglutinated masses of a yellow color; tenacious, breaking with a horny fracture. It is reputed antispasmodic and emmenagogue. Dose, gr. x. to ʒss.

Sag'apin, Sagapenum.

Sage, Salvia — s. Indian, Eupatorium perfoliatum — s. Jerusalem, Pulmonaria — s. Tea, Infusum salviæ — s. Tree, Lantana — s. Wild, Salvia Africana, S. lyrata.

Sage-femme, 'sage or wise woman,' Midwife.

Sage'na, (σαγηνη, 'a seine,') Epiploon.

Sagesse des Chirurgiens, 'wisdom of the surgeons,' Sisymbrium Sophia.

Sagi'men Vi'tri, Soda, subcarbonate of.

Sagit'tal, *Sagitta'lis, Sagitta'tus,* (from *sagitta,* 'an arrow.') Arrow-shaped, as —

Sagit'tal Fur'row, *Sagit'tal Groove,* (F.) *Gouttière sagittale,* is a channel on the median line of the inner surface of the skullcap. It is excavated in the os frontis, in the two parietal and occipital bones, and extends from the crista galli to the internal occipital protuberance. It lodges the longitudinal sinus, which has been called the *sagittal sinus.*

Sagit'tal Groove, Sagittal furrow — s. Sinus, see Sagittal furrow.

Sagit'tal Su'ture, *Biparie'tal Su'ture, Obelæ'a sutu'ra* seu *ra'phē, Sutu'ra Virga'ta* seu *Juga'lis* seu *Rabdoï'des* seu *Rhabdoï'des* seu *Rhabdo'des* seu *Rhabdoï'deus* seu *Biparieta'lis* seu *Interparieta'lis.* The suture which unites the two parietal bones, and which extends, from before to behind, on the median line, from the coronal suture to the lambdoidal. It is so called from *sagitta,* 'an arrow,' because it seems to meet the coronal suture as an arrow meets the string of a bow.

Sagitta'ria Variab'ilis, (from *sagitta,* 'an arrow,' owing to the prevalent form of the leaves,) *Ar'rowhead, Ar'rowleaf, Ar'rowweed, Wapata* of Oregon. *Nat. Ord.* Alismaceæ. Esculent, yielding fecula like arrowroot. The roots are cooling and subâstringent, and are at times applied to the feet in cases of yaws and dropsical swellings of the legs. The leaves are applied to the breasts to dispel milk.

Sagitta'rium Alexiphar'macum, *Malac'cæ ra'dix, Can'na In'dica, Arun'do In'dica.* A root cultivated in the West Indies, and supposed to be a remedy for wounds by poisoned arrows.

Sagitta'tus, Sagittal.

Sa'go, *Sa'gus, Sa'ga, Sa'gu, Se'gu, Am'ylum palma'ceum,* (F.) *Sagou, Sagne.* (*Saga* is the Malay name for various palms.) A fecula, obtained from the pith of the *Sa'gus Rumph'ii, Cy'cas circina'lis, C. revolu'ta,* &c., growing in the Moluccas, Philippine Isles, &c., and which is brought to us in small grains. The same substance is also obtained from the West Indies, but it is inferior to that from the East. By boiling in water or milk, sago becomes soft and transparent, and forms an agreeable and nutritious food in febrile, calculous, and other disorders. It is made palatable by sugar, lemonjuice, or wine, where the last is not contraindicated.

To make sago into a proper mucilage for the sick, a tablespoonful of it should be macerated in a pint of water for two hours, and then boiled for fifteen minutes, stirring assiduously. Care must be taken that the grains are perfectly dissolved by long boiling and constant stirring.

Sago posset is made by putting *sago,* ℥ij., into *water,* Oij., boiling until the mucilage is formed, then rubbing *sugar,* ℥ss., on the rind of a lemon, and putting it with *tincture of ginger,* f℥j., into *sherry,* Oss., adding this mixture to the mucilage, and boiling for five minutes. It is a good restorative.

Sa'go, French, see Solanum tuberosum, and Arrowroot, common — s. Portland Island, see Arum maculatum.

Sa'go Spleen. Amyloid degeneration of the Malpighian corpuscles of the spleen, resembling boiled sago.

Sagou, Sago.

Sa'gu, Sago.

Sague, Sago — *s. Petit,* see Solanum tuberosum.

Sague'rus Goma'to, see Toddy — s. Rumphii, see Toddy — s. Saccharifer, see Toddy.

Sa'gus, Sago — s. Rumphii, see Sago.

Sahara, Insomnia.

Saidschütz Wa'ter, Seidschütz water.

Saignée, (from *saigner,* [L.] *sanguis,* 'blood,' 'to bleed,') Bloodletting — *s. Spoliative,* Spoliativa phlebotomia.

Saignement du Nez, 'bleeding of the nose,' Epistaxis.

Sain Bois, 'health wood,' Daphne gnidium — *s. Doux,* (from *sagina,* 'fatness,') Adeps præparatus.

Saint Amand, Min'eral Wa'ters of. Sulphuretted waters, in the department of Du Nord, France. They contain carbonic and sulphohydric acids. The *Boue* or deposit contains sulphohydric acid, and salts of iron and magnesia. Temperature, 64° to 82° Fahrenheit. Season, from the 1st of June to the 1st of September.

Saint An'thony's Fire, Erysipelas.

Saint Augustine', Cli'mate of. This seaport of Florida is a frequent retreat during the winter season for the valetudinarian from the more northern parts of the United States. The climate is certainly comparatively mild and equable; but it is liable to frequent northeast storms. There are only a few days, however, in winter, in which the invalid cannot take exercise in the open air. Tampa Bay, and Pensacola, in Florida, and Mobile, in Alabama, which are sometimes visited by the consumptive, are less liable to the storms in question.

Saint Cath'erine's Springs, see Canada, mineral waters of.

Saint Charles's Root, Carlo Sancto (Radix).

Saint Croix, Santa Cruz.

Saint Galmier, Wa'ters of. These waters, in central France, resemble Seltzer water, being rich in carbonic acid gas, and contain bicarbonates of lime and magnesia, &c. They are considered useful in gastric affections and for preventing the formation of urinary calculi.

Saint Guy's Dance, Chorea.

Saint James's Wort, Senecio Jacobæa, Thlaspi bursa.

Saint John's Dance, see Mania, dancing — St. John's wort, Hypericum perforatum.

Saint Kitts, see West Indies.

Saint Leon'ard's, Cli'mate of. This town, which is situate about a mile to the westward of Hastings, in Sussex, England, is less sheltered than that place, and is therefore a less favorable retreat, during the winter months, for the phthisical valetudinarian.

Saint Moritz or **Saint Maurice, Min'eral Wa'ters of.** Near this town, in the Grisons, Switzerland, are strongly chalybeate waters, which are employed both internally and externally. The town itself has been recommended as a residence for cases in which steady cold and extreme tenuity of air are indicated. The waters are resorted to in cases of hysteria, neuralgia, leucorrhœa, &c.

Saint My'on, Min'eral Wa'ters of. Cold, acidulous waters, at Saint Myon, near Riom, in the department of Puy-de-Dôme. They contain free carbonic acid, subcarbonate of soda, chloride of sodium, and carbonate and sulphate of lime.

Saint Nectaire, Min'eral Wa'ters of. Springs in the department of Puy-de-Dôme, France. They contain carbonic acid, bicarbonate of soda, and chloride of sodium. Temperature, 75° to 103° Fah. Season, from June 15th to September 15th.

Saint Pardaux, Min'eral Wa'ters of. Chalybeate springs in the department of Allier, France. They contain carbonic acid and iron.

Saint Sauveur, Min'eral Wa'ters of. Sulphurous waters in the department of Hautes-Pyrénées, France. Temperature, 76° to 93° Fah. The springs are frequented from May to October.

Saint Vincent's, see West Indies.

Saint Vi'tus's Dance, Chorea; see Mania, dancing—s. Vitus's Dance of the Voice, Balbuties.

Sair, (sore,) Ulcer.

Saire, Essera.

Saison, Season.

Sa'ki, see Spirit.

Sal, gen. *Sa'lis,* (ἅλς,) Salt — s. Absinthii, Potassæ subcarbonas, see Potash — s. Acetosellæ, Potassa, oxalate of — s. Acetosus ammoniacalis, Liquor ammoniæ acetatis — s. Acidum benzoës, Benjamin — s. Aëratus, see Potassæ carbonas — s. Albus, Soda, muriate of — s. Alembroth, Alembroth salt — s. Alkali, Soda, subcarbonate of — s. Alkalinus fixus fossilis, Soda — s. Amarum, Magnesiæ sulphas—s. Ammoniac, volatile, Ammoniæ carbonas — s. Ammoniacum, Ammoniæ murias—s. Ammoniacum martiale, Ferrum ammoniatum — s. Ammoniacum secretum Glauberi, Ammoniæ sulphas — s. Ammoniacum tartareum, Ammoniæ tartras — s. Ammoniacum vegetabile, Liquor ammoniæ acetatis — s. Ammoniacus, Ammoniæ murias — s. Ammoniacus nitrosus, Ammoniæ nitras — s. Ammoniæ, Ammoniæ murias — s. Anglicanum, Magnesiæ sulphas—s. Anglicum, Magnesiæ sulphas — s. Antiepilepticus of Weissman, Cuprum ammoniatum — s. Antimonii, Antimonium tartarizatum — s. Armeniacum, Ammoniæ murias — s. Artis, Alembroth salt — s. Asphaltitis, Bit noben—s. Catharticus amarus, Magnesiæ sulphas—s. Catharticus Glauberi, Soda, sulphate of — s. Communis, Soda, muriate of — s. Cornu cervi volatile, Ammoniæ carbonas — s. Culinaris, Soda, muriate of — s. Digestivus Sylvii, Potassæ murias — s. Diureticus, Potassæ acetas — s. de Duobus, Potassæ sulphas — s. Ebsdamense, Mag-

nesiæ sulphas — s. Enixum, Potassæ supersulphas — s. Epsomensis, Magnesiæ sulphas — s. Essentiale benzoës, Benjamin — s. Essentiale corticis Peruviani, Quininæ — s. Febrifugus of Lemery, Potassæ supersulphas — s. Febrifugus Sylvii, Potassæ murias — s. Fontium, Soda, muriate of — s. Fossilis, Soda, muriate of — s. Fuliginis, Ammoniæ carbonas — s. Gemmæ, Soda, muriate of — s. Herbarum, Potassæ subcarbonas — s. Indus, Saccharum album — s. Lixiviosum, see Lixivium — s. Lucidum, Soda, muriate of — s. Marinus, Soda, muriate of — s. Martis, Ferri sulphas — s. Martis muriaticum sublimatum, Ferrum ammoniatum — s. Mirabile perlatum, Soda, phosphate of — s. Mirabilis Glauberi, Soda, sulphate of — s. Muriaticum baroticum, Baryta, muriate of — s. Nitrum, Potassæ nitras — s. Ossium, Ammoniæ carbonas — s. Panchrestum, Potassæ tartras — s. Petræ, Potassæ nitras — s. Plumbi, Plumbi superacetas — s. Polychrestus, Potassæ sulphas — s. Polychrestum Seignetti, Soda, tartrate of — s. Polychrestus Glaseri, Potassæ sulphas cum sulphure — s. Prunellæ, Potassæ nitras fusus sulphatis paucillo mixtus — s. Rupellensis, Soda, tartrate of — s. Sapientiæ, Alembroth salt, Potassæ sulphas — s. Saturni, Plumbi superacetas — s. Scientiæ, Alembroth salt — s. Secretus Glauberi, Ammoniæ sulphas — s. Sodæ, Soda, subcarbonate of — s. Sodomenus, Bit noben — s. Succini, Succinic acid — s. Tartari, Potassæ subcarbonas, see Potash — s. Tartari essentiale, Tartaric acid — s. Tartari sulphuratum, Potassæ sulphas — s. Urinæ, Microcosmicum sal — s. Urinosum, Urea — s. Vegetabilis, Potassæ tartras — s. Vitæ, Alembroth salt — s. Vitrioli, Zinci sulphas — s. Vitrioli narcoticum, Boracic acid — s. Volatile, Ammoniæ carbonas, Spiritus ammoniæ aromaticus — s. Volatile benzoës, Benjamin — s. Volatile boracis, Boracic acid — s. Volatile oleosum Sylvii, Spiritus ammoniæ aromaticus — s. Volatile succini, Succinic acid — s. Volatilis salis ammoniaci, Ammoniæ carbonas — s. Vomitorium vitrioli, Zinci sulphas.

Salaam' or **Salam' Convul'sion,** see Convulsion, Salaam.

Salab, Salep.

Salac''itas, Salacity, Satyriasis — s. Vulvæ, Nymphomania.

Salac''ity, *Sala'ciousness, Salac''itas,* (F.) *Salacité,* (*salax, sala'cis,* 'lustful, lecherous.') Lecherousness; strong desire for venery.

Sal'ad, (from [L.] *sal,* salt, [F.] *salé,* 'salted,') *Sallet,* (F.) *Salade.* Fresh herbs — as lettuce, dressed with salt, oil, vinegar, &c.

Sal'ad Corn, Valeriana dentata.

Salap', Salep.

Salcombe, Cli'mate of. A small place — the Montpellier of Huxham — which is one of the warmest spots on the S. W. coast of England, and, therefore, in this respect adapted for the phthisical invalid as a winter retreat.

Salep', *Salop', Saloop'* (usually so pronounced,) *Salab', Salap'.* The prepared bulb of the *Or'chis mas'cula* and other species of Orchis. The salep of Cashmere is from a species of *Eulophi'a.* Salep is in small, irregular, hard masses. In its composition in relation to water, it is closely analogous to tragacanth. It is possessed of similar virtues with sago, tapioca, &c. The mucilage is prepared by dissolving the powdered salep in hot water, with assiduous stirring, and adding to the solution sugar and milk. An indigenous salep has been made in France from *Orchis macula'ta, O. bifo'lia, O. mas'cula, O. milita'ris,* and *O. latifo'lia.* See Saloop.

Salep', Otahei'te, Arrowroot (Tahiti).

Saler'num, School of. An ancient school of medicine at Salerno in Italy. It was established by Charlemagne in 802; and was the first Christian university at which medicine was taught. It was much celebrated, especially in the 12th century, and, on its account, Salerno was self-styled *Civ'itas Hippocrat'ica.* The work on hygiene, "*De Conservandâ Valetudine,*" which bears its name, has passed through several editions in various languages. It is supposed to have been written by John of Milan, in 1100, and is in Leonine verses. (See author's "History of Medicine," Philadelphia, 1872, p. 207.)

Salica'ria, (from *salix,*) Lythrum salicaria.

Sal'icin, see Salix.

Salicor'nia Arab'ica, &c., (*sal,* 'salt,' from its abounding in salt,) see Soda,

Saline', *Sali'nus, Salina'cius, Salinac''idus, Sali'tus, Sal'sus, Heli'nus, Hal'myrus, Halico'des, Sali'nous,* (from *sal.*) That which contains a salt, or has the properties of a salt.

Saline' Draught or Mix'ture. This may be made as follows: — *Potass. carbon.,* ℈j., *Acid. citric.* seu *tartar.,* gr. xv. seu *Succ. limon. recent.,* ℥ss., *Aquæ,* f℥viij., *Syrup. cujusvis.,* ℥j. M. Given in divided doses as a febrifuge.

Saline' Efferves'cing Draught or Mix'ture is made by adding a due proportion of either of the acids above mentioned, or of lemon-juice, to the proper proportion of the carbonate of soda or of potassa. About 25 grains of the acid saturate 30 grains of the carbonate. See Powders, soda.

Salines', see Kentucky, mineral waters of.

Sali'nous, Saline.

Sa'lis Ammoni'aci Flo'res, Ammoniæ carbonas.

Saliswitch Frac'ture, Fracture, Saliswitch.

Salit''io, (*salio,* 'I leap,') Leap.

Sali'tus, (from *sal,*) Saline.

Sa'lium, Saliva.

Saliun'ca, Valeriana Celtica.

Sali'va, (probably from σιαλος,) *Si'alon, Si'alos, Si'elon, Ptys'ma, Pty'alum, Pty'elum, Sa'lium, Sputa'men, Sputamen'tum, Spu'tum, Spit, Spit'tle,* (old Eng.) *Spaul,* (Prov.) *Spoat, Flare.* An inodorous, insipid, transparent, slightly viscid fluid; secreted by the parotid, submaxillary, and sublingual glands, and poured into the mouth by the ducts of Steno, Wharton, and Rivinus; the use of which is to mix with the alimentary bolus, and to serve in the process of digestion. It is composed, according to Berzelius, of 992·2 parts of water, 2·9 of a particular animal matter, soluble in water, and insoluble in alcohol, (*Pty'alin, princip'ium saliva'lĕ, mate'ria sialo'na, Ca'sein of the sali'va, Sal'ivary albu'men, Sal'ivine,*) of 1·4 of mucus, 1·7 of chlorides of potassium and sodium, 0·9 of lactate of soda and animal matter, and 0·2 of soda. The ptyalin acts as a ferment, converting starchy matters first into dextrin and then into sugar.

Sali'væ Flux'us Ci'bo Vi'so, 'flow of saliva at the sight of food,' see Salivation.

Salivaire, Anthemis pyrethrum, Salivary.

Sal'ival, Salivary.

Sali'vans, Sialagogue.

Salivant, Sialagogue.

Saliva'ris, Salivary — s. Herba, Anthemis pyrethrum.

Sal'ivary, *Saliva'rius, Saliva'ris, Salivo'sus, Sali'val* or *Sal'ival, Sali'vous,* (F.) *Salivaire.* That which belongs to the saliva.

Sal'ivary Al'bumen, see Saliva — s. Calculi, see Calculi, salivary.

Sal'ivary Fis'tulæ, *F. Salivosæ, Si'alosyrin'ges,* are such as depend upon an accidental opening into the excretory ducts of the salivary glands. Fistulæ are most commonly met with in the duct of Steno.

Sal'ivary Glands, *Secre'ting or'gans of the sali'va, Sali'val glands,* are situate symmetrically, to the number of four, on each side of the

face. Their form is very irregular, and their extent varies according to individuals. Their excretory ducts — *Duc'tus saliva'rii*, (F.) *Canaux* ou *Conduits salivaires* — carry the saliva directly into the mouth, without pouring it into any intermediate reservoir, as happens in the case of some of the other glands. The salivary glands have been distinguished into — 1, The *parot'id*; 2, the *submax'illary*; 3, the *sublin'gual*; and 4, the *in'tralingual* or *lin'gual*, seated at the inferior surface of the tongue, where the mucous membrane forms a fringed fold. See Lingual glands.

Sal'ivated, *Saliva'tus*, *Pty'alized*, *Sial'ochous*, (from *saliva*.) Affected with salivation.

Saliva'tio, Salivation — s. Mercurialis, Salivation, mercurial.

Saliva'tion, *Saliva'tio*, *S. cal'ida*, *Epiph'ora ptyalis'mus*, *Sialis'mus*, *Spu'tum o'ris*, *Sial'achus*, *Sielis'mus*, *Sialorrhœ'a*, *Sialoze'mia*, *Ptyalis'mus*, *Pty'alism*, *Flux'us sali'væ*, (F.) *Flux de Bouche*, *Flux salivaire*, *Ptyalisme*. A superabundant secretion of saliva, occasioned either locally, by the use of irritating masticatories, or under the influence of some cause which acts on the whole economy, and especially of mercurial preparations. In this last case it is accompanied by a coppery taste in the mouth, by swelling of the gums, and sometimes by looseness of the teeth. Salivation may usually be diminished by the use of astringents, laxatives, &c.

Ptyalismus acu'tus sympathet'icus, *Sali'væ flux'us ci'bo vi'so*, *Mouth wa'tering*, the increased flow of saliva produced by the sight, smell, or thought of agreeable food, is a species of ptyalism, as well as the *Ptyalismus acu'tus melli'tus*, *Apoceno'sis ptyalis'mus melli'tus*, *Dulce'do sputato'rum*, or *Sweet spittle*. In this, the saliva has a sweet or mucilaginous taste.

Saliva'tion, Mercu'rial, *Saliva'tio mercuria'lis*, *Sialoze'mia* seu *Ptyalis'mus mercuria'lis*, *P. hydrargyra'tus*, (F.) *Ptyalisme mercuriel*, *Salivation mercurielle*. Salivation produced by mercury. The stomatitis that accompanies it is termed *mercurial*, *Stomati'tis mercuria'lis*, *Hydrargyrostomati'tis*, (F.) *Stomatite mercurielle*.

Salivation Mercurielle, Salivation, mercurial.

Saliva'tum, (from *saliva*,) Sialagogue.

Saliva'tus, Salivated.

Sal'ivine, see Saliva.

Salivo'sus, Salivary.

Sal'ivous, Salivary.

Sa'lix, gen. *Sa'licis*. The *Wil'low*, *I'tea*, (Prov.) *Sal'ly*, *Sal'lywithy*, (Sc.) *Sauch*, *Saugh*, *Wil'lan*, (F.) *Saule*. A genus of plants in the Linnæan system. *Ord.* Salicaceæ.

Sa'lix Ægypti'aca, Calaf.

Sa'lix Frag''ilis, *S. pen'dula* seu *decip'iens* seu *amygdali'na* seu *persicifo'lia* seu *Russelia'na* seu *Trevira'ni*, *Crack* or *Bedford wil'low* (Ph. D.). Sa'lix Al'ba, (Ph. U. S.,) *S. cæru'lea* seu *vitelli'na*, *White wil'low*, (F.) *Osier*. Sa'lix Latifo'lia, *Broad'leaved willow*. Sa'lix Ca'prea, *S. sphacela'ta* seu *tomento'sa*, or *Great roundleaved willow* (Ph. L.). Sa'lix Pentan'dria seu Hermaphrodit'ica. Sa'lix Hu'milis, *Low bush wil'low*, *Speckled willow*. Sa'lix Erioceph'ala. The bark of these and other willows has a slightly aromatic odor, and a bitter astringent taste, which is nearly the same in all the species. It is tonic and astringent, and has been used in intermittents, and in cases of dyspepsia, worms, &c. The active neutral principle has been separated, and called *Sal'icin* or *Sal'icine*, *Salici'na*, *Salici'num*. It has been found in about fourteen species of salix and eight species of Populus; is like the quinia in medicinal efficacy. Dose, ℈j. to ʒj. of the powder. Dose of *Salicin*, from 4 to 6 grains.

Sal'lenders, Malandria.

Sal'lis, Adeps.

Sal'low, (from [F.] *salc*, 'dirty,') Lurid.

Sal'ly, Salix.

Sal'lywithy, Salix.

Sal'miac, (contraction of *sal ammoniac*,) Ammoniæ murias.

Saloop', Salep. Also, sassafras tea flavored with milk and sugar. Under this name a tea is sold in the streets of London which consists of an infusion of the wood of *Laurus Sassafras* with the addition of milk and sugar — *Sas'safras Tea*. Sassafras tea has been long drunk as ordinary tea in different parts of the United States, where it is sometimes called *Sass tea*.

Salop', Salep.

Sal Pe'tra, (*sal*, and *petra*, 'rock,') Potassæ nitras. Soda, nitrate of.

Salpingemphrax'is, (*salpingo*, and ἐμφραξις, 'obstruction.') Obstruction of the Eustachian tube — a cause of deafness.

Salpingi'tis, gen. *Salpingi'tidis*, (*salpingo*, and *itis*.) Inflammation of the Eustachian or Fallopian tube.

Salpin'go, (from *salpinx*.) In composition, the Eustachian or the Fallopian tube.

Salpin'gocatheteris'mus, (*salpingo*, and *catheterismus*.) Catheterism of the Eustachian tube.

Salpingocye'sis, *Paracye'sis tuba'ria*, *Gravid'itas tuba'ria*, (*salpingo*, and κυησις, 'pregnancy.') Tubal pregnancy. See Pregnancy, tubal.

Salpingomalléen, Tensor tympani.

Salpingopharyngæ'us, (*salpingo*, and φαρυγξ, 'the pharynx.') Valsalva and Douglas have given this name to a bundle of fibres, which pass from the Eustachian tube to the pharynx.

Salpingostaphyli'nus, Circumflex muscle — s. Staphylinus internus, Levator palati.

Salpingostenocho'ria, (*salpingo*, στενος, 'narrow,' and χωρα, 'space.') Narrowness or stricture of the Eustachian tube.

Sal'pinx, gen. *Salpin'gis*, (σαλπιγξ, gen. σαλπιγγος,) Tuba, Eustachian tube.

Sal'safy, Tragopogon porrifolium.

Salsamen'tum Cru'dum, ('salted fish,' from *salsus*, 'salted,') Omotarichos.

Salsaparil'la German'ica, Sarsaparilla Germanica.

Salse'do, gen. *Salse'dinis*, (from *salsus*, 'salt,') Muria — s. Mucrum, Potassæ nitras.

Salsepareille, Smilax sarsaparilla — *s. d'Allemagne*, Sarsaparilla Germanica — *s. du Brésil*, *s. Caraque*, *s. de Honduras*, *s. de Péru*, and *s. de Portugal*, see Smilax sarsaparilla.

Sal'sifi, Tragopogon porrifolium.

Salsila'go, (from *salsus*, 'salt,') Muria.

Salsitu'do, gen. *Salsitu'dinis*, (from *salsus*, 'salt,') Muria.

Salso'la Decum'bens, S. kali.

Salso'la Ka'li, *S. Decum'bens*, *Ka'li so'da* seu *spino'sum cochlea'tum*, *Tra'gus* sive *Tra'gum Matthi'oli*, *Prick'ly Salt'wort*, (from *salsus*, owing to its saline properties.) *Ord.* Chenopodiaceæ. This plant, as well as *Salsola sati'va* and *Salsola soda* seu *longifo'lia*, *Kali in'ermis*, *Her'ba vi'tri*, produces the alkaline salt commonly called *Barilla*, *Soda*, or *Kelp*.

Salso'la Longifo'lia, S. kali—s. Sativa, &c., see S. kali, and Soda — s. Soda, see S. kali.

Salsugino'sus, 'briny,' (from *salsus*,) Halmyrodes.

Salsu'go, gen. *Salsu'ginis*, (from *salsus*, 'salt,') Muria.

Sal'sus, Saline.

Salt, (*Sal*, *Hal*, *Hals*, (ἁλς,) (F.) *Sel*. A name formerly given to a considerable number of substances of very different nature. At present, chemists apply the term *Salts* generally, to the combination of an acid with one or more bases. *Neutral salts* are those in which the acid and

base reciprocally saturate each other. *Acid salts* or *supersalts*, (F.) *Sur-sels*, are those in which the acid predominates over the base, and the prefixes *bi* and *ter* indicate the proportion of acid. *Alkaline salts* or *subsalts*, (F.) *Sous-sels*, those in which the base is predominant, when the prefixes *di* and *tre* indicate the proportion of base. The different denominations of the salts are compounded: 1. Of the name of the acid: the termination of which is changed into *ite*, when the name of the acid is in *ous*; *ate*, when it is in *ic*. Thus the salts formed by the *sulphurous* acid are *sulphites*; those by the *sulphuric*, *sulphates*. 2. This name is followed up by that of the oxide, which enters into the composition of the salt. Thus the *sulphate of protoxide of iron* is a combination of sulphuric acid with the protoxide of that metal. Frequently, to shorten the name, the word *oxide* is suppressed; and *proto*, *deuto*, *trito*, &c., put before the acid; as *protosulphate of iron*. *Simple salts* are those resulting from the combination of an acid with a single base; *double salts*, with two different bases; *triple*, with three, &c. A *haloid salt* is one constituted after the type of common salt, or which contains a metal and a *salt-radical*, as chlorine, iodine, &c. An *oxysalt* is formed from the combination of an acid with an oxide.

When *salt* is used in an abstract sense, it means the chloride of sodium.

Salt, Ape'rient, of Fred'erick, Soda, sulphate of — s. Baker's, Ammoniæ carbonas — s. of Barilla, Soda, subcarbonate of — s. Bay, Soda, muriate of—s. Bitter purging, Magnesiæ sulphas —s. of Bones, Ammoniæ carbonas — s. Common, Soda, muriate of — s. Epsom, Magnesiæ sulphas — s. Glauber's, Soda, sulphate of — s. Glauber's, Lymington, see Soda, sulphate of—s. of Lemons, Potassæ oxalas — s. Preston, see Ammoniæ carbonas — s. Rochelle, Soda, tartrate of — s. Rock, Soda, muriate of — s. Sea, Soda, muriate of — s. Secondary, Neutral salt — s. Seignette's, Soda, tartrate of — s. Smelling, Ammoniæ carbonas — s. of Soda, Soda, subcarbonate of—s. Sorethroat, Potassæ nitras fusus sulphatis paucillo mixtus— s. of Tartar, see Potassæ subcarbonas, and Potash — s. Tasteless Purging, Soda, phosphate of — s. of Urine, Ammoniæ carbonas — s. White, Soda, muriate of — s. of Woodsoot, Ammoniæ carbonas — s. of Wormwood, see Potash.

Sal'tans Ro'sa, Urticaria.

Salta'tio, (*saltare*, *saltatum*, 'to dance,') Dancing — s. Sancti Viti, Chorea.

Salt'erton. A village about four miles to the eastward of Exmouth, England, frequented as a winter abode by invalids. It is in a small, open valley on the seashore, and is well protected from winds, particularly the northerly.

Salt'ish, Halmyrodes.

Saltpe'tre, (*sal*, and *petra*, 'a rock,') Potassæ nitras.

Sal'tus, gen. *Saltûs*, (*salire*, *saltum*, 'to leap,') Leap, Vulva—s. Tendinum, Subsultus tendinum.

Salt'wort, Prick'ly, Salsola kali.

Salu'ber, Salutary.

Salu'brious, (from *salubris*,) Salutary.

Salu'briousness, Salubrity.

Salu'bris, (from *salus*,) Salutary.

Salu'brity, *Salu'britas*, *Salu'briousness*, (F.) *Salubrité*, (from *salubris*.) Anything which contributes to the health of individuals or of communities. Situations differ materially from each other in this respect, and the cause of the difference is often an interesting topic of inquiry.

Sa'lus, gen. *Salu'tis*, Sanitas.

Salutaire, Salutary.

Sal'utary, *Salutu'ris*, *Salu'ber*, *Salu'bris*, *Hygiei'nus*, *Hygias'ticus*, *Hygie'rus*, *Salu'brius*, (F.) *Salutaire*, *Salubre*, (from *salus*.) Healthy. That which is favorable to health. Some diseases have been considered salutary; but this is doubtful.

Salutif'erous, *Salu'tifer*, (*salus*, and *fero*, 'I bear.') Bringing health; health-bearing.

Salvatel'la, *Ve'na salvatel'la*, is situate on the back of the hand, near its inner margin. It begins on the posterior surface of the fingers and dorsal surface of the hand, by a plexus, formed by a number of radicles, frequently anastomosing with each other; it then ascends to the inner part of the forearm, where it takes the name — *posterior cubital*. The ancients recommended this vein to be opened in certain diseases, as in melancholic and hypochondriacal affections; and they attributed to such abstraction of blood considerable efficacy in the cure of disease: hence its name, (from *salvere*, 'to be well.')

Salve ([Sax.] ꝛealꝛ, [G.] Salbe,) Unguentum — s. Blistering, Unguentum lyttæ — s. Deshler's, Ceratum resinæ compositum—s. Eye, Unguentum oxidi zinci impuri — s. Eye, Singleton's, Unguentum hydrargyri nitricoöxydi — s. Healing, Cerate of calamine.

Sal'via, (from *salvere*, 'to be well,' owing to its reputed healing qualities,) *S. officina'lis* seu *horten'sis* seu *vulga'ris* seu *mi'nor*, *Elelis'phacus*, *Sage*, *Save*, (F.) *Sauge*, *Petite Sauge*, *Thé d'Europe* ou *de France*. *Ord.* Labiatæ. *Sex. Syst.* Diandria Monogynia. Sage leaves, *Salvia*, (Ph. U. S.,) have a peculiar, aromatic odor, and a warm, aromatic, bitterish taste. Their virtues depend upon an essential oil. They are tonic, stimulant, and carminative. In the form of a weak infusion, sage is occasionally used as a diluent, and as a wash for sore mouth. Dose, gr. xv. to xxx. or more.

Sal'via Africa'na, *Wild Sage*, a South African species, has the same medical properties as Salvia.

Sal'via Colora'ta, Salvia horminum.

Sal'via Hormi'num, *S. colora'ta*, *Hormi'num*, *H. colora'tum* seu *sati'vum*, (F.) *Sauge-hormin*, of the Pharmacopœias, is used in similar cases to Salvia.

Sal'via Horten'sis, Salvia.

Sal'via Lyra'ta, *Wild Sage*, *Cancerweed*; indigenous. The fresh leaves, bruised, are used to destroy warts. It has been supposed to be of use in cancer.

Sal'via Mi'nor, Salvia — s. Officinalis, Salvia.

Sal'via Scla'rea, *Scla'rea*, *Gallit'richum*, *Æthi'opis*, *Biser'mas*, *Co'lus Jo'vis*, *Com'mon Clary*, (F.) *Sauge sclarée*, *Grand sauge*, *Orvale* ou *Toutebonne*. The leaves have been recommended as corroborants and antispasmodics.

Sal'via Vi'tæ, Asplenium ruta muraria — s. Vulgaris, Salvia.

Salz'brunn, Min'eral Wa'ters of. These springs have a reputation in cases of eczema and prurigo. They are in Prussian Silesia, 35 miles S. W. of Breslau.

Samade'ra In'dica, *Ord.* Simarubeæ, furnishes the *Niepa bark*, which is possessed of antiperiodic properties.

Sambaï'ba, Curatella sambaiba.

Sambaïbin'ha, Davila rugosa.

Sam'bo, see Mulatto. *Sambo* and *Zambo* also signify the offspring of the Indian and negro.

Sambu'cus, (from *σαμβυκη*, an ancient musical instrument, said to have been made of its wood,) *Sabu'cus*, *Sambucus ni'gra* seu *vulga'ris* seu *arbo'rea* seu *Canaden'sis*, *Ac'tē*, *Infe'lix lig'num*, *Elder*, *El'norne*, *El'lentree*, *El'larne*, (Sc.) *Boar'tree*, *Bore'tree*, *Bour'tree*, (Prov.) *Bot'try tree*, *Bur'tree*, *El'let*, *El'ren*, *Scaw*, (F.) *Sureau commun*, *Sapier*. *Ord.* Caprifoliaceæ. *Sex. Syst.* Pentandria Digynia. (The flower and bark were formerly called *Cano'pum*.) The flowers, *Sambucus*, (Ph. U. S.,) *Sambuci Flores*, (Ph. B., 1867,) berries, and bark of the elder have been used in medicine. The *flowers* have been reputed diaphoretic and discutient; the *berries*, aperient and sudorific; the *bark*, purgative, and, in small doses, deobstruent.

The flowers are sometimes used in fomentations, and to form a cooling ointment.

Sambu'cus Arbo'rea, Sambucus — s. Canadensis. Sambucus — s. Chamæacte, S. ebulus.

Sambu'cus Eb'ulus, *S. Chamæac'tē* seu *he'lion* seu *hu'milis* seu *herba'cea*, *Eb'ulus*, *Chamæac'tē*, *Od'ocos*, *Dwarf elder*, *Danewort*, (F.) *Hièble*, *Yèble*. The root, interior bark, leaves, flowers, berries, (*Baccæ* seu *Grana Actes*,) and seeds, have all been given in moderate doses as resolvents and deobstruents; and in large doses as hydragogues.

A distilled water of the flowers, *Aqua Sambu'ci*, *Elder Water*, was officinal in the London and Edinburgh Pharmacopœias.

Sambu'cus He'lion, Sambucus ebulus—s. Herbacea, S. ebulus—s. Humilis, S. ebulus—s. Nigra, Sambucus.

Sambu'cus Pu'bens, *S. pubes'cens* seu *racemo'sa*, *Redber'ried El'der*; indigenous. The bark, in decoction, is said to be a valuable hydragogue cathartic.

Sambu'cus Racemo'sa, S. pubens—s. Vulgaris, Sambucus.

Sa'mi Ter'ra, *Sa'mian earth*. An argillaceous earth, found in the Island of Samos, to which were ascribed virtues similar to those of the Terra Lemnii.

Sa'mius La'pis, *Sa'mian stone*. A stone found in the Isle of Samos, which the ancients believed to be astringent and refrigerant.

Sam'phire, Crithmum maritimum.

Samp'son, Black, Echinacea purpurea.

Samp'suchon, (*σαμψυχον*,) Origanum majorana.

Sampsychi'non, (*σαμψυχινον*,) *Sampsu'chinum*. An ointment composed of *σαμψυλον*, which was perhaps marjoram.

Samp'sychum, (*σαμψυχον*,) Origanum majorana.

San Giulia'no, Min'eral Wa'ters of. At the foot of the mountain San Giuliano, a league and a half from Pisa, are several mineral springs; temperature from 84° to 107° Fah.

The spring, *Pozzetto*, contains carbonic acid, sulphates of soda, lime, and magnesia; chlorides of sodium and magnesium; carbonates of lime and magnesia; argil and silica.

Sanab'ilis, (*sanare*, 'to heal,' and *habilis*, 'able,') Curable.

Sa'nable, Curable.

Sa'namunda, Geum urbanum.

Sana'tio, (*sanare*, *sanatum*, 'to cure,') Curation, Cure.

San'ative, Curative.

Sanato'rium, see Sanitarium.

San'atory, Curative.

Sand, ([Sax.] *sand*,) see Gravel.

Sand, Brain, see Pineal gland — s. Pineal, see Pineal gland — s. Tumor, Psammoma.

San'dalum Cæru'leum, Guilandina moringa—s. Rubrum, Pterocarpus santalinus.

San'darac, *Sandarach'a*, *Gum Ju'niper* or *San'darach*, *Pounce*, *Gum'mi Junip'eri*, *Sanda'raca*, *Ver'nix sic'ca*, *Resi'na Junip'eri*, (F.) *Sandaraque*, *Gomme de Genérrier*. A name given, by the Arabs, to an odorous resin, that flows from the *Thuya aphyl'la*. *Ord.* Coniferæ. *Sex. Syst.* Monœcia Monadelphia. It is stimulant, like all the resins; but is very little used.

Sandarach'a Græco'rum, (*σανδαραχη*,) Realgar.

Sand'blind, nearly blind. A defect of vision, in which small particles seem to fly before the eyes. See Metamorphopsia.

Sandef'jord, Min'eral Wa'ters of. These springs in Norway are sulphurous waters, having a reputation in acne, pityriasis, psoriasis, &c.

San'ders, see Saunders.

San'diver, (*saint-de-verre*, 'dross of glass' [?],) see Vitrum.

San'dix, Plumbi oxidum rubrum.

San'dyx, gen. *Sandycis*, (*σανδυξ*,) Plumbi oxidum rubrum.

Sang. The malignant vesicle so fatal to cattle, under various names, has been so called.

Sang, (from [L.] *sanguis*,) Blood, Panax quinquefolium—*s. Artériel*, Arterial blood—*s. Dragon*, Rumex sanguineus, see Calamus rotang — *s. Globules du*, Globules of the blood — *s. Perte de*, Hæmorrhagia — *s. de Rate*, Anthrax.

Sangaree. Wine and water, sweetened and spiced. First used in the West Indies as an agreeable beverage.

Sanglot, (from *singultus*,) Sob.

Sangra'do, ([S.] *sangrador*, 'a bleeder.') A doctor, in Gil Blas, who was a heroic bleeder; hence, popularly applied to such a one.

Sangsue, (from *sanguisuga*,) Hirudo.

Sanguiduc'tus Du'ræ Ma'tris, (*sanguis*, 'blood,' and *ducere*, *ductum*, 'to lead,') Sinuses of the dura mater.

Sanguifica'tio, (*sanguis*, 'blood,' and *facere*, 'to make,') Hæmatosis — s. Debilior, Hyphæmatosis.

Sanguiflux'us, gen. *Sanguifluxûs*, (*sanguis*, 'blood,' and *fluere*, *fluxum*, 'to flow,') Hæmorrhagia — s. Uterinus, Metrorrhagia.

Sanguimo'tion, (*sanguis*, 'blood,' and *movere*, *motum*, 'to move,') Circulation.

Sanguimo'tory, Circulatory.

Sanguin (*Vaisseau*), Bloodvessel.

Sanguina'lis Corrig"iola, (from *sanguis*, because used to stop blood,) Polygonum aviculare.

Sanguina'ria, (from *sanguis*, 'blood,' owing to the color of its juice,') *S. Canaden'sis* seu *acau'lis*, *Blood'root*, *Blood'wort*, *Puccoon'*, *Red Puccoon*, *Red Root*, *Indian Paint*, *Tur'meric*. *Nat. Ord.* Papaveraceæ. *Sex. Syst.* Polyandria Monogynia. A North American plant, the rhizoma — *Sanguinaria* (Ph. U. S.) — and seeds of which are used in medicine. They are emetic. Dose of the powder, 8 to 20 grains. They are said to reduce the velocity of the pulse. The active principle is called *Sanguinari'na* or *Sanguin'arine*.

Sanguina'ria, Polygonum aviculare.

Sanguinari'na. See Sanguinaria.

Sanguin'arine. See Sanguinaria.

San'guine, *Sanguin'eus*, *Sanguino'sus*, *Hæmat'icus*, *Hæmato'des*, *Hæmate'rus*, *Hæmati'uus*, *Hæmo'des*, *Hæmoï'des*, *Sanguin'eous*, *Hæmat'ic*, (F.) *Hématique*, *Sanguin*, (from *sanguis*.) Bloody, bloodlike, having the color of blood, as 'a *sanguine* countenance.' Relating to or containing blood. Plethoric.

Sanguin'ea, Potassæ nitras.

San'guineness, Plethora.

Sanguin'eous, Plethoric, Sanguine.

Sanguin'eous Cysts. Cysts containing blood, either primarily or from accidental hemorrhage into their cavities.

Sanguin'eus, Sanguine.

San'guinis Absorp'tio, Hæmorrhophesis — s. Congestio, Congestion — s. Dissolutio, Hæmateclysis — s. Fluor, Hæmoptysis — s. Fluor vesicæ, Cystorrhagia — s. Ictus, Apoplexy — s. Missio, Bloodletting — s. Profluvium copiosum, Hæmorrhagia — s. Profluvium ex ore, Stomatorrhagia — s. Stagnatio, Hæmostasis.

Sanguin'olent, *Sanguinolen'tus*, (*sanguis*.) Tinged with blood. An epithet applied particularly to the sputa when so tinged. Bloody.

Sanguino'sus, Sanguine.

Sanguipur'gium, (*sanguis*, and *purgare*, 'to cleanse.') Purgation of the blood. A name given by some authors to mild fevers, from an idea that they purged the blood of noxious matters.

San'guis, gen. *San'guinis*, Blood, Sperm — s. Concretus, Coagulum — s. Draconis, see Calamus rotang — s. Hirci siccatus, see Blood — s. Menstruus, see Menses — s. in Urinâ, Hæmaturia — s. Virginis primum menstruatæ, see Menses.

Sanguisor'ba Canaden'sis, *Can'ada Burnett,* (*sanguis,* 'blood,' and *sorbere,* 'to absorb,' so called from its astringency.) A tall indigenous plant, *Ord.* Rosaceæ, with white, sometimes purple, flowers, which appear from August to October. It has the same virtues as

Sanguisor'ba Officina'lis, *S. car'nea* seu *ru'bra, Ital'ian Pim'pinel, Pimpinel'la Ital'ica* seu *officina'lis,* (F.) *Pimprenelle noire.* It was formerly used as an astringent and tonic, in hemorrhages, dysentery, &c.

Sanguisu'ga, (*sanguis,* 'blood,' and *sugere,* 'to suck,') Hirudo.

Sanguisu'gum. A barbarous term, to denote too great an accumulation of blood in the heart.

San'icle, Sanicula, S. Marilandica — s. American, Heuchera cortusa — *s. de Mariland,* Sanicula Marilandica — s. Yorkshire, Pinguicola vulgaris.

Sanic'ula, (from *sano,* 'I heal,') Saxifraga granulata.

Sanic'ula, *S. Europæ'a* seu *officina'rum* seu *mas, Astran'tia diapen'sia, Cauca'lis Sanic'ula, Cuculla'ta, Dodcca'theon, Sym'phytum petræ'um, Diapen'sia, D. cortu'sa, San'icle, Wood March,* (F.) *Toute-saine. Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. This herb was formerly used as a mild astringent. It is bitterish, and somewhat austere.

Sanic'ula Eboracen'sis, Pinguicola vulgaris — s. Europæa, Sanicula.

Sanic'ula Marilan'dica, *San'icle, Ma'ryland San'icle, Black Snake'root,* (F.) *Sanicle de Mariland.* This indigenous plant grows in marshes, or low and shaded ground. It is possessed of tonic virtues, and the powdered root is employed in popular practice as a favorite remedy in intermittent fever. It has been recommended also in chorea.

Sanic'ula Monta'na, Pinguicola vulgaris — s. Officinarum, Sanicula.

Sanido'des, (*σανιδώδης,* 'resembling a board,' from *σανις,* gen. *σανιδος,* 'a board,' and *ὁδες.*) One whose thorax is flat, like a board.

Sanie, Sanies.

Sa'nies, *I'chor, Ta'bum, Vi'rus, Pus malig'num* seu *corrosi'vum,* (F.) *Sanie,* (corr. from *sanguis,* 'blood.') A thin, serous fluid, presenting some of the qualities of pus and blood, and commonly exhaled at the surface of ulcers.

Sa'nies Gangræno'sa. The fluid resulting from destruction of tissue, differing according to the structures involved.

Sanieux, Ichorous.

Sanio'sus, Ichorous.

Sa'nious, Ichorous.

Sanitaire, Sanitary.

Sanita'rium, *Sanato'rium, (sanitas,* 'health.') A retreat selected for valetudinarians in consequence of its salubrity. Also, an establishment for the treatment of the sick. The former would be more properly a *Sanita'rium,* the latter a *Sanato'rium.*

San'itary, *San'atory,* (F.) *Sanitaire.* That which relates to health, and especially to public health, as '*Sanitary commission.*'

San'itas, (*sanus,* 'healthy,') *Hygië'a, Hyge'a, Hygian'sis, Hygi'asis, Integ'ritas, Prosper'itas Valetu'dinis, Sa'lus, Hygiei'a, Valetu'do, Valitu'do, Valetu'do bo'na* seu *secun'da* seu *cou'moda, Hygëi'a, Euzoödyna'mia, Health,* (Sc.) *Heil, Heyle, Heal,* (F.) *Santé,* (from *sanus,* 'sound.') Health has been defined — a state in which all the functions are exerted with regularity and harmony. A person may, however, be in health although certain functions are not performed. A blind man, for example, has health when all his functions except sight proceed with regularity. *Sanity* is often used for soundness of mind. See also Cure.

San'ity, Sanitas.

Sankira, Smilax China.

Sans Paire, 'pairless,' see Azygos vein.

San'ta Cruz, Cli'mate of. This West India island is frequently selected as a winter retreat for the physical valetudinarian from the United States, but it does not seem entitled to any preference, in such cases, over the other islands of the West Indies, while its general salubrity is said to be less than that of many.

Santal Blanc, Santalum album — *s. Rouge,* Pterocarpus santalinus.

San'talum, see Pterocarpus santalinus.

San'talum Al'bum, *S. cit'rinum* seu *pal'lidum* seu *myrtifo'lium, Sir'ium myrtifo'lium, Yel'low* and *White Saun'ders,* (F.) *Santal blanc. Ord.* Santalaceæ. *Sex. Syst.* Tetrandria Monogynia. *White sandal wood* is the young timber, *yellow sandal wood* the old. The virtues of the wood of the white saunders reside in a volatile oil and resinous principle. The odor is fragrant and resembles a mixture of ambergris and roses. It has been used as a stimulant and sudorific, but is not now employed. The oil has been given, with advantage, in gonorrhœa, in the dose of 20 to 40 minims, three times a day. The saunders woods are called, collectively, in French, *Santaux.*

San'talum Myrtifo'lium, S. album — s. Rubrum, Pterocarpus santalinus.

Santé, Sanitas.

Santon'ica, see Artemisia santonica.

Santon'icum, (from *Santonia,* its native place,) Artemisia santonica.

San'tonine, *Santoni'num,* (Ph. U. S.,) *San'tonin, Ci'nin.* A peculiar crystalline substance obtained from Artemisia Santonica. It is directed, in the Ph. U. S. for 1873, to be prepared by digesting *santonica, lime,* and *alcohol* together, and expressing; distilling off the *alcohol* and evaporating; adding *acetic acid* until in slight excess; washing the resulting crystalline mass, and drying it; boiling the dry residue with alcohol: and, having digested the tincture for several hours with animal charcoal, filtering, and setting aside to crystallize. Santonine possesses the anthelmintic properties of the plant. Dose, five or six grains.

Santori'ni, Car'tilages of, Corniculum laryngis.

Santori'ni, Fis'sures of, *Incisu'ræ Santori'ni,* (F.) *Incisures* ou *Scissures de Santorini,* (after the Italian anatomist.) Clefts at the upper and back of the fibrocartilaginous portion of the external ear.

Santori'ni, Tu'bercles of. Small cartilaginous projections at the top of the arytenoid cartilages, which support the ligaments of the glottis. See Corniculum laryngis.

Sanvé, Sinapis.

Sao'ria, *Sauar'ja, Saua'ri,* (a Guiana name.) The ripe and dried fruit of *Mae'sa* seu *Bæob'otrys pic'ta,* an Abyssinian tree, which is administered in its native country, in powder, in doses of from 32 to 44 grammes, as a tæniafuge.

Sap, ([Sax.] sæp, [G.] Saft,) *Ar'borum Suc'cus* seu *Lym'pha,* (F.) *Sève.* The circulating fluid of the vegetable, which corresponds to the blood of the animal.

Sa'pa, see Rob.

Sapha'da. Paracelsus has given this name to reddish scales adherent to the hair in some eruptions of the hairy scalp.

Saphæ'na, Saphena.

Sapha'tum, Asaphatum.

Saphe'na, *Saphæ'na,* (*σαφης,* 'manifest,' 'evident,') (F.) *Saphène.* A name given to two subcutaneous veins of the lower limb, *Saphe'nous veins.* These are: 1. The Great Saphe'na Vein, *S. inter'na, Tibiomalle'olar* (Ch.), (F.) *Grande Veine Saphène* ou *Saphène interne.* Its radicles occupy the inner part of the great toe, and form a transverse arch on the back of the foot, which

unites with the saphena externa, and receives at its convex part, which is turned forwards, a number of branches, coming from the toes. These radicles, when united, ascend before the inner ankle, and form a trunk, the size of which is farther increased by several branches that proceed from the region of the tarsus and that of the metatarsus. This trunk ascends vertically at the inner part of the leg; passes behind the inner condyle of the femur; proceeds along the inner part of the thigh; receives other subcutaneous veins, such as the abdominal subcutaneous, the external pudic, &c., and passes through the inferior opening of the crural canal to empty itself into the femoral vein. 2. The Less'er Ve'na Saphe'na, *Saphe'na exter'na, Perone'omalle'olar Vein* of Chaussier, (F.) *Petite Veine Saphène* ou *Saphène externe*, commences by several roots, which are spread over the dorsum and outer side of the foot, and embrace the outer ankle. Behind this, they unite into a single trunk, which ascends obliquely, approaching the tendo Achillis, and proceeds vertically towards the ham to open into the popliteal vein.

Saphène, Saphena.

Saphe'nous, *Sapheno'sus,* (from *saphena.*) Of or belonging to the saphena.

Saphe'nous Nerves are two in number, and are branches of the crural or femoral nerve. They are the *short saphenous — ner'vus cuta'neus inter'nus;* and the *long saphenous — ner'vus cuta'neus inter'nus lon'gus.*

The *external saphenous,* formed by the union of the communicans poplitei and communicans peronei, passes down the leg by the side of the external saphenous vein of the foot.

Saphe'nous O'pening. An oval and somewhat oblique opening in the fascia lata, a little below Poupart's ligament, for the transmission of the principal superficial vessels. Here, likewise, femoral hernia descends.

Saphe'nous Veins, see Saphena.

Sap'id, *Sa'porous, Sap'idus,* (F.) *Savoureux, (sapere,* 'to taste.') Possessed of sapidity. Having the power of affecting the organs of taste.

Sapid'ity, *Sap'idness, Saporos'ity, Sa'por,* (F.) *Sapidité.* The quality of bodies that gives them taste.

Sapin Commun, ([L.] *Sapinus,*) Pinus picea.

Sapin'dus, (*sapo,* and *Indus,* 'Indian soap,') *S. Sapona'ria, Sapona'ria, Soap'tree,* (F.) *Savonnier commun. Ord.* Sapindaceæ. The name of the plant that affords the *Soapnuts, Sapona'riæ Nu'culæ, Bac'cæ Berrundeu'ses, Soapbervies.* A spherical fruit about the size of a cherry, the cortical part of which is yellow, glossy, and so transparent as to show the spherical black nut that rattles within, and includes a white kernel. The cortical part of this fruit, which has similar effects with soap in washing, has been recommended in chlorosis, and as a stomachic and deobstruent.

Sapinette, see Cerevisia.

Sa'po, gen. *Sapo'nis,* (*σαπων,* [Sax.] ꝑape,) *Smegma,* (F.) *Savon.* A product obtained by treating fatty bodies with caustic alkalies dissolved in water. In the Pharmacopœia of the United States, (1873,) it means Soap made with soda and olive oil. See Sapo medicinalis.

Yel'low Soap is formed of turpentine, oil, and alkali. A soap of *subcarbonate of potassa* and *oil of turpentine — Sapo terebin'thinæ* — was formerly used for indolent swellings, under the name of *Starkey's soap.*

Castile Soap, being made of fine olive oil, is the kind generally selected for internal use. The yellow and soft soaps are the most stimulating; and are, consequently, best adapted for particular cutaneous eruptions.

Internally, soap is purgative and diuretic; externally, it is detergent and stimulant. Soapy water is used with the greatest success in cases of poisoning by acids. It is mostly applied externally to bruises and sprains. In Pharmacy, it is used to favor the solution of resins.

Sa'po Ac''idus, *Ac''id Soap,* is a combination of a fixed oil with an acid.

Sa'po Ammoniaca'lis, Linimentum ammoniæ fortius — s. Ammoniæ oleaceus, Linimentum ammoniæ fortius — s. Amygdalinus, Sapo medicinalis — s. Cacaotinus, Sapo coconeus — s. Calcarius, Linimentum aquæ calcis — s. Castilicnsis, see Sapo medicinalis.

Sa'po Coco'neus, *Sapo cacaöti'nus, Soap of Cocoanut Oil,* (F.) *Savon de cacoa,* has been much used in Germany in herpetic affections.

Sa'po Du'rus, S. medicinalis.

Sa'po Guaiaci'nus, *Soap of Guaiac.* A soap made from guaiacum and liquor potassæ, officinal in some of the European pharmacopœias.

Sa'po Hispan'icus, see S. medicinalis—s. Kalicus, S. mollis.

Sa'po Liq'uidus, *Liq'uid soap, Lo'tio sapona'cea,* is a cosmetic, which is composed of *Olive oil,* ℥iv., *Ol. tartari per deliquium,* ℥ss. Rub together, and add *Aq. rosarum,* ℥xij.

Sa'po Medicina'lis, *Sa'po amygdali'nus, Medic''inal soap,* (F.) *Savon médicinal* ou *amygdalin,* is made of oil of sweet almonds and half its weight of caustic alkali, or, like the *Sapo Hispan'icus* seu *Castilien'sis, Span'ish* or *Castile soap, Sapo durus, Sapo,* (Ph. U. S.,) (F.) *Savon dur,* of olive oil and soda.

Sa'po Mol'lis, *S. vir'idis* seu *ni'ger* seu *ka'licus, Com'mon* or *Soft soap,* (F.) *Savon mou* ou *noir,* is made of potassa and oil or tallow. The *Sapo vulga'ris* or 'common soap,' formerly in the Ph. U. S., was made of soda and animal oil.

Sa'po Ni'ger, *Black soap, Melanosmeg'ma,* is a composition of train oil and an alkali: and Green Soap, *Sa'po vir'idis,* of hempseed oil, linseed oil, or rape oil, with an alkali. See Sapo mollis.

Sa'po Terebin'thinæ, see Sapo — s. Vegetabilis, Pulvis gummosus alkalinus — s. Viridis, Sapo mollis — s. Vulgaris, see Sapo mollis.

Sapona'ceous, *Sapona'ceus,* (F.) *Saponacé,* (from *sapo.*) Soapy. Containing soap, as *Linimentum saponaceum,* Soap liniment.

Saponaire, Saponaria.

Sapona'ria, (from *sapo,* — the juice forming a lather with water,) *S. officina'lis, Soapwort, Bruisewort, Bounc''ing Bet, Stru'thium, Lana'ria, Lych'nis officina'lis* seu *sylves'tris, Ibix'nma, Boot'ia vulga'ris,* (F.) *Saponaire, Savonnière. Ord.* Caryophyllaceæ. *Sex. Syst.* Decandria Digynia. A decoction of the leaves of this plant has been recommended in scrofula, cancer, old syphilis, cutaneous eruptions, jaundice, visceral obstructions, &c. It is hardly ever used. See also Sapindus saponaria.

Sapona'riæ Nu'culæ, see Sapindus saponaria.

Saponé. Soap, to which are added substances capable of communicating to it new properties, without affecting its own.

Sapo'nea. A pectoral medicine, prepared with sweetened syrup of violets and oil of sweet almonds.

Saponifica'tion, *Saponifica'tio,* (*sapo,* and *facere,* 'to make.') The formation of soap. When a putrefying corpse is exposed to water, or is placed in very damp soil, it may undergo a process of *saponification,* the fatty acids combining with the ammonia, and forming adipocire.

Sa'ponin, (from *sapo.*) A glucoside occurring in Soapwort and the root of Polygala senega; a solution of which, in water, froths like soap.

Saponulé. A tincture (*alcoolé*), sufficiently charged with soap to cause it to assume a gelatinous shape.

Sap'onules, *Sapon'uli,* (F.) *Savonules.* Imperfect soaps formed by combinations of volatile or essential oils with different bases. See Opo-

deldoch. *Ac''id Sap'onules* are combinations of such oils with different acids.

Saponure. A medicine, formed of soap, in powder, and of resinous or extractive matters.

Sa'por, Sapidity, Savor.

Saporos'ity, Sapidity.

Sa'porous, Sapid.

Sapo'ta, *S. A'chras, A'chras sapo'ta* seu *austra'lis* seu *zapo'ta, El nispero, Ovalfruited Sapota,* (F.) *Sapotier, Sapotillier, Sapotilla. Fam.* Sapotaceæ. *Sex. Syst.* Hexandria Digynia. A tree which grows in the Antilles, and particularly at St. Domingo. Its fruit is much esteemed. It resembles the marmalade of quinces; and hence has been called *natural marmalade.* The seeds make an emulsion, which has been given in nephritic affections. The bark has been recommended as a febrifuge.

Sapo'ta A'chras, Sapota — s. Mulleri, see Bulata.

Sapotier, Sapota.

Sapotil'la, Sapota.

Sapotillier, Sapota.

Saprop'yra, (σαπρος, 'putrid,' and πυρ, 'fever,') Typhus gravior.

Sa'pros, (σαπρος,) Putrid, Rancid.

Sapros'tomus, (*sapros,* and στομα, 'mouth.') One who has an offensive breath.

Sap'rotes, Putrefaction.

Sar'apus, *Sar'apous,* (σαρω, 'I grin,' and πους, 'the foot.') One who has a large foot; whose toes are largely separated, or whose feet are much asunder in walking. See Kyllosis.

Sarato'ga, Min'eral Wa'ters of. The Saratoga Springs in New York are ten miles northeast from Ballston. They are much frequented by visitors from every part of the United States. These excellent waters are, as a class, applicable to cases of dyspepsia associated with visceral engorgement, chronic congestion of the liver, biliary catarrh, jaundice, &c.; but, as they differ in composition, it is impossible to state explicitly to what special affections they are universally applicable.

The number of springs now grouped under the general head of Saratoga waters is quite large. At one time, the Congress Spring was the only one which had an extended reputation, but of late years, other waters in this interesting locality have also come into favor. The Columbian, Hamilton, Pavilion, Empire, Washington or Clarendon or White, Putnam, Barrel, Saratoga, and Eureka, are carbonated salines, differing in the proportion of their constituents; some being markedly chalybeate. The High Rock, Seltzer, and Reed's Spring, near Saratoga, are almost simple carbonated waters. The Geyser Spring, as will be seen by the table, is more aperient than the Congress water, and the same may be said of the Hathorn water. In addition to these, are the Star Spring, the United States, and several others of less note. There is also a White Sulphur Spring on the east side of Saratoga Lake.

The carefully prepared table on the ensuing page, from the work of Dr. George E. Walton on "The Mineral Springs of the United States and Canada, &c.," N. Y., 1873, p. 169, gives the composition of all the principal springs at Saratoga or in its immediate vicinity.

Sarc'entome, (*sarco,* εν, 'in,' and τομη, 'incision,') *En'tome.* A modified form of scarificator for strieture of the urethra.

Sarcepiploce'lē, Sarcoëpiplocele.

Sarcepiplom'phaloce'lē, Sarcoëpiplomphalocele.

Sarcepiplom'phalus, Sarcoëpiplomphalus.

Sarceux, Sarcous.

Sarcid'ium, (σαρκιδιον, dim. of σαρξ, 'flesh,') Caruncle.

Sar'cin, Sarcosin.

Sar'cina, 'a pack, a burden,' Fœtus.

Sar'cina Ventric'uli, *S. Goodsir'ii, Merismopæ'dia ventric'uli* (Robin). A microscopic cryptogamous plant, found in the fluid of waterbrash. See Parasites.

Sar'cion, (σαρκιον,) Caruncle.

Sarci'tes, (from σαρξ, 'flesh,') Anasarca — s. Flatuosus, Emphysema.

Sarci'tis, (σαρξ, 'flesh,' and *itis,*) Myositis.

Sar'co, (σαρξ, gen. σαρκος, 'flesh.') In composition, flesh.

Sarcoce'lē, *Sar'cocele, Her'nia carno'sa, Scir'rhus testic'uli,* (*sarco,* and κηλη, 'a tumor,') *Sarco'ma scro'ti,* (F.) *Hernie charnue.* Scirrhus or cancer of the testicle. *Can'cer of the testi'cle, Carcino'ma testic'uli.* It has also been called *Malig'nant Sarcocele;* as *Cys'tic disease of the testicle, Mor'bus testiculi cysticus,* has been termed *Cystic sarcocele.* This disease affects adults particularly; and appears most commonly after an inflammatory swelling of the testicle. Sometimes it is dependent upon a blow; at others, it makes its appearance without any appreciable cause. It is well known by a hard, heavy, ovoid or spherical swelling of the testicle, which is, at first, slightly or not at all painful, and merely causes an unpleasant traction on the spermatic cord. There is no heat or change of color of the skin; the spermatic cord is swollen, and participates in the affection; very painful shootings occur; the lymphatic glands of the abdomen become swollen, and form a tumor, which may, at times, be felt through the abdomen; and the patient, at length, dies with every sign of the cancerous diathesis. The prognosis is very unfavorable. The only means, indeed, that can save life is the extirpation of the testicle.

When of syphilitic origin, sarcocele is called *Syphilit'ic sarcocele, Mor'bus syphilit'icus testic'uli.* Tuberculous disease of the testicle has received the name *Tuber'culous sar'cocele, Mor'bus testic'uli tuberculo'sus.*

Sar'cocele, Cys'tic, see Sarcocele — s. Malignant, see Sarcocele — s. Syphilitica, see Sarcocele — s. Tuberculous, see Sarcocele.

Sarcocol'la, (F.) *Colle-chair,* (σαρκοκολλα, from *sarco,* and κολλα, 'glue.') A resinous matter obtained from *Penæ'a sarcocol'la, P. mucrona'ta,* and other species of Penæa, an African shrub, which has been so called from a belief that it facilitates the consolidation of flesh. It is in the form of small, oblong, semitransparent globules, of a yellowish or reddish hue, and smells like aniseed. It was once employed as an astringent and detergent.

Sarcocop'tes, (*sarco,* and κοπτω, 'I wound,') see Psora.

Sar'code, (from *sarco.*) One of the secondary forms of the primordial blastema, characterized by the development of certain vital properties, rather than by any appreciable peculiarity of structure. In some of the inferior animals, this amorphous, homogeneous substance, devoid of apparent structure, constitutes the greater portion, and even the whole of the animal, as in the Hydra. The term has been applied to the contents of cells, as of the cells of nutrition, epithelial cells, &c. See Cytoblastema.

Sarco'des, (from σαρξ, 'flesh,' and *odes,*) Carneous.

Sarcod'ic, *Sarcod'icus,* (F.) *Sarcodique.* Relating or appertaining to sarcode, as *Sarcodic movement,* (F.) *Mouvement sarcodique.*

Sarcod'ic Sub'stance, Sarcode.

Sarcoëpiploce'lē, *Sarcepiploce'lē,* (*sarco,* επιπλοον, 'the epiploon,' and κηλη, 'a tumor.') Epiplocele, complicated with sarcoma or sarcocele.

ANALYSIS OF SARATOGA SPRINGS.*

* See Saratoga, mineral waters of.

† Alumina and sesquioxide of iron.

‡ Silica and alumina.

Sarcoëpiplom'phalus, *Sarcepiplom'phalus, Sarcepiplomphaloce'lē,* (*sarco,* επιπλοον, 'the epiploon,' and *ομφαλος,* 'the navel.') Umbilical hernia, formed by seirrhous epiploon or complicated with sarcoma.

Sarcohydroce'lē, Hydrosarcocele.

Sar'coid, *Sarcoï'des,* (*σαρκοειδης,* from *sarco,* and *ειδος,* 'resemblance.') Resembling flesh.

Sarcolem'ma, gen. *Sarcolem'matis, Sarcole'ma,* (*sarco,* and *λεμμα,* 'a coat.') The sheath which surrounds the fibrils of musele that form a fibre. It is quite distinct from the areolar membrane that binds the fibres into fasciculi.

Sarcolog''ia, (*sarco,* and *λογος,* 'a discourse,') Myology, Sarcology.

Sarcol'ogy, *Sarcolog''ia.* The part of anatomy which treats of the soft parts. It comprises myology, angiology, neurology, and splanchnology.

Sarco'ma, gen. *Sarco'matis,* (*σαρκωμα,*) *Emphy'ma Sarco'ma, Sarcom'atous Tu'mor, His'tioid Growth* or *Tu'mor, Sarco'sis, Sarcophy'iä, Ecsarco'ma, Exsarco'ma, Tu'mor car'neus, Exerescen'tia carno'sa, Pol'ypus carno'sus,* (*σαρξ,* 'flesh,' and *oma.*) Literally, any species of exerescence having a fleshy consistence. The term has, however, of late years, been employed, especially by Virchow and other German pathologists, to embrace a group of tumors, 'the tissues forming which belong to the series of connective substances, but which are distinguished from the tumors formed of the connective tissues by the preponderating development of the cell-elements.' The tissue of granulations formed during the inflammatory irritation of the connective tissue is regarded as the normal prototype of these tumors. (Paget.) Numerous morbid growths, malignant and non-malignant, varying in structure, location, consistence, &c., are vaguely classed under this head.

According to Paget, the following varieties have been described: —

1. Tumors with spindle-shaped cells, the fibroplastic cells of Lebert (Spindel-zellen sarcoma, Recurrent fibroid tumors, Fibroplastic tumors). This form of sarcoma is also called Fasciculated or Albuminous sarcoma, and Plasmoma.

2. Tumors with colossal, giant, many-nucleated, or myeloid cells (Riesen-zellen sarcoma, Myeloid or Myeloplaxie tumors).

3. Tumors with small round cells like the lymph or white blood-corpuscles, or pus, or granulation cells (Rund-zellen sarcoma, Granulations sarcoma, Gliosarcoma, Lymphosarcoma). This form of sarcoma is known also as the Embryoplastic tumor, Soft, Medullary, Glious, Lymphoid or Encephaloid sarcoma.

4. Tumors with stellate cells, and a gelatinous, shiny, intercellular substance, not unlike the material found in a myxoma (Myxosarcoma).

5. Tumors with round or variously-shaped cells, most of which are of large size, and are usually imbedded in a fibrous matrix. In structure no well-defined character distinguishes these tumors from Carcinoma.

6. Tumors in which the cells contain a considerable proportion of pigment, which is most frequently found in the cells described in the last group, in the tumors with round and with fusiform cells (Pigment or Pigmentary sarcoma, Melanoma, Melanotic sarcoma).

In all these forms, according to the same authority, an intercellular substance occurs, which may be either homogeneous or fibrous, or which may present a delicate, net-like or trabecular structure, such as is found in a lymphatic gland.

Sarco'ma, Ad'ipose, of Abernethy, see Adipose sarcoma.

Sarco'ma Alveola're, *S. Medulla're* seu *Carcinomato'des.* A form of round-celled sarcoma, being a carcinomatous degeneration of the sarcoma, usually occurring in the medulla of bone, in the eye, and subcutaneous tissues.

Sarco'ma Carcinomato'des, S. alveolare, Seirrhus — s. Cercosis, see Cereosis.

Sarco'ma, Com'mon Vas'cular or Or'ganized of Abernethy, *Emphy'ma Sarco'ma Vasculo'sum.* Under this head, Abernethy included all those tumors which appeared to be composed of the gelatinous portion of the blood, made vascular by the growth of bloodvessels through it. They are vascular throughout; of simple texture; when bulky, napped on the surface with arboreseent veins.

Sarco'ma Epu'lis, Epulis — s. Fibrocellulare, see Tumor, fibroeellular—s. Gelatinous, see Tumor, fibroeellular — s. Glandular, Hodgkin's disease.

Sarco'ma Glob'ulo-cellula're Sim'plex. The granulation-like round-celled variety of sarcoma.

Sarco'ma Lipomato'des, see Sarcoma lymphadenoïdes — s. Lipomatous, see Sareoma lymphadenoïdes.

Sarco'ma Lymphadenoï'des, *S. molle.* The lymphatic, gland-like, round-eelled form of sarcoma. In *Lipomatous sarcoma, S. lipomato'des,* which is one variety of this, a partial transformation into fat-cells takes place by the infiltration of fat; while in *Mu'cous sarco'ma, S. myxomato'des,* another variety, a mucoid metamorphosis of the basis-substance occurs.

Sarco'ma, Mas'toid, Mammary sarcoma — s. Medullare or Medullary, see Sareoma alveolare, Encephaloid, Hæmatodes fungus — s. Molle, Sareoma lymphadenoïdes — s. Mucous, see Sareoma lymphadenoïdes — s. Myxomatodes, see Sareoma lymphadenoïdes — s. Pulpy, Hæmatodes fungus — s. Seroti, Sareocele.

(For other forms of Sarcoma, see Sarcoma.)

Sarcomateux, Sareomatous.

Sarcomato'des, Sarcomatous.

Sarcomato'sus, Sareomatous.

Sarcom'atous, *Sarcomato'sus, Sarcomato'des,* (F.) *Sarcomateux.* Belonging to, or having the charaeters of, sareoma.

Sarcom'phalum, (*σαρκομφαλον,*) Sarcomphalus.

Sarcom'phalus, *Sarcom'phalum,* (*sarco,* and *ομφαλος,* 'navel.') A seirrhous or fleshy tumor, developed at the navel.

Sarcom'yces, (*sarco,* and *μυκης,* 'fungus,') Sarcospongus.

Sarcoph'agus, (*σαρκοφαγος,* from *sarco,* and *φαγω,* 'I eat,') Carnivorous, Catheretic.

Sarcophy'ia, (*sarco,* and *φυω,* 'I grow,') Excrescenee, Sareoma, see Sareophyte.

Sar'cophyte, (*sarco,* and *φυτον,* 'a vegetable,') *Sarcoph'yton, Flesh germ.* A term proposed by Dr. C. J. B. Williams as synonymous with bioplast, the former, however, expressing the condition and destination of a white cell, *leucocyte;* the latter its vital and formative properties.

Sarcopsyl'la Pen'etrans, (*sarco,* and *ψυλλα,* 'a flea,') Chique.

Sarcopte, Acarus.

Sarcop'tes Sca'biei, (*sarco,* and *κοπτω,* 'I wound,') see Psora, and Parasites.

Sarcopyo'des, (*sarco, πυον,* 'pus,' and *odes.*) Having the appearance of pus mixed with flesh. An epithet given to certain excreted matters, and particularly to the sputa of those laboring under consumption.

Sar'cosin, (from *sarco,*) *Sar'cin, Hypoxan'thin.* An extractive matter found in the flesh and in the blood.

Sarco'sis, (*σαρκωσις,* from *σαρξ,* gen. *σαρκος,* 'flesh,' and *osis.*) The formation of flesh. Also, sarcoma.

Sarco'sis Bul'bi, *Exophthal'mia fungo'sa* seu *sarcomat'ica.* A fleshy growth from the globe of the eye.

Sarco'sis U'teri, Metrauxe.

Sarcospon'gus, *Sarcom'yces,* (*sarco,* and σπογγος, 'fungus.') A fleshy fungus.

Sarcosto'sis, (*sarco,* and *ostosis,* 'formation of bone,') Osteosarcoma.

Sarcoth'lasis, *Sarcothlas'ma,* (*sarco,* and θλαω, 'I bruise,') *Cu'ro contu'sa.* A bruise of the flesh.

Sarcot'ic, (σαρκωτικος,) Incarnans.

Sarcotripteur, (*sarco,* and τριβω, 'I rub down,') Écraseur.

Sarcotripsie, see Écraseur.

Sar'cous, (F.) *Sarceux,* (from σαρξ, gen. σαρκος, 'flesh.') Of or belonging to flesh or muscle — as '*sarcous tissue.*'

Sar'cous El'ements, *Prim'itive par'ticles.* The elementary particles which, by their union, form the mass of muscular fibre. Under high powers of the microscope, the muscular fibrils seem to consist of alternate rectangular light and dark particles. These are the *sarcous elements* of Mr. Bowman, which he considers to result from a splitting transversely of the muscular fibre into disks — *Bowman's disks* — and lengthwise into fibrillæ. Brücke has described the dark particles as refracting light doubly, — hence called *disdiaclasts,* — while the others are only singly refractile.

Sardi'asis, (from Σαρδω, *Sardinia,* because the *Sardonia herba,* which grew there, was said to produce it,) Canine laugh, Risus sardonicus.

Sardo'nia Her'ba, Ranunculus sceleratus.

Sardoni'asis, (same etymon as Sardiasis,) Canine laugh. Risus sardonicus.

Sardo'nius Ri'sus, Canine laugh.

Sare, Essera.

Sarotham'nus Scopa'rius, (σαρος, 'a broom,' and θαμνος, 'a shrub,') Spartium scoparium.

Sarrace'nia, (after Dr. Sarrazin, of Quebec,) *Sidesaddle plant, Fly'trap,* (F.) *Sarracénie.* The root of *Sarracenia fla'va* and *S. variola'ris* is bitter and astringent, and has been used in South Carolina as a domestic remedy in dyspepsia. The root of *Sarracenia purpu'rea* or *pitcher plant, Indian* or *Huntsman's cap,* is used, in infusion, by the Indians of the North, as a remedy for smallpox; both in the way of prevention and cure.

Sarrasin, (after the Saracens,) Polygonum fagopyrum.

Sarrète, Trismus infantum.

Sarriette, Satureia hortensis — *s. do Crète,* Satureia capitata.

Sar'sa, Smilax sarsaparilla.

Sar'sæ Ra'dix, Smilax sarsaparilla.

Sarsaparil'la, ([S.] *Zarza,* 'a brier,' and *parilla,* 'a little vine,' or, according to some, from *Parillo,* a physician who first employed it.) Menispermum Canadense, Smilax sarsaparilla.

Sarsaparil'la, False, Aralia nudicaulis.

Sarsaparil'la German'ica, *Gra'men ma'jor* seu *ru'brum, Salsaparil'la German'ica, Ca'rex Arena'ria,* (F.) *Laiche, L. des Sables, Salsepareille d'Allemagne, Chiendent rouge. Ord.* Cyperaceæ. *Sex. Syst.* Monœcia Triandria. A plant, which grows plentifully on the seacoasts of Europe. It has been recommended in some mucous affections of the trachea, in rheumatism, gout, &c.

Sarsaparil'la, In'dian, Hemidesmus Indicus — s. Wild, Aralia nudicaulis.

Sarsaparil'lin, see Smilax sarsaparilla.

Sartaparil'la, Smilax sarsaparilla.

Sarto'rius, (*sartor,* 'a tailor,' because used in crossing the legs.) *Suto'rius, Longis'simus Fem'oris, Fascia'lis, F. Lon'gus* seu *suto'rius,* (F.) *Iliocresti-tibial, Ilio-prétibial* (Ch.), *Couturier.* A muscle situate at the anterior part of the thigh. It is long, small, and flattened, and extends, obliquely, from the anterior and superior spine of the ilium to the superior and inner part of the tibia. This muscle can, also, bend the pelvis on the thigh, and conversely.

Sarx, (σαρξ, gen. σαρκος,) Flesh, Pulp.

Sar'za, ([S.] *sarza,* 'a brier,') Smilax sarsaparilla.

Sas'sa Gum. A gum, occasionally carried into the European markets from the East, and answering exactly to Bruce's description of the product of a tree which he calls *Sassa.* It has considerable resemblance to gum tragacanth.

Sas'safras, Laurus sassafras, Nectandra cymbarum — s. Medulla, see Laurus sassafras — s. Nut, see Pichurim beans — s. Radicis cortex, see Laurus sassafras — s. Radix, see Laurus sassafras — s. Swamp, Magnolia glauca — s. Tea, Saloop.

Sas'sy Bark. A poisonous bark of a large tree — Genus, *Erythrophle'um, E. Guineen'sē; Nat. Ord.* Fabaceæ: *Redwater* tree of Sierra Leone — growing in Western and Central Africa, used in an ordeal to which persons suspected of witchcraft, secret murder, and other crimes are subjected, to test their innocence or guilt. Hence it is called, in Conga, *ordeal bark,* and in Ashantee and Liberia, *doom bark.*

Sat'ellite, *Satel'les,* gen. *Satel'litis.* That which guards. That which is placed near.

Sat'ellite Veins are those that accompany arteries.

Sa'the, (σαθη,) Penis.

Sa'tias, Satiety.

Sa'ties, Satiety.

Sati'etas, Plesmone, Satiety.

Sati'ety, *Sati'etas, Satu'ritas, Sa'tias, Sa'ties, Satura'tio, A'sē, Ple'thos, Ples'monē,* (*satiare,* from *satis,* 'enough,' 'to give enough.') Disgust for food; commonly produced by repletion.

Sat'in, Lunaria rediviva.

Sa'turans, (*saturare, saturatum,* — *satis,* 'enough,' — 'to satiate,') Absorbent (medicine).

Satura'tio, Satiety, Saturation.

Satura'tion, *Satura'tio.* The state of a compound in which its elements are combined in such proportion that a fresh quantity of either cannot be added without producing excess. When an acid or an alkali is directed to be saturated, the saturation is determined by litmus and turmeric.

Saturei'a Capita'ta, (from Σατυροι, 'the Satyrs;' owing to its presumed power of exciting to venery,) *Cil'iated Sa'vory, Thy'mus, T. sylves'tris* seu *capita'tus* seu *Cre'ticus, Cuni'la,* (F.) *Sarriette de Crète. Ord.* Labiatæ. *Sex. Syst.* Didynamia Gymnospermia. Possesses similar properties to thyme.

Saturei'a Horten'sis, *Saturei'a, S. sati'va, Cuni'la sati'va Plin'ii, Thym'bra, Sum'mer Sa'vory,* (F.) *Sarriette.* An aromatic plant, cultivated for culinary purposes. It has been used, as an excitant, in anorexia, anaphrodisia, &c.

Saturei'a Origanoï'des, Cunila mariana — s. Sativa, S. hortensis.

Satu'ritas, (*saturare,* 'to satiate,') Satiety.

Satur'ni Dulce'do, Plumbi superacetas.

Sat'urnine, *Saturni'nus,* (from *saturnus.*) Relating or appertaining to lead.

Sat'urnine Breath. The peculiar odor of the breath in one laboring under Saturnismus.

Saturnis'mus, *Intoxica'tio* seu *Cachex'ia* seu *Dyscra'sia saturni'na, Molybdocachex'ia,* (F.) *Maladie de plomb,* (from *saturnus.*) Poisoning by lead; lead-poisoning; saturnine cachexy.

Satur'nus, Plumbum.

Satyr'ia, Elephantiasis.

Satyri'asis, (σατυριασις, from Σατυρος, 'a Satyr;' because the Satyrs were greatly addicted to venery,) *S. fu'rens, Satyrias'mus, Satyris'mus, Œstroma'nia, Tenti'go vene'rea, Salac''itas, Brachu'na, Lagne'sis Salac''itas, L. fu'ror masculi'nus, Lagne'a, Lagni'a, Lagno'sis, Lasciv'ia, Lasciv'itas, Tenti'go vere'tri.* An irresistible desire, in man, to have frequent connection with the female, accompanied by the power of doing so without

exhaustion. The causes are commonly obscure. Sometimes, the abuse of aphrodisiacs has occasioned it. The principal symptoms are:—almost constant erection; irresistible and almost insatiable desire for venery; frequent nocturnal pollutions. Cold lotions; the cold bath; a mild diet; active exercise, &c., are the only means that can be adopted for its removal.

SATYRI'ASIS FU'RENS, Satyriasis.

Satyrias'mus, Satyriasis.

Satyr'ion, (*σατυριον*,) Orchis mascula.

Satyris'mus, (*σατυρισμος*,) Satyriasis.

Satyr'ium, Goodyera pubescens.

Sauar'ja, Saoria.

Sauce Alone', Alliaria.

Sauce, Green, Rumex scutatus.

Sauch, ([Sax.] *ȝalh*,) Salix.

Sau'erkraut (G.), 'sour cabbage,' *Sourcrout*, (F.) *Chou-croûte*. A culinary preparation, made with chopped cabbage, left to attain an incipient state of acetous fermentation. It is reputed, by the Germans especially, to be wholesome, easy of digestion, and eminently antiscorbutic.

Sauge, Salvia—*s. des Bois*, Teucrium scordium — *s. Grande*, Salvia sclarea — *s. Hormin*, Salvia horminum — *s. de Jérusalem*, Pulmonaria — *s. Petite*, Salvia — *s. Sclarée*, Salvia sclarea.

Saugh, ([Sax.] *ȝalh*,) Salix.

Saule, Salix.

Saumure, (from *sal*, and *muria*,) Muria.

Saun'ders, Red, Pterocarpus santalinus — s. Tree, Pterocarpus santalinus — s. Yellow, Santalum album.

Sau'ra, (*σαυρα*,) Lizard.

Saurider'ma, (*saura*, and *derma*,) Sauriosis.

Saurioi'des, Sauriosis.

Sauriosis, *Saurioi'des*, *Sauroder'ma*, *Sauri-der'ma*, (*saura*, and *osis*.) The condition of ichthyosis with an altered state of the sebiparous secretion, which gives occasion to an accumulation of sebaceous matter on the skin, suggesting the idea of the coat of a lizard.

Sauroder'ma, (*saura*, and *δερμα*, 'skin,') Sauriosis.

Sauru'rus Cer'nuus, (*saura*, 'lizard,' and *ουρα*, 'a tail,') *Lizard's Tail, Breast weed*. Indigenous; *Ord.* Saururaceæ; flowering in June. It has been used in lumbago. The bruised root is emollient, and is a popular application to inflamed breasts.

Saus'age Poi'son, Allantotoxicum.

Saut, ([L.] *saltus*,) Leap.

Sauteuses, 'leapers,' see Convulsionnaire.

Sauve-vie, 'save life,' Asplenium ruta muraria.

Savanil'la Ratan'hy, see Krameria Ixina.

Save, Salvia.

Saveur, Savor.

Sa'vian Cor'puscles. Corpuscles, described by Savi in the skin of the torpedo, analogous to the Pacinian corpuscles.

Sav'ine, Juniperus sabina.

Savinier, Juniperus sabina.

Savon, Sapo—*s. Ammoniacal*, Linimentum ammoniæ fortius—*s. Amygdalin*, Sapo medicinalis—*s. Animal*, Sapo — *s. Cacao*, Sapo coconeus — *s. Calcaire*, Linimentum aquæ calcis—*s. Dur*, Sapo durus—*s. Médicinal* ou *Médical*, Sapo medicinalis — *s. Mou*, Sapo mollis — *s. Noir*, Sapo mollis.

Savonnier Commun, (from *savon*,) Sapindus saponaria.

Savannière, Saponaria.

Savonulus, Saponulus.

Sa'vor, *Sa'por*, *Taste*, (F.) *Saveur*. Quality of bodies, by which they act upon the sense of taste. Chemists, at times, avail themselves of this quality to analyze an unknown substance.

Sa'vory, *Sap'idus*, (F.) *Savoureux*. An epithet given to bodies that have taste; and particularly to those that excite a very agreeable impression on the organ of taste.

SA'VORY, CIL'IATED, Satureia capitata—s. Summer, Satureia hortensis.

Savoreux, Savory.

Savoyan, Galium verum.

Saw, *Pri'on*, *Ser'ra*, ([Da.] Sawe, [Sax.] *ȝaȝa*,) (F.) *Scie*. A surgical instrument, made like a common saw; and used for sawing the bones in amputations, or for removing exostoses, &c. Saws of different sizes and shapes are used in surgery. The crown of the trepan is nothing more than a species of circular saw.

SAW, AMPUTA'TION, *Scr'ra amputato'ria*. The saw used in amputation.

SAW, HEY'S. An instrument used by Mr. Hey, of Leeds, in fractures of the cranium. It consists of a long handle, to which a small saw with a convex or straight edge is attached, and by which a piece of bone of any shape may be removed. With the trephine, the saw must always be circular.

Saw Palmet'to, Chamærops serratula — s. Wort, Liatris.

Saxif'raga, (*saxum*, 'a stone,' and *frango*, 'I break.') Pimpinella saxifraga—s. Anglica, Peucedanum silaus. See Calcifraga.

SAXIF'RAGA CRASSIFO'LIA. *Ord.* Saxifragaceæ. *Sex. Syst.* Decandria Digynia. The root of this species of saxifrage has been extolled by Pallas, as pre-eminently antiseptic.

SAXIF'RAGA GRANULA'TA, *S. al'ba*, *Sanic'ula*, *Se'dum*, *White sax'ifrage*, (F.) *Saxifrage granulée*. Recommended as diuretic and lithontriptic; but not used.

SAXIF'RAGA RU'BRA, Spiræa filipendula — s. Vulgaris, Peucedanum silaus.

Sax'ifrage, Burnet, Pimpinella saxifraga — *s. Granulée*, Saxifraga granulata — s. Meadow, Peucedanum silaus — s. White, Saxifraga granulata.

Saxif'ragus, (*saxum*, 'a stone,' and *frango*, 'I break,') Lithontriptic.

Saxon'icus Pul'vis. A powder, prepared with the roots of the wild and the cultivated angelica; the asclepias vincetoxicum, &c. It was considered formerly as an antidote.

Scab, *Sca'bies*, *Crus'ta*, *Scall*, (Prov.) *Rove*, (F.) *Croûte*. An incrustation, which forms upon a sore, owing to the concretion of the fluid discharged from it. An eschar.

Scab'by or **Scabbed.** Covered or diseased with scabs.

Sca'bies, (*scabere*, 'to scratch,') Psora — s. Agria, Lichen — s. Capitis, Porrigo lupinosa, Porrigo scutulata — s. Capitis favosa, Porrigo favosa—s. Crustosa, Radzyge—s. Fera, Ecthyma.

SCA'BIES FERI'NA, *Itch of an'imals*, *Mange*, (pronounced *Mānje*.) A cutaneous disease, which affects almost all domestic animals, but especially the horse, sheep, dog, and cow. It is said to have been transmitted to man; but this is questionable. See Psoriasis.

SCA'BIES HU'MIDA, Eczema — s. Norvegica Boeckii, Radzyge — s. Papuliformis, Prurigo — s. Sicca, Lichen, Psoriasis — s. Venerea contagiosa, Scherlievo.

Scabieuse Ordinaire, Scabiosa.

Scabi'ola, Psora.

Scabio'sa, (*scaber*, 'rough,' owing to its rough hairy surface,) *S. arven'sis*, *Triche'ra arven'sis*, *Field Sca'bious*, (Sc.) *Eastuingwort*, (F.) *Scabieuse ordinaire*. *Ord.* Dipsaceæ. *Sex. Syst.* Tetrandria Monogynia. The plant is bitter and subastringent, and was formerly used in the cure of leprous affections and diseased lungs.

SCABIO'SA ARVEN'SIS, Scabiosa — s. Carduifolia, Echinops.

SCABIO'SA SUCCI'SA, *Succi'sa*, *S. praten'sis*, *Asteroceph'alus succi'sa*, *Mor'sus Diab'oli*, *Dev'il's bit*, (F.) *Mors du Diable*, has similar properties.

Sca'bious, Erigeron Philadelphicum — s. Field, Scabiosa — s. Sweet, Erigeron heterophyllum.

Sca'bish, Œnothera biennis.

Scabrit''ies, (*scaber*, 'rough,') Lichen, Trachoma.

Scabrit''ies Un'guium. A morbid condition of the nails, in which they are distorted and separated from the matrix. See Onychophyma.

Scæ'vola, see Bela-modagam.

Sca'la, (F.) *Rampe*, 'a ladder.' A machine formerly used for reducing dislocations of the humerus.

Sca'læ of the Coch'lea, *Gy'ri* seu *Duc'tus spira'les* seu *Cana'les coch'leæ*, *Spi'ral Canal'* or *tube of the cochlea*, *Cana'lis spiralis cochleæ*, *Canalis cochleæ os'seus*, (F.) *Rampes* ou *Échelles du Limaçon*—are the cavities in the cochlea, separated from each other by the spiral septum. The one—*Sca'la inter'na* seu *poste'rior* seu *infe'rior coch'leæ*, *S. tym'pani*—would communicate with the cavitas tympani by the fenestra rotunda, were it not for the membrane that closes it. The other—*Sca'la exter'na* seu *ante'rior* seu *supe'rior coch'leæ*, *S. vestib'uli*—opens into the cavity of the vestibule. The scalæ communicate with each other by an opening at the top of the partition.

Sca'la Ante'rior Coch'leæ, see Scala—s. Clausa, see Scala—s. Externa cochleæ, see Scala—s. Inferior cochleæ, see Scala—s. Interior cochleæ, see Scala—s. Media, see membrane of Corti—s. Posterior cochleæ, see Scala—s. Superior cochleæ, see Scala—s. Tympani, see Cochlea, and Scala—s. Vestibuli, see Cochlea, and Scala.

Scald'ricks, Sinapis arvensis.

Scale, ([Sax.] ȝcale, from ȝcȳlan, 'to divide, separate;' [G.] Schale, 'shell, peel;') *Squa'ma*, *Le'pis*, (F.) *Escaille*, *Ecaille*. An opaque and thickened lamina of cuticle, commonly produced by some degree of inflammation of the true skin, over which it is formed.

Scale, Dry, Psoriasis.

Scalène Antérieur, Scalenus anticus—*s. Postérieur*, Scalenus posticus.

Scale'nus, (σκαληνος, 'irregular or unequal.') Geometers employ this word to designate a triangle whose three sides are unequal. Anatomists have given the name to two muscles. 1. Scale'nus Anti'cus, *Por'tion of the Costotrachélien* (Ch.), (F.) *Scalène antérieur*, is situate at the internal and inferior part of the neck. It is long and triangular; and is inserted, below, at the upper surface of the first rib; and, above, at the anterior tubercle of the transverse processes of the 3d, 4th, 5th, and 6th cervical vertebræ. This muscle bends the neck, and draws it to its side. It can also raise the first rib. 2. Scale'nus Posti'cus, (F.) *Scalène postérieur*, *Por'tion of the Costotrachélien* (Ch.), is situate behind the last. It is, also, long and triangular; but more bulky than the *S. anticus*. It is attached, below, to the outer surface of the first two ribs; and terminates, above, at the summit of the transverse processes of the last six vertebræ of the neck. This muscle bends the neck laterally, and can elevate the first two ribs. Some anatomists, as Albinus and Sömmering, have described five scaleni muscles on each side, and have called them *Scale'nus pri'or*, *S. min'imus*, *S. latera'lis*, *S. me'dius*, *S. posti'cus*. Riolan and Chaussier only describe one scalenus muscle on each side. Cowper and Douglas, and the generality of the English anatomists, admit three, *S. anti'cus*, *S. me'dius*, and *S. posti'cus*; or, *pri'mus*, *secun'dus*, and *ter'tius*; Winslow, Boyer, and many of the French anatomists,—two, as above described.

Sca'ling, (same etymon as Scale,) in dentistry, is an operation which consists in removing the tartar from the teeth.

Scall, (*Scale* [?], [Sc.] *Skaw*,) Impetigo, Scab—s. Asbestos, see Eczema of the hairy scalp—s. Crusted, Impetigo—s. Dry, Psoriasis—s. Honeycomb, Porrigo favosa—s. Humid, Eczema—s. Milky, Porrigo larvalis—s. Papulous, Ecthyma—s. Running, Eczema, Impetigo—s. Vesicular, Eczema capitis—s. Washerwoman's, Psoriasis diffusa.

Scallard, (from *scall*,) Porrigo.

Scalled Head, Porrigo, P. scutulata.

Scalp, ([D.] *Schelp*, 'a shell,') (old Eng.) *Seop*. The integuments covering the head. The *hair'y scalp* is called, also, *Capillit'ium*, *Tricho'ton*, *Cæsa'ries*, (F.) *Chevelure*, *Cuir chevelu*.

Scal'pel, *Scalpel'lum*, *Scalpel'lus*, *Cul'ter*, *Inciso'rium*, *Smi'lion*, (from *scalpo*, 'I cut.') A cutting instrument, formed of a blade of well-tempered steel, very sharp, of variable shape and size, and fixed solidly in a handle. Its use is to divide the soft parts in operations, dissection, &c.

Scalpel'lum, Scalpel—s. Lenticulare, Phacopis.

Scalpel'lus, Bistoury, Scalpel.

Scal'peum, Bistoury.

Scal'prum, (*scalpo*, 'to cut, to scrape,') Raspatorium—s. Chirurgicum, Lancet.

Scal'prum Denta'rium, *Li'ma denta'ria*. A tooth file. A dental file, or file used by the dentist.

Scal'prum Raso'rium, Raspatorium.

Sca'ly, (from *scale*,) Squamous.

Sca'ly Diseases, *Squa'mæ*, *Lepido'ses*, form the second order in Willan and Bateman's system of cutaneous diseases.

Scam'ma, gen. *Scam'matis*, (σκαμμα,) Fossa.

Scammonée d'Alep, Convolvulus scammonia.

Scammo'nia, see Convolvulus scammonia.

Scammo'niæ Ra'dix, see Convolvulus scammonia—s. Resina, Extractum scammonii.

Scam'monin. A glucoside derived from boiling resin of scammony with dilute sulphuric acid for some time.

Scammo'nium, (σκαμωνια, σκαμμωνιον,) see Convolvulus scammonia—s. Syriacum, Convolvulus scammonia.

Scam'mony, Convolvulus scammonia.

Scam'mony, Bour'bon. The concrete juice of *Perip'loca Mauritia'na*.

Scam'mony, Ger'man, see Convolvulus sepium.

Scam'mony of Montpel'lier, Cynanchum Monspeliacum.

Scam'num Hippocrat'icum, (*scamnum*, 'a bench,') *Ba'thron Hippocrati'on* of Galen, (F.) *Banc d'Hippocrate*. A machine invented by Hippocrates for reducing fractures. It was a sort of bed, six feet long, on which the patient was fixed. Straps were attached above and below the fracture or luxation, and extension and counterextension were effected by a winch. It is described by Galen, Oribasius, Scultetus, &c. See Bathron.

Scan'dix, gen. *Scandi'cis*, (σκανδιξ,) S. cerefolium.

Scan'dix Bulbocas'tanum, Bunium bulbocastanum.

Scan'dix Cerefo'lium, *Scan'dix*, *Scan'dyx*, *Pec'ten Ven'eris*, *Cerefo'lium*, *Dau'cus Seprin'ius*, *Chærophyl'lum*, *C. Sati'vum* seu *Cerefo'lium*, *Anthris'cus cerefo'lium*, *Chærefo'lium*, *Cher'vil*, (F.) *Cerfeuil*. *Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. A culinary herb, which is slightly aromatic and grateful. It is said to be gently aperient and diuretic.

Scan'dix Odora'ta, *Sweet Cic''ely*. Properties the same as the other. Also, Chærophyllum odoratum.

Scandula'rius Mus'culus, (*scandere*, 'to climb,') Parathenar, Transversus pedis.

Scan'dyx, gen. *Scandy'cis*, (σκανδυξ,) Scandix cerefolium.

Sca'pha, (σκαφη,) *Scaphus*, (σκαφος, from σκαπτω, 'I make hollow.') The excavation or cavity of the external ear, between the helix and anthelix. Also, the meatus auditorius externus. The rima

vulvæ. The name of a bandage for the head, mentioned by Galen, and called, likewise, *Tho'lus Diocle'us*.

Sca'phion, (σκαφιον, dim. of σκαφη, 'a trough,') Cranium, Papaver (Capsule).

Sca'phium Ocula'rē, *Pel'vis Ocula'ris, Eye-glass,* (F.) *Bassin* ou *Gondole oculaire, Œillière.* A small porcelain, glass, or metallic vessel, used for applying lotions to the eye.

Sca'phocar'posuperphalange'us Pol'licis, Abductor pollicis brevis.

Scaphocephal'ic, (σκαφη, 'a boat,' and κεφαλη, 'head.') Having or relating to a skull that is scaphoid or boat-shaped.

Sca'phoid, *Scaphoï'des,* (σκαφη, 'a boat,' and ειδος, 'form.') A name given to several parts.

Sca'phoid Bone of the Foot, *Os Scaphoï'des Pe'dis* seu *navicula'rē* seu *cymbifor'mē, Cym'ba, Boatlike bone,* (F.) *Scaphoïde du Pied.* This bone is situate at the forepart of the astragalus and inner part of the foot. The *posterior surface* forms a cavity somewhat like that of a boat, for receiving the head of the astragalus. There is a prominence at the inner side of the bone, for the insertion of tendons, muscles, and strong ligaments. The forepart of the bone is convex, and divided into three articular surfaces for articulation with the ossa cuneiformia. Between the os naviculare and astragalus, the foot has its principal lateral and rotary motions; although each of the other joints of the tarsus contributes a little. Part of the tibialis posticus is inserted into it.

Sca'phoid Bone of the Hand, *Os Scaphoï'des Mi'nûs* seu *navicula'rē* seu *cymbifor'mē, Cym'ba, Boatlike bone,* (F.) *Scaphoïde de la main.* The first bone of the first row of the carpus. The upper surface is convex, and articulated with the radius. The under and outer surfaces are also convex — to be articulated with the trapezium and trapezoides. Between the upper and under cartilaginous surfaces there is a *rough fossa* for the insertion of the capsular ligament. The anterior and inner surface has an *oval cavity,* where it is articulated with the os magnum, which gives name to the bone. There is a *process* on the outer end of the bone, for the attachment of part of the anterior transverse ligament of the wrist.

Sca'phoid Fos'sa, *Fos'sa Scaphoï'des,* (F.) *Enfoncement Scaphoïde.* A small cavity at the upper part of the internal ala of the pterygoid process, in which the peristaphylinus internus is attached.

Scaphoïde de la Main, Os scaphoides manûs — *s. du Pied,* Os scaphoides pedis.

Scaphoï'doästrag'alan, *Scaphoïdoästragala'nus.* That which relates to the scaphoid bone and astragalus. The articulation of these bones is so called; and the ligament which strengthens it is termed the *Scaphoïdoästragalan ligament.*

Scaphoï'docu'boid, *Scaphoïdocuboïdæ'us.* That which relates to the scaphoid and cuboid bones. The articulation of these bones is so called.

Scaph'ula, (dim. of *scapha,*) Navicularis fossa.

Sca'phus, (σκαφος, 'a skiff, a trough,') Auditory canal, external, Rima vulvæ, Scapha.

Scap'ula, *Scap'ulum, Pla'ta, Omopla'ta, Homo'plata, Scop'tula, Epino'tion, Latitu'do hu'meri, Omopla'tē, Os la'tum hu'meri, Scu'tum thora'cis* seu *cor'dis, Spa'tha, Spath'ula, Pteryg'ium, Chelo'ninm, Spat'ula; Bladebone, Platebone, Shoulderblade,* (Prov.) *Shieldbone, Platebone, Spadebone,* (F.) *Omoplate.* An irregular, broad, flat bone, of a triangular shape, situate at the posterior part of the shoulder. It has: 1. A *poste'rior* or *dor'sal surface* or *Dor'sum, Testu'do scap'ulæ,* divided transversely into two parts by a triangular process, called *Spine of the Scapula,* which terminates by a considerable eminence called *Acromion.* Above the spine is the *Fos'sa supraspina'ta;* below it, the *F. in'fraspina'ta.* 2. An *ante'rior* or *cos'tal sur'face* or *ven'ter,* forming the *Fos'sa subscapula'ris.* 3. A *supe'rior* or *cer'vical edge,* which is thin, and terminates, anteriorly, by a strong, curved apophysis, called the *coracoid process.* 4. A *poste'rior* or *verte'bral edge,* called, also, the *base.* 5. An *outer* or *ax'illary* or *infe'rior edge,* having a thick, truncated angle, in which is the *glenoid cavity.* With this is articulated the head of the humerus. The glenoid cavity is separated from the body of the bone by a narrow part called the *cervix* or *neck.* The edges or margins are, also, called *costæ.* The scapula has three angles — an *inferior, superior,* and *anterior.*

Scap'ula, Humerus, Spatulus.

Scap'ulæ Na'si, *Par'tes latera'les na'si.* The lateral parts of the nose.

Scapulaire, Scapular.

Scapulal'gia, (*scapula,* 'the shoulderblade,' and αλγος, 'pain.') Arthralgia of the scapula.

Scap'ular, *Scap'ulary, Scapula'ris,* (F.) *Scapulaire,* (from *scapula.*) That which relates or belongs to the scapula.

Scap'ular Aponeuro'sis. A broad, thin aponeurosis, with decussating fibres, which is attached, *above,* to the spine of the scapula; *below,* to a crest between the teres major and infraspinatus; *within,* to the spinal edge of the scapula; and which at its middle unites with the thin aponeurosis that covers a part of the external surface of the deltoid.

Scap'ular Ar'teries. These are several. 1. The *Supe'rior scap'ular, Superfic''ial scap'ular* of Sömmering, *Dorsa'lis scap'ulæ supe'rior, Transversa'lis scap'ulæ, T. hu'meri.* This arises from the subclavian, and often from the inferior thyroid, or from a trunk common to it and the *posterior scapular* or *transverse scapular* or *cervical.* It passes behind the clavicle, above the superior edge of the scapula, and buries itself between the dorsal surface of that bone and the muscles inserted into it. 2. The *infe'rior scapular* or *com'mon scap'ular* or *internal scap'ular* or *subscap'ular ar'tery, A. Thorac''ica axilla'ris* seu *ala'ris,* is of considerable size. It arises from the inferior part of the axillary artery, behind the brachial plexus, gives off several branches to the armpit, and divides into two branches — the one, *Scapula'ris interna,* and the smaller of the two, is distributed almost entirely to the serratus major anticus and latissimus dorsi; the other, the larger of the two, *Dorsa'lis scap'ulæ infe'rior* seu *Circumflex'a scapula'ris,* which distributes its branches to the subscapular, supraspinal, and infraspinal regions. See Acromial artery.

Scap'ular Notch, see Noteh, scapular.

Scap'ular Veins follow the same course as the arteries which they accompany.

Scapula'rē, Scapulary.

Scap'ulary, *Scapula'rē, Fas'cia Scapula'ris.* A broad, linen bandage, divided into two tails for three-quarters of its length, the undivided extremity of which is attached to the posterior and middle part of a bandage carried round the body, the tails passing over the shoulders, and being attached to the anterior part of the body bandage, to prevent it from slipping down.

Scap'ulo, in composition, the scapula.

Scapulodyn'ia, (*scapula,* and οδυνη, 'pain.') Pain or rheumatism of the shoulder.

Scapulohu'meral. An epithet given to the *shoulder-joint.* It is an orbicular articulation, resulting from the reception of the head of the humerus into the glenoid cavity of the scapula. To keep the bones in connection there are — 1. A very strong, conoidal capsular ligament, passing from the circumference of the glenoid cavity around the neck of the humerus. 2. A *fibrocar-*

tilaginous ring, called the glenoid ligament, and a synovial capsule.

Scapulo-Huméral, Teres major — *s. Humérolécranien*, Triceps extensor cubiti — *s. Hyoïdien*, Omohyoideus — *s. Radial*, Biceps flexor cubiti — *s. Trochitérein, grand*, Infraspinatus.

Scap'ulum, Scapula.

Sca'pus, (σκαπος, 'a shaft, a stalk,') Penis, see Hair.

Scar, (εσχαρα, [F.] *escarre*,) Cicatrix.

SCAR, *Scam*. To mark with a cicatrix or seam, as *scarred*, (Sc.) *arred*, means marked with a cicatrix or seam.

Scarabæ'olus Hemisphæ'ricus, (dim. of *scarabæus*,) Coccus cacti.

Scar'borough, Min'eral Wa'ters of, *Scarborough Spa*. A celebrated English chalybeate, at Scarborough, in Yorkshire. One of the springs is a simple carbonated chalybeate, like that of Tunbridge, the other has an admixture of purging salt. Scarborough, having the additional advantage of seabathing, is much frequented by invalids.

Scarcht, (Sax. ȝcɹɹtta,) Hermaphrodite.

Scardamyg'mus, (σκαρδαμυγμος,) *Scardamyx'is*, (F.) *Clignement*, (from σκαρδαμυσσειν, 'to wink.') Winking. Closure of the eyelids.

Scarf'skin, Epidermis.

Scarificateur, Scarificator.

Scarifica'tion, *Scarifica'tio, Am'ycha, Amyx'is, Scha'sis, Catacas'mus, Amyg'mos, Amyg'mus, Schas'mus, Encharax'is*, (*scarificare, scarificatum*, σκαριφαομαι, 'I make a slight scratch.') The act of scarifying. Also, a small incision, *Am'ychē*, made into the skin with a lancet, bistoury, or scarificator, for different therapeutical purposes — as to draw blood, or to discharge some effused fluid. When the scarifications are very superficial, and do not go farther than the skin, they are termed by the French *Mouchetures*.

Scarifica'tor, *Scarificato'rium, Schaste'rium*, (F.) *Scarificateur*. An instrument for making scarifications. It consists of a small brass box of a cubical shape, in which 10 or 12 lancet points turn upon a common pivot. By means of a spring, all these blades can be made to issue at once, and make as many scarifications. Other instruments much more simple in construction are so called, intended for the scarification of the conjunctiva, the larynx, &c.

Scarificato'rium, Scarificator.

Scari'ola, Cichorium endivia, Lactuca scariola.

Scariole, Cichorium endivia.

Scarla'ta, Scarlatina.

Scarlati'na, ([I.] *scarlatte*, 'a deep red,') *Scarla'ta, Enanthe'sis Rosa'lia, Rosa'lia, Rossa'lia, R. Squamo'sa, Rosa'liæ, Rube'olæ*, of some, *Morbil'ii ig'nei* seu *confluen'tes, Mor'bus scarlatino'sus, Fe'bris scarlatino'sa* seu *ru'bra, Gut'turis mor'bus epidem'icus Forest'i, Pur'pura, Ty'phus scarlati'nus, Porphyris'mus, Porphyrys'ma, Scarlet* or *Rash fever*, (F.) *Fièvre rouge, F. pourprée*. The characteristic symptoms of scarlatina are — a scarlet flush, appearing about the second day of fever on the face, neck, and fauces, and progressively spreading over the body, terminating about the seventh day. Two great varieties may be reckoned: — the *S. simplex* seu *febris* seu *benig'na* seu *sine angi'nâ*, in which the fever is moderate, and terminates with efflorescence, prostration of strength being trifling; and the *S. angino'sa* seu *paristhmit'ica* seu *cynanch'ica* seu *mit''ior, Foth'ergill's sorethroat*, in which the fever is severe, the throat ulcerated, the eruption later in its appearance and less extensive, often changing to a livid hue. *Scarlati'na malig'na* seu *gra'vior*, has been reckoned a variety of this, in its worst form. It agrees with the Cynanche maligna of Cullen.

Scarlatina belongs to the *major exanthemata*, and is a disease chiefly of children. The eruption differs from that of measles, in being an efflorescence not raised above the cuticle. Measles, too, is attended with catarrhal symptoms, while the complication in scarlatina is cynanche.

The disease is generally regarded as eminently contagious, but doubt may and does exist on this point. To the zymotic principle the name *Scarlatinin* has been given by Dr. Wm. Farr.

The treatment of simple scarlatina need not be much. It must be antiphlogistic. If the throat be very much ulcerated, acid gargles and counter-irritants must be employed; and if the affection becomes manifestly typhoid, and the sorethroat of a malignant character, the case must be treated like typhus gravior, with antiseptic gargles of bark, acid, &c. Anasarca sometimes supervenes on scarlatina, and requires attention. Purgatives are here demanded as well as the use of sorbefacients, such as mercury and squill, &c.

SCARLATI'NA ANGINO'SA, see Scarlatina — s. Benigna, see Scarlatina — s. Cynanchia, see Scarlatina — s. Febris, see Scarlatina — s. Gravior, see Scarlatina — s. Miliaris, Rubeola — s. Mitior, see Scarlatina — s. Morbillosa, Rubella — s. Paristhmitica, see Scarlatina — s. Pustulosa, Rubeola — s. Rheumatica, Dengue — s. Sine anginâ, see Scarlatina — s. Urticata, Urticaria.

Scar'latinin, see Scarlatina.

Scar'latinoid, *Scarlatinoï'des*, (*scarlatina*, and ειδος, 'resemblance.') Resembling scarlatina.

Scarlati'nous or **Scarlat'inous**, *Scarlati'nal, Scarlatino'sus*, (F.) *Scarlatineux*. Relating or appertaining to scarlatina.

Scar'let Ber'ry, Solanum dulcamara — s. Fever, Scarlatina.

Scar'pa's Foram'ina, (after Scarpa, the celebrated Italian anatomist and surgeon.) Two of the four smaller foramina into which the anterior palatine foramen of the superior maxillary bone is divided; the others being called the *foramina of Stenson*.

SCAR'PA'S SHOE, see Shoe, Scarpa's — s. Triangle, see Triangle.

Scarred, see Scar.

Scatacra'sia, (σκωρ, gen. σκατος, 'excrement,' and κρασις, 'mixture,') Scoracrasia.

Scatacrati'a, (σκωρ, gen. σκατος, 'excrement,' and *acratia*, 'want of power,') see Scoracrasia.

Scaw, Sambucus.

Scean de Salomon, 'seal of Solomon,' Convallaria polygonatum.

Scelal'gia, (*scelos*, and αλγος, 'pain.') Pain of the leg.

SCELAL'GIA ANTI'CA, Neuralgia femoropretibialis — s. Postica, Neuralgia femoropoplitea — s. Puerperarum, Phlegmatia dolens.

Sceleteu'ma, gen. *Sceleteu'matis, Skeleteuma*, (σκελετευμα,) Mummy.

Sceleteu'sis, *Skeleteu'sis*, (σκελετευω, 'I desiccate, I pickle.') Mummification. Also, the mode of making a skeleton, *Skeletopœ'ia, Syntax'is*.

Sceletog'raphy, Skeletography.

Sceletolog''ia, Skeletology.

Scel'eton, Skeleton.

Sceletopœ'a, Sceleteusis, Skeletopœia.

Scel'etum, Skeleton — s. Artificiale, see Skeleton — s. Naturale, see Skeleton.

Scelon'cus, (*scelos*, and ογκος, 'a tumor.') A tumor of the leg. Phlegmatia dolens.

Scelorrheu'ma, gen. *Scelorrheu'matis, Rheumatis'mus cru'ris*, (*scelos*, and ῥευμα, 'defluxion, rheumatism.') Rheumatism of the leg.

Sce'los, (σκελος,) Leg.

Sceloscambo'sis, (*scelos*, and σκαμβος, 'crooked,') see Rhæbosis.

Scelotyr'be, (σκελοτυρβη, from *scelos*, and τυρβη, 'tumult,') Chorea, Porphyra nautica — s. Agitans, Dystaxia — s. Febrilis, see Subsultus tendinum — s. Festinans, Paralysis agitans — s. Tarantismus, Chorea.

Scenome'ninx, gen. *Scenomenin'gis*, (σκηνος, 'a hut,' and μηνιγξ, 'a membrane,') see Cell.

Scenotheo'ria, (σκηνος, 'a hut,' and θεωρια, 'theory,') Cell doctrine.

Scepar'nos, (σκεπαρνος,) Ascia.

Scepar'num, (σκεπαριον,) Amnion.

Scepaste'rium, (from σκεπαζω, 'I enwrap,') Couvrechef.

Scepas'trum, Couvrechef.

Scep'trum, (σκεπτρον,) Penis.

Scha'sis, (σχασις,) Scarification.

Schas'mus, (σχασμος,) Scarification.

Schaste'rion, (σχαστηριον,) Fleam, Lancet, Scarificator.

Sche'ba Ar'abum, Artemisia santonica.

Sched'ula, (dim. of *scheda,* 'a leaf of paper,') Prescription.

Scheele's Green, Arsenite of copper.

Scherbet', *Sherbet', Serbet', Tscherbet', Sorbe'thum, Sorbet'tum, Sorbe'tum, Sorbet.* A drink prepared by the Turks, Persians, Egyptians, &c., with sugar and the juice of acid fruits.

Scherlie'vo, *Skerlievo, Male di Scherlievo, Male di Breno, Male di Fiume, Male di Scarlievo, Male scabioso venereo, Margaretizza, Mor'bus Croa'tus* seu *fluminien'sis, Frambœ'sia Illyr'ica, Sca'bies vene'rea contagio'sa, Vene'real Itch.* A name given to a particular form of syphilis, observed in Illyria. It is said to be capable of being communicated without immediate contact; and that its principal symptoms are:—pains in the bones, ulceration of the fauces, pustules, and fungous growths in different parts of the body.

Affections, known by this name, as well as by those of *Male di Breno, Falcadi'na, Boala* and *Frenga,* have prevailed in the frontier countries of the Austrian empire, and were generally regarded as contagious, of syphilitic origin, and as having been introduced from a surrounding country. The terms appear, however, in the course of time, to have been applied to a variety of ulcers, eruptions, and other morbid conditions in no way connected with syphilis, so that they lost their former signification.

Schero'ma, gen. *Schero'matis,* (from σχερος, 'a shore, dry land.') A dryness of the eye from the want of lachrymal secretion.

Schi'as, gen. *Schi'adis,* Ischias, Neuralgia femoropoplitea.

Schiat'icus, Sciatic.

Schidake'don, (σχιδακηδον,) *Schidace'dum, Schindace'dum, Schindal'amus, Schindal'mus,* (from σχιζω, 'I cleave.') A longitudinal fracture of a bone.

Schindace'dum, Schidakedon.

Schindal'amus, (σχινδυλαμος,) Schidakedon, Schindylesis.

Schindale'sis, Schindylesis.

Schindal'mus, (σχινδαλμυς,) Schidakedon, Schindylesis.

Schindyle'sis, (σχινδυλησις,) *Schindale'sis, Schindal'amus, Schindal'mus,* (from σχινδυλεω, 'I split into small pieces.') An articulation of bones—by furrowing, as it were,—as in that of the vomer, which constitutes, in part, the septum narium. Also, the act of splitting into small pieces.

Schinelæ'on, (σχινελαιον, from σχινος, 'the mastic tree,' and ελαιον, 'oil,') *O'leum lentis'cinum.* Oil of mastic.

Schinoceph'alus, (*schinos,* 'the squill,' and κεφαλη, 'head,') Scillocephalus.

Schi'nus, (σχινος,) Pistacia lentiscus, Scilla.

Schi'nus Ar'veira, *Arveira. Nat. Ord.* Anacardiaceæ. A tree of Brazil, whose bark is slightly aromatic and resinous, and is markedly astringent.

The resinous juice of *Schi'nus mol'lē* is slightly purgative.

Schinz'nach or **Haps'burg, Min'eral Wa'ters of.** These springs are situate three leagues from Baden, and are among the most celebrated bathing places in Switzerland. The waters are of a saline sulphurous kind; and have a high reputation in cutaneous and rheumatic affections, visceral obstructions, and glandular enlargements. They contain sulphate of lime, sulphate of soda, chloride of sodium, chloride of magnesium, sulphate of magnesia, carbonate of lime, carbonate of magnesia, and oxide of iron; sulphohydric acid, and carbonic acid gases. The season is from the 15th of May to the 15th of September.

Schis'ma, gen. *Schis'matis,* (σχισμα,) Fissure, Rima.

Schistoceph'alus, (σχιστος, 'cleft,' and κεφαλη, 'head.') A monster having some part of the head cleft or fissured.

Schistocor'mus, (σχιστος, 'cleft,' and κορμος, 'trunk,') *Schistotho'rax.* A monster having part or the whole of the trunk cleft or fissured.

Schistom'elus, (σχιστος, 'cleft,' and μελος, 'a limb.') A monster whose limbs are fissured.

Schistor'rhachis, (σχιστος, 'cleft,' and ῥαχις, 'spine,') Hydrorachis.

Schistoso'mus, (σχιστος, 'cleft,' and σωμα, 'body.') A malformation of the abdomen, in which the fissure and eventration extend over the entire length of the abdomen; the lower extremities being absent, or very little developed, so that the body appears as if truncated inferiorly.

Schistotho'rax, gen. *Schistothora'cis,* (σχιστος, 'cleft,' and *thorax,*) Schistocormus.

Schi'za, (σχιζα,) Rima — s. Vulvæ, Rima vulvæ.

Schizatrich'ia, *Trichos'chisis, Schizotrich'ia,* (σχιζω, 'I split,' and θριξ, gen. τριχος, 'a hair.') The splitting of the hairs at their extremities.

Schlang'enbad or **Schlag'enbach, Min'eral Wa'ters of.** Schlangenbad is a much frequented watering place in Germany. The water, which is unctuous, is employed as a tepid bath, in hysteria, nervous excitability, &c. It contains carbonates of lime and magnesia, a little carbonic acid, carbonate of soda, &c.; but has only slight therapeutic value. Temperature, 86° of Fahrenheit.

Schlemm, Canal' of, Canal of Schlemm.

Schnapps, Schiedam', see Gin.

Schneide'rian Mem'brane, Pituitary membrane.

Schœnan'thus, (σχοινος, 'the common rush,' and ανθος, 'a flower,') Juncus odoratus.

Scho'la, (σχολη,) School.

Scholle'ra Oxycoc'cos, Vaccinium oxycoccos.

School, *Scho'la,* (F.) *Ecole.* A place of education. In Europe, the large medical schools are usually attached to the universities. In England, however, there has been no medical school of celebrity at either of the universities of Oxford or Cambridge, owing greatly to their provincial situation. Of late, two schools have existed in London, attached to the London University — University College and King's College. Excellent schools are now connected with the hospitals there and in the larger towns in the provinces. The medical schools of Europe which have been most celebrated are those of Edinburgh, Leyden, Berlin, Halle, Tübingen, Paris, Montpellier, Bologna, Padua, Pavia, and Pisa. In the United States, the medical schools are very numerous. Those of Philadelphia and New York are the most largely attended.

School'ey's Moun'tain, Min'eral Wa'ters of. The waters of this New Jersey spring are a carbonated chalybeate. According to Dr. McNevin, they contain extractive, chloride of sodium, chloride of calcium, chloride of magnesium, carbonate of lime, sulphate of lime, carbonate of magnesia, silex, and carbonate and oxide of iron.

Schousbœ'a Coccin'ea, (after P. K. A. Schousboe, a Danish botanist,) Cacoucia coccinea.

Schuber'tia Dis'ticha, (after G. H. von Schubert, Professor of Natural History at Munich,) Taxodium distichum.

Schwal'bach or **Langenschwal'bach, Min'eral Waters of.** Schwalbach is a town in Germany, seated on the Aa, 32 miles west of Frankfort. The waters are gaseous chalybeates, whose invigorating properties are due to carbonate of iron, held in solution by an excess of carbonic acid. They also contain bicarbonate of soda, lime, and magnesia. Employed as a tonic, and in dyspepsia and torpor of the bowels.

Schwann, White Sub'stance of, see Substance, white, of Schwann.

Schwein'furth's Green, Arsenite of copper.

Schwen'deck, Min'eral Wa'ters of. These waters are about 5 leagues from Munich, in Bavaria. They contain carbonic acid, carbonate and sulphate of lime, chloride of calcium, chloride of magnesium, carbonate of soda, and oxide of iron, and are much used for cutaneous affections.

Sciat'ic, *Sciat'icus, Ischiat'ic, Ischiat'icus, Ischiad'icus, Schiat'icus,* (F.) *Sciatique,* (from *ισχιον,* 'the haunch.') Formed by contraction from *ischiatic,* which latter is still used. See Ischiatic. Used substantively for sciatica.

Sciat'ic Nerve, Great, *Ner'vus ischiad'icus, Great fem'oro-poplite'al* (Ch.), (F.) *Grand nerf sciatique,* ought to be esteemed a continuation of the sacral plexus. It issues from the pelvis, between the pyramidalis and superior gemellus, descends along the posterior part of the thigh, and, after having given branches to the gemini, quadratus, obturator externus, glutæus maximus, semimembranosus, semitendinosus, biceps, and third abductor muscles, it divides, about the inferior third of the thigh, into two branches — the one named the *external popliteal,* the other the *internal.*

Sciat'ic Nerve, Less'er, *Infe'rior gluteal branch of the sa'cral plex'us, Less'er fem'oro-poplite'al nerve* (Ch.), (F.) *Nerf petit sciatique,* which seems especially formed by the 2d and 3d sacral, is given off from the lower part of the plexus, and escapes from the pelvis beneath the pyramidalis muscle. It gives branches — *nervi cuta'nei clu'nium inferio'res* — to the glutæus maximus, a *scia'tic branch* or *infrapel'vic cuta'neous* or *perine'al cuta'neous, Pudenda'lis lon'gus infe'rior,* which passes under the tuberosity of the ischium, and furnishes filaments to the glutæus maximus, and to the muscles of the perinæum, urethra, penis, scrotum, &c., and a *posterior femoral cutaneous branch* — *middle posterior cutaneous nerve* — the filaments of which traverse the femoral aponeurosis, to be distributed on the skin of the posterior part of the thigh. The principal branch of the lesser sciatic nerve divides, near the ham, into two or three filaments, which descend under the integuments almost as far as the inferior part of the leg.

Sciat'ic Notch, Great, *Sciatic Fora'men, Incisu'ra ischiad'ica major,* (F.) *Grande échancrure sciatique* ou *grand trou sciatique,* is a large notch at the posterior edge of each os innominatum, below the posterior and inferior iliac spine, which is converted into a foramen by the sacrum and sacrosciatic ligaments. The *less'er sciatic notch, Incisu'ra ischiad'ica mi'nor, Lu'na albi'ni,* (F.) *Petite échancrure ischiatique,* is much smaller than the last, from which it is separated by the sciatic spine. It gives passage to the tendon of the obturator internus, and to the internal pudic vessels and nerves.

Sciat'ic Re'gion, Ischiadic region.

Sciat'ic Spine, *Spine of the Is'chium, Spi'nous Proc''ess of the Is'chium,* is a short, flat, pyramidal eminence on the os innominatum, above the preceding foramen, which gives insertion to the lesser sacrosciatic ligament.

Sciat'ica, Neuralgia femoropoplitea.

Sciatique, Neuralgia femoropoplitea, Sciatic.

Scie, (from *scare,* 'to cut,') Saw.

Science de la Vie, Biology.

Scien'tia Hermet'ica, 'Hermetic science,' Alchemy — s. Medendi, Medicina — s. Medica, Medicina.

Sciero'pia, (*σκιερος,* 'shady,' and *ωψ,* 'the eye.') A defect of vision, in which all objects have a darker hue than natural.

Scil'la, (*σκιλλα,* from *σχιζω,* 'I cleave, I split,' or from *σκελλω,* 'I dry,') *Scil'la* seu *Squil'la marit'ima, Scyl'la, As'chil, Schi'nus, Oc'ulus Typho'nis, Ornithog'alum marit'imum* seu *squil'la, Stella'ris* seu *Urgin'ea scilla, Ce'pa mari'na, Squilla, Squill* or *Sea onion, Eye of Typhon,* (F.) *Scille, Ognon marin. Ord.* Liliaceæ. *Sex. Syst.* Hexandria Monogynia. Native of Spain, Austria, &c. The bulb or root of the squill, *Scilla,* (Ph. U. S.,) has a bitter, nauseous taste, and is extremely acrid, inflaming the skin when rubbed on it. Its acrimony, on which its virtues depend, is destroyed by heat, drying, and keeping. It is extracted by vinegar, spirit, and water. In large doses, squill is emetic and purgative; in small doses, diuretic and expectorant. Its active principle has been called *scil'litin.* Dose, gr. j. to v. of the dried root, united or not with mercury.

Scil'la Esculen'ta, *Phalan'gium Esculen'tum, East'ern Quamash, Wild Hy'acinth;* indigenous; flowering in May. An article of diet among the Western Indians. It is made into bread and into poultices for inflamed breasts.

Scillit'ic, *Scillit'icus,* (F.) *Scillitique,* (from *scilla.*) Containing squill.

Scil'litin, see Scilla.

Scilloceph'alus, *Schinoceph'alus,* (*σκιλλα,* 'the squill,' and *κεφαλη,* 'head.') One who has a large bulbiform head.

Scin'cus, (*σκιγκος* or *σκιγγος.*) A species of *Sau'rus* or *Lacer'ta,* common in Egypt, and much extolled by the ancients as alexipharmic and aphrodisiac.

Scinde Boil, *Rain boil.* A form of furunculus met with in the rainy season in all parts of India.

Scintil'la Ven'eris, 'a spark, a relic of Venus.' A name given by Paracelsus to the impotence and loss of power in the limbs produced by syphilis.

Scintillement de l'Œil, (from *scintilla,* 'a spark,') 'sparkling of the eye,' Confusio.

Sciom'achy, (*σκιομαχια,*) *Skioma'chia, Skiama'chia,* (*σκια,* 'a shade,' and *μαχη,* 'a fight.') A gymnastic exercise with the ancients, which consisted in a mock encounter at boxing and jumping with one's own shadow.

Sci'rhus, (*σκιρος,*) Scirrhus.

Scir'pus (*scirpus,* 'a rush') **Palus'tris,** Eleocharis palustris.

Scirrhe, Scirrhus.

Scirrhoblepharon'cus, (*scirrhus, βλεφαρον,* 'eyelid,' and *ογκος,* 'swelling,') see Scleriasis.

Scirrhoce'lē, (*scirrhus,* and *κηλη,* 'rupture,') Orchocele scirrhosa.

Scirrho'des, (*σκιρρωδης,* from *scirrhus,* and *odes,*) Scirrhous.

Scirrhogas'tria, *Scir'rhus ventric'uli,* (F.) *Squirrogastrie,* (*scirrhus,* and *γαστηρ,* 'stomach.') Scirrhus of the stomach.

Scir'rhoid, *Scirrhoï'des, Scirrho'des,* (*scirrhus,* and *ειδος,* 'resemblance.') Resembling scirrhus.

Scirrho'ma, gen. *Scirrho'matis,* (*σκιρρωμα,*) Scirrhus.

Scirrhophthal'mia, *Sclerophthal'mia,* (*scirrhus.* and *οφθαλμος,* 'eye,') *Can'cer oc'uli.* Cancer of the eye.

Scirrhophthal'mia Palpebra'rum, see Scleriasis.

Scirrhosar'ca Neonato'rum, (*scirrhus,* and *σαρξ,* gen. *σαρκος,* 'flesh;' *neonatus,* 'new-born.') Induration of the cellular tissue of infants.

Scirrho'sis, (from *scirrhus,*) Scirrhus.

Scir'rhous, *Scirrho'sus, Scirrho'des,* (F.) *Squirrheux,* (from *scirrhus.*) Of or belonging to scirrhus.

Scir'rhous Sarco'ma of Ab'ernethy, *Emphy'ma sarco'ma scirrho'sum.* Hard, rigid, vascular infarction of glandular follicles; indolent, insentient, glabrous; sometimes shrinking and becoming more indurated. Found in glandulous structures.

Scir'rhus, *Sci'rhus, Squir'rhus, Skir'rhus, Scirrho'ma, Scirrho'sis, Can'cer scirrho'sus, Carcino'ma sim'plex* seu *fibro'sum* seu *du'rum* seu *reticula're, Indura'tio malig'na, Scle'rus, Pseudino'ma, Ino'ma, Carcinom'atous sarco'ma, Hard* or *Fi'brous can'cer,* (from σκιρρος, 'hard, indurated,') (F.) *Squirrhe, Squirre, Schirre, Skirre, Cancer dur* ou *squirrheux* ou *fibreux.* A disease, so called from the hardness that characterizes it. It is a state of induration, of a peculiar kind, affecting glandular structures generally, but capable of occurring in other textures. It usually precedes carcinoma, of which it may, indeed, be considered as the first stage. Scirrhus must not be confounded with the induration which succeeds inflammation, although the two states are often complicated, and may stand, occasionally, in the relation of cause and effect to each other. Scirrhus is ordinarily accompanied by violent shooting pains. It is also irregular on its surface; and when cut into has a bluish or grayish white color. When the surgeon is satisfied of the existence of scirrhus, he had better remove it at once. No other treatment seems to possess much advantage. See Cancer.

Galen uses the term *Scirrho'sis* for a livid excrescence caused by inflammation.

Scir'rhus et Carcino'ma Ventric'uli, see Gastrostenosis cardiaca et pylorica.

Scir'rhus, Cuirass'-like, (F.) *Squirrhe en cuirasse.* A chronic form of scirrhus, in which a cancerous mass surrounds the chest, giving an appearance like that indicated by its name.

Scir'rhus He'patis, Hepatoscirrhus — s. Intestinorum, Enteropathia cancerosa — s. Palpebrarum, see Scleriasis — s. Testiculi, Sarcocele — s. Uteri, Metroscirrhus — s. Ventriculi, Gastroscirrhus.

Scission, (from *scindere, scissum,* 'to split,') see Generation.

Scissiparité, (*scindere, scissum,* 'to split,' and *pario,* 'I bring forth,') see Generation.

Scis'sors, *Scis'sor,* 'a carver,' (*scindere, scissum,* 'to cut,') *For'fex, For'pex, Psa'lis, To'mis,* (F.) *Ciseaux.* A well-known instrument in common use, and often employed in surgery. Scissors are composed of two cutting blades, crossing each other and moving upon an axis. They are *straight* or *curved.* Sometimes the curve is on the flat side, when they are called, in France, *Ciseaux à cuiller;* at others, on their edges. The scissors, bent so that the blades make an obtuse angle with the handles, are also much used. They are called, in France, *Ciseaux coudés.* Scissors are used for dividing soft, loose, isolated parts, which it would be difficult to reach and to cut with the bistoury. They are employed, likewise, in the operation for harelip, and for removing warts, fungous excrescences, &c.

Scis'sors, Smell'ie's, see Perforator.

Scissu'ra, (from *scindere, scissum,* 'to split,') Fissure — s. Auris, Incisura auris — s. Vulvæ, see Rima.

Scissu'ræ, Rhagades.

Scissure, Fissure — *s. de Glaser,* Fissure — *s. Grande médiane du Cervelet,* Valley — *s. Grande du foie,* see Liver, Fissure, glenoid — *s. de Santorini,* Santorini, fissure of.

Scit'ta, see Dysentery.

Scla'rea, Salvia sclarea.

Scle'ra, Sclerotica.

Sclerecta'sia, (*scleros,* and εκτασις, 'dilatation,') Staphyloma of the sclerotic — s. Posterior, Staphyloma, posterior.

Sclere'ma, gen. *Sclere'matis,* (from *scleros,*) Induration of the cellular tissue — s. Atrophicum, see Induration of the cellular tissue — s. Elevatum, see Induration of the cellular tissue.

Sclérème, Induration of the cellular tissue.

Sclere'mia, Induration of the cellular tissue.

Sclere'mus, Induration of the cellular tissue.

Sclerencepha'lia, *Indura'tio cer'ebri,* (*scleros,* and εγκεφαλος, 'the brain,') *Sclero'sis of the Brain,* (F.) *Endurcissement du cerveau, Sclérose de l'Encéphale.* A morbid condition of the brain characterized by induration and atrophy of the cerebral tissue.

Scle'ria, (σκληρια, from *scleros,*) Scleriasis.

Scleri'asis, (σκληριασις, from *scleros,*) *Sclero'ma, Sclero'sis, Scle'ria, Sclerys'mus, Seph'irus.* Any kind of hardness or induration. Sometimes, hardness of the eyelids, *Callos'itas* seu *Scirrhophthal'mia* seu *Scirrhus palpebra'rum, Scirrhoblepharon'cus;* at others, hardness of the genital organs of the female; probably synonymous with scirrhus. Hardness of the bones, *Fragil'itas Os'sium.* See Scleroderma.

Scleri'tis, Sclerotitis.

Sclerocataract'a, see Cataract.

Sclerochoroidi'tis, (*scleros, choroidea,* and *itis.*) Inflammation of the sclerotic and choroid tunics of the eye.

Sclerochoroidi'tis Poste'rior, see Staphyloma posterior.

Scleroder'ma, gen. *Scleroder'matis,* (*scleros,* and δερμα, 'skin,') *Scleri'asis, Hide-bound Disease, Sclero'sis Der'matos, Sclero'sis Co'rii.* Induration of the derma proper or corium. When the subcutaneous tissues are affected, it is called *Sclerosis telæ cellularis et adiposæ.* See Induration of the cellular tissue.

Scleroder'ma Adulto'rum, see Induration of the cellular tissue.

Sclero'des, (σκληρωδης, from *scleros,* and *odes,*) Sclerotic.

Scleroïri'tis. Inflammation of the sclerotic and iris.

Sclero'ma, gen. *Sclero'matis,* (from *scleros,*) Induration of the areolar tissue, Scleriasis.

Sclero'ma Neonato'rum. Inflammatory induration of the new-born.

Sclerome'ninx, gen. *Scleromenin'gis,* (*scleros,* and μηνιγξ, 'membrane,') Dura mater.

Scleronyx'is, Scleroticonyxis.

Sclerophthal'mia, (σκληροφθαλμια,) Hordeolum, Schirrophthalmia.

Scle'ros, (σκληρος,) Hard. In composition, the sclerotica; also, hard.

Sclerosarco'ma, gen. *Sclerosarco'matis,* (*scleros,* and σαρκωμα, 'a fleshy tumor.') A hard, fleshy tumor seated on the gums, and resembling a cock's comb.

Sclérose, Sclerosis — *s. de l'Encéphale,* Sclerosis of the brain — *s. du Foie,* see Hepatitis, chronic — *s. Musculaire progressive,* see Paralysis, pseudohypertrophic — *s. Spinale,* Sclerosis, spinal.

Sclero'sis, (from *scleros,*) (F.) *Sclérose.* See Induration of the areolar tissue, and Scleriasis. With Virchow, thickening with condensation.

Sclero'sis of Bone, *S. Ossium, Conden'sing Osti'tis, Diffuse' Hy'pertrophy of Bone.* A result of ostitis, characterized by the filling of the medullary cavity with a compact osseous structure, and the formation of bone on the surface.

Sclero'sis of the Brain, Sclerencephalia.

Sclero'sis Co'rii, Scleroderma — s. Dermatos, Scleroderma — s. of the Liver, see Hepatitis, chronic — s. Ossium, Sclerosis of bone.

Sclero'sis, Spinal, (F.) *Sclérose Spinale.* Two forms of this affection have been referred to: 1. Sclerosis of the antero-lateral columns of the spinal cord; and 2. Sclerosis of the posterior columns, generally described as locomotor ataxia. The former is essentially a hypertrophied condition of the connective tissue, with atrophy of

the nerve-substance. See Atrophy, progressive muscular.

Sclero'sis of the Stom'ach, *Gas'tric Cirrho'sis, Fi'broid Infiltra'tion of the Stom'ach.* A condition elsewhere described, under the name of *Plas'tic Lini'tis.* (F.) *Sclérose de l'Estomac, Cirrhose gastrique.*

Sclero'sis Te'læ Cellula'ris et Adipo'sæ, see Scleroderma.

Sclerosteno'sis Cuta'nea, (*scleros,* and *στενος,* 'contracted,') Induration of the areolar tissue.

Scleros'toma Duodena'le, *Anchylos'toma duodenale.* A form of entozoon met with in Egypt and northern Italy, giving rise, by its presence in the duodenum and jejunum, to serious anæmia, *Egyptian chlorosis,* with bloody evacuations from the bowels. See Parasites and Worms.

Sclero'sus, (from *scleros,*) Hard.

Sclerot'ic, *Sclerot'ica, Sclero'des, Scle'ra,* (from *scleros,*) *Cor'nea opa'ca, Tu'nica du'ra* seu *albugin'ea* seu *du'rior et crass'ior* seu *ex'tima* seu *al'ba* seu *can'dida* seu *innomina'ta oc'uli, Sclero'tis, Scler'ymeu,* (F.) *Sclérotique.* A hard, resisting, opaque membrane, of a pearly white color and fibrous nature, which covers nearly the posterior four-fifths of the globe of the eye, and has the form of a sphere truncated in front. It is strengthened by the expansion of the muscles of the eye, to which expansion many anatomists have given the name *Tu'nica albugin'ea* seu *tendino'sa.* The subconjunctival sclerotic, (F.) *Blanc de l'œil,* forms the *white of the eye, Albu'men* seu *Album* seu *Albu'go oc'uli, Lon'chades, Log'ades, Leu'cades.* The sclerotic is penetrated posteriorly by a round opening, for the passage of the optic nerve; and, anteriorly, it has a much larger opening, *Sul'cus sclerot'icæ, Fora'men scleroticæ ante'rius,* into which the transparent cornea is received. There are, besides, many small oblong apertures in it for the passage of nerves and vessels proceeding to the interior of the eye. Its inner surface is of a light brown color, owing to a delicate areolar tissue containing brown pigment cells; and hence called *Membra'na* seu *Lam'ina fus'ca.* In the fœtus, the sclerotic may be separated into very distinct laminæ.

Sclerot'ic, Staphylo'ma of, see Staphyloma.

Sclerot'ic Zone, *Arthrit'ic Ring.* Vessels given off from a ring of anastomosis of deep conjunctival vessels around the circumference of the cornea, perforating the sclerotic and anastomosing with those of the iris and choroid. This condition is seen in many cases of iritis.

Sclerot'ica, Sclerotic — s. Ceratoides, Cornea.

Sclerot'ical, *Sclerotica'lis.* Relating or appertaining to the sclerotic.

Scleroticectom'ia, *Sclerectom'ia,* (*sclerotica,* and *εκτομη,* 'excision.') The operation for forming an artificial pupil by excision of a portion of the sclerotica.

Sclerotici'tis, Sclerotitis.

Sclerot'ico-choroidi'tis, Poste'rior, Staphyloma, posterior.

Scleroticonyx'is, *Scleronyx'is, Sclerotonyx'is,* (*sclerotica,* and *νυξις,* 'puncturing.') Perforation of the sclerotica in the operation for cataract by depression.

Scleroticotom'ia, (*sclerotica,* and *τομη,* 'incision.') The operation for cataract by cutting through the sclerotic.

Sclerot'icus, (from *scleros,*) Indurans.

Sclérotique, Sclerotic.

Sclero'tis, (from *scleros,*) Sclerotic.

Scleroti'tis, gen. *Scleroti'tidis, Inflamma'tio Sclerot'icæ, Leuci'tis, Lonchadi'tis, Logadi'tis, Scleri'tis, Sclerociti'tis, Rheumat'ic ophthal'mia, Ophthal'mia arthrit'ica,* (*sclerotis,* and *itis.*) Inflammation of the sclerotic coat of the eye.

Sclero'tium Cla'vus, (from *scleros,*) see Ergot — s. Giganteum, see Lycoperdon tuber.

Scler'otome, (*σκληρος,* 'hard,' and *τομη,* 'division.') A section of the skeleton has been so called by Goodsir.

Sclerotom'ia, Scleroticectomia.

Scle'rous (*sclerus,* 'hard') **Tis'sue,** Tissue, sclerous.

Sclerun'ticus, (*σκληρυντικος,*) Indurans.

Scle'rus, (*σκληρος,*) Induration, Scirrhus.

Scler'ymen, Sclerotic.

Sclerymeni'tis, (*sclerymen,* and *itis.*) Inflammation of the sclerotic coat of the eye.

Scleryn'ticus, (*σκληρυντικος,*) Indurans.

Sclerys'ma, gen. *Sclerys'matis,* (*σκληρυσμα,* from *scleros.*) Induration; also, induration of the liver.

Sclerys'mus, (*σκληρυσμος,*) Scleriasis.

Sclopeta'rius, *Sclopet'icus,* (from *sclopetum,* 'a gun.') Relating to a gun. Hence, *A'qua sclopeta'ria* seu *sclopet'ica,* a water for gunshot wounds. *Vul'nera sclopeta'ria* seu *sclopet'ica,* gunshot wounds, &c.

Sclopetopla'gæ, (*sclopetum,* 'a gun,' and *plaga,* 'a wound,') Wounds, gunshot.

Scobs, gen. *Scob'is, Pris'ma, Xys'ma, Ramentum, Rasu'ra.* A shaving; also, an alkali; and the scoria of any metal.

Scolece'sis, (*σκωληκησις,*) Helminthiasis.

Scoleci'asis, (*σκωληκιωσις,*) Helminthiasis.

Scolecolog''ia, (*σκωληξ,* 'a worm,' and *λογος,* 'a discourse,') Helminthology.

Scole'sis, Scoliosis.

Sco'lex, gen. *Scoli'cis,* (*σκωληξ,* 'a worm,') Ascaris lumbricoides. Scolex was used by Müller, generically, for some imperfectly developed forms of tænia. The head of these being the most characteristic part, it was generally applied to the heads of all forms of cystic and tape worms.

Scolio'ma, gen. *Scolio'matis,* (*σκολιωμα,*) Scoliosis.

Scolio'sis, *Scole'sis, Scolio'ma, Skolio'sis, Rhachioscolio'ma,* (*σκολιωσις,* from *σκολιος,* 'crooked,' and *osis.*) A distortion of the spine to one side from shortening of the muscles or shrinking and atrophy. See Gibbositas and Hump.

Scolopen'dra, (*σκολοπενδρα,*) Asplenium scolopendrium.

Scolopen'dria, Asplenium ceterach, and A. scolopendrium.

Scolopen'drium Lin'gua, Asplenium scolopendrium—s. Officinarum, Asplenium scolopendrium — s. Phyllitis, Asplenium scolopendrium — s. Ruta muraria, Asplenium ruta muraria — s. Vulgare, Asplenium scolopendrium.

Scolopomachæ'rion, (*σκολοπαξ,* 'the woodcock,' and *μαχαιρα,* 'a knife;' so called because it is bent a little at the extremity like a woodcock's bill.) A sort of blunt-pointed bistoury.

Scol'ymus Sati'vus, (*σκολυμος,*) Cynara scolymus.

Scoop, ([Teut.] Schoepe,) *Cochlea're,* (F.) *Curette.* A surgical instrument of the shape of a spoon, which is used for the extraction of certain foreign bodies. The scoop is often employed to extract balls impacted in the soft parts; to remove calculi from the urinary bladder in lithotomy, vegetations or soft foreign bodies from the interior of the uterus, &c. A small scoop is sometimes used to extract foreign bodies from the meatus auditorius externus, nasal fossæ, &c.

Scoop Extrac'tion of Cat'aract. A mode of operation by which the lens is removed by a thin, flat, concave scoop, so constructed as to pass readily behind the posterior surface of the cataract. The operation includes incision, iridectomy, laceration of the capsule, and removal of the lens by the scoop.

Scop, (scalp,) Head, Scalp.

Sco'pa Re'gia, (*scopa,* 'a broom,') Ruscus.

Sco'parin, see Spartum scoparium.

Scopa'rius, (*scopa,* 'a broom,') see Spartium scoparium.

Scope, (*σκοπη,*) *Scop'y, Scop'ia, Scop'ium, Scopos,* (from *σκοπεω,* 'I look around.') A common suffix to words meaning 'view, inspection,' as stethoscope, stethoscopy, &c.

Scopoli'na Atropoi'des, (after J. A. Scopoli, Prof. at Pavia,) Hyoscyamus scopolia.

Scop'tula, Scapula.

Scop'ula, (dim. of *scopa,* 'a broom,') Brush.

Scor, (*σκωρ,* gen. *σκατος,*) Excrement.

Scoracra'sia, Scoracratia.

Scoracrati'a, *Scoracru'sia, Scatacra'sia, Scatacrati'a, Copracrati'a, Copracra'sia, Incontinen'tia Al'vi,* (*scor,* and *ακρατια,* 'want of control.') Want of power to retain the fæces. Involuntary evacuation of the fæces.

Scoracra'sia, Scatacra'sia, and *Copracra'sia,* although used in the same sense as scoracratia, really mean undue admixture of the excrement. See Scatacrasia.

Scorbut, Porphyra nautica, Purpura hæmorrhagica — *s. des Alpes,* Pellagra — *s. de Terre,* Purpura hæmorrhagica.

Scorbu'tic, *Scorbu'ticus,* (F.) *Scorbutique,* (from *scorbutus,* 'scurvy.') That which belongs to scurvy. One affected with scurvy. Applied, at times, indefinitely to a furfuraceous or scurfy — not *scurvy* — eruption.

Scorbu'tus, ([G.] Scharbock,) see Purpura — s. Alpinus, Pellagra — s. Nauticus, Porphyra nautica — s. Oris, Cancer aquaticus.

Scordine'ma, gen. *Scordine'matis,* (*σκορδινημα,*) Carebaria, Pandiculation.

Scordinis'mus, (*σκορδινισμος,*) Carebaria, Pandiculation.

Scor'dium, (*σκορδιον,* perhaps from *scordon,* 'garlic,' from similarity of smell,) Teucrium scordium.

Scor'don, (*σκορδον,*) Allium.

Sco'rith, Sulphur.

Sco'rium, Scrotum.

Scor'odon, (*σκορoδον,*) Allium.

Scorodos'mine, (*scorodon,* and *οσμη,* 'odor,') Oxide, cystic.

Scorpidex'is, (*σκορπιος,* 'scorpion,' and *δηξις,* 'bite:' — more properly, *Scorpiostig'ma;* from *σκορπιος,* and *στιγμα,* 'puncture.') The sting of the scorpion.

Scor'pion, *Scor'pio, Scor'pius,* (*σκορπιον,* and *σκορπιος,* from *σκορπιω,* 'I enrage.') A genus of insects having a sting at the extremity of their tail, with which they make dangerous wounds. An *Oil of Scorpion* was once made from them, which is not now used.

Scorpiostig'ma, gen. *Scorpiostig'matis,* (*scorpius,* and *στιγμη,* 'a puncture,') Scorpiodexis.

Scor'pius, (*σκορπιος,*) Scorpion.

Scor'teum, 'a leather coat,' Scrotum.

Scorzone'ra, *S. hu'milis* seu *lana'ta* seu *nervo'sa, Escorzone'ra,* (from *scurzo,* old Spanish for viper,) *Vipera'ria, Serpenta'ria Hispan'ica, Offic''inal vi'per's grass, Vi'per's grass, Goat's grass. Family,* Cichoraceæ. *Sex. Syst.* Syngenesia Polygamia. The roots have been used as alexipharmics, and in hypochondriacal disorders and obstructions of the viscera. The root of the *Scorzonera Hispan'ica* is esculent, but inefficacious as a drug.

Scotas'ma, gen. *Scotas'matis, Scoto'ma, Scoto'dia, Scoto'sis, Scotos,* (from *σκοτος,* 'darkness,') Obscurity of vision, darkness, *Suffu'sio radians.* See Scotodinia.

Scotch Fid'dle, Psora.

Scoto'dia, (*σκοτοδια,*) Scotasma, Scotodinia.

Scotodin'ia, *Scoto'ma, Di'nus scoto'ma, Scotodi'nē, Tenebrico'sa verti'go, Sco'tos, Scotas'ma, Scoto'sis, Scot'omy,* (*σκοτοδινια,* from *σκοτος,* 'darkness,' and *δινεω,* 'I turn round.') Giddiness, with impaired sight, often succeeded by headache. Fixed blind spots in the field of vision, dependent on complete loss of sensibility of a portion of the retina, are called *Scotomata.* See Vertigo.

Scoto'ma, gen. *Scoto'matis,* (*σκοτωμα,*) Scotasma, Scotodinia.

Sco'tos, (*σκοτος,*) Scotasma, Scotodinia.

Scoto'sis, (*σκοτωσις,*) Scotodinia.

Scott's Ac''id Bath, *Nitromuriat'ic ac''id bath.* A bath of dilute aqua regia, employed by Dr. Scott, of India, as a remedy in hepatic diseases. Three pints by measure of muriatic acid, and two of nitric acid, are mixed to form the aqua regia. In preparing this for use, a pint of it is mixed with an equal quantity of water. The acid bath consists of three ounces of this dilute acid to every gallon of water.

Scour, ([Sax.] ꝛcuꝑ,) Diarrhœa.

Scourg''ing, Mastigosis — s. Mania, see Mastigosis.

Scour'ing, Diarrhœa.

Scrat, ([Sax.] ꝛcꝛıꝛꝛa,) Hermaphrodite; ([G.] kratzen, 'to scratch,') Psora.

Scratch, Psora.

Screa'tus, (*screare, screatum,* 'to hawk,') Excreation.

Scribe Pal'sy, Cramp, writers'.

Scrip'lum, Scruple.

Scrip'tium, Scruple.

Scrip'tulum, Scruple.

Scrip'ulum, Scruple.

Scrip'ulus, Scruple.

Scriv'ener's Cramp, Cramp, writers'—s. Paralysis, Cramp, writers'.

Scrobic'ulus, (dim. of *scrobs,* 'a ditch,') *Scrobic'ulum,* (F.) *Scrobicule, Fossette.* A little ditch or furrow.

Scrobic'ulus Cor'dis, *Anticar'dium, Procar'dium,* (F.) *Fossette du cœur, Avant-cœur, Anticœur.* The pit of the stomach. The depression at the anterior part of the abdomen, below the xiphoid cartilage.

Scrobic'ulus Vari'olæ, Pockmark.

Scrof'fæ, Scrofula.

Scrof'ula, *Scroph'ula, Scroph'ulæ,* (from *scrofa,* 'a sow;' as Chœras is from *χοιρος,* 'a hog,' because swine were presumed to be subject to a similar complaint,) *Scrofulo'sis, Mor'bus scrophulo'sus, Vit''ium scrophulo'sum, Pædatroph'ia glandulo'sa, Stru'ma, Chœ'ras, Coi'rus, Ta'bes glandula'ris, Adeno'sis scrophulo'sa, Scrof'fæ, King's e'vil, The E'vil, Quince, Cruels,* and *Crewels* (Scottice), (F.) *Scrophules, Scrofule, Scrofules, Strumes, Écrouelles, Humeurs froides, Tubercules des glandes lymphatiques, Mal du Roi.* A morbid state of the system usually characterized by indolent, glandular tumors, chiefly in the neck; suppurating slowly and imperfectly, and healing with difficulty; the disease ordinarily occurring in those of a sanguine temperament, with thick upper lip, &c. The tumors, after suppuration, degenerate into ulcers; which, in process of time, cicatrize, leaving scars. The internal organs are apt to be attacked in those disposed to scrofula; hence they are often the subjects of phthisis and mesenteric affections. Scrofula is hereditary; and is frequently excited by insufficient or improper regimen, and by a close, confined air during the first years of existence. The best treatment is: — to strengthen the system by animal diet, pure air, and exercise, cold bathing, or seawater bathing, &c. Scrofula may exist with or without tubercle. See Tubercle.

Scrof'ula Abdomina'lis Inter'na, Physoconia strumosa.

Scrofulaire, Scrofularia nodosa—*s. Aquatique,* Scrophularia aquatica.

Scrofula'ria, Scrophularia.

Scrofule, Scrofula.

Scrofules, Scrofula.

Scrofuleux, Scrofulous.

Scrofulide, Scrophulide. An affection of the skin or mucous membranes, dependent on scrofulosis. See Scrofuloderma.

Scrofulide Érythémateuse, Lupus erythematosus — *s. Maligne Érythémateuse,* Lupus erythematosus — *s. Pustuleuse,* Impetigo rodens.

Scrof'ulism, see Diathesis.

Scrofuloder'ma, (*scrofulo,* and *δερμα,* 'the

skin.') A chronic strumous inflammation of the skin, characterized by indolent red tubercular formations, which tend to unhealthy suppuration, with scabbing and ulceration; healing with distinct scarring.

Scrofuloder'ma Ungua'le. Inflammation of the matrix of the nail in scrofulous subjects.

Scrofulo'sis, *Scrophulo'sis, Cacochym'ia* seu *Cachex'ia* seu *Dyscra'sia scrofulo'sa,* and *Scrofulous cachex'ia,* are used to signify the cachectic state of the system which characterizes scrofula. See Diathesis.

Scrof'ulous, *Scrophulo'sus, Scrophula'rius, Strn'mous, Strumo'sus,* (F.) *Scrofuleux, Strumeux.* Suffering from, or relating to, scrofula,—as *scrofulous cachex'ia.* See Scrofula.

Scrog'legged, Cnemoscoliosis.

Scroob'ygrass, Cochlearia officinalis.

Scroof, Scurf.

Scroph'ula, Scrofula — s. Mesenterica, Tabes mesenterica — s. Moluccana, Framboesia.

Scroph'ulæ, Scrofula — s. Gonorrhoïcæ, Gonorrhœa impura.

Scrophula'ria, (from *scrofula,* against which it has been employed.) S. nodosa.

Scrophula'ria Aquat'ica, *Beton'ica aquat'ica, Fica'ria, Ferra'ria, Castran'gula, Great'er Wa'ter Fig'wort, Wa'ter Bet'ony,* (F.) *Scrofulaire aquatique. Ord.* Scrophulariaceæ. The leaves are celebrated as correctors of the bad flavor of senna. They were at one time regarded as eminently antiscorbutic, stomachic, and carminative.

Scrophula'ria Fœ'tida, Scrophularia nodosa — s. Lanceolata, S. nodosa — s. Marilandica, S. nodosa — s. Minor, Ranunculus ficaria.

Scrophula'ria Nodo'sa, *S. fœ'tida* seu *vulgaris* seu *lanceola'ta* seu *Marilan'dica, Millemor'bia, Scrophula'ria, Fig'wort, Ken'nelwort, Holmes'-weed, Heal'all,* (F.) *Scrofulaire, Herbe aux écrouelles.* The root and leaves of this plant have been celebrated, both as an internal and external remedy, against inflammations, piles, scrofulous tumors, ulcers, &c.

Scrophula'ria Vulga'ris, Scrofularia nodosa.

Scroph'ula'rius, Scrofulous.

Scrophules, Scrofula — *s. Mésentériques,* Tabes mesenterica.

Scrophulide, Scrofulide.

Scrophulo'sis, see Diathesis and Scrofulosis.

Scrophulo'sus, Scrofulous.

Scro'tal, *Scrota'lis,* (from *scrotum.*) Relating to the scrotum; as *Her'nia scrota'lis,* scrotal hernia.

Scro'tal Fis'tula. A urethral fistula having its external opening in the scrotum.

Scro'tal Nerve, see Genitocrural nerve.

Scrotoce'lē, *Oscheoce'lē, Oschoce'lē,* (*scrotum,* and κηλη, 'a tumor,') *Her'nia scrota'lis, Scro'tal her'nia.* Inguinal hernia, descending into the scrotum, *Scro'tocele.*

Scro'tum, (*scortenm,* 'a leather coat,') *Sco'rium, Os'chē, Os'cheus, Os'chus, Os'cus, Os'cheon, Och'eus, Balau'tion, Pe'rin, Scor'tum, Co'leus, Cu'leus, Marsu'pium, Bur'sula, Bur'sa* seu *Bur'sa tes'tium* seu *viri'lis, Or'chas, Follic'ulus genita'lis, Her'nia, the Purse, the Cod, Cods,* (F.) *Les bourses.* The integuments which cover the testes. These are nothing more than a prolongation of the skin of the inner part of the thighs, perinæum, and penis. The skin is remarkable for its brown color, for the numerous rugæ, especially when the scrotum is contracted; for the great number of sebaceous follicles it contains; and for the long and few hairs which issue from it in the adult. The scrotum is divided into two equal parts by a raphe, which extends from the anus to the root of the penis. Its organization is similar to that of the skin of other parts of the body, except that the chorion is thinner.

Scro'tum Cor'dis, Pericardium — s. Epithelial Cancer of, Cancer, chimney sweepers' — s. Pendulum, Rachesis.

Scru'bie, (*scurvy,*) Purpura nautica.

Scru'biegrass, Cochlearia officinalis.

Scruff, Nucha.

Scru'ple, *Diob'olon, Gramma'rium, Scru'pulus, Scru'pulum, Scrip'tulus, Scrip'tulum, Scrip'tium, Scrip'ulum, Scrip'lum, Scrip'ulus.* A weight of twenty grains, troy; twenty-four grains, Poids de marc.

Scud'amore's Mix'ture, see Mixture, Scudamore's.

Scull, (Dan. *skal,* or from *scutella,* 'a cup' [?],) Cranium — s. Cap, Calvaria.

Scurf, ([Sax.] ꝛcuꝛꝼ, [Prov.] *Scroof,*) *Fur'fura.* Small exfoliations of the cuticle are so called.

Scurf'skin, Scarfskin.

Scur'fy, Furfuraceous.

Scur'vy, (from *scurf,* or from [G.] Scharbock,) see Purpura — s. of the Alps, Pellagra — s. Button, see Button scurvy — s. Land, Purpura hæmorrhagica—s. Petechial, Purpura simplex—s. Sea, Purpura nautica.

Scur'vygrass, Sisyrinchium Bermudianum—s. Grass, common, Cochlearia officinalis — s. Grass, lemon, Cochlearia officinalis — s. Grass, wild, Cochlearia coronopus.

Scutel'la, (dim. of *scutra,* 'a dish,') Cup.

Scutella'ria Carolinia'na, (from *scutella,* 'a cup,' in allusion to the form of the calyx,) S. integrifolia.

Scutella'ria Galericula'ta, *Cas'sida galericula'ta, Tertiana'ria, Skull'cap,* (F.) *Casside bleue, Toque. Ord.* Labiatæ. *Sex. Syst.* Didynamia Angiospermia. This plant has a bitter taste and a garlicky smell. It has been esteemed especially serviceable in tertian ague.

Scutella'ria Hyssopifo'lia, S. integrifolia.

Scutella'ria Integrifo'lia, *S. hyssopifo'lia* seu *Carolinia'na,*—another indigenous variety,—is an intense bitter.

Scutella'ria Lateriflo'ra, *Skull'cap, Maddog skull'cap, Mad'weed, Hood'wort, Blue Pimpernel.* An indigenous plant, *Scutellaria,* (Ph. U. S.,) which grows in all parts of the United States in moist places. It was at one time esteemed a preventive of hydrophobia, but is probably possessed of little virtue of any kind. By some, however, it is regarded as a good nervine.

Scutic'ula Digito'rum Ma'nûs, Phalanges of the fingers.

Scut'ter, Diarrhœa.

Scu'tula, (pl. of *scutulum,* 'a little shield.') The yellow crusts which are formed by the drying up of vesicles, as in favus.

Scu'tulæ (pl. of *scutula,* 'a cylinder') **Digito'rum Ma'nûs,** Phalanges of the fingers.

Scutum, 'a shield,' Thyroid cartilage — s. Cordis, Scapula, Sternum — s. Genu, Patella — s. Pectoris, Sternum, Thorax.

Scu'tum Stomach'icum. A large plaster, applied to the breast or stomach.

Scu'tum Thora'cis, Scapula.

Scyb'ala, (pl. of σκυβαλον, 'dung,') *Enterol'ithus Scyb'alum, Excrementa Al'vi siccio'ra, Fæ'ces indura'tæ,* (F.) *Scybales.* Hard fecal matters discharged in round lumps.

Scyl'la, Scilla.

Scyphoph'orus Pyxida'tus, (σκυφος, 'a cup,' and φερω, 'I bear,') Lichen pyxidatus.

Scy'phus Audito'rius, (σκυφος, 'a cup,') Infundibulum of the cochlea — s. Cerebri, Infundibulum of the brain — s. Vieussenii, Infundibulum of the cochlea.

Scy'ros, (σκυρος,) Callosity.

Scytal'ides (σκυταλις, gen. σκυταλιδις, 'a staff') **Digito'rum Ma'nûs,** Phalanges of the fingers.

Scyth'ica (Ra'dix), (from *Scythia,*) Glycyrrhiza.

Scythropas'mus, (from σκυθρος, 'gloomy;' σκυ-

θωπαζειν, 'to look gloomy,') *Vultus tet'ricus et mœs'tus.* A gloomy, depressed countenance, of bad augury in serious diseases.

Scyti'tis, gen. *Scyti'tidis,* (σκυτος, 'a skin,' and *itis,*) Cytitis.

Scytodep'sium, (σκυτοδεψεω, 'I curry leather,') Tannin.

Sea Air. The air in the neighborhood of the sea contains saline particles commingled with it, which render it a valuable change for scrofulous and debilitated individuals. The sea and seacoast are usually, also, more equable in their temperature than places inland.

Sea Bath'ing, see Baths—s. Girdles, Laminaria digitata — s. Tangle, Laminaria digitata — s. Ware, see Pila marina — s. Water, see Water, sea — s. Wrack, Pila marina.

Sea'sickness, see Nausea marina.

Seal, Gold'en, ([Sax.] ȝigel, [L.] *sigillum,*) Hydrastis Canadensis — s. Medicine, Cachet — s. Solomon's, Convallaria polygonatum — s. Solomon's, great, Convallaria canaliculata — s. Solomon's, smaller, Convallaria pubescens.

Seam (Sax.), Cicatrix.

Search'er, Body searcher.

Search'ing, ([F.] *chercher,* 'to seek.') Probing. Also, the operation of ascertaining, by the introduction of a metallic instrument, whether there is a stone in the bladder; — *Sound'ing.*

Sear'cloth, ([Sax.] ȝar, 'a sore.') A cloth to cover a sore; a plaster.

Seas'on, *Tempes'tas,* (F.) *Saison,* (from *statio,* 'station.' [?]) One of the four great divisions of the year, reckoned by the return of the sun in its annual course, — Spring, Summer, Autumn, and Winter. It is to the seasons that we are indebted for the organic changes in the vegetable kingdom; and their mutation exerts a powerful influence on man.

Seas'oning, Acclimation — s. Fever, Fever, stranger's.

Seat, (from [L.] *sedeo,* 'I sit,') Anus, Nates—s. Bone, Ischion.

Sébacé, Sebaceous.

Seba'ceo-follic'ular, see Sebaceous.

Seba'ceous, *Seba'ceus,* (F.) *Sébacé,* (from *sebum.*) That which has the nature of suet, — as *sebaceous* or *sebaceo-follicular tumors.*

Seba'ceous Flux, Stearrhœa.

Seba'ceous, Sebip'arous or Sebif'erous Glands, *Sebaceous Foll'icles* or *Crypts, Pimela'denes, Follic'uli seba'cei, Cryp'tæ seba'ceæ, Oil* or *Mil'iary glands,* are small hollow organs, of a rounded or pyriform shape, seated in the substance of the skin, and opening on its surface by a small, excretory duct; furnishing a yellow, unctuous humor, *Smeg'ma cuta'neum, Se'bum cuta'neum,* having some analogy with suet, which is destined to lubricate the surface of the body. Follicles of a similar nature exist around the corona glandis of the male, and under the skin of the labia majora and nymphæ of the female. They secrete a sebaceous matter, which emits a peculiar odor; and hence, after the name of one who described them, have been called *Glan'dulæ odorif'eræ Tyso'ni, G. Tyso'ni, Ty'son's glands,* and, also, *Glan'dulæ odorif'eræ* seu *seba'ceæ glan'dis, G. coro'næ pe'nis, Follic'uli seba'cei coro'næ glan'dis, Glan'dulæ odorif'eræ præpu'tii, Cryp'tæ præputia'les.*

Sebastoma'nia, (σεβαστος, 'worshipped,' and *mania.*) Religious insanity, Demonomania.

Sebeste'na, *Cor'dia myx'a* seu *sebeste'na* seu *Africa'na* seu *domes'tica* seu *obli'qua, Sebeste'na officina'lis, Seb'esten, Sebsten, Myx'a, Cor'nus sanguin'ea, Pru'nus sebeste'na. Smoothleaved Cordia, Assyr'ian plum,* (F.) *Sebestier myxa. Ord.* Cordiaceæ. The dark, black fruit of the *Sebeste'na* possesses glutinous and aperient qualities, and is exhibited, in decoction, in various diseases of the chest.

Sebestier Myxa, Sebestena.

Sebif'erous, (*sebum,* 'suet, fat,' and *ferre,* 'to carry,') see Sebaceous.

Sebip'arous, (*sebum,* 'suet, fat,' and *pario,* 'I bring forth,') see Sebaceous.

Seborrhag'ia, (*sebum,* 'suet, fat,' and ῥαγη, 'a breaking forth,') Stearrhœa.

Seborrhœ'a, (*sebum,* 'suet, fat,' and ῥεω, 'I flow,') Stearrhœa — s. Amianthacea, see Stearrhœa — s. Capillitii, Seborrhœa capitis.

Seborrhœ'a Capitis. Seborrhœa of the scalp, of very young children especially, *Seborrhœa capillitii.*

Seborrhœ'a Congesti'va, Lupus erythematodes — s. Furfuracea, Pityriasis capitis — s. Sicca, see Stearrhœa.

Seb'sten, Sebestina.

Se'bum, Pinguedo, Sevum — s. Cutaneum, see Sebaceous glands — s. Palpebrale, Chassie — s. Præputiale, Smegma præputii.

Seca'lē, (*secare,* 'to cut' [?],) *S. cerea'lē* seu *barba'tum.* The *Rye plant,* (F.) *Seigle. Ord.* Gramineæ. Rye is chiefly used as an article of diet, particularly in Europe and America, and a spirit is also extracted from it. The grain is disposed to accescency; and hence its internal use at first generally produces a laxative effect.

Seca'lē Barba'tum, Secale—s. Cercale, Secale —s. Cornutum, Ergot — s. Luxurians, Ergot — s. Maternum turgidum seu temulentum, Ergot.

Seca'lia, *Sec'alin.* A volatile alkaloid, discovered in ergot of rye. See Propylamia.

Seca'lis Ma'ter, Ergot.

Sécateur des Amygdales, (from *secare,* 'to cut,') Amygdalatome — *s. par Écrasement,* Écraseur.

Secern'ent, (*secernere,* 'to separate,') Secreting.

Secern'ing, Secreting — s. Substance of the kidney, see Kidney.

Seces'sio Fæ'cum, (*secedere, secessum,* 'to secede,') Defecation.

Seces'sus, gen. *Seces'sûs,* Vulva — s. Niger, Melæna.

Sèche, Sepia.

Secluso'rium, (*secludere, seclusum,* 'to shut up,') Sac.

Sec'ondary, (*secundus,* 'the second,') (F.) *Secondaire.* Something that acts subordinately to another; as the *secondary symptoms* of a disease; that is, those which supervene on the *primary.* A *secondary amputation* is one performed after the constitutional effects of an injury have mainly passed away. See Fever, secondary, and Hæmorrhagia, for Secondary hemorrhage.

Secondines, Secundines.

Secre'ta, (pl. of *secretum.*) (Same etymon as Secretion.) Things or matters secreted or separated from the blood.

Sécréteur, Secreting.

Secre'ting, *Secreto'rius, Secern'ing, Secern'ent, Secre'tory* or *Se'cretory, Excern'ent,* (F.) *Sécréteur, Sécrétoire.* That which secretes; as a secreting organ.

Secre'tio, Secretion—s. Lactis, Galactosis—s. Lotii, Uropoesis — s. Urinæ, Uropoesis — s. Vicaria, see Vicarious.

Secre'tion, *Secre'tio, Apoc'risis,* (*secernere, secretum,* 'to separate.') An organic function, which is chiefly executed in the glands, and consists in an elaboration or separation of the materials of the blood, at the very extremities of the arterial system, or rather of the vascular secretory apparatus, and which differs in each organ according to its particular structure; hence the formation of different fluids — bile, saliva, urine, milk, &c. The term is also applied to the thing se-

creted — *Secre'tum.* The secretions are of three kinds—*exhalant, follicular,* and *glandular.* Simple secretions are those which exist ready formed in the blood, and pass out of the vessels by an act of exosmose, while the more complicated are formed from the liquor sanguinis by cell agency. The latter alone are by some called *secretions.*

Sécrétoire, Secreting.

Secre'to-mo'tory, *Secre'tomoto'rius.* An epithet applied to nerves which influence secretion in the manner of excito-motory nerves.

Secreto'rius, Secreting.

Secre'tory, Secreting.

Secre'tum, see Secretion.

Sect, Method'ical, (*secta,* from *secare, sectum,* 'to cut,') Methodists.

Sec'tio, gen. *Secti'onis, Sec'tion.* The act of cutting. A division.

Sec'tio Abdomina'lis, see Gastrotomy. The term *Gastros'tomy* (*gastro,* and στομα, 'mouth') has been applied to an operation, of doubtful efficacy, to establish an artificial mouth connecting directly with the stomach, by an incision into that organ, usually made in the line of the left linea semilunaris.

Sec'tio Al'ta, see Lithotomy — s. Anatomica, Dissection — s. Cadaveris, Autopsia cadaverica — s. Cadaveris legalis, Autopsia cadaverica—s. Cæsarea, Cæsarean section — s. Franconiana, see Lithotomy — s. Hypogastrica, see Lithotomy—s. Lateralis, see Lithotomy — s. Legalis, Autopsia cadaverica legalis—s. Mariana, see Lithotomy — s. Nympharum, Nymphotomy — s. Perinæalis, Perineal section — s. Rectovesicalis, see Lithotomy — s. Renalis, Nephrotomy — s. Tendinum, Tenotomy — s. Vaginovesicalis, Colpocystotomia — s. Vesicalis, Lithotomy.

Sec'tion, Sectio—s. Abdominal, Gastrotomy — s. Sigaultian, Symphyseotomy.

Secun'dæ, (*secundus,* 'the second,') Secundines.

Secundi'næ, Secundines.

Sec'undines, *Hys'tera, Deuter'ion, Me'træ, Secun'dæ, Secundi'næ, Af'terbirth, Af'terburden,* (F.) *Arrière-faix, Secondines, Délivre,* (from *secundus,* 'second.') All that remains in the uterus after the birth of the child — viz., the placenta, a portion of the umbilical cord, and the membranes of the ovum. These are commonly not expelled till some time after the birth of the fœtus; hence their name. See Délivrance.

Secun'dus Proprio'rum Auric'ulæ, Retrahens auris.

Se'cus, gen. *Se'cûs,* Sex.

Sedan'tia, Sedatives.

Seda'tion, *Seda'tio,* (*sedare, sedatum,* 'to settle or assuage,') *Pau'sis, Catapau'sis.* The effect induced by sedatives.

Sed'atives, *Sedati'va, Pauon'ta, Sedan'tia, Adec'ta, Catastal'tica, Deprimen'tia, Depress'ants,* (F.) *Sédatifs, Calmants, Tempérants.* Medicines which directly depress the vital forces, and which are consequently employed whenever it is necessary to diminish preternaturally increased action. The chief reputed sedatives are Acidum hydrocyanicum, Acidum hydrosulphuricum, Tabacum, Bloodletting, and certain gases by inhalation, as azote, carbonic acid [?], carburetted and sulphuretted hydrogen.

Se'dem Attol'lens, 'raising the seat,' Levator ani.

Se'des, (*sedeo,* 'I sit,') Anus, Excrement — s. Cruentæ, Dysentery, Hæmatochezia — s. Lactescentes, Cœliac flux — s. Procidua, Proctocele.

Sed'hee, Bangue.

Sed'iment, *Sedimen'tum, Lem'ma, Residen'tia,* (from *sedeo,* 'I sink down,') (F.) *Dépôt.* A deposit formed by the precipitation of some one or more of the substances held in solution or suspension by a liquid. That which is formed in urine, at the time of cooling, has been called *Hypos'tasis, Hyposte'ma, Residen'tia, Subsiden'tia,* (F.) *Dépôt de l'urine.* This sediment or deposit varies in different states of the system. In calculous affections it is one of the most important objects of attention.

Sedimen'tum, Sediment — s. Urinæ latericium, see Lateritious — s. Urinæ pityroïdes, see Furfuraceous.

Sedil'ia, (*sedere,* 'to sit,') Nates.

Sed'litz, Min'eral Wa'ters of, *Seidlitz water.* Springs in Bohemia, near Prague, which are simple salines. They contain sulphate and carbonate of magnesia, chloride of magnesium, sulphates of potassa, soda, and lime, chloride of magnesium, carbonic acid and carbonate of lime. They are employed as purgatives in a multitude of diseases.

Artific'ial Sed'litz Pow'ders, in no respect, however, resembling the natural ingredients, are formed of *Sodii et Potassii tartras,* ℥ij., *Sodii bicarbon.,* ℈ij., in one paper; *Acid. tartaric.,* gr. xxxv., in another. To be dissolved separately in water, and mixed. They are called, also, *Rochelle powders.* See Powders, soda. — The French Codex (1866) has an *Eau saline purgative, E. de Sedlitz, Aqua Sedlitzensis,* composed of sulphate of magnesia and carbonic acid water. See Pulveres effervescentes aperientes.

Sédon Brûlant, Sedum — *s. Reprise,* Sedum telephium.

Se'dum, *S. a'crē* seu *glacia'lē* seu *mi'nus* seu *vermicula're,* (*sedeo,* 'I sit,' owing to its attachment to rocks and walls,) *Illec''ebra, Hellec''ebra, Illec''ebrum, Vermicula're, Vermicula'ris, Pi'per mura'lē, Sempervi'vum a'crē, Aei'chryson, Æo'uion, Wall pepper, Jack of the But'tery, Prick'et, Bird's bread, Stonecrop, Bi'ting Stonecrop, Small House'leek,* (F.) *Joubarbe âcre, Orpin brûlant, Vermiculaire brûlante, Sédon brûlant. Ord.* Crassulaceæ. *Sex. Syst.* Decandria Pentagynia. In its recent state it is very acrid, and proves both emetic and cathartic. Externally, in the form of cataplasm, it produces vesications and erosions. It has been recommended in cancerous and malignant ulcers.

Se'dum Rhodi'ola and *S. Al'bum,* (F.) *Triquemadame,* have similar properties.

Se'dum, Saxifraga granulata — s. Album, see Sedum — s. Glaciale, Sedum — s. Majus, Sempervivum tectorum — s. Minus, Sedum — s. Rhodiola, see Sedum.

Se'dum Tele'phium, *S. telephoï'des, Fa'ba cras'sa, Cras'sula, C. Ma'jor, Illec''ebra ma'jor, Tele'phium, Faba'ria cras'sula, Fa'ba cras'sa, Anacamp'seros, A. al'bicans* seu *triphyl'la* seu *vulga'ris, Orpine,* (F.) *Sédon reprise, Grand orpin, Fève épaisse, Joubarbe des vignes, Herbe à la coupure, H. aux charpentiers.* Formerly used as a cataplasm in cuts, hemorrhoids, corns, whitlows, &c.

Se'dum Telephoï'des, S. telephium — s. Vermiculare, Sedum.

Seed, ([Sax.] ȝræd,) Semen, Sperm.

Segmen'ta Cartilagin'ea, (pl. of *segmentum,* 'a segment,') see Trachea.

Segmenta'tion, *Segmenta'tio,* (*segmentum,* 'a segment,' itself from *seco,* 'I cut.') The act of being divided into segments or portions, (F.) *Segmentation, Fractionnement, Sillonnement.* A term applied to the division of the vitellus or yolk into 'segments;' each containing a transparent vesicle, which may be a descendant of the primordial or germ cell.

Seg'ments, Ver'tebral, Somatomes.

Segnit''ia, *Segnit''ies,* (from *segnis,* 'sluggish.') Sluggishness or torpor in the exercise of a function: — as Segnities Al'vi, Torpor of the bowels; Segnities Vir'ium, Languor.

Segnit''ies, Segnitia.

Segray, Min'eral Wa'ters of. Near Pithiviers, in Gâtinais, in the French department of

Loiret, there is a chalybeate spring, which has some reputation.

Se'gu, Sago.

Seid'litz, Sedlitz.

Seid'schütz, Seyd'schütz or **Said'schütz, Min'eral Wa'ters of.** Bitter springs, in the neighborhood of those of Püllna and Sedlitz, in Bohemia, which contain chiefly sulphate, nitrate, muriate, and carbonate of magnesia, sulphates of potassa, soda, and lime; carbonate of lime, iron, and manganese. The water is an excellent cathartic, and is well known in Europe.

Seigle, Secale—*s. Cornu,* Ergot—*s. Corrumpu,* Ergot — *s. à Éperon,* Ergot — *s. Ergotée,* Ergot — *s. Ergotisé,* Ergot — *s. Faux,* Ergot.

Seignette's Salt, Soda, tartrate of.

Sein, (from *sinus,*) Uterus, Mamma.

Seiri'asis, (σειριασις,) Coup de soleil.

Seiz'ure, Attack, see Raptus.

Seiz'ures, Hid'den, see Hidden seizures.

Sekiskayavodka, see Spirit.

Sel, (from *sal,*) Salt — *s. Admirable de Lémery,* Magnesiæ sulphas — *s. Admirable perlé,* Soda, phosphate of—*s. Ammoniac,* Ammoniæ murias—*s. Arméniac,* Ammoniæ murias — *s. Arsénical de Macquer,* Arseniate of protoxide of potassium—*s. de Boutigny,* Mercury, iodide of chloride of—*s. de Cuisine,* Soda, muriate of — *s. de Dérosne,* Narcotine — *s. à Détacher,* Potassæ oxalas — *s. d Égra,* Magnesiæ sulphas — *s. d'Étain,* Tin, muriate of — *s. de Glauber,* Sodæ sulphas — *s. de Lait,* Sugar of milk — *s. Marin,* Soda, muriate of — *s. d'Opium,* Narcotine — *s. d'Oseille,* Potassæ oxalas — *s. de Prunelle,* Potassæ nitras fusus sulphatis paucillo mixtus — *s. de Saturne,* Plumbi superacetas — *s. de Seignette,* Soda, tartrate of — *s. de Soude,* Soda, subcarbonate of—*s. de Verre,* see Vitrum — *s. Volatil d'Angleterre,* Ammoniæ carbonas—*s. Volatil de corne de cerf,* see Ammoniæ carbonas — *s. Volatil de succin,* Succinic acid.

Sela'go, gen. *Sela'ginis,* Camphorosma Monspeliaca, Lycopodium selago.

Sele'nē, (σεληνη,) Moon, see Nail.

Seleni'aci, (σεληνιακοι, from *selene,*) see Lunatic.

Seleni'asis, (from *selene,*) Somnambulism.

Selenias'mus, Somnambulism.

Selenoble'tus, (σεληνοβλητος, from *selene,* and βαλλω, 'I strike,') Lunatic.

Selenoga'mia, (*selene,* and γαμος, 'marriage,') Somnambulism.

Selenople'gē, (*selene,* and πληγη, 'a stroke,') see Coup de soleil.

Selenoplex'ia, see Coup de soleil.

Self-abuse', Masturbation.

Self-heal, Prunella.

Self-lim'ited. An epithet applied to diseases which appear to run a definite course, but little modified by treatment,— small-pox, for example.

Self-pollu'tion, Masturbation.

Seli'bra, (for *Semili'bra,*) *Sembel'la,* 'half a pound.' Six ounces, troy; eight, avoirdupois.

Selini'tes, (σελινιτης.) Wine impregnated with the seeds of the σελινον or parsley.

Seli'num, (σελινον,) Apium petroselinum — s. Angelica, Angelica sylvestris — s. Galbanum, Bubon galbanum — s. Imperatoria, Imperatoria—s. Lactescens, Peucedanum palustre—s. Marsh, Peucedanum palustre — s. Opoponax, Pastinaca opoponax—s. Oreosclinum, Athamanta aureoselinum —s. Ostruthium, Imperatoria—s. Palustre, Peucedanum palustre—s. Pastinaca, Pastinaca sativa—s. Peucedanum, Peucedanum — s. Pubescens, Angelica sylvestris — s. Sylvestre, Angelica sylvestris, Peucedanum palustre — s. Thysselinum, Peucedanum palustre.

Sel'la, 'a seat,' S. Turcica — s. Equina, S. Turcica — s. Familiarica, Lasanum — s. Obstetricia, Diphrus — s. Sphenoidalis, S. Turcica.

Sel'la Tur'cica, *Ephip'pium, Fos'sa Pituita'ria, Sel'la, S. equi'na* seu *sphenoida'lis, Pitu'itary fossa, Turk'ish Sad'dle,* (F.) *Selle Turcique* ou *du Turc.* A depression at the upper surface of the sphenoid bone, which is bounded, anteriorly and posteriorly, by the clinoid processes, and lodges the pituitary gland. It is so called from its resemblance to a *Turkish saddle.* The broad rough plate, behind, and somewhat overhanging the sella Turcica, is the *Dor'sum Ephip'pii.*

Selle Turcique, Sella Turcica — *s. du Turc,* Sella Turcica.

Sels Neutres, Neutral salts.

Selters, Seltz or **Seltz'er, Min'eral Wa'ters of.** Cold, acidulous springs, the source of which is at Seltz, nine leagues from Strasburg, and in the department of the Bas-Rhin. They chiefly contain carbonates of soda, chloride of sodium, sulphates of soda, lime, magnesia, and iron, and much carbonic acid. They are refrigerant, tonic, diuretic, and aperient, but are not much frequented.

Artific'ial Seltz'er Wa'ter may be made from *muriatic acid,* gr. xxxv., *water,* Oj., *white marble,* gr. iij. Keep in a stoppered bottle till dissolved. Add *carbonate of magnesia,* gr. v., and, after some time, *subcarbonate of soda,* gr. xxxij.

The French Codex (1866) has a *Poudre de Seltz, Pondre gazogène neutre,* made of *tartaric acid* and *bicarbonate of soda,* equal parts. This is much used on the continent of Europe, more especially mixed with claret. In the United States the simple carbonated water, *A'qua ac''idi carbon'ici,* is used for the same purpose. See Acidulous water, simple.

The French Codex (1866) has an *Eau acidule saline, Aqua acidulo-salsa,* as a substitute for Seltzer and similar waters.

Tarrant's Effervescing Seltzer Aperient consists, essentially, of the articles that enter into the Artificial Sedlitz Powders, with a smaller quantity of the Rochelle salt, all highly dried, well mixed, and preserved in well-stopped bottles.

Sembel'la, Selibra.

Semecar'pus Anacar'dium, (σημειον, 'a mark,' and καρπος, 'fruit,') Avicennia tomentosa.

Semeiog'raphy, (σημειογραφια,) *Semeiogra'phia, Semiography, Semiogra'phia, Symptomatog'raphy,* (σημειον, 'a symptom,' and γραφη, 'a description.') A description of symptoms or signs of disease.

Semeiol'ogy, *Semeiot'icē, Semiol'ogy, Semiot'icē, Phænomenolog''ia,* (σημειον, 'a symptom,' and λογος, 'a discourse,') (F.) *Séméiotique.* The branch of pathology whose object is the doctrine of the symptoms or signs of disease.

Semei'on, (σημειον,) Sign, Symptom — s. Boethematicum, Indication.

Semeio'sis, (σημειωσις,) Semeiology.

Semeiot'icē, (σημειωτικη,) Semeiology.

Semeiot'icus, (σημειωτικος,) Symptomatic.

Séméiotique, Semeiology.

Se'men, gen. *Sem'inis,* (*sero,* 'I sow.') That which is sown. *Seed* of plants and animals.

Se'men, Sperm — s. Badian, Illicium anisatum — s. Cinæ, see Artemisia santonica — s. Contra, see Artemisia santonica — *s. Contra d'Alep,* Artemisia santonica — s. Contra vermes, Artemisia santonica—s. Masculinum seu virile seu genitale, Sperm — s. Muliebre, Sperm (of the female) — s. Sanctum, see Artemisia santonica — s. Santonici, see Artemisia santonica — s. Zedoariæ, see Artemisia santonica.

Semence, (from *semen,*) Seed, Sperm — *s. de Citronille,* see Cucurbita pepo.

Sem'i, (from ἡμισυ, 'half.') *Semi* or *demi,* in composition, universally signifies 'half;' both in French and English.

Semialbinis'mus, (*semi,* and *albus,* 'white.') A diminution in the color of the skin, affecting negroes only.

Semian'imis, *Semimor'tuus, Sem'inex, Semivi'vus,* (*semi,* and *animus,* 'life.') Half-living. Half-dead.

Sem'ibulb of the Fe'male, Bulbus vestibuli.

Semibul'bus Cor'poris Spongio'si, Bulbus vestibuli.

Semicanalic'ulus, (*semi,* and *canaliculus,* 'a small channel,') Sulcus.

Semicana'lis, (*semi,* and *canalis,* 'a channel,') Sulcus.

Semiceph'alus, Hemicephalus.

Semicir'cular, *Semicircula'ris,* (*semi,* and *circulus,* 'a circle,') (F.) *Demicirculaire.* That which represents the half of a circle.

Semicir'cular Canals', *Cana'les* seu *Duc'tus semicircula'res* seu *tubæfor'mes* seu *circula'res, Semicir'culi os'sei, Fu'nes* seu *Canalic'uli semiannula'res labyrin'thi,* (F.) *Canaux demicirculaires,* are seated in the pars petrosa of the temporal bone, and open into the vestibule, behind which they are situate. They are three in number, of which one is *superior* or *vertical,* — *cana'lis semicircula'ris vertica'lis supe'rior;* another *posterior* or *oblique,*— *cana'lis semicircula'ris vertica'lis poste'rior* seu *inter'nus* seu *infe'rior;* and the third *exterior* or *horizontal,* — *canalis semicircula'ris horizonta'lis* seu *exter'nus* seu *exte'rior* seu *me'dius* seu *min'imus* seu *brevis'simus.* Their parietes are formed of a bony, compact, hard plate. Their uses in audition are not known: at their termination they have the elliptical arrangements called *ampul'læ;* and by both extremities they open into the vestibule, in the sac at its superior part — the *Sac'culus ellip'ticus* seu *oblon'gus* seu *hemiellip'ticus* seu *semiova'lis* seu *commu'nis, Al'veus* seu *Utric'ulus* seu *Si'nus commu'nis* seu *media'nus, Sinus* seu *Alveus utriculo'sus, Sac'culus vestib'uli, Me'dian si'nus, U'tricle.* In front of the Sacculus ellipticus, nearer the cochlea, and opposite the foramen ovale, is the *Sac'culus sphæ'ricus* seu *rotun'dus* seu *pro'prius.*

The *Membran'ous semicircular canals, Cana'les semicircula'res membrana'cei, Tu'buli* seu *duc'tus semicircula'res,* follow the same course as the *osseous,* described above.

Semicir'culi Os'sei, Semicircular canals.

Semicir'culus Exsculp'tus, 'semicircle cut out,' Hiatus diaphragmatis aorticus.

Semicon'gius. Half a gallon, or four pints.

Semicu'bium, *Semicu'bium, Inses'sio, Inses'sus, Encathis'ma, Excathis'ma,* (F.) *Demibain,* (*semi,* and *cubare,* 'to lie down.') A half-bath, or such as receives only the hips or extremities.

Semicu'pium, Bath, half, Semicubium.

Semifibulæ'us, Peronæus brevis.

Semiho'mo, (*semi,* 'half,' and *homo,* 'man,') Atropa mandragora.

Semiinteros'seus In'dicis, Abductor indicis — s. Pollicis, Opponens pollicis.

Semili'bra, Selibra.

Semilla del Guacharo. Various kinds of hard and dry fruits, found in the stomach of the young Guacharo, a sort of nocturnal bird. The fruits are a celebrated South American remedy in ague.

Semilu'nar, *Semilunna'ris,* (F.) *Demilunaire* ou *Semilunaire,* (*semi,* and *luna,* 'the moon.') Having the shape of a halfmoon.

Semilu'nar Bone, Lunare os.

Semilu'nar Car'tilages, *Semilu'nar fi'brocar'tilages, Sig'moid car'tilages, Cartilag''ines sigmoïdææ* seu *semiluna'res,* are two fibrocartilages, which exist between the condyles of the os femoris and the articular surfaces of the tibia. The innermost, which is longer from before to behind than transversely, is nearly semicircular. The outermost forms almost an entire circle; an arrangement, in both cases, corresponding to the different surfaces of the tibia. They are thicker at their outer circumference, which is convex, than at the inner, which is concave and very thin. Both are inserted, before and behind, into the spine of the tibia by means of fibrous fasciæ.

Semilu'nar Fold of Doug'las. A lunated edge marking a deficiency in the posterior wall of the sheath of the rectus abdominis muscle.

Semilu'nar Gan'glion, *Gan'glion abdomina'lē* seu *splanch'nicum* seu *transver'sum* seu *sola'rē, G. surrénal* (Ch.), belongs to the great sympathetic. These ganglia present considerable variety, and are deeply situate in the abdomen, above and behind the suprarenal capsules. They correspond, posteriorly, to the pillars of the diaphragm and the aorta. They have the shape of a crescent reversed, often surrounded by other ganglia of a smaller size. From their periphery numerous filaments proceed, which go to the formation of the solar plexus.

Semilu'nar Notch of the Ster'num, Fourchette — s. Valves, Sigmoid valves.

Semiluna'rē Os, Lunare os.

Semilu'nula (dim. of *luna,* 'moon') **Un'guium,** (*semi,* and *lunula,*) see Nail.

Sem'imas, gen. *Semima'ris,* (*semi,* and *mas,* 'a male,') Eunuch.

Semimascula'tus, Eunuch.

Semimas'culus, (*semi,* and *masculus,* 'male,') Eunuch.

Semimembra'neous, Semimembranosus.

Semimembrano'sus, (*semi,* and *membrana,* 'membrane,') *Semimembra'neus,* (F.) *Ischio-popliti-fémoral, Ischio-popliti-tibial,* (Ch.) *Demimembraneux.* A muscle situate at the posterior part of the thigh. It is flat, thin, narrow, and aponeurotic in its upper third; broader and fleshy in the middle, and tendinous below. It is attached above to the tuberosity of the ischium; and below — by a tendon, which has three divisions — to the outer condyle of the femur, and to the posterior and inner part of the internal tuberosity of the tibia. This muscle is a rotator inwards, and a flexor of the leg. It can also bend the thigh upon the leg. In standing it maintains the pelvis in position, and can even draw it downwards.

Semimor'tuus, (*semi,* and *mortuus,* 'dead,') Semianimis.

Sem'ina (pl. of *semen,* 'seed') **Catapu'tiæ Majo'ris,** see Ricinus communis.

Sem'ina Frig''ida Majo'ra. The *great'er cold seeds.* The ancients gave this name to the emulsive seeds of the cucumber, melon, gourd, and watermelon.

Sem'ina Frig''ida Mino'ra. The *less'er cold seeds.* The ancients gave this name to the seeds of the lettuce, purslane, endive, and cichory.

Sem'ina Indageer, Nerium antidysentericum — s. Ricini Vulgaris, see Ricinus communis.

Sem'inal, (from *semen,*) Spermatic.

Sem'inal Cysts. A variety of retention-cyst or tumor, under which are included encysted hydrocele and hydrocele of the spermatic cord or spermatocele. The fluid obtained from these cysts usually contains seminal filaments or spermatozoa.

Sem'inal Fil'aments, Spermatozoa — s. Fluid, Sperm — s. Granules, see Granule.

Semina'lē Mem'brum, 'seminal member,' Penis.

Semina'lis, Spermatic.

Seminervo'sus, (*semi,* and *nervus,* 'a sinew,') Semitendinosus.

Sem'inex, gen. *Semin'icis,* (*semi,* and *nex,* 'death,') Semianimis.

Semin'ia Morbo'rum, (*seminium,* 'a seed store,') Predisposition.

Seminif'erous, (*semen,* and *fero,* 'I carry,') *Spermatoph'orous.* An epithet given to the vessels which secrete and convey the seminal fluid.

Sem'inist, (from *semen,*) Animalculist. The term was, also, used for one who believed that the new being was formed by an admixture of the seed of the male with the supposititious seed of the female.

Semin'ium, 'a seed store,' Sperm.

Semiog'raphy, Semeiography.

Semiol'ogy, Semeiology.

Semi'on, (*σημειον,*) Sign.

Semiot'ic, Symptomatic.

Semiorbicula'ris, see Orbicular muscles.

Semiot'icē, Semeiotice — s. Faciei, Physiognomy.

Semipes'tis, Typhus.

Semiple'gia, (*semi,* and *πληγη,* 'a stroke,') Hemiplegia.

Semisex'tum, Hemiecton.

Semisicil'icus. A weight of one drachm or three scruples.

Semisidera'tio, (*semi,* and *sideratus,* 'planet struck,') Hemiplegia.

Semisidera'tus, see Hemiplegia.

Semisom'nis, (*semi,* and *somnus,* 'sleep,') Coma.

Semisop'itus, (*semi,* and *sopio, sopitum,* 'I put to sleep,') Coma.

Semisopo'rus, (*semi,* and *sopor,* 'sleep,') Coma.

Semispec'ulum, (*semi,* and *speculum,* 'a mirror.') An instrument used for dilating the incision made into the neck of the bladder in the operation of lithotomy.

Semispina'lis Cap'itis, see Complexus.

Semispina'lis Col'li, *Semispina'tus* seu *transver'sospina'lis* seu *spina'lis* seu *transversa'lis col'li, Artic'ulospina'lis, Spina'lis cervi'cis, Transversospinal,* (F.) *Demi-épineux* ou *transversaire-épineux du cou.* This muscle arises from the transverse processes of the six uppermost dorsal vertebræ, by an equal number of distinct tendons, which run obliquely under the complexus, and is inserted into the spinous processes of all the cervical vertebræ, except the first and last. Its action is to extend the neck obliquely backwards and to one side.

Semispina'lis Dor'si, *Semispina'lis exter'nus, Transver'sospina'lis dor'si, Semispina'tus* (Riolan), *Transversospinal,* (F.) *Demi-épineux du dos, Transversaire-épineux du dos.* This muscle arises from the transverse processes of the seventh, eighth, ninth, and tenth dorsal vertebræ, by as many distinct tendons, which soon grow fleshy; and then again become tendinous, and are inserted into the spinous processes of the sixth or seventh uppermost dorsal, and two lowest cervical vertebræ, by as many tendons. Its action is to extend the spine obliquely backwards.

Semispina'lis Exter'nus, Semispinalis dorsi — s. Internus, Transversalis dorsi — s. Spinatus, Longissimus dorsi, Semispinalis dorsi.

Semispina'tus Col'li, Semispinalis colli.

Semis'sis, *Se'mis.* The half of a pound, ounce, drachm, &c.

Semitendino'sus, *Seminervo'sus,* (F.) *Ischiocrêti-tibial, Ischio-prétibial,* (Ch.) *Demi-tendineux, Demi-nerveux.* This muscle is situate at the posterior part of the thigh. It extends obliquely, downwards and inwards, from the tuberosity of the ischium — to which it is attached by a flat tendon, common to it and the biceps — as far as the posterior and inner part of the tibia, to which it is attached by means of another round tendon. Its fibres are commonly interrupted by an aponeurosis. Its uses are the same as those of the semimembranosus.

Semitertia'na, (*semi,* and *tertiana,* 'tertian,') Hemitritæa.

Semiun'cia, (*semi,* and *uncia,* 'an ounce,') Hemiuncion.

Sem'ivir, gen. *Semivi'ri,* (*semi,* and *vir,* 'a man,') Eunuch.

Semivi'vus, (*semi,* and *vivus,* 'alive,') Semianimis.

Sem'ola, Bul'lock's. A farinaceous article of diet, which is recommended as highly nutritious and easily digestible, consequently well adapted for infants and invalids; said to consist of the gluten of wheat, with a small proportion of starch. Semola and Semolina resemble each other greatly. They appear, indeed, to be identical.

Semoli'na, *Man'na croup.* This may be made by grinding wheat in an apparatus, separating the flour from the middlings, dressing the latter four different times in a bolting mill, and sifting through parchment sieves, until the product is perfectly freed from bran. In Poland, it is called *Cra'cow groats.*

Semolina is generally imported into England from the Baltic, and in Russia is said to be manufactured from buckwheat. It has a granular form like some kinds of oatmeal, a dingy white color, a farinaceous, somewhat insipid, taste, and is well adapted for the diet of children affected with derangement of the bowels. By analysis it is found to consist of the gluten of wheat with a certain proportion of the starch, part of the latter having been removed.

Sempervi'vum A'crē, (*semper,* 'always,' and *vivus,* 'alive,' because always green,) Sedum.

Sempervi'vum Tecto'rum, *S. majus* seu *tecto'rum, Aïzoön, Beiahalalen, Buphthalmus, Bar'ba Jo'vis, Agriocin'ara, Andrachahara, Chrysosper'mum, Houseleek, Sen'green, Fews, Fouets,* (Prov.) *Cyphel, Jupiter's Beard,* (F.) *Joubarbe des toits.* The leaves have a mild, subacid austerity, and are often applied to bruises and old ulcers.

Semp'stresses' Pal'sy, see Palsy, sempstresses'.

Se'muda, (*σημυδα,*) Betula.

Semun'cia, Hemiuncion.

Se'na, Cassia senna.

Séné, Cassia senna — *s. d'Amérique,* Cassia Marilandica — *s. Faux,* Colutea — *s. Indigène,* Colutea — *s. des Prés,* Gratiola officinalis.

Senebie'ra Coron'opus, (after J. Sénébier, the naturalist, of Geneva,) Cochlearia coronopus.

Sen'eca Oil, (after the Seneca Indians,) Petroleum, (New York.)

Sene'cio, *S. vulga'ris,* (*senex,* 'an old man,' in allusion to the grayish down on many species,) *Erig''erum, Cor'talon, Erig''eron, Ground'sel, Fire'weed,* (Sc.) *Groundie Swallow,* (F.) *Seneçon commun. Ord.* Compositæ. *Sex. Syst.* Syngenesia Polygamia Superflua. A common plant in Europe; frequently applied, bruised, to inflammations and ulcers, as a refrigerant and antiscorbutic.

Sene'cio Aur'eus, *Gold'en rag'weed, Wild vale'rian, Life root, Squaw root;* indigenous, is an excitant, diaphoretic, and diuretic. The dried plant is used in decoction; — ℥ss. to Oj. of water.

Sene'cio Hieracifo'lius, Erechthites hieracifolius.

Sene'cio Jacobæ'a, *Jacobæ'a, St. James's Wort, Rag'wort,* (Sc.) *Bunwede, Weebo,* (F.) *Jacobée.* The leaves have a roughish, bitter, subacid, and extremely nauseous taste. A decoction has been used in dysentery. A poultice of the leaves has been recommended in rheumatic affections, and a decoction of the root has often been employed in cases of wounds and bruises.

Sene'cio Vulga'ris, Senecio.

Seneçon Commun, Senecio.

Senec'ta, Senectus.

Senec'ta An'guium. The cast skin of a serpent. A decoction of it was said to cure deafness.

Senec'ta Decrep'ita, Decrepitude — s. Extrema, Decrepitude — s. Summa, Decrepitude — s. Ultima, Decrepitude.

Senec'tus, gen. *Senectûs, Senec'ta,* (from *senex,* 'an old person,') *Ge'ras, Se'nium, Æ'tas seni'lis* seu *provec'ta* seu *ma'la, Old age, Senil'ity,* (F.) *Vieillesse.* The last period of life, commencing, according to some, at 60 years of age — according to M. Flourens, at 70 — but varying according to numerous circumstances. It is characterized by progressive diminution of the physical and mental faculties. See Age.

Senec'tus Ul'tima, Decrepitude.

Sen'ega, Polygala senega.

Sen'egæ Ra'dix, see Polygala senega.

Sen'egal, Gum, *Gum'mi Senegalen'sē* seu *Sen'eca* seu *Sen'ega* seu *Sen'ica.* The exudation from *Aca'cia* seu *Mimo'sa Sen'egal. Ord.* Leguminosæ. *Sex. Syst.* Polygamia Monœcia — growing in that part of Africa through which the river Senegal runs. It is in loose or single drops, much larger than gum Arabic or the gum which exudes from the cherry tree, and is much more difficult of solution than the former.

Sen'egin, see Polygala senega.

Sénégrain, Trigonella fœnum.

Sen'eka, Polygala senega.

Sénevé, Sinapis.

Sen'green, Sempervivum tectorum.

Se'nile, *Seni'lis,* (F.) *Sénile,* from *senex,* 'an old person.' Relating or belonging to old age — as '*senile* delirium.' Dotage.

Se'nile Trem'bling, see Senile.

Senil'ity, Senectus.

Sen'na, Cassia senna — s. Alexandrina, Cassia senna — s. American, Cassia Marilandica — s. Bladder, Colutea arborescens — s. Essence of, prepared, Selway's, see Infusum sennæ compositum — s. Figs, see Cassia senna — s. Germanica, Colutea — s. Italica, Cassia senna — s. Paste, see Paste, senna — s. Prairie, Cassia chamæcrista — s. Wild, Cassia chamæcrista, Cassia Marilandica, Globularia alypum.

Sens, Sense — *s. Génital,* Appetite, venereal.

Sensa'tion, *Sensa'tio,* (*sentire, sensum,* 'to feel,') *Æsthe'ma.* The consciousness or cognizance by the brain of an impression caused by an external body on the organs of the senses, (F.) *Sentiment.* It is not necessarily, however, confined to bodies external to us, for we can receive an impression by touching any part of our own body. The body which communicates the impressions needs but to be external to the part impressed. Sensations are divided into *external, internal,* and *morbid.* The *external* are communicated by the five organs of the senses. The *internal* are such as occur within the body, and arise from some alteration in the function of the part for the time being. Hunger and thirst are internal sensations, as well as all the natural wants. *Morbid* sensations may be either internal or external. *Objective sensations* are produced by impressions on the peripheral nerves, as in vision, audition, &c. *Subjective sensations* are such as originate centrically or in the encephalon, as tinnitus aurium.

Sensa'tional, Sentient.

Sense, *Sen'sus, Sen'sio, Æsthe'sis,* (F.) *Sens.* A faculty, possessed by animals, of appreciating impressions from external objects. The senses are five in number; sight, hearing, smell, taste, and touch. Of these, the first two and the last administer more to the intellect, and hence have been called, by some, the *intellectual senses;* the other two seem more connected with the nutrition of the body, and hence have been termed *corporeal* or *nutritive senses.* Other senses have been suggested — as the intense sensation experienced during the venereal act; a sense of heat and cold; a muscular sense, a common sense or cœnæsthesis, &c.

Sen'ses, Ner'vous Sys'tem of the, Medulla oblongata.

Sensibil'itas, Sensibility — s. Anomala, see Irritable — s. Aucta, see Irritable — s. Morbosa, see Irritable.

Sensibil'ity, *Sensibil'itas,* (*sentire, sensum,* 'to feel,' and *habilis,* 'able,') *Æsthe'ma.* The faculty of receiving and transmitting impressions, and having the consciousness of them. It thus includes three secondary properties, *Impressibil'ity,* (F.) *Impressionabilité, Impressibilité; Transmissibil'ity,* and *Perceptibil'ity.* Bichat defines it as the property possessed by living bodies, of receiving impressions, whether the individual be conscious of them or not. In the former case, where conscious, he calls the sensibility *animal;* in the latter, where not, he terms it *organic.* This last is common to vegetables and animals, and presides over nutrition, absorption, exhalation, secretion, &c. The other does not exist in vegetables: it is the origin of the sensations — olfaction, vision, gustation, audition, thirst, hunger, pain, &c. There are few parts of the animal body which are not sensible — if not in health — in disease. The free extremities of the hair and nails, and the epidermis, are not so. See Insensibility.

Sensibil'ity, Recur'rent, see Vertebral nerves.

Sensif'erous, (*sensus,* and *ferre,* 'to carry,') Sentient.

Sen'sio, Sense.

Sen'sitive, *Sensiti'vus,* (F.) *Sensitif.* Having the faculty of feeling. Relating or appertaining to the senses, or to sensation.

Sensito'rium, Sensorium.

Senso'ri-volit''ional. A term applied to nervous fibres which pass to and from the cerebro-spinal axis, and are respectively concerned in sensation and volition.

Senso'rial, Sentient.

Senso'rial Pow'er, according to Dr. Wilson Philip, is composed of the two functions of sensation and volition. Dr. Darwin included in it the power of muscular contraction; but it ought not to be extended to acts in which there is not consciousness.

Senso'rium, *S. commu'nē, Or'ganon senso'rium inter'num, Sensito'rium, Empo'rium spirituum, Æsthete'rion, Sen'sory.* The common centre of sensations. By many it is considered to be represented by the optic thalami, the corpora striata, and the ganglionic nuclei of the nerves of the different senses.

Sen'sory, Sensorium, Sentient.

Sen'sory Gan'glia. A name given by Dr. Carpenter to a series of ganglionic masses at the base of the brain, which are in direct communication with the nerves of sensation — as the *olfactory, optic, auditory,* and *gustatory.*

Sen'sory Nerves, *Nerves of sensa'tion,* are so called in contradistinction to *Motor* nerves. There are *general sensory nerves* — as those connected with the posterior part of the spinal marrow, and the fifth pair; and *special sensory,* as those of the senses.

Sen'sus Ægritu'dinis, 'a feeling of sickness,' Indisposition — s. Osmometricus, Olfaction — s. Perversus, Pseudæsthesia.

Sen'tient, *Sen'tiens,* (from *sentire,* 'to feel,') *Sen'sory, Ideäg''enous, Senso'rial, Sensa'tional, Sensif'erous.* Feeling; causing feeling.

Sen'tient Extrem'ities of Nerves are their minute terminations in the organs.

Sentiment, see Sensation.

Senti'na, Pituitary gland.

Separato'rium, (*separare, separatum,* 'to separate.') A surgical instrument, for separating the pericranium from the skull.

A *Sep'aratory, Vi'trum Hypoclep'ticum,* is a pharmaceutical vessel for separating fluids of different densities from each other.

Sepedogen'esis, Sepedonogenesis.

Sep'edon, (σηπεδών,) Putrefaction.

Sepedono'des, (σηπεδονωδης,) Putrid.

Sepedonogen'esis, *Sepedogen'esis,* (*sepedon,* and γενεσις, 'generation.') A septic disposition or tendency; such as is met with in typhus gravior.

Se'pes, *Sæ'pes,* 'a hedge,' 'a row;' as *Se'pes* seu *Se'ries* seu *Pec'ten den'tium:*— a row of teeth.

Se'pes Den'tium, see Sepes.

Seph'irus, Scleriasis.

Se'pia, (σηπια,) *S. Officina'lis, Se'pium, Cuttlefish,* (Sc.) *Hosefish, Slievefish,* (F.) *Sèche. Class,*

Cephalopoda. The osseous part of the cuttlefish, (F.) *Os de Sèche — Præcip'itans mag'num* — has been used as an absorbent, and is often added to toothpowders.

Seplasia'rius. A name formerly given to one who sold perfumes, ointments, &c. (It is derived from *Seplasia*, the name of a public place at Capua, where such preparations were frequently sold.) A druggist.

Sepsichym'ia, Septochymia.

Sep'sis, (σηψις,) Putrefaction.

Septæ'mia, *Septhæ'mia, Septicæ'mia, Sep'tic Fe'ver,* (σηπτος, 'putrid,' and αἱμα, 'blood,') *Pu'trid Infec'tion.* A morbid condition of the blood produced by septic or putrid matters, — animal poisons, especially, — the inhalation of foul air, or septic gases. It resembles pyæmia in its symptoms. The latter may be regarded, however, as a *purulent infection;* septæmia, as a *putrid infection.*

Sep'tal, *Septa'lis,* (from *septum.*) Relating or appertaining to a septum; as 'septal walls of the heart,'— those that separate the cavities from each other.

Septa'na Fe'bris, (*septem,* 'seven,') Fever, septan.

Sep'tenary, *Septena'rius,* (F.) *Septénaire,* (*septem,* 'seven.') 'Consisting of seven.' The septenary years of the old believers in critical periods were times at which, it was supposed, important changes might be expected to take place. The grand climacteric was fixed at 63, and it was considered that if a person passed that age, he had well-founded expectations that his life might be protracted to 90.

Septen'niad, (*septem,* 'seven,') see Climacteric years.

Septe'rius, (σηπτηριος,) Septic.

Sept'foil, Up'right, (*septem,* 'seven,' and *folium,* 'a leaf,') Tormentilla.

Septhæ'mia, Septæmia.

Sep'tic, *Sep'ticus, Sep'tus, Septe'rius,* (F.) *Septique,* (σηπτος, 'putrid.') That which produces putrefaction. A substance which corrodes and disorganizes the soft parts without causing much pain.

Sep'tic Fe'ver, Septæmia — s. Poison, see Poison.

Septicæ'mia, Septæmia.

Septimes'tris Fœ'tus, (*septem,* 'seven,' and *mensis,* 'a month,') see Fœtus septimestris.

Septiner'via, (*septem,* 'seven,' and *nervus,* 'a nerve,') Plantago.

Septochym'ia, *Sepsichym'ia,* (σηπτος, 'putrid,' and χυμος, 'juice.') Putrefaction or putrescency of the humors.

Sep'ton, (from σηπτος, 'putrid,') Azote.

Septopyæ'mia. A combination of septæmia and pyæmia.

Septop'yra, (σηπτος, 'putrid,' and πυρ, 'fever,') Typhus gravior.

Sept'ula (pl. of *Septulum*) **Re'num,** Columnæ Bertini — s. Testis, see Septulum.

Sept'ulum, dim. of *Septum.* A division between small spaces or cavities — as the *septula tes'tis* or fibrous cords given off by the mediastinum testis to be inserted into the inner surface of the tunica albuginea.

Sep'tum, (F.) *Cloison,* 'a partition,' (from *sepio, septum,* 'I fence in.') A part destined to separate two cavities from each other, or to divide a principal cavity into several secondary cavities.

These septa are numerous in the human body. The chief are the following:

Sep'tum Atrio'rum Cor'dis, *S. Auricula'rum.* The septum or partition between the auricles of the heart.

Sep'tum Auricula'rum, S. atriorum — s. Bronchiale, Bronchial septum — s. Cerebelli, Falx cerebelli — s. Cerebri, Falx cerebri — s. Cochleæ auditoriæ, Lamina spiralis.

Sep'tum Cor'dis, *Septum me'dium cordis.* The partition which separates the two ventricles of the heart.

Sep'tum Crura'lē, see Crural canal — s. Encephali, Tentorium.

Sep'tum Lu'cidum seu *pellu'cidum* seu *ten'uē et pellucidum* seu *me'dium, Spec'ulum, S. lu'cidum, La'pis specula'ris, Mediasti'num* seu *Diaphrag'ma ventriculo'rum latera'lium cer'ebri,* (F.) *Septum médian,* (Ch.) *Cloison transparente.* The soft portion or medullary substance which separates the two lateral ventricles of the brain from each other. This septum is composed of two laminæ; between which a small cavity exists, filled by a serous fluid, *ventric'ulus septi pellu'cidi.* See Ventricles of the brain.

Septum Médian, S. lucidum — *s. Médian du cervelet,* Falx cerebelli — s. Medium cerebri, S. lucidum — s. Medium cordis, Septum cordis — s. Membranaceum auris, see Tympanum.

Sep'tum Na'rium, *Intersep'tum* seu *Dissepimen'tum* seu *Interfi'nium* seu *Discri'men* seu *Im'brex* seu *Diaphrag'ma na'rium,* (F.) *Cloison des Fosses nasales.* The partition between the nares. It is formed by the vomer, the perpendicular plate of the ethmoid bone, and a cartilage of a triangular shape, *Septum narium cartilagineum.* See Nasal cartilage. These parts are lined by the pituitary membrane, which receives a considerable number of nerves and vessels.

Sep'tum Na'si, see Nares — s. Nerveum, Crista acustica — s. Parvum Occipitale, Falx cerebelli — s. Pectiniforme, see Cavernous bodies — s. Pellucidum, S. lucidum — s. Scalæ, Lamina spiralis — s. Scroti, see Scrotum — *s. Staphylin,* Velum pendulum palati — s. Tenue et pellucidum, S. lucidum — s. Thoracis, Mediastinum — *s. Transverse,* Tentorium — s. Transversum, Crista acustica, Diaphragm — s. Vestibuli nervoso-membranaceum, see Labyrinth.

Sep'tus, (σηπτος,) Septicus.

Se'pum, Sevum.

Seque'læ, (from *sequor,* 'I follow,') popularly *Dregs.* Morbid phenomena left as the result of a disease.

Sequestrot'omy, (*sequestrum,* and τομη, 'section.') A hybrid term for the operation for necrosis.

Seques'trum, (*sequestrare,* 'to separate from,') (F.) *Séquestre.* The portion of bone, in necrosis, which is dead, and separated from the living bone; acting, while retained, as an extraneous body. When the sequestrum is superficial and small, it is called *Exfolia'tion.* The portion of bone surrounding it is the *Cap'sula sequestra'lis.*

Sera'peum, Syrup.

Serapi'non, Sagapenum.

Sera'pium, Syrup.

Serbet', Scherbet.

Séreux, Serous.

Sericocar'pus Tortifo'lius, (σηρικος, 'silken,' and καρπος, 'fruit,') *Cony'za bifolia'ta, As'ter tortifo'lius;* indigenous; *Order,* Compositæ; is said to be diuretic.

Se'ricum, (σηρικον,) *Silk,* (from *Seres* — the Thibetans, probably — from whom it was first obtained,) (F.) *Soie.* The thread spun by the *Bom'byx Mo'ri* or *Silkworm.* Silk is used by surgeons for ligatures, &c.

Se'ricum An'glicum, see Sparadrapum adhæsivum.

Serid'ion, Seriola.

Se'ries Den'tium, 'a row of teeth,' see Sepes.

Sérieux, Serious.

Seringue, Syringe.

Seri'ola, (σερις, gen. σεριδος,) Cichorium intybus.

Se'rious, *Se'rius,* (F.) *Sérieux, Grave.* A term applied to a disease, *Dyspath'ia, Mor'bus gra'vis,* and to a symptom that is attended with danger.

Se'ris, (σερις,) Cichorium intybus.

Sermoun'tain, Lacerpitium album.

Se'ro. In composition, serous membrane.

Serocoli'tis, gen. *Serocoli'tidis,* see Colitis.

Se'rocyst, see Serocystic.

Serocys'tic, *Serocys'ticus.* An epithet for tumors of the female breast, *Se'rocysts,* which consist, in the first stage, of one or more membranous cysts, produced perhaps by dilatation of portions of the lactiferous tubes.

Seroëntери'tis, gen. *Seroenteri'tidis,* see Enteritis.

Serohepati'tis, gen. *Serohepati'tidis,* see Hepatitis.

Se'roid, *Seroï'des,* (*serous,* and εἰδος, 'resemblance.') Resembling a serous membrane.

Se'rolin, *Seroli'na,* (*serum,* and *oleum.*) A peculiar fatty matter, found by Boudet in the blood. According to Dr. Austin Flint, Jr., normal fæces contain serolin or *ster'corin,* produced by a transformation of the cholesterin of the bile during the digestive act.

Seroot'. A ferocious fly of Abyssinia, described by Sir Samuel W. Baker as about the size of a wasp, whose proboscis is terrific, and its bite so painful that it drives wild animals from the regions which it infests from about the middle of July to the middle of October.

Sérosité, Serum.

Seros'ity, Serum.

Se'rous, *Sero'sus,* (F.) *Séreux,* (from *serum.*) Thin; watery. Relating to the most watery portion of animal fluids, or to membranes that secrete them. See Serum

Se'rous Cysts, *Hygro'mata.* Cysts with thinly liquid contents, usually seated in or near secreting glands or membranes, or vascular glands.

Se'rous Lay'er, see Tache embryonnaire — s. Membranes, Membranes, serous.

Serpe'do, (*serpere,* 'to creep,') Psoriasis.

Ser'pens, Serpent.

Ser'pent, *Ser'pens, An'guis, O'phis,* (from *serpere,* 'to creep.') A snake. *Snake broth* was, at one time, recommended as a restorative.

Many serpents are venomous; and the bites of some fatal. See Poisons, table of.

Serpent à Lunettes, 'spectacled snake,' Cobra di Capello — *s. à Sonnettes,* Crotalus horridus.

Ser'pent Teeth. A term used with reference to the torsion of one or more of the incisors, resembling those of the ophidian reptiles.

Serpentaire Noire, Actæa racemosa — *s. Rouge,* Polygonum bistorta.

Serpenta'ria, (from *serpens,* gen. *serpentis,* 'a snake,') 'snake root,' Aristolochia serpentaria — s. Gallorum, Arum dracunculus — s. Hispanica, Scorzonera — s. Minor, Arum maculatum — s. Nigra, Actæa racemosa.

Serpenta'riæ Brazilien'sis Ra'dix, Caincæ radix — s. Radix, see Aristolochia serpentaria.

Serpenta'rin, see Aristolochia serpentaria.

Ser'pentary Root, Aristolochia serpentaria.

Serpentin, 'winding as a serpent,' see Alembic.

Ser'pentine, (from *serpens,* 'a serpent,') Ophites.

Serpenti'nus, Ophites.

Ser'pes, gen. *Serpe'tis,* (*serpere,* 'to creep,') Herpes.

Serpig''inous, (from *serpere,* 'to creep,') (F.) *Serpigineux.* An epithet given to certain affections, which creep, as it were, from one part to another,—'*Serpiginous* erysipelas,' (F.) *Érysipèle serpigineux.*

Serpig''inous Ul'cer, Ulcus serpiginosum.

Serpi'go, gen. *Serpi'ginis,* (from *serpere,* 'to creep,') Herpes circinatus, Lichen psoriasis.

Serpil'lum, (from *serpere,* 'to creep,') Thymus serpyllum.

Serpolet, Thymus serpyllum.

Serpul'lum, (ἑρπυλλον,) Thymus serpyllum.

Serpyl'lum, (ἑρπυλλον, from ἑρπειν, *serpere,* 'to creep.') Thymus serpyllum — s. Citratum, see Thymus serpyllum.

Ser'ra, Saw — s. Amputatoria, Saw, amputation — s. Versatilis, Trepan.

Ser'rated, *Serra'tus,* (from *serra,* 'a saw,') Dentate, Saw-shaped.

Serra'tula (dim. of *serratus,* 'saw-shaped,') **Ama'ra.** So called from the leaves, owing to their serrated shape. *Family,* Cynarocephaleæ. *Sex. Syst.* Syngenesia Polygamia æqualis. A species of *Sawwort,* recommended in ague.

Serrat'ula Be'hen, Centaurea behen.

Serra'tus, (from *serra,* 'a saw,') Dentate.

Serra'tus Anti'cus Mi'nor, Pectoralis minor.

Serra'tus Mag'nus, (so called from its serrated appearance,—(from *serra,* 'a saw,') *Serratus ma'jor anti'cus, S. ma'jor,* (F.) *Costo-basi-scapulaire, Costo-scapulaire,* (Ch.) *Grand dentelé.* A very broad (especially anteriorly), thin, flat, irregularly quadrilateral muscle, situate at the sides of the thorax. It is attached, before, to the external surface of the first eight or nine ribs, by as many distinct digitations; and, behind, to the spinal edge of the scapula. The superior fibres are almost horizontal; the lower become gradually more and more oblique upwards and backwards. This muscle carries the scapula forwards, and causes it to execute a movement of rotation, which directs its inferior angle forwards, and the anterior upwards. When the shoulder is fixed, it raises the ribs.

Serra'tus Ma'jor, Serratus magnus — s. Major anticus, Serratus magnus.

Serra'tus Posti'cus Infe'rior, (F.) *Dorso-lombo-costal, Lombo-costal* (Ch.), *Petit dentelé postérieur et inférieur.* A broader and thinner muscle than the following, but nearly of the same shape. It is situate obliquely at the lower part of the back; and extends from the spinous processes of the last two or three dorsal vertebræ, and the first two or three lumbar, to the inferior margin of the last four false ribs. This muscle depresses the ribs, and thus concurs in expiration. It is an antagonist to the next.

Serra'tus Posti'cus Supe'rior, (F.) *Cervicidorso-costal, Dorso-costal,* (Ch.) *Petit dentelé supérieur.* A flat, thin, quadrilateral muscle, situate obliquely at the posterior inferior part of the neck, and the superior part of the back. It passes from the posterior cervical ligament, from the spinous process of the last cervical vertebræ, from the spinous processes of the first two or three dorsal, to the second, third, fourth, and fifth ribs; into which it is inserted by as many digitations. It raises the ribs, and is, consequently, an inspiratory muscle.

Serre-artère, (*serrer,* 'to press,' and *artère,* 'artery,') Presse-artère.

Serre-cou (F.), (*serrer,* 'to press,' and *cou,* 'the neck.') An instrument, invented by Chabert, for compressing the jugular vein, in bleeding from that vessel. It surrounds the neck like a collar, and, by means of a pad, exerts the necessary pressure.

Serre-fine (F.), (*serrer,* 'to press,' and *fin,* 'fine.') A small spring forceps, invented by M. Vidal. It is formed of a wire of metal, turned in the middle into two spirals, one in front of the other. This constitutes the spring. Each branch describes nearly the letter S; and one extremity forms the spiral, the other lays hold of the parts to be united.

Serre-nœud (F.), (*serrer,* 'to press,' and *nœud,* 'a knot.') This name has been given to various instruments, employed by the surgeon for tightening a ligature passed round a pediculated tumor, or any part which has to be destroyed by

ligature slowly and gradually. Thus, there is the *serre-nœud* of Roderic, the *constricteur* of Herbinaux and of Maisonneuve, the *serre-nœud* of Desault, &c.

Serre-nœud de Deschamps, Presse-artère.

Serres, Den'tal Glands of, see Tooth.

Ser'tula Campa'na, (dim. of *serta*, 'a garland,') Trifolium melilotus.

Se'rum, 'whey,' (probably from *serus*, 'late;' because it remains after the butter and cheese have been separated from milk,) see Serum lactis. *Or'rhos*, *O'ros*, *Seros'ity*, (F.) *Sérosité*. The most watery portion of animal fluids, exhaled by serous membranes. It is a constituent part of blood, milk, &c. Also, Sperm.

Se'rum of the Blood, *Hæ'mydor*, *Or'rhos*, *Se'rum seu I'chor san'guinis*, (F.) *Sérum du Sang*, is the liquid which separates from the blood, when coagulated at rest. It is of a greenish-yellow color; viscid, slightly coagulable by heat, acids, and alcohol. It is composed of water, chloride of sodium, certain phosphates, and albumen, constantly united to soda, almost in a saponaceous combination.

The fluid which exudes from the albumen of the serum of the blood, when coagulated by heat, is by some called *seros'ity*.

Se'rum Lac'teum, Serum lactis.

Se'rum Lac'tis seu Lac'teum, *A'qua Lac'tis*, *Serum of Milk*, *Whey*, (Prov.) *Whig*, (F.) *Sérum du lait*, *Petit lait*. That part of milk from which the butter and caseous matter have been separated. It is a transparent, citrine-colored liquid, containing sugar of milk, mucilage, acetic acid, phosphate of lime, and some other saline substances. It is used as a slightly nutritious diluent and refrigerant. The French have magistral formulæ, the basis of which is whey. They are called *Petits-laits*, or 'wheys.'

Se'rum Lac'tis Hoffman'ni, (F.) *Petit-lait d'Hoffman*, is a name given to the liquid resulting from treating with boiling water milk which has been evaporated to an almost solid consistence. It is not much used.

Ren'net Whey is made thus: *milk*, 2 pints, *rennet*, ℥ss., infused in a little hot water; mix and keep in a gentle heat for some hours, then strain.

Sérum du Sang, Serum of the blood.

Se'rum San'guinis, Serum of the blood.

Se'rum of Se'rous Mem'branes, *Se'rum membrana'rum serosa'rum*, *Wa'ter of Drop'sy*, (F.) *Sérum des membranes séreuses*, *Eau des hydropiques*. It resembles the serum of the blood, — especially in cases of hydrocele. The water of hydrothorax and ascites contains much less albumen: — sometimes enough to coagulate on the application of heat; at others, not.

Ser'vice, Moun'tain, Sorbus aucuparia.

Ser'vicetree, Sorbus domestica.

Serviette en Carré, 'a napkin in square,' Couvrechef.

Sésame, Sesamum orientale.

Ses'ami Fo'lium, Sesamum.

Ses'amoid, *Sesamoï'des*, *Sesamo'des*, *Sesamoïdeus*, (σησαμη, 'a grain of sesamum,' and εἰδος, 'resemblance.')

Ses'amoid Bones, *Os'sa* seu *Ossic'ula sesamoïdea*, are small bones, situate in the substance of tendons, near certain joints. Their number is various. They are commonly more in the male than female. Two are constantly met with beneath the metatarsophalangal articulations of the great toe. Sometimes, the articulations of other bones of the metatarsus with the phalanges of the toes have them likewise. In the hand, there are two before the metacarpophalangal joint of the thumb. At times, they are met with in the other metacarpophalangal articulations. Occasionally, two exist behind the condyles of the femur, in the tendons of the gastrocnemii muscles. A considerable os sesamoideum is also met with in the tendon of the peronæus longus. These bones are commonly round, and flattened only on one surface, which is incrusted with cartilage. Their size is very variable, according to the joints in which they exist. Traces of sesamoid bones are not observed in infants: in them, they are replaced by small, cartilaginous concretions. They are developed by a single point of ossification; and are, like the patella (which is a true sesamoid bone), composed of much cellular substance, covered by a thin layer of compact tissue. The use of these bones is, — to allow the tendon to be inserted into the lever at a greater angle: and thus enable the power to act more advantageously.

Riolan has given the name *Ossa sesamoïdea* to two bony points sometimes met with; — the one at the outer side of the carotid canal of the temporal bone; and the other at the edge of the cavernous sinus, at the side of the internal carotid artery.

Ses'amum, (σησαμον, σησαμη,) see Sesamum orientale.

Ses'amum Orienta'lē, *S. edu'lē* seu *oleif'erum* seu *In'dicum* [?], *Ben'nē*, *Oil'y Grain*, (F.) *Sésame*, *Jugeoline*. *Ord.* Bignoniaceæ. The seeds of this African plant were cultivated in Georgia and South Carolina, where the negroes used them with Indian corn as an article of food. They yield a larger proportion of oil than any other vegetable; one hundred weight producing ninety pounds of oil, which is, at least, equal to Florence oil.

Ben'nē oil, *O'leum Ses'ami*, the oil of the seed, is used in the Southern States as a laxative. The leaves — *Sesami folium*, (Ph. U. S., 1863,) — *Sesamum*, (Ph. U. S., 1873,) *Benne*, which are referred to *Sesamum orientale* and *S. Indicum*, afford, by infusion, an excellent mucilage.

Sescun'cia, *Sesquiun'cia*, *Hemiol'ion*. An ounce and a half. See Sesqui.

Ses'eli, (σεσελι,) Laserpitium siler — s. Ægopodium, Ligusticum podagraria — s. Annuum, S. tortuosum — s. Carum, Carum — s. Carvi, Carum — s. Creticum, Tordylium officinale — s. Fœniculifolium, Sison ammi — s. Graveolens, Apium graveolens — s. Meum, Æthusa meum — s. Patens, S. tortuosum — s. Pratense, Peucedanum silaus — *s. des Prés*, Peucedanum silaus.

Ses'eli Tortuo'sum, *S. Massilien'sē* seu *an'nuum* seu *pa'tens*, *Œnan'thē stria'ta rig''ida*, *Hartwort of Marseilles*. The seeds have a warm taste, and a greater degree of pungency than those of Laserpitium siler, which is the *Seseli* of some of the Pharmacopœias.

Ses'elis, Laserpitium siler.

Ses'qui. This word, joined with any number, weight, measure, &c., signifies one and a half; as *sesquigranum*, 'a grain and a half.'

Sesquiun'cia, Sescuncia.

Se'ta Equi'na, 'horsehair,' *Hair'worm*, *Helmin'thus Gor'dii*. A kind of worm, found in stagnant water, from 4 to 6 inches long, and twisted into various knots and contortions; color pale-brown, with dark extremities. It is common in the intestines of the Laplanders; causing the *Co'lica Lappon'ica*, in which the gripings are, at times, exceedingly severe.

Setace'um, *Se'ton*, (F.) *Séton*, (from *seta*, 'a bristle.') A long strip of fine linen or cotton twist, passed through the skin and areolar membrane, to keep up an issue; or through suppurating cavities, between the fragments of fractured bones, &c., to fulfil certain indications. The term is, also, applied to the issue so established. The operation is simple. It consists in laying hold of a fold of skin, and passing a seton-needle through it with the thread attached. Every day

a fresh portion of the thread is drawn through the sore. Setons are established in many diseases; — in obstinate ophthalmia, cephalalgia; epilepsy, thoracic and abdominal affections, &c.; but they are not as much used as formerly.

Seta'ria Roccel'la, (from *seta,* 'a bristle,') Lichen roccella.

Set'fast, see Furunculus.

Se'ton, Setaceum.

Set'terwort, Helleborus fœtidus.

Set'ting a Frac'ture, see Reduction.

Sevadil'la, ([S.] *Sebadilla,*) Veratrum sabadilla.

Seva'tio, (from *sevum,*) Steatoma.

Sève, ([Sax.] ȝæp, [G.] Saft, 'juice,') Sap.

Sev'enbark, Hydrangea arborescens.

Sev'endays' Disease, see Trismus.

Sévrage, (from [L.] *separare,* 'to separate,') Weaning.

Se'vum, *Se'bum, Se'pum, Ste'ar, A'deps ovil'li, Se'vum verveci'num.* Suet, mutton suet, the prepared suet of Ovis aries; Pinguedo.

Se'vum Ce'ti, (*cetus,* 'whale,') Cetaceum.

Se'vum Præpara'tum, *Se'vum,* (Ph. U. S.,) *Ovil'li se'vum præpara'tum, Pre'pared Su'et,* (F.) *Graisse de Mouton, Suif,* is formed by cutting suet in pieces; melting over a slow fire, and straining through linen. It is emollient, and is sometimes boiled in milk (℥j. to Oj.), and is used in diarrhœa and dysentery. Its principal employment is in the formation of plasters.

Se'vum Verveci'num, Sevum.

Sex, *Sex'us, Se'cus.* The physical difference between male and female in animals and vegetables; as the *Male sex, Sex'us po'tior* seu *for'tior* seu *viri'lis;* and the *Fe'male sex, Sex'us seq'uior, S. muli'ebris, Al'ter Sex'us, 'The Sex.'*

Sex'tans, (from *sextus,* 'the sixth,') *Sex'ta pars li'bræ.* The sixth part of a pound.

Sexta'rius, (from *sextus,* 'the sixth.') An ancient measure for liquid and solid substances; the sixth part of a congius. See Weights and measures.

Sex'tula, (from *sextus,* 'the sixth,') *Hexa'gium, ἑξαγιον.* The sixth part of an ounce.

Sex'ual, *Sexua'lis,* (F.) *Sexuel,* (*sexus,* 'sex.') That which relates to the sex; which characterizes the sex.

Sex'ual Diseases, *Mor'bi sexua'les,* are the diseases of the genital organs; as Sexual Functions are the genital functions.

Sex'ual In'tercourse, Coition — s. Organs, Genital organs.

Sex'us, gen. *Sexûs,* Sex — s. Alter, see Sex — s. Fortior, see Sex — s. Muliebris, see Sex — s. Potior, see Sex — s. Sequior, see Sex — s. Virilis, see Sex.

Seydschütz Wa'ter, Seidschütz water.

Shack'le, Carpus.

Shack'lehammed, see Cnemoscoliosis.

Shad'dock, *S. Or'ange.* The fruit of *Citrus decuma'na,* called after the captain of a vessel who first took it to the West Indies from China. It is large, but inferior to the orange in flavor. It keeps, however, longer; and hence is useful on long voyages.

Shag'bark, see Hickory.

Sha'kers, see Convulsionnaire.

Shakes, Intermittent.

Sha'king, Intermittent, see Rigor.

Shallot', Echalotte.

Sham A'braham, see Abraham man.

Shampoo'ing, *Cham'pooing, Mass'ing,* (F.) *Massage, Massement.* A Hindoo process, which consists in pressing the body of the bather in a peculiar manner; cracking the various joints, and employing blows and friction. A variety of this was employed by the ancients in their baths. With the Romans the operators were called *Fricato'res* and *Tractato'res.*

'Kneading' consists in pressing alternately upon a part of the body to arouse the muscles to more energetic action. It is employed at times in dyspepsia.

Sham'rock, In'dian, ([Ir.] *Seamrog* or *shamrog,*) Trillium latifolium — s. Water, Menyanthes verna.

Shan'ker, Chancre.

Shan'nondale Saline' Springs. These are within a few miles of Charlestown, Jefferson county, Virginia. They are mildly aperient and diuretic.

Shape, Vulva.

Share'bone, Pubes.

Sha'ron Springs, New York. These sulphur and chalybeate springs, which are situate about 10 or 12 miles south of Canajoharie, N. Y., and 45 miles west of Albany, are much frequented. The sulphur springs contain carbonate of soda, magnesia, and lime, chloride of lime, sulphate of magnesia, sulphate of lime, chloride of sodium, chloride of magnesium, sulphohydrate of soda, sulphohydrate of lime, silicic acid, carbonic acid, and free sulphohydric acid gas. Their temperature is 48° Fah.

Shealkanta Oil, see Argemone Mexicana.

Sheath, ([Sax.] ȝcæðe,) Vagina — s. of Henle, see Huxley's sheath — s. Huxley's, Huxley's sheath — s. of Schwann, see Nerve fibre.

Shed'ding of the Teeth, see Dentition.

Sheep Poi'son, Kalmia latifolia — s. Pox, see Varicella.

Shell'bark, see Hickory.

Shell Flow'er, Trillium latifolium—s. Liquid, see Calcis murias — s. Membrane, Membrana testæ.

Shep'herd's Purse, Thlaspi bursa—s. Sun dial, Anagallis arvensis.

Sherbet', Scherbet — s. Orange, see Syrupus aurantii.

Sher'man's Worm Lozenges, see Worm lozenges, Sherman's.

Sher'ry, (after *Xeres,* in Spain,) Sack, see Wine.

Shield'bone, Scapula.

Shield, Wa'ter, Nelumbium luteum.

Shil'der, (*shoulder,*) Humerus.

Shin, ([Sax.] ȝcina,) *O'crea, Cris'ta tib'iæ.* The *spine,* or anterior part of the tibia or leg. It is also called *Anticne'mion* and *Cre'a.*

Shin'bone, Tibia.

Shing'les, (*cingulum,* 'a girdle,') Herpes zoster — s. Brow, see Herpes zoster.

Shin'leaf, Pyrola.

Shin'lock, Brassica eruca.

Ship Fe'ver, see Typhus.

Shit'abed, Leontodon taraxacum.

Shiv'ering, (from [G.] Schauer,) see Rigor.

Shock, (from [Sax.] ȝceacan, ȝceacan, 'to shake,') (F.) *Choc,* see Concussion.

Shock, Ner'vous, *Neuroparal'ysis, Vi'tal Shock, Vi'tal Depres'sion, Ner'vous Depres'sion, Fa'tal Sink'ing.* Sudden or instantaneous depression of organic, nervous, or vital power, often with more or less perturbation of body and mind, passing either into reaction or into fatal sinking, occasioned by the nature, severity or extent of an injury, or by an overwhelming moral calamity. (Copland.)

Shock, Vi'tal, Shock, nervous.

Shoe'maker's Cramp, see Cramp, writers'.

Shoe, Scar'pa's. A shoe devised by Scarpa for rectifying the deviation in talipes varus.

Shoot, see Crick-in-the-neck, and Pain.

Short, ([Sax.] ȝceopt, from ȝcipan, 'to cut, to *shear,' shored, shor'd, short,*) (F.) *Court.* A word used, by anatomists, in opposition to *long;* and to distinguish parts from each other that have otherwise the same name. *Short bones,* for example, are those in which the three dimensions

— length, breadth, and thickness — are nearly alike; such are the vertebræ, bones of the carpus, tarsus, &c.

Short-of-Puff, Short-winded — s. Ribs, see Costa.

Shortsight'ed, Myopic.

Shortsight'edness, Myopia.

Shortwind'ed, Pursy.

Shot'bush, Aralia spinosa.

Shott, (*shoot,*) Pleurodynia.

Shot'ted Su'ture, see Suture.

Should'er, ([Sax.] ȝculdȝe,) Humerus — s. Blade, Scapula — s. Bone, Humerus.

Shoup, Haunch.

Shov'el Pick'erel Weed, Unisema deltifolia — s. Pond, Unisema deltifolia.

Show, see Parturition.

Showchoo, see Spirit.

Show'erbath, see Bath.

Shrub, (perhaps from Arabic, *sharab,* 'syrup,' or corr. from *syrup.*) A compound of spirits, lemonjuice, and sugar.

Shrub, Sweet, Calycanthus—s. Sweetscented, Calycanthus.

Shrumpshould'ered, see Hump.

Shud'dering, *Frem'itus,* (from [G.] Schauder, Schauer,) (F.) *Frémissement, Tressaillement.* A peculiar sensation, felt either externally or internally; and which seems to be the result of a spasmodic movement of the parts in which it occurs. A slight feeling of cold sometimes accompanies it. It is, at times, the result of a moral cause, and is often the precursor of shivering.

Shull'bane, Humerus.

Shu'mac, Rhus coriaria.

Siagantri'tis, gen. *Siagantri'tidis,* (*siagon, αντρον,* 'a cavity,' and *itis.*) Inflammation of the lining membrane of the antrum of Highmore.

Si'agon, (*σιαγων,*) Maxillary bone.

Siagon'agra, (*siagon,* and *αγρα,* 'a seizure,') *Arthri'tis maxilla'ris.* A gouty or rheumatic affection of the joint of the lower jaw.

Sial'achus, (from *sialon,*) Salivation.

Sialadeni'tis, gen. *Sialadeni'tidis,* (*sialon, αδην,* 'a gland,' and *itis.*) Inflammation of a salivary gland. At times, improperly written *Syaladenitis.*

Sial'agogue, *Sialago'gus, Sial'ogogue, Ptyal'agogue, Ptys'magogue, Sali'vans, Saliva'tum, Sialocinet'icus, Apophlegmat'isans per os,* (F.) *Salivant,* (*sialon,* and *αγω,* 'I drive.') That which provokes the secretion of saliva. Pyrethrum and mercury are sialagogues. Sialagogues may be of two kinds: those which act through the circulation, and those which act immediately on the salivary organs. Mercury belongs to the former, — pyrethrum to the latter class. The chief sialagogues are armoracia, calamus, mezereum, pyrethrum, tabacum, and zingiber.

Sial'ica, (from *sialon.*) Medicines which affect the salivary glands.

Sialis'mus, (*σιαλισμος,*) Salivation.

Sial'ochous, (*σιαλοχοος,* from *sialon,* and *χυω,* 'I pour,') Salivated.

Sialocinet'icus, (*sialon,* and *κινεω,* 'I move,') Sialagogue,

Sialol'ithi, (*sialon,* and *λιθος,* 'a stone,') Calculi, salivary.

Sialolog''ia, (*sialon,* and *λογος,* 'a discourse.') A treatise on saliva.

Si'alon, (*σιαλον,*) Saliva.

Sialorrhœ'a, (*sialon,* and *ῥεω,* 'I flow,') Salivation.

Si'alos, (*σιαλος,*) Saliva.

Sialos'chesis, (*sialon,* and *σχεσις,* 'retention.') Retention or suppression of the saliva.

Sialosyrin'ges, (*sialon,* and *συριγξ,* 'a pipe,') Salivary fistulæ.

Sialoze'mia, (*sialon,* and *ζημια,* 'loss,') Salivation — s. Mercurialis, Salivation, mercurial.

Si'amese Twins, see Twins, Siamese.

Sibare, Phrenitis.

Sib'bens, *Siv'vens, Frambœ'sia Sco'tica.* An infectious disease in the mountainous parts of Scotland, viewed to be of the venereal kind. *Sivin,* in the Celtic, means raspberry; and it is said that, in this affection, fungi appear like raspberries. From *sivin,* the inhabitants have made *sievin, sibben, sibbens,* and *sivvens.* By some, this affection is regarded as a complication of the venereal and itch. In the Orkneys, *sibbens* means itch.

Sib'ilant, *Sib'ilus, Sib'ilans,* (*sibilo,* 'I hiss, I whistle.') Making a hissing or whistling sound. See *Râle sibilant.*

Sibilis'mus Aur'ium, 'hissing or whistling of the ears,' see Tinnitus aurium.

Sib'ilus, Sibilant.

Sib'ilus Aur'ium, see Tinnitus aurium.

Siccan'tia, (*siccare, siccatum,* 'to dry,') *Xeran'tica,* (F.) *Siccatifs.* Drying medicines. See Desiccativa.

Siccatifs, Siccantia.

Sicca'tio, Drying.

Siccha'sia, (*σικχασια,* 'disgust.') A distressing disgust for food; such as is experienced by women with child.

Sicil'icum, *Sic'lium.* A Roman weight of about two drachms.

Sick, ([Sax.] ȝeoc,) *Æ'ger, Ægro'tus, Nos'erus, Noso'des, Ja'cens, Laborio'sus, Labo'rans,* (F.) *Malade.* Laboring under disease; *Diseased, Distem'pered, Ill, Ail'ing, Disor'dered.* Such is its acceptation in old English, and generally in the United States. In most parts of the United States, if a patient is affected with a slight indisposition, he is said to be *sick;* if with one more severe, he is said to be *ill;* (Prov.) *bad, badly.* In England, it most commonly means, — affected with disorder of the stomach, or nausea. A sudden fit of sickness is, in Scotland, termed *Dwalm,* or *Dwaum.*

A sick person, *Æ'ger, Ægro'tus,* (F.) *Malade,* who is under the charge of a physician, is said to be a *pa'tient,* or the patient of the physician. At times, but rarely, patient is used for a sick person in the abstract, (from *patiens,* 'suffering.')

Sick Stom'ach, Milk sickness, Nausea.

Sick'ly, *Morbo'sus, Valetudina'rius, Adyn'atus, Nosac'erus, Noso'des, Mor'bose, Mor'bulent, Unhealth'y,* (Sc.) *Hough,* (F.) *Maladif.* Subject to be sick, or in feeble health. Ailing.

Sick'ness, Disease, Plague — s. Bad of Ceylon, Beriberi — s. Falling, Epilepsy — s. Mountain, Puna.

Sick'ness-rate. The ratio of sickness to the population in any locality.

Sick'ness, Riv'er, Milk sickness — s. Sea, Nausea marina — s. of the Stomach, Vomiting — s. Swamp, Milk sickness.

Sic'lium, Sicilicum.

Sic'ua, (*σικυα,*) Cuppingglass.

Sic'ula, (dim. of *sica,* 'a dagger,') Beta, Penis.

Sicye'don, (*σικυηδον,*) Cauledon.

Sic'yos, (*σικυος,*) Cucumis sativus.

Si'da Abu'tilon, Abutilon Avicennæ.

Sid'dons Fe'ver, Fever, Siddons.

Side, Pain in the, Pleurodynia.

Side'bone, Ilium.

Sidera'tio, *Sydera'tio, Sidera'tion,* (*sidus,* gen. *si'deris,* 'a star;' because the condition was thought to be produced by the influence of the stars.) The state of one struck suddenly, without apparent cause, and as if by the influence of the stars or planets — *Plan'etstruck.* The ancients comprised under this name different morbid conditions, such as paralysis, apoplexy, and gangrene.

Sidera'tio, Apoplexy, Asphyxia, Phrenitis—s. Ossis, Spina ventosa.

Sidera'tion, Astrobolismus, Sideratio.

Side'rion, (σιδηριον, 'an iron tool,') Ferramentum.

Sideri'tes, (σιδηριτης, from *sideros,*) Magnet.

Sideri'tis, Magnet, Teucrium chamæpitys.

Siderokre'næ, (*sideros,* and κρηνη, 'a spring,') Water, mineral (chalybeate).

Siderope'gæ, (*sideros,* and πηγη, 'a spring,') Water, mineral (chalybeate).

Side'ros, (σιδηρος,) Ferrum.

Sidero'sis, (*sideros,* 'iron.') A disease resulting from the inhalation of iron dust, similar in its morphology, &c., to Anthracosis, resulting from inhalation of coal dust.

Siderox'ylon, (*sideros,* and ξυλον, 'wood,') Chrysophyllum cainito.

Sidesad'dle Plant, Sarracenia.

Sid'hee, see Gunjah.

Sid'mouth, Cli'mate of. Sidmouth is in Devonshire, England, on the seabeach, at the mouth of the Sid. It is much frequented by invalids, both during the summer and winter. The climate is, however, damp, and subject to sea-fogs.

Siége, (originally from *sedes,* 'seat.') Anus, Nates.

Sielis'mus, (σιελισμος,) Salivation.

Si'elon, (σιελον,) Saliva.

Sierra Leone Fe'ver, see F. Sierra Leone.

Sieve, ([Sax.] ȝiꝑe, ȝẏȝe,) see Cribration — s. Drum, see Cribration.

Sifflement (F.), ([L.] *sibilare,* from *sifler,* 'to whistle,') Whistling.

Sifflement Modulé, Chant des artères, Bruit musical, 'modulated whistling, or music of the arteries,' *Musical sound.* A kind of sound heard on auscultation, resembling, at times, the humming of certain insects. Various musical sounds, (F.) *Bruits musicaux,* are described from fancied resemblances: — as *Bruit de piaulement,* resembling the clucking of the hen; — *Bruit de jappement,* resembling the barking or yelping of a young dog;—*Bruit de rouet,* resembling the noise of a spinning-wheel, &c.

The sound is chiefly met with in those laboring under chlorosis.

Sigault'ian Sec'tion, (after Dr. J. R. Sigault, a French physician,) Symphyseotomy.

Si'gē, (σιγη,) Taciturnity.

Sigh, ([Sax.] ȝican, 'to sigh,') Suspirium.

Sight, ([Sax.] ȝeȝihꝺ,) Vision — s. Askew, Dysopia lateralis — s. False, Metamorphopsia, Pseudoblepsia — s. Feebleness of, Amblyopia.

Sigilla'tion, *Sigilla'tio,* (from *sigillum,* 'a seal.') The mark of a cicatrix.

Sigil'lum (dim. of *signum,* 'a mark') **Salamo'nis,** 'Solomon's seal,' Convallaria polygonatum — s. Virginitatis, Hymen.

Sig'matoid, Sigmoid.

Sig'moid, *Sigmoid'al, Sig'matoid, Sigmoï'des, Sigmo'des, Sigmoïdeus,* (*sigma,* and ειδος, 'resemblance.') That which has the form of the Greek Σ, or of C, an old form of the sigma.

Sig'moid Car'tilages, Semilunar cartilages.

Sig'moid Cav'ities or Fos'sæ of the Ul'na, *Si'nus Luna'ti,* (F.) *Cavités* ou *Fosses sigmoïdes,* are two notches at the upper part of that bone,—one for the reception of the humerus; the other for that of the radius.

Sig'moid Flex'ure of the Co'lon, *Flexu'ra sigmoï'des* seu *ili'aca, S. Roma'num,* is a turn the colon takes immediately before its termination in the rectum. See Colon.

Sig'moid Fos'sa (of the temporal bone), Fossæ sigmoidea — s. Mesocolon, see Mesocolon.

Sig'moid or Semilu'nar Valves, *Val'vulæ Sigmoïdeæ* seu *semiluna'res, Proces'sus Sigmoï'des,* (F.) *Valvules sigmoïdes* ou *semilunaires,* are three valvular folds, at the commencement of the pulmonary artery and aorta. These valves have the form of a crescent, when applied against the parietes of the vessel. When the blood is sent from the ventricles by their contraction, the valves are applied against the sides of the vessel; but, during the diastole of the ventricle, they are depressed, and prevent the blood from returning to the heart. At the middle of the convexity of each valve is a small, hard, triangular granulum, called *Corpus'culum* seu *Glob'ulus Aran'tii,* which completely closes up the passage. It is, also, called *Corpusculum Morgagu'ii* and *C. Sesamoïdeum,* (F.) *Globule d'Arantius.*

Sign, *Sig'num, Semi'on,* (F.) *Signe.* Any present or past circumstance, afforded by the examination of a patient, or of matters concerning him, whence a conclusion may be drawn regarding the nature and seat of his disease. The phenomena which precede the disease are called *anamnes'tic* or *commem'orative signs;* — those which accompany it are termed *diagnos'tic,* if they reveal the nature or seat of the disease,—*prognos'tic,* when they indicate its probable duration and termination. See Symptom.

Sig'na Assiden'tia, see Assidens.

Sig'nature, *Signatu'ra, Signa'tio,* (*signum,* 'a sign.') This term was applied in the Eastern countries, in the middle ages, to mystic characters of good or bad augury, with which it was pretended that every one was marked by the star under which he was born.

Sig'natures of Plants meant certain peculiarities in their external formation or color, which indicated that they were adapted for particular diseases;—as in the case of the *Lungwort, Liverwort,* &c.

Signe, Nævus — *s. Avant-coureurs,* Precursory signs — *s. Précurseurs,* Precursory signs.

Sig'num, Sign, see Parturition — s. Characteristicum, see Pathognomonic — s. Conjunctum, see Pathognomonic — s. Diacriticum, see Diacritica signa — s. Morbi essentiale, see Pathognomonic.

Sik'ka, Chique.

Si'lach, *Silac.* An Arabic word, used to designate thickening of the eyelids, *Crassit''ies Palpebra'rum;* and, also, *Alopecia.*

Silence, see Murmur, Respiratory.

Sile'nē Crassifo'lia, Cucubalus behen — s. Inflata, Cucubalus behen — s. Pennsylvanica, see Silene Virginica — s. Thorei, Cucubalus behen.

Sile'nē Virgin'ica, *Ground Pink, Wild Pink, Catch Fly. Ord.* Caryophyllaceæ. The root has been employed in decoction, as an efficacious anthelmintic. *Sile'ne Pennsylva'nica* probably has the same properties.

Si'ler (gen. *Si'leris*) **Lancifo'lium,** Laserpitium siler — s. Montanum, Laserpitium siler.

Sil'iqua, *Cera'tion;* the carat. A weight of about four grains. A pod.

Sil'iqua Arab'ica, Tamarindus — s. Araci aromatici, see Vanilla — s. Banillæ, see Vanilla — s. Dulcis, Ceratonium siliqua — s. Vanigliæ, see Vanilla — s. Vanilliæ, see Vanilla.

Siliquas'trum Plin'ii, (from *siliqua,* 'a pod,') Capsicum annuum.

Silk, ([Sax.] ȝeolc,) Sericum.

Silk Grass, Yucca filamentosa — s. Weed, Asclepias Sullivantii, Asclepias tuberosa — s. Weed, common, Asclepias Syriaca — s. Weed, flesh-colored, Asclepias incarnata — s. Weed, swamp, Asclepias incarnata — s. Worm, see Sericum.

Sillon, Sulcus — *s. Horizontal de la veine ombilicale,* see Liver—*s. Transversale,* see Liver—*s. de la Veine cave inférieur,* see Liver — *s. de la Veine porte,* see Liver.

Sillonnement, Segmentation.

Sil'lus, (σιλλος,) Camus.

Si'lo, (σιλλος,) Camus.

Sil'phium, (σιλφιον,) Laserpitium.

Sil'phium Lacinia'tum, *Rosinweed, Compass plant, Polar plant;*

Sil'phium Perfolia'tum, *Cup Plant, Turpentine Sun Flower,* and

Sil'phium Terebinthina'ceum, *Prai'rie Burdock; Nat. Ord.* Compositæ; indigenous in Ohio and Michigan, and flowering from July to September; yield a fragrant gum which is esteemed stimulant and antispasmodic.

Silu'rus Gla'nis, (σιλουρος,) see Ichthyocolla.

Si'lus, (σιλλος,) Camus.

Sil'ver, ([Sax.] ꝑeolꝑep, [G.] Silber,) Argentum—s. Ammoniochloride of, see Argentum—s. Chloride of, see Argentum—s. Chloruret of, see Argentum—s. Cyanide of, see Argentum—s. Cyanuret of, see Argentum—s. Iodide of, see Argentum — s. Ioduret of, see Argentum.

Sil'ver Fork Defor'mity. A peculiar deformity characteristic of some forms of fracture of the lower extremity of the radius.

Sil'ver Leaf, Magnolia macrophylla.

Sil'ver, Mu'riate of, see Argentum — s. Nitrate of, Argenti nitras — s. Oxide of, see Argentum.

Sil'ver Stain, Argyria.

Sil'ver and Ammo'nia, Chlo'ride of, see Argentum — s. and Ammonia, chloruret of, see Argentum — s. and Soda, hyposulphite of, Sodæ et argenti hyposulphis.

Silves'ter's (Dr. H. R.) Meth'od for Restor'ing Suspend'ed Anima'tion. This consists in placing the patient on his back, pulling the tongue forward, and then drawing the arms slowly over the head, by which means the ribs are elevated by the pectoral muscles, and the chest is enlarged. The arms are now to be brought down to the side of the chest, which they must be made to compress slightly. These movements must be repeated so as to stimulate respiration.

Sil'ybum, Carduus marianus — s. Maculatum, Carduus marianus—s. Marianum, Carduus marianus.

Sima'ba Ce'dron. *Nat. Fam.* Simarubaceæ. A South American tree, the seeds of which — *cedron seeds* — have been used as an antidote for snake-bites. They have, also, been proposed in mental diseases and in epilepsy. The scrapings of the wood have been used as a substitute for sulphate of quinia.

Sima'ba Quassioï''des, Nima quassioïdes.

Simarou'ba, Quassia simarouba — s. Bitter, Quassia simarouba—*s. Faux,* Malpighia mourella.

Simaru'ba, Quassia simarouba — s. Excelsa, see Quassia — s. Officinalis, Quassia simarouba.

Similateur, Malingerer.

Simila'tio, (*similis,* 'like,') Assimilation.

Simil'ia Simil'ibus, 'like by like,' see Homœopathy.

Simit''ium, Plumbi subcarbonas.

Si'mo, (σιμος,) Camus.

Simo'nea Folliculo'rum, (after Simon, a German dermatologist,) Acarus folliculorum.

Simotrache'lus, (σιμος, 'bent short,' and τραχηλος, 'neck,') Bysauchen.

Sim'ple, (opposite to compound.) A medicinal herb. One skilled in simples is called a *Sim'plist* or *Simplex.* '*To sim'ple,*' and '*to cull simples,*' signify to gather medicinal herbs.

Sim'pler, see Simple.

Sim'pler's Joy, Verbena hastata.

Sim'plist, see Simple.

Sim'ulated Diseases, Feigned diseases.

Simula'ti Mor'bi, Feigned diseases.

Si'mus, (σιμος,) Camus.

Sin, Beset'ting, Masturbation.

Si'na Levan'tica, Artemisia santonica.

Sinapelæ'on, (σιναπελαιον, from *sinapis,* and λαιον, 'oil.') Oil impregnated with mustard.

Sina'pi, (σιναπι,) Sinapis.

Sina'pis, *S. ni'gra* seu *cer'nua* seu *Oliveria'na, Bras'sica ni'gra, Na'pus, Eru'ca, Sina'pē, Sina'pi, Sine'pi, Napi'um, Na'py, Com'mon Black Mus'tard,* (F.) *Moûtarde noire* ou *grise, Sénevé, Sauvé. Ord.* Cruciferæ. *Sex. Syst.* Tetradynamia Siliquosa. The seeds are inodorous, when entire, but, when bruised, the odor is very pungent; taste bitterish and acrid. They yield their virtues to water, and afford a bland oil by expression. The seeds are stimulant, diuretic, emetic, and rubefacient. They are sometimes recommended to be swallowed whole, in dyspepsia, torpor of the bowels, &c. Externally, they are applied in the form of cataplasm.

Sina'pis Al'ba, *S. folio'sa, Bonan'nia officina'lis, Na'pus Leucosina'pis, White Mustard,* also, is used medicinally. It is somewhat less pungent than the black. The distilled oil, *O'leum Sina'pis, Oil of mus'tard,* is a powerful stimulant and rubefacient. In the Pharmacopœias of the United States and Great Britain, the seeds of Sinapis nigra and Sinapis alba are officinal. *Flour of mustard,* generally called *mustard,* is the powder obtained from the seeds of both varieties. See Sinapism.

White'head's Es'sence of Mus'tard consists of *oil of turpentine, camphor,* and a portion of *spirit of rosemary:* to which is added a small quantity of *flour of mustard.* It is a celebrated embrocation for rheumatism, &c.

White'head's Es'sence of Mus'tard Pills consist of *yellow resin, mustard,* and *balsam of tolu.*

Mus'tard Whey is made by taking bruised *mustard seeds,* ℥ss., and *milk,* Oj. Boil together until the milk is curdled, and strain. This whey is used in dropsy.

Sina'pis Arven'sis, *S. Timoria'na, Char'lock, Wild Mus'tard, Gar'lock, Chad'lock, Runsh,* (Sc.) *Runch'es, Scald'ricks, Skel'loch, Skel'lie.* The seeds are sometimes substituted for black mustard.

Sina'pis Cer'nua, Sinapis—s. Eruca, Brassica eruca — s. Foliosa, S. alba — s. Nigra, see Sinapis — s. Oliveriana, Sinapis — s. Tamoriana, S. arvensis — s. Tuberosa, Brassica rapa.

Sin'apism, *Sinapis'mus,* (from *sinapis.*) A cataplasm, of which mustard forms the basis, which is used for exciting redness, and acting as a counterirritant. It is prepared by mixing flour of mustard and vinegar together for the due consistence. See Cataplasma sinapis.

A *sin'apised pa'per,* (F.) *Papier sinapisé,* was first prepared by a French pharmaeien, and said to be more certain than a cataplasm made with the flour of mustard. It consisted in extracting the fixed oil while retaining the rubefacient principle. See Charta sinapis.

Sin'ciput, gen. *Sincip'itis,* (from *semi,* 'half,' and *caput,* 'head,' or *summum caput,* 'top of the head,') *Sincip'ital Re'gion, Syn'ciput, Hemicephale'um.* The French use it synonymously with *Vertex, Mesocra'nium, Mesocra'num.* By some, it is applied to the frontal region or forepart or forehalf of the cranium, *Hemicepha'lium, Hemicepha'lum.* The parietal bones have been called *sincip'ital bones, Ossa sincip'itis,* (F.) *Os du sinciput.*

Sindon, (σινδων, 'fine linen.') A small piece of rag, or round pledget, supported by a thread at the middle, and introduced into the opening in the cranium made by the trephine.

Sine'pi, (σιναπι,) Sinapis.

Sin'ew, ([Sax.] ꝑinep,) Tendon.

Sin'gleton's Gold'en Oint'ment is formed of *sulphuret of arsenic* (realgar), and *lard* or *spermaceti ointment.*

Singul'tous, *Lygmo'des, Lygo'des, Lyngo'des,* (F.) *Singultueux,* (from *singultus.*) Relating to or affected with hiccough.

Singul'tus, gen. *Singul'tûs, Lynx, Lyg'mus,*

Spasmolyg'mus, Clo'nus seu *Pneu'sis singul'tus, Hic'cough, Hic'cup,* (old Eng.) *Hicket* or *Hickot, Hicquet,* (Prov.) *Heuks, Yex, Yux, Yoke,* (Sc.) *Es'kin, Ees'kin,* (F.) *Hoquet.* A noise made by the sudden and involuntary contraction of the diaphragm, and the simultaneous contraction of the glottis, which arrest the air in the trachea. It is a symptom of many morbid conditions, and especially of gangrene, but occurs, frequently, in persons otherwise in good health. Also, a sob.

Sin'istrad, (*sinister,* 'to the left hand.') A term used by Dr. Barclay, adverbially, to signify 'towards the sinistral aspect.' See Mesial.

Sinis'tral As'pect, see Mesial.

Sink'ing, Adynam'ic, see Adynamic — s. Fatal, Shock, nervous — s. Typhoid, see Adynamic.

Sinueux, Sinuous.

Sinuos'itas, Sinus.

Sin'uous, *Sinuo'sus,* (F.) *Sinueux,* (*sinuare,* 'to bow, to curve.') An epithet given to certain ulcers, and especially to certain fistulæ, which are tortuous.

Si'nus, gen. *Sinûs,* 'a bay or curve,' *Sinuos'itas, Abscon'sio, Eurycho'ria, Reces'sus,* (F.) *Golfe.* Any cavity, the interior of which is more expanded than the entrance. In this sense, anatomists have applied the term to cavities in certain bones of the head and face. It has been, also, applied to certain venous canals, into which a number of vessels empty themselves; such as the sinuses of the dura mater and of the spine; the sinus of the vena porta; uterine sinuses, &c.; — and to the bosom and the vulva.

In Surgery, it means a long, narrow, hollow track, leading from some abscess, diseased bone, &c., (F.) *Clapier.*

Sinuses of bones form part of the nasal cavities. They are the frontal, sphenoidal, maxillary, &c. The name has also been given, occasionally, to the ethmoid and mastoid cells.

Si'nus Acus'ticus, Auditory canal, internal — s. Ampullaceus, Cavitas elliptica — s. Aortici, Sinuses of Valsalva—s. Arteriosus, S. pulmonalis—s. Basilar, Sinus transversus—*s. Caverneux,* Cavernous sinus — s. Cavernosi uteri, Sinus uterini—s. Cavernosus, Cavernous sinus — s. Cerebri, Ventricles of the brain — *s. Choroïdien,* S. quartus — s. Circular, of Ridley, Sinus coronarius — s. Circularis, S. coronarius.

Si'nus Circula'ris I'ridis, *Canal of Schlemm.* A minute canal between the sclerotic coat of the eye and the ciliary ligament.

Si'nus Commu'nis, see Semicircular canals — *s. Coronaire du cœur,* see Cardiac veins.

Si'nus Corona'rius, *S. circula'ris* seu *circula'ris Ridleyi, Cir'cular si'nus of Rid'ley, Cor'onary si'nus.* A venous canal, which surrounds, in a more or less regular manner, the pituitary fossa and gland, emptying itself into the corresponding cavernous sinus by each of its extremities.

Si'nus, Cor'onary, Sinus coronarius—s. Coranary of the heart, Sinus coronary, venous.

Si'nus Cor'onary, Ve'nous, *Cor'onary sinus of the heart.* A name given, on account of its great size, to that portion of the great coronary vein which embraces the left auriculoventricular furrow.

Si'nus Cox'æ, see Cotyloid.

Si'nus Dex'ter Cor'dis, *S. vena'rum cava'rum* seu *veno'sus, Sac'cus vena'rum cava'rum.* The right auricle of the heart — *A'trium cordis dextrum.* See Auricula.

Sinus Droit, S. quartus — s. Ductûs lactiferi, see Lactiferous ducts — s. Ellipticus, Cavitas elliptica.

Si'nus Falcifor'mis Infe'rior, see Sinuses, longitudinal — s. Falciformis superior, Sinuses, longitudinal — s. Fourth, Torcular Herophili — s. Genæ pituitarius, Antrum of Highmore—s. of the Jugular vein, see Jugular veins — s. Lacrymalis, Lachrymal sac — s. Lactiferus, see Lactiferous vessels — s. Laryngei, Ventricles of the larynx.

Sinus Latéraux, Sinuses, lateral — s. Lunati, Sigmoid cavities.

Si'nus, Lymph, see Lymph—s. Magni, Sinuses, lateral — s. Maxillary, Antrum of Highmore — *s. Médian,* see Sinuses, longitudinal—s. Median, see Semicircular canals—s. Morgagnii, Ventricles of the larynx — s. Mucosi, see Urethra—s. Mulierbris, Vagina.

Si'nus, Occip'ital, *Sinus occipita'lis.* These sinuses commence at the sides of the foramen magnum ossis occipitis, and ascend — becoming broader and nearer each other — into the substance of the falx cerebelli, where they frequently unite. Each opens into the inferior part of the torcular Herophili. They receive the veins of the falx cerebelli, of the dura mater, which lines the fossæ cerebelli, and of the posterior part of the cerebellum. Haller and Sömmering have given them the name of *posterior occipital sinuses,* to distinguish them from the transverse sinus, which they have called *anterior occipital sinus.*

Si'nus Occipita'lis Ante'rior, Sinus transversus—s. Ophthalmic, see Cavernous sinus—s. Ovatus, see Crista vestibuli — s. Perpendicularis, S. quartus—s. Pituitarii frontis, Frontal sinuses—s. Placental, see Placenta—s. Pocularis, see Ejaculatory ducts — s. Polymorphus, Cavernous sinus — s. Portarum, see Liver, and Porta vena — s. Prostaticus, see Ejaculatory ducts — s. Pudendi, Vagina — s. Pudoris, Vagina, Vulva — s. Pulmonales, Sinuses of Valsalva.

Si'nus Pulmona'lis, *S. sinis'ter cor'dis* seu *vena'rum pulmona'lium* seu *arterio'sus, Sac'cus vena'rum pulmona'lium, A'trium cor'dis sinis'trum.* The left auricle of the heart. See Auricula.

Si'nus of the Pul'monary Veins, Auricle, left.

Si'nus, Pyram'idal or Pyr'iform, *Si'nus Pyrifor'mes.* A pyramidal space, the *laryngo-pharyngeal* or *lateral pharyngeal sulcus, sinus* or *fossa,* continuous with the pharynx, and sloping down to the entrance into the œsophagus.

Si'nus Pyrifor'mes, Sinus, pyramidal.

Si'nus Quar'tus, *S. perpendicula'ris, Straight si'nus,* (F.) *Sinus choroïdien,* (Ch.) *Sinus droit.* This sinus — triangular throughout, wide posteriorly, narrower anteriorly, slightly oblique downwards and backwards — passes along the base of the falx cerebri, from the termination of the inferior longitudinal sinus to the torcular Herophili. It receives the inferior longitudinal sinus, the veins of the lateral ventricles or venæ Galeni, the superior cerebellous veins, &c.

Si'nus Re'num, Pelvis of the kidney—s. Rhomboideus, see Ventricles of the brain—s. Rotundus, see Crista vestibuli—s. of Santorini, Bulbus vestibuli, and Cavernous body of the vagina — s. Schlemmii, Ciliary canal — s. Semiovalis, see Crista vestibuli — s. of the Septum lucidum, Ventricle, fifth — s. Sinister cordis, S. pulmonalis — s. Sphenoidalis, Cavernous sinus, see Sphenoid bone—s. Straight, S. quartus—s. Sulciformis, see Crista vestibuli—s. Superciliares, Frontal sinuses —s. Terminalis, Circulus venosus—s. Transversi, Sinuses, lateral.

Si'nus Transver'sus, *S. occipita'lis ante'rior, Bas'ilar si'nus.* This sinus lies transversely at the anterior part of the basilary process of the occipital bone. It forms a communication between the two petrous sinuses, and the cavernous sinus of one side, and those of the other. Its breadth is commonly very great. It is situate between two layers of the dura mater, and presents, internally, a kind of cavernous tissue.

Si'nus Triangula'ris, see Sinuses, longitudinal — s. Urogenitalis, Urogenital sinus.

Si'nus Uteri'ni, *S. caverno'si Uteri, Uterine sinuses.* A name given to cavities formed by the uterine veins in the substance of the uterine parietes. They are very large during pregnancy.

Si'nus Utriculo'sus, see Semicircular canals—*s. des Vaisseaux séminifères*, Corpus Highmori.

Si'nus of the Ve'na Ca'va, Auricle, right—s. of the Vena porta, see Vena porta, and Liver—s. Venarum cavarum, S. dexter cordis—s. Venarum pulmonalium, S. pulmonalis—s. Venosus, S. dexter cordis—s. Vulvæ, Rima vulvæ.

Si'nuses, Confluence of the, Torcular Herophili.

Si'nuses of the Du'ra Ma'ter, *S.* seu *Fis'tu'læ* seu *Cavita'tes* seu *Ventric'uli* seu *Tu'buli* seu *Sanguidue'tus* seu *Receptac'ula Du'ræ ma'tris*, are formed by a separation of the layers of the dura mater, which acts as a substitute for the outer membrane of veins. Bichat admits only four great sinuses, of which all the others seem to be dependencies—the *two lateral sinuses*, the *straight sinus*, and the *longitudinal sinus*. To the lateral sinuses belong—the *petrous sinuses*, superior and inferior; the *transverse sinus*; the *cavernous sinuses*; the *coronary sinus*, and the *occipital sinuses*. To the straight sinus belongs the *inferior longitudinal*. The longitudinal sinus, properly so called, has no sinus under its dependence.

Si'nuses, Fron'tal, Frontal sinuses—s. of the Larynx, Ventricles of the larynx.

Si'nuses, Lat'eral, *Si'nus transver'si*, *S. mag'ni*, *S. latera'les*, (F.) *Sinus latéraux*. Each of these sinuses, distinguished into right and left, begins at the torcular Herophili or confluence of the sinuses, and terminates at the sinus of the jugular vein.

Si'nuses, Lat'eral Pharynge'al, see Sinus, pyramidal—s. Latero-pharyngeal, see Sinus, pyramidal.

Si'nuses, Longitu'dinal, *S. Longitudina'les*. These are two in number. 1. Supe'rior Longitu'dinal Si'nus, *S. falcifor'mis supe'rior* seu *triangula'ris*, *Sinus médian* (Ch.). A long, triangular canal, convex above, concave below, which occupies the whole of the upper edge of the falx cerebri. It is broad behind, and much narrower before, where it commences by a *cul-de-sac*, at the crista galli of the ethmoid bone. It passes along the frontal or coronal crest, sagittal suture, and the vertical groove of the occipital bone. It receives several veins from the dura mater, and all those that are spread over the convex and plain surfaces of the two hemispheres of the brain. It discharges itself into the upper part of the torcular Herophili. 2. Infe'rior Longitu'dinal Si'nus, *S. falcifor'mis infe'rior*, *Ve'na fal'cis cer'ebri*. This is much narrower than the last, and occupies the inferior edge of the falx cerebri, from its anterior third to the tentorium cerebelli, where it terminates, commonly by two branches, in the straight sinus.

Si'nuses, Petro'sal or Pe'trous, Petrous sinuses.

Si'nuses of Valsal'va, *Sinus Valsal'væ*, are three depressions in the aorta—*Si'nus aor'tici*—and pulmonary artery—*Si'nus pulmona'les*—immediately opposite the semilunar valves. Their use is to leave the edges of the valves free, so that they can be caught by the refluent blood. Where the aorta is about to send off the first of its large branches, at the top of the thorax, it is of great size, and has been called the *Large si'nus of Valsal'va*.

Si'nuses, Ver'tebral, (F.) *Sinus vertébraux*. Two great venous sinuses, different from those of the dura mater, which extend the whole length of the vertebral canal, from the occipital foramen to the end of the sacrum, behind the bodies of the vertebræ, before the dura mater, and at the sides of the posterior vertebral ligament. At their inner side they communicate with each other by means of branches, which form true *transverse sinuses*. They are situate at the middle of the body of each vertebra, passing under the posterior vertebral ligament. They receive at their middle part the veins that arise in the spongy tissue of the vertebræ. By their external side the vertebral sinuses communicate with the posterior branches of the vertebral, intercostal, and lumbar veins. At their posterior side they receive the veins, which creep on the prolongation of the dura mater that envelops the marrow.

Sipee'ri, Bebeeru.

Sipee'rine or **Sipe'ria,** see Bebeeru.

Si'phac, Peritoneum.

Siph'ilis, Syphilis.

Siph'ita, Somnambulism—s. Prava, Chorea.

Si'pho, Siphon—s. Auricularis, Otenchytes—s. Urinæ, Diabetes.

Si'phon, *Si'pho*, (σιφων, 'a tube.') A bent tube, whose limbs are of unequal length, employed in pharmacy for transferring liquids from one vessel to another. With this view, the shorter limb is plunged into the liquid, and air is sucked from the extremity of the longer limb. The pressure of the atmosphere forces the fluid through the tube; and the flow will continue as long as the extremity of the lower limb is below the level of the fluid in which the shorter limb is immersed.

An exhausting syringe is, at times, attached to the longer extremity of the siphon, by means of which the air can be drawn from it.

Si'phon, Plung'ing. An instrument used in pharmacy for obtaining a specimen,—at times, a measured specimen,—of any liquid. With this view, the instrument is immersed in the liquid, and allowed to remain there until full. The opening at the top is then closed with the thumb; and the contents, thus removed, are allowed to flow out by removing the thumb and permitting the entrance of air. It is a form of the *pipette*.

Sipho'nia Cahu'chu, (from σιφων, 'a tube,' from the use made of it,) see Caoutchouc—s. Elastica, see Caoutchoue.

Siphono'ma, gen. *Siphono'matis*, *Syphono'ma*, (F.) *Tumeur tubuleuse*, (from σιφων, 'a tube.') A tumor of fibrous appearance, and composed of parallel or interseeting tubes. (Henle.)

Siphun'culus, (dim. of σιφων, 'a tube,') Syringe.

Si'ra, Orpiment.

Si'rens, Symmeles.

Siri'asis, (σιριασις, a disease supposed to be produced by *Sirius*, 'the dog-star,' or by the sun,) Coup de soleil, Insolation, Phrenitis—s. Ægyptiaca, Coup de soleil.

Sir'ium Myrtifo'lium, Santalum album.

Sir'ius, (σειριος,) Canicula.

Sirop, Syrup—*s. d'Acide Citrique*, Syrupus acidi citrici—*s. d'Aeide Tartrique*, see Syrupus acidi citrici—*s. d'Ail*, Syrupus allii—*s. d'Amandes*, Syrupus amygdalæ—*s. Antiscorbutique*, Syrupus antiscorbuticus—*s. Antisyphilitique de Laffecteur*, see Syrupus de sarsaparillâ et sennâ—*s. d'Armoise composé*, Syrupus aromaticus—*s. de Baume de Tolu*, Syrupus tolutanus—*s. de Chicorée composé*, Syrupus de cichorio compositus—*s. des Cinq Racines*, Syrupus e quinque radicibus—*s. de Codéine*, Syrupus cum codeinâ—*s. de Coquelicot*, Syrupus rhœados—*s. de Coralline*, see Corallina Corsicana—*s. de Cuisinier*, Syrupus de sarsaparillâ et sennâ compositus—*s. de Desessartz*, see Syrupus ipecacuanhæ—*s. Diacode*, Syrupus papaveris—*s. Diurétique*, Syrupus e quinque radicibus—*s. d'Érysimum composé*, see Alliaria—*s. d'Éther*, Syrupus cum æthere sulphurico paratus—*s. d'Iodure de Fer*, see Liquor ferri iodidi—*s. de Fleur d'Oranger*, Syrupus aurantii florum—*s. de Gingembre*, Syrupus zingiberis—*s. de Gomme*, Syrupus acaciæ—*s. de Goudron*, see Pinus sylvestris—*s. de Guimauve*, Syrupus althææ—*s. d'Hélix*, see Limax—*s. d'Ipécacuanha*, Syrupus ipecacuhanæ—*s. d'Ipécacuanha composé*, see Syrupus ipecacuanhæ—*s. de Limaçons*, see Limax—*s. de Limon*, Syrupus limonis—*s. de Longue Vie*, Mellitum de mercuriali compositum—*s. de Mercure*, Syrupus

mercurio mediante gummi—*s. de Morphine*, Syrupus morphiæ muriatis — *s. de Chlorohydrate de Morphine*, Syrupus morphiæ muriatis—*s. de Mou de Veau*, see Sirop —*s. de Mûres*, Syrupus mori — *s. de Nerprun*, Syrupus rhamni — *s. d'Opium*, see Syrupus morphiæ sulphatis — *s. d'Orgeat*, Syrupus amygdalæ—*s. de Pavots Blancs*, Syrupus papaveris — *s. de Pommes composé*, see Syrupus sennæ — *s. de Sulfate de Quinine*, Syrupus quiniæ — *s. de Quinquine au Vin*, Syrupus de kinâ kinâ cum vino — *s. de Raifort composé*, Syrupus antiscorbuticus—*s. de Ratanhia*, Syrupus krameriæ—*s. de Rhubarbe composé*, Syrupus de cichorio compositus—*s. de Roses Pâles*, Syrupus rosæ — *s. de Roses Rouges*, Syrupus rosæ Gallicæ — *s. de Safran*, Syrupus croci — *s. de Salsepareille*, Syrupus sarsaparillæ—*s. de Salsepareille composé*, Syrupus sarsaparillæ compositus — *s. Simple*, Mel despumatum — *s. de Sulfate de Strychnine*, Syrupus strychniæ — *s. de Sucre*, Syrupus simplex — *s. de Thridace*, Syrupus lactucarii—*s. Végétal de Veluo*, Syrup, vegetable—*s. de Vinaigre*, Syrupus aceti.

As a general rule, these *sirops* are made according to the usual methods for preparing syrups, and possess the virtues of the substances after which they are named.

The Parisian Codex contains a few other compound syrups besides those enumerated; among them a syrup of *calf's lungs, Syru'pus e pulmon'ibus vitali'nis*, (F.) *Sirop de Mou de Veau*, as an expectorant!

Si'rup, Syrup.

Si'son Am'mi, (σισων,) *Æthu'sa am'mi, Caid'ium tenuifo'lium, Pimpinel'la laterifo'lia, Ses'eli fœniculifo'lium. Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. The plant that affords the *Am'mi ve'rum* of the shops, (F.) *Ammi des Boutiques.* The seeds — *Semen Am'mios cret'ici* seu *ve'ri* — were once used as a carminative.

Si'son Amo'mum, (F.) *Amome faux*, is considered to be excitant and diuretic. It is the *field honewort.*

Si'son Ani'sum, Pimpinella anisum — s. Podagraria, Ligusticum podagraria.

Sis'tens, (*sistere*, 'to still.') Epischetieus.

Sis'ters, Caroli'na, Carolina twins — s. Hungarian, Helen and Judith.

Sisym'brium Allia'ria, (σισυμβριον,) Alliaria—s. Barbarea, Erysimum barbarea—s. Erucastrum, Brassica eruca — s. Menthastrum, Mentha aquatica.

Sisym'brium Nastur'tium, *Nastur'tium aquat'icum* seu *officina'lē. La'ver odora'tum, Crateva'sium, Cres'si, Cardam'inē fonta'na* seu *nastur'tium, Wa'tercress*, (F.) *Cresson de fontaine. Ord.* Cruciferæ. *Sex. Syst.* Tetradynamia Siliquosa. Watercresses are commonly used in salad. They have obtained a place in the materia medica for their antiscorbutic qualities.

Sisym'brium Officina'lē, Erysimum — s. Parviflorum, S. sophia.

Sisym'brium So'phia, *S. parvifio'rum, Herb So'phia, So'phia chirurgo'rum, Flix-weed, Flux-weed*, (F.) *Sagesse des Chirurgiens.* It was once reputed to be anthelmintic, and valuble in hysterical affections. It is not used.

Other species of *Nasturtium*, as N. Palus'trē, *Marsh watercress*; and N. Amphib'ium, *Waterradish*, possess similar virtues with Nasturtium officinale.

Sisyrin'chium Bermudia'num, (σισυρυγχιον,) *Blue-eyed Lil'y, Phys'ic* or *Scur'vy grass*; indigenous; *Order*, Iridaceæ; flowering from June to August. Used as a cathartic by the Thomsonians. A decoction of the root is acrid and cathartic.

Sit'fast, see Furunculus.

Sithe, 'sigh,' Suspirium.

Siticulo'sus, (from *sitis*,) Dipsodes, see Alterative.

Sit'iens, (*sitio*, 'I thirst,') Dipsodes.

Si'tis, Thirst—s. Intensa, Polydipsia—s. Morbosa, Polydipsia.

Sit'ka, Min'eral Wa'ters of. See Archangel, New, mineral waters of.

Sitopho'bia, (σιτος, 'food,' and φοβος, 'dread,') Intense dread of food.

Si'tos, (σιτος,) Aliment.

Si'tus (gen. *Sitûs*) **Alie'nus**, 'a foreign position,' Ectopia — s. Anomalus seu Perversus intestinorum, Splanchnectopia — s. Mutatus, Ectopia, see Monster — s. Perversus, Ectopia.

Sitz'bath, 'a seat bath,' see Bath, half.

Si'um, (σιον,) *S. nodiflo'rum* seu *angustifo'lium* seu *Ber'ula* seu *erec'tum* seu *inci'sum, A'pium si'um, Helioscia'dium nodiflo'rum, Ber'ula angustifo'lia, Ber'ula, Creep'ing Wa'ter Parsnep*, (F.) *Berle nodiflore. Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. It is stimulant, and supposed to be diuretic and lithontriptic. It is, sometimes, employed in cutaneous eruptions.

Si'um Angustifo'lium, S. nodiflorum — s. Apium, Apium graveolens — s. Berula, S. nodiflorum —s. Bulbocastanum, Bunium bulbocastanum—s. Carvi, Carum — s. Erectum, S. nodiflorum — s. Graveolens, Apium graveolens — s. Incisum, S. nodiflorum.

Si'um Latifo'lium is the common *Water parsnep* of the United States. It is said to be poisonous.

Si'um Luna'rē. The root is eaten by the Chepewyans. It has an agreeable nutty flavor. By the Canadians, it is called *Queue de Rat.* The poisonous roots of Cicuta virosa, C. maculata, and C. bulbifera, according to Sir J. Richardson, are often mistaken for it.

Si'um Nin'si. The plant whose root is called *Ra'dix Nin'si, Nin'zin, Nind'sin.* This root was long supposed to be the same as ginseng, and it possesses similar, though weaker, properties. See Panax schinseng.

Si'um Nodiflo'rum, Sium — s. Silaus, Peucedanum silaus.

Si'um Sis'arum, *Skir'ret*, (F.) *Chervi, Girole*, is used as a salad in Europe; and has been thought a useful diet in chest affections.

Si'um Vulga'rē, Ligusticum podagraria.

Siv'ven, (Gael.) Rubus idæus.

Siv'vens, Sibbens.

Si'zy, ([W.] *Syth*, 'glue,') see Corium phlogisticum.

Skaw, Scall.

Skeel'y, (from [G.] scheelen, 'to squint,') Strabismus.

Skeleteu'ma, Sceleteuma.

Skeleteu'sis, Mummification, Sceleteusis.

Skeleti'a, (σκελετεια,) Emaciation.

Skeletog'raphy, *Skeletograph'ia, Sceletog'raphy, Sceletograph'ia*, (*skeleton*, and γραφη, 'a description.') A description of the skeleton.

Skeletol'ogy, *Skeletolog''ia, Sceletol'ogy, Sceletolog''ia*, (F.) *Squelettologie*, (*skeleton*, and λογος, 'a discourse.') A treatise on the solid parts of the body. This part of anatomy comprehends *Osteology* and *Syndesmology.*

Skel'eton, *Scel'etum, Scel'eton, Cada'ver exsicca'tum*; (old Eng. and Prov.) *At'omy, Anat'omy*, (Sc.) *Spaig*, (F.) *Squelette, Charpente osseuse*, (σκελετος, 'dried up,' from σκελλω, 'I dry.') A dried body. The aggregate of the hard parts of the body, or the bones. A skeleton is found in almost all animals, although it may not always be formed in the same manner. In some, as in the crustacea and testacea, it is wholly or partly *external, Ex'oskeleton, Der'moskeleton.* In others, as in birds, the mammalia, &c., it is *internal, En'doskeletou, Neur'oskeleton*, (F.) *Endo-squelette.* It serves as a support for other organs. On it the general shape of the body and of its various parts is greatly dependent. When the bones are united by their natural ligaments, the skeleton is

said to be *natural, Scel'etum natura'lē;* when articulated by means of wires, *artificial* or *articulated, Scel'etum artificia'lē.*

Skeletopœ'ia, *Sceletopœ'a, Sceleteu'sis,* (*skeleton,* and *ποιεω,* 'I make.') The part of practical anatomy which treats of the preparation of bones, and the construction of skeletons. Bones are prepared to exhibit their conformation, structure, chemical composition, mode of development, and changes; the different cavities formed by their union; and to demonstrate their connections, relations, modes of union, &c.

Skel'lie, Sinapis arvensis, Strabismus.

Skel'loch, Sinapis arvensis.

Skerlje'vo, Scherlievo.

Ske'visch, (from *Scabious* [?],) Erigeron Philadelphicum.

Ske'visch Flea'bane, Erigeron Philadelphicum.

Skew'sight, 'oblique sight,' Dysopia lateralis.

Skin, ([Sax.] ɣcm,) Cutis — s. Bronzed, see Capsule, renal—s. Diseases of the, Cutaneous diseases—s. Piebald, see Achroma—s. Scarf Epidermis — s. Traumatic Diseases of, see Traumatic.

Skin'bind, Induration of the cellular tissue.

Skin'bound Disease, Induration of the cellular tissue.

Skin-graft'ing, *Skin Transplanta'tion.* A method first introduced by M. Reverdin of Paris, for the treatment of large ulcerated surfaces, by the transplantation of small pieces of skin from another part of the body, cicatrization frequently resulting without contraction or deformity, as in extensive burns.

Skin'tight, Induration of the cellular tissue.

Skin Transplanta'tion, Skin-grafting.

Skiomach'ia, Sciomachy.

Skirre, Scirrhus.

Skir'ret, Sium sisarum.

Skir'rhus, Scirrhus.

Skirt, Diaphragm.

Skit'ter, (from [Sax.] ɣcıtan, 'to throw out,') Diarrhœa.

Skoke, Phytolacca decandra.

Skolemo'ra Fernambucen'sis, (*σκωληξ,* 'a worm,' and *μωρω,* 'I stupefy,') Geoffræa vermifuga.

Skolio'sis, Scoliosis.

Skue'sight, 'oblique sight,' Dysopia lateralis.

Skull, (Dan. *skal,*) Cranium.

Skull'cap, Calva, Calvaria, Scutellaria galericulata — s. Cap, Maddog, Scutellaria laterifolia.

Skunk'cabbage, (from having a strong and offensive odor like that of the skunk,) Dracontium fœtidum.

Skunk'weed, Dracontium fœtidum.

Slab, Torticollis.

Slab'bering, Slavering.

Slate, I'rish, Hibernicus lapis.

Sla'ters, Onisci aselli.

Slatkaia Trava, see Spirit.

Slav'ering, *Slab'bering, Slob'bering, Driv'elling,* (old E.) *Pirt'ling,* (from *saliva,*) *Ptyalis'mus in'ers,* (F.) *Bave.* Involuntary flow of saliva, from sluggishness of deglutition, without increased secretion. It is seen in the infant, the aged, and the idiot.

Sleep, (Sax. ɣlep,) *Som'nus, Somp'nus, So'por, Dormit''io, Hyp'nos,* (F.) *Sommeil.* Temporary interruption of our relations with external objects. A repose of the organs of sense, intellectual faculties, and voluntary motion.

The act of quitting this condition is called *Awa'king,* (F.) *Évigilation, Réveil.* Sometimes this is progressive and natural; at others, sudden and starting, (F.) *Réveil en sursaut,*—as in nightmare, affections of the heart, hypochondriasis, &c.

Sleep Disease. A fatal malady, said to be peculiar to the Ethiopian race, and to be met with, chiefly, in Congo. The prominent symptom is a great tendency to sleep, which may become more and more continuous, and terminates in death.

Sleep, Magnet'ic, *Hypno'sis biomagnet'ica,* is the sleep induced by the so-called animal magnetism. See Magnetism, animal.

Sleep, Ner'vous, see Magnetism, animal — s. Winter, Hibernation.

Sleep'lessness, Insomnia.

Sleep'walking, Somnambulism.

Sliacs, Min'eral Wa'ters of. Sliacs is a favorite bathing-place in Hungary, a few miles from Neusohl. Some of the waters are cold; others, thermal: the former are carbonated chalybeates; the latter are much used in the same cases as thermal springs in general.

Sli'ding of the Flap, see Flap.

Slieve'fish, Sepia.

Sling, ([G.] Schlinge,) *Mitel'la, Mit'rium,* (F.) *Écharpe.* A bandage employed to keep the forearm bent on the arm, in cases of injury done to those parts, in fracture of the clavicle, injury of the hands, &c. A handkerchief is often sufficient for this purpose. It must be folded diagonally, and be tied, by the extremities, round the neck. The French surgeons have used many varieties of *Écharpes* or *Slings;* as the *Grande écharpe, Écharpe moyenne, Petite écharpe, Écharpe de J. L. Petit,* &c.

Slip'pers, Impatiens.

Slit and Tail Ban'dage, Invaginated bandage.

Slob'bering, Slavering.

Sloe, ([Sax.] ɣla,) Viburnum prunifolium.

Sloe'tree, Prunus spinosa.

Sloke, Green, Ulva latissima.

Slops, *Slop diet.* (Slop is, probably, the past participle of *slip.*) Liquid food, which is largely watery, and contains little that is nutritious.

Slough, ([Sax.] ɣloȝ,) Eschar.

Slough'ing, (from *slough,*) see Eschar.

Slo'ven Wood, Artemisia abrotanum.

Slows, Milksickness.

Slug, ([D.] *slak,*) Limax—s. Sea, Biche de Mer.

Slug'gish Lay'er. In the passage of blood corpuscles through the capillaries, a few of them adhering and tearing themselves away, to again move slowly onward, constitute the *sluggish layer.*

Slum'ber, ([Sax.], ɣlumeɲan, 'to slumber,') Somnolency.

Small'age, Apium graveolens.

Small-pox, Variola — s. Abortive, Varioloid — s. Confluent, see Variola — s. Corymbosa, see Variola — s. Discrete, see Variola — s. Hemorrhagic, see Variola—s. Modified, Varioloid—s. Petechial, see Variola — s. Varicelloid, see Variola.

Smalt, ([G.] Schmalte,) *Protox'ide of Co'balt, Smal'tum, Safre, Zaffre, A'zur, Blue Starch.* This oxide has been given in rheumatism, in the dose of ten to twenty grains. A larger quantity excites vomiting.

Smarag'dus, (*σμαραγδος,*) (F.) *Émeraude.* The emerald. It was formerly regarded as a tonic.

Smart'weed, Polygonum hydropiper, P. punctatum.

Smear'case, see Cheese.

Smec'tica, (*σμηκτικος,* 'cleansing,') Detergents.

Smec'tis, (*σμηκτις,*) Cimolia terra.

Smec'tris, (*σμηκτρις,*) Cimolia terra.

Smeg'ma, gen. *Smeg'matis,* (*σμηγμα,* gen. *σμηγματος,* from *σμηχειν,* 'to wipe, to cleanse.') Soap, grease, a salve, a liniment. Also, the secretion from the sebaceous follicles of the skin.

Smeg'ma Articula'rē, Synovia — s. Cutaneum, see Sebaceous glands.

Smeg'ma Præpu'tii, *Se'bum præputia'lē.* The fatty secretion from the sebaceous follicles of the glans penis.

Smegmatorrhœ'a, (*smegma,* and *ῥεω,* 'I flow,') Stearrhœa.

Smegmorrhœ'a, Stearrhœa.

Smell, Sense of, Olfaction.

Smell'ing, Olfaction.

Smel'lome's Oint'ment for the Eyes, Ceratum resinæ.

Smi'lacin, see Smilax sarsaparilla.

Smilaci'na Racemo'sa, (from *smilax,*) *False Spike'nard;* indigenous; *Ord.* Liliaceæ; is said to be alterative, diuretic and diaphoretic.

Smi'lax, gen. *Smi'lacis,* (σμιλαξ,) Taxus baccata — s. Aspera Chinensis, Smilax China — s. Aspera Peruviana, Smilax sarsaparilla — s. Canellæfolia, S. pseudochina.

Smi'lax Chi'na, *S. as'pera Chinen'sis. Ord.* Smilaceæ. *Sex. Syst.* Diœcia Hexandria. The root, *China, C. orienta'lis* seu *pondero'sa* seu *ve'ra, Sankira, Gauquava, Chi'na root,* (F.) *Squine, Esquine, Racine de Chine,* was formerly much employed in cutaneous and venereal affections.

Smi'lax Glau'ca; indigenous; has similar virtues to those of Sarsaparilla.

Smi'lax Hederæfo'lia, S. pseudochina — s. Indica spinosa, Smilax pseudochina — s. Officinalis, Smilax sarsaparilla.

Smi'lax Pseudochi'na, *S. In'dica spino'sa* seu *canellæfo'lia* seu *hederæfo'lia, Chi'na occidenta'lis* seu *spu'ria nodo'sa, Amer'ican* or *West India Chi'na.* In scrofulous disorders, the root has been often preferred to the oriental kind. In other cases it possesses similar virtues.

Smi'lax Sarsaparil'la, *S. Officina'lis, Sarsaparil'la, Jamai'ca Sarsaparil'la, Sartaparil'la, Smi'lax as'pera Peruvia'na, Sar'za, Sar'sa, Carivillan'di, I'va Pecan'ga, Macapat'li, Zar'za, Zarzaparil'la,* (F.) *Salsepareille.* The root of this and other species of Smilax, *Sarsaparilla,* (Ph. U. S., 1873,) *Sarsæ Ra'dix,* (Ph. B., 1867,) is inodorous; taste bitterish, feculaceous, and fibrous; of a dark color externally; white within. It is possessed of diuretic and demulcent properties, and has been often employed in the sequelæ of syphilis; when, after a mercurial course, nocturnal pains, ulcerations, &c., continue. It has, also, been advised in scrofula, chronic rheumatism, &c.; but its efficacy is, to say the least of it, a matter of doubt. Dose, ℈j. to ʒj. of the powder. It is obtained from Honduras, Brazil, and Peru—the varieties being called respectively, *Honduras,* (F.) *Salsepareille de Honduras; Brazil,* (F.) *S. de Brésil* ou *de Portugal,* and *Peruvian Sarsaparilla,* (F.) *S. de Pérou* ou *Caraque.*

A principle called *Smi'lacin* or *Sarsaparil'lin* or *Parag'lin* has been obtained from it.

Smi'lax Tamnoï'des; indigenous; has similar properties.

Smi'lê, (σμιλη.) A curved, two-edged bistoury. A knife.

Smi'lion, (σμιλιον, dim. of *smile,*) Scalpel.

Smit, (participle of *smite,*) Contagion.

Smit'tle, see Contagious.

Smyr'na, (σμυρνα,) Myrrha.

Smyrnis'mus, (from *smyrna,*) Embalming.

Smyr'nium Olusa'trum, *Smyr'nium,* (from *smyrna;* the odor of the seeds resembling that of myrrh,) *Hipposeli'num, Macero'na, Macedonis'ium, Her'ba Alexandri'na, Gri'elum, Agrioseli'num, Alexan'ders, Alsan'ders.* A plant formerly cultivated for culinary purposes. The seeds are bitter and aromatic, and the roots more powerfully bitter. They have been recommended as resolvents, diuretics, emmenagogues, &c.

Snag. A tooth standing alone or projecting beyond the others.

Snag'gleteeth, Odontoparallaxis.

Snag'rel, Aristolochia serpentaria.

Snail, ([Sax.] ꝑnæġl,) Limax — s. Shell, Cochlea.

Snail Track. An aphthous ulceration of the throat met with in the second stage of syphilis

Snake'head, Chelone glabra.

Snake, Hood'ed, Cobra di Capello — s. Spectacled, Cobra di Capello.

Snake'root, Garuleum bipinnatum — s. Birthwort, Aristolochia serpentaria — s. Black, Actæa racemosa, Sanicula Marilandica — s. Button, Eryngium aquaticum, Liatris spicata—s. Canada, Asarum Canadense — s. Dewitt, Prenanthes — s. Evergreen, Polygala paucifolia — s. Heart, Asarum Canadense — s. Virginia, Aristolochia serpentaria — s. White, Eupatorium ageratoides.

Snake'weed, Aristolochia serpentaria, Helenium autumnale, Polygonum bistorta — s. American, Cicuta maculata.

Snaps, Phaseolus.

Sneeze'wort, Achillea ptarmica, Helenium autumnale.

Sneez'ing, ([Sax.] nieꝛan, [G.] n i e s e n, 'to sneeze,' an example of onomatopœia,) *Clo'nus Sternuta'tio, Sternuta'tio, Sternutamen'tum, Sternumen'tum, Ptar'mus,* (Sc.) *Nees'ing,* (F.) *Éternuement.* A convulsive motion of the expiratory muscles, by which the air is driven rapidly, and rushes sonorously, through the nasal fossæ, carrying with it the mucus and foreign bodies which adhere to the pituitary membrane, and have occasioned the movement.

There are many customs and superstitions connected with the act of sneezing, suggested probably by the violent concussion it gives the frame. "Most grandmothers will exclaim, 'God bless you!' when they hear a child sneeze, and they sum up the philosophy of the subject with the following lines:

> Sneeze on a Monday, you sneeze for danger;
> Sneeze on a Tuesday, you kiss a stranger;
> Sneeze on a Wednesday, you sneeze for a letter;
> Sneeze on a Thursday, for something better;
> Sneeze on a Friday, you sneeze for sorrow;
> Sneeze on a Saturday, your sweetheart to-morrow;
> Sneeze on a Sunday, your safety seek,
> The devil will have you the whole of the week."
>
> ["*Lancashire Folklore,*" in *Public Opinion,* March 9, 1867.]

Snir'rels, Nares.

Snob, Nasal mucus.

Sno'ring, (*Snore,* ([Sax.) ꝑnopa,) *Rhen'chus, Ren'chus, Rhenx'is, Ron'chus, Rhon'chus, Ster'tor,* (Sc.) *Row'ting,* (F.) *Ronflement.* Noise made in the posterior part of the mouth and nasal fossæ during the movements of inspiration, particularly in sleep, both when the person is in health, and in disease, as in apoplexy. In certain affections of the chest — in some cases of pulmonary catarrh — a kind of snoring may be distinctly heard by applying the ear or the stethoscope to the chest.

Snot, Nasal mucus.

Snoth, Nasal mucus.

Snout, ([D.] *snuit,*) Nasus.

Snow, ([Sax.] ꝑnap,) *Nix, Chi'on,* (F.) *Neige.* Water in a solid state, which falls from the atmosphere in white flakes. It is used externally as a tonic and discutient.

Snow'ball, Cephalanthus occidentalis.

Snow'berry, Symphoricarpus racemosus.

Snow'blind'ness, *Niphablep'sia.* Blindness produced by the reflection of the solar light from snow. As a preventive, *Snow-eyes* are used by the Esquimaux. These are made of extremely light wood, with a bridge resting on the nose like spectacles, and a narrow slit for the passage of the light.

Snow'drop Tree, Chionanthus Virginica.

Snow-eyes, see Snowblindness.

Snuff, Cephal'ic, ([D.] *snuif,*) Pulvis asari compositus.

Snuf'fles, ([D.] *snuffelen,* 'to breathe hard through the nose,' probably an example of onomatopœia,) *Grave'do neonato'rum, Rhinan'gia*

Rhinanch'onē. Breathing hard through the nose, often owing to accumulation of the mucous secretions, — an affection to which infants are liable, and which is relieved by oiling the interior of the nostrils.

Snurle, Coryza.

Snurles, Nares.

Soap, ([Sax.] ȝape,) Sapo — s. Acid, see Sapo —s. Bark, see Quillaya saponaria—s. Berries, Sapindus saponaria — s. Black, see Sapo — s. Castile, Sapo durus — s. of Cocoanut oil, see Sapo — s. Common or soft, see Sapo — s. of Guaiac, Sapo guaiacinus — s. Liquid, see Sapo — s. Medicinal, see Sapo — s. Plaster, Emplastrum saponis — s. Spanish, Sapo durus — s. Starkey's, see Sapo — s. Yellow, see Sapo.

Soap'wort, Saponaria.

Sob, *Singul'tus,* ([Sax.] ȝeoȝian, 'to grieve,' probably an example of onomatopœia,) (F.) *Sanglot.* A spasmodic, sudden, and momentary contraction of the diaphragm, immediately followed by relaxation, by which the little air that the contraction has caused to enter the chest is driven out with noise. It is an evidence of corporeal or mental suffering.

Sob'by, Corpulent.

Sob'oles, 'offspring,' Epigone.

Sobri'etas, Temperance.

So'cia Paro'tidis, 'companion of the parotid,' see Parotid.

So'cial E'vil, Prostitution.

Soci'ety, *Soci'etas,* (F.) *Société,* (*socius,* 'a companion.') An association for the promotion of some common object.

Soci'eties, Med'ical. Associations of medical gentlemen for the promotion of science have been numerous, and productive of valuable results. In the United States, societies exist in many of the States, possessing the power of examining into the qualifications of every one who may be desirous of practising within their particular jurisdiction. In some of the States, however, the qualified and unqualified are permitted to exercise their profession with equal privileges and immunities.

Among the medical associations that have issued from time to time useful transactions or publications are the following: In America, — The *Massachusetts Medical Society;* the *Physico-medical* and *Medical Societies of the State of New York;* the *College of Physicians* and the *Pathological Society of Philadelphia;* and the *American Medical Association.* In Europe,—The *Association of Fellows und Licentiates af the King's and Queen's College of Physicians of Ireland;* the *Medico-chirurgical* and *Phrenological Societies of Edinburgh;* the *College of Physicians,* the *Medico-chirurgical,* the *Medical,* the *Sydenham, New Sydenham,* the *Pathological,* the *Epidemiological,* and *Obstetrical Societies* of London; the *Associated Apothecaries* and *Surgeon Apothecaries of England and Wales,* and the *Provincial Medical and Surgical Association;* the *Académie de Chirurgie,* the *Société Médicale d'Emulation,* the *Société de Médecine,* the *Académie de Médecine,* the *Société Médicale d'Observation,* and the *Société de Biologie,* of Paris; the *Medico-chirurgical Academy of Vienna;* the *Medical Societies of Berlin and Copenhagen,* &c., &c. In Asia, — The *Medical and Physical Society of Calcutta.*

Valuable medical essays are likewise contained in the published *Transactions of the American Philosophical Society;* the *Royal Societies of London, Edinburgh, Göttingen,* &c.; the *Imperial Academy of Sciences of Paris;* the *Imperial Society of Sciences of St. Petersburg and Vienna;* the *Royal Academy of Sciences of Turin;* the *Academia Imperialis Leopoldina Naturæ Curiosorum,* &c.

Sock'et of the Eye, Orbit — s. of the Teeth, see Alveolus.

Socor'dia, (*socors,* gen. *socordis,* from *se,* 'separation,' and *cor,* gen. *cordis,* 'heart,') 'without intellect,' Hallucination.

So'da. (An Arabic word,) (F.) *Soude. Protox'ide of sodium* is obtained by adding *caustic lime* to a solution of *carbonate of soda.* The soda in solution may be obtained by evaporation as hydrate of soda. *Soda* (Ph. U. S., 1873) is procured by the evaporation of solution of soda until ebullition ceases. The French Codex (1866) has a formula for *Soude caustique liquide, Lessive de Savonniers.* Its action is like that of potassa.

So'da impu'ra, Baril'la, Barig'lia, Baril'lor, So'da Hispan'ica, Ana'tron, Na'tron, Ana'ton, Ni'trum Antiquo'rum, Kelp, Aphroni'trum, Sal alkali'nus fix'us fos'silis, Carbo'nas So'dæ impu'rus, Subcarbo'nas So'dæ impu'ra, Ana'chron, the *mineral alkali,* is obtained from several sources: — naturally, in Egypt; artificially, from the incineration of marine plants; and from the decomposition of sulphate of soda, &c. It is principally, however, derived from plants growing on the seacoast; — as the *Sal'sola sati'va, S. soda, S. tragus, Salicor'nia herba'cea, Salicornia Arab'ica,* &c., which are, collectively, called *varec* or *varech,* corrupted in the Channel Isles to *vraic* and *vraich,* where they are extensively used as manure. The cutting of these plants is there called *vraiching.* The *Barilla ashes* are from the ashes of the *Salicor'nia Europæ'a;* — the *Kelp,* (F.) *Soude de Varecq,* from the *Fucus vesiculo'sus* and other varieties; — the *Turkey Barilla, Roquette, Cendre du Levant, Rochet'ta Alexandri'na,* from the *Mesembryan'themum Cop'ticum;* — the *Al'icant Barilla, Soda Alicanti'na* seu *Alonen'sis,* from the *Mesembryan'themum nodiflo'rum;* — and the *Carthage'na Barilla,* from the *Salicor'nia* and *Sal'sola.*

Impure subearbonate of soda, (F.) *Soude du commerce,* consists of subearbonate of soda, potash, chloride of sodium, clay, and other earthy substanees. It is chiefly used for preparing the pure subearbonate.

So'da, Cardialgia, Cephalalgia, Pyrosis.

So'da Aceta'ta, *Sodæ Acc'tas, So'dii Ace'tas, Ac''etate of So'dium, Ac''etate of Soda, Ter'ra folia'ta minera'lis,* (F.) *Acétate de soude.* This salt is used in similar cases with the acetate of potassa.

So'da Aëra'ta, Sodæ carbonas — s. Alonensis, Soda — s. Arseniate of, Arseniate of soda.

So'da, Ben'zoate of, *Sodæ Ben'zoas,* (F.) *Benzoate de Soude.* This salt has been used in gout and rheumatism to eliminate urie acid. It is prepared by saturating a solution of benzoic acid with carbonate of soda.

So'da, Bibo'rate of, Borax—s. Bicarbonate of, Soda, carbonate of — s. Bicarbonate of, Commercial, Sodii bicarbonas venalis — s. Bilate of, Picromel — s. Borate of, Borax — s. Boraxata, Borax.

So'da, Car'bonate of, *Sodæ Carbo'nas* seu *Bicarbo'nas, So'dii Bicarbo'nas,* (Ph. U. S., 1873,) *Carbo'nas Na'tricum, So'da Aëra'ta, Bicarbonate of Soda, Carbonate of protox'ide of So'dium, Bicarbonate of Sodium,* (F.) *Carbonate de Soude, S. effervescente* ou *aérée* ou *crayeuse, Carbonate de Soude Saturée.* Made from powdered *commercial bicarbonate of sodium* by pereolation, and drying on bibulous paper. Its use is the same as the subcarbonate, than which it is less caustie, and better adapted for effervescing draughts.

So'da Caus'tica, *Protox'ide of So'dium, Caus'tic Soda,* (F.) *Soude caustique, S. à la Chaux, Soude pure.* (The impure subearbonate, treated by quicklime, and consequently deprived of its carbonic acid.) It may be used as a caustic like

the *Potassa fusa*, and is even preferable to it, as it does not deliquesce and run.

So'da, Chlo'ride of, *S. Chlorina'ta, So'dæ Chlo'ridum* seu *Chlorure'tum, Chlo'rinated Soda, Natrum Oxymuriat'icum, Oxymu'riate of Soda*, (F.) *Chlorure de Soude, Chlorure d'oxide de Sodium.* This salt is used as a disinfecting agent; both to remove offensive smells in chambers, and to alter the condition of fetid ulcers. See Liquor sodæ chlorinatæ.

So'da, Chlo'rinated, Soda, chloride of — s. Citrate of, Sodæ citras.

So'da, Efferves'cent Ci'tro-tar'trate of, *So'dæ Ci'tro-tar'tras Efferves'cens.* (*Sodæ Bicarb.* pulv., ℥xvij., *Acid. tartaric.* pulv., ℥viij., *Acid. citric.* pulv., ℥vj. Mix thoroughly, place them in a dish or pan heated to between 200° and 220°, and when the particles begin to aggregate, stir them until they assume a granular form. Then, by means of suitable sieves, separate the granules of uniform size. Ph. B., 1867.) Dose, ʒj. to ʒij.

So'da Hispan'ica, see Soda — s. Hydrochlorate of, Soda, muriate of — s. Hypophosphite of, Sodii hypophosphis.

So'da, Hyposul'phite of, *Hyposul'phite of So'dium, So'dii hyposul'phis, Sodæ hyposul'phis*, (F.) *Hyposulfite de Soude.* This salt has been absurdly over-extolled in chronic cutaneous, and scrofulous affections, and especially in tuberculosis of the lungs, and in all the cases in which the sulphite of soda seems to be indicated. See Sodæ sulphis. Dose, gr. x. and more, in syrup.

So'da Impu'ra, see Soda — s. Lithate of, Urate of soda — s. Mephite of, Soda, subcarbonate of.

So'da Mint. A combination of *bicarbonate of sodium*, ʒj., *aromatic spirits of ammonia*, fʒj., *spearmint water*, fʒij. Dose, fʒss.–fʒj. for an adult; fʒss.–fʒij. for an infant.

So'da, Mu'riate of, *S. muria'ta* seu *muriat'ica, Al'kali minera'lē sali'num, So'dæ mu'rias, Sal commu'nis* seu *culina'ris* seu *fos'sium* seu *gem'mæ* seu *mari'nus* seu *al'bus* seu *fos'silis* seu *lu'cidum, Muria, Na'tron muria'tum, Na'trum muriat'icum, Hydrochlo'rinas Na'tricus, Chlorure'tum So'dii, So'dii Chlo'ridum, Com'mon salt, Sea salt, Rock salt, Bay salt, White salt, Quadrichlo'ruret of So'dium, Hydrochlo'rate of protox'ide of So'dium, Hydrochlo'rate of Soda, Chlo'ride of So'dium*, (F.) *Chlorure de Sodium, Sel marin, Sel de Cuisine.* In an impure state, this salt is one of the most abundant of natural productions. It is soluble in 3 parts of water, and is tonic, purgative, and anthelmintic; externally, stimulant. It is a well-known and useful culinary substance. It has been recommended as an antiperiodic in the dose of ʒss. or ʒj.

So'da, Ni'trate of, *So'dæ Ni'tras* seu *Azo'tas, Sodii Nitras*, (Ph. U. S., 1873,) *Na'tron* seu *Na'trum ni'tricum, Ni'tras na'tricus, Al'kali minera'lē nitra'tum, Ni'trum rhomboida'lē* seu *cu'bicum, Ni'tras Na'tricum, Salpe'tra, Ni'trate of Soda, N. of So'dium, Protoni'trate of So'dium, Cu'bic Ni'tre.* Occurs, native, in Peru, but may be made by neutralizing *carbonate of soda* by *nitric acid*, evaporating, and crystallizing.

Its virtues are similar to those of nitrate of potassa, for which it has sometimes been substituted.

So'da, Ni'trite of. (Made by heating a mixture of *nitrate of soda* and *charcoal* in a crucible to dull redness. When the salt has become white, raise the heat to melt it, pour it on a clean flagstone, break it into fragments, and preserve in a stoppered bottle.) Formerly used in the preparation of Spiritus Ætheris Nitrosi (Ph. B.).

So'da, Oxymu'riate of, Soda, chloride of.

So'da, Phos'phate of, *Phos'phate of So'dium, So'dii Phos'phas*, (Ph. U. S., 1873,) *S. Phospho-ra'ta, Sodæ phos'phas, Phosphas Na'tricum, Natrum Oxphosphoro'des, Sal mirab'ilē perla'tum, Alkali minera'lē phosphora'tum, Subphos'phate of protoxide of So'dium, Subprotophos'phate of So'dium, Subphosphate of Soda, Triba'sic phosphate of Soda, Taste'less purg'ing salt*, (F.) *Phosphate de Soude, Sel admirable perlé.* (*Bone* calcined to whiteness and in fine powder, ℥cxx., *Sulphuric acid*, ℥lxxij., *Carbonate of sodium, Water*, each q. s. Mix the powder with the acid in an earthen vessel, add a gallon of water, and stir. Digest for three days, occasionally adding a little water to replace that lost by evaporation, and frequently stirring the mixture. Pour in now a gallon of boiling water, and strain through muslin, gradually adding more boiling water, until the liquid passes nearly tasteless. Set the strained liquor by, that the dregs may subside, from which pour off the clear solution, and boil down to a gallon. To the concentrated liquid, poured off from the dregs and heated in an iron vessel, add by degrees the carbonate of sodium previously dissolved in hot water, until effervescence ceases, and the phosphoric acid is completely neutralized; then filter the liquid and set it aside to crystallize. Having removed the crystals, add, if necessary, a small quantity of carbonate of sodium to the liquid, so as to render it slightly alkaline; then alternately evaporate and crystallize so long as crystals are produced. Keep in a well-stoppered bottle. Ph. U. S., 1873.) Cathartic dose, ʒss. to ʒj.

So'da, Phos'phate of, Triba'sic, S. phosphate of.

So'da Pow'ders, see Powders, Soda — s. Springs, see Water, mineral (gaseous).

So'da, Sil'icate of, *So'dæ Sil'icas, Sol'uble Glass.* Internally it is supposed to promote the discharge of uric acid by the kidneys; externally, it is employed like silicate of potassa, for immovable bandages.

So'da, Subcar'bonate of, *Sodæ Subcarbo'nas, S. Carbo'nas*, (Ph. U. S., 1863,) *Sodii Carbo'nas*, (Ph. U. S., 1873,) *Na'tron præpara'tum, Sal Sodæ, S. al'kali, Flos salis, Sagi'men Vi'tri, Car'bonate of So'da, Car'bonate of So'dium, Salt of Soda* or *of Baril'la, Subcar'bonate of protox'ide of So'dium, Meph'ite of Soda*, (F.) *Sous-carbonate de Soude, Sel de Soude.* The impure carbonate, dissolved in water; the solution filtered and crystallized. Soluble in two parts of water at 60°. Used as an antacid, and a deobstruent in scrofulous and other affections. Dose. gr. x. to ʒss.

The *dried Carbonate* or *Subcar'bonate of Soda*, or *Sodium, Sodæ subcarbo'nas exsicca'ta, Sodæ carbo'nas exsicca'ta, Sodii carbonas exsiccata*, (Ph. U. S., 1873,) *Carbo'nas Sodæ sicca'tum*, (F.) *Sous-carbonate de Soude desséché*, is employed as an antacid and lithontriptic. Dose, gr. x. to xv.

So'da, Subphos'phate of, S. phosphate of.

So'da, Sul'phate of, *Sulphate of Sodium, Sodæ Sul'phas, Sodii Sulphas*, (Ph. U. S., 1873,) *Na'tron vitriola'tum Sal cathar'ticus* seu *mirab'ilis Glauberi, Al'cali minera'lē sulphu'ricum, Na'trum sulphu'ricum, So'da vitriola'ta, Sul'phas na'tricus, Ape'rient Salt of Frederick, Glauber's Salt*, (F.) *Sulfate de Soude, Sel de Glauber.* (Obtained from the salt that remains after the distillation of muriatic acid, the superabundant acid being saturated with subcarbonate of soda.) It is soluble in three parts of water at 60°, is purgative, and in small doses diuretic. Dose, ʒvi.–x.

The *Lymington Glauber's Salts* is a *Sulphate of Magnesia and Soda*, and is obtained from the mother-liquor of sea-water, or by dissolving Epsom salt in a solution of Glauber's salt.

So'da, Sul'phite of, Sodæ sulphis — s. Sulphovinate of, Sulphovinate of soda.

So'da, Tar'trate of, *Tar'trate of Potas'sa and Soda, Tar'trate of So'dium and Potassium, Tartarized* or *Tartarated Soda, Rochelle* or *Seignette's Salt, Soda Tartariza'ta, Soda Tartarata, Sal Rupellen'sis* seu *Seignet'ti* seu *Polychres'tum Seignetti, Na'tron tartariza'tum, Tar'tras Potas'sæ et Sodæ, Sodæ et Potas'sæ Tar'tras*, (Ph. U. S., 1851,) *Potassæ et Sodæ Tar'tras*, (Ph. U. S., 1863,) *Potassii et Sodii Tar'tras*, (Ph. U. S., 1873,) *Sodæ*

potas'siotar'tras, Tar'tras Potas'sæ et Sodæ, (F.) *Tartrate de potasse et de Soude, Sel de Seignette.* (*Sodæ carb.*, ℥xij., *Potass. bitart.* in pulv., ℥xvj., *Aq. bullient.*, Ov. Dissolve the carbonate in the water, and add gradually the bitartrate. Filter the solution, evaporate and crystallize. Ph. U. S.) It is a gentle cathartic. Dose, ℥ss. to ℥j.

So'da, U'rate of, Urate of soda — s. Valerianate of, Sodæ valerianas — s. Vitriolata, S. sulphate of.

So'da and Sil'ver, Hyposul'phite of, Sodæ et Argenti hyposulphis.

So'da Wa'ter, Acidulous water, simple.

So'dæ Ace'tas, Soda, acetate of — s. Arsenias, Arseniate of soda — s. Azotas, Soda, nitrate of — s. Benzoas, Soda, benzoate of — s. Biboras, Borax — s. Bicarbonas, Soda, carbonate of — s. Boras, Borax — s. Boras alcalescens, Borax — s. Boras supersaturus, Borax — s. Carbonas, Soda, subcarbonate of — s. Carbonas exsiccatus, see Soda, subcarbonate of — s. Carbonas impurus, Soda — s. Chloras, Soda, chlorate of.

So'dæ Ci'tras, *Cit'rate of So'da.* A white salt formed by saturating a solution of citric acid with bicarbonate of soda. It is a pleasant purgative, with properties similar to those of citrate of magnesia. Its dose is from eight to twelve drachms in aqueous solution, or acidulated with citric acid and sweetened.

So'dæ Ci'tro-tar'tras Efferves'cens, Soda, citro-tartrate of, effervescent — s. Hyposulphis, Sodii hyposulphis — s. Murias, Soda, muriate of — s. Nitras, Soda, nitrate of — s. Phosphas, Soda, phosphate of — s. Potassiotartras, Soda, tartrate of — s. Subboras, Borax — s. Subcarbonas impura, Soda.

So'dæ Sul'phis, *Sodii Sulphis*, (Ph. U. S., 1873,) *Sul'phite of So'da, Sul'phite of So'dium*, may be made by passing a stream of *sulphurous acid gas* into a strong solution of *carbonate of soda*, digesting the solution with *sulphur* at a gentle heat for several days, evaporating, and crystallizing. Like sulphurous acid, it has been used to arrest fermentation, as in yeast vomiting, and in zymotic diseases in general; the sulphurous acid, it is imagined, being set free by the acid of the yeasty matter. Dose, ℥j. three times a day. On a similar hypothesis, it has been used locally in sore mouth presumed to be of parasitic origin, ℥j. of the salt to f℥j. of water. It has also been given in intermittents. See Potassii sulphis.

So'dæ Valeria'nas, *Vale'rianate of Soda*, was admitted into the Pharmacopœia of the United States for 1863, but dismissed in that of 1873. It is chiefly employed for obtaining the other valerianates.

So'dæ et Argen'ti Hyposul'phis, *Hyposul'phite of Soda and Silver*, (F.) *Hyposulphite de Soude et d'Argent.* (This salt is formed by pouring a solution of *hyposulphite of soda* over *oxide of silver* recently precipitated by *potassa*, until the oxide is entirely dissolved. Crystals are afforded by evaporation.) A solution of it is used in the same cases as one of the nitrate of silver.

So'dæ et Potas'sæ Tar'tras, Soda, Tartrate of.

So'den, Min'eral Waters of. This town, in Nassau, near Frankfort, contains several springs, which are either alterative aperients or markedly tonic.

So'dii Ace'tas, Soda acetata — s. Arsenias, Arseniate of soda — s. Auroterchloridum, see Gold — s. Bicarbonas, Soda, carbonate of — s. Boras, Borax.

So'dii Bicarbo'nas Vena'lis, (Ph. U. S., 1873,) *Commer'cial Bicar'bonate of So'dium.* A white opaque powder, containing variable amounts of soda not fully saturated with carbonic acid. *Sodæ bicarbonas* (Ph. U. S., 1873) is obtained from it.

So'dii Bro'midum, *Bro'mide of So'dium.* A salt resembling in its dose and properties the bromide of potassium, but containing more bromine.

So'dii Carbo'nas, Soda, subcarbonate of — s. Carbonas exsiccata, Soda, subcarbonate of — s. Chloridum, Soda, muriate of — s. Chloruretum. Soda, muriate of.

So'dii Hyposul'phis, *Hyposul'phite of So'dium, H. of Soda.* A salt of soda in combination with hyposulphurous acid, used for the same purposes as the sulphite. Dose, gr. x.–xx., three times daily; externally, ℥j. dissolved in f℥j. of water. See Sulphurous acid.

So'dii Io'didum, *Iodide of So'dium.* This salt has been prescribed in the same cases as the iodide of potassium, especially in syphilis.

So'dii Ni'tras, Soda, nitrate of — s. Phosphas, Sodæ phosphas — s. Sulphas, Soda, sulphate of — s. Sulphis, Sodæ sulphis; see Potassii sulphis.

So'dium, *Na'trium, Natro'nium*, (from *soda.*) The metallic basis of soda.

So'dium, Ac''etate of, Soda acetata — s. Arseniate of, Arseniate of soda — s. Bicarbonate of, Sodæ carbonas — s. Bicarbonate of, commercial, Sodii bicarbonas venalis — s. Borate of, Borax — s. Bromide of, Sodii bromidum — s. Carbonate of, Soda, subcarbonate of — s. Carbonate of, dried, see Soda, subcarbonate of — s. Chloride of, Soda, muriate of — *s. Chlorure de*, Soda, muriate of — *s. Chlorure d'oxide de*, Soda, chloride of — s. Hypophosphite of, Sodii hypophosphis — s. Hyposulphite of, Soda, hyposulphite of — s. Iodide of, Sodii iodidum — s. Nitrate of, Soda, nitrate of — s. Phosphate of, Sodæ phosphas — s. Protonitrate of, Soda, nitrate of — s. Protoxide of, Soda — s. Protoxide of, hydrochlorate of, Soda, muriate of — s. Protoxide of, nitrate of, Soda, nitrate of — s. Protoxide of, phosphate of, Soda, phosphate of — s. Protoxide of, subcarbonate of, Soda, subcarbonate of — s. Quadrichloruret of, Soda, muriate of — s. Subborate of, protoxide of, Borax — s. Subprotoborate of, Borax — s. Subprotophosphate of, Soda, phosphate of — s. Sulphate of, Soda, sulphate of — s. Sulphocarbolate of, see Sulphocarbolate.

Sod'oma Gallo'rum, (*Sodom*, and *Galli*, 'the French,') Syphilis.

Sodom'ia, (from *Sodom*, 'the sin of Sodom,') Buggery.

Sod'omy, Buggery.

Sœm'mering, Fora'men of, F. of Sœmmering — S. Gray substance of, Peduncles of the brain.

Soft'ening, (from [Sax.] ȝopȝ,) Mollities — s. of the Brain, Mollities cerebri — s. Mucoid or Mucous, see Mucoid.

Soi-pour-soi, 'self for self,' Homœozygy.

Soie, (originally from [L.] *seta*, 'a bristle' [?],) Sericum.

Soif, (from [L.] *sitis*,) Thirst — *s. Excessive*, Polydipsia.

Sol, 'the sun,' Gold.

Solaire, Solar.

Sola'men Intestino'rum, (from *solor*, 'I comfort,') Pimpinella anisum — s. Scabiosorum, Fumaria.

Sola'nia, see Solanum dulcamara.

Sol'anin, see Solanum dulcamara.

Sol'anoid, *Solanoï'des*, (*solanum*, 'the potato,' and εἶδος, 'resemblance.') Resembling a potato; potato-like. An epithet applied to a form of cancer, *Solano'ma*, which appears to be intermediate between scirrhus and encephaloid, increasing more rapidly than the former, yet approaching it in firmness.

Solano'ma, (from *solanum tuberosum* — 'the potato,' and *oma*,) see Solanoid.

Sola'num, (from *solor*, 'I soothe' [?],) *S. ni'grum* seu *vulga'rē* seu *vulga'tum, Com'mon* or *Gar'den Night'shade*, (F.) *Morelle à fruit noir. Family,* Solanaceæ. *Sex. Syst.* Pentandria Mono-

gynia. A narcotic poison. The *Huile de Morelle* is made by macerating in oil, for several days, the leaves and fruit of this plant. The oil is anodyne and discutient.

Sola'num Carolinen'sē, *Horse net'tle;* indigenous. The juice of the berries is said to have been employed successfully in idiopathic tetanus. [?]

Sola'num Dulcama'ra, *S. scan'dens* seu *ligno'sum, Dulcama'ra, D. flexuo'sa, Glycipi'cros, Ama'ra dul'cis,* Στρυχνος of Theophrastus, *Bit'tersweet, Wood'y Night'shade, Bit'tersweet Night'shade, Bit'tersweet Vine, Night'shade Vine, Vi'olet bloom,* (F.) *Douce-amère, Morelle grimpante, Vigne de Judée.* The taste of the young branches — *Dulcamara* (Ph. U. S.)—is bitter, followed by sweetness; hence its name. It has been used in many diseases as a diuretic and sudorific, especially in chronic rheumatism, humoral asthma, dropsy, various skin diseases, scrofula, and jaundice; but is of doubtful efficacy. Its virtues seem to depend on an alkaline principle, called *Solanin* or *Solania,* which is sometimes employed medicinally. Dose of dulcamara in powder, ℈j. to ʒj.

Sola'num Esculen'tum, S. tuberosum—s. Fœtidum, Datura stramonium—s. Furiosum, Atropa belladonna — s. Hortense nigrum, Atropa belladonna — s. Humboldtii, S. lycopersicum — s. Lethale, Atropa belladonna — s. Lignosum, S. dulcamara.

Sola'num Lycoper'sicum, *Lycoper'sicum esculen'tum, L. po'mum amo'ris* seu *Humbold'tii* seu *pseudolycoper'sicum, Ma'lum lycoper'sicum, Love'-apple plant.* The fruit of this, called *Toma'ta, Toma'to* or *Loveapple,* (F.) *Pomme d'Amour,* is much eaten in the United States; and with the French, Spaniards, Portuguese, &c., forms an esteemed sauce.

Sola'num Mag'num Virginia'num Ru'brum, Phytolacca decandra—s. Maniacum, Atropa belladonna, Datura stramonium — s. Melanocerasus, Atropa belladonna.

Sola'num Melon'gena, *Melon'gena, Egg-plant, Mad-apple plant,* (F.) *Aubergine.* A native of Asia, Africa, and America. Its oblong, egg-shaped fruit, *Pomum Melon'genæ, Ma'lum insa'num,* is prepared in soups and sauces, in those countries, like the tomato.

Sola'num Ni'grum, Solanum.

Sola'num Ni'veum. A South African plant; the leaves of which, applied to foul ulcers, cleanse them. The fresh juice of the berries and leaves, made into an ointment with lard or fat, is used by the farmers for the same purpose.

Sola'num Panicula'tum, *Jurubeb'a, Jurubeb'a.* A shrub of Brazil, where the juice of the bruised leaves and unripe fruit, and the plant itself and its root, are used as a tonic.

Sola'num Parmente'rii, S. tuberosum — s. Pseudolycopersicum, S. lycopersicum—s. Quadrifolium, Paris—s. Racemosum Americanum, Phytolacca decandra.

Sola'num Sanc'tum, *Pal'estine Night'shade.* The fruit of this is globular, and is much eaten in the countries where it is a native.

Sola'num Scan'dens, S. dulcamara.

Sola'num Tubero'sum, *S. esculen'tum* seu *Parmente'rii, Lycoper'sicum tubero'sum, Pa'pas America'nus, Pap'pus America'nus, America'num Tubero'sum, Batta'ta Virginia'na, Bata'tas;* the *Pota'to,* (F.) *Pomme de Terre, Parmentière.* A native of Peru. A nutritious and wholesome vegetable; one of the most useful, indeed, that exists. One hundred pounds of potatoes afford ten pounds of starch, which is equal to arrow-root as a nutrient and demulcent. It is called *Pota'to Flour, P. Starch, French Sa'go, Petit Sague, Com'mon Ar'rowroot,* &c.

Sola'num U'rens, Capsicum annuum—s. Vesicarium, Physalis.

Sola'num Virginia'num. Indigenous; is said to resemble Solanum nigrum in its properties.

Sola'num Vulga'rē, Solanum.

So'lar, *Sola'ris,* (F.) *Solaire,* (*sol,* gen. *solis,* 'the sun.') Relating to the sun; having rays like the sun.

So'lar Asphyx'ia, see Coup de soleil — s. Exhaustion, see Coup de soleil.

So'lar Plex'us, *Epigas'tric Plex'us, Plex'us sola'ris, Cen'trum commu'nē, Cer'ebrum abdomina'lē.* A collection of ganglions and filaments, interweaving and anastomosing with each other repeatedly, and belonging to the system of the great sympathetic. This vast plexus, lying on the vertebral column, the aorta, and the pillars of the diaphragm, has a very irregular shape. The ganglions and filaments composing it are soft, reddish, and almost all issue from the semilunar ganglions. It receives, also, branches from the pneumogastrics. It seems to be chiefly intended for the aorta, and accompanies all its branches; furnishing many secondary plexuses, which are called the *infradiaphragmatic, cœliac superior mesenteric, inferior mesenteric, renal* or *emulgent, spermatic,* &c.

So'lar Spec'trum, see Spectrum.

Soldanel'la, (from *solidare,* 'to make firm,') Convolvulus soldanella.

Sol'dier's Spots, Maculæ albæ—s. Weed, Matico.

Sole, ([Sax.] ꝑol,) *So'lum, S. pe'dis, So'lea,* (from *solum,* 'the ground,') *Ba'sis cor'poris, Ich'nus, Superfic''ies planta'ris pe'dis, Peti'na, Vestig''ium, Pe'dion, Pe'za, Pel'ma, Plan'ta, Planta'ris superfic''ies pe'dis, Fa'cies conca'va* seu *infe'rior* seu *Pla'num* seu *Conca'vum* seu *Pars infe'rior* seu *Planit'ies* seu *Plan'ta* seu *Vo'la pe'dis,* (F.) *Plante du Pied.* The sole of the foot; the under surface of the foot.

So'lea, Sole — s. Ipecacuanha, see Ipecacuanha.

Soléaire, Soleus.

So'len, gen. *Sole'nis,* (σωλην,) Canal, Cradle; see Solenarium, and Vertebral column.

Solena'rium, (σωληναριον, from σωλην, 'a canal, a pipe.') An instrument of surgery, representing a kind of gutter, in the cavity of which the penis was placed, like a limb in a *cradle.* The word *Solen* itself — σωλην, *Cana'lis* — was used, in antiquity, for a grooved channel or cradle, in which a fractured limb was placed.

Solenostem'ma (gen. *Solenostem'matis*) **Ar'gel,** Cynanchum oleæfolium.

Sole'us, *Gastrocne'mius inter'nus, Tibiocalcanien* (Ch.), (F.) *Soléaire,* (from *solea,* 'a sole of a shoe,' owing to its shape.) A muscle situate at the posterior part of the leg. It is broad, flat, and almost oval, and is attached, above, to the posterior edge of the fibula, to the oblique line on the posterior surface, and to the inner edge of the tibia. It terminates, below, by a large tendon, which unites to that of the gastrocnemius externus, to form the tendo Achillis. This muscle extends the foot on the leg, and conversely. See Gastrocnemii.

Solica'tio, (from *sol,* gen. *solis,* 'the sun,') Insolation.

Sol'id, *Sol'idus, Ste'reos,* (from *solum,* 'the ground.') A body whose integrant molecules are so united by the force of cohesion, that they will not separate by their own weight. The solids, in the human body, are the bones, cartilages, tendons, muscles, ligaments, arteries, veins, nerves, membranes, skin, &c. The anatomy, or rather study of the solids, is called *Stereol'ogy,* from στερεος, 'solid,' and λογος, 'a discourse.'

Solida'go, gen. *Solidag''inis,* (from *solidare,* 'to make firm,' in allusion to its properties as a vulnerary.) See Solidago virgaurea.

Solida'go Rig''ida, *Rig''id Gold'en rod, Bones' styp'tic;* indigenous; of the Composite *family*, flowering in August and September; is astringent and tonic.

Solida'go Saracen'ica, S. virgaurea.

Solida'go Virgaur'ea, *S. vulga'ris* seu *Saracen'ica, Vir'ga aur'ea, Her'ba do'rea, Cony'za co'ma aur'ea, Sym'phytum Petræ'um, Eli'chrysum, Consol'ida Saracen'ica, Gold'en rod,* (F.) *Verge d'or, Herbe des Juifs.* The leaves of *Solida'go odo'ra* — Solida'go, (Ph. U. S.,) — *Fra'grant* or *Sweetscented Golden rod* — and the flowers, have been recommended as aperients and tonics, in urinary diseases, and in internal hemorrhage.

Solida'go Vulga'ris, S. virgaurea.

Sol'idism, (from *solidus,* 'solid,') *Patholog''ia solida'ris.* The doctrine of those physicians who refer all diseases to alterations of the solid parts of the body. To the believers in this doctrine, the appellation *Sol'idists* has been given. The solidists think that the solids alone are endowed with vital properties; that they alone can receive the impression of morbific agents, and be the seat of pathological phenomena. Solidism has been the prevalent doctrine. It is scarcely necessary to say, that in all our investigations, the condition of both solids and fluids must be regarded.

Sol'idists, see Solidism.

So'lium, 'a bathing tub,' *Baignoire;* also, Tænia solium, (from *solus,* because considered to be found *solitary* or alone.)

Sollu'nar, *Solluna'ris,* (*sol,* 'the sun,' and *luna,* 'the moon.') An epithet applied to a fancied influence exerted by the sun and moon on man in a state of health and disease.

Solubil'ity, *Solubili'tas,* (*solvere, solutum,* 'to dissolve,' and *habilis,* 'able.') That property of a body by virtue of which it can be dissolved in a menstruum; when it is said to be soluble.

Sol'uble, *Solu'bilis.* Relaxing. Applied to the bowels when gently relaxed. See Solubility.

Sol'uble Glass, Potassa or Soda, silicate of.

Solum, Sole — s. Pedis, Metatarsus, Sole.

Soluté, (*solvere, solutum,* 'to dissolve,') Solution.

Solu'tio, Solution — s. Alexiteria Gaubiana, see Disinfection — s. Ammoniæ subcarbonatis, Liquor ammoniæ subcarbonatis — s. Arsenicalis, Liquor arsenicalis — s. Arsenicata, Liquor arsenicalis — s. Arsenitis kalicæ, Liquor arsenicalis — s. Calcis, Liquor calcis — s. Camphoræ ætherea, Tinctura ætherea camphorata — s. Camphoræ oleosa, Linimentum camphoræ — s. Continui, Solution of continuity—s. Cupri ammoniati, Liquor cupri ammoniati — s. Ferri nitratis, Liquor ferri nitratis — s. Guaiaci gummosa, Mistura guaiaci — s. Muriatis barytæ, Baryta, muriate of — s. Muriatis calcis, see Calcis murias — s. Muriatis ferrici ætherea, Tinctura seu alcohol sulfurico-æthereus ferri—s. Muriatis hydrargyri oxygenati, Liquor hydrargyri oxymuriatis—s. Potassii iodidi iodureta, Liquor iodinii compositus — s. Resinæ guaiaci aquosa, Mistura guaiaci — s. Solventis mineralis, Liquor arsenici chloridi — s. Subcarbonatis ammoniaci spirituosa, Spiritus ammoniæ.

Solu'tio Sulpha'tis Cu'pri Compos'ita, *A'qua vitriol'ica cæru'lea, Syd'enham's Stypt'ic Wa'ter.* (*Sulph. cupri, Alum.,* āā ℥iij., *Acid. Sulph.,* ℥jss., *Aquæ,* Oij.; dissolve, and filter.) A styptic, and, largely diluted, an astringent collyrium.

Solu'tion, *Solu'tio, Ly'sis,* (F.) *Dis'solution.* An operation which consists in dissolving a solid body in a menstruum. Likewise, the product of such operation—*Solu'tum,* (F.) *Soluté, Liqueur.* It means, also, with many, the termination of a disease; — with others, a termination accompanied by critical signs;—and, with others, again, it is synonymous with crisis.

Solu'tion of Ac''etate of Ammo'nia, Liquor ammoniæ acetatis — s. of Ammonia, benzinated, see Ammoniæ sulphas — s. Alkaline, see Fuligokali — s. of Alkaline iron, Liquor ferri alkalini— s. of Alum, compound, Liquor aluminis compositus — s. of Ammonia, subcarbonate of, Liquor ammoniæ subcarbonatis — s. of Ammoniated copper, Liquor cupri ammoniati — s. of Arseniate of soda, see Arseniate of soda — s. of Arseniate of sodium, see Arseniate of soda — s. Arsenical, Liquor arsenicalis — *s. Arsénicale de Pearson,* see Arseniate of soda — s. Arsenical, De Valangin's, Liquor arsenici chloridi—*s. d'Arsénite de potassa,* Liquor arsenicalis — s. of Atropia, Liquor atropiæ — s. of Carbonate of soda, Liquor sodæ carbonatis — s. of Charcoal, concentrated, see Tinctura catechu — s. of Chloride of arsenic, Liquor arsenici chloridi — s. of Chloride of zinc, see Burnett's disinfecting liquid—s. of Chlorinated soda, Liquor sodæ chlorinatæ — s. of Chlorine, see Chlorine — s. of Citrate of ammonia, Liquor ammoniæ citratis — s. of Citrate of magnesia, see Magnesiæ citras—s. of Citrate of potassa, Liquor potassæ citratis—s. of Continuity, see Continuity — s. of Corrosive sublimate, Liquor hydrargyri oxymuriatis — s. De Valangin's, Liquor arsenici chloridi — s. Donovan's, see Arsenic and mercury, iodide of — s. Fowler's, Liquor arsenicalis — s. Gannal's, see Aluminæ acetas.

Solu'tion, Goad'by's, called after the proposer, Dr. Goadby, is made of *bay salt,* ℥iv., *corrosive sublimate,* gr. iv., *alum,* ℥ij., and *boiling water,* Oiv. It is employed to preserve animal substances. For most purposes it may be diluted with an equal bulk of water.

Solu'tion of Gut'ta Per'cha in Chlo'roform, see Gutta percha — s. Heinecke's, see Arseniate of soda — *s. par les Huiles,* Olea medicinalia — s. of Hydriodate of potassa, Liquor potassæ hydriodatis—s. of Iodide of iron, Liquor ferri iodidi— s. of Iodine, compound, Liquor iodinii compositus — s. of Iron, nitrated, Liquor ferri nitratis — s. Labarraque's, Eau de Javelle — s. of Lime, Liquor calcis — s. of Lime, saccharated, Liquor calcis saccharatus — s. Lugol's, Liquor iodini compositus — s. of Magnesia, condensed, Magnesia, fluid — s. Monsel's, see Ferri sulphas — s. of Monro, Liquor of Monro — s. of Acetate of morphia, Liquor morphiæ acetatis — s. of Hydrochlorate of morphia, Liquor morphiæ muriatis — s. of Muriate of morphia, Liquor morphiæ muriatis — s. of Sulphate of morphia, Liquor morphiæ sulphatis — s. of Nitrate of iron, Liquor ferri nitratis — s. of Nitrate of mercury, see Hydrargyri nitras — s. of Opium, Battley's, Liquor morphiæ sedativus — s. of Oxymuriate of mercury, Liquor hydrargyri oxymuriatis — s. Pearson's, see Arseniate of soda — s. of Permanganate of potassa, Liquor potassæ permanganatis — s. of Persulphate of iron, see Ferri sulphas — s. Plenck's, see Hydrargyri oxydum cinereum — s. of Potassa, Liquor potassæ—*s. de Potasse,* Liquor potassæ— s. of Sesquinitrate of iron, Liquor ferri nitratis— s. of Soda, Liquor sodæ — s. of Strychnia, see Strychniæ murias — s. of Subacetate of lead, Liquor plumbi subacetatis — s. of Subacetate of lead, diluted, Liquor plumbi subacetatis dilutus— s. of Subcarbonate of potassa, Liquor potassæ subcarbonatis — s. of Subsulphate of iron, see Ferri sulphas — s. of Tartarized antimony, Vinum antimonii tartarizati—s. of Terchloride of antimony, see Antimonium muriatum — s. of Ternitrate of sesquioxide of iron, Liquor ferri nitratis — s. of Van Swieten, Liquor hydrargyri oxymuriatis — s. Vleminckx's, see Calcis sulphuretum.

Soluti'vus, Laxative.

Solu'tum, Solution.

Sol'vens, (from *solvere,* 'to dissolve,') Solvent — s. Minerale, Liquor arsenicalis.

Sol'vent, *Sol'vens,* (F.) *Fondant.* A medicine supposed to possess the property of dissolving or removing obstructions and extraneous substances. Thus we have *solvents* of the stone in the bladder, &c. See Dissolventia.

Sol'vent, Min'eral, Liquor arsenicalis.

So'ma, (*σωμα*, gen. *σωματος*,) Body, Corpus.

Somascet'ics, (*soma*, and *ασκησις*, 'exercise,') Gymnastics.

Somascétique, Gymnastics.

Somat'ic or **So'matic,** (*σωματικος*,) *Somat'icus,* (F.) *Somatique,* (from *soma.*) That which concerns the body;—as *somatic* death, or death of the body, in contradistinction to *molecular* death or the death of a part.

Somatodym'ia, (*soma,* and *δυω*, 'I enter into.') A double monstrosity in which the trunks are united. Of this, there are several varieties:—*Vertebrodym'ia,* where the union is by the vertebræ; *Ischiodym'ia,* by the ossa ischii; *Sternodym'ia,* by the sternum; *Supraömphalodym'ia,* (F.) *Sus-omphalodymie,* by the superumbilical regions; *Su'pra et in'fra-omphalodymia,* by the superior and inferior umbilical regions; and *Sternoomphalodymia,* where the union is by both the sternal and the umbilical regions.

Somatol'ogy, *Somatolog''ia,* (*soma,* and *λογος*, 'a discourse.') A treatise on the human body. Anatomy.

So'matome, (*σωμα*, 'body,' and *τομη*, 'division,') *Ver'tebral Seg'ment.* Segments of the body have been so called by Goodsir.

Somatot'omy, (*soma,* and *τομη*, 'incision,') Anatomy.

Sommeil, (from [L.] *somnus,*) Sleep—*s. Hibernal,* Hibernation.

Sommet, (from [L.] *summus,* 'highest,') Vertex.

Somnambula'tion, Somnambulism.

Somnam'bulism, *Somnambula'tio, Hypnobate'sis, Hypnobata'sis, Hypnoba'tia, Hypnobad'isis, Hypnob'asis, Rhembas'mus, Lunatis'mus, Hypnonergi'a, Selenoga'mia, Nyctobate'sis, Autonyctoba'tia, Seleni'asis, Selenias'mus, Somnambulis'mus, Nyctob'asis, Noctambula'tio, Noctambulis'mus, Nyctoba'dia, Nyctoba'tia, Siph'ita, Syph'ita, Paroni'ria am'bulans, Noctisur'gium, Oneirodyn'ia acti'va, Cenospn'dia, Somnovig''il, Somnambula'tion, Sleepwalking,* (*somnus,* and *ambulare, ambulatum,* 'to walk.) A condition of the brain which occasions the individual to execute, during sleep, some of those actions that commonly take place when awake. It has been imagined that the somnambulist is guided solely by his subjective sensations; but there are many facts which induce the belief that the external senses are not always entirely suspended. The causes of somnambulism are very obscure; and the principal indication of treatment is,—so to arrange the bedchamber of the somnambulist that he cannot get out of it during sleep; and to avoid suppers, as well as all bodily and mental excitement.

Somnam'bulism, Magnet'ic, Mesmer'ic, or Artific''ial, *Somnambulis'mus artificia'lis, Cataph'ora magnet'ica, Somnip'athy,* is that peculiar condition into which individuals are thrown by the *animal magnetizer.* It occurs only in those of weak nervous temperament; in hysterical females, &c. See Magnetism, animal.

Somnambulis'mus, Somnambulism—s. Artificialis, Somnambulism, magnetic.

Somnam'bulist, *Somnam'bulus, Hybnob'ates, Hypnob'ates, Noctam'bulus, Lunat'icus, Noctam'bulo, Somnam'bulo.* A sleepwalker.

Somnambulis'tic, *Somnam'bulous.* Relating or appertaining to somnambulism,—as the '*somnambulis'tic state.*'

Somnam'bulo, Somnambulist.

Somnam'bulous, Somnambulistic.

Somnia'tio, (*somnium,* 'a dream.') The act of dreaming.

Somnia'tio Morbo'sa, Oneironosus—s. in Statu vigili, Hallucination.

Somnif'erous, *Som'nifer, Sopor'ifer, Hypnot'icus, Hypnopœ'us, Soporati'rus, Soporif'ic, Soporif'erous,* (F.) *Hypnotique, Somnifère, Assoupissant, Soporatif, Soporifère, Soporifique;* an epithet for a medicine which causes sleep, (from *somnus,* and *fero,* 'I carry.')

Somnil'oquist, *Somniloq'uus,* (F.) *Somniloque,* (from *somnus,* 'sleep,' and *loquor,* 'I speak.') One who talks in his sleep.

Somnilo'quium, *Somniloquis'mus, Somnil'oquism.* Talking in the sleep.

Somnil'oquus, Somniloquist.

Som'nium, (from *somnus,*) *Enyp'nion, Insom'nium, Oneir'os, Oneir'on, Onar, Oneiropol'ia, a Dream,* (Sc.) *Sweuin, Sweving, Swevynyng, Swenyng,* (F.) *Rêve, Songe.* A confused assemblage, or accidental and involuntary combination of ideas and images, which present themselves to the mind during sleep. Dr. S. Mitchell, of New York, used the word *Somnium* to signify the state between sleeping and walking, in which persons perform acts of which they are unconscious. For 'waking dreams,' see Hallucination.

Those distressing dreams which occur during a state of half sleep, are called, by the French, *Rêvasseries.*

Som'nolency, *Somnolen'tia, Hypnæsthe'sis, Hypno'dia, Dormita'tio, Ca'rus Lethar'gus Cataph'ora, Cataph'ora, Co'ma, Somnolen'tum, Slum'ber, Heaviness,* (F.) *Assoupissement,* (from *somnus.*) Sleepiness. Also a state intermediate between sleeping and waking. It is often a symptom of disease.

Somnop'athy, (*somnus,* and *παθος*, 'affection,') Somnambulism, magnetic.

Somnovig''il, (*somnus,* and *vigil,* 'awake.') Somnambulism.

Som'nus, Sleep.

Somp'nus, Sleep.

Son, (from *summus,* the last — that which remains last in the sieve,) Furfur. Also, Sound, (from *sonus.*)

Son Hydatique, *Hydat'ic sound, Hydat'id frem'itus.* A sound, heard on percussion over tumors containing hydatids. The sensation experienced by the finger is like that given by a watch struck on the surface opposite the glass.

Son'chus, (*σογχος*,) *S. Olera'ceus, Hiera'cium olera'ceum, Sowthistle, Swinethistle,* (F.) *Laiteron doux. Ord.* Cichoraceæ. Most of the species of Sonchus abound with a milky juice, which is very bitter, and said to possess diuretic virtues.

Son'chus Florida'nus, Mulgedium Floridanum.

Sonde, Sound, Specillum—*s. Cannelée,* Director.

Sonde D'Anel. A very fine stylet of silver, awl-shaped at one end. It is used for probing the lachrymal passages through the punctum lachrymale.

Sonde de Belloc. An instrument invented by Belloc for plugging the nasal fossæ, in cases of hemorrhage. It consists of a curved silver canula, open at both ends, and furnished with a button. The instrument is passed through the nares to the throat; and a plug is attached to the button, so that, when the instrument is drawn forwards through the nose, the posterior nostril is stopped.

Sonde Brisée (F.), *Eyed probe.* A long, straight stylet, composed of two parts, which may be screwed to each other; blunt at one end, and furnished at the other with an eye, so that it may be used either as a probe for punctured wounds, or for a seton needle.

Sonde à Conducteur (F.). A modification of the ordinary catheter;—to facilitate the changing of catheters, without the fear of making false passages. It is a common catheter, open at its beak. The *Stylet* or *Mandrin* is one half longer than that of the ordinary catheter. To use the instrument, the stylet is pushed into the cavity of the bladder through the catheter. The latter is then withdrawn by slipping it over the stylet, which is kept in its place, and serves as a guide to a fresh catheter.

Sonde à Dard, (*dard,* 'a dart,') see Lithotomy (high operation).

Sonde de Laforest. A small, crooked canula, used for probing the nasal duct from below upwards, and for throwing injections into it.

Sonde ou ***Pince du Hunter.*** A cylindrical silver canula; of the size of a common catheter; open at both extremities, and containing a wire of iron, one of the ends of which is split into two parts; each being terminated by a small silver scoop, and separating from each other by virtue of their elasticity, when pushed out of the canula, and again approximating when drawn in. It has been used for laying hold of small calculi in the urethra.

Sonde Utérine, Sound, uterine—*s. de Varecq,* Soda.

Songe, Somnium.

Son'itus Aur'ium, 'sound of the ears,' Tinnitus aurium — s. Cardiacus, see Heart (sounds) — s. Cordis, see Heart (sounds) — s. Fluidi, Hygrechema — s. Hepaticus, Hepatechema — s. Intestinalis, Enterechema — s. Stomachicus, Gasterechema.

Sono'rous Rhon'chus, Râle sonore.

So'nus, Sound — s. Vocis, Accent.

Sooja, see Dolichos.

Soo'jie, Baster's, a farinaceous article of diet, is said to consist of wheat flour sweetened with sugar.

Sool, Gastroperiodynia.

Soor, Aphthæ.

Soot, ([Sax.] ȝoȝ, ȝoȝ,) Fuligo — s. Cancer, Cancer, chimney-sweeper's — s. Tea, see Fuligokali — s. Wart, Cancer, chimney-sweeper's.

So'phia, (*σοφια,* 'wisdom,' from its virtues,) Sisymbrium sophia — s. Chirurgorum, Sisymbrium sophia.

Sophistica'tion, (from *σοφιστικος,* after the manner of the Sophists, 'captious, deceitful,') Falsification.

Sopho'ra Heptaphyl'la, *Anticholer'ica.* *Ord.* Leguminosæ. *Sex. Syst.* Decandria Monogynia. The root and seeds of this shrub are intensely bitter, and are said to have been found useful in cholera, colic, dysentery, &c.

Sopho'ra Tincto'ria, *Baptis'ia* seu *Podalir'ia Tincto'ria, Indigof'era, Wild In'digo, In'digo Weed, Broom, In'digo Broom, Horse'fly Weed, Yel'low Broom, Clo'ver Broom, Rat'tle Bush, Yel'low In'digo.* An American plant, the taste of whose root is unpleasant, subacrid, and nauseous — very similar to that of ipecacuanha. In a large dose, the bark of the root acts both as an emetic and cathartic. It has been considered antiseptic and febrifuge, and has been used, in the form of fomentation or cataplasm, in phagedenic and gangrenous ulcers. A liniment, prepared by simmering the *cortical part* of the root in cream, has been found an efficacious application to sore nipples and to ulcerated breasts.

Baptis'ia Leucan'tha, Tall white false In'digo, an indigenous plant, has the same properties.

Sophronis'tæ Den'tes, (from *σωφρονεω,* 'I act wisely,') see Dentition.

Sophronis'teres Den'tes, see Dentition.

Sophros'ynē, (*σωφροσυνη,*) Temperance.

So'piens, (*sopio,* 'I put to sleep,') Paregoric.

So'pio, Opium.

So'por, gen. *Sopo'ris.* Sleep, and especially a profound sleep, from which the person can be roused with difficulty. It is a symptom in many of the neuroses.

So'por Caro'ticus, Carus.

Sopora'riæ Arte'riæ, Carotids.

Soporati'vus, (from *sopor,*) Somniferous.

Soporif'erous, (*sopor,* and *ferre,* 'to carry,') Somniferous.

Soporif'ic, (*sopor,* and *facere,* 'to make,') Somniferous.

So'porous, *So'porus,* (F.) *Soporeux,* (from *sopor.*) Sleepy; causing sleep.

So'ra, Essera.

Sorb'tree, Sorbus domestica.

Sorbastrel'la, Pimpinella saxifraga.

Sorbefa'cient, *Sorbefa'ciens,* (*sorbere,* 'to suck in,' and *facere,* 'to make.') A remedy that promotes absorption.

The following are the chief sorbefacients or modifiers of nutritive action, *Eutrophics:* — Acida Vegetabilia; Alkalia; Ammoniacum; Brominium; Galbanum; Hydrargyri Præparata; Iodinium; Liquor Calcii chloridi; Spongia usta; Compression (methodical); Friction; Mental Sorbefacients (Imagination, Emotions).

Sorbet', Scherbet.

Sorbe'thum, Scherbet.

Sorbet'tum, Scherbet.

Sorbe'tum, Scherbet.

Sorbier des Oiseleurs, Sorbus aucuparia.

Sorbin, see Sorbus domestica.

Sorbit''io, (*sorbere,* 'to drink,') Jus.

Sorbit''io Car'nis seu Ex Car'nē. Broth or soup made of meat.

Sorbit''ium, Jus.

Sor'bum, see Sorbus domestica.

Sor'bus, Cratægus aria, S. domestica — s. Alpina, Cratægus aria.

Sor'bus America'na, *Py'rus Americana, Amer'ican Mountain Ash.* The bark resembles that of the wild cherry, and might be used in the same cases.

Sor'bus A'ria, Cratægus aria.

Sor'bus Aucupa'ria, *Mes'pilus, M. aucupa'ria, Moun'tain Ser'vice, Sorbus of the birdcatchers, Moun'tain Ash, Quick'en tree, Roan tree, Wit'chen, Witch ha'zel, Witchwood,* (Sc.) *Ro'den tree, Roun tree, Rowan tree, Rone,* (Prov.) *Keer, Rantre,* (F.) *Sorbier des Oiseleurs, Frêne sauvage. Ord.* Rosaceæ. The berries — (Sc.) *Rodens* — of this tree are employed for similar purposes to those of Sorbus domestica.

Sor'bus of the Bird'catchers, S. aucuparia.

Sor'bus Cydo'nia, Pyrus cydonia.

Sor'bus Domes'tica, *Sor'bus, Py'rus domes'tica, Mes'pilus domes'tica, Oie, Ser'vice* or *Sorb tree,* (F.) *Calmier. Family,* Rosaceæ. *Sex. Syst.* Icosandria Trigynia. The fruit of this tree, *Sorbum,* is astringent, and has been recommended in diarrhœa and dysentery. It is given in the form of rob. A kind of cider is made from it, and also brandy. A saccharine matter extracted from the fruit has been called *Sor'bin.*

Sor'bus Ma'lus, Pyrus malus.

Sor'des, 'filth.') *Rhy'pus.* A dirty-looking sanies, discharged from ulcers. Also, accumulations of the secretions of the mouth on the teeth, in adynamic fevers more especially, and of foul matters in the stomach — *Sor'des prima'rum via'rum, Rhypa'ria.* The French call an ulcer exhibiting such an appearance, *sordide.* Also, dirt of any kind.

Sor'des, Acatharsia, Ichor, Saburra—s. Acidæ, Acidities — s. Aurium, Cerumen — s. Primarum viarum, Embarras gastrique, see Sordes — s. Ventris, Excrement.

Sordic'ulæ (dim. of *sordes*) **Aur'ium,** Cerumen.

Sore, ([Sax.] ȝar,) Ulcer.

Sore, Bay. A disease which Moseley considers to be a true cancer. It is endemic in the Bay of Honduras.

Sore Mouth, Stomatitis — s. Mouth, Gangrenous, Cancer aquaticus — s. Mouth, Swan alley, see Phagedenic chancre.

Sore Throat, Cynanche — s. Throat, Clergyman's, Clergyman's sorethroat; Pharyngitis, follicular — s. Throat, Fothergill's, see Scarlatina — s. Throat, inflammatory, Cynanche tonsillaris — s. Throat, putrid, Cynanche ma-

ligna — s. Throat, tubercular, Pharyngitis follicular — s. Throat, ulcerous, Cynanche maligna.

Sore'ness, *Parap'sis a'cris teneritu'do.* Painful uneasiness or tenderness, local or general, on being touched with a pressure that does not usually excite distressing feeling. Often, a febrile symptom. Also, the tenderness of a wound, ulcer, &c.

Sorg'hum, Panicum Italicum — s. Saccharatum, see Saccharum.

Soroc'co, Puna.

Soroche, Puna.

Sororia'tio, (from *sorores,* 'sisters,' *sororio,* 'I grow up or swell together.') The period at which the breasts of the female become developed. The act of becoming thus developed. A young maiden, whose mammæ begin to show, — *sororian'tes mam'mæ* — was formerly called *soro'rians vir'go.*

Sor'rel, Com'mon, ([F.] *Surelle,* from [Sax.] ȝuꝛ, 'sour,') Rumex acetosus — s. Field, Rumex acetosella — s. French, Rumex scutatus — s. Garden, Rumex scutatus — s. Mountain, Oxalis acetosella, Oxyria reniformis — s. Roman, Rumex scutatus — s. Salt of, Potassa, oxalate of — s. Sheep, Rumex acetosella.

Sor'rel Tree, Andromeda arborea, A. mariana.

Sor'rel, Welsh, Oxyria reniformis — s. White, Oxalis acetosella — s. Wood, yellow, Oxalis stricta.

Sorroche, Puna.

Sos'trum, *So'trum,* (σωτρον, from σωζειν, 'to save,' and σωτηρ, 'a preserver.') A reward given to one who saves the life of another. A physician's *fee* or *honora'rium,* (F.) *Honoraire.*

Sote'ria Doctri'na, (σωτηριος, 'preservative,') Medicina.

Sote'riæ A'quæ, Waters, mineral.

Soteriol'ogy, *Soteriolog''ia,* (σωτηριος, 'preservative,' and λογος, 'a discourse,') Hygeology.

Sotirel'la. Ancient name of a medicine composed of *opium* and other *narcotics, nutmeg, saffron, camphor,* and *soot.* It was used in certain diseases of the teeth.

So'trum, (σωτρον,) Sostrum.

Soubrelangue, Ankyloglossia.

Soubresaut des Tendons, Subsultus tendinum.

Soucherloon, Bit noben.

Souchet des Indes, Curcuma longa — *s. Odorant,* Cyperus longus — *s. Rond,* Cyperus rotundus.

Souci (old F.), *Soulcie,* (from [L.] *solsequium,* like *heliotrope,* 'a follower of the sun,') Calendula officinalis, Panophobia — *s. des Alpes,* Arnica montana — *s. des Champs,* Calendula arvensis — *s. Ordinaire,* Calendula officinalis.

Soude, Soda — *s. Acétate de,* Soda, acetate of — *s. Aéré,* Sodæ carbonas — *s. Benzoate de,* Soda, benzoate of — *s. Borate de,* Borax — *s. Borate sursaturé de,* Borax — *s. Carbonate de,* Sodæ carbonas — *s. Caustique,* Soda caustica — *s. Caustique liquide,* see Soda caustica — *s. à la Chaux,* Soda caustica — *s. Chlorure de,* Soda, chloride of — *s. du Commerce,* Soda — *s. Crayeuse,* Sodæ carbonas — *s. Effervescente,* Sodæ carbonas — *s. Hyposulfite de,* Soda, hyposulphite of — *s. Phosphate de,* Soda, phosphate of — *s. et de Potasse, tartrate de,* Soda, tartrate of — *s. Pure,* Soda caustica — *s. Sousborate de,* Borax — *s. Souscarbonate de,* Soda, subcarbonate of — *s. Sulfate de,* Soda, sulphate of.

Souffle, (from *sufflare,* — *sub,* and *flare,* — 'to blow,') see Murmur, respiratory — *s. Amphorique,* see Cavernous respiration — *s. Bronchique,* see Murmur, respiratory — *s. Funique,* Bellows sound, funic — *s. Métallique,* see Cavernous respiration — *s. Placentaire,* Bruit placentaire — *s. Trachéal,* see Murmur, respiratory — *s. Tubaire,* see Murmur, respiratory — *s. Utérin,* Bruit placentaire — *s. Voilé,* see Cavernous respiration.

Souf'fle, Whis'pering. A bellows sound heard over solidified lung and excavations when the patient whispers.

Souffrance, Suffering.

Soufre, Sulphur — *s. Carburé,* Carbonis sulphuretum — *s. Iodure de,* Sulphuris iodidum — *s. Précipité,* Sulphur præcipitatum — *s. Sublimé,* Sulphur sublimatum — *s. Végétal,* Lycopodium.

Souillure, ([F.] *souiller, salir,* [Sax.] ȝylian, 'to soil,') Pollution.

Soula'mea Ama'ra, *Rex amaro'rum.* A shrub of the Moluccas; *Order,* Polygalaceæ; all the parts of which have great bitterness — "*horrenda amarities.*" It is employed by the Malays, and, it is said, with success, in cholera and pleurisy; and as a febrifuge.

Sound, *Specil'lum, Sty'lus, Explorato'rium, Radi'olus,* (F.) *Sonde.* An instrument used by surgeons to discover whether there be a stone in the bladder. It is usually made of highly polished steel, and is shaped like the catheter. The operation is termed *sounding.*

The French *Sonde* has, however, a more extensive signification. It means different instruments introduced into cavities of certain organs, or into wounds, fistulas, &c., to probe their condition, or to fulfil some therapeutical indication. See Sonde.

Sound, *So'nus,* ([Sax.] ȝon,) *E'chos, Noise,* (F.) *Son, Bruit.* The sensation produced on the auditory nerve by the vibrations of a sonorous body. Sounds may be propagated in three modes. 1. By *reciproca'tion* or *con'sonance,* as when a sounding body, of a definite pitch, produces a musical tone when another body of the same pitch is sounded near it. 2. By *res'onance,* as when a sounding body is placed in connection with another, one or more of whose parts may be thrown into reciprocal vibration. 3. By *conduc'tion,* as where the vibrations are transmitted through fluid, liquid, or solid media.

Sound, ([L.] *sanus,* [Sax.] ȝunb,) Healthy.

Sound, Catheterize, Syncope — s. Auricular, Apyromele — s. Bellows, friction, rasp, saw, lancet, &c., see Bruit — s. Cracked pot, Bruit de pot fêlé — s. Crumpling, pulmonary, Froissement pulmonaire — s. of the Heart, see Heart — s. Hydatic, Son hydatique — s. Laryngeal, Laryngeche — s. Musical, Sifflement modulé — s. Nélaton's, Sound, porcelain.

Sound or Probe, Por'celain, *Nél'aton's probe,* (F.) *Explorateur de Nélaton.* A probe having a bulbous extremity of porcelain for probing deep-seated gunshot wounds with the view of detecting the presence of a ball, which makes a leaden mark on the bulb; first, perhaps, used by Professor Nélaton, of Paris, in the case of Garibaldi.

Sound, U'terine, *U'terine bougie* or *probe,* (F.) *Sonde utérine.* An instrument somewhat similar to a small male catheter, to be introduced into the cavity of the uterus, in the diagnosis of diseases of that viscus. When notched on the stem, it enables the size of the uterine cavity to be appreciated, and becomes a good *hysterom'eter,* (F.) *hysteromètre.*

Sound'ing, Searching, see Sound — s. the Chest, see Auscultation.

Sound'ness of Mind, Sanity.

Soup, ([G.] Suppe,) see Broth — s. for Infants, Liebig's, see Food, &c., Liebig's.

Soup, Port'able, (F.) *Tablettes de Bouillon.* This is made by dissolving the pure animal matter obtained from bone, concentrating the solution until it gelatinizes, and drying the jelly obtained

Soupir, (from [L.] *suspirium,*) Sigh.

Sour Ber'ry, see Oxyacantha Galeni, Vaccinium oxycoccos — s. Crout, Sauerkraut — s. Dock, boreal, Oxyria reniformis — s. Leaf, Andromeda arborea — s. Milk, Buttermilk — s. Sop, Bromelia ananas — s. Tree, Andromeda arborea — s. Wood, Andromeda arborea, Andromeda mariana.

Sourcil, Supercilium.

Sourcilier, Corrugator supercilii, Superciliary.

Sourd, (from [L.] *surdus,*) Deaf.

Sourds-muets, 'deaf dumb,' see Mutitas surdorum.

Souris, Nystagmus.

Sous (F.), in compound words, *Sub.*

Sous-acromio-clavi-huméral, Deltoid — *s. Atloïdien,* Subatloidæus — *s. Axoïdien,* Subaxoidæus — *s. Azotate de Bismuth,* Bismuth, subnitrate of — *s. Clavier,* Subclavian — *s. Costaux,* see Intercostal muscles — *s. Cutané,* Subcutaneous, Hypodermic — *s. Diaphragmatique,* Infradiaphragmatic — *s. Épineur,* Infraspinatus — *s. Lingual,* Sublingual — *s. Mammaire,* Submammary — *s. Maxillaire,* Submaxillary — *s. Maxillo-labial,* Depressor anguli oris — *s. Mental,* Submental — *s. Métacarpo-latéri-phalangien,* Prior-annularis — *s. Occipital,* Suboccipital — *s. Optico-sphéno-sclératicien,* Rectus inferior oculi — *s. Orbitaire,* Suborbitar — *s. Pubien,* Infrapubian — *s. Pubio-coccygien,* Levator ani — *s. Pubio-crêti-tibial,* Gracilis — *s. Pubio-prétibial,* Gracilis — *s. Pubio-trochantérien-externe,* Obturator externus — *s. Pubio-trochantérien-interne,* Obturator internus — *s. Scapulaire,* Subscapularis — *s. Scapulo-trochinien,* Subscapularis — *s. Sels,* see Salt.

South Caroli'na, Min'eral Wa'ters of. *Glenn's Springs,* in Spartanburg District, are highly charged with salts of lime, and, not far from them, is a chalbyeate. *West's Spring* and *Chick's Springs,* a few miles from Greenville, resemble Glenn's Springs. There is also a thermal alkaline-saline artesian well at Charleston.

South'ernwood, Artemisia abrotanum — s. Field, Artemisia campestris — s. Maritime, Artemisia maritima — s. Tartarian, Artemisia santonica.

Sow'bread, Arthanita, Cyclamen.

Sow'ens, ([Sax.] ȝeape, 'paste,') Flummery.

Soy, see Dolichos soja.

Soymi'da Febrif'uga, Swietenia febrifuga.

Spa, Min'eral Wa'ters of. A town seven leagues southeast of Liége, where there are several springs, possessing a sharp acidulous taste; containing much carbonic acid, carbonates of iron, lime, and magnesia; carbonate of soda, and chloride of sodium. The water is much used as a tonic. Season, from the 1st of June to the 15th of October. The French Codex (1866) has an *Eau Ferrée gaseuse, A'quæ Mar'tia efferves'cens,* intended as a substitute for the waters of Spa, Saint Albans, &c.

Spa Wa'ter, Artific'ial. (*Sodæ subcarb.,* gr. vij., *Magnesiæ carbon.,* ℈j., *Limat. ferri.,* gr. iij., *Sodii chlorid.,* gr. j., *Aquæ,* Oiij. Impregnate with gas from *Marble powder* and *Sulph. acid.,* āā ℈x.)

Space, Douglas's, see Uterus — s. of Fontana, see Fontana — s. Interpeduncular, see Interpeduncular — s. Perforated, anterior, Locus perforatus anticus — s. Perforated, posterior, see Tarini pons — s. of Poiseuille, see Still layer — s. of Tenon, see Fascia of Tenon.

Spade'bone, Scapula.

Spa'do, (σπαδων,) Castratus, Spasm.

Spa'don, (σπαδων,) Castratus, Spasm.

Spagyr'ia, Chemistry.

Spag''yrists, (σπαω, 'I separate,' and αγειρω, 'I assemble;' because they reduced compounds into elements, and formed the latter into compounds [?].) A sect of physicians, who pretend to account for the changes that occur in the human body in health and disease, in the same manner as the chemists of their day explained those of the inorganic kingdom. *Medici'na Paracelcis'tica* seu *Spagyr'ica,* was likewise called *Hermet'ica,* because it was believed that the means of cure adopted in it had been found in the books of Hermes.

Spaig, Skeleton.

Spanæ'mia, (σπανος, 'poor,' and αιμα, 'blood.') Poverty of the blood. Diminution in the quantity of red corpuscles of the blood,—as where bleeding has been carried beyond certain limits.

Spanæ'mic, *Spanæ'micum* (*remedium*), *Dysplas'ticum, Plastylit'icum et erethilyt'icum, Hæmatolyt'icum, Dyscrasi'acum.* Relating to spanæmia.

A medicine whose protracted use is said to impoverish the blood, — as iodine, bromine, &c.

Spandara'pum, Sparadrapum.

Spaning, ([G.] spänen, 'to wean,') Weaning — s. Brash, Brash, weaning.

Span'ish Fly, Cantharis — s. Juice, Extractum glycyrrhizæ.

Spannadra'pum, Sparadrapum.

Spanapo'gon, (σπανος, 'rare,' and πωγων, 'beard.') One who has lost his beard, or has a thin beard.

The Greeks called those who had little beard, or who had lost it, *Spanopogo'nes.*

Sparadrap, *Sparadra'pa, Sparadra'pum, Sparadrapus, Tela emplas'tica* seu *emplas'trica, Spandara'pum, Spannadra'pum.* Any adhesive plaster spread upon linen or paper, (F.) *Papier médicamenté.* The French Codex (1866) even includes *Collodion* in its list of *Sparadraps.*

Sparadrap de Colle de Poisson, see Sparadrapum adhæsivum.

Sparadra'pa, Sparadrapum.

Sparadrapier. The name of a machine for spreading sparadraps. A *Plaster machine.* It consists of a table, with two raised pieces, movable, and furnished with points, by which the cloth can be stretched, and of a lamina or blade of metal to extend the plaster over it.

Sparadra'pum, Sparadrap.

Sparadra'pum Adhæsi'vum, *Adhe'sive Plaster.* A spread plaster of the *Emplas'trum adhæsi'vum.* It is also called *Strap'ping.*

English Courtplaster is a Sparadrap, (F.) *Taffetas agglutinatif, T. gommé, Taffetas d'Angleterre, Sparadrap de Colle de Poisson, Ser'icum An'glicum, Emplas'trum Anglicum, E. Anglica'num, E. Adhæsi'vum Woodstock'ii, E. Ichthyocol'læ te'læ induc'tum, E. Glutino'sum, Te'la Ichthyocol'læ glu'tinans, Isinglass Plas'ter.* (It is made by stretching black silk, and brushing it over with a solution of *isinglass,* ℥j., in *proof spirit,* ℥xij., to which *tinct. benzoin.,* ℥ij., are added. When dry, this is repeated five times; after which two coats are given it of a solution of *tereb. Chiæ,* ℥iv., in *tinct. benz.,* ℥vj., which render it less liable to crack.)

Lis'ton's Isinglass Plas'ter is made by spreading several coats of strong solution of isinglass in weak spirit over oiled silk, or, still better, over animal membrane previously prepared for the purpose from the peritoneal coat of the cæcum of the ox.

Sparadra'pum pro Fontic'ulis, *Is'sue Plas'ter,* is sometimes made of *simple diachylon,* ℔ij., *Burgundy pitch* and *sarcocolla,* each ℥iv., *common turpentine,* ℥j. Spread upon linen and polished with a moistened calendering glass rubber.

Sparadra'pum seu Te'la Galte'ri, *Defen'sive Plas'ter,* (F.) *Toile de Gautier.* (This is made of *Olive oil,* ℔ss., *Suet,* ℥iv., *Wax.,* ℥x., *Litharge, Common turpentine, Thus,* and *Mastich,* āā ℥ij., *Bole armeniac, Flour,* āā ℥j. Pour it, while liquid, upon cloth, and spread.) Used for issues and to keep on dressings.

Sparadra'pum Vesicato'rium. Several substances have been introduced as substitutes for blistering plaster, (see Emplastrum lyttæ,) under the names *Te'la vesicato'ria, Blis'tering Tis'sue,* &c.; other forms of which are the *Taffetas*

vésicant ou *épispastique, Papier épispastique* ou *vésicant, Charta vesicatoria.* They are made of an *ethereal* or *alcoholic extract of cantharides,* or of *cantharidin,* mixed with *wax,* and spread, in a very fine layer, on silk or paper previously oiled or waxed. They are efficient agents. See Charta cantharidis.

Sparadra'pum Vir'idē, *Cornplaster.* (This may be made of *Yellow wax,* ℔ij., *Burgundy pitch,* ℥xij., *Common turpentine,* ℥vj., *Verdigris,* ℥iij., spread on cloth and polished.)

Kennedy's Cornplaster is made of *Yellow wax,* ℔j., *Venice turpentine,* ℥ij., *Verdigris,* ℥j.

Sparadra'pus, Sparadrapum.

Sparag'ma, gen. *Sparag'matis,* (σπαραασσω, 'I tear,') Laceration.

Sparag'mus, (σπαραγμος, 'tearing,') Spasm.

Spar'agrass, Asparagus.

Spar'agus, Asparagus.

Sparal'lium, *Clys'ter uteri'nus.* An injection into the vagina.

Spare'dia. A bandage covered with the white of egg.

Sparga'nium Ramo'sum, (σπαργανιον,) *Great Burreed,* (from *sparganon,* owing to the band-like leaves.) Indigenous; *Order,* Typhaceæ; flowering in July and August. The roots are subastringent, but esculent; yielding a fine fecula, similar to salep. They are sometimes made into a poultice for inflamed mammæ.

Spar'ganon, *Spar'ganum,* (σπαργανον, from σπαργω, 'I swathe,' 'I wrap.') 'Swathing clothes;' a kind of bandage with which children were formerly surrounded. Also, a fascia or band.

Spargano'sis, *Spargo'sis,* (σπαργανωσις, from σπαργαω, 'I am full to bursting.') Extreme distension, as of the breasts by milk, *Intumescen'tia lac'tea mamma'rum, Mastodyn'ia polyg'ala.* Sparganosis also means the wrapping of a child in swathing clothes. The term has been employed by Mr. Erasmus Wilson as a more correct expression for the condition usually called *Elephantiasis Arabum.*

Spargano'sis Puerpera'rum, Phlegmatia dolens.

Spar'ganum, Sparganon.

Spargo'sis, (σπαργωσις,) Sparganosis.

Spar'rowgrass, Asparagus

Spar'sus, (*spargere, sparsum,* 'to throw here and there,') Sporadic.

Spar'teïn, see Spartium scoparium.

Spar'tium Jun'ceum, (σπαρτον, 'a rope,'—the ancients using its branches or bark to form a rope,) *Span'ish broom. Ord.* Leguminosæ. A small European shrub, cultivated in the gardens of the United States, on account of its yellow flowers. The seeds are diuretic and tonic, in small doses; emetic and cathartic in large. They have been used in dropsy — ten or fifteen grains three times a day.

Spar'tium Scopa'rium, *Sarotham'nus scopa'rius, Cyt'isus scopa'rius, Genis'ta, G. scopa'ria* seu *hirsu'ta, Cytisogenis'ta, Broom,* (F.) *Génêt à balai. Broom Tops, Spar'tii Cacu'mina, Scoparii Cacumina,* (Ph. B., 1867,) *Scopa'rius,* (Ph. U. S., 1873,) have a bitter taste, and are possessed of diuretic properties. They have been used in dropsies. Dose of the powder, ℈j. to ʒj. All the genistæ have similar virtues. A decoction of genista, along with the cauterization of the pustules under the tongue, has been recommended in hydrophobia. An organic liquid base — *Spar'teïn* or *Sparteï'a*—has been separated from it, which has narcotic properties; and a yellow crystallized, non-poisonous substance — *Sco'parin* — which is diuretic.

Spar'tium Tincto'rium, Genista tinctoria.

Spa'sis, (σπασις,) Spasm.

Spasm, *Spas'mus, Spas'ma, Spa'sis, Sparag'mus, Synol'cē, Spa'do, Spadon,* (F.) *Spasme,* (σπασμος, from σπαω, 'I draw.') The Greeks gave this name to all kinds of convulsions. It is now usually applied to involuntary muscular contractions, and these again have been divided into *tonic* spasm, *Paraton'ia,* which consists in permanent rigidity and immobility of the muscles that are the seat of it (see Tetanus); and *clonic* spasm, which consists in alternate contractions and relaxations (see Convulsion).

Cullen has a class, *Spas'mi* — the *neurospas'mi* of Fuchs.

Spasm, Clon'ic, Convulsion — s. Cynic, see Canine laugh — s. Functional, Cramp, writers'.

Spasm of the Glot'tis, Asthma thymicum—s. Histrionic, of the face, see Tic—s. of the Larynx, Asthma thymicum — s. Masticatory, of the face, Trismus — s. Muscular, idiopathic, Tetanilla — s. with Rigidity, Tetanus — s. of the Stomach, Cardialgia — s. Writers', Cramp, writers'.

Spas'ma, gen. *Spas'matis,* Spasm.

Spasmat'ic, see Spasmoticus. Dr. Marshall Hall used the word *spasmat'ic* for one, in a convulsive disease, in the state of excitement. *Spas'matode* he employs for one unexcited.

Spasmat'icus, (from *spasma,*) Spasmoticus.

Spas'matode, see Spasmatic.

Spasmato'des, (σπασματωδης, from *spasmus,* and *odes,*) Spasmoticus.

Spasme, Spasm — *s. de la Glotte et du Thorax,* Asthma thymicum — *s. de la Vessie,* Cystospasmus.

Spas'mi, see Spasm.

Spasmo'des, (σπασμωδης,) Convulsive.

Spasmod'ic, Spasmoticus.

Spasmol'ogy, *Spasmolog''ia,* (*spasmus,* and λογος, 'a treatise.') A treatise on spasm.

Spasmolyg'mus, (*spasmus,* and λυγμος, 'hiccough,') Singultus.

Spasmophil'ia, *Convulsibil'itas, Convulsibil'ity,* (F.) *Convulsibilité,* (*spasmus,* and φιλεω, 'I love.') Tendency to convulsions from unusual excitability of the motor nervous system.

Spasmot'icus, *Spasmat'icus, Spasmato'des, Spas'ticus, Spas'tic, Spasmod'ic, Spasmat'ic, Spasmot'ic,* (F.) *Spasmodique, Spastique,* (from *spasmus.*) Anything relating to spasm. Also, an antispasmodic.

Mor'bi constricto'rii, M. spasmot'ici, &c., are diseases accompanied with spasm.

Spas'mus, (σπασμος,) Convulsion, Spasm — s. Aurium, Otalgia — s. Bronchialis, Asthma — s. Caninus, see Canine laugh — s. Clonicus, Convulsion — s. Cynicus, see Canine laugh — s. Facialis, Neuralgia, facial—s. Glottidis, Asthma thymicum — s. Linguæ, Glossospasmus — s. Maxillæ inferioris, Trismus — s. Mimic of the face, see Neuralgia, facial — s. Muscularis, Cramp — s. Musculorum, Cramp — s. Musculorum faciei, Canine laugh—s. Nutans, Convulsion, salaam—s. Perihericus, Horrida cutis — s. Universalis, Synclonus — s. Ventriculi, see Cardialgia — s. Vesicæ, Cystospasmus.

Spas'nia, (same etymon as Spasm [?].) A term used by Mercurialis to designate the lancinating pain produced, at times, in the chest by violent fits of coughing.

Spas'tic, (σπαστικος,) Spasmoticus, Tonic spasm.

Spas'ticum, Tetanic.

Spa'tha, (σπαθη, a broad, flat instrument for stirring liquids, spreading plasters, &c.,) Hypaleiptron scapula.

Spathes'ter, gen. *Spathes'teris,* (from σπαω, 'I draw.') A surgical instrument, used by P. Amman for drawing the prepuce over the glans, when too short.

Spathome'lē, (*spatha,* and μηλη, 'a probe,') Spatula.

Spath'ula, Scapula, Spatula — s. Fœtida, Iris fœtidissima.

Spathye'ma Fœ'tida, Dracontium fœtidum.

Spa'tia (pl. of *spatium*, 'a space') **Interlobula'ria**, Interlobular fissures.

Spat'ilē, (*σπατιλη*, 'human excrement.') A liquid fecal evacuation. Excrement.

Spa'tium O'ris, 'space of the mouth,' Mouth — s. Trigonum, Lyra.

Spat'terdock, Nuphar advena.

Spat'ula, *Sparh'ula*, (dim. of *Spatha*,) *Spathome'lē*, *Specil'lum latum*, (F.) *Spatule*. A flat instrument, used for spreading plasters, stirring ointments, holding down the tongue, &c. Also, the scapula.

Spat'ula pro O'rē, Glossospatha.

Spaud, Humerus.

Spaul, Saliva.

Spaut'bone, Humerus.

Spaw'bone, Humerus.

Spay'ing, (from *σπαω*, 'I draw;' [L.] *spado*, 'a castrated person,) see Castration.

Spear'mint, Mentha viridis — s. Water, see Aqua mentha piperitæ.

Spear'wort, Ranunculus flammula.

Speaut'er, Zinc.

Spec''ial, see Specific.

Spec''ialist, (F.) *Spécialiste*, (from *species*, 'a peculiar sort.') One who devotes himself to a specialty; as to diseases of particular parts, as of the eye, ear, chest, &c.

Spe'cies, (F.) *Espèces*, *Spéciolés*. Officinal mixtures of substances cut or bruised. Sometimes used for compound powders, as it always appears to have been formerly. See Pulvis.

From *species* comes *spice*, (F.) *Épice*.

Spe'cies Aromat'icæ, Pulvis cinnamomi compositus—s. Diacinnamomi, Pulvis cinnamomi compositus—s. Diacretæ, Pulvis cretæ compositus—s. Diajalapæ, Pulvis jalapæ compositus—s. Diambræ sine odoratis, Pulvis cinnamomi compositus—s. Diatragacanthæ frigidæ, Pulvis tragacanthæ compositus — s. Hieræ picræ, Pulvis aloës cum canellâ — s. Lætificantes Rhazis, Pulvis cinnamomi compositus — s. e Scordio cum opio, Pulvis cretæ compositus cum opio — s. e Scordio sine opio, Pulvis cretæ compositus.

Specif'ic, *Specif'icus*, *Nosocrat'ic*, (F.) *Spécifique* (*species*, 'a peculiar sort,' and *facere*, 'to make.') A substance to which is attributed the special property of removing some particular disease. Probably no such remedy exists. *Mercury* in syphilis, and *sulphur* in the itch, have been regarded as the strongest examples. The word is also used adjectively in the sense of *special*; as "mercury has a *specific* or *special* action on the salivary glands." See Specificity, morbid.

Specif'ic of Her'renschwand. A once celebrated German vermifuge. It is said to have consisted of 10 grains of *Gamboge*, with 20 of *Carbonate of Potassa*. It is affirmed that mercury and arsenic have also been found in it.

Spécificité Morbide, Specificity, morbid.

Specific''ity, Mor'bid, (F.) *Spécificité morbide*, is the occult quality of a disease which gives occasion to peculiarity in its nature, evolution and treatment. Such is said to be a *specific* disease.

Specif'icum Paracel'si, Potassæ sulphas.

Specil'lum, *Me'lē*, *Sty'lus*, *Explorato'rium*, (from *specio*, 'I examine,') *Specula'rium*, *a Probe*, *Ex'plorator*, (F.) *Stilet*, *Stylet*, *Sonde*, *Explorateur*. A surgical instrument, employed for examining wounds, fistulas, and for passing setons, &c. It is usually formed of silver; and is terminated, at one end, by an olive-shaped button. The *eyed probe* has an aperture at the other extremity.

The perforator of the Trocar is called a *Stylet*; as well as the wire or metallic rod of the flexible catheter, which gives it shape and firmness.

Specil'lum, Everriculum, Hypaleiptron, Sound — s. Auricularium, Apyromele — s. Cereum, Bougie—s. Excavatum, Stylus excavatus—s. Latum, Spatula — s. Minus, Melotis — s. Sulcatum, see Grooved.

Spéciolé, Species.

Specks of the Cor'nea, see Caligo.

Specla'rion, (*σπεκλαριον*,) Specillum.

Spec'tacles, (*spectare*, 'to behold,') *Conspicil'la*, (Sc.) *Breels*, (F.) *Besicles*, *Lunettes ordinaires*, *Conserves*. Glasses to assist the sight; arranged so as to be adapted to both eyes. These glasses are more or less *concave* or *convex*, according as the sight is more or less short, (*myopic*,) or long, (*presbyopic*.) *Periscop'ic spectacles* consist of concavo-convex and convexo-concave lenses, and therefore have but little spherical aberration. *Pantoscop'ic spectacles*, (F.) *Verres à double foyer*, have a different focus in the upper and lower part. *Prismat'ic glasses* are employed in muscular asthenopia. When the glass is adapted to one eye, it is called an *Eyeglass*, *Conspicil'lum*, *Perspicil'lum*, *Vi'trum ocula'rē*.

Spec'troscope, (*spectrum*, and *σκοπεω*, 'I view,') see Spectrum analysis.

Spec'trum, *Spectre*, (F.) *Spectre*, (from *specio*, *spectum*, 'I see.') An appearance, real or imaginary.

Spec'trum Anal'ysis, *Prismat'ic anal'ysis*. A most delicate method of analysis, which consists in decomposing, by means of a prism, the colored light given by the salts of metals to the colorless flames of alcohol or coal gas. The spectrum is passed through a telescope, the apparatus thus constructed being called a *spectroscope*. It is a useful aid to quantitative analysis, as the colored flame of each metal, even in the minutest quantities, is found to give a well-marked and characteristic spectrum. Bunsen estimated that the amount of sodium which admitted of detection by prismatic analysis was the 195,000,000th part of a grain; of lithium the 70,000,000th; of potassium, the 60,000th; of barium the same; of strontium, the 1,000,000th; and of calcium, the 100,000,000th of a grain. Bloodstains can also be detected in this way. See Poisons.

Spec'trum, Oc'ular, *Spec'trum ocula'rē*, (F.) *Spectre oculaire*. A disturbance of vision, which consists in the appearance of objects after the objects themselves have been withdrawn. See Colors, accidental.

Spec'trum, So'lar, *Spec'trum Sola'rē*, (F.) *Spectre solaire*. The colored image produced by white light, which has been decomposed by passing through a prism. It consists of seven different colored fringes, arranged in the following order — red, orange, yellow, blue, green, indigo, and violet. Three of these — blue, red, and yellow — are simple; the others being mixtures of them.

Specula'ris La'pis. A transparent mineral, but of what nature is not clear, which was formerly employed in epilepsy. In old times it was used for glass.

Spec'ulum, *Catop'iter*, *Catop'tron*, *Diop'tron*. (In Latin, 'a mirror;' from *specio*, 'I behold.') In Surgery, it means different instruments for dilating cavities, and facilitating their examination. See Dilator. There are various instruments of this kind, — for examination of the anus, the *Speculum ani*; of the ear, *Speculum auris*; of the vagina, *Spec'ulum vagi'næ*, (*Colpeurynter*, *Elytrenrynter*;) of the uterus, *Spec'ulum matri'cis*; of the eye, *Spec'ulum oc'uli*; of the nose, *Spec'ulum nasi*; of the mouth, *Spec'ulum oris*, ([F.] *Bâillon*, *Pas d'Ane*;) of the throat, *Spec'ulum gut'turis*; of the bladder, *Spec'ulum vesi'cæ*.

Spec'ulum Cit'rinum, Orpiment—s. Helmontic, Centre, phrenic — s. Indicum, Ferri limatura.

Spec'ulum, Inträ'terine. A form of speculum devised for the introduction into the cavity of the uterus of powerful remedies, such as nitric acid.

Spec'ulum Laryn'gis, Laryngoscope—s. Lucidum, Septum lucidum — s. Oculi, see Ophthalmoscopia — s. Oris, Glossocatochus.

Spec'ulum, Pneumat'ic. A form of aural speculum to which a tube is attached in such a way that the surgeon can by suction produce motion in the membrana tympani.

Spec'ulum Ven'eris, Achillea millefolium.

Spe'cus, gen. *Specûs*, 'a cave,' Vulva — s. Cordis, Ventricle of the Heart — s. Pro medullâ spinali, see Vertebral column — s. Vertebralis, see Vertebral column.

Spedal'ske, see Radzyge.

Spedalsk'hed, see Radzyge, Elephantiasis Græcorum.

Speech, ([Sax.] ꝑpæc,) Voice, articulated.

Speech'lessness, Mutitas, Aphasia.

Speed'iman's Pills, see Pilulæ aloës et myrrhæ.

Speed'well, Brook'lime, Veronica beccabunga — s. Female, Antirhinum elatine — s. Officinal, Veronica — s. Purslain, Veronica peregrina — s. Water, Veronica beccabunga.

Spell'bone, Fibula.

Spel'trum, Zincum.

Spend'ing, (from *expendere*,—*ex*, and *pendere*, 'to weigh,—to weigh out, expend,') Ejaculation.

Sper'age, Asparagus.

Sper'agus, Asparagus.

Sperm, gen. *Sper'matis*, *Sperma*, (σπερμα, gen. σπερματος, from σπειρω, 'I sow,') *Spermat'ic flu'id* or *liq'uor*, *Sem'inal flu'id*, *Seed*, *Se'men*, *S. viri'lē* seu *masculi'num* seu *genita'lē*, *Semin'ium*, *Genita'lē*, *Medul'læ*, *Ros*, *San'guis*, *Se'rum*, *Hu'mor genita'lis* seu *semina'lis* seu *vene'reus*, *Uri'na genita'lis*, *Genitu'ra*, *Sper'ma viri'lē*, *Spermi'um*, *Thor'us*, *Lac ma'ris*, *Lagne'a*, *Lagni'a*, *Lagneu'ma*, *Ger'men*, *Vita'lē vi'rus*, *Male's milk*, *Prop'agatory* or *gen'ital liq'uor*, *Vi'tal* or *quick'ening ven'om*, (F.) *Semence*, *Fluide séminal*. A whitish, viscid fluid, of a peculiar smell, secreted by the testicles, whence it is carried by the vasa deferentia to the vesiculæ seminales, to be thrown into the vagina, during coition, through the ejaculatory ducts and the urethra. It is the fecundating fluid, and must come into actual contact with the germ of the female. The *Aur'a sem'inis*, *Gonaur'a*, is incapable of effecting fecundation. The semen, at the time of emission, is composed of two different fluids; the one liquid and transparent, which is considered to be the secretion of the prostate, — the other white, and as thick as mucilage; the product of the testicular secretion. The sperm contains, according to Vauquelin, 900 parts of water, 50 of animal mucilage, 10 of soda, and 30 of calcareous phosphate. The animal matter is peculiar, and by some termed *sper'matin*.

Microscopic observations show that it contains *spermatozo'a*, or more properly *spermatozo'ids*, for their animalcular nature is not demonstrated. They are produced in cells — *sperm cells*, *Ovules mâles* of Robin — and have probably no more title to be considered animalcular than the cilia of the ciliated epithelium. By careful examination, other minute, round, granulated bodies may almost always be detected, which are in all cases much less numerous than the spermatozoa. These bodies are the *sem'inal gran'ules*, *gran'ula sem'inis*, *spermatoph'ori*. Pure sperm, in its most perfect state, consists principally of spermatozoids and seminal granules; both of which are enveloped in a small quantity of fluid, *li'quor sem'inis*, *sperma'tic liquor*.

It has been imagined, but erroneously, that during coition there is a secretion of female sperm — *Semen muli'ebrē*, *Thelyg'onum*. The increased secretion that takes place is chiefly from the glands of Duverney.

Sperm also means spermaceti.

Sperm Cell, see Sperm.

Sper'ma, gen. *Sper'matis*, Sperm — s. Mercurii, Hydrargyrus acetatus.

Sper'ma Rana'rum, *Sperni'ola* seu *Sperni'olum* seu *Spermi'ola* seu *Spermi'olum rana'rum*. Frog's spawn. Once used in medicine.

Spermace'ti, (*sperma*, and *cetus*, 'a whale,') Cetaceum — s. Whale, see Cetaceum.

Spermacra'sia, (*sperma*, *a* priv., and κρασις, 'mixture,') Spermatorrhœa.

Spermaspas'mos, (*sperma*, and σπασμα, 'spasm,') see Spermatorrhœa.

Spermatacra'sia, Spermatorrhœa.

Spermatacrati'a, (*sperma*, *a* priv., and κρατος, 'power,') Spermatorrhœa.

Spermat'ic, *Spermat'icus*, *Semina'lis*, *Sem'inal*, (F.) *Spermatique*, (σπερματικος, from *sperma*.) That which relates to the sperm. A name given to different parts connected with the organs of generation.

Spermat'ic Ar'teries, *Arte'riæ Spermat'icæ* seu *præparan'tes*, (F.) *Artères testiculaires*, *A. de l'Ovaire* (Ch.), are two in number — one on each side—and arise from the sides of the aorta, sometimes from the renal arteries. They descend, almost vertically, at the sides of the vertebral column, and are distributed differently in the two sexes. In man, the spermatic artery, situate at the side of the vas deferens, issues by the abdominal ring, gives numerous ramifications to the spermatic cord, and divides into fasciculi of branches, one of which goes to the testicle, — the other to the epididymis. In the female, the spermatic artery, *ova'rian* or *uteroövarian artery*, dips into the pelvis, and passes to the ovarium, Fallopian tube, and round ligament.

Spermat'ic Cord or Chord, *Testic'ular Cord*, *Funic'ulus Spermat'icus*, *Spermatochord'a*, (F.) *Cordon spermatique* ou *testiculaire*. The vascular and nervous cord by which the testicle is suspended. It is composed of the spermatic artery and veins; of other small vessels; of lymphatics; of nervous filaments from the spermatic plexus, and from the genito-crural branch of the lumbo-abdominal plexus; of the vas deferens, and, very often, of a fibrocellular cord, which unites the peritoneum to the upper part of the tunica vaginalis, and in which encysted hydrocele of the spermatic cord occurs. All these parts are united together by a very lax areolar tissue, and surrounded by coats, which, reckoning from without, are: — 1. The skin and areolar membrane. 2. A fibrocellular membrane, formed by the fascia superficialis. 3. A very thin layer, formed by fibres of the cremaster muscle, united archwise before, and often also behind, the cord. 4. The proper sheath of the spermatic vessels, or the tubular prolongation furnished by the fascia transversalis to the cord, on a level with the superior orifice of the inguinal canal. The spermatic cord is commonly shorter on the right side than on the left; and of a different size in different individuals. It ascends almost vertically, from the superior margin of the testicle as far as the lower orifice of the inguinal canal; passes through this canal and enters the abdomen, crossing the epigastric artery. Here it forms an evident elbow, directing its course backward. At this part, also, the organs composing it separate from each other, the vas deferens descending into the pelvis to pass behind the bladder;—the blood-vessels and lymphatics ascending towards the lumbar region, &c.

Spermat'ic Fil'aments, Spermatozoa — s. Fluid, Sperm.

Spermat'ic Gan'glion. A large ganglion, formed by branches from the hypogastric ganglion and from the spermatic plexus. It supplies the fundus uteri. Besides these ganglia, Dr. Robert Lee describes *ves'ical* and *vag''inal ganglia*, and anterior and posterior *subperitone'al ganglia*

and *plexuses*, which communicate with the preceding, and constitute an extensive nervous rete over the entire uterus.

Spermat'ic Liq'uor, Liquor seminis, see Sperm.

Spermat'ic Pas'sages or Ways, *Vi'æ Spermat'icæ*, are the canals concerned in the excretion of semen. See Testiele.

Spermat'ic Plex'uses of Nerves, *Plex'us testicula'res*, are two in number, and are furnished by the renal plexuses. Their filaments, called *Spermatic nerves*, follow the arteries of the same name to the testiele in man, and to the ovary and Fallopian tube in the female, — *ova'rian nerves*. They cannot be traced into the substance of these organs.

Spermat'ic Veins — *ve'næ spermat'icæ* — are two or three in number on each side. They accompany the spermatic artery, and open — those of the right, into the vena eava inferior; those of the left, into the corresponding renal vein. These veins form, above the testicle, a kind of venous network, called, by some, the *Spermat'ic plex'us* and *corpus varico'sum*; and another plexus before the psoas muscles, called the *Corpus pampinifor'mē*.

Sperm'atin, see Sperm.

Spermatique, Spermatic.

Spermatis'mus, *Emis'sio sem'inis*, *Spermob'olē*, (from *sperma*.) The emission of sperm.

Sperm'atism or *Animal'culism* is the doctrine which maintains that the embryo is produced by the so-called spermatic animalcules.

Sperm'atist, Animálculist.

Spermatoce'lē, *Her'nia semina'lis scro'ti*, *Oscheoce'lē semina'lis*, *Gonoce'lē*, (*sperma*, and κηλη, 'a tumor.') The ancients gave this name to certain swellings of the testicle which were regarded as produced by an accumulation of sperm in the organ. Also, varicocele.

Spermatochor'da, (*sperma*, and *chorda*,) Spermatic chord.

Spermatoclem'ma, gen. *Spermatoclem'matis*, (*sperma*, and κλεπτω, 'I steal,') see Pollution.

Spermatoclep'sis, see Pollution.

Spermatocys'tides, (pl. of *Spermatocystis*,) (*sperma*, and κυστις, 'a bladder,') Vesiculæ seminales.

Spermatocysti'tis, gen. *Spermatocysti'tidis*, (*spermatocystis*, and *itis*.) Inflammation of a vesicula seminalis.

Spermatocystidorrhag''ia, *Caulorrhag''ia ejaculato'ria*, *Hæmatu'ria ejaculato'ria* seu *semina'lis*, (*spermatocystides*, and ῥαγη, 'a breaking forth.') A discharge of blood from the urethra in the act of ejaculation of sperm.

Spermato'des, (σπερματωδης, from *sperma*, and *odes*,) Gonoides.

Spermatogon'ia, *Spermogon'ia*, *Spermatopœi'a*, *Spermatopoë'sis*, *Sperми'um*, (*sperma*, and γενναω, 'I beget.') The preparation or secretion of sperm.

Sperm'atoid, (*sperma*, and ειδος, 'resemblance,') Gonoides, Spermatozoa.

Spermatolep'sis, (*sperma*, and ληψις, 'a taking away,') see Pollution.

Spermatolip'sis, see Pollution.

Spermatol'ogy, *Spermatolog''ia*, (*sperma*, and λογος, 'a discourse.') A treatise on sperm.

Spermatoph'orous, *Seminif''erous*, *Spermatophorus*, (*sperma*, and φερω, 'I carry.') Sperm-bearing. The cells or granules in the sperm have been so called, *Spermatophori*. See Sperm.

Spermatopœ'ia, (*sperma*, and ποιεω, 'I make,') Spermatogonia.

Spermatopoe'sis, Spermatogonia.

Spermatopoët'ic, Spermatopœus.

Spermatopœ'us, *Spermatopoët'icus*, *Spermatopoët'ic*, *Gonepæ'us*, *Gonepoët'icus*, *Gonopoet'icus*. Food to which has been attributed the property of augmenting the secretion of semen, and consequently of exciting the venereal act. Very succulent and very nutritious substances have been so considered.

Spermatorrhœ'a, *Spermorrhœ'a*, *Spermacra'sia*, *Spermatoze'mia*, *Spermatacra'sia*, *Gonacra'sia*, *Gonacratia*, *Gonoze'mia*, *Spermatacrati'a*, *Gonorrhœ'a ve'ra*, (F.) *Flux de Sperme*, *Pollutions*, *Pertes séminales*, (*sperma*, and ῥεω, 'I flow.') An emission of sperm without copulation. *Spasmodic Spermatorrhœa*, *Spermaspasmus*, is an emission of sperm simultaneous with erection of the penis, or after its partial subsidence. See Gonorrhœa, and Pollution.

Spermatorrhœ'a Aton'ica, Gonorrhœa laxorum.

Spermatos'chesis, (*sperma*, and σχεσις, 'retention.') Retention or suppression of the spermatic secretion.

Spermatoze'mia, (*sperma*, and ζημια, 'loss,') Spermatorrhœa.

Spermatozo'a, pl. of *Spermatozo'on*, *Zoosperm'ata*, *Zo'osperms*, *Spermazo'a*, (*sperma*, and ζωον, 'animal,') *Animal'cula semina'lia* seu *spermat'ica*, *Fi'la spermat'ica*, *Corpus'cula sem'inis*, *Vermic'uli spermat'ici*, *Sperm'atoids*, *Spermatozo'ids*, *Protozö'ids*, *Sem'inal* or *spermat'ic fil'aments*, *Spermat'ic* or *sem'inal animal'cules*, (F.) *Zoöspermes*, *Spermatozoäires*. Reputed animalcules seen in the sperm, considered by physiologists to be the formative agents furnished by the male in generation. See Sperm.

Spermatozaires, Spermatozoa.

Spermatozo'ids, (*sperma*, ζωον, 'animal,' and ειδος, 'resemblance,') Spermatozoa.

Sperm'iduct, (*sperma*, and *ductus*, 'a duct,') Deferens, vas.

Spermi'olum Rana'rum, Sperma ranarum.

Sperm'ium, Sperm, Spermatogonia.

Spermob'olē, (*sperma*, and βαλλω, 'I throw,') see Ejaculation, Spermatismus.

Spermoë'dia Cla'vius, (*sperma*, and οιδεω, 'I swell,' — the diseased seeds,) Ergot.

Spermogon'ia, Spermatogonia.

Sperm'olith, *Spermol'ithus*, (*sperma*, and λιθος, 'a stone.') A calculus in the spermatic duct or vesicula seminalis.

Spermoneural'gia, (*sperma*, and *neuralgia*.) Neuralgia of the spermatic cord.

Spermophlebecta'sia, (*sperma*, φλεψ, gen. φλεβος, 'a vein,' and εκτασις, 'dilatation.') A varicose condition of the spermatic veins.

Spermorrhœ'a, Spermatorrhœa.

Spermothe'ca, (*sperma*, and *theca*, 'a sheath.') A reservoir or sac in the interior of the body of some insects, as the bee, which becomes filled with the fertilizing fluid of the male.

Spermozo'a, pl. of *Spermozoön*, (*sperma*, and ζωον, 'animal,') Spermatozoa.

Sperni'olum Rana'rum, Sperma ranarum.

Spew'ing, ([Sax.] ꝑꝑan, [Gr.] πτυω, [L.] *ptuo*, 'I spit,') Vomiting.

Sphac''elated, *Sphacela'tus*, (F.) *Sphacélé*. Struck with sphacelus.

Sphacela'tion, (from *sphacelus*,) Mortification.

Sphacèle, Sphacelus — *s. de la Bouche*, Cancer aquaticus.

Sphace'lia Seg''etum, (from *sphacelus*,) Ergot.

Sphacelis'mus, Sphacelus — s. Cerebri, Phrenitis.

Sphac''elus, (σφακελος,) *Gangræ'na Sphacelus*, *Sphacelis'mus*, *Cold mortifica'tion*, (F.) *Sphacèle*, *Gangrène froide*, (from σφαζω, 'I slay.') This word is used by some synonymously with gangrene; by others, with gangrene when it occupies the whole substance of a limb. Commonly, it means the disorganized portion, in cases of mortification, *anthracomecro'sis*, which must be thrown off — or is, in other words, totally dead. The foul disorganized portion of an ulcer — called the *slough* — must be considered a kind of sphacelus.

Sphacelus was formerly used to denote excessive pain, and also agitation from excessive pain or violent emotion.

Sphac''elus Cerea'lis, Ergotism — s. Nosocomialis, Hospital gangrene.

Sphæ'ra, (σφαιρα, 'a ball,') Pila — s. Marina, Pila marina — s. Thalassia, Pila marina.

Sphæran'thus In'dicus, (*sphæra,* and ανθος, 'a flower,') Adaca.

Sphæ'ria Sinen'sis, (σφαιρα, 'a globe,') *Hia Tsao Tom Tchom, Hia Tsao Tong Tchong, Totsu Kaso, Sum'mer-plant win'ter worm, Veg''etable cat'erpillar.* A fungus which projects from the neck of a lepidopterous insect. It is highly esteemed by the Chinese as a tonic, like ginseng.

Sphærid'ion, (dim. of *sphæra,*) Globule, Pilula.

Sphæ'rion, Globule, Pilula.

Sphæroceph'ala Ela'tior, (*sphæra,* and κεφαλη, 'head,') Echinops.

Sphærococ'cus Cris'pus, (*sphæra,* and κοκκος, 'a berry,') Fucus crispus — s. Helminthochortus, Corallina Corsicana — s. Lichenoides, Fucus amylaceus.

Sphæ'rula Gale'ni, (dim. of *sphæra,*) Pilula.

Sphæ'rulæ San'guinis, Globules of the blood.

Spha'gē, (σφαγη,) Throat.

Sphen'donē, (σφενδονη, 'a sling,') Funda.

Sphe'no, in the composition of anatomical terms, the sphenoid bone.

Sphenocepha'lia, (σφην, 'a wedge,' and κεφαλη, 'head.') Monstrosity, in which the head is wedge-shaped, owing to the projection of the anterior fontanel region.

Sphéno-épineuse Artère, 'sphenospinous artery,' Meningeal artery, middle.

Sphenotre'sia, (σφην, 'a wedge,' and τρησις, 'perforation,') Transforation.

Sphe'noid, (σφηνοειδης,) *Sphenoï'des, Spheno'des, Sphenoïdeus, Sphenoïda'lis,* (F.) *Sphénoïde,* (σφην, 'a wedge,' and ειδος, 'resemblance.') Wedge-shaped. Hence,

Sphe'noid Bone, *Sphenoïdes os, Os basila'rē* seu *cuneifor'mē* seu *cu'neo compara'tum* seu *sphenoida'lē* seu *multifor'mē* seu *az'ygos* seu *papilla'rē* seu *polymor'phon* seu *paxilla'rē* seu *baxilla'rē* seu *alæfor'mē* seu *sphecoï'deum* seu *vespiformé* seu *inconjuga'tum* seu *pterygoïdeum* seu *ala'tum* seu *colato'rii, Pter'ygoid bone.* An azygous bone, situate on the median line, and at the base of the cranium. It articulates with all the other bones of that cavity, supports them, and strengthens their union. Its form is singular, and resembles a bat with its wings extended. It has — 1. An *infe'rior* or *gut'tural surface,* on which is situate the crista that joins the vomer, a channel which concurs in forming the pterygopalatine foramen, the pterygoid process, the pterygoid fossa, the scaphoid depression, the Vidian or pterygoid canal, the foramina (ovale, spinale, &c.). 2. A *supe'rior* or *cer'ebral surface,* on which are — the clinoid processes, the pituitary fossa, the *fora'mina* (*ovale, rotundum,* and *spinale*), the *apophysis of Ingrassias* or *lesser wing,* the foramen opticum, &c. 3. An *occip'ital* or *poste'rior surface,* which is articulated with the basilary process of the occipital bone. 4. An *ante'rior* or *or'bitar na'sal surface,* having anteriorly a *crista* to unite with the ethmoid bone, and on each side a round aperture which leads into two cavities in the substance of the bone, separated by a middle septum, and called the *sphenoidal sinuses* or cells. 5. Two *zygomato-tem'poral* or *exter'nal surfaces,* which correspond to the temporal and zygomatic fossæ.

Some divide the sphenoid into *body* or *middle portion;* and *alæ,* which are four in number, and are subdivided into *great* (*Temporal Plates* or *Wings, A'læ mag'næ*) and *little* (*Apophyses of Ingrassias, A'læ mino'res, Processus ensifor'mes*).

The *Sphenoid suture* surrounds the bone.

Sphe'noid, Spi'nous Proc''ess of the, Sphenoid spine.

Sphenoid'al, *Sphenoïda'lis.* That which belongs or relates to the sphenoid bone.

Sphenoid'al Cells, see Sphenoid bone.

Sphenoid'al Cor'nua, *Cor'nua Sphenoïda'lia, Ossic'ula* seu *Cor'nua Berti'ni, Ossa triangula'ria, Cor'nua of Bertin, Pyr'amids of Wis'tar, Bones of Bertin,* (F.) *Cornets sphénoïdaux* ou *de Bertin, Osselets de Bertin.* Two small, thin, and curved bones, situate between the sphenoid and ethmoid, with which they are confounded in the adult. They have the shape of a hollow pyramid, with the base turned backwards, and are developed by a single point of ossification. They are articulated with the sphenoid, ethmoid, palate bone, and vomer.

Sphenoid'al or Supe'rior Or'bitary Fis'sure, *Fora'men lac''erum supe'rius,* (F.) *Fente sphénoïdale,* is a large fissure, situate between the great and little ala of the sphenoid. It is seen at the upper and back part of the orbit, between which and the cranium it is a means of communication, and transmits the third, fourth, and sixth pair of nerves, and the first branch of the fifth pair, to the eye and its appendages.

Sphenoid'al Si'nuses, see Sphenoid.

Sphenoid'al Spine, *Spi'na* seu *Cris'ta sphenoïda'lis,* (F.) *Épine sphénoïdale, Spi'nous Proc''ess of the Sphenoid:* — 1. A projecting crista at the inferior surface of the sphenoid bone, for articulation with the vomer. 2. A triangular process, *Apophyse sous-temporale* (Ch.), met with near the posterior margin of the same bone, behind the foramen spinale. At the point of the spinous process, a *styloid process* is frequently met with.

Sphenoï'des, (σφηνοειδης,) Cuneiform, Sphenoid — s. Os, Sphenoid bone.

Sphenomax'illary, *Sphenomaxilla'ris.* That which relates to the sphenoid and maxillary bones.

Sphenomax'illary Fis'sure, *Infe'rior or'bitar Fis'sure,* (F.) *Fente sphéno-maxillaire* ou *orbitaire inférienre;* called, also, *Fora'men lac''erum infe'rius* seu *sphenomaxilla'rē,* is situate at the posterior part of the angle formed by the union of the internal and inferior parietes of the orbit. It is constituted, above, by the sphenoid bone; below, by the superior maxillary and palate bones; and, before, by the malar bone. It is narrower at the middle than at the extremities, and forms a communication between the orbitar cavity and the zygomatic fossa.

Sphenomax'illary Fos'sa is a name given by some anatomists to a depression at the union of the sphenomaxillary and pterygomaxillary fissures.

Sphenoör'bitar. A name given by Béclard to the anterior part of the body of the sphenoid bone, which is developed by a variable number of points of ossification.

Sphenopal'atine, *Sphenopalati'nus.* That which relates to the sphenoid and palate bones.

Sphenopal'atine Ar'tery, *Large lat'eral nasal artery, Arte'ria sphenopalati'na,* is the termination of the internal maxillary. It enters at the posterior part of the superior meatus of the nose, through the sphenopalatine foramen, and spreads its numerous branches on the pituitary membrane covering the septum, the cornua, and the meatus.

Sphenopal'atine Fora'men is a round aperture, formed by the vertical portion of the os palati and the sphenoid. It establishes a communication between the nasal fossæ and the zygomatic fossa.

Sphenopal'atine Gan'glion, *Gan'glion of Meckel, Sphenoidal Ganglion* (Ch.). A small, nervous, cordiform, or triangular ganglion, of variable size, situate without the foramen sphænopalatinum, in the pterygomaxillary fissure. It seems

suspended by several nervous filaments to the trunk of the superior maxillary nerve, and gives off *internal* or *sphenopalatine filaments*, *inferior* or *palatine filaments*, and a *posterior filament*, which is the *Vidian* or *pterygoid nerve*.

Sphenopal'atine Nerves, *Lat'eral nasal nerves*, arise from the ganglion just described, at its inner part, and enter the nasal fossæ by the sphenopalatine foramen. They are five or six in number, and distribute their filaments to the outer and inner parietes of the nasal fossæ. One of the most remarkable branches is the *Nasopalatine*.

Sphenopalati'nus, Levator palati.

Sphenopari'etal, *Sphenoparieta'lis*. That which belongs or relates to the sphenoid and parietal bones.

Sphenopari'etal Su'ture is formed by the articulation of the extremity of the greater ala of the sphenoid with the anterior and inferior angle of the parietal bone.

Sphenopterygopalati'nus, Circumflexus.

Sphĕno-salpingo-mallĕen, Laxator tympani — s. Salpingostaphylinus, Circumflexus.

Spheno'sis, (σφηνωσις,) see Wedged.

Sphenostaphyli'nus, Circumflex muscles (of the palate).

Sphenotem'poral, *Sphenotempora'lis*. That which belongs to the sphenoid and temporal bones.

Sphenotem'poral Su'ture is the suture at the articulation of the great alæ of the sphenoid bone with the squamous portion of the temporal. Béclard gave the name *sphenotemporal* to the posterior part of the body of the sphenoid, which is developed by distinct points of ossification.

Sphex, gen. *Sphe'cis*, (σφηξ,) Wasp.

Sphinc'ter, gen. *Sphincte'ris*, (σφιγκτηρ,) *Constric'tor*, *Mus'culus constricto'rius*, (from σφιγγω, 'I constrict.') A name given to several annular muscles, which constrict or close certain natural openings.

Sphinc'ter A'ni, *Annula'ris A'ni*. Many anatomists have described two sphincter muscles of the anus: — 1. The *S. exter'nus* seu *cuta'neus*, *Aspidis'cus*, *Coccygio-cutané-sphincter*, *Orbicula'ris Rec'ti*, *Constric'tor A'ni*, *Coccygio-anal* (Ch.). It is situate around the anus; is elliptical from before to behind; flattened, and pierced at its middle. Its fibres describe concentric arcs, which are attached, behind, to the extremity of the coccyx, by a dense, areolar substance; and are confounded, anteriorly, with the bulbo-cavernosi and transversi perinæi muscles. This muscle contracts and closes the anus. 2. The *in'ner* or *inter'nal Sphinc'ter A'ni*, *Sphinc'ter intestina'lis* of Winslow, is by many anatomists considered as the termination of the circular fibres of the rectum. It is annular, and situate around the inferior extremity of the rectum, to the extent of about a finger's breadth. It has the same uses as the other.

Sphinc'ter Gu'læ, Constrictores pharyngis — s. Ilei, Bauhin, valve of — s. Intestinalis, Sphincter ani internus — s. Iritis, see Iris — s. Labiorum, Orbicularis oris — *s. des Lèvres*, Orbicularis oris — s. Oculi, Orbicularis palpebrarum — s. Oris, Orbicularis oris — s. Palpebrarum, Orbicularis palpebrarum — s. Pupillæ, see Iris — s. Pylori, see Pylorus — s. Vaginæ, Constrictores cunni — s. Ventriculi, Pylorus.

Sphinc'ter Vesi'cæ, *Sphinc'ter of the blad'der*. Some anatomists have given this name to whitish, elastic, and circular fibres, which surround the neck of the bladder, but do not constitute a particular muscle. Morgagni has given the name *Pseudosphinc'ter* to the anterior fibres of the levator ani, which pass beneath the neck of the bladder, and, by their contraction, close that opening. See Compressor urethræ.

Sphondyl'ium, (σφονδυλιον,) Heracleum sphondylium.

Sphon'gus, (σφογγος,) Fungus, Spongia.

Sphragidonychar'gocome'ta, (σφραγις, 'a seal,' ονυξ, gen. ονυχος, 'a nail,' αργος, 'white,' or perhaps αργυρος, 'silver,' and κομεω, 'I adorn.') A charlatan who adorned his fingers to the very nails with rings.

Sphyg'ma, (σφυγμη,) Pulse.

Sphyg'mic, *Sphyg'micus*, (F.) *Sphygmique*, (from *sphygma*.) Relating to the pulse; pulsatory.

Sphyg'mic Art, Sphygmologia.

Sphyg'mica Doctri'na, Sphygmologia.

Sphyg'micus, (σφυγμικος,) Throbbing.

Sphygmoceph'alus, (σφυγμος, 'pulse,' and κεφαλη, 'head,') Crotaphe.

Sphygmo'des, (σφυγμωδης, from *sphygmus*, and *odes*,) Throbbing.

Sphyg'mograph, *Sphygmograph'ium*, (*sphygmus*, and γραφω, 'I describe.') An instrument which, when applied over the heart or an artery, indicates graphically the character of the pulse as to force and extent of undulations.

Sphygmolē'gium, (*sphygmus*, and *lego*, 'I read,') Pulsilegium.

Sphygmologe (F.), *Sphygmolog''ium*, (*sphygmus*, and λεγειν, 'to indicate.') An instrument for showing the quickness or other qualities of the pulse.

Sphygmolog''ia, *Sphygmol'ogy*, *Sphyg'mica Doctri'na*, *Ars Sphyg'mica*, (*sphygmus*, and λογος, 'a description.') The doctrine of the pulse.

Sphygmom'eter, Pulsilegium.

Sphyg'mophone, (*sphygmus*, and φωνη, 'sound.') An instrument devised by Dr. Upham, of Boston, to enable the ear to determine the rhythm, &c. of the pulse of a person at a distance by means of the electric wire.

Sphyg'moscope, (*sphygmos*, and σκοπεω, 'I examine,') Pulsilegium.

Sphygmoscop'ium, Pulsilegium.

Sphygmosys'tole, (*sphygma*, and *systole*, 'contraction.') The time during which the systole at the heart influences the pulse-beat, as demonstrated by the sphygmograph.

Sphyg'mus, (σφυγμος,) Pulsation, Pulse.

Sphy'ra, (σφυρα,) Malleolus.

Sphy'ron, (σφυρον,) Malleolus.

Sphyrot'omy, (σφυρα, 'malleolus,' and τομη, 'section.') The operation of excising the handle of the malleus. The excision of a portion of the membrana tympani is called *Myringodec'tomy*, (*myringa*, 'the membrana tympani,' and εκτομη, 'excision.')

Sphyx'is, (σφυξις,) Pulsation.

Spic, Lavandula.

Spi'ca, *Fas'cia re'pens*, *Spi'ca ban'dage*, (F.) *Épi*. A bandage, so called in consequence of its somewhat resembling a *spike* of barley. The turns of the bandage cross like the letter V; each leaving a third of the roller uncovered. It is distinguished into *ascending* and *descending*. It may be applied over various parts of the body, and in a different manner in each case: thus, there is the *Spica* seu *Fas'cia inguina'lis*, *Spica inguina'lis duplex*, the spica for the shoulder, and another for the thumb. *Ribbail's bandage* is a form of spica for the instep, the use of which is indicated where pressure is needed.

Spi'ca, Lavandula spica — s. Alpina, Valeriana Celtica — s. Celtica, Valeriana Celtica — s. Indica, Nardus Indica — s. Nardi, Nardus Indica.

Spice, see Species.

Spice'berry, Gaultheria, Laurus benzoin.

Spice'bush, Laurus benzoin.

Spi'ces, Four, see Myrtus pimenta.

Spice'wood, Laurus benzoin.

Spicil'lium, Speciillum.

Spic'ula, see Spiculum.

Spic'ulum, pl. *Spicula*. A small spike-like fragment of bone.

Spi'der, (from *spin* [?],) see Araneæ tela.

Spi'der's Web, Araneæ tela.

Spi'derwort, Liliago, Tradescantia Virginica.

Spige'lia, (after Adrian Spigelius, the anatomist,) S. Marilandica.

Spige'lia, Anthel'mia, *Demera'ra Pink'root,* (F.) *Spigélie anthelmintique, Brinvilliers, Brinvillière,* a native of South America and the West India Islands, has properties like the

Spige'lia Marilan'dica, *S. Lonice'ra, Anthel'mia, Lonice'ra Marilan'dica,* (F.) *Spigélie du Maryland; Peren'nial Wormgrass* or *In'dian Pink, Caroli'na Pink, Star'bloom, Worm'root. Nat. Ord.* Gentianaceæ. *Class,* Pentandria. *Order,* Monogynia. Indigenous. The root — *Spigelia* (Ph. U. S.) *Pinkroot* — is celebrated as an anthelmintic, particularly in cases of lumbrici.

It is also asserted to have been found serviceable in remittent fever. It is a narcoticoäcrid. Dose, gr. x. to ʒss.

Spig'nel, Æthusa meum.

Spike'nard, (*spica,* 'a spike,' and *nardus,* 'nard,') Conyza squarrosa, Nardus Indica — s. American, Aralia racemosa — s. False, Smilacina racemosa — s. Small, Aralia nudicaulis — s. Tree, Aralia spinosa.

Spilan'thes, Spilanthus.

Spilan'thus Acmel'la, *S. cilia'ta* seu *fimbria'ta, Spilan'thes acmel'la,* (σπιλος, 'a spot,' and ανθος, 'a flower,' owing to its dotted or speckled flower,) *Bi'dens acmel'la, Achmel'la, Acmel'la, A. Mauritia'na, Verbesi'na acmella, Balm'leaved Spilan'thus. Ord.* Compositæ. *Sex. Syst.* Syngenesia Polygamia æqualis. This plant possesses a glutinous, bitter taste, and fragrant smell. The herb and seed are said to be diuretic and emmenagogue. They have been used in dropsies, jaundice, fluor albus, and calculous complaints; given in infusion.

Spilan'thus, Balm'leaved, Spilanthus acmella — s. Ciliata, S. acmella — s. Fimbriata, S. acmella.

Spilan'thus Olera'ceus, *Spearleaved Spilan'thus, Bidens fer'vida,* (F.) *Cresson de Para.* A tincture of the plant has been recommended in toothache, (F.) *Paraguay-roux.*

Spi'li, (σπιλος, 'a spot or stain,') see Nævus.

Spilo'ma, (σπιλωμα,) see Nævus.

Spilopla'nia, (σπιλος, 'a spot,' and πλανος, 'wandering.') The red spots which occur in elephantiasis Græcorum.

Spiloplaxie, (σπιλος, 'a spot,' and πλαξ, 'a plate,') Elephantiasis of India.

Spilo'sis, (from σπιλος, 'a spot,' and *osis,*') Epichrosis — s. Ephelis, Ephelides — s. Poliosis, Poliosis.

Spils'bury's Antiscorbu'tic Drops. An empirical preparation, formed of *hydrarg. oxymur., rad. gentian., cort. aurant.* sicc., āā ʒij., *antimon. crud., santal. rubr.,* āā ʒj., *spiritus vini rectif., aquæ,* āā ʒviij.

Spi'lus, pl. *Spili,* see Nævus.

Spi'na, 'a thorn,' *Spine,* (F.) *Épine,* (old F.) *Espine.* A process on the surface of a bone, which has been compared to the spines or thorns on certain vegetables. The chief processes of this name are the *nasal spine,* the *spine of the scapula,* the *spine of the ischium,* the *four iliac spines,* the *palatine spine,* the *maxillary,* the *sphenoid,* &c. The *spine of the back* is the collection of vertebræ constituting the *vertebral column.*

Spi'na, Penis — s. Acida, Oxyacantha Galeni — s. Ægyptiaca, see Acacia — s. Alba, Carduus marianus, Mespilus oxyacantha, Onopordon acanthium — s. Bifida, see Hydrorachis — s. Cervina, Rhamnus — s. Domestica, Rhamnus — s. Dorsi, Vertebral column — s. Dorsi introrsum flexa, Lordosis — s. Ferrea, Pin — s. Helmontii, Aiguillon — s. Hirci, Astragalus verus — s. Infectoria, Rhamnus — s. Mentalis, see Genian — s. Nasi, see Nasus — s. Nodosa, Rachitis — s. Sphenoidalis, Sphenoidal spine.

Spi'na Ventosa, *Spi'næ ventosi'tas, Tere'do, Ostarthroc'acē, Fun'gus* seu *Tu'mor fungo'sus artic'uli, Lu'pia junctu'ræ, Hyperspon'gia, Fla'tus spi'næ, Arthroc'acē, Pædarthroc'acē, Sidera'tio Os'sis, Can'cer Os'sis, Gangræ'na Os'sis, Exosto'sis, Os'teoid Cancer, White Swel'ling* (of some). A term of no definite meaning, as is obvious from these various words having been considered its synonyms. By some it is defined to be a disease of the osseous system, in which the texture of the bone dilates, seeming to be distended with air, and constituting a variety of osteosarcoma. By others it is considered to be a tumor arising from an internal caries of a bone; occurring most frequently in the carpus or tarsus. The term itself is a translation from the Arabic of Rhazes. See, also, Hydrarthrus, Mollities Ossium, and Osteoid.

Spi'na Vertebra'lis, Vertebral column — s. Vestibuli, Crista vestibuli.

Spin'ach, Spinacia.

Spina'chia, Spinacia.

Spina'cia, *Spina'chia, Spina'cia olera'cea, Spin'age, Spin'ach,* (from *spina,* 'a thorn or prickle,') (F.) *Épinard. Ord.* Chenopodiaceæ. *Sex. Syst.* Dicœcia Pentandria. A plant which resembles the cabbage in its dietetic powers. The leaves boiled, with the addition of oil, form a good emollient cataplasm. It has been used in phthisical complaints; but its medicinal properties, if it have any, are not now regarded.

Spina'cia Olera'cea, Spinacia.

Spi'næ, pl. of *Spina,* Spinous processes — s. Ventositas, Spina ventosa.

Spin'age, Spinacia.

Spi'nal, *Spina'lis, Spino'sus, Spina'tus, Rhachi'tes, Rachid'ian,* (F.) *Épinière, Rachidien,* (from *spina,* 'spine.') That which relates to the vertebral column.

Spi'nal Ac'cessory, Spinal nerve.

Spi'nal Ar'teries, *Arte'riæ spina'les,* are two in number, viz.: 1. The *poste'rior spi'nal, Artère médiane postérieure du Rachis* (Ch.). It arises from the vertebral, near the corpora pyramidalia, and descends on the posteri surface of the spinal marrow, distributing its ramifications to it. 2. The *ante'rior spi'nal ar'tery, A. médiane antérieure* (Ch.), is larger than the last, and arises, also, from the vertebral. It descends, in a serpentine manner, upon the anterior surface of the marrow; furnishes ramusculi to it, and unites with that of the opposite side, opposite the foramen magnum occipitis. A very tortuous branch arises from this union, which descends as far as the inferior extremity of the marrow, to which it sends numerous divisions.

The term *Spi'nal Ar'teries* or *Rachid'ian Ar'teries* is also given, in the abstract, to all the arteries of the spinal marrow and vertebral canal. The same may be said of the veins and nerves.

Spi'nal Cord, Medulla spinalis — s. Debility, Spinal weakness.

Spi'nal Foram'ina, (F.) *Trous rachidiens,* in the abstract, are the foramina formed by every two contiguous vertebræ, through which the spinal nerves issue. See Vertebral. The term *Fora'men spina'lē* seu *spino'sum* is especially applied, however, to a small foramen, in front of the spinous process of the sphenoid bone, through which the middle artery of the dura mater enters the cranium. It is, likewise, called *Fora'men sphenospino'sum,* (F.) *Trou sphéno-épineux* ou *petit rond, Trou épineux.*

Spi'nal Gan'glion, see Encephalon.

Spi'nal Irrita'tion, *Rhachialgi'tis, Rhachial'gia, Neural'gia spina'lis, Notal'gia.* A modern pathological view, which refers most nervous diseases to irritation of the spinal cord. This irrita-

tion is presumed to be indicated by tenderness on pressure over the spinous process of one or more vertebræ, or over the nerves proceeding from the cord and distributed to the parts at the sides of the spine. Such tenderness, however, by no means indicates the pathological condition in question, as it is often met with in those enjoying perfect health. The treatment advised is cupping and counterirritation on each side of the spine, which may be beneficial in such diseases, no matter what part of the frame may be in a morbid state, by exciting a new and revellent impression on a very sensible portion of the cutaneous surface.

Spi'nal Mar'row, Medulla spinalis.

Spi'nal Nerve, *Ac'cessory of the Par va'gum* or *Eighth pair, Ac'cessory nerve of Wil'lis, Spi'nal ac'cessory, Supe'rior res'piratory nerve, Elev'enth pair of encepha!'ic nerves,* (F.) *Spino-cranio-trapézien, Trachélo-dorsal* (Ch.), arises from the medulla spinalis, within the vertebral canal, between the anterior and posterior roots of the cervical nerves, at a greater or less distance from the cranium. The roots unite to form the nerve, which ascends into the cranium through the foramen magnum of the occipital bone, and issues by the foramen lacerum posterius, crossing the sternocleidomastoideus, to which it gives filaments, and losing itself entirely on the trapezius muscle. The pneumogastric and spinal accessory nerves together — *nervus vagus cum accesso'rio* — resemble the spinal nerves: the former, with its ganglion, being the posterior root; the latter the anterior.

The spinal accessory appears to be the nerve of voice — *vocal nerve.*

Spi'nal Nerves, Vertebral nerves — s. Prolongation, Medulla spinalis — s. System of nerves, see Nerves.

Spi'nal, True, see Nerves.

Spi'nal Weak'ness, *Spinal Debil'ity.* A term vaguely used for want of power in the extensor or other muscles of the spine, with tendency to deviation of the vertebral column. It is most seen in the nervous and delicate female, and is not unfrequently owing to carelessness of posture.

Spina'les Col'li Mino'res, Interspinales colli — s. et Transversales lumborum, Transversalis dorsi.

Spina'lis Cervi'cis, Semispinalis colli — s. Colli, Semispinalis colli.

Spina'lis Dor'si, *Spina'lis dor'si ma'jor,* (F.) *Grand épineux du dos.* Winslow calls thus some fleshy fasciculi, which are situate on the lateral surfaces of the spinous processes, from the third dorsal vertebra to the first or second lumbar; and which form part of the transversospinalis of most authors. The same anatomist calls — *Spina'lis Dor'si mi'nor, Petit épineux du dos* — some small, fleshy fibres, situate on each side of the interspinal ligament. They are short, flat, and pass from one spinous process to another. Like the preceding, they form part of the transversospinalis. All these fleshy fasciculi strengthen the vertebral column.

Spi'nants. Medicines which, by their action on the spinal nervous system, excite muscular contraction, as strychnia, brucia, &c.

Spina'ti, Interspinales colli.

Spina'tus, Spinal.

Spin'dle Tree, Euonymus Americanus.

Spine, Spina, Vertebral column — s. Curvature of the, Gibbositas—s. Hæmal, Sternum—s. Neural, Spinous process—s. Railway, see Concussion — s. Revolving, Rotatio spinæ.

Spin'gle, Anethum.

Spi'niäxoidoöccipita'lis, Rectus capitis posticus major.

Spini-axoïdo-trachéli-atloïdien, Obliquus inferior capitis.

Spin'dle-cell'ed Sarco'ma, see Sarcoma.

Spini'tis, gen. *Spini'tidis, (spina,* 'the spine,' and *itis,)* Myelitis.

Spin'nick, Nanus.

Spinobul'bar, (F.) *Spinobulbaire, (spina,* 'spine,' and *bulbus,* 'a bulb.') Relating to the spinal cord and the medulla oblongata; as the *Spinobul'bar neuro'ses,* (F.) *Névroses spinobulbaires,* which include paralysis agitans, chorea, and tetanus.

Spinodorsi'tis, gen. *Spinodorsi'tidis, (spina, dorsum,* 'the back,' and *itis,)* Myelitis.

Spi'nola, (from *spina,* 'the spine,') see Hyporachis.

Spino'sus, (from *spina,* 'the spine,') Spinal.

Spi'nous, *Spino'sus,* (F.) *Épineux,* (from *spina,* 'a thorn.') Having the shape of a spine or thorn.

Spi'nous Proc''esses or Apoph'yses *of the Ver'tebræ, Acan'thæ, Spi'næ, Cynol'ophoi, Neu'ral Spines* of Owen, (F.) *Apophyses épineuses,* are situate at the posterior part of each vertebra, and afford attachment to the muscles, whose office it is to extend the spine. See Vertebra.

Spinthero'pia, (σπινθηρ, 'a spark, and ωψις, 'vision,') Confusio.

Spi'nula, (dim. of *spina,* 'a thorn,') Pin.

Spirac'ula, (pl. of *spiraculum,*) (F.) *Spiracules,* (from *spiro,* 'I breathe,') 'breathing holes.' Respiratory pores of the skin.

Spi'ræ Cer'ebri, (σπειρα, *spira,* 'a fold, a winding,') Convolutions, cerebral.

Spiræ'a Denuda'ta, (from *spira,* 'a spire,') S. ulmaria.

Spiræ'a Filipen'dula. *Filipendula, Saxif'raga ru'bra, Drop'wort,* (F.) *Filipendule. Ord.* Rosaceæ. *Sex. Syst.* Icosandria Pentagynia. The root of this plant is said to possess astringent and lithontriptic virtues.

Spiræ'a Loba'ta, *S. Palma'ta, Queen of the Prai'rie, Amer'ican Mead'owsweet.* An oil, resembling oleum gaultheriæ, is obtained from the roots and stems.

Spiræ'a Opulifo'lia, *Opulus-leaved Spiræa, Nine Bark,* has similar properties.

Spiræ'a Palma'ta, S. lobata.

Spiræ'a Tomento'sa, *Hard'hack, Red mead'owsweet, Stee'plebush, Ro'sy bush, Whiteleaf.* The root of this indigenous species, *Spiræ'a,* (Ph. U. S.,) which is abundant in the northern States of the Union, is tonic and astringent; and is usually administered either in the form of extract or decoction, (*Spiræ,* ℥ss., *Aquæ,* Oj.)

Spiræ'a Trifolia'ta, Gillenia trifoliata.

Spiræ'a Ulma'ria, *S. denuda'ta, Ulma'ria, U. palus'tris, Regi'na Pra'ti, Bar'ba ca'præ, Barbula capri'na, Mead'owsweet, Queen of the Mead'ows,* (F.) *Ulmaire, Spirée ulmaire, Reine des Prés, Vignette, Herbe aux Abeilles.* The leaves havebeen recommended as mild astringents and diuretics — the flowers as antispasmodies and diaphoretics.

Spi'ral Ban'dage. A bandage which ascends obliquely around more or less conical portions of the body, each turn being applied smoothly to the surface, the folds being sometimes reversed to attain this object.

Spi'ral Plate, Lamina spiralis.

Spiramen'ta Pulmo'num, 'airholes of the lungs,' (from *spirare,* 'to breathe,') see Pulmo.

Spiramen'tum An'imæ, 'airhole of the breath,' Pulmo.

Spira'mina (pl. of *spiramen*) **Palpebra'rum,** 'pores of the eyelids,' Lachrymal puncta—s. Pulmonum, see Pulmo.

Spira'tio, (*spirare, spiratum,* 'to breathe,') Respiration.

Spirée Ulmaire, Spiræa ulmaria.

Spiril'lium. A variety of cells of bacterial fungi, having a serpentine motion.

Spir'it, *Spir'itus,* (*spirare,* 'to breathe, to exhale,') (F.) *Esprit, Alcoolat.* A name given to every liquid product of distillation. Spirits were

formerly distinguished into — *inflammable, acid,* and *alkaline;* and consequently a number of substances were crowded together, which often resembled each other in no other property than in being volatile. The term is now confined to alcoholic liquors, the chief of which are:

I. *Arack'* or *Arrack'.* Distilled from coarse palm sugar, named *jaggery;* fermented with the bark of the *Mimo'sa leucophle'a;* also from rice and the fermented juice of the Palm; made in India. Its varieties are: —

1. *Mahwah Arrack'.* Made in India from the flowers of the Madhuca tree, *Bas'sia butyra'cea.*

2. *Tuba.* Made from palm wine, in the Philippine Islands. See Arack.

II. *Araka.* Distilled, by the Tartars, from koumis, fermented mares' milk.

III. *Araki.* Distilled from dates, by the Egyptians.

IV. *Arika.* A variety of koumis, distilled from fermented mares' milk, in Tartary and Iceland.

V. *Brandy.* Distilled from wine, figs, peaches, persimmon, apple, mulberries, and sometimes other fruits, in Europe, Asia, North and South America, wherever wine is made. The best brandy is that of Cognac: the next, that of Bordeaux and Rochelle. The varieties are —

1. *Aguardiente* (S.). In Peru, the common brandy obtained from grapes is the *Aguardiente de Pisco,* so called, because shipped at the port of Pisco. Another kind, much dearer, and of excellent flavor, is made from Muscatel grapes, and is called *Aguardiente de Italia.* It is sometimes seen in the United States.

2. *Lau.* Made from rice, in Siam.

3. *Rakia.* Made in Dalmatia from the husks of grapes mixed with aromatics.

4. *Rossolio.* Made at Dantzic, from a compound of brandy, rossolis, and other plants.

5. *Troster.* Made on the Rhine, from the husks of grapes, fermented with barley and rye.

6. *Sekiskayavodka.* Made from the lees of wine and fruit at Scio.

Brandy is officinal in the Ph. U. S. (1873) under the name *Spir'itus Vi'ni Gal'lici, Spirit of French wine.*

VI. *Gene'va, Hol'lands,* (*genièvre,* French for juniper.) Distilled from malted barley and rye, rectified on juniper berries, in Holland. Its variety is —

Gin. Made in England, from malted barley, rye, potatoes; rectified with turpentine.

VII. *Goldwasser.* Distilled at Dantzic, from wheat, barley, and rye, rectified with aniseed, cinnamon, and other spices.

VIII. *Kirschwasser.* Distilled from the Malacheb cherry, in Switzerland.

IX. *Maraschino, Marasqui'no.* Distilled from the Macarska or Marasca cherry, at Zara, the capital of Dalmatia.

X. *Rum,* (supposed to be derived from the terminal syllable of the word *saccharum;* but this is questionable.) Distilled, in the West Indies and South America, from cane-sugar and molasses, and in North America from maple-sugar. Its variety is —

Sakee, Saki. A Japanese beverage, distilled from rice.

XI. *Slatkaia trava.* Made in Kamtschatka, from a sweet grass.

XII. *Showchoo.* Distilled, in China, from the lees of mandarin, a wine made from boiled rice.

XIII. *Whis'ky,* (supposed to be derived from *usque,* the first two syllables of *usquebaugh,* the original name in Ireland, — itself from Irish *uisge,* and *beatha,* 'life,' *Uisge beatha, Aquæ vitæ,* 'Water of life.') Distilled, in Scotland and Ireland, from malted and raw barley, rye, oats, and potatoes; and in the south of France, from sloes. In Ireland, it was called *builceaum,* or madness of the head. The best Scotch whisky is *Glenliv'et;* the best Irish, *Ennishow'en.*

Whisky, under the name *Spir'itus Frumen'ti,* is officinal in the Pharmacopœia of the United States (1873). It is the spirit obtained from fermented grain by distillation, and contains from 48 to 56 per cent. by volume of absolute alcohol. For medical use, it should be not less than two years old.

XIV. *Y-wer-a.* Distilled, in the Sandwich Islands, from the root of the Teeroot, baked, pounded, and fermented.

To these may be added an intoxicating liquor made by the Affghanistans, from ewes' milk; and that made in Kamtschatka, from a species of mushroom, named *muchumer.*

Spir'it of Ammo'nia, Spiritus ammoniæ — s. of Ammonia, aromatic, Spiritus ammoniæ, aromaticus — s. of Ammonia, fetid, Spiritus ammoniæ fœtidus — s. of Ammonia, succinated, Spiritus ammoniæ succinatus — s. of Aniseed, Spiritus anisi — s. Spir'its, An'imal, Nervous fluid.

Spir'its, Ar'dent. The distilled products of vinous liquors, as brandy, rum, &c.

Spirituo'sus, Alcoholic.

Spir'ituous, (from *spiritus,*) Alcoholic.

Spir'itus, gen. *Spiritûs,* (*spirare,* 'to breathe,') Breath, Life, Respiration, Spirit — s. Ætherеus nitrosus, Spiritus ætheris nitrici — s. Ætherеus vitriolicus, Spiritus ætheris sulphurici.

Spir'itus Æ'theris Aromat'icus, *Æ'ther Sulphu'ricus cum alcoho'lĕ aromat'icus, Elix'ir vitri'oli dul'cē, Sweet Elix'ir of Vit'riol, Viga'ni's Elix'ir of Vit'riol, Aromat'ic Spir'it of E'ther.* (*Cinnam. cort.* contus., ℥ij., *Cardam. sem.* contus., ℥jss., *Piperis longi fruct.* cont., *Zingib. rad.*

concis. sing., ʒj., *Spiritûs ætheris sulphuric.*, Oj. Macerate for 14 days in a stopped glass vessel, and strain. Ph. L.) It is used as a stimulant in nervous affections. Dose, fʒss. to fʒj.

Spir'itus Æ'theris Chlora'ti, Spiritus ætheris muriatici—s. Ætheris compositus, Spiritus ætheris sulphurici compositus — s. Ætheris hydrochlorici, Spiritus ætheris muriatici.

Spir'itus Æ'theris Muriat'ici, *Sp. Æ. Hydrochlo'rici, Sp. Æ. chlora'ti, Sp. Æ. Muriat'icus, Sp. Muriat'icus æthe'reus, Sp. sa'lis dul'cis, Æ'ther muriat'icus alcohol'icus* seu *chlora'tus alcohol'icus, Spirit of hydrochlo'ric* or *muriat'ic ether, Dulcified murine acid.* An old preparation, made by adding one part of *Muriatic acid* to three parts of *Rectified spirit*, and distilling. Its action is like that of the Spiritus ætheris nitrici.

Spir'itus Æ'theris Ni'trici, (Ph. U. S., 1851,) *Sp. Æ'theris nitro'si* (Ph. U. S. 1873 and Ph. B. 1867) seu *ni'tri dul'cis* seu *Æthe'reus nitro'sus, Æther ni'tricus alcoölisa'tus* seu *nitricoälcoholicus, Ac'idum Ni'tri dulcifica'tum, Sweet Spirit of Ni'tre, Ni'tre drops, Spirit of Ni'tric E'ther*, (F.) *Ether azoteux alcoolisé, Liqueur anodine nitreuse.* (*Acid. nitric.*, ʒivss., *Alcohol. fort.*, Ovij., *Acid. sulphuric.*, ʒiijss., *Cupri*, ʒij. Add the sulphuric acid gradually to fʒxx. of the alcohol. When cool, put in a glass retort, connected with a Liebig's condenser, and add the copper and ʒiv. of nitric acid. Apply heat, and distil fʒxiij. at a temperature not exceeding 180°. Remove the heat, let the contents of the retort cool to 90°, add remainder of nitric acid, and distil fʒij. as before. Mix the distillate with the remainder of the alcohol, and transfer to half-pint bottles. Ph. U. S., 1873.) Spirit of nitrous ether is occasionally but wrongfully prepared from methylated spirit. It is refrigerant, diuretic, antispasmodic, and diaphoretic. Dose, gtt. xxv. to fʒj. Sp. gr. 0·834.

Spir'itus Æ'theris Oleo'sus, Spiritus ætheris sulphurici compositus, Oleum æthereum.

Spir'itus Æ'theris Sulphu'rici, *Sp. Æ'theris*, (Ph. B., 1867,) *Æ'ther Sulphu'ricus cum Alcoho'lē, Liquor Æ'thereus Sulphu'ricus, Spir'itus vitri'oli dul'cis, S. Æ'theris vitriol'ici, Liquor Sulphu'ricus alcoölisa'tus, Spirit of Sulphuric Ether.* (*Æther. sulphuric.*, fʒx., *Sp. rect.*, Oj. Mix. Ph. B., 1867.) Stimulant, diaphoretic, diuretic, and antispasmodic. Dose, fʒss. to fʒij.

Spir'itus Æ'theris Sulphu'rici Compos'itus, (Ph. U. S., 1842,) *S. æ'theris vitriol'ici compos'itus, Spiritus ætheris compositus* (Ph. U. S., 1873) *seu spiritus ætherеus oleo'sus, Liquor anod'ynus* seu *anod'ynus minera'lis Hoffman'ni, Com'pound spirit of sulphuric ether, Hoffmann's anodyne* or *anodyne liquor*, (F.) *Éther hydrique alcoolisé, Éther sulfurique alcoolisé, Esprit d'Éther sulfurique, Liqueur anodine d'Hoffmann.* (*Æther.*, Oss., *Alcohol*, Oj., *Ol. Æther.*, fʒvj. Mix.) A stimulant and spasmodic. Specific gravity, 0·815.

Spir'itus Æ'theris Vitriol'ici Compos'itus, Spiritus ætheris sulphurici compositus.

Spir'itus Ammo'niæ, *Al'kali ammonia'cum spirituo'sum, Al'cohol ammonia'tum, Sp. sa'lis ammoni'aci, Sp. sa'lis ammoni'aci vino'sus* seu *dul'cis* seu *dulcifica'tus, Ammoni'aca alcoholisa'ta, Li'quor ammo'nii vino'sus, L. ammo'niæ spirituo'sus, Lixiv'ium ammoniaca'lē vino'sum, Solu'tio subcarbona'tis ammoni'aci spirituo'sa, Spirit of Ammonia*, (F.) *Esprit d'ammoniaque.* (*Ammon. chlorid.* in frustulis, *Calcis*, āā ʒxij., *Alcohol*, fʒxx., *Aquæ*, Ovj. The water is employed to slake the lime, the chloride of ammonium is then well mixed with it, and by means of heat the ammonia is made to pass into the distilled water contained in a quart bottle. Ph. U. S., 1873.) Stimulant and antispasmodic. Dose, fʒss. to fʒj.

Spir'itus Ammo'niæ Aromat'icus, *Alcohol ammonia'tum aromat'icum, Spir'itus sa'lis volat'ilis oleo'sus* seu *volat'ilis aromat'icus* seu *ammo'niæ compos'itus* seu *oleosoüromaticus Syl'vii, Sal volat'ilē oleo'sum Syl'vii, Tinctu'ra aromat'ica ammonia'ta, Liquor oleo'sus Syl'vii, L. ammo'nii aromat'icus* seu *æthe'reus* seu *oleo'soäromat'icus, Lixiv'ium ammoniac'alē aromat'icum, Aromat'ic ammonia'ted al'cohol, Aromatic Spirit of Ammonia, Sal volat'ilē drops.* (*Ammon. muriat.*, ʒv., *Potass. carb.*, ʒviij., *Cinnam.* cont., *Caryophyll.* cont., āā ʒij., *Limon. cort.*, ʒiv., *Alcohol, Aquæ*, āā Ov. M. Distil Ovijss. — In the Ph. U. S. for 1873, it is directed to be made of *Ammon. carb.*, ʒj., *Aq. ammon.*, fʒiij., *Ol. Limon.*, fʒijss., *Ol. myrist.*, ♏xl., *Ol. Lavandul.*, ♏xv., *Alcohol*, Ojss., *Aquæ*, q. s. Dissolve the carbonate in the water of ammonia, mixed with fʒiv. of water. Dissolve the oils in the alcohol, mix the two solutions, and add water sufficient to make the whole two pints. Stimulant. Dose, fʒss. to fʒj.

Spir'itus Ammo'niæ Compos'itus, Spiritus ammoniæ aromaticus.

Spir'itus Ammo'niæ Fœ'tidus, *Sp. volat'ilis fœ'tidus, Alcohol ammonia'tum fœ'tidum, Tinctu'ra assafœ'tidæ ammonia'ta, Fet'id spirit of ammo'nia, Fit drops.* (*Assafœtid.*, ʒjss., *Liquor ammoniæ fortior*, fʒij., *Spirit. rectificat.*, q. s. ut fiat Oj. Prepared by maceration and distillation. Ph. B., 1867.) Stimulant and antispasmodic. Dose, fʒss. to ʒj.

Spir'itus Ammo'niæ Succina'tus, *Sp. Ammo'niæ cum suc'cino, Sp. cornu cervi succina'tus, Sp. sa'lis ammoni'aci lactes'cens* seu *lac'teus, Tinctu'ra ammo'niæ compos'ita, Ammoni'acum succina'tum, Aqua Lu'ciæ, Liquor ammo'nii succin'ici* seu *ex ammo'niâ et o'leo suc'cini, L. ex'citans, Ammonium succin'icum liquidum, Suc'cinated spirit of ammo'nia, Common Eau de Luce.* (*Mastich.*, ʒiij., *Sp. rect.*, fʒix., *Ol. lavand.*, gtt. xiv., *Ol. succin.*, gtt. iv., *Liq. ammon.*, fʒx. Macerate the mastich in the alcohol, and pour off the clear tincture; add the rest, and shake. Ph. L.) Stimulant and antispasmodic. Dose, gtt. x. to fʒss. or fʒj.

Spir'itus Anima'les, see Nervous fluid.

Spir'itus Ani'si, *Sp. Ani'si compos'itus, Aqua ani'si for'tis, A. Sem'inum Ani'si compos'ita, Spir'it of An'iseed*, (F.) *Esprit d'anis, Alcoolat d'anis.* (*Ol. Anis.*, fʒj., *Alcohol. fort.*, fʒxv. Dissolve. Ph. U. S., 1873.) Carminative. Dose, fʒss. to fʒss. In the compound spirit, angelica is usually added.

Spir'itus An'thos, Spiritus rosmarini.

Spir'itus Armora'ciæ Compos'itus, *Sp. Raph'ani compos'itus, A'qua Raph'ani compos'ita, Com'pound Spirit of Horse'radish*, (F.) *Esprit de raifort composé.* (*Armorac. rad.* concis., *Aurant. cort.* cont., āā ʒxx., *Myrist. nuc.* contus., ʒss., *Spirit. ten.*, cong., *Aquæ*, Oij. Mix and distil a gallon with modcrate heat. Stimulant and antiscorbutic. [?] Dose, fʒj. to fʒiv.

The *Gold'en Spir'it of Scur'vygrass*—an empirical preparation — is formed by adding *Gamboge*, ʒviij., to one gallon of *Sp. armoraciæ compositus.*

Green'ough's Tinc'ture for the teeth is formed of *Amygd. amar.*, ʒij., *Lig. Brcsil., Cassiæ bacc.*, āā ʒiv., *Irid. Florent.*, ʒij., *Cocciuell., Sal. acctoscllæ, Alum.*, āā ʒj., *Sp. vin. rect.*, Oij., *Sp. armoraciæ comp.*, fʒss.

Spir'itus Beguin'is, Ammoniæ sulphuretum — s. Bellidis, see Osmitopsis asteriscoides—s. Cajuputi, see Caieput oil.

Spir'itus Cam'phoræ, (Ph. U. S., 1873,) *Sp. Camphora'tus* seu *vino'sus camphora'tus, Tinctu'ra Cam'phoræ*, (Ph. U. S., 1851,) *Spir'it of Wine and Cam'phor, Spirit of Cam'phor*, (F.) *Esprit de Camphre, Alcool camphré.* (*Camphor.*, ʒiv., *Alcohol*, Oij. Dissolve.) Stimulant, anodyne, and discutient. *Eau de Vie Camphorée* is a much weaker preparation of the French Codex (1866).

Spir'itus Car'ui, *Sp. Ca'ri Car'ui, A'qua Sem'inum Car'ui for'tis* seu *Sem'inum Car'ui, Spirit of Car'away, Strong Car'ui Wa'ters*, (F.) *Esprit de Carvi.* (*Carui sem.* cont., lbjss., *Sp. tenuior.*, cong.,

Aquæ, q. s. Distil a gallon. Ph. L.) Carminative. Dose, fʒj. to fʒss.

Spir'itus Chlorofor'mi. *Spirit of Chlo'roform.* (*Chloroform. purif.*, ʒj., *Alcohol. fort.*, fʒxij. Dissolve. Ph. U. S., 1873.) See Ether, chloric.

Spir'itus Cinnamo'mi, *Sp. Lau'ri Cinnamo'mi, A'qua Cinnamo'mi for'tis* seu *Cinnam. spiritno'sa, Spir'it of Cin'namon, Strong Cin'namon Wa'ter*, (F.) *Esprit de Cannelle.* (*Ol. cinnam.*, fʒj., *Alcohol. fort.*, fʒxv.) Stimulant and carminative. Dose, fʒj. to fʒss.

Spir'itus Col'chici Ammonia'tus, *Tinctu'ra Col'chici Compos'ita, Ammo'niated Spir'it of Col'chicum, Com'pound Tinc'ture of Col'chicum.* (*Sem. colchic.* cont., ʒij., *Sp. ammon. aromat.*, Oj. Ph. L.) Narcotic, cathartic, and diuretic. Used in gout, rheumatism, and dropsy. Dose, from gtt. xxx. to fʒj.

Spir'itus Cor'nu Cer'vi, Liquor volatilis cornu cervi—s. Cornu Cervi succinatus, Spiritus ammoniæ succinatus — s. Fortior, see Alcohol—s. Frumenti, see Spirit —s. Fumans Beguini, Ammoniæ sulphuretum — s. Genitalis, Aura seminis — s. Jamaicensis, Rum — s. Juniperi, see Spiritus juniperi compositus.

Spir'itus Junip'eri Compos'itus, *A'qua Junip'eri compos'ita, Com'pound Spir'it of Juniper*, (F.) *Esprit de genièvre composé.* (*Ol. junip.*, fʒjss., *Ol. carui, Ol. fœnicul.*, āā ♏x., *Alcohol*, Ov., *Aquæ*, Oiij. Dissolve the oils in the alcohol, add the water, and mix them. Ph. U. S., 1873.) Stimulant and diuretic. Dose, fʒj. to fʒss. The last edition of the Ph. U. S. (1873) contains also a *Spir'itus Junip'eri*, made by dissolving a fluidounce of oil of juniper in three pints of stronger alcohol.

Spir'itus Laur'i Cinnamo'mi, Spiritus cinnamomi.

Spir'itus Lavan'dulæ, *Sp. Lavan'dulæ spi'cæ* seu *Lavand. sim'plex, Spirit of Lavender, Lav'ender Water*, (F.) *Esprit de Lavande.* (*Ol. Lavand.*, fʒj., *Alcohol. fort.*, Oiij. Dissolve. Ph. U. S., 1873.) Used as a perfume chiefly.

Spir'itus Lavan'dulæ Compos'itus, *Tinctu'ra Lavandulæ compos'ita, Red Harts'horn, Lav'ender drops, Com'pound Spir'it of Lav'ender*, (F.) *Esprit de Lavande composé.* (*Ol. Lavand.*, fʒj., *Ol. Rosmarin.* fʒij.. *Cinnamom.* pulv., ʒij., *Caryophyll.* pulv., ʒss., *Myristic.* pulv., ʒj., *Santal.* pulv., gr. ccclx., *Alcohol*, Ovj., *Aquæ*, Oij., *Alcohol, dilut.*, q. s. Dissolve the oils in the alcohol, and add the water. Mix the powders, moisten the mixture with fʒj. of the alcoholic solution of the oils, and by percolation, gradually pouring on the remainder of the alcoholic solution and the diluted alcohol, obtain Oviij. Ph. U. S., 1873.) Stimulant. Dose, gtt. xl. to fʒij.

Spir'itus Letha'lis, Carbonic acid.

Spir'itus Limo'nis, *Spirit of Lem'on, Es'sence of Lem'on.* (*Ol. Limon.*, fʒij., *Cort. Lim.* recente rasp., ʒj., *Alcohol. fort.*, Oij. Dissolve the oil in the alcohol; add the lemon peel; macerate for 24 hours, and filter through paper. Ph. U. S., 1873.) To give odor and flavor.

Spir'itus Lumbrico'rum, Liquor volatilis cornu cervi.

Spir'itus Men'thæ Piperi'tæ, *Tinctu'ra O'lei Menthæ Piperi'tæ, Sp. Men'thæ piperit'idis, A'qua Men'thæ piperit'idis spiritno'sa, Spir'it of Pep'permint, Tincture of Oil of Peppermint, Essence of Mint* or *Peppermint*, (F.) *Esprit de Menthe poivrée.* (*Ol. menth. pip.*, fʒj., *Menthæ piperit.* in pulv. crass., gr. cxx., *Alcohol. fort.*, fʒxv. Dissolve the oil in the alcohol; add the peppermint; macerate for 24 hours, and filter. Ph. U. S., 1873.) Dose, gtt. v.–xx., as a carminative.

Spir'itus Men'thæ Sati'væ, Spiritus menthæ viridis.

Spir'itus Men'thæ Vir'idis, *Tinctu'ra O'lei Menthæ vir'idis, Spir'itus Men'thæ sati'væ, A'qua Men'thæ vulga'ris spirituo'sa, Spir'it of Spear'mint, Tincture of Oil of Spearmint, Essence of Spearmint*, (F.) *Esprit de Menthe vert.*

The *Spiritus Menthæ Viridis* (Ph. U. S., 1873) is made like the Spiritus menthæ piperitæ, and has the same properties and dose.

Spir'itus Millepeda'rum, Liquor cornu cervi — s. Mindereri, Liquor ammoniæ acetatis — s. Muriaticus ætherens, Spiritus ætheris muriatici.

Spir'itus Myr'ciæ, *Spirit of Myr'cia, Bay rum.* A spirit obtained by distilling rum with the leaves of *Myr'cia acris, Enge'nia* seu *Myrtus acris, M. Caryophylla'ta, Bay'berry Tree. Order*, Myrtaceæ, of the West Indies. Used externally like Cologne water, and in cases where whisky would be applied.

Spir'itus Myris'ticæ, *Sp. Myris'ticæ Moscha'tæ* seu *Nu'cis Moscha'tæ, A'qua Nu'cis Moschatæ* seu *Nephrit'ica, Nut'meg Wa'ter*, (F.) *Esprit de Muscade.* (*Ol. myrist.*, fʒj., *Alcohol. fort.*, Oiij. Dissolve. Ph. U. S., 1873.) Cordial and carminative. Dose, fʒj. to fʒiv.

Spir'itus Myr'ti Pimen'tæ, Spiritus pimentæ — s. Nitri acidus, Nitric acid — s. Nitri dulcis, Spiritus ætheris nitrici — s. Nitri duplex, Nitric acid—s. Nitri fumans, Nitric acid—s. Nitri Glauberi, Nitric acid — s. Nitri simplex, see Nitric acid—s. Nitri vulgaris, see Nitric acid—s. Nucis moschatæ, Spiritus myristicæ — s. Oleosoäromaticus Sylvii, Spiritus ammoniæ aromaticus — s. Ophthalmicus Mindereri, Liquor ammoniæ acetatis.

Spir'itus Pimen'tæ, *Sp. Myr'ti Pimen'tæ* seu *Pimen'to, A'qua Mirab'ilis, Spir'it of Pimen'to.* (*Ol. Piment.*, fʒij., *Alcohol. dilut.*, cong. Solve.) Cordial and carminative. Dose, fʒj., and more.

Spir'itus Pule'gii, *A'qua Pule'gii spirituo'sa, Spir'it of Pen'nyroyal, Spir'ituous Pen'nyroyal Wa'ter*, (F.) *Esprit de Pouliot.* (*Olei pnlegii* ℈vij., *Sp. rect.*, Oivss., *Aquæ*, q. s. Distil a gallon. Ph. L.) Same as spirit of spearmint in properties and dose.

Spir'itus Pyroace'ticus, Acetone.

Spir'itus Pyroxyl'icus, *Pyroxyl'ic spir'it, Wood spirit, Wood alcohol, Pyroxyl'ic al'cohol, Methyl'ic al'cohol, Hy'drated ox'ide of meth'yle, Bihydrate of Meth'ylene*, (F.) *Esprit pyroxylique, Esprit de bois.* This substance is by some supposed to have been the article given in phthisis by Dr. Hastings, under the names *Naphtha* and *Wood Naphtha.* It was probably, however, the *Pyroäcetic spirit.* See Acetone. When wood is subjected to destructive distillation, about one per cent. of an inflammable volatile liquid, along with other products, passes over, which, when separated and purified, constitutes pyroxylic spirit. It is given in the same cases and doses as Acetone.

Spir'itus Raph'ani Compos'itus, Spiritus armoraciæ compositus.

Spir'itus Rectifica'tus, *Sp. Vini rectifica'tus* seu *vino'sus rectifica'tus, Œnostag'ma, Œnelæ'um, Pyrœ'nus, Al'cohol, A. Vi'ni, Spirit of Wine*, (F.) *Esprit de Vin rectifié.* Rectified spirit is much used in pharmacy to dissolve resinous and other substances. It is seldom exhibited internally, although it exists in the diluted state in all vinous and spirituous liquors. Externally it is employed as a discutient. S. g., according to the British Pharmacopœia, 0·838; that of the United States, 0·835 (see Alcohol), and of Paris, 0·819 to 0·827.

Spir'itus Rec'tor, Aroma — s. Roriferus, Gaz sanguinis.

Spir'itus Rosmari'ni, *Sp. Rosmari'ni officina'lis, Sp. An'thos, Aqua Hungar'ica* seu *Regi'næ Hunga'riæ, Spir'it of Rose'mary, Hun'gary Wa'ter*, (F.) *Esprit de Romarin, Alcoolat de Romarin.*

(*Ol. rosmarini*, f℥iv., *Alcohol.*, cong. Solve.) Stimulant. Dose, f℥j. to f℥iv.

Spir'itus Sa'lis Ac''idus seu **Fu'mans**, Muriaticum acidum—s. Salis ammoniaci, Spiritus ammoniæ—s. Salis ammoniaci aquosus, Liquor ammoniæ—s. Salis ammoniaci lactescens seu lacteus, Spiritus ammoniæ succinatus — s. Salis ammoniaci sulphuratus, Ammoniæ sulphuretum—s. Salis dulcis, Spiritus ætheris muriatici—s. Salis Glauberi, Muriaticum acidum — s. Salis marini, Muriaticum acidum — s. Salis marini coagulatus, Potassæ murias — s. Salis volatilis oleosus, Spiritus ammoniæ aromaticus.

Spir'itus Sapo'nis Alkali'nus. A solution of *green soap*, ℥ij., in *alcohol*, ℥j., to which, after filtration, *spirit of lavender*, ℥ij., is added. It has been recommended as an application in seborrhœa. A more elegant preparation is made by dissolving ℥ij. of the soap in ℥x. of Cologne water.

Spir'itus Sulphu'rico-æthe'reus Camphora'tus, Tinctura ætherea composita — s. Sulphuricoæthereus martialis, Tinctura seu Alcohol sulphuricoæthereus ferri — s. Sulphuris, Sulphuric acid, Sulphurous acid — s. Sulphuris per campanam, Sulphurous acid — s. Sulphuris volatilis, Ammoniæ sulphuretum — s. Sulphurosus volatilis, Sulphurous acid.

Spir'itus Tenu'ior, *Al'cohol dilu'tum*, *Spir'itus vino'sus tenu'ior*, *Proof Spirit*, (F.) *Esprit de vin délayé*. (Generally made for pharmaceutical purposes by mixing equal parts of *rectified spirit* and *distilled water*.) S. g. Ph. B., 1867, 0·920; U. S., 1873, 0·941. It is employed in the same cases as those in which alcohol is used; chiefly, as a solvent of vegetable matters, in the form of tinctures.

Spir'itus Ven'eris, Aceticum acidum—s. Vini Gallici, Brandy—s. Vini rectificatus, Spiritus rectificatus — s. Vinosus camphoratus, Spiritus camphoræ — s. Vinosus tenuior, Spiritus tenuior — s. Vitalis, Nervous fluid—s. Vitrioli, Sulphuric acid —s. Vitrioli acidus Vogleri, Sulphuricum acidum dilutum — s. Vitrioli coagulatus Mynsichti, Potassæ sulphas—s. Vitrioli dulcis, Spiritus ætheris sulphurici—s. Vitrioli phlogisticatus, Sulphurous acid — s. Volatilis aromaticus, Spiritus ammoniæ aromaticus—s. Volatilis fœtidus, Spiritus ammoniæ fœtidus.

Spirocolon, *Spyrocolon*, *Or'chida*, *Franzo*. A syphiloid affection, first known in Greece, during the war of freedom from 1820 to 1825.

Spi'rograph, (*spiro*, 'I breathe,' and *γραφω*, 'I write,') Atmograph.

Spi'roid Canal', (*σπειρα*, 'a winding,' and *εἰδος*, 'resemblance,') Aquæductus Fallopii.

Spirom'eter, *Pulmom'eter*, (*spiro*, 'I breathe,' and *μετρον*, 'a measure,') properly *Anapnom'eter*, *Pneom'eter*, *Pneusom'eter*, *Pneumom'eter*, *Pneumatom'eter*, *Pneumonom'eter*. Any instrument for measuring the quantity of air concerned in respiration, and consequently the capacity of the lungs. This mode of measurement has been called *Spirom'etry* and *Pneom'etry*, as it was formerly called *Pulmom'etry*. The term spirometer is now usually applied to a kind of gasometer introduced by Dr. Hutchinson to estimate the quantity of air contained in, or rather expelled from, the lungs under different circumstances. A wet meter is sometimes used to ascertain the breathing capacity, and has been called a *Spiroscope*, *Spiroscopium*.

Spirop'tera Hom'inis, (*σπειρα*, 'a spire,' and *πτερον*, 'a wing,') see Parasites.

Spi'roscope, (*spiro*, 'I breathe,' and *σκοπεω*, 'I examine,') see Spirometer.

Spissan'tia, (*spissare*, 'to thicken,') Incrassantia.

Spit, ([Sax.] *ꝑpætan*, *ꝑpittan*, 'to spit,') Sputum.

Spit'al, Hospital.

Spit'al, Min'eral Wa'ters of. The village of Spital is situate on the south side of the Tweed, near Tweedmouth. The springs there contain chloride of calcium, sulphate of soda, sulphate and carbonate of lime. They act as saline cathartics.

Spith'ama, (*σπιθαμη*,) *Do'drans*. A measure of twelve fingers' breadth, or about nine inches.

Spit'ting, (see Spit,) Exspuition.

Spit'tle, Hospital, Saliva, ([Sax.] *ꝑpæl*,) — s. Sweet, see Salivation.

Splanch'na, (*σπλαγχνα*, pl. of *σπλαγχνον*,) Entrails.

Splanchnectop'ia, *Splanchnodias'tasis*, *Situs perver'sus* seu *anom'alus intestino'rum*, (*splanchna*, *ἐκ*, 'out of,' and *τοπος*, 'place.') Misplacement or ectopia of the intestines.

Splanchnelmin'tha, (*splanchna*, and *ἑλμινς*, gen. *ἑλμινθος*, 'a worm,') Worms.

Splanchneurys'ma, gen. *Splanchneurys'matis*, (*splanchna*, and *ευρυνω*, 'I dilate.') Morbid dilatation of the intestines.

Splanch'nic, *Splanch'nicus*, (*σπλαγχνικος*,) *Vis'ceral*, (F.) *Splanchnique*, (from *splanchna*.) Relating or belonging to the viscera.

Splanch'nic Cav'ities are the three great cavities of the body — those of the cranium, chest, and abdomen.

Splanch'nic Nerves belong to the great sympathetic, and are two in number on each side. They are distinguished into: 1. The *great splanchnic nerve*, (F.) *Grand surrénal* (Ch.). Its roots—four or five in number—come from the 6th, 7th, 8th, 9th, and sometimes the 10th, thoracic ganglia. They descend inwards, on the sides of the vertebral column, beneath the pleura, and unite into a single trunk, which enters the abdomen through a separation of the fleshy fibres of the pillars of the diaphragm: passes behind the stomach, and divides into several branches, which pass into the semilunar ganglion. 2. The *less'er splanch'nic nerve*, *Re'nal nerve*, (F.) *Splanchnique accessoire* of Walther, *Petit surrénal* (Ch.), is composed of two distinct branches, proceeding from the 10th and 11th thoracic ganglia, which unite on the 12th dorsal vertebra into a cord that pierces the diaphragm singly; enters the abdomen, and divides into two branches, one of which anastomoses with the greater splanchnic nerve, while the other sends its filaments to the renal and solar plexuses.

Splanch'nica. Medicines adapted to diseases of the bowels. Also, the 2d order of the class *Cœliaca* of Good; defined, diseases affecting the collatitious viscera, and characterized by disquiet or diseased action in the organs auxiliary to the digestive process, without primary inflammation.

Splanchnodias'tasis, (*splanchna*, and *διαστασις*, 'displacement.') Splanchnectopia.

Splanchnod'ynē, (*splanchna*, and *ὀδυνη*, 'pain,') Pain in the bowels.

Splanchnograph'ia, Splanchnography.

Splanchnog'raphy, *Splanchnograph'ia*, (*splanchna*, and *γραφη*, 'a description.') The part of anatomy which treats of the viscera.

Splanchnolithi'asis, (*splanchna*, and *λιθος*, 'a stone.') The formation of a calculous concretion in any viscus.

Splanchnol'ogy, *Splanchnolog''ia*, (*splanchna*, and *λογος*, 'a discourse.') A treatise on the viscera; also, Splanchnography.

Splanch'non, (*σπλαγχνον*,) sing. of Splanchna.

Splanchnopathi'a, (*splanchna*, and *παθος*, 'suffering.') A disease of the intestines.

Splanchnosclero'sis, (*splanchnon*, and *σκληρος*, 'hard.') Induration of a viscus.

Splanchnot'omy; *Splanchnotom'ia*, *Splanchnot'omē*, (*splanchna*, and *τομη*, 'section.') Dissection or anatomy of the viscera.

Splat'foot, see Kyllosis.

Splay'foot, (from *splay,* 'spread.') See Kyllosis.

Spleen, (σπλην,) *Lien, He'par sinis'trum* seu *adulteri'num, Fo'mes ventric'uli, Milt,* (Sc.) *Melt,* (F.) *Rate.* A soft, spongy, parenchymatous organ, of a more or less deep violet red, situate deeply in the left hypochondrium, below the diaphragm, above the colon, between the great tuberosity of the stomach and the cartilages of the false ribs, and above and anterior to the kidney. Its ordinary length is 4½ inches; its thickness 2½; and its weight 8 ounces. Its parenchyma, which is bathed in blood, constituting the *pulp, Pul'pa, Substan'tia pulpo'sa* seu *ru'bra* seu *vasculo'sa,* contains a multitude of grayish, soft, and semi-transparent granulations — *sple'nic cor'puscles* or *Malpig'hian bod'ies of the spleen, Corpus'cula Malpig'hii* seu *lie'nis, Glan'dulæ Malpig'hii, Ac'ini lie'nis, Vesic'ulæ gri'seæ.* It is covered by a serous membrane, furnished by the peritoneum; and by a proper coat, of a fibrous nature, *Membra'na pro'pria* seu *albugin'ea* seu *fibro'sa,* which is intimately united with it, and transmits into its interior delicate, solid, and very elastic prolongations — *trabec'ulæ.* At its inner edge is a fissure — *Hi'lus* seu *Por'ta lie'nis,* by which the vessels and nerves enter the organ. The upper extremity is the *head, Ca'put lie'nis,* — the lower, the *tail, Caud'a lie'nis.* The exact functions of the spleen are unknown. The best opinion is, that it appertains to hæmatosis, and acts, also, as a diverticulum to the vascular system.

Spleen, Hypochondriasis — s. Amyloid disease of, see Lardaceous — s. Atrophy of, Splenatrophia — s. Lardaceous, see Lardaceous — s. Malpighian bodies of the, see Spleen — s. Sago, Sago spleen — s. Supernumerary, Lienculus — s. Suspensory ligament of, see Suspensory — s. Waxy, see Lardaceous.

Spleen'wort, Asplenium, A. filix fœmina, Asplenium scolopendrium — s. Bush, Comptonia asplenifolia.

Splen, gen. *Sple'nis,* (σπλην,) Spleen.

Splenal'gia, *Neural'gia lie'nis, Sple'nica, Splenodyn'ia,* (*splen,* and αλγος, 'pain.') Pain in the spleen.

Splenal'gia Bengalen'sis, see Cachexia, splenic — s. Phlegmonodea, Splenitis — s. Subinflammatoria chronica, Splenoncus.

Splenatroph'ia, *Atroph'ia Lie'nis,* (*splen,* and *atrophia,* 'atrophy.') Wasting or atrophy of the spleen.

Splenaux'ē, (*splen,* and αυξη, 'increase.') Splenoncus.

Splen'culi, (pl. of *splenculus,*) 'small spleens,' *Lienculi.* See Lienculus.

Splenec'tama, gen. *Splenectam'atis,* Splenoparectama.

Splenec'tasis, (*splen,* and εκτασις, 'dilatation,') Splenoparectama.

Splenectom'ia, *Splenec'tomē,* (*splen,* εκ, 'out of,' and τεμνω, 'I cut.') Extirpation of the spleen.

Splenectop'ia, *Disloca'tio* seu *Ectop'ia lie'nis* seu *sple'nis,* (F.) *Anomosplénotopie,* (*splen,* and εκτοπος, — εκ, and τοπος, — 'out of place.') Dislocation of the spleen. Not a common occurrence.

Splenemphrax'is, *Splenophrax'ia,* (*splen,* and εμφρασσω, 'I obstruct.') Obstruction of the spleen. See Splenoncus.

Sple'nes, (pl. of *splen,*) Hypochondriasis.

Splenet'icus, *Sple'nicus, Splenit'icus, Lieno'sus,* (F.) *Rateleux.* That which relates to the spleen; one laboring under diseased spleen. A medicine adapted for diseases of the spleen.

Sple'nic, *Sple'nicus, Sple'nius,* (F.) *Splénique,* (from *splen.*) That which relates to the spleen.

Sple'nic Ar'tery. It arises from the cœliac; and passes from right to left, forming many windings along the upper edge of the pancreas, which lodges it in a special groove. It reaches the fissure of the spleen, and divides into several branches that enter the organ. In its course it furnishes the pancreatic, left gastroëpiploic, and the vasa brevia.

Sple'nic Cachex'ia, see Cachexia splenica — s. Corpuscles, see Spleen.

Sple'nic Plex'us is a nervous network, which proceeds from the cœliac plexus, and accompanies the splenic artery, sending secondary plexuses to each division.

Sple'nic Vein, *Vena sple'nica, V. liena'lis,* arises from the spleen, and accompanies the splenic artery; proceeding from left to right, to unite with the superior mesenteric vein, and to form, with it, the abdominal vena porta. In its course, it receives veins corresponding to the vasa brevia, the right and left gastroëpiploic, the duodenal, pancreatic, coronaria ventriculi, and inferior mesenteric veins.

Sple'nica, Splenalgia. Also, medicines which affect the spleen.

Sple'nicus, (σπληνικος,) Spleneticus, Splenic.

Sple'nification, (*splen,* and *fio,* 'I become,') Splenization.

Spleni'ola, (dim. of *splen,*) Compress.

Splénique, Splenic.

Sple'nis Tu'mor, 'tumor of the spleen,' Ague cake.

Splénisation, Splenization.

Splenis'cus, (σπληνισκος,) Compress.

Splénise, see Splenization.

Sple'nisis, (from *splen,*) Splenization.

Splenit'icus, Splenic.

Spleni'tis, gen. *Spleni'tidis,* (*splen,* and *itis.*) Inflammation of the spleen. *Empres'ma splenitis, Inflamma'tio lie'nis, I. sple'nis, Splenal'gia phlegmono'dea, Lieni'tis,* (F.) *Splénite, Inflammation de la Rate.* A rare disease, characterized by local pain, swelling, and heat, which sometimes terminates by suppuration. It generally affects the capsule — *Epispleni'tis, Perispleni'tis* — and must be treated like other inflammations.

Sple'nium, (σπληνιον,) Compress — s. Corporis callosi, see Corpus callosum — s. Cruciatum, Croix de Malte.

Sple'nius, *S. Cap'itis* seu *Col'li,* (F.) *Cervico-dorso-mastoïdien et dorso-trachélien, Mastoïdien postérieur, Cervico-mastoïdien* (Ch.), *Posterior mastoid muscle.* So called from its resemblance to the *spleen* of certain animals. A muscle situate at the posterior part of the neck, and upper part of the back. It is much broader above than below, where it terminates in a point. It is attached, by its inner edge, to the spinous processes of the first five dorsal vertebræ; to that of the 7th cervical, and to the inferior part of the posterior cervical ligament. By its upper extremity, it is attached to the transverse processes of the first two cervical vertebræ, to the mastoid process, and to the posterior surface of the occipital bone. Some have considered this muscle to be formed of two portions, which they have called *Splenius colli,* and *Splenius cap'itis.* The splenius extends the head, inclines it, and rotates it. If the splenii of each side act together, they extend the head.

Spleniza'tion, *Spleniza'tio, Splenifica'tion, Splenifica'tio,* (F.) *Spléniisation,* (from *splen.*) A term applied to the state of the lung in the first or second stage of pneumonia, in which its tissue resembles that of the spleen. To a conversion of the lung into a spleen-like substance in the yellow fever of Gibraltar, the term *splenisis,* (F.) *Splénise,* was given by Louis and others.

Splenocē'lē, *Her'nia liena'lis,* (*splen,* and κηλη, 'a tumor.') Hernia formed by the spleen.

Spleno'des, (*splen,* and *odes,*) Splenoid.

Splenodyn'ia, (*splen,* and οδυνη, 'pain,') Splenalgia.

Splenog'raphy, *Splenograph'ia,* (*spleu,* and γραφη, 'a description.') A description of the spleen.

Splenohæ'mia, (F.) *Splénohémié*, (*splen*, and *αἷμα*, 'blood.') Congestion or hyperæmia of the spleen, a common phenomenon in many diseases, especially in typhoid and intermittent fevers.

Sple'noid, *Splenoï'des, Spleno'deus*, (*σπληνοειδής*, from *splen*, and *εἶδος*, 'resemblance.') Spleen-like. Having the appearance of the spleen.

Splenol'ogy, *Splenolog''ia*, (*splen*, and *λογος*, 'a discourse.') A treatise on the spleen.

Splenomala'cia, *Lienomala'cia*, (*splen*, and *μαλακος*, 'soft.') Morbid softening of the spleen.

Splénoncie, Splenoncus.

Splenon'cus, *Megalosple'nia, Hypertroph'ia* seu *Supernutrit''io sple'nis* seu *lie'nis, Intumescen'tia* seu *Infarc'tus* seu *Physco'nia lie'nis, Splenal'gia subinflammato'ria chron'ica, Spleuemphraxis, Splenanx'ē, Hypersplenotroph'ia, Li'en in'gens*, (F.) *Spléuoncie, Hypertrophie de la Rate*, (*splen*, and *ογκος*, 'a tumor.') Tumefaction of the spleen. See Ague cake.

Splenoparec'tama, gen. *Sple'noparectam'atis, Spleuec'tama, Splenoparec'tasis, Splenec'tasis*, (*splen*, and *παρεκταμα*, 'excessive volume.') Excessive enlargement of the spleen.

Splenoparec'tasis, Splenoparectama.

Splenophrax'ia, (*splen*, and *φρασσω*, 'I shut up,') Splenemphraxis.

Splenorrhag''ia, (*splen*, and *ῥαγη*, 'a bursting forth.') Hemorrhage from the spleen.

Splenoscir'rhus, (*splen*, and *σκιῤῥος*,' hardness.') Scirrhus or cancer of the spleen.

Splenot'omy, *Splenotom'ia, Splenot'omē*, (*splen*, and *τεμνω*, 'I cut.') Dissection of the spleen.

Splint, ([D.] Splinter, from splijten, 'to split,') *Hastel'la, Ass'ula, Asser'culum, Pla'gula, Nar'thex, Fer'ula*, (F.) *Attelle, Éclisse.* A flexible and resisting lamina of wood, used in the treatment of fractures, to keep the fragments in apposition, and prevent their displacement. Splints are made of iron, wood, bark of trees, leather, leather felt, gutta-pereha, pasteboard, a combination of paraffino and stearine — *paraffaste'arine*, forming a *bandage splint, Star'tin's bandage.* See Apparatus, immovable. Splints are generally padded, and are fixed by a roller or by tapes, according to circumstances.

Splint, Ban'dage, see Splint.

Splint'bone, Fibula.

Splin'ter, (F.) *Esquille*, (same etymon as Splint.) This term is sometimes applied to a small portion of wood, which occasionally enters the skin, and gives rise to much irritation until it is removed, — *Acu'leus lig'neus*, (F.) *Écharde.*

It is also applied to fragments that separate from a fractured or diseased bone.

Splin'terbone, Fibula.

Split'cloth, *Lin'teum scis'sum.* A bandage for the head, consisting of a central part and six or eight tails. The *single spliteloth* has four tails. It is regarded as the most convenient bandage for the head, face, and jaws.

Split'rock, Heuchera cortusa.

Spoat, (like *spit,*) Saliva.

Spo'dium Græco'rum, (*σποδων*, 'dross,') Album Græcum.

Spoke'bone, Radius.

Spolia'rum, (*spolio*, 'I deprive of covering.') Apodyterium.

Spo'liative, *Spoliati'va*, (*spoliare, spoliatum*, 'to take away,') (F.) *Spoliatif.* Serving to take away or diminish. *Phlebotom'ia spoliati'va*, (F.) *Saignée spoliative ;* bloodletting, used for the purpose of diminishing the mass of blood.

Spoliato'rium, (*spolio*, 'I deprive of covering,') Apodyterium.

Spon'dles, (from *spondylus,*) Vertebræ.

Spondylal'gia, *Spondylodyn'ia*, (*spondylus*, and *αλγος*, 'pain.') Pain in the vertebræ. Cacorrhachitis. See Vertebral disease.

Spondylarthri'tis, (*spondylus, αρθρον*, 'a joint,' and *itis.*) Gouty or rheumatic inflammation of the spinal column.

Spondylarthroc'acē, (*spondylus. αρθρον*, 'a joint,' and *κακος*, 'evil,') Vertebral disease.

Spon'dyli, (*σπονδυλοι,*) Vertebræ.

Spondylisthe'sis, *Spondylolisthe'sis*, (*spondylus*, and *ολισθησις*, 'a slipping or sliding.') Dislocation of the vertebræ, as of the last lumbar vertebra forwards on the sacrum, thus producing pelvic contraction.

Spondyli'tis, gen. *Spondyli'tidis, Inflamma'tio ver''tebræ*, (*spondylus*, and *itis.*) Inflammation of the vertebræ.

Spondyl'ium, (*σπονδυλιον,*) Heracleum spondylium.

Spondyloc'acē, (*spondylus*, and *κακος*, 'evil,') Vertebral disease.

Spondylodyn'ia, (*spondylus*, and *οδυνη*, 'pain,') Spondylalgia.

Spondylolisthe'sis, Spondylisthesis.

Spondylopathi'a, (*spondylus*, and *παθος*, 'a disease.') A disease of the vertebral column.

Spondylopyo'sis, (*spondylus*, and *πυωσις*, 'suppuration,') Vertebral disease.

Spondylot'omy, (*spondylus*, and *τεμνω*, 'I cut.') Cutting through the spine, as in the fœtus in cross-births, where turning is impossible.

Spon'dylus, (*σπονδυλος.*) A vertebra. Also, the vertex.

Sponge, Spongia — s. Bastard, Alcyonium.

Sponge Bath, Bath, sponge.

Sponge, Prepared, see Spongia — s. Tent, see Spongia — s. Tent, carbolized, see Spongia.

Spon'gi, (from *σπογγος.*) The tumefied glands of the neck.

Spon'gia, (*σπογγια,*) *S. officina'lis* seu *mari'na, Spon'gus, Sphon'gus, Sponge,* (F.) *Éponge.* An organized marine substance, of the *Class* Porifera, met with in many seas, but especially in the Mediterranean and Arabian. It is supple, elastic, porous, and capable of absorbing fluids in which it may be placed, and of thus increasing in size. It is employed in surgery for cleansing or washing; for absorbing acrid discharges from ulcers; suppressing hemorrhage when the mouth of the vessel can be compressed by it, and for forming tents for dilating wounds; in which case, the sponge is immersed in melting wax, and cooled before being used. It is then called *Spon'gia cera'ta, Waxed, Cerated*, or *Prepared Sponge* or *Sponge Tent,* (F.) *Éponge Préparée.* Carbolized sponge tents are also employed.

Spon'gia As'sa, S. usta — s. Cerata, see Spongia — s. Cynosbati, Bedegar.

Spon'gia Us'ta, *S. As'sa, Carbo spon'giæ, Burnt Sponge,* (F.) *Éponge Torréfiée*, contains carbonate and phosphate of lime, carbonate of soda, charcoal, and iodine. It is used in bronchocele, scrofulous affections, and herpetic eruptions; and its good effects seem to be dependent upon iodine. (It is made by cutting sponge into pieces, and heating it, that any extraneous matter may be separated; burning it in a close iron vessel until it becomes black and friable, and, lastly, rubbing it into very fine powder.) Dose, ʒj. to ʒiij.

Spon'giæ La'pis. A name given to small, friable stones found in sponge. They were formerly esteemed lithontriptic.

Spongieux, see Spongoid.

Spon'giform, (*spongia*, and *forma*, 'form,') Spongoid.

Spong''ing Bath, Bath, sponge.

Spongio'des, Spongoid.

Spongiole (F.), *Spongi'olum, Spongi'ola, Spongelet,* (from *σπογγιον*, 'a small sponge.') The soft succulent extremity of the fibrils or true roots of a plant, by which it absorbs or sucks up fluid. Similar spongioles have been supposed to

exist at the terminations of the absorbents in animals.

Spon'gion, (σπογγιον.) Ancient name of an epithem made of goats' dung: and also of a malagma, which was considered capable of absorbing the serum in dropsies, like a sponge.

Spongiopi'lin, *Spon'giopile,* (*spongia,* 'sponge,' and *pilus,* 'a hair.') A fabric, composed of sponge and wool, felted together in three layers, and coated, on one of its surfaces, with caoutchouc, which renders it impermeable. It is of great service as a cataplasm, fomentation, vehicle for lotions, liniments, &c.

Spongio'sum (Os), Ethmoid bone.

Spongio'sus, Spongoid.

Spongo'des, (*spongia,* and *odes,*) Spongoid.

Spon'goid, *Spongoï'des, Spongo'des,* (F.) *Spongoïde,* (σπογγοειδης, σπογγωδης, from *spongia,* and ειδος, 'resemblance.') Resembling sponge. Of the nature of sponge, *spongy, spongio'sus,* (F.) *Spongieux.*

Spon'goid Inflamma'tion, Hæmatodes fungus.

Spon'goid Tis'sue, (F.) *Tissu Spongoïde.* An adventitious spongy tissue found in cases of rickets.

Spon'gos, (σπογγος,) Tonsil.

Spong''y, Spongoid — s. Tissue, see Bone.

Spon'sa So'lis, 'spouse of the sun,' Calendula officinalis.

Sponta'neous, *Sponta'neus,* (F.) *Spontanée,* (from *sponte,* 'voluntarily.') That which occurs of itself, or without any manifest external cause. Evacuations are termed *spontaneous* which are not produced by medicine. *Sponta'neous las'situde* is that which is not the result of fatigue. Diseases are also *spontaneous* which supervene without apparent cause. *Sponta'neous* or *intraü'terine amputa'tion* is the separation of a limb from the fœtus in utero. It has been found, in such cases, that it is the left arm, which is usually wanting.

Sponta'neous Evolu'tion, see Evolution — s. Version, Evolution, spontaneous.

Spontéparité, (*sponte,* 'voluntarily,' and *pario,* 'I bring forth,') Generation, spontaneous.

Spoon, (from its hollowness,) Umbilicus.

Spoon'wood, Kalmia latifolia, Tilia Americana.

Spo'ra, Spore.

Sporad'ic, *Sporad'icus,* (F.) *Sporadique,* (σποραδικος, 'scattered,' from σπειρω, 'I sow.') An epithet for diseases, *Spor'ades, Morbi sporad'ici* seu *disper'si* seu *sparsi,* (F.) *Maladies sporadiques,* which supervene indifferently in every season and situation, from accidental causes, and independently of any epidemic or contagious influence.

Spore, *Spor'ule, Spor'ulus, Spo'rum, Spor'ulum, Sporus, Spora,* (σπορος, from σπειρω, 'I sow.') The reproductive body in cryptogamous plants, which is analogous to the seed of phanerogamous plants.

Sporid'ium, (from *sporus.*) The reproductive body in algaceous plants, which resembles the spore of other plants.

Sporiso'rium Ma'idis, see Pellagra.

Spor'ula, Spore.

Spor'ule, Spore.

Spor'ulus, Spore.

Spo'rum, Spore.

Spo'rus, Spore.

Spot, Macula — s. of Sömmering, see Foramen centrale, &c.

Spots, Cer'ebral, see Tache cérébrale — s. Germinal, see Molecule — s. Meningitic, see Tache cérébrale.

Spots, Red, (F.) *Taches rouges* ou *lenticulaires, Rose spots, Lenticular spots, Rose'olæ* seu *Pap'ula typho'sæ.* Small red spots which appear in typhoid fever, from the 8th to the 15th day of the disease. They are most frequently seen on the lower and middle portions of the chest, and upper part of the abdomen.

Spots, Rose, Spots, red — s. Summer, Ephelides — s. Wine, Taches de vin.

Spot'ted Fe'ver, Meningitis, cerebrospinal — s. Kidney, see Kidney.

Sprain, (corrupted from *strain* [?],) *Subluxa'tio, Distor'tio, Dias'trophē, Diastrem'ma, Luxa'tio imperfec'ta, Strem'ma, Thlas'ma Strem'ma, Wrench,* (Sc.) *Wramp,* (Prov.) *Wrick, Kench, Keak,* (F.) *Détorse, Entorse, Foulure.* A violent straining or twisting of the soft parts surrounding the joints. According to the degree of the sprain, the fibrous parts of the joint may be simply stretched, or they may be ruptured.

This affection, which has been regarded as incomplete luxation, occurs, particularly, in the ginglymoid joints; — as in the foot, wrist, knee, &c. The violence causes an afflux of blood; the serum of the blood is poured out, and often the blood itself, owing to the rupture of vessels; and inflammation arises, which ends in resolution or induration. Local antiphlogistic applications are required, with perfect rest; and, when the inflammatory action has subsided, cold pumping and friction, with the application of a plaster and bandage, will afford support until the parts affected recover their due tone.

Sprain Frac'ture. Separation of a tendon from its point of insertion, a thin shell of bone being detached.

Sprat, Yellowbilled, Clupea thryssa.

Spray, See Pulverization.

Spray'cure. A variety of the *douche,* which consists in the application of water in the form of spray. See Pulverization.

Spray-produ'cers, see Pulverization.

Spring'worm. The oxyuris vermicularis.

Spruce, (from Prussia [?],) see Pinus abies.

Spruce Beer, *White Spruce Beer.* A beer made as follows: To 10 gallons of *water,* add 6 pounds of *sugar* and 4 oz. of *essence of spruce.* Add yeast; and bottle, when ready. It is grateful and antiscorbutic.

Spruce Beer Pow'ders may be formed of *white sugar,* ℥j. and ℈ij., *subcarbonate of soda,* gr. xxvj., *essence of spruce,* gr. x., in each blue paper; and *acid of tartar,* ℥ss. in each white paper. For half a pint of water.

Sprue, Thrush.

Spuit''io, (*spuere, sputum,* 'to spit,') Exspuition.

Spu'ma Argen'ti, 'froth of silver,' Plumbi oxydum semivitreum — s. Cerevisiæ, Yeast — s. Trium draconum, Antimonium muriatum.

Spumeux, Frothy.

Spumo'sus, (from *spuma,*) Frothy.

Spunk, ([Gael.] *spong,* 'tinder,') Boletus igniarius.

Spur, ([Sax.] ꝑpuꝛ,) (F.) *Eperon des Artères.* The angle at which the arteries leave a cavity or trunk.

Spur, Ergot.

Spur'blind, (Purblind,) Myopic.

Spurge, Ca'per, (*Épurge,* [old F.] *Espurge,* from *e,* and *purgare,* 'to purge,') Euphorbia lathyris — s. Cypress, Euphorbia Cyprissias — s. Flax, Daphne gnidium — s. Flowering, large, Euphorbia corollata — s. Garden, Euphorbia lathyris — s. Greater, Euphorbia palustris — s. Ipecacuanha, Euphorbia ipecacuanha — s. Marsh, Euphorbia palustris — s. Petty, Euphorbia peplus — s. Sea, Euphorbia paralias — s. Spotted, Euphorbia maculata — s. Sun, Euphorbia helioscopia — s. Wartwort, Euphorbia helioscopia.

Spurge'laurel, Daphne laureola.

Spurge'olive, Cneorum tricoccum, Daphne mezereum.

Spu'ta, (pl. of *sputum.*) See Sputum.

Spu'ta, Prune Juice, see Prune juice.

Sputa'men, gen. *Sputa'minis,* (*sputare, sputatum,* 'to spit,') Saliva, Sputum.

Sputamen'tum, Saliva, Sputum.

Sputa'tio, Exspuition.

Sputa'tion, Exspuition.

Sputato'rius, Expectorant.

Spu'tum, *Apochrem'ma, Anachremp'tum, Chrem'ma, Emptys'ma, Sputa'men, Pty'elon, Pytis'ma, Ptys'ma, Spit,* (*spuere, sputum,* 'to spit,') (F.) *Crachat.* The secretion ejected from the mouth in the act of spitting. It is composed of saliva and of the mucus secreted by the mucous membrane of the nasal fossæ and fauces, and often by the membrane of the larynx and bronchia. The sputa are, sometimes, called *eru'ginous,* when of a greenish-yellow color; *gummy,* when they resemble a thick solution of gum; *froth'y,* (F.) *mousseux,* when covered with froth; *rubig''inous,* (F.) *rubigineux* ou *rouillés,* when of a reddish-yellow; and *streaked,* (F.) *striés,* when mixed with lines of blood. Pneumomia, gangrene of the lung, acute bronchitis, phthisis, &c., all have their characteristic sputa, the properties of which aid in the formation of a diagnosis. Also, saliva.

Spu'tum Concoc'tum, (F.) *Crachat Gras, Cuit.* The expectoration of phthisis as modified by the administration of cod-liver oil, the sputa being flattened and ripened.

Spu'tum Cruen'tum, Hæmoptysis — s. Dulce, Saccharorrhœa pulmonalis—s. Oris, Salivation—s. Saccharatum, Saccharorrhœa pulmonalis — s. Sanguinis, Hæmoptysis.

Squall'ing, ([Sax.] ȝellan or ȝȳllan, 'to yell,') Vagitus.

Squa'ma, Scale, Squamous portion, Table.

Squa'mæ, (pl. of *squama,*) Scaly diseases.

Squama'ria, Plumbago Europæa.

Squameux, Squamous.

Squamifor'mis, (*squama,* 'a scale,' and *forma,* 'shape,') Squamous.

Squa'mous, *Squamo'sus, Lepidoï'des, Lepido'des, Squamifor'mis, Squa'miform,* (F.) *Squameux, Lépidoïde, Sca'ly,* (from *squama,* 'a scale.') That which relates to or resembles a scale.

Squa'mous Por'tion of the temporal bone, (F.) *Portion squameuse* ou *écailleuse du Temporal,* is the upper part of the temporal, so called from a fancied resemblance to a scale. See Temporal bone.

Squa'mous Su'ture, *Sutu'ra squamo'sa* seu *mendo'sa* seu *lepidoï'des* seu *lepido'des* seu *cra'nii squamo'sa,* (F.) *Suture squameuse* ou *écailleuse.* The suture which unites the squamous portion of the temporal bone to the parietal.

Certain *scaly* cutaneous affections are also called *squa'mous,* (F.) *Squameux.* See Scale.

Square Stalk, Monarda coccinea.

Squar'ra Ton'dens, (*squarra,* 'scurfiness,' and *tondere,* 'to shave,') Porrigo decalvans.

Squash, Round or **Pat'typan,** see Cucurbita pepo — s. Warted or Longnecked, see Cucurbita pepo.

Squat'ting Pills, (from [Prov.] *squat,* from *quietus,* [?] 'quiet,') Pilulæ opiatæ.

Squaw'mint, Hedeoma.

Squaw'root, Actæa racemosa, Caulophyllum thalictroïdes, Senecio aureus.

Squaw'weed, Erigeron Philadelphicum.

Squeam'ishness, Fastidium cibi.

Squeas'iness, Nausea.

Squelette, Skeleton.

Squelettologie, Skeletology.

Squill, Scilla — s. Vinegar of, Acetum scillæ.

Squil'la, Scilla.

Squinancie, Cynanche, Cynanche tonsillaris.

Squinan'cy, Com'mon, Cynanche tonsillaris.

Squinan'thia, Cynanche tonsillaris.

Squinan'thus, (corr. from *schœnanthus* [?],) Juncus odoratus.

Squine, Smilax China.

Squin'sy, Cynanche tonsillaris.

Squint, ([D.] *Schuinte,* 'a slope,') Strabismus.

Squint'er, see Strabismus.

Squint'eyed, see Strabismus.

Squint'ing, Strabismus.

Squin'zey, Cynanche tonsillaris.

Squirre, Scirrhus — *s. en Cuirasse,* see Ligneous and Scirrhus.

Squir'rel Corn, Dicentra Canadensis.

Squirrheux, Scirrhous.

Squirrhe, Scirrhus.

Squirrogastrie, Scirrhogastria.

Squirrosarque. Induration of the areolar or cellular tissue.

Squir'rus, Scirrhus.

Squirt, Syringe.

Stachelberg, Min'eral Wa'ters of. Stachelberg Springs are far down in the valley of the Linth, in Switzerland. The waters are sulphurous, and are much visited by gouty and rheumatic invalids.

Sta'chys, (σταχυς, gen. σταχυος, 'a spike.') A surgical bandage to the lower belly. The Hypogastrium. [?]

Sta'chys Fœ'tida, (σταχυς,) Galeopsis.

Stac'tê, (στακτη,) Myrrha.

Stade, (from *stadium,*) Stage—*s. de la Chaleur,* see Intermittent fever — *s. de Froid,* see Intermittent fever — *s. de Sueur,* see Intermittent fever.

Sta'dium, (σταδιον,) Period, Stage.

Sta'dium Ac'mes seu Sta'seos. The period of the height of a disease.

Sta'dium Annihilatio'nis seu Convalescen'tiæ seu Reconvalescen'tiæ. The period of recovery from disease.

Sta'dium Augmen'ti seu Incremen'ti Mor'bi. The period or stage of increase of a disease.

Sta'dium Calo'ris, Stage (hot) — s. Convalescentiæ, S. annihilationis.

Sta'dium Decremen'ti. The period or stage of decrease of a disease.

Sta'dium Decrustatio'nis, see Exanthem — s. Desquamationis, see Exanthem — s. Eruptionis, see Exanthem — s. Exsiccationis, see Exanthem s. Floritionis, see Exanthem — s. Frigoris, Stage (cold), see Intermittent fever — s. Incrementi morbi, S. augmentii morbi — s. Latentis contagii, Prodromus — s. Opportunitatis, Prodromus — s. Prodomorum, Prodromus, see Exanthem — s. Reconvalescentiæ, S. annihilationis.

Staff, ([Sax.] ȝtæf, ȝtaf.) An instrument of great importance in lithotomy, — being the director for the gorget or knife. It is made of steel; and the handle is flat and rough, in order that it may be more securely held. The groove is on its convex surface.

Staff Tree, Climb'ing, Celastrus scandens.

Staf'fa, Stapes.

Stag's Piz'zle, see Cervus.

Stage, *Sta'dium,* (F.) *Estage, Étage, Stade.* The period or degree of a disease; especially the period of an intermittent: — as the *cold stage, sta'dium fri'goris — hot stage,* &c.

Stag'gerbush, Andromeda mariana.

Stag'gers, ([old D.] *staggeren,* 'to stagger,') see Cœnurus.

Stag'gerweed, Delphinium.

Sta'gium. The sixth part of an ounce.

Stag'ma, gen. *Stag'matis,* (σταγμα, from αταζω, 'I distil,') *Stalag'ma.* Any distilled liquid or liquor.

Stag'ma, Gutta.

Stagna'tion, *Stagna'tio,* (*stagnare, stagnatum,* 'to form a pond,' *stagnum.*) Accumulation and retardation of fluids in any part of the body.

Stag'num Chy'li, 'pond of the chyle,' Receptaculum chyli.

Stahl'ian. One who follows the doctrine of Stahl.

Stahl'ianism, see Animist.

Stains, Blood, Blood stains.

Stalag'ma, gen. *Stalag'matis,* (σταλαγμα,) Stagma.

Stalagmi'tis Cambogioï'des, *S. Cambo'gia,* (from σταλαγμος, 'a drop,' — the gum exuding by drops.) Gamboge was long ascribed to this fancied Ceylonese plant. It is now known that the name was given by Murray to specimens of two distinct trees of different genera. See Cambogia.

Stalag'mus, (σταλαγμος,) Distillation.

Stale, Urine.

Stal'tica, (σταλτικα,) Repellents.

Stam'mering, (from [Sax.] ꝑtamep, 'to stammer,') Balbuties — s. of the Fingers, Cramp, writers'.

Stamp, ([F.] *estampe,*) Cachet — s. Medicine, Cachet — s. Oculist, Cachet.

Stamp Out. A term used by Sir James Y. Simpson in the sense of to extirpate a disease, as in the case of the Rinderpest by killing all the diseased cattle, and in that of small-pox by isolation.

Stamp'ing Mill, see Pulverization.

Stang, ([Sax.] ꝑtingan, 'to sting,') see Throbbing.

Stan'ni Chlo'ridum, Tin, muriate of — s. Murias, Tin, muriate of — s. Oxyduli murias, Tin, muriate of — s. Pulvis, see Tin.

Stanni'olum, (from *stannum,*) Tinfoil.

Stan'num, Tin — s. Chloratum, Tin, muriate of — s. Cinereum, Bismuth — s. Foliatum, Tinfoil — s. Glaciale, Bismuth — s. Granulatum, see Tin — s. Indicum, Zincum — s. Muriaticum, Tin, muriate of.

Stapédien, Stapedius.

Stape'dius, *Sta'pes,* (F.) *Stapédien, Pyramidal-stapédien, Pyramido-stapéal,* (from *stapes.*) A muscle of the middle ear which draws the stapes obliquely upward.

Sta'pes, gen. *Sta'pedis,* (*sto,* 'I stand,' and *pes,* 'a foot,') 'a stirrup,' *Sta'pha, Staf'fa,* (F.) *Étrier.* The innermost of the small bones of the ear, so called because it resembles a stirrup. It is situate horizontally in the cavity of the tympanum. Its head, which is directed outwards, is articulated with the os orbiculare. Its base faces inward, and is applied to the fenestra ovalis, which it closes imperfectly, and to the membrane to which it is united. Its branches are one *anterior,* and the other *posterior.* They are curved, and the space between them is parabolic. Surgeons have given the name *Stapes* to a bandage used in bleeding from the foot, which forms a figure of 8 around the ankle.

Sta'pha, Stapes.

Sta'phis, gen. *Staph'idis,* (σταφις, 'a grape or vine,') Delphinium staphisagria.

Staphisa'gria, (σταφις, 'a grape or vine,' and αγριος, 'wild,') Delphinium staphisagria.

Staphisaigre, Delphinium staphisagria.

Staphylæmato'ma, gen. *Staphylæmato'matis,* (*staphyle,* and *hæmatoma.*) A tumor formed by effusion of blood beneath the mucous membrane of the uvula.

Staph'ylagra, (*staphyle,* and αγρα, 'a seizure,') Staphylepartes.

Staph'ylē, (σταφυλη, 'a grape,') Uvula, see Vitis vinifera.

Staphylepar'tes, (σταφυλεπαρτης, from *staphyle,* and επαιρω, 'I lift up,') *Staph'ylagra.* An instrument for laying hold of and removing the uvula.

Staphyletom'ia, (σταφυλητομια,) Staphylotomy.

Staphyli'ni, (from *staphyle,*) see Azygos muscle — s. Medii, see Azygos muscle.

Staphyli'nopharynge'us, Palatopharyngeus.

Staphyli'nus Exter'nus, Circumflexus.

Staph'ylis, (from σταφυλη, 'a grape,') Nipple.

Staphyli'tis, gen *Staphyli'tidis,* (*staphyle,* and *itis,*) Uvulitis.

Staphyl'ium, (σταφυλιον, dim. of σταφυλη,) Nipple.

Staphylodial'ysis, (*staphyle,* and *dialysis,*) Cionis, Staphylœdema.

Staphylœde'ma, gen. *Staphylœde'matis,* (*staphyle,* and *œdema,*) *Angi'na uvula'ris, Dysphagia uvulo'sa, Hypostaph'ylē, Hypostapyli'tis, Staphylodial'ysis, Prolap'sus* seu *Propto'sis* seu *Ca'sus* seu *Œde'ma u'vulæ, Hi'mas, Himanto'ma, Himanto'sis, Staphylon'cus, Staphylon'cia, Produc'tio u'vulæ à pitui'tâ, U'vula decid'ua* seu *relaxa'ta* seu *elongata, Cras'pedon.* Relaxation and tumefaction of the uvula, which, either from inflammation or infiltration, hangs down so as to occasion difficult deglutition, cough, &c. Scarification, astringent gargles, and, if necessary, excision, constitute the treatment.

Staphylo'ma, gen. *Staphylo'matis,* (σταφυλωμα, from *staphyle,*) *Uva'tio, Parop'sis Staphylo'ma, Staphylo'sis, Polygro'ma.* A name given to different protrusions of the anterior surface of the eye.

Staphylo'ma, An'nular, see Staphyloma of the sclerotic — s. Ciliary, see Staphyloma of the sclerotic — s. Conicum, Staphyloma of the cornea — s. Conicum Pellucidum, Staphyloma of the cornea.

Staphylo'ma of the Cor'nea, *Sugarloaf Cor'nea* or *Con'ical cor'nea, Con'ical hydrophthal'mia, Staphylo'ma con'icum* seu *pellu'cidum con'icum, Cor'nea cacumina'ta, Conophthal'mia, Prolap'sus cor'neæ, Ceraton'cus, Keratoconus, Hypercerato'sis, Hypercer'asis,* is an unequal, embossed, bluish or whitish, round or conical or hyperboloid tumor of variable size, formed by the projection of the transparent cornea, which is sometimes extenuated and distended, at others thickened.

Staphylo'ma I'ridis, Ptosis iridis, Iridauxesis.

Staphylo'ma Racemo'sum. This term has been applied to a form of staphyloma in which the cornea is perforated at several points, through which small portions of iris protrude.

Staphylo'ma of the Sclerot'ic, *Staphylo'ma Sclerot'icæ, Sclerecta'sia,* differs from the last, in the prominence existing on a part of the eye covered by the sclerotic, which is much thinner. It is generally due to irido-choroiditis.

Poste'rior Staphylo'ma, S. Posti'cum, Sclerecta'sia Poste'rior, Sclerotico-choroidi'tis seu *Sclero-choroidi'tis Posterior,* is a form of the disease whose chief characteristics are posterior elongation of the eyeball, and loss of pigment and atrophy of the choroid.

Ante'rior Staphylo'ma of the Sclerot'ic, Ciliary Staphylo'ma, is a staphylomatous projection of the sclerotic in the ciliary region of the eye.

When the ciliary region around the cornea is involved, it is called *Annular Staphyloma.*

Staphylo'ma of the Sclerot'ic, Ante'rior, see Staphyloma of the sclerotic — s. of the Sclerotic, posterior, see Staphyloma of the sclerotic.

Staphylo'ma U'veæ, Iridauxesis.

Staphylon'cia, (*staphyle,* and ογκος, 'a swelling,') Staphylœdema.

Staphylon'cus, Staphylœdema.

Staphyloplas'tic, *Staphyloplas'ticus,* (*staphyle,* and πλασσω, 'I form.') An epithet applied to the operation for replacing the soft palate when it has been lost. *Staph'yloplasty, U'ranoplasty, Pal'atoplasty,* a word of hybrid formation, is the operation for closing the palatine vault.

Staphylor'raphy, *Staphylor'aphy, Velosyn'thesis, Staphylorrha'phia, Kionorrha'phia, Cionor'rhaphia, Uranor'rhaphē, Uranorrha'phia, Uraniscorrha'phia, Uraniscorrha'phē,* (*staphyle,* and ῥαφη, 'a suture.') The operation for uniting a cleft palate. It consists in paring the edges of the cleft, passing ligatures through them, and bringing them together.

Staphylo'sis, (from *staphyle,*) Staphyloma.

Staph'ylotome, (*staphyle,* and τομη, 'incision.') A knife adapted to the operation for staphyloma.

Staphylot'omy, *Staphylotom'ia, Staphyletom'ia.* Amputation of the uvula.

Star'apple, Broad'leaved, Chrysophyllum cainito — s. Blazing, Aletris farinosa — s. Bloom, Spi-

gelia Marilandica — s. Grass, Aletris farinosa, Hypoxys erecta.

Star Knap'weed, Centaurea calcitrapa — s. of the North, Geum urbanum.

Star Stroke, see Coup de soleil.

Star'beck Spa. A chalybeate spring at Harrowgate.

Starch, ([Sax.] ꝛeapc, 'rigid, stiff,') Amylum.

STARCH, AN'IMAL, Corpora amylacea and Glycogenic matter — s. Blue, Smalt — s. Canna, Tousles-mois — s. Corn, see Zea mays.

STARCH COR'PUSCLES, Corpora amylacea.

STARCH, I'ODIDE OF, *Am'yli Io'didum* seu *Iodure'tum, Am'ylum ioda'tum,* (F.) *Iodure d'Amidon,* prepared by triturating iodine and starch, is said to have the eutrophic effects of iodine, but by some is esteemed inert. Dose, four to six grains.

STARCH, LIV'ER, Glycogenic matter — s. Potato, see Solanum tuberosum.

STARCH SU'GAR, Glucose.

STARCH, TAC'CA, Arrowroot, Tahiti.

Stark'mad, ([Sax.] ꝛeapc, 'strong,') see Mania.

Star'key's Pills, see Pilulæ ex helleboro et myrrhâ — s. Soap, see Sapo.

Startin's Ban'dage, see Splint.

Starva'tion, ([Sax.] ꝛeappian, [G.] sterben, 'to die,' and the Romanic termination *tion.*) Death from hunger or from cold.

Star'wort, Aletris farinosa — s. Wort, golden, Bubonium — s. Wort, water, Callitriche verna.

Stase, Stasis.

Sta'sis, (στασις, from σταω, 'I stop,' (F.) *Stase.* This word has nearly the same signification as stagnation. Stagnation, however, sometimes includes a morbid condition of the fluids — Stasis never. Also, station.

State Med'icine, Medicine, state.

Stat'ic, *Stat'ical, Stat'icus,* (F.) *Statique,* (στατικος.) Relating to *Statics,* or the branch of mechanics which shows the properties of bodies as respects their weight, equilibrium, &c. An epithet applied to the physical phenomena presented by organized bodies — *biostatic* — in contradistinction to the organic or vital. Also, of old, a restraining or astringent remedy.

Stat'ica Medici'na. That part of medical observation, which consists in the daily weighing of the human body, and the various ingesta and egesta. A title to Essays of Sanctorius and Keill.

Stat'ica Sep'ti Na'rium, *Appendix cuta'nea septi na'rium.* The cutaneous appendage to the septum narium.

Stat'ical, Static.

Stat'icē Carolinia'na, of the United States, (στατικη, from στατικος, 'restraining,' owing to its astringency,) *Amevi'cau* or *Sea'side Thrift, Marsh Rose'mary, Marsh'root, Inkroot, Sea Lav'ender, Ord.* Plumbaginaceæ, is considered to be a mere variety of the Statice limonium. The root is *Statice,* of the Ph. U. S.

STAT'ICĒ LIMO'NIUM, *S. Marit'imum, Be'hen ru'brum, Limo'nium, L. ma'jus* seu *vulga'rē, Be'hen, Sea Lav'ender, Red Be'hen, Marsh Rose'mary, Lav'ender Thrift,* (F.) *Behen rouge, Rosmarin des marais, Lavande triste* ou *de mer.* The roots have been esteemed astringent, tonic, and eminently antiseptic.

STAT'ICĒ MARIT'IMUM, S. limonium—s. Vulgare, S. limonium.

Stat'ics, see Static.

Sta'tion, *Sta'tio, Sta'sis, Sta'tus,* (*stare, statum,* 'to stand.') The act of standing.

Sta'tionary, *Stationa'rius,* (F.) *Stationnaire.* A name given by Sydenham and Stoll to certain diseases, which depend upon a particular state of the atmosphere; and which prevail in a district for a certain number of years, and then give way to others.

Statis'tics, Med'ical, *Vi'tal Statis'tics, Biostatis'tics,* (*status,* 'a state,') (F.) *Statistique médicale.* That part of medicine which relates to details — *med'ico-statis'tical*—connected with the mortality, salubrity, &c. of different states, countries, and situations.

It has, also, been used in a wider sense to signify the same as *Numer'ical meth'od,* (F.) *Méthode numérique;* which is applied to the systemization of medical facts, or to the use of numbers in the investigation of disease.

STATIS'TICS, VI'TAL, Statistics, medical.

Stat'ure, *Statu'ra, Meg'ethos, Magnitu'do cor'poris,* (F.) *Taille,* (from *stare, statum,* 'to stand.') The height of the human figure. The following table exhibits the mean height, in feet and decimals, of 1800 men, taken as they were entered upon the lists of recruits filed in the office of the Adjutant-General of the United States. The results are given for 100 men from each State; and no recruit under five feet five inches was received.

	Mean height. Feet.	Six feet and over.	Greatest height.
Indiana	5·7604	18	6·4¼
Kentucky	5·7729	18	6·3¾
Ohio	5·7537	15	6·3½
Tennessee	5·7779	18	6·3
Maine	5·7314	11	6·2
Vermont & New Hampshire	5·6951	6	6·1
Massachusetts & Connecticut	5·6821	5	6·3
North Carolina	5·7814	24	6·3¾
Georgia	5·8272	30	6·6½
South Carolina	5·7729	15	6·4½
Alabama	5·7647	17	6·4
Virginia	5·7488	15	6·2
New York	5·6505	4	6·1½
Pennsylvania	5·6756	5	6·1
New Jersey and Delaware	5·6509	6	6·1
Maryland	5·7130	9	6·2
Illinois	5·7696	17	6·3
Missouri	5·7162	8	6·1½

The minimum height for the American soldier is now five feet three inches; while the British standard is five feet five inches, and the French five feet one inch and a half.

It would seem, from the researches of Professor S. H. Dickson, that the stature of Americans is decidedly superior to that of Europeans, and that the same applies, but to a less degree, to the weight.

The following table exhibits the results of several admeasurements, with the heights of some of the monkey species, on the authority of Mr. Lawrence.

	STATURE. Feet.	In.
An Englishman	6 to 5	4½ to 00
An Englishwoman	5 to 5	4 to 00
European male skeleton	5	8
Do.	5	5
A Negro at the Lunatic Hospital, Liverpool.	5	10½
Another from Virginia	5	5½
Another from the Gold Coast	5	8
Another	5	00
Negro skeleton	4	11
Another	5	7½
A Lascar	5	4
Venus de Medici	5	00
Tyson's Chimpanzé (*Simia Troglodytes*)	2	2
Mr. Abel's Orang Outang	2	7
Camper's Do.	less than 3	0
Mr. White's Monkey	2	2

Sta'tus, gen. *Sta'tûs,* (*stare, statum,* 'to stand,') Acme.

STA'TUS CONVULSI'VUS. A continuous convulsive condition, of very young children especially, producing marked disturbance of respiration, circulation, &c.

STA'TUS CRUDITA'TIS, Crudity.

STA'TUS EPILEP'TICUS. A continuous epileptic convulsive condition, a series of epileptic attacks at times persisting for several days.

STA'TUS ERETHIT'ICUS, Nervous diathesis — s. Gastricus, Embarras gastrique and Saburra — s.

Nervosus, Nervous diathesis — s. Parturiendi, Parturition—s. Sthenicus, Sthenia — s. Verminosus, Helminthiasis.

Staves'acre, Delphinium staphisagria.

Stax'is, (from σταζω, 'I drop,') *Apostax'is.* A slight epistaxis or nasal hemorrhage.

Steam'doctor. A term applied to one who treats all, or most, diseases by steam.

Ste'ar, gen. *Ste'atis,* (στεαρ, gen. στεατος,) see Fat, Sevum.

Stéaraté, Emplastrum.

Ste'arin, see Fat.

Steari'num Ceta'ceum, Cetaceum.

Stéarolé, (from *stear,*) Pomatum — *s. Solide,* Emplastrum.

Stearo'sis, (from *stear,* and *osis,*) Steatosis.

Stearrhœ'a, *Steatorrhœ'a, Seborrhœ'a, Seborrhag''ia, Smegmatorrhœ'a, Smegmorrhœ'a, Flux'us seba'ceus, Seba'ceous Flux,* (*stear,* and ῥεω, 'I flow,') (F.) *Acné Sebacée.* Augmentation of secretion from the sebaceous follicles of the skin, *Stearrhœ'a sim'plex.* A greasy condition of the skin of the face — *cu'tis unctuo'sa* — is a form of stearrhœa. The color of the sebaceous secretion sometimes becomes changed. When yellow, it is called *Stearrhœa flaves'cens;* when blue, *Stearrhœa cæru'lea;* when black, *Stearrhœa ni'gricans.*

Stearrhœ'a Amian'thaca, *Seborrhœ'a Amianthaca.* Seborrhœa having the appearance of scales from a preponderance of the solid constituents of the sebaceous secretion.

Stearrhœ'a Cæru'lea, see Stearrhœa — s. Flavescens, see Stearrhœa.

Stearrhœ'a Ni'gricans, *Chromhydro'sis.* A term used by Dr. Neligan, of Dublin, for a black discoloration of the face, observed in young females affected with derangement of the catamenia, and which, in his opinion, is owing to a dark secretion from the cutaneous sebaceous glands.

Stearrhœ'a Sim'plex, see Stearrhœa.

Steati'tes, (from *stear,*) Polysarcia.

Steatoce'lē, (*stear,* and κηλη, 'a tumor.') A tumor formed by a collection of steatomatous matter in the scrotum.

Steato'ma, gen. *Steato'matis, Tu'mor lar'deus,* (*stear,* and *oma,*) *Seva'tio, Emphy'ma encys'tis steato'ma.* An encysted tumor, whose contents are similar to fat.

Steato'ma Mulle'ri, see Lipoma.

Steatopath'ic, (*stear,* gen. *steatos,* and παθος, 'affection.') Relating to affections of the sebaceous glands.

Steatopy'ga, (*stear,* and πυγη, 'buttocks,') *Buttock-hump.* Fat buttocks; such as exist in the Hottentot female.

Steatorrhœ'a, Stearrhœa.

Steato'sis, *Stearo'sis,* (from *stear,* and *osis.*) Fatty degeneration of a part, or unusual deposition and accumulation of fat in its adipose tissue.

Steato'sis Cor'dis, *Adipo'sis cor'dis, Degenera'tio adipo'sa cor'dis, Pinguitu'do cor'dis, Cardiethmolipo'sis* and *Cardiomyolipo'sis* (Piorry), *Fat'ty heart, Fat'ty degenera'tion of the heart,* (F.) *Dégénération* ou *Dégénerescence du Cœur.* Unusual deposition of fat on the heart: by some presumed to be occasionally a true adipose degeneration of the substance of the heart.

Steato'sis Hepat'ica, Adiposis hepatica.

Steatozo'on Folliculo'rum, (*stear,* and ζωον, 'an animal,') Acarus folliculorum.

Steel, ([Sax.] ȝtẏle,) Chalybs.

Steep, Rennet.

Steep'lebush, Spiræa tomentosa.

Steer's Opodel'doch, see Opodeldoch, Steer's.

Steganop'odes, (στεγανοποδες,) *Planip'edes.* They who have flat feet or are webfooted, (from στεγανος, 'covered,' and πους, 'foot.')

Steg'anus, (στεγανος,) Constipated.

Steg'month, see Parturient.

Stegno'sis, *Steno'sis, Constipa'tio, Stipa'tio, Condensa'tio, Obstruc'tio,* (στεγνωσις, from στεγνοω, 'I constrict.') Constriction or narrowness of the pores and vessels. Stricture. Constipation. Suppression or stopping or stoppage of the evacuations. See Arctatio.

Stegno'tica, (στεγνωτικα,) Astringents.

Steiro'sis, (στειρωσις,) Sterilitas.

Stel'la, 'a star,' *Fas'cia stella'ta,* (F.) *Étoile.* A bandage, improperly compared to a star, because it is crossed like the letter X. This bandage is applied upon one or both shoulders. In the first case, it is called *simple;* in the second, *double.* It was employed in fractures of the sternum, clavicle, and scapula; in luxations of the humerus, &c.

Stel'la Ter'ræ, Plantago coronopus.

Stella'ria Me'dia, (*stella,* 'a star,') Alsine media — s. Scilla, Scilla.

Stella'ta Rupi'na, (from *stella,*) Centaurea calcitrapa.

Stel'late Lig'ament. A name given to the anterior *costo-vertebral ligament,* from its shape.

Stell'ulæ Verheyen'ii, (*stella,* 'a star,' *stellula,* 'a little star,') *Substan'tia stella'ta serpenti'na* seu *radia'ta, Ellych'nia.* A stelliform plexus of veins at the surface of the kidney, which gives origin to the interlobular veins.

Stelochi'tis, Osteocolla.

Stem Pes'sary, see Pessary.

Ste'ma, (στημα,) Penis, (especially the glans.)

Stenag'ma, (στεναγμα,) Suspirium.

Stenag'mus, (στεναγμος,) Suspirium.

Ste'no, (from στενος,) in composition, Narrow.

Ste'no, Duct of, see Parotid.

Stenobreg'mate, (*steno,* and βρεγμα, 'the top of the head,') see Cranium.

Stenocar'dia, (*steno,* and καρδια, 'heart,') Angina pectoris, Cardiostenosis.

Stenocho'ria, *Stenochori'asis,* (*steno,* and χωρα, 'space.') Angustia, Narrowness, Stricture. Employed by some for contraction of the vagina especially.

Stenocho'ria Intesti'ni Rec'ti, Stricture of the rectum — s. Œsophagi, Dysphagia constricta.

Stenomycte'ria, (*steno,* and μυκτηρ, 'nose.') Contraction of the nasal passages.

Ste'non or Ste'no, Duct of, see Parotid.

Steno'sis, (στενωσις, *stenos,* and *osis,*) Stegnosis.

Stenostegno'sis, (*steno,* and *stegnosis,*) Stenostenosis.

Stenosteno'sis, *Stenostegno'sis,* (*steno,* and στενωσις, 'contraction,') *Obstruc'tio duc'tûs Steno'ni'ani.* Narrowness or contraction of the duct of Steno.

Stenostom'ia, (*steno,* and στομα, 'mouth.') Contraction of the mouth.

Stenotho'rax, gen. *Stenothora'cis,* (στενοθωραξ, from *steno,* and θωραξ, gen. θωρακος, 'the chest.') One who has a narrow chest.

Sten'son's Foram'ina, see Scarpa's foramina.

Stentoropho'nus, (Στεντωρ, *Stentor,* a Greek of powerful voice in the army before Troy; and φωνη, 'voice.') One who has a strong voice.

Step, ([Sax.] ȝtæp,) *Pas'sus,* (F.) *Pas.* The step is produced by the separation of the two lower limbs, and includes that space plus the length of the foot.

Steph'anē, (στεφανη,) Crown.

Ste'phen's, Mrs., Rem'edy for the Stone. This consisted of lime, prepared by calcining the shells of eggs and snails, made into pills with soap. A decoction was also administered, consisting of chamomile, fennel, parsley, and burdock, with a portion of Alicant soap. Its virtues were dependent upon the lime and the tonic properties of the decoction. Hales, Hartley, Kirkpatrick, Lobb, and others, wrote in favor of this nostrum; and it was ultimately bought by the British parliament for £5000 — about $25,000.

Stephen'sia Elonga'ta, Matico.

Step'mother's Bles'sing, Hangnail.

Steppe Disease, Rinderpest.

Stercobi'lin, (*stercus,* 'excrement,' and *bilis,* 'bile.') A coloring matter recently extracted from the feculent contents of the intestines.

Ster'colin, (from *stercus,*) Serolin.

Stercora'ceous, *Stercora'rius, Diachoret'icus, Ster'coral,* (from *stercus,*) *Fe'cal, Fæ'cal,* (F.) *Stercoraire, Stercoral.* Relating to excrement.

The French use the term *Fistules stercoraires* for fistulæ which are kept up by the constant passage of fecal or *stercora'ceous matter.* The name *Stercoraires* is sometimes given, in derision, to those physicians who are fond of purging their patients: *à posteriori* has been similarly used.

Stercoraire, Stercoraceous.

Ster'corin, (from *stercus,*) see Excrement and Serolin.

Stercu'lia Acumina'ta, *Kola, Cola* or *Kola Acumina'ta.* An African tree, the source of the *Kola nuts,* which are used in that country as an agreeable stimulant to the nervous system. They contain caffein.

Ster'cus, gen. *Ster'coris,* Excrement, Fimus —s. Anseris, Fimus anseris — s. Caninum album, Album Græcum—s. Diaboli, Assafœtida—s. Equi non castrati, Fimus.

STER'CUS HUMA'NUM, Homerda. Human excrement.

STER'CUS LACER'TÆ, Crocodilia.

Sterelmin'tha, (*stereus,* 'solid,' and ἕλμινς, ἑλμινθος, 'a worm.') A class of solid worms, as the bothriocephalus, tænia solium, &c., found in the human intestines and other organs.

Stereocys'tis, gen. *Stereocys'tidis,* (*stereus,* and κυστις, 'cyst.') A hard encysted tumor.

Ste'reoscope, *Stereoscop'ium,* (*stereus,* and σκοπεω, 'I view.') A physical instrument, by means of which plane pictures of an object are made on each retina, and so blended as to appear as one in relief.

Also, an instrument for detecting a calculus in the bladder, and foreign bodies in the soft parts. It resembles a common catheter, having an expanded free extremity.

Stereot'ica, (from *stereus.*) Fortuitous lesions or deformities affecting the hard parts. The 2d order, class *Tychica* of Good.

Ste'reus, (στερεος.) Solid.

Ster'ile, *Ster'ilis, Ag'onos, Aph'orus, Aphor'icus, Ablast'es, Infecun'dus, Barren,* (F.) *Stérile,* (from στερρος, 'barren.') Not producing fruit; infecund.

Ster'ilis, Sterile.

Steril'itas, *Agon'ia, Steiro'sis, Stiro'sis, Agenne'sia, Agennc'sis, Infecun'ditas, Steril'ity, Acye'sis, Bar'renness, Infecun'dity, Apho'ria, Atec'nia, Atoc'ia,* (F.) *Stérilité.* Quality of that which is barren. Sterility may be *absolute* or *relative.* The former depends upon some vicious conformation of the genital organs, apparent or concealed, and occasionally admits of cure. Sterility is *relative* when a female does not conceive with one individual, but does with another. Sterility in females is often dependent upon a condition of the uterus characterized by membranous menstruation.

Ster'nad, see Sternal.

Ster'nal, *Sterna'lis,* (from *sternum.*) Relating or appertaining to the sternum or breastbone.

STER'NAL AS'PECT. The aspect of the body where the sternum is situate. (Barclay.) *Sternad* is used by the same writer adverbially to signify towards the sternal aspect.

STER'NAL FORA'MEN. An orifice occasionally seen between the third and fourth pieces of the gladiolus or second bone of the sternum, from arrest of development.

Sternal'gia, *Sternodyn'ia,* (*sterno,* and αλγος, 'pain.') Pain referred to the sternum. Angina pectoris.

Ster'no, in composition, the sternum.

Sternoclavic'ular, *Sternoclavicula'ris.* That which relates to the sternum and clavicle.

STERNOCLAVIC'ULAR ARTICULA'TION is the union of the inner extremity of the clavicle with a round facette at each side of the superior extremity of the sternum. In this articulation there are, besides the incrusting cartilages, two *radiated sternoclavicular,* (F.) *Sterno-claviculaires rayonnées, one* anterior and *one* posterior; an *interclavicular ligament* extending between the two clavicles, and two synovial capsules, separated by an *interarticular fibrocartilage.* The costoclavicular ligament may also be considered to belong to this articulation.

Sternoclaviomastoïdien, Sternocleidomastoideus — s. Cleidobrachialis, Pectoralis major — s. Cleidohyoideus, Sternohyoideus.

Ster'noclei'domastoïde'us, *Sternomastoïde'us, Clei'domastoïde'us, Mastoïde'us, M. ante'rior, Nuta'tor cap'itis,* (F.) *Sternoclaviomastoïdien, Sternomastoïdien,* (*sterno,* κλεις, 'the clavicle,' and μαστος, 'the mastoid process.') A muscle situate at the anterior and lateral part of the neck. It is long and flattened; simple, above; and divided into two portions below, where it is inserted into the anterior and superior part of the sternum, and the inner quarter of the clavicle. Above, it terminates at the mastoid process, which it embraces, at the neighboring part of the temporal bone, and at the outer third of the upper curved line of the occipital bone. It carries the head forward; inclines, and rotates it to one side. When both contract, they bend the head directly forwards.

Sternocostal, Triangularis sterni — *s. Costoclavio-huméral,* Pectoralis major — *s. Huméral,* Pectoralis major.

Sternodyn'ia, (*sterno,* and οδυνη, 'pain,') Sternalgia — s. Syncopalis, Angina pectoris — s. Syncoptica et Palpitans, Angina pectoris.

Sternohyoïde'us, *Sternocleidohyoïde'us, Sternohyoïdes, Hyoïdes pri'mus,* (F.) *Cleidohyoidien,* (from στερνον, 'the sternum,' and ὑοειδης, 'the os hyoides.') A muscle situate at the anterior part of the neck; inserted, above, at the inferior edge of the body of the hyoid bone; below, into the upper part of the posterior surface of the sternum,—at the posterior part of the sternoclavicular articulation, and sometimes into the cartilage of the first rib. It depresses the os hyoides.

Sternomastoïdien, Sternocleidomastoïdeus—*s. Pubien,* Rectus abdominis.

Sternoömphalodym'ia, (*sterno,* ομφαλος, 'navel,' and δυω, 'I mingle,') see Somatodymia.

Sternopa'gia, (*sterno,* and παγω, 'I fasten.') A monstrous union of fœtuses, in which they are attached at the sternum.

Sternothyroïde'us, *Sternothyroïdes, Bronchius.* A muscle situate at the anterior part of the neck. It is attached, above, to the oblique line seen on the outer surface of the thyroid cartilage; and terminates, below, at the upper part of the posterior surface of the sternum, and the cartilage of the second rib. When it contracts, it depresses the thyroid cartilage and os hyoides by the medium of the thyrohyoid membrane.

Ster'num, *Ster'non,* (στερνον, from στερρος, 'solid,') *Pec'tus, Os as'ser* seu *pec'toris* seu *xiphoïdes* seu *gladi'oli* seu *ensifor'me, Scu'tum cor'dis* seu *pec'toris, Breastbone, Hæ'mal Spine* of Owen. An azygous symmetrical bone, situate at the forepart of the chest. It is flat; broad above; narrower in the middle; and terminates, below, by a pointed cartilage — the xiphoid. It has an *anterior* or *cutaneous surface,* a *posterior* or *mediastinal* — a *superior* or *clavicular extremity,* and an *inferior* or *abdominal.* It is articulated with the

clavicles and the seven upper ribs on each side, by means of their cartilages. In the adult, it is divided into three parts, — the *manubrium;* the body—*gladiolus, mucro;* and the inferior part or point, *ensiform process, processus ensiformis,* (F.) *appendice sternal, a. xiphoide* ou *ensiforme.* According to Béclard, it is formed of six principal bones, which he names, from their position, 1. *Primi-sternal* or *clavi-sternal:* 2. *Duo-sternal:* 3. *Tri-sternal:* 4. *Quarti-sternal:* 5. *Quinti-sternal:* 6. *Ultimi-sternal* or *Ensi-sternal.*

Sternumen'tum, (*sternuo, sternutum,* 'I sneeze,') Sneezing.

Sternutamento'ria, (*sternuto, sternutatum,* 'I sneeze,') Achillea ptarmica.

Sternutamen'tum, Sneezing.

Sternuta'tio, Sneezing.

Sternutatoire, Sternutatory.

Ster'nutatory, *Sternutato'rius, Ster'nutory, Sternutamen'tum, Errhi'num, Ptar'micum, Anarrhi'num,* (F.) *Sternutatoire.* A substance which provokes sneezing; as tobacco, &c. See Errhine.

Ster'nutory, Sternutatory.

Sterteur, Stertor.

Ster'tor, gen. *Sterto'ris, Ron'chus, Rhon'chus, Reu'chus, Rhen'chus,* (F.) *Sterteur, Ronflement,* (*sterterc,* 'to snore.') The deep snoring which accompanies inspiration in some diseases, particularly in apoplexy. Such respiration is said to be *ster'torous,* (F.) *Stertoreux; Respira'tio stertuo'sa* seu *stertens* seu *stertoro'sa.*

Ster'torous, see Stertor.

Sthemæ'mia, *Hyperæ'mia Pulmo'num* seu *Pec'toris, Congestio Pulmo'num* seu *Pec'toris,* (F.) *Hypérémie* ou *Congestion des Poumons,* (from *stetho,* and *ἁιμα,* 'blood.') Hyperæmia of the lungs. Congestion or accumulation of blood in the pulmonary vessels.

Steth'o, (from στηθος, 'chest,') in composition, 'the chest.'

Stethocathar'sis, (*stetho,* and καθαρσις, 'a purging,') Expectoration.

Stethoch'ysis, (*stetho,* and χυω, 'I pour out,') Hydrothorax.

Stethodes'mis, (*stetho,* and δεσμις, 'a bandage,') Corset.

Stethodes'mium, Corset.

Stethodes'mus, Corset.

Stethom'eter, (*stetho,* and μετρον, 'measure.') An instrument, proposed by Dr. Richard Quain, for measuring the extent of movement of the walls of the chest, as a means of diagnosis in thoracic diseases. It consists of a flat case, not unlike a watch-case, having on its upper surface a graduated dial and index, which is acted on by a simple mechanism. A silk cord, long enough to surround one-half the chest, passes through an aperture in the case. The dial is graduated into fifty equal parts, each of which represents the 1-200th of an inch. In using the instrument, the dial is placed firmly against the spine, and the point of the tape over the sternum, or at any other spot according to the part to be examined. The extension of the string, as indicated by the dial, shows the amount of elasticity of the parietes of the thorax. See Chestmeasurer.

Under the name *thoracom'eter* or *chestmeas'urer,* Dr. Sibson has described an instrument of his invention, which is employed with a similar view as the stethometer of Dr. Quain.

Stethoparal'ysis, *Paral'ysis nervo'rum thora'cis, phrenico'rum,* &c.; (*stetho,* and παραλυσις, 'paralysis.') Palsy of the muscles of the chest.

Stethorrheu'ma, gen. *Stethorrheu'matis,* (*stetho,* and ῥευμα, 'defluxion,' 'rheumatism,') Pleurodynia.

Steth'oscope, *Stethoscop'ium, Stethos'copum, Echoscop'ium, Psophou'eter, Thoracoscop'ium,* (*stetho,* and σκοπεω, 'I examine.') An instrument invented by Laënnec, of Paris, for exploring the chest. The stethoscope, sometimes called *Pectoriloque,* is a cylinder of wood, from four inches to a foot long; pierced through and through by a longitudinal canal about a quarter of an inch in diameter. The longer ones are generally composed of two portions, that fit together by means of a screw, one of which is hollowed at the extremity, in the shape of a funnel. These two portions being screwed to each other, the physician lays hold of the instrument, as he would of a pen, puts the funnel-shaped extremity on the chest of the patient, and applies his ear to the other. To explore the pulsations of the heart, the funnel is plugged up by a piece of the same kind of wood accurately adapted to it, and pierced by a canal of the same width as that in the body of the instrument. Stethoscopes are now made in the plainest and lightest manner, and without any plug. Double or *binau'ral* stethoscopes have, likewise, been invented to enable both ears to be used at the same time.

Stethoscopes are sometimes flexible, like the flexible ear-trumpet.

This mode of examining affections of the chest, *Steth'oscopy, Stethoscop'ia,* &c., is what Laënnec terms *Auscultation médiate, Me'diate Auscultation.*

Stethoscop'ia, see Auscultation and Stethoscope.

Stethoscop'ic, *Stethoscop'icus,* (F.) *Stéthoscopique.* Furnished by stethoscopy or auscultation, as a '*stethoscopic* sign.'

Steth'oscopy, see Stethoscope.

Ste'thus, (στηθος,) Thorax.

Stew, ([old F.] *estuve,* [Sax.] ꝥeꝛa,) Stove.

Stheni'a, *Sthen'ia, Diath'esis sthen'ica, Sta'tus sthen'icus, Vis auc'ta,* (σθενος, 'strength,' 'power.') Excess of strength; excitement of the organic actions. A word used especially by the Brunonians, as well as *Asthenia,* its antitheton. *Sthenic* or *dynamic diseases* are such as depend upon excessive excitement.

Sthen'ic, Active.

Sthen'icus, (from σθενος, 'strength,') Active.

Sthénique, see Active.

Sthenop'yra, (from σθενος, 'strength,' and πυρ, 'fever,') see Synocha.

Sti'an, ([Sax.] ꝥiɣenð, from ꝥiɣan, 'to ascend,' 'to rise,') Hordeolum.

Stib'i, (στιβι,) Antimonium.

Stibia'lis, Antimonial.

Stib'ialism, *Stibialis'mus,* (from *stibium,* 'antimony.') The aggregate phenomena produced by antimonials when given in large quantities — antimonial intoxication or poisoning.

Stibia'tus Tar'tras Lixiv'iæ, Antimonium tartarizatum.

Stib'ii Buty'rum, Antimonium muriatum — s. Deutomurias sublimatus, Antimonium muriatum — s. Hydrosulphuretum rubrum, Antimonii sulphuretum rubrum — s. Oxidum acido muriatico oxygenato paratum, Algaroth — s. Oxidum album mediante nitro confectum, Antimonium diaphoreticum — s. Oxidum præcipitando paratum, Algaroth — s. Oxodes album, Antimonium diaphoreticum — s. Oxodes sulphuretum, Antimonii sulphuretum præcipitatum — s. Oxydi sulphurati hydrosulphuretum luteum, Antimonii sulphuretum præcipitatum — s. Oxydulati sulphuretum, Antimonii sulphuretum præcipitatum — s. Oxydulum vitreatum, Antimonii vitrum — s. Oxydum semivitreum, Antimonii vitrum — s. Oxydum sulphuratum, Oxydum stibii sulphuratum — s. Subhydrosulphas, Antimonii sulphuretum rubrum — s. Submurias præcipitando paratum, Algaroth — s. Sulphurati hydrosulphuretum rubrum, Antimonii sulphuretum rubrum — s. Sulphuretum nigrum, Antimonium—s. Vitrum, Antimonii vitrum — s. et Potassæ deutotartras, Antimonium tartarizatum.

Stibioder'mic, see Unguentum antimonii.

Stibio'sum Hydrosulphure'tum cum Sul'phurē, Antimonii sulphuretum præcipitatum — s. Oxidum, Antimonium diaphoreticum.

Stib'ium, Antimonium.

Sti'chas (Stœchas) **Arab'ica**, Lavandula stœchas.

Stick'wort, Agrimony.

Stic'tapulmona'cea, (from στικτος, 'spotted,') Lichen pulmonarius.

Stiff joint, Mus'cular, Contractura.

Stiff joints, Milksickness.

Stiff neck, Torticollis.

Sti'fle Joint. The femoro-tibial articulation of cattle.

Stigh, Hordeolum.

Stig'ma, (στιγμα, 'a small puncture,') Cicatricula.

Stig'mata, (pl. of *stigma*,) see Nævus and Petechiæ. The breathing pores of insects are so called.

Stig'mata Ovario'rum, *Cicatri'ces Ovario'rum.* The cicatrices left in the ovary after the escape of ova.

Stilbo'ma, gen. *Stilbo'matis*, (στιλβωμα, from στιλβυω, 'I make shining,') Cosmetic.

Stilet, (dim. of *stilus*,) Specillum.

Still, (from *stilla*,) Alembic.

Still Layer of Poiseuille, *Space of Poiseuille.* A thin stratum of liquid in contact with the capillary vessels, in which the white corpuscles of the blood seem to be retarded, while the red corpuscles are hurried along in the centre of the current.

Stil'la, Gutta.

Stilla'tio San'guinis e Na'ribus, (*stillare, stillatum*, 'to drop,') Epistaxis.

Still'birth, see Stillborn.

Still'born, *Na'tus Mor'tuus, Par'tus Emor'tuus*, (F.) *Mort-né.* Born still or lifeless; dead born: a stillborn child, *Necrotoc'ion;* stillbirth.

Stillicid'ium, *Substil'lum*, (*stilla*, 'a drop,' and *cedere*, 'to fall.') This term is often used synonymously with *Strangury.* It means the flow of any liquid — particularly the urine — drop by drop. Also, a kind of embrocation, *Stillicid'ium su'pra par'tem*, effected by dropping a liquid upon a part.

Stillicid'ium Lacryma'rum, Epiphora — s. Narium, Coryza — s. Sanguinis e naribus, Epistaxis — s. Supra partem, see Stillicidium — s. Urinæ, see Stillicidium.

Stillin'gia, (after Dr. Benj. Stillingfleet, an English botanist,) *S. sylvat'ica, Queen's root, Queen's delight, Yaw root, Mar'cory, Cockup hat.* An indigenous plant, which grows in pine barrens, from Virginia to Florida. *Sex. Syst.* Monœcia Monadelphia. *Nat. Ord.* Euphorbiaceæ. The root — *Stillingia*, Ph. U. S. — is said to be used in syphilis, obstinate cutaneous affections, &c., like sarsaparilla.

Sti'lus, Stylus.

Stimato'sis, *Stymato'sis, Hæmorrhag''ia Pe'nis, Stymatorrhag''ia, Phallorrhag''ia, Caulorrhag''ia*, (from στυμα, 'priapism,' itself from στυειν, 'to erect,' and *osis.*) Hemorrhage from the male organ, accompanied or not with priapism.

Stim'mi, (στιμμι,) Antimonium.

Stim'ulant, *Stim'ulans, Ex'citans, In'citans, Incenti'vum, Irri'tans, Exci'tant, Inci'tant, Hypersthen'ic, Pyretogenet'ic*, (from *stimulare*, 'to goad.') A medicine which has the power of exciting the organic action of the different systems of the economy. Some stimulants are *diffusible* — that is, have a prompt but temporary action; others are *permanent* or *persistent.* The action of stimulants is called *stimulation, stimulatio, incitatio.*

The chief stimulants are the following: Æther Sulphuricus, Ammonia, Assafœtida, Brucia, Camphora, Capsicum, Castoreum, Cinnamomum, Copaiba, Cubeba, Guaiacum, Hydrargyri Præparata, Iodinium, Nux Vomica, Olea Essentialia, Opium (in small dose), Piper, Sinapis, Strychnia, Zingiber — Alcohol, Caloric, Electricity, Mental Emotions (the Impetuous).

Stim'ulus, 'a goad,') *Incitamen'tum, Irritamen, Irritamen'tum, Poten'tia Irri'tans.* Anything which excites the animal economy.

Stine, Hordeolum.

Stinge. A variety of urticaria affecting the mouth and nose of cattle in hot weather.

Stink'poke, Dracontium fœtidum — s. Weed, Chenopodium anthelminticum, Datura stramonium, Polanisia graveolens.

Stipa'tio, (*stipare, stipatum*, 'to stop up,') Stegnosis.

Stipa'tio Te'læ Cellulo'sæ Infan'tum. Induration of the cellular tissue of children.

Stiro'sis, (στειρωσις, from στειρος, 'sterile,' and *osis.*) Sterilitas.

Stitch, (same root as *stick* — [Sax.] ꝑtican, 'to pierce,') (Sc.) *Stound*, (Prov.) *Dag*, (F.) *Point*, (L.) *Punctum.* An acute lancinating pain, like that produced by the puncture of a sharp needle.

Stitch, Com'mon, Suture, common — s. Loop, see Suture — s. Royal, see Suture — s. in the Side, Pleurodynia.

Stizolo'bium, (στιζω, 'I prick,' and λοβιον, 'a small pod,') Dolichos pruriens.

Stlen'gis, (στλεγγις,) Strigil.

Stobæ'a Rubricaul'is, (after Dr. Stobæus, of Sweden, a patron of Linnæus.) A South African plant, *Nat. Ord.* Compositæ. A tincture of the bruised roots is diuretic, and of great service in gravel.

Stock'ing, Elas'tic, see Stocking, laced — s. Gum, see Stocking, laced.

Stock'ing, Laced, *Elas'tic* or *Gum Stock'ing*, (F.) *Bas lassé.* A bandage used by surgeons, which consists of a stocking made of firm cloth or dogskin, admitting of being tightly laced anteriorly. It is made, also, of elastic gum cloth. It is employed in varices and ulcers of the legs.

Stœ'chas Arab'ica, (στοιχας,) Lavandula stœchas.

Stœchiol'ogy, *Stœchiolog''ia*, (F.) *Stœchiologie*, (στοιχειον, 'element,' and λογος, 'a discourse.') A treatise on, or the theory of, elements; hence of the elementary parts of organized substances.

Stoichei'on, (στοιχειον,) Element.

Stokes, Disease of, see Exophthalmia.

Sto'ma, gen. *Sto'matis*, (στομα, gen. στοματος,) Mouth.

Stomac'acē, (στομακακη, *stoma*, and κακος, 'evil,') *Stomatoc'acē, Stomal'gia, Labrisnl'cium, Cheiloc'acē, Uloc'acē, Cheilomala'cia, Noma, Stomatonoma, Stomatonecro'sis, Can'cer O'ris, Can'ker*, (F.) *Cancer aquatique, C. aqueux, Stomatite maligne, Gangrène dystrophique, Stomatite putride.* Fetor of the mouth with a bloody discharge from the gums. See Cancer aquaticus. Also, Scurvy.

Stomac'acē, Porphyra nautica — s. Gangrænosum, Cancer aquaticus — s. Universale, Purpura hæmorrhagica.

Stomacal, Stomachal.

Stom'ach, (στομαχος,) *Stom'achus, Ventric'ulus, Ne'dys, Anocœ'lia, Gas'ter, Gluttu'patens, Maw*, (of animals,) (Sc.) *Kyte, Pechan*, (F.) *Estomac*, (from *stoma.*) One of the principal organs of digestion. It is a musculo-membranous reservoir; continuous, on the one side, with the œsophagus; on the other, with the duodenum. It is situate beneath the diaphragm, between the liver and the spleen; and occupies the epigastrium and a part of the left hypochondrium. In it the food is formed into chyme. When viewed externally, the stomach has: 1. An *ante'rior face*, which looks a little upwards. 2. An *infe'rior face*, directed downwards. 3. An *inferior* or *colic margin*, which is convex and extensive, and is called the *greater curvature, curvatu'ra ma'jor*, (F.) *Grand courbure.*

It gives origin to the omentum majus. 4. A *supe'rior* or *diaphragmat'ic mar'gin*, which is shorter, concave, and is called the *lesser curvature*, *curvatu'ra mi'nor*, (F.) *Petit courbure*. The lesser omentum is attached to this. 5. A *left* or *œsophage'al or'ifice*, called, also, the *car'dia*, *Os ventric'uli* or *up'per or'ifice*. 6. A *right* or *intes'tinal* or *infe'rior or'ifice*, called the *pylo'rus*. 7. A considerable dilatation, situate to the left of the cardia and greater curvature — the *great tuberos'ity* or *great cul-de-sac* or *fun'dus* or splenic portion, *saccus cæcus of the stomach*; *fundus* seu *saccus ventric'uli*, *pars* seu *por'tio liena'lis*. 8. A less extensive dilatation, situate to the right of the greater curvature, — *the less'er tuberos'ity* or *less'er cul-de-sac*, *an'trum pylo'ri* seu *pylo'ricum*, *pars* seu *por'tio pylo'rica*, *Pylor'ic por'tion*, *An'trum pylor'icum*. The inner surface of the stomach is of a reddish-white color, and has a marbled appearance. It is constantly covered by thick mucus and is lined by a mucous membrane, which presents numerous wrinkles or *rugæ*. The parietes of the stomach consist of three membranes in superposition. The outermost is serous, and is an extension of the peritoneum. The middle coat is muscular,—some of its fibres running longitudinally; others, transversely, and others obliquely. The innermost membrane is of a mucous nature, *Crus'ta villo'sa ventric'uli*, *Gastromycod'eris*, but not exactly a continuation of the membrane that lines the œsophagus. The mucous and muscular membranes form, at the pylorus, a valve, called the *Pylor'ic valve*. These three coats are united by a dense, close, areolar membrane; and, between the mucous and muscular coats, along the two curvatures especially, is a quantity of muciparous glands, called *Glands of Brun'ner*. The *Matrix* is the fibrous network uniting the cylindrical tubes of the stomach, and also surrounding the intestinal tubes. The arteries of the stomach are very numerous, and proceed from the coronaria ventriculi, the pyloric, splenic, and right and left gastroëpiploic. The veins have the same name, and pursue the same course as the arteries. They pour their blood into the trunk of the vena porta. Its lymphatic vessels are very numerous, and pass into ganglia, situate along the two curvatures. The nerves of the stomach proceed from the pneumogastric, and three divisions of the cœliac plexus.

Stom'ach Ache, Cardialgia, Colic—s. Cadaveric Softening of, see Cadaveric — s. Cell, see Favulus — s. Disease, Limosis — s. First, Ingluvies — s. Fistula, Fistula, gastric — s. Hemorrhagic Erosion of, see Erosion.

Stom'ach-pump, *Gastren'chyta*, *Antli'a gas'trica*, (F.) *Pompe pour l'estomac*. A useful instrument for conveying fluids to the stomach when deglutition is impracticable, and for pumping out the contents of that organ. It consists of a forcing syringe, to the bottom and nozzle of which flexible tubes can be attached. When the object is to force fluids into the stomach, the stomach tube must be attached to the nozzle, and passed down the throat, — the tube connected with the bottom of the syringe being placed in the fluid to be injected. To empty the stomach, the stomach tube must be attached to the bottom of the instrument. This instrument has been of great service where poisons have been taken. The antidote, when any exists, and is at hand, should be promptly administered, if it is capable of at once neutralizing the poison.

The stomach-pump was first employed in America by Dr. Physick, in the year 1812.

Stom'ach, Sec'ond, Proventriculus — s. Sick, Milksickness — s. Third, Ventriculus callosus—s. Tube, see Tube, œsophageal—s. Ulcer of, Ulcer, gastric.

Stom'achal, *Stomach'ic*, *Stomach'ical*, *Cardi'acus*, (στομαχικος,) *Stomach'icus*, *Stomacha'lis*, *Viscera'lis*, (F.) *Stomacal*, *Stomachique*. That which belongs to the stomach; that which is good for the stomach; which strengthens the stomach. A medicine that gives tone to the stomach.

Stomachal'gia, (*stomach*, and αλγος, 'pain.') Cardialgia.

Stom'achi Resolu'tio, 'weakness of stomach,' Dyspepsia.

Stomach'ic, Stomachal.

Stomach'ical, Stomachal.

Stomachique, Stomachal.

Stom'achus, (στομαχος, from *stoma*.) This word has been used in several different acceptations; for example, for the œsophagus, for the cardiac orifice of the stomach (see Cardia), and for the stomach itself. Hippocrates calls the neck of the bladder στομαχος κυστεως; and the neck of the uterus της μητρας στομαχος.

Stomal'gia, *Stomatal'gia*, *Stomatodyn'ia*, (*stoma*, and αλγος, 'pain.') Pain in the mouth.

Stomap'yra, (*stoma*, and πυρ, 'fire, fever.') Aphthæ — s. Aphtha, Aphthæ.

Stomatal'gia, (*stoma*, and αλγος, 'pain.') Stomalgia.

Stomatel'cia, *Stomatelco'sis*, (*stoma*, and ἑλκος, 'an ulcer.') Ulceration of the mouth.

Stomat'ia, *Stomatopathi'a*, (from *stoma*.) Disease of the mouth.

Stomat'ic, (στοματικος,) *Stomat'icus*, (F.) *Stomatique*. A medicine used in diseases, &c., of the mouth. Dentifrices, masticatories, &c., are stomatics.

Stomatite Aphtheuse, Stomatitis, aphthous—*s. Argentique*, see Argentia — *s. Charbonneuse*, Cancer aquaticus — *s. Couenneuse*, Stomatitis, pseudomembranous — *s. Crémeuse pultacée*, Aphthæ — *s. Diphthéritique*, Stomatitis, aphthous — *s. Folliculeuse*, Stomatitis, aphthous — *s. Gangréneuse*, Cancer aquaticus — *s. Maligne*, Stomacace — *s. Mercurielle*, see Salivation, mercurial — *s. Pseudomembraneuse*, Stomatitis, aphthous—*s. Putride*, Stomacace — *s. Ulcéreuse*, Stomatitis, aphthous — *s. Ulcéro-membraneuse*, Stomatitis, aphthous.

Stomati'tis, gen. *Stomati'tidis*, (*stoma*, and *itis*,) (F.) *Inflammation de la Bouche*. Inflammation of the mouth.

Stomati'tis, Aph'thous, *S. follic'ular* or *ul'cerous* or *parasit'ic*, *Em'phlysis Aph'tha*, *A. Adulto'rum*, (F.) *Stomatite*, *S. aphthense* ou *folliculeuse* ou *ulcéreuse* ou *diphthéritique* ou *gangréneuse* ou *pseudomembraneuse*. An inflammation of the follicles of the mouth, constituting the *aphthæ* of the adult, which is generally accompanied by cephalic, gastric, and general disturbance. It may be either discrete or confluent, and requires general and local treatment, adapted to the case. See Aphthæ.

Stomati'tis Catarrha'lis. Catarrhal inflammation of the mucous membrane of the mouth.

Stomati'tis Cremo'sa, Aphthæ.

Stomati'tis Diphther'ica. Diphtheritic inflammation of the mouth.

Stomati'tis, Erythem'atous. Simple inflammation of the mouth.

Stomati'tis Exsudati'va, Aphthæ — s. Follicular, S. aphthous — s. Gangrænosa, Cancer aquaticus — s. Gangrenous, Cancer aquaticus — s. Materna, Stomatitis of nursing women.

Stomati'tis Mercuria'lis, see Salivation, mercurial.

Stomati'tis of Nurs'ing Women, *S. Nutri'cum* seu *Mater'na*, appears to be a variety of S. aphthous.

Stomati'tis Nutri'cum, Stomatitis of nursing women.

Stomati'tis, Parasit'ic, S. aphthous.

Stomati'tis Pseudomem'branous, (F.) *Stomatite couenneuse*, *Diphthérite buccale*, *Pseudomem'-*

branous inflammation of the mouth; in its worst form, *Stomaty'phus*, (F.) *Fégarite*. Inflammation of the mouth accompanied by the exudation of a false membrane — a disease which is rarely seen extensively except in large foundling establishments.

Stomati'tis, Ul'cerative, *S. Ulcero'sa, Stomatitis Exul'cerans*. Inflammation of the mouth, accompanied with ulceration; frequently described under the vague name of *Aphthæ*.

Stomati'tis, Ul'cerous, S. ulcerativè—s. Vesicular, Aphthæ — s. Vesiculosa infantum, Aphthæ.

Stomatoc'acē, (*stoma*, and *κακος*, 'evil,') Stomacace.

Stomatodyn'ia, (*stoma*, and *οδυνη*, 'pain,') Stomalgia.

Stomatogas'tric, *Stomatogas'tricus*, *Stomogas'tric*, *Stomogas'tricus*, (*stoma*, and *γαστηρ*, 'the stomach.') Appertaining to the mouth and stomach; as the *stomatogastric* ganglia of the lower animals. See Encephalon.

Stomatomala'cia Pu'trida, (*stoma*, and *μαλακια*, 'softness,') Cancer aquaticus.

Stomatonecro'sis, (*stoma*, and *νεκρωσις*, 'death,') Cancer aquaticus, Stomacace.

Stomatono'ma, (*stoma*, and *νομη*, 'an eating ulcer,') Stomacace.

Stomatopa'nus, (*stoma*, and *πανος*, 'a glandular tumor,') *Stomatophy'ma glandulo'sum, Pa'nus Fau'cium*. Tumefaction of the glands of the mouth.

Stomatophy'ma, gen. *Stomatophy'matis*, (*stoma*, and *φυμα*, 'a swelling.') A swelling of the mouth.

Stomatophy'ma Glandulo'sum, Stomatopanus.

Stomatoplas'tic, *Stomatoplas'ticus*, (*stoma*, and *πλασσω*, 'I form.') An epithet for the operation of forming a mouth where the aperture has been contracted from any cause — *Stomatoplas'ty*.

Stomatorrhag''ia, *Stomatorrhœ'a, Hæmorrhag''ia o'ris* seu *fau'cium, San'guinis profiu'vium ex O'rē, Hæmorrhoï'des O'ris, Stomato'sis, Stomorrhag''ia*, (F.) *Hémorrhagie buccale*, (*stoma*, and *ῥηγνυμι*, 'I break out.') Hemorrhage from the mouth.

Stomatorrhag''ia Alveolo'rum, Phatnorrhagia — s. Gingivarum, Ulorrhagia.

Stomatorrhœ'a, (*stoma*, and *ῥεω*, 'I flow.') Excessive flow of liquid from the mouth. See, also, Stomatorrhagia.

Sto'matoscope, (*stoma*, and *σκοπεω*, 'I view.') Any instrument for keeping the mouth open, so as to permit the parts within to be inspected — *Spec'ulum o'ris*. Also, an instrument which, like the laryngoscope, is provided with a mirror to reflect light on the interior of the mouth.

Stomatosep'sis, (*stoma*, and *σηψις*, 'putrefaction,') Cancer aquaticus.

Stomato'sis, (from *stoma*,) Stomatorrhagia.

Stomatospas'mus, (*stoma*, and *spasmus*,) Trismus.

Stomaty'phus, (*stoma*, and *typhus*,) Stomatitis, pseudomembranous.

Stomenceph'alus, Stomocephalus.

Stomoceph'alus, *Stomenceph'alus*, (F.) *Stomocéphale, Stomencéphale*, (*stoma*, and *κεφαλη*, 'head.') A genus of monsters having two contiguous eyes, or a double eye occupying the median line; the nasal apparatus atrophied and forming a tube (*trompe*); the jaws rudimental; and the mouth imperfect or wanting. (I. G. St. Hilaire.)

Stomoman'icon, (*stoma*, 'face,' and *μανος*, 'thin' [?],) Platysma myoides.

Stomorrhag''ia, Stomatorrhagia.

Stone Bind'er, Osteocolla — s. in the Bladder, Calculi, vesical—s. Crop, Sedum—s. Crop, biting, Sedum—s. Mint, Cunila mariana—s. Moss, Tripe de roche — s. Pock, Acne — s. Root, Collinsonia Canadensis — s. Sweat, see Hyraceum.

Stones, The, Testes.

Stool, ([Sax.] *ꝑtol*,) Dejection.

Stools, Cal'omel, see Calomel.

Stop'page, Stegnosis.

Stop'ping, Filling, Stegnosis — s. of the Belly, Bowels, Guts, or Stomach, Constipation.

Sto'rax, Styrax—s. Liquida, Liquidambar styraciflua.

Sto'rey's Worm Cakes. An empirical preparation formed of *Calomel*, ℈j., *Jalap*, ʒj., *Zingib.*, ℈ij., *Sacch.*, ʒj., *Cinnab. antim.*, q. s. to color them, *Syrup. simpl.*, q. s. to make into cakes.

Stork'bill, Geranium maculatum, Erodium cicutarium.

Storks'bill, Erodium.

Stound, ([Ice.] *stunde*, 'to be in pain,') Stitch.

Stove, *Æstua'rium, Stu'pha*, (old French) *Estuve; a Stew*, [F.] *Étuve*. A limited space, warmed artificially, and in which the air is slowly renewed. It is used for drying various substances, as plants, extracts, conserves, &c., or for taking vapor baths. In this case the *stew* or *stove* is said to be *wet* or *humid;* in the opposite case it is said to be *dry*, (F.) *sèche*. The latter, which is used by the Turks, is the *Py'ria, Pyriate'rium, Lacon'icum, Calida'rium* or *Calda'rium, Suda'tio concamera'ta, Turkish, Eastern*, or *Roman bath*. In the true Turkish bath, however, the air of the bathing apartment is densely charged with vapor, which the so-called Turkish bath, of modern introduction here and elsewhere, is generally not. The former is their *Tepida'rium* or *Vapora'rium*,(which see.) These kinds of baths greatly excite the cutaneous transpiration, and are valuable agents in rheumatic and other affections.

Stoy's Med'icine for Hydropho'bia, see Anagallis.

Stra'bi, (*στραβοι*,) see Strabismus.

Strabilis'mus, Strabismus.

Strabismom'eter, (*strabismus*, and *μετρον*, 'measure.') An instrument for measuring the linear deviation of a squinting eye.

Strabis'mus, (*στραβισμος*,) *Strabilis'mus, Parop'sis Strabismus*, (from *στραβος*, 'twisted; 'one who squints,') *Strabos'itas, Loxophthal'mus, Distor'sio, Lus'citas, Il'los, Illo'sis, Ilo'sis, Helo'sis, Squint'ing, Squint, Crosseye*, (Prov.) *Doyle, Glee'ing*, (Sc.) *Skel'lie, Skee'ly*, (F.) *Strabisme, Vue louche, Louchement*. Want of concordance of the optic axes. It may be dependent upon natural or acquired inequality in the action of the motor muscles of the eye; on a convulsive state of one of those muscles; a difference in the sensibility of the two eyes; or a cerebral affection. In the treatment, if the disease seems to depend upon an excess of strength in one of the motor muscles, we must endeavor to give tone to that which is too weak by placing before the eye a mask having a small aperture on the side to which it is necessary to direct the pupil; or by wearing glasses provided with a piece of looking-glass on the side to which the eye is viciously turned, so that the reflection may be inconvenient, and occasion the organ to be turned in an opposite direction; or by putting a black patch on the angle opposite to that to which the eye is turned. If owing to weakness, the organ must be strengthened by being exerted alone, and leaving the other at rest. If the disease be symptomatic of cerebral affection, attention must, of course, be directed to the latter.

Strabismus may be *single*, or affect one eye only, or *double*, affecting both eyes, and it may be *conver'gent* or *diver'gent*, that is, with the ball drawn towards the nose or away from it.

Those affected with strabismus are called *Stra'bi, Strabo'nes, Strabo'ni, Streb'li, Il'li, Illi'des, Squint'ers, Squint'eyed*, (Sc.) *Gleyed*, (F.) *Louches, Bigles*. A slight deviation is generally

called a *Cast in the Eye*, and, sometimes, a *Cock-eye*.

Strabis'mus, Conver'gent, see Strabismus—s. Divergent, see Strabismus — s. Double, see Strabismus — s. Single, see Strabismus.

Strabom'eter, (F.) *Strabomètre.* A graduated instrument devised for the purpose of measuring the degree of strabismus.

Strabo'nes, (στραβωνες,) see Strabismus.

Strabo'ni, see Strabismus.

Strabos'itas, Strabismus.

Strabot'omy, *Strabotom'ia,* (στραβος, 'one who squints,' and τομη, 'incision.') The operation for the removal of squinting by the division of the muscle or muscles that distort the eyeball. A *Strabotomist* is one who practises strabotomy.

Strae'death, see Death.

Strain, (στραγγειν, [L.] *stringere,* [F.] *estreindre,* 'to constrict or squeeze,') Sprain.

Strain, *Colare,* (F.) *couler.* To pass decoctions, infusions, &c., forcibly through linen; also, to exert an effort. This is accomplished by fixing firmly the parts where the muscles to be exerted originate, in order that their full power may be developed.

Strain'ing, Nisus.

Straits of the Pel'vis, see Pelvis.

Stramoine, Datura stramonium.

Stramo'nia, Datura stramonium.

Stramo'nii Fo'lia or **Fo'lium,** see Datura stramonium.

Stramo'nium, (compounded from *strychnos* and μανικος, 'maniacal,') Datura stramonium—s. Fœtidum, Datura stramonium — s. Majus album, Datura stramonium — s. Spinosum, Datura stramonium — s. Vulgatum, Datura stramonium.

Stram'ony, Datura stramonium.

Strangal'ides, (στραγγαλιδες,) pl. of *strangalis,* (from στραγγω, 'I compress.') Small, hard tumors, which form as in the breast when the milk does not find issue.

Stranga'lion, (στραγγαλιον,) Tubercle.

Stran'galis, gen. *Stranga'lidis,* (στραγγαλις,) Tubercle.

Strangalis'mus, (στραγγαλισμος.) Strangulation.

Stran'gers' Fe'ver, see Fever, strangers'.

Strangula'tio, (στραγγω, 'I compress,') Orthopnœa, Strangulation — s. Uterina, Angone — s. Vulvæ, Hysteria.

Strangula'tion, *Strangula'tio, Pnix, Pnix'is, Pni'gos, Pnig'ma, Strangalis'mus,* (F.) *Étranglement, Strangulation.* State of a part too closely constricted. Thus we say that there is *strangulation* of an intestinal hernia, when the opening that gives passage to the portion of protruded intestine seriously intercepts the continuity of the digestive canal. In *Legal Medicine,* it means the forcible obstruction of the air-passages, by a ligature or by the hand, for criminal purposes. See Suffocation.

Stran'gulator, see Lycoides.

Strangul'lion, Strangury.

Strangu'ria, Strangury — s. Cruenta, Cystorrhagia.

Strangurie, Strangury — s. *Menstruelle,* Dysmenorrhœa.

Strangu'rious. Affected with or of the nature of strangury.

Stran'gury, (στραγγουρια,) *Strangu'ria, Paru'ria stillati'tia, Dysu'ria, Uri'næ Stillicid'ium* seu *Substil'lum, Strangul'lion, Strongull'ion,* (F.) *Strangurie,* (στραγγειν, 'to squeeze,' and ουρον, 'urine.') Extreme difficulty in evacuating the urine, which issues only drop by drop, and is accompanied with heat, pain, tenesmus at the neck of the bladder, &c. See Ischuria, and Retention.

Stranx, (στραγξ.) Gutta.

Strap'ping, ([Sax.] ꝑꝛoppe, 'a strap.') The dressing of ulcers by means of straps or strips of adhesive plaster, linen, &c. Also, the plaster thus applied.

Strap'ping, Wa'ter, see Water-dressing — s. Wet, see Water-dressing.

Strathpef'fer, Min'eral Wa'ters of. A sulphuretted water, at Strathpeffer, a few miles west from Dingwall, in Ross-shire, Scotland. It contains sulphate of soda, sulphate of lime, chloride of sodium, sulphate of magnesia, and sulphohydric acid.

Stratio'tes, (στρατιωτης,) Achillea millefolium.

Stra'tum Bacilla'tum seu **Bacillo'sum** seu **Bacillo'rum,** 'bacillary layer,' (from *sternere, stratum,* 'to spread out,') see Tunica Jacobi.

Stra'tum Bowman'ni. The anterior elastic lamina of the cornea, between the proper cornea and the conjunctival epithelium, which, according to Bowman, aids the cornea in maintaining its exact curvature.

Stra'tum Cor'neum, Epidermis — s. Cylindrorum, Tunica Jacobi — s. Germinativum, Proligerous disk, Tache embryonnaire — s. Malpighii, Corpus mucosum — s. Mucosum, Corpus mucosum — s. Pigmenti, see Choroid — s. Proligerum, Proligerous disk.

Straw'berry, ('strewberry,') Fragaria—s. Bush, Euonymus Americanus — s. Shrubby, Rubus arcticus.

Straw'berry Tongue. A characteristic appearance of the tongue in scarlatina, in which, after the clearing away of a thick white fur, the organ becomes preternaturally red and clean.

Straw'berry Tree, Euonymus Americanus — s. Wild, Fragaria Virginiana.

Streak, Prim'itive, (from [Sax.] ꝑꝛice, 'a line,') Groove, primitive.

Streat'ham, Min'eral Wa'ters of. Streatham is a village near London. The waters are saline and cathartic.

Streb'li, (στρεβλοι,) see Strabismus.

Streblo'sis, (στρεβλος, 'twisted,') Luxation.

Strem'ma, gen. *Strem'matis,* (στρεμμα,) Luxation, Sprain.

Strepito'sus Mor'bus seu **Affec'tus,** (F.) *Maladie bruyante,* 'noisy disease.' A kind of flatulent disease, said by Sorbait to be not uncommon in the Austrian Alps, in which emphysematous tumors form on different parts of the body, — accompanied by sonorous excretion of gas by the mouth and anus.

Strep'itus, (from *strepere, strepitum,* 'to make a noise,') Bruit — s. Aurium, 'noise of the ears,' Tinnitus aurium.

Stretch'ing, ([Sax.] ꝑꝛeccan, 'to stretch,') Pandiculation.

Stri'a Cor'nea. The superficial stratum of the tænia semicircularis.

Stri'a Vascula'ris. A vascular strip on the outer wall of the membranous canal of the labyrinth.

Stri'æ, (pl. of *stria,* 'a furrow,') see Vibices — s. Ciliares, Ciliary processes — s. Corneæ, Tænia semicircularis — s. Longitudinales Lancisii, see Corpus callosum — s. Medullares, see Processus teretes — s. Retinæ subjectæ ligamento ciliari, Halo signatus — s. Semilunares, Tænia semicircularis — s. Terminales, Tænia semicircularis — s. Transversales Willisii, see Corpus callosum.

Stri'ated, *Stria'tus,* (F.) *Strié,* (from *stria,* 'a channel or groove.') Marked with small channels or grooves, or with lines of another color.

Stri'ated Coat, see Artery — s. Muscular fibre, see Muscular fibre.

Stria'tus, (*striare, striatum,* 'to make grooves or furrows,') Cannelé, Grooved, Striated; see Corpora striata.

Stribili'go, gen. *Stribili'ginis,* Efflorescence.

Strictu'ra, Stricture — s. Ani, Stricture of the rectum — s. Intestini recti, Stricture of the rec-

tum — s. Intestini recti spasmodica, Stricture of the rectum, spasmodic—s. Œsophagi, Dysphagia constricta — s. Œsophagi callosa, Dysphagia constricta — s. Œsophagi spasmodica, Œsophagismus — s. Pharyngis seu Œsophagi vera, Dysphagia constricta—s. Præputii, Phimosis—s. Pylori, see Gastrostenosis — s. Urethræ, Urethrostenosis — s. Ventriculi, Stricture of the stomach.

Stric'ture, *Strictu'ra,* (*stringere, strictum,* 'to draw tight,') *Coarcta'tio, Stegno'sis,* (F.) *Rétrécissement.* A diminution or contracted condition of some tube or duct, as the œsophagus, rectum, urethra, &c. This must be dilated by appropriate bougies. Strictures may, also, occur in the intestines: they are unmanageable, with the exception of those of the rectum, which admit of topical applications.

Stric'ture of the Rec'tum, *Strictu'ra A'ni* seu *Intesti'ni Rec'ti, Archostegno'ma, Rectosteno'sis, Euthyenterosteno'ma, Archostegno'sis, Archosteno'sis, Proctoënecli'sis, Angusta'tio* et *Restric'tio intesti'ni rec'ti* seu *a'ni, Stenocho'ria intesti'ni, Proctosteno'sis organ'ica,* occurs organically, and is a very serious affection; being generally dependent upon scirrhus.

Stric'ture of the Rec'tum, Spasmod'ic, *Strictu'ra Recti* seu *Intesti'ni Rec'ti spasmod'ica, Obstruc'tio Rec'ti spas'tica.* An affection occurring in the nervous especially, which subsides spontaneously, after a longer or shorter continuance. It may also be of chancroidal origin.

Stric'ture of the Stom'ach, *Gastrosteno'sis, Coarcta'tio* seu *Strictu'ra ventric'uli.* See Gastrostenosis cardiaca, &c.

Stric'ture of the Ure'thra, Urethrostenosis — s. of the Urinary bladder, Cystostenochoria — s. Vesicæ urinariæ, Cystostenochoria.

Stricturot'omy, Urethrotomy.

Stri'dor Den'tium, 'grinding of the teeth,' Brygma.

Strié, Striated.

Stri'ga ('a furrow') **Cartilagino'sa Cor'dis,** Isthmus of the fossa ovalis.

Stri'gis, *Strig''ilis,* (from *stringere,* 'to touch lightly,') *Stlen'gis, Stelen'gis.* A fleshbrush. Also, an instrument, anciently used in the baths, for scraping off the sweat. The process was called *Strigilla'tio, Strigilla'tion.*

Striped Mus'cular Fi'bre, see Muscular fibre.

Strobili'tes, (στροβιλιτης, from στροβιλος, *strobilus,* 'a cone of the pine.') Wine impregnated with the cones of the pine.

Stroem'ia, (after H. Stroem, a Norwegian naturalist,) Cadaba.

Stroke, Apoplec'tic, (from [Sax.] arepican, 'to strike.') An apoplectic seizure.

Stroke, Back, of the Heart, Impulse, Diastolic.

Stroke, Paralyt'ic. A sudden attack of encephalospinal paralysis.

Stroke, Wa'ter, see Hydrocephalus internus.

Stro'ma, gen. *Stro'matis, Strag'ulum, Stramen'tum,* (στρωμα, 'a bed or couch,' from στρωννυω, 'I spread out; I cover.') The bed or foundation texture of an organ,—as the stroma of the ovary. Applied, also, to the bed or base of any formation, — as the 'amorphous stroma' of scrofulous formations.

Stro'ma, Intertu'bular, see Kidney.

Stro'mal, *Stroma'lis,* (from *stroma.*) Relating or appertaining to the stroma of an organ.

Strongle, Strongylus — *s. Géant,* Strongylus gigas.

Strongul'lion, Strangury.

Stron'gylus, (from στρογγυλος, 'round.') Hippocrates and others mean the *As'caris lumbricoï'des* by this term. The *Strongylus gi'gas, Eustron'gylus gi'gas, As'caris viscera'lis* seu *rena'lis, Fusa'ria viscera'lis* et *rena'lis,* (F.) *Strongle, S. géant,* is, however, distinct. It has an obtuse, flat head; mouth surrounded with six flattish papillæ; the whole bursa of the male truncated; the tail of the female rounded. It is sometimes met with, — five inches, a foot, a foot and a half, and even three feet long, and from two lines to half an inch in diameter. It is occasionally found in the human kidney; rarely in other viscera, and still more rarely in the intestinal tube. See Parasites.

Stron'gylus, (στρογγυλος,) Teres—s. Bronchialis, see Parasites—s. Longevinatus, see Parasites and Worms.

Stro'phos, (στροφος, from στρεφω, 'I twist,') Tormina.

Strophule, Strophulus.

Stroph'ulus, *Licheni'asis stroph'ulus, Ebulit''io, Exanthe'ma* seu *Exor'mia stroph'ulus, Red Gum, Gum Rash, Red Gown, Tooth Rash,* (F.) *Strophule, Feux de dents.* It consists of an eruption of red, or sometimes whitish pimples, *White Gum, Milk-spots,* occurring in early infancy, chiefly about the face, neck, and arms, surrounded by a reddish halo; or interrupted by irregular patches of cutaneous blush. All the varieties under this genus arise in consequence of the extreme vascularity and irritability of the skin at this period of life, when the constitution is liable to be disturbed by irritation, either in the alimentary canal, gums or other parts. None of these eruptions are of any importance, and no medical treatment is usually necessary. If the stomach seems at all disordered, a little rhubarb and magnesia may be administered occasionally. Willan and Bateman reckon five species,—*Strophulus intertinc'tus, Red gum* or *gown; S. al'bidus, White gum; S. confer'tus, Rank red gum, Tooth rash; S. volat'icus* or *Erythe'ma volat'icum,* and *S. can'didus.*

Stroph'ulus Pruriginо'sus is rather an obstinate form of lichen, with pruriginous papules, and should therefore be more properly termed *Lichen pruriginosus.*

Stroph'ulus Sylves'tris, Ignis sylvaticus—s. Volaticus, Ignis sylvaticus.

Stro'phus, (στροφος, from στρεφω, 'I twist,') Tormina.

Struc'tio, (from *struere, structum,* 'to build,') Structure.

Struc'tural, *Structura'lis.* Of or belonging to structure.

Struc'ture, *Structu'ra, Struc'tio, Conforma'tio, Catasceu'ē.* The arrangement of the different tissues or organic elements of which animals and vegetables are composed. See Tissue.

Stru'ma, gen. *Strumæ,* Bronchocele, Scrofula—s. Follicular, Bronchocele.

Stru'ma Adipo'sa, *Obes'itas col'li.* Fatty neck. Prominence of the neck from obesity.

Stru'ma Fungo'sa, Encephaloid.

Strumes, Scrofula.

Strumeux, Scrofulous.

Strumo'sis Cer'ebri, Encephalophymata — s. Pulmonum, Tubercles of the lungs.

Strumo'sus, Scrofulous.

Stru'mous, Scrofulous.

Struthioph'agus, (στρουθιον, 'a young ostrich,' and φαγω, 'I eat.') Struthiophagous tribes still exist in some parts of Africa.

Stru'thium, (στρουθιον,) Saponaria.

Struve's Lo'tion for Hoop'ingcough, see Lotion, Struve's, for hoopingcough.

Strych'nia, (from *strychnos,*) *Strychni'na, Strych'nine, Strych'nin, Strychni'num, Strych'nium, Teta'nium, Vauque'lin, Tet'anin.* An alkaline principle; solid, crystalline, inodorous, bitter, and excessively poisonous, which has been found in *Strych'nos nux vom'ica, S. Colubri'na, S. Tieuté,*

Igna'tia ama'ra, Cer'bera Theve'tia, and *C. Aho'vai.* (*Nucis vomicæ* rasur., ℥xlviij., *Calcis* pulv., ℥vj., *Acid. muriat.,* f℥iijss., *Alcohol., Alcohol. dilut., Acid. sulphuric. dil., Aquæ ammoniæ, Carbon. animal. purif., Aquæ,* āā q. s. Macerate the nux vomica in two gallons of water, acidulated with one-third of the muriatic acid, for 24 hours; then boil for two hours, and strain with expression through a strong muslin bag. Boil the residue twice successively in the same quantity of acidulated water, each time straining as before. Mix the decoctions, and evaporate to the consistence of thin syrup; then add the lime, previously mixed with a pint of water, and boil for ten minutes, frequently stirring. Pour the whole into a double muslin bag, and having washed the precipitate well with water, press, dry, and powder it. Treat the powder repeatedly with diluted alcohol, in order to remove the brucia, until the washings are but faintly reddened by nitric acid. Then boil it repeatedly with alcohol until deprived of bitterness, mix the several tinctures, and distil off the alcohol by means of a water-bath. Having washed the residue, mix it with a pint of water, and applying a gentle heat, drop in sufficient diluted sulphuric acid to neutralize and dissolve the strychnia; then add purified animal charcoal; boil for a few minutes, filter, evaporate, and crystallize. Dissolve the crystals in water, and add sufficient water of ammonia to precipitate the strychnia. Lastly, dry the precipitate on bibulous paper. Ph. U. S., 1873.) The action — therapeutical and toxical — of strychnia on man and animals is exactly like that of the alcoholic extract of nux vomica. It is, however, more active. An eighth of a grain is sufficient to kill a large dog; and a quarter of a grain produces marked effects on the human body, when in health. It has been given in paralysis and other cases like nux vomica. Dose, one-sixteenth to one-twelfth of a grain. See Poisons, table of.

Strych'nia, Ac''etate of, Strychniæ acetas.

Strych'nia, Ar'senite of. A soluble salt employed in intermittent fever in the minimum dose of the sulphate.

Strych'nia, Bro'mide of, Strychniæ bromidum —s. Hydriodate of, Strychniæ hydriodas— s. Iodate of, Strychniæ iodas — s. Iodide of, Strychniæ hydriodas.

Strych'nia, I'odide of Iodhy'drate of, (F.) *Iodure d'Iodhydrate de Strychnine,* is made by pouring a solution of *ioduretted iodide of potassium* into a solution of a *salt of strychnia,* treating the precipitate with *boiling alcohol,* and crystallizing. Used in the same cases as strychnia. Dose, a tenth to a sixth of a grain.

Strych'nia, Mu'riate of, Strychniæ murias — s. Nitrate of, Strychniæ nitras — s. Sulphate of, Strychniæ sulphas.

Strych'nia and Zinc, Double I'odide of, Zinc and strychnia, double iodide of.

Strych'niæ Ace'tas, *Strych'nium* seu *Strychni'num ace'ticum, Ace'tas strych'nii* seu *strych'nicus, Ac''etate of strych'nia* or *strych'nine.* (This salt is formed by the direct combination of *strychnia* with *acetic acid.*) It is given in the same cases as pure strychnia.

Strych'niæ Bro'midum, *Bro'mide of Strych'nia.* Prepared by a process analogous to that for bromide of quinia. It is prescribed in syrup, each drachm of which contains gr. $\frac{1}{32}$ of strychnia.

Strych'niæ Hydri'odas, *S. Iodhy'dras, Strych'nium hydroïod'icum, Hydri'odas* seu *Iodhy'dras strych'nicus, Hydri'odate* or *Iodide of strych'nia,* is prepared by mixing a solution of *iodide of potassium* with a concentrated solution of *acetate of strychnia.*

Strych'niæ I'odas, *Strychni'næ Iodas, Strychni'na ioda'ta, Strych'nium* seu *Strychni'num Iod'icum, Iodas Strych'nii* seu *Strych'nicus, Iodate of Strych'nia* or *Strych'nine.* (This salt may be formed by adding a concentrated solution of *iodic acid* to *strychnia,* treating with *boiling alcohol,* filtering, and leaving it to spontaneous evaporation.)

Strych'niæ Mu'rias, *Mu'riate of Strych'nia.* (The product of the union of *muriatic acid* and *strychnia.*) Used in the same cases as strychnia.

Liquor Strych'niæ, Solu'tion of Strych'nia, (Ph. B., 1867,) is composed of *Strychnia,* gr. iv., *Acid. hydrochlor. dil.,* ♏vj., *Sp. vectif.,* ℥ij., *Aq. destillat.,* f℥vj. Dose, gtt. iv.–viij.

Strych'niæ Ni'tras, *Strych'nium Ni'tricum, Ni'trate of strych'nia* or *strych'nine,* (F.) *Nitrate* ou *Azotate de strychnine.* (The product of the union of nitric acid and strychnia.) Used in the same cases as strychnia.

Strych'niæ Sul'phas, (Ph. U. S., 1873,) *Strych'nium sulphu'ricum, Sul'phate of strychnia* or *strych'nine,* (F.) *Sulfate de strychnine.* (This product of the union of *strychnia* and *dilute sulphuric acid* was admitted into the Ph. U. S. for 1863.) It is the salt of strychnia usually prescribed.

Strychni'na, Strychnia.

Strych'nine, Strychnia — s. Azotate of, Strychniæ nitras — s. Sulphate of, Strychniæ sulphas.

Strychni'num, Strychnia.

Strych'nism, see Strychnos nux vomica.

Strych'nium, Strychnia — s. Aceticum, Strychniæ acetas — s. Nitricum. Strychniæ nitras — s. Sulphuricum, Strychniæ sulphas.

Strychnoma'nia. With the ancients, the delirium caused by the Strychnos or Atropa belladonna.

Strych'nos, (στρυχνος,) Atropa belladonna, Solanum dulcamara — s. Colubrina, see Strychnia and Strychnos nux vomica — s. Guianensis, see Curare — s. Ignatii, Ignatia amara.

Strych'nos Nux Vom'ica, *Nux Vomica, Metel'la, Canirum, Kooch'la tree. Nat. Ord.* Loganiaceæ. *Sex. Syst.* Pentandria Monogynia. (F.) *Vomiquier.* A tree of the family *Strychnoïdes,* which grows in India, and the seeds of which have been long sold in the shops, under the names *Nux Vom'ica, Vom'ic* or *Poison nut, Bachelor's buttons,* &c., (F.) *Noix vomique.* For a long time, these seeds were used only for poisoning rats, but subsequently an alcoholic extract was prepared from them, which was administered in paralytic affections, in small doses. The dose of the Alcohol'ic Ex'tract, *Extrac'tum nu'cis vom'icæ spirituo'sum* seu *nucis vomicæ resinosum* seu *nucis vomicæ alcoholicum* (Ph. U. S., 1863) seu *nucis vomicæ,* (Ph. U. S., 1873,) (F.) *Extrait alcoholique de noix vomique,* is half a grain to two grains. It produces a kind of tetanic convulsion in the paralyzed parts, when given to the requisite extent. It has also been administered in chronic diarrhœa and dysentery. When taken to such an extent as to induce toxical phenomena — *Strychnism* — it causes at first, or when given in a smaller dose, greatly augmented excitability of the spinal nervous system, with slight transient paroxysms or spasms of the limbs, and hurried respiration. In larger doses, the excitability is still more developed, with paroxysms of prolonged general tetanic convulsions, laryngismus or contraction of the glottis, violent efforts of respiration, and asphyxia. The most important principles obtained from it are strychnia and brucia. Igasuria has also been derived from it. See Strychnia, Brucia, Igasuria.

The following is the formula for the preparation of the Extrac'tum Nu'cis Vom'icæ of the Ph. U. S., (1873,) *Alcoholic Extract of Nux Vomica.* Take of *Nux vomica,* in fine powder, ℥xij., *Alcohol,* a sufficient quantity. Mix the nux vomica with four fluidounces of alcohol, and allow the mixture to stand for an hour. Then introduce it into a cylindrical percolator, and gradually pour alcohol upon it until the tincture passes without bitterness. Distil off the alcohol, by means of a

water-bath, until the tincture is reduced to half a pint, and evaporate this to the proper consistence.

The bark is the *false angustura* or false *cusparia bark; Rohun.* See Brucea antidysenterica.

The wood of Strych'nos Colubri'na, *Modira caniram*, an Indian tree which contains strychnia, was formerly considered a specific against the bites of venomous animals, and was recommended by Boerhaave in intermittents. It is the *Lig'num Colubri'num*, (F.) *Bois de Coleuvre.*

Under the names στρυχνη, and στρυχνος, different kinds of nightshade are described by Dioscorides.

Strych'nos Potato'rum, 'strychnos of drinkers,' *Clear'ing nut.* The fruit of a large tree of Silhet, which, when ripe, is sold in the markets of India, and has been introduced into those of London, under the name *Nirmullees* or *Nirmillies.* One of them is well rubbed for a minute or two around the inside of a vessel containing water, which it purifies by causing the impurities which the fluid contains to be deposited, it is supposed, by its albumen and casein.

Strych'nos Pseudoqui'na, *Quina do Campo*, of Brazil, is used by the natives as a substitute for cinchona.

Strych'nos Tieuté, see Strychnia and Upas — s. Toxicaria seu Toxifera, see Curare.

Stryph'na, Astringents.

Stryphnoden'dron Barbatimao, (*stryphnos*, and δενδρον, 'a tree,') Cortex adstringens Brasiliensis.

Stryph'nos, (στρυφνος, 'sour, harsh,') Acerb.

Studio'sus Medici'næ, ('fond of medicine,') Philiatros.

Stu'dium Ina'ne, 'empty study,' Aphelxia otiosa.

Stud'y, Brown, Aphelxia otiosa.

Stuff, ([D.] *Stoffe*, [F.] *Estoffe, Etoffe,*) see Medicament and Falsifications, table of.

Stuf'fing, Cynanche trachealis, Filling.

Stultit''ia, Fatuitas.

Stump, ([G.] Stumpf, [D.] *Stomp,*) (F.) *Moignon.* The part remaining from which a limb or other part has been amputated or removed in any manner. Also, the portion of a tooth remaining in the alveolus, after the corona has been removed, (F.) *Chicot.*

Stump'foot, Kyllosis.

Stunned, ([old French] *Estonné, Étonné,* [L.] *attonitus,* 'astonished,' [Sax.] ϸunian, 'to stun.') An epithet applied to one who, in consequence of a fall or other accident, has received such a concussion of the brain as to deprive him, for a time, of his mental manifestations.

Stu'pa, (στυπη,) *Stupha, Stuppa, Stupei'on.* Tow, used in certain surgical apparatuses and dressings, (F.) *Étoupe.* Also, a *Stupe*, that is, cloth or tow used in fomentations. A flannel or other article wrung out of hot water, plain or medicated, applied to a part, is a *stupe.* The act of applying such stupe is called *stu'ping.*

Stupe, Stupa.

Stupefacien'tia, (*stupere,* 'to be benumbed,' and *facere,* 'to make,') Narcotics.

Stupéfactifs, Narcotics.

Stupefac'tio, Narcosis.

Stupéfiants, Narcotics.

Stupei'on, (στυπειον,) Stupa.

Stupeur, Stupor.

Stu'pha, Stove, Stupa.

Stu'pia, Tin.

Stupid'itas, (from *stupere,* 'to be benumbed,') Idiotism, Imbecility.

Stu'ping, see Stupe.

Stu'por, (*stupere,* 'to be benumbed,') *Ecplex'is, Ecplex'ia, Consterna'tio,* (Sc.) *Swarff, Swerf,* (F.) *Stupeur.* Diminished activity of the intellectual faculties, often amounting to lethargy. It occurs in many affections, especially in the neuroses.

Stu'por, Narcosis—s. Artuum, Obdormitio—s. Dentium, Hæmodia — s. Formicans, Formication — s. Mentis, Fatuitas — s. Vigilans, Catalepsy.

Stup'pa, (στυπη,) Stupa.

Stupra'tion, Stuprum.

Stu'prum, *Rape, Stupra'tion,* (F.) *Défloration, Viol.* Forcible and illicit connection with a married or unmarried woman. When committed upon the latter, which is most commonly the case, it is also called *Deflora'tion, Deflora'tio, Devirgina'tio, Vitia'tio, Apanthis'mus,* &c. In judging whether rape has been committed under such circumstances, the state of the genital organs, the age of the individual, and the possibility of accidents and diseases of the parts, will have to be considered. It will be necessary, also, to be acquainted with the evidences of virginity; and to determine, — if signs of virginity no longer exist, — whether its loss be attributable to copulation, or to the introduction into the vagina of any other body than the male organ, &c. *Recent deflowering* can, of course, be much more readily distinguished than that which has taken place some time. Rape almost always includes the idea of violence, while sexual intercourse with persons in an unconscious condition, or with idiots or insane persons, is, at times, separated from rape, and reckoned as violation.

Stur'dy, ([F.] *Étourdi,* [old F.] *Estourdi,* 'giddy,') see Cœnurus.

Stut'tering, ([D.] *stotteren,* 'to stutter,' formed by onomatopœia,) Balbuties.

Sty'an, ([Sax.] ϸtiȝenƀ, from ϸtiȝan, 'to ascend, to rise,') Hordeolum.

Stye, Hordeolum.

Stygmates. M. J. Cloquet has proposed this word, or *Stigmates,* (from στιγμα, pl. στιγματα, 'a mark,') to designate the marks, in form of cicatrices, which remain on the peritoneum after the obliteration of the neck of a hernial sac. They are, commonly, radiated folds, of a whitish appearance, more or less thick, and of a fibrous or fibrocartilaginous nature.

Stylet', (from *stylus,*) see Specillum.

Sty'li, (pl. of *stylus,*) Styloid processes.

Styliens (Muscles), see Bouquet anatomique de Riolan.

Sty'liform, (*stylus,* and *forma,* 'shape,') Styloid.

Stylis'cus, (from *stylus,*) Tent.

Sty'lo, (from στυλος, 'a style,') in composition, the styloid process of the temporal bone.

Stylocer'atohyoïde'us, Stylohyoideus — s. Ceratoides, Stylohyoideus.

Stylochon'drohyoïde'us. A name given by Douglas and Albinus to a fleshy fasciculus which the stylohyoid muscle sometimes presents, and which is attached to the lesser cornu of the os hyoides. It is the same fasciculus which Santorini calls *Stylohyoï'des no'vus, Stylohyoïdeus al'ter.*

Styloglos'sus. A muscle situate at the anterior and superior part of the neck. It is narrow behind, much broader before; is attached to the styloid process of the temporal bone, and to the stylomaxillary ligament; and is inserted into the side of the tongue. It raises the base of the tongue and carries it backwards.

Stylohyoïde'us, *Stylocer'atohyoïde'us, Styloceratoï'des, Stylohyoï'des ma'jor,* (F.) *Stylohyoïdien.* A muscle situate at the superior, anterior, and lateral part of the neck. It is thin and narrow,— especially posteriorly; anteriorly, it opens to give passage to the tendon of the digastricus. It is attached to the styloid process of the temporal bone, and to the body of the os hyoides. It raises the os hyoides, and carries it backwards.

Stylohy'oid Lig'ament is a fibrous flattened cord, which passes from the styloid process to the lesser cornu of the os hyoides.

Stylohy'oid Nerve is the second branch given off by the facial.

Sty'loid, *Sty'liform,* (στυλοειδης,) *Styloï'des, Graphioï'des, Graphoï'des, Graphio'des, Graphidoï'des, Belono'des,* (from στυλος, 'a style,' 'a peg,' 'a pin,' and ειδος, 'shape.') Shaped like a peg or pin.

Sty'loid Cor'nua, see Hyoides os.

Sty'loid Proc''esses, *Pencil-like Proc''esses, Proces'sus Beloïdes* seu *Belemnoïdes* seu *Belonoïdes* seu *Graphicïdes* seu *Graphoï'des, Sty'li,* are, 1. A long and slender process of the temporal bone, to which are attached the styloglossus, stylopharyngeus, and stylohyoideus muscles, and the stylohyoid and stylomaxillary ligaments. This sometimes remains distinct in many animals, and is then called the *sty'loid bone,* (F.) *os styloïden.* 2. Two slender and pyramidal processes at the inferior extremities of the radius and ulna.

Stylomas'toid, *Stylomastoïde'us.* That which relates to the styloid and mastoid processes.

Stylomas'toid Ar'tery, *Arte'ria Stylomastoïde'a,* arises from the posterior auricular, and, in some subjects, from the occipital. It enters the stylomastoid foramen; passes along the aqueduct of Fallopius, and spreads its ramifications on the mucous membrane of the tympanum, and in the mastoid cells and semicircular canals; and terminates by anastomosing with a branch of the *Arteria meningæa media,* which enters by the *Hiatus Fallopii.* Murray has given the name — *Stylomastoid* — to the posterior auricular artery itself.

Stylomas'toid Fora'men, *Foramen Stylomastoïdeum* seu *Aquæduc'tûs Fallo'pii,* (F.) *Trou anonyme,* is situate at the inferior surface of the petrous portion of the temporal bone, between the styloid and mastoid processes. It terminates the aqueduct of Fallopius, and gives passage to the facial nerve.

Stylomax'illary, *Stylomaxilla'ris.* That which relates to the styloid processes and the jaw.

Stylomax'illary Lig'ament. A ligamentous, flat cord, extending between the styloid process and the angle of the jaw.

Stylopharynge'us, *Leva'tor* seu *Dilata'tor pharyn'gis, L. pharyn'gis exte'rior,* (F.) *Stylothyropharyngien.* A muscle situate at the anterior and lateral part of the neck. It is slender; thin above; attached to the styloid process of the temporal bone, and terminates in the parietes of the pharynx, as well as at the posterior margin of the thyroid cartilage. It raises the pharynx and carries it backwards. Professor Chaussier has united, under the name *Stylo-pharyngien,* the three constrictor muscles of the pharynx, the stylopharyngeus, and palatopharyngeus.

Styloph'orum Diphyl'lum, (στυλος, 'a style,' and φερω, 'I bear,') *Meconop'sis diphyl'la, Chelido'nium diphyl'lum, Cel'andine* or *Hornpop'py, Bruiseroot.* An indigenous plant, of the *family* Papaveraceæ, growing from western Pennsylvania to Wisconsin, which flowers from May to August. The juice is fetid and narcotic. Infused in wine, it has been given internally in gravel; and has been applied externally to contusions, &c.

Stylostix'is, (*stylus,* 'a style,' and στιξις, 'the act of puncturing,') Acupuncture.

Stylo-thyro-pharyngien, Stylopharyngeus.

Sty'lus, (στυλος, 'a stake, a style,') Stilus, Sound.

Sty'lus Excava'tus, *Specil'lum excava'tum.* A hollow sound.

Sty'ma, gen. *Sty'matis,* (στυμα, from στυειν, 'to stiffen,') Erection, Priapismus.

Stymato'sis, (from *styma,* and *osis,*) Stimatosis.

Stym'mata, pl. of *stym'ma,* (στυμμα, gen. στυμματος, 'that which constricts or thickens.') The most solid ointments. Also, the ingredients proper for increasing their consistence.

Styp'sis, (στυψις,) Astriction, Constipation.

Stypte'ria, (στυπτηρια,) Alumen, Styptics.

Styp'tic, (στυπτικος,) see Styptics.

Styp'tic, Binel'li's, Aqua Binelli — s. Brocchieri's, Aqua Brocchierii — s. Colloid, see Colloid.

Styp'tic, Eaton's. A name first given to *Helvetius's Styptic,* when introduced into Great Britain. It is now usually made of *calcined green vitriol,* ℥j., *proof spirit,* tinged with a little oak bark, Oij.

Styp'tic, Helve'tius's, see Ferrum tartarizatum, and Styptic, Eaton's — s. Pagliari's, Hæmostatic, Pagliari's.

Styp'tic, Ruspi'ni's, *Li'quor Styp'ticus Ruspi'ni.* A nostrum, said to consist of *Gallic acid,* a small quantity of *Sulphate of zinc* and *Opium,* dissolved in a mixture of *Alcohol* and *Rose-water,* which has had much reputation as an internal and external astringent.

Styp'tics, *Contrahen'tia, Constricti'va Medicamen'ta, Constringen'tia, Anastal'tica, Catastal'tica, Stypte'ria,* (F.) *Styptiques,* (στυπτικα, from στυφω, 'I constringe.') Sometimes used synonymously with astringent, but generally applied to a substance employed to arrest hemorrhage,—*Euæ'mon.* A *mechanical styptic* is one that arrests the flow of blood, by being applied immediately to the mouth of the bleeding vessel, or by inducing a coagulum, *mechanically,* in it. A *chemical styptic* is one which coagulates, *chemically,* the blood around a bleeding orifice.

Styrac''inum O'leum. Oil obtained by boiling storax in good olive oil.

Sty'rax, gen. *Sty'racis,* (στυραξ, gen. στυρακος.) A resin obtained from *Styrax officina'lis,* and *S. calami'ta.* It is the *solid storax; — offic''inal storax.* There are two kinds of storax met with: 1. *Red Sto'rax, Gum Storax, Thus Judæo'rum, Styrax ru'bra, Sty'racis bal'samum, Bal'samum sty'racis officina'lis,* which is obtained by incision from the *Styrax officina'lis,* and perhaps from the *Liquidam'bar Orienta'le.* The purest is in tears; but it has lost some of its smell in drying. 2. *Common Storax, Styrax calami'ta.* That which has been received in reeds or vessels, and has had sawdust added immediately to thicken it. The odor of storax is fragrant; the taste aromatic. It is considered, like the other balsams, to be stimulant and expectorant, but is rarely used long.

Pu'rified Storax, S. cola'ta seu *purifica'ta, S. præpara'ta* seu *præpara'tus,* (Ph. U. S., 1873,) *Extrac'tum sty'racis,* is storax purified by means of rectified spirit and straining. Dose, gr. x. to xxx.

Sty'rax Al'ba, see Myroxylon Peruiferum — s. Benzoin, see Benjamin — s. Calamita, see Styrax — s. Liquida, Liquidambar styraciflua — s. Officinalis, see Styrax.

Sty'sis, (στυσις,) Erection, Priapismus.

Suave'olens, (*suavis,* 'sweet,' and *oleus,* 'smelling,') Beneolens.

Sua'via, pl. of *sua'vium,* (from *suavis,* 'sweet,') see Kiss.

Sub (L.), in composition, 'beneath,' or 'a lower degree.' Before *c* it becomes *suc;* before *f, suf;* before *g, sug;* before *p, sup;* before *r, sur;* and before *s, sus.* In some words, however, it is *su,* as in *suspiro.* The French *sous,* as a prefix, has the same signification.

Subac''idus, Acidulous.

Subac'tio, *Chiro'sis, Cheiro'sis,* (*subigo, subactum,* — *sub,* and *ago,* — 'I subject, I prepare.') The operation of making plasters, extracts, &c., with the hand, or with the pestle and mortar.

Subaffec'tio, Hydropathia.

Subagita'trix, gen. *Subagitatri'cis,* (*sub,* and *agitare,* 'to agitate,') Tribade.

Subarach'noid, (*sub,* and *arachnoid,*) *Subarachnoid'ean,* 'under the arachnoid membrane.' A term applied to various spaces situate between this membrane and different nervous structures,

— *anterior, posterior, superior,* and *spinal subarachnoidean spaces.* The fluid filling these spaces is called the *subarachnoidean* or *cerebro-spinal fluid.*

Subatloïde'us, *Infraätloïdeus,* (F.) *Sousatloïdien.* That which is situate beneath the atlas or first cervical vertebra. Chaussier has given this name to the second pair of cervical nerves.

Subaxoïde'us, *Infraäxoïdeus,* (F.) *Sousaxoïdien.* That which is below the *axis* or *vertebra dentata.* Chaussier has given this name to the third pair of cervical nerves.

Subazo'tas (gen. *Subazota'tis*) **Bismu'thicus,** Bismuth, subnitrate of.

Subbo'ras (gen. *Subbora'tis*) **Na'tricum,** Borax.

Subcartilagin'eum, (*sub,* and *cartilago,* 'cartilage,') Hypochondre.

Subchlo'ris (gen. *Subchlo'ridis*) **Cal'cicus,** Calcis chloridum.

Subcla'vian, *Subcla'vius, Subclavicula'ris,* (F.) *Sousclavier,* (*sub,* and *clavis,* 'clavicle.') That which is under the clavicle.

Subcla'vian Ar'teries, (F.) *Artères sousclavières,* are situate at the upper part of the chest, and the lateral and lower parts of the neck. The right arises at the corresponding side of the trachea, and comes off from the arteria innominata or brachiocephalic trunk. The left leaves the aorta at the end of the arch. Both extend as far as the superior surface of the first rib, in the space between the scaleni muscles, beyond which they take the name *axillary arteries.* The subclavian arteries run, for some distance, without sending off any branch. In the neighborhood of the first rib, however, they give off — 1. *Upwards,* the *vertebral* and *inferior thyroidcal.* 2. *Downwards,* the *internal mammary* and *superior intercostal.* 3. *Outwards,* the *transverse cervical* or *posterior scapular,* the *superior scapular,* and the *posterior cervical* or *profunda.*

Subcla'vian or Subcla'vius Mus'cle, *Subclavia'nus,* (F.) *Costo-claviculaire* (Ch.), *Sous-clavier,* is situate at the superior and anterior part of the chest. It is attached, by its inner extremity, to the superior surface of the cartilage of the first rib, and by its superior margin and outer extremity to the inferior surface of the clavicle. This muscle depresses the clavicle, and carries it forward. When the shoulder is fixed, it can raise the first rib.

Subcla'vian Veins, (F.) *Veines sous-clavières,* are continuations of the axillary, and extend from the inferior extremity of the scalenus anticus, in front of which they pass, to the vena cava superior, which they form by their union. The right subclavian vein is very short, the left longer and broader. These veins receive the mouths of the internal and external jugulars, vertebral and superior intercostal. The left subclavian receives two veins more than the right — the left internal mammary and left inferior thyroid. The thoracic duct opens into the left subclavian, the corresponding great lymphatic vessel into the right.

Subclavic'ula, (*sub,* and *clavicula,* 'clavicle.') The first rib.

Subclavicula'ris, Subclavian.

Subcla'vius, Subclavian muscle.

Subcor'acoid, 'under the coracoid process,' as the *subcoracoid* dislocation of the humerus.

Subcrep'itant, (*sub,* and *crepitant,*) see Râle muqueux.

Subcruen'tus, 'somewhat bloody,' (*sub,* and *cruentus,* 'bloody,') *Hyphæmos.* That which has the color and nature of blood. An epithet given to certain excreted substances, which are mixed with blood, or have the appearance of blood.

Subcruræ'i, see Cruralis.

Subcuta'neous, *Subcuta'neus,* (*sub,* and *cutis,* 'the skin,') *Intercuta'neus,* (F.) *Sous-cutané.* That which is placed immediately under the skin. See Hypodermic.

Subcuta'neous Sec'tion, Hypodermatomy.

Subcuta'neus Col'li, Superficialis colli — s. Malæ (nervus), Orbitar nerve.

Subdelir'ium, Typhomania.

Sub'dita, *Subditit''ia,* (*subdere,* — *sub,* and *dare,* 'to give,' — 'to put under,') *Pros'theta.* Medicines introduced into some one of the natural apertures — as suppositories, pessaries, &c.

Subditit''ia, Subdita.

Subduc'tio, (*sub,* and *ducere, ductum,* 'to lead,') Dejection.

Su'ber, gen. *Su'beris, Cork* — the bark of *Quercus suber* or *Corktree,* (F.) *Liége. Family,* Amentaceæ. *Sex. Syst.* Monœcia Polyandria. Cork, when burnt, is applied as a mechanical styptic to bleeding piles, &c. Surgeons use it for making tents, and it has been recommended to be worn as an amulet to suppress the secretion of milk!

Su'beth, Coma.

Subfronta'lis Sutu'ra, (*sub,* and *frons,* gen. *frontis,* 'the forehead.') A suture resulting from the articulation of the os frontis with the nasal process of the superior maxillary bone and the proper bones of the nose.

Subglossi'tis, (*sub,* and γλωσσα, 'the tongue.') An inflammatory condition of the lower surface of the tongue and the structures in immediate contact with it.

Subgrondation, Depression.

Subhumera'tio, (*sub,* and *humerus,* 'the shoulder,') Catomismus.

Subicu'lum Cor'nu Ammo'nis. The sigmoid convolution of the cornu.

Subigita'trix, gen. *Subigitatri'cis,* (*sub,* and *agitare,* 'to agitate,') Tribas.

Subinflamma'tio, Subinflammation — s. Hepatis, Hepatitis, chronic.

Subinflamma'tion, *Subinflamma'tio,* (*sub,* and *inflammatio,*) *Inflammatiun'cula, Hypophlegma'sia.* A mild degree of inflammation, so slight as hardly to deserve the name *inflammation.* Broussais understood by the term, an augmentation in the vital phenomena of the vessels that convey white blood. There are, however, no such vessels. Lymphatic engorgements, scrofula, herpes, and cancer he considered subinflammations.

Subintran'tes Fe'bres, (*sub,* and *intrare,* 'to enter,') *Communican'tes fe'bres.* Fevers primarily intermittent, whose paroxysms approximate, so that one paroxysm begins before that which preceded it has gone through its stages.

Subinvolu'tion. A condition of retarded or imperfect restoration of the uterus to its original dimensions after delivery.

Sub'ject, (*subjicere, subjectum,* — *sub,* and *jacere,* — 'to place under,') Cadaver.

Subjec'tive Sensa'tions, see Sensation.

Subjee, Bangue.

Subligac'ulum, (*sub,* and *ligare, ligatum,* 'to bind,') Truss.

Subligatu'ra, Truss.

Sub'limate, Corro'sive, Hydrargyri oxymurias.

Sublima'tio, Enæorema, Sublimation.

Sublima'tion, *Sublima'tio, Meteoris'mus, Hypso'sis,* (*sublimare, sublimatum,* 'to raise on high.') An operation by which dry and solid matters are volatilized and condensed at the upper part of a subliming apparatus. Calomel, sal ammoniac, &c., are commonly obtained by sublimation. The product of sublimation is a *Sub'limate, Sublima'tum,* (F.) *Sublimé.*

Sublima'tum Corrosi'vum, Hydrargyri oxymurias.

Sublima'tus Corrosi'vus, Hydrargyri oxymurias.

Sublime, Enæorema.

Sublime, Sublimis.

Sublime, see Sublimation — *s. Corrosif,* Hydrargyri oxymurias.

Subli'mis, (F.) *Sublime,* 'high, elevated, superficial.' Anatomists have given the name *sublimis* to certain muscles which are situate more superficially than their kindred muscles. These last they have called *profundi.* Of the former, the *flexor sublimis digitorum* is an example.

The French use the term *respiration sublime* for the respiration which is accompanied by considerable elevation of the ribs, and with separation of the alæ nasi at the time of inspiration.

Sublin'gua, (*sub,* 'a lower degree,' and *lingua,* 'tongue,') Uvula.

Sublin'gual, *Sublingua'lis,* (F.) *Sous-lingual,* (*sub,* and *lingua,* 'the tongue.') That which is seated under the tongue.

Sublin'gual Ar'tery, with some, is the *Lin'gual.* With others, it is a branch given off by the lingual opposite the genioglossus muscle, which is distributed particularly to the sublingual gland, to the mylohyoid, and genioglossus muscles, &c.

Sublin'gual Gland, *Glan'dula sublingua'lis* seu *lingua'lis Bartholinia'na* seu *Rivinia'na,* is seated in the substance of the inferior paries of the mouth, beneath the anterior part of the tongue. It is smaller than the submaxillary, of which it frequently seems to be only a prolongation. It is oblong, flattened, amygdaloid, and is covered by the mucous membrane of the mouth, beneath which it projects. This gland has 10 or 12 excretory ducts — *Ductus Rivinia'ni* seu *Waltheria'ni* — some of which open beneath the frænum linguæ, joining Wharton's duct, while others pierce the mucous membrane of the mouth separately. It has the same structure as the parotid.

Sublin'guium, Uvula.

Sublin'guum, Epiglottis.

Sublob'ular, (*sub,* and *lobulus,* 'a little lobe.') That which is placed under a lobe.

Sublob'ular Veins of the Liv'er. The veins in which the intralobular veins terminate. By their union, the sublobular veins form the hepatic veins.

Subluxa'tio, (*sub,* and *luxare,* 'to dislocate,') *Subluxa'tion.* An imperfect luxation of a bone; see Luxation. Not unfrequently, used for a sprain.

Submam'mary, *Submamma'rius,* (F.) *Sous-mammaire,* (*sub,* and *mamma,* 'the breast.') Under the mamma or breast; — hence, *submammary* inflammation, inflammation of the areolar tissue beneath the mamma.

Submax'illary, *Submaxilla'ris, Inframaxilla'ris,* (F.) *Sous-maxillaire,* (*sub,* and *maxilla,* 'the jaw.') That which is seated beneath the jaw.

Submax'illary Gan'glion is a small nervous ganglion, situate opposite the gland. It seems to be formed by the superior branch of the Vidian nerve, and communicates with the lingual nerve of the inferior maxillary. Its filaments form a plexus which penetrates the submaxillary gland.

Submax'illary Gland, *Max'illary Gland, Glan'dula submaxilla'ris* seu *maxilla'ris* seu *angula'ris, Hypognath'aden, Hyposial'aden,* is a salivary gland, less than the parotid, seated at the inner side of the ramus and body of the inferior maxillary bone, in the triangular space between the two bellies of the digastricus. Irregularly ovoid, and flattened on three surfaces, it has the same aspect and organization as the other salivary glands. Its excretory duct is called *Wharton's Duct, Duc'tus Whartonia'nus* seu *submaxilla'ris,* and terminates at the side of the frænum linguæ, by a very small orifice. It is called *Duc'tus infe'rior.*

Submen'tal, *Submenta'lis,* (F.) *Sousmental,* (*sub,* and *mentum,* 'the chin.') Situate under the chin.

Submen'tal Ar'tery is furnished by the facial, near the base of the jaw. It passes forwards along the attachment of the mylohyoideus, to which it furnishes branches that cross it to anastomose with those of the sublingual. Near the median line it bifurcates, to be distributed to the chin and muscles of the infrahyoid region.

Submen'tal Vein, which accompanies the artery, opens into the labial.

Submer'sion, *Submer'sio,* (*sub,* and *mergere, mersum,* 'to plunge.') The act of plunging, or being entirely plunged, in a liquid.

Asphyxia by submersion, A. Immerso'rum, Drowning, is not owing to a certain quantity of liquid being introduced into the alimentary or air-passages, but simply to the interception of air, and of the respiratory phenomena. It is a case of suffocation, the signs of which, on dissection, are equivocal, without circumstantial evidence.

Submis'sio, (*sub,* and *mittere, missum,* 'to send,') Remission — s. Cordis, Systole.

Submu'cous, *Submuco'sus,* (*sub,* and *mucus.*) Under a mucous membrane,— as the '*submucous* areolar tissue.'

Submu'rias (gen. *Submuria'tis*) **Ammoni'acohydrargyr'icus,** Hydrargyrum præcipitatum.

Submus'cular, *Submuscula'ris,* (*sub,* and *musculus,* 'a muscle.') Seated beneath muscles or a muscular layer.

Suboccip'ital, *Suboccipita'lis,* (F.) *Sous-occipital,* (*sub,* and *occiput.*) That which is situate under the occiput.

Suboccip'ital Nerve, Occipital nerve.

Subor'bitar, *Suborbita'rius, Infraör'bitar, Infraörbita'lis, Infraörbita'rius,* (F.) *Sous-orbitaire,* (*sub,* and *orbita,* 'the orbit.') That which is seated beneath the orbitar cavity.

Subor'bitar Ar'tery, *Arte'ria Suborbita'ria, Infraör'bitar Ar'tery,* proceeds from the internal maxillary, from which it separates near the anterior and superior part of the zygomatic fossa. It enters the infraorbitar canal, and passes through it, giving branches to the anterior and superior dental canal; issues by the foramen infraorbitarium; and divides, in the fossa canina, into a number of branches, which lose themselves in the neighboring parts. The infraörbitar vein follows the same course.

Subor'bitar Canal', *Infraör'bitar Canal',* (F.) *Canal* ou *Conduit sous-orbitaire,* is a small canal, which runs obliquely through the substance of the inferior paries of the orbit. It begins, behind, by a simple gutter, and divides, anteriorly, into two branches, one of which descends into the anterior paries of the maxillary sinus, while the other passes out, in the canine fossa, by an orifice, called *Fora'men infraörbita'rium,* (F.) *Trou sous-orbitaire.* The infraörbitar artery and nerve pass along it.

Subor'bitar Fis'sure, *Infraör'bitar Fis'sure, Fissu'ra infraörbita'lis, Ri'ma cana'lis orbita'rii.* A fissure in the superior maxillary bone: the superior commencement of the suborbitar canal.

Subor'bitar Fos'sa, Canine fossa.

Subor'bitar Nerves, *Infraör'bitar Nerves,* seem to terminate the superior maxillary. They issue from the infraörbitar canal by the foramen of the same name, and spread out in a radiated manner in the fossa canina, to divide into *superior* or *palpebral filaments, inferior* or *labial, internal* or *nasal,* and *external* or *buccal.*

Subperitone'al, *Subperitonea'lis,* (*sub,* and *peritoneum.*) That which lies under the peritoneum.

Subperitone'al Aponeuro'sis, Fascia, subperitoneal — s. Ganglia, see Spermatic ganglion — s. Inflammation, see Parametritis.

Subplacen'ta, Decidua membrana.

Subpleur'al, *Subpleura'lis,* (*sub,* and *pleura.*) Situate under the pleura.

Subpoplitæ'us, Poplitæus muscle.

Subpu'bic Arch, *Ar'cus subpu'bicus,* (*sub,* and *pubis.*) A strong arch of the superior pelvic aponeurosis, which completes the posterior orifice of the obturator or subpubic canal.

Subpu'bic Mem'brane, Obturator membrane.

Subpubiofemora'lis, Adductor brevis — s. Prostaticus, Compressor prostatæ.

Subpu'tris, (*sub,* and *putris,* 'putrid,') Hyposaprus.

Subscap'ular, *Subscapula'ris,* (F.) *Sous-scapulaire,* (*sub,* and *scapula.*) That which is beneath the scapula.

Subscap'ular Fos'sa, *Fos'sa subscapula'ris.* A considerable excavation at the anterior surface or venter of the scapula, in which the subscapularis is seated.

Subscap'ular Mus'cle, *Subscapula'ris Mus'cle, Immer'sus, Infrascapula'ris,* (F.) *Sous-scapulo-trochinien,* (Ch.) *Porte-feuille, Muscle-sous-scapulaire.* A muscle situate in the above-mentioned fossa. It is flat, broad, and triangular; is attached, by its base, to the subscapular fossa and to the anterior lip of the edge of the spine of the scapula, and is inserted into the lesser tuberosity of the humerus. It carries the arm in rotation inwards. It can also depress it, and bring it towards the body.

Subscap'ular Nerves are two in number. One arises from the brachial plexus above the clavicle; the other from the posterior aspect of the plexus within the axilla. They are distributed to the subscapularis muscle.

Subse'rous, *Subsero'sus,* (*sub,* and *serous.*) Under a serous membranc, — as the *subserous* areolar tissuc.

Subsiden'tia, (*sub,* and *sedere,* 'to settle,') Sediment.

Sub'stance, Æsthesod'ic, see Æsthesodic — *s. Émaillée des Dents,* Enamel of the teeth — s. Horny, see Tooth — s. Hyaline, Cytoblastema — s. Intercellular, Cytoblastema — *s. Vitrée des Dents,* Enamel of the teeth.

Sub'stance, White, of Schwann. A hollow cylinder within the tubular nervous fibre, which differs in composition and refracting power from the matter that occupies the centre of the tube.

Substan'tia Adaman'tina Den'tium, 'adamantine substance of the teeth,' Enamel—s. Cinerilia, see Kidney — s. Cinerea gelatinosa, Substantia gelatinosa — s. Compacta, see Bone — s. Eburnea, see Tooth.

Substan'tia Ferrugin'ea, *Lo'cus cine'reus.* An ash-colored substance produced by the existence of well-marked pigmentary matter in the floor of the fourth ventricle or *rhomboid fossa.*

Substan'tia Filamento'sa Den'tium, Enamel.

Substan'tia Fus'ca, 'brown substance.' A name given to certain spots in the brain — also called *Substantia nigra,* &c. — which have a dark color from the presence of ganglion cells.

Substan'tia Gelatino'sa seu Cine'rea Gelatino'sa. The translucent posterior portion of the posterior horns of the gray matter of the spinal cord; the remaining portion being called *Substan'tia cine'rea vasculo'sa spongio'sa.*

Substan'tia Glomerulo'sa, see Kidney — s. Grisea centralis, see Medulla spinalis — s. Hyalina, Cytoblastema — s. Interna, see Kidney — s. Nigra pedunculi, see Pedunclcs of the brain — s. Ossea dentium, see Tooth—s. Ostoidea, see Tooth — s. Perforata anterior, Locus perforatus anticus.

Substan'tia Perfora'ta Me'dia. When the pia mater has been removed from the space between the crura cerebri, termed the *intercru'ral* or *interpedunc'ular,* the surface appears cribriform, from the perforations of the numerous minute vessels which penetrate it. This is the *substan'tia perfora'ta me'dia* of Vicq d'Azyr.

Substan'tia Perfora'ta Poste'rior, see Tarini pons — s. Pulposa dentis, Dental pulp — s. Radiata, Stellulæ Verheyenii — s. Rhomboidea, Corpus dentatum — s. Rubicunda, see Kidney — s. Spongiosa, sec Bone — s. Spongiosa urethræ, Corpus spongiosum urethræ — s. Stellata serpentina, Stellula Verheyenii — s. Vasculosa, see Kidney—s. Vitrea, Cytoblastema—s. Vitrea dentium, Enamel.

Sub'stantive, *Substanti'vus,* (*substare—sub,* and *stare,*—'to stand under or subsist.') An epithet applied by Dr. Paris to aliments which are nutritious, in contradistinction to *adjective* aliments, which are themselves not possessed of nutritive virtues, but impart to the digestive organs greater energy, so as to enable them to extract more nutriment from the substantive aliments. Meat, for example, is a *substantive* aliment; the condiment, as mustard, eaten with it, an *adjective* aliment.

Substil'lum, (*sub,* and *stilla,* 'a drop.') Stillicidium.

Sub'stituted Presenta'tion, see Presentation.

Sub'stitutive, *Substituti'vus,* (F.) *Substitutif,* (*sub,* and *statuere,* 'to place.') That may be substituted or put in place of another. An agent is said to be 'substitutive,' which — as in the case of nitrate of silver applied to inflammation of a mucous membrane — substitutes a temporary irritation for one tending to be more permanent. Such a mode of treatment is termed *sub'stitutive medica'tion,* (F.) *Médication substitutive.*

Subsul'tio, (*subsilio, subsultum, — sub,* and *salio,*—'I make short leaps,') Palpitation.

Subsul'tus (gen. *Subsultûs*) **Ten'dinum,** *Sal'tus ten'dinum, Clo'nus subsul'tus, Subsul'tus, Carpholog''ia spasmod'ica, Myopal'mus, Twitch'ing of the Ten'dons,* (F.) *Soubresaut des tendons.* Twitching, communicated to the tendons by the involuntary and instantaneous contraction of the muscular fibres. It is more observable at the wrist than elsewhere, and is an evidence of great cerebral irritability and debility when it occurs at an advanced period of fever.

The muscular agitations or twitchings observed in febrile diseases, especially of children, have been termed *Convulsibil'itas, Sclerotyr'bē febri'lis,* and *Irritabil'itas morbo'sa.*

Subsur'ditas, (*sub,* and *surdus,* 'deaf,') Deafness.

Subtroph'ic, *Subtroph'icus,* (*sub,* and τροφη, 'nourishment.') Relating or appertaining to defective nourishment or nutrition.

Subu'beres, (pl. of *subu'ber,*) (*sub,* and *ubera,* 'the breasts,') *Infan'tes sugen'tes, Suck'ing chil'dren.* Infants at the breast, in contradistinction to *Exuberes,* απογαλακτοι, or those which have been weaned.

Subun'guial, *Subun'gual, Subun'guical,* (F.) *Sous-ungéale,* (*sub,* and *unguis,* 'a nail.') Belonging to parts under the nail — as *subunguial exostosis,* (F.) *Exostose sous-ungéale,* an exostosis under the nail of the great toe especially.

Subver'sio Stom'achi, (*sub,* and *vertere, versum,* 'to turn,') Vomiturition.

Subver'tebra, (*sub,* and *vertebra,*) Sacrum.

Subver'tebrum, Sacrum.

Sub'vola, (*sub,* and *vola,* 'the palm of the hand,') Hypothenar.

Suc, Succus—*s. de Citron,* see Citrus medica—*s. Gastrique,* Gastric juice — *s. Intestinal,* Succus entericus — *s. de Kino,* Kino — *s. du Limon,* see Citrus medica — *s. Médullaire,* Marrow — *s. Musculaire,* Muscle juice — *s. Nourricier,* Liquor sanguinis — *s. Pancréatique,* see Pancreas.

Suc, as a prefix, Sub.

Succa'go, gen. *Succag''inis,* (from *succus,*

'juice.') The inspissated juice of plants, robs, jellies, &c.

Succédané, Succedaneum.

Succeda'neum, *Succeda'neum, Substitu'tum, Antiballom'enum, Surroga'tum, Antemballom'enum, Quid pro quo,* (*succedere,* —*suc,* and *cedere,* —'to go under, to come in place of another,') (F.) *Succedané.* An epithet for medicines that may be substituted for others possessing similar properties. Also used, in dentistry, for an amalgam for filling teeth.

Succenturia'tus, (*succenturiare,*—*suc,* and *centuria,* —'to supply a soldier to fill a vacancy;' and hence, 'to substitute or put in the room of.') That which is a substitute for another—as Renes *succenturiati,* Ventriculus *succenturiatus,* &c.

Suc'char, Saccharum.

Succida'neum, Succedaneum.

Succin, Succinum.

Suc'cinate of Ammo'nia, (F.) *Succinate d'Ammoniaque, Sel volatil de Succin,* is officinal in the French Codex (1866).

Suc'cinate of Iron, Iron, succinate of.

Succinctu'ra, (*suc,* and *cingere, cinctum,* 'to gird,') Diaphragm.

Succinc'tus, Diaphragm.

Suc'cini Resi'na, Musk, artificial.

Succin'ic or **Suc'cinic Ac''id,** *Ac''idum Suc'cini, A. Succin'icum, A'cor Succin'eus, Sal Suc'cini, Sal volat'ilē Suc'cini,* (F.) *Acide Succinique,* has been considered antispasmodic and diaphoretic, in the dose of from five to twenty grains.

Suc'cinum, *Su'cinum, Elec'trum, Am'bra, Am'brum, Am'par, Bereni'cē, Am'ber, Yel'low Am'ber,* (F.) *Succin, Ambre jaune,* (from *succus,* 'juice,' because at one time supposed to exude from a tree.) This kind of fossil resin, which is found on the shores of the Baltic, is composed of a resinous matter, of essential oil, and an acid *sui generis.* It is inodorous, except when heated or rubbed; insipid; in fragments of a pale, golden-yellow color; transparent, and has a shining lustre. S. g. 1·08; insoluble in water, and slightly acted on by alcohol. It is used for affording its essential oil, obtained by destructive distillation—the *O'leum Succini,* (Ph. U. S.,) *Bal'samum Suc'cini,* (F.) *Huile de Succin.* This oil possesses stimulant, antispasmodic, diuretic, and rubefacient properties.

The *O'leum Suc'cini rectifica'tum, Rectified Oil of Amber,* is made as follows:—*Oil of Amber,* Oj., *water,* Ovj. Mix in a glass retort, and distil until Oiv. of the water have passed with the oil into the receiver; separate the oil from the water, and keep it in a well-stopped bottle. (Ph. U. S., 1873.) The French Codex (1866) also contains a volatile oil and spirit of amber, *Esprit Volatil de Succin,* and *Huile Volatile de Succin*

The *White am'ber, Leucolec'trum,* (F.) *Ambre blanc,* is a variety.

Suc'cinum Cine'reum, Ambergris—s. Griseum, Ambergris.

Succion, Sucking.

Succi'sa, (from *succidere, succisum,* 'to cut,' from its indented appearance,) Scabiosa succisa —s. Pratensis, S. succisa.

Succocolla'ta, Chocolate.

Succolla'ta, Chocolate.

Suc'cory, Wild, Cichorium intybus, Chironia angularis.

Suc'cuba, see Succubus.

Suc'cubus, gen. *Suc'cubûs,* (*suc,* and *cubare.* 'to lie.') Some authors have used this word synonymously with nightmare. Others mean by it, and by *Suc'cuba,* a female phantom, with which a man in his sleep may believe he has intercourse —as *In'cubus* has been applied to the male phantom, with which a female may dream she is similarly situate. See Incubus.

Suc'cus, *Su'cus, Chy'lus, O'pos, Opis'ma, Chylis'ma, Ecchylo'ma, Apothlim'ma, Juice,* (F.) *Suc, Jus,* (from *sugere, suctum,* 'to suck.') The fluid obtained by pressing plants, flesh, &c., *Suc'cus expres'sus; Opolé* (officinal), *Opolide* (magistral), according to Chêreau. The French Codex (1866) has formulæ for the preparation of several *sucs. Succus* is also applied to certain animal fluids, as *S. Gastricus,* &c.

Suc'cus Aca'ciæ German'icæ Inspissa'tus, see Prunus spinosa — s. Acaciæ nostratis, see Prunus spinosa — s. Arborum, Sap — s. Aurantii, see Citrus aurantium — s. Cicutæ spissatus, Extractum conii.

Suc'cus Coni'i, *Juice of Conium, J. of Hemlock.* The last edition of the U. S. Pharmacopœia (1873) directs that a convenient quantity of fresh conium leaves be thoroughly bruised, the juice pressed out, and one measure of alcohol added to every five measures of the juice.

Succus Tarax'aci, Juice of Dan'delion, is prepared by a similar process.

Suc'cus Cyrena'icus, Laserpitium.

Suc'cus Enter'icus, *S. Intestina'lis, Li'quor intestina'lis* seu *enter'icus, Intes'tinal* or *Enter'ic Juice* or *Fluid,* (F.) *Suc intestinal.* The fluid copiously secreted from the lining membrane of the small intestines.

Suc'cus Expres'sus, Apothlimma — s. Gastricus, Gastric juice — s. Glycyrrhizæ, Extractum glycyrrhizæ — s. Hypocistidis, see Cytinus — s. Intestinalis, Succus entericus—s. Japonicus, Catechu — s. Limonis, see Citrus medica — s. Liquiritiæ, Extractum glycyrrhizæ — s. Muscularis, Muscle juice — s. Nerveus, Nervous fluid—s. Nutritius, Chyle — s. Orni concretus, see Fraxinus ornus — s. Pancreaticus, see Pancreas.

Suc'cus Scopa'rii, *Juice of Broom,* (Ph. B., 1867,) is prepared by bruising 7 ℔s. of fresh *broom tops* in a stone mortar, pressing out the juice, adding to every three measures of juice one of spirit; setting aside for seven days, and filtering. Dose, f℥j.–ij.

Suc'cus Spiss'atus Aconi'ti Napel'li, Extractum aconiti — s. Spissatus atropæ belladonnæ, Extractum belladonnæ—s. Spissatus conii maculati, Extractum cicutæ — s. Spissatus hyoscyami nigri, Extractum hyoscyami—s. Spissatus lactucæ sativæ, Extractum lactucæ — s. Taraxaci, see Succus conii — s. Thebaicus, Opium.

Succus'sion, *Succus'sio, Hippocrat'ic Succus'sion,* (*succutio, succussum,* — *suc,* and *quatio,* —'I shake from beneath.') A mode of ascertaining the existence of a fluid in the thorax (*fluctuation by succussion*), by giving the body one or more slight shakes.

Succus'sion, Ballottement.

Su'chor, Saccharum.

Su'cinum, Succinum.

Suck'ing, *Suc'tio, Suc'tus, Bdal'sis, Myze'sis,* (F.) *Succion,* (from *sugere, suctum,* 'to suck..) The act of drawing liquid into the mouth by forming a vacuum with the tongue acting as a piston, during inspiration.

Suck'ing Bot'tle. A bottle so formed that, when filled with milk, it can be sucked from instead of the breast.

Suck'ing Child, *Lactens.* A suckling.

Suck'le, *Lacta'rē,* (F.) *Allaiter* ou *Alaiter.* To give suck. To nurse.

Suck'ling, Lactation, Lonicera periclymenum, Sucking child.

Sucre, Saccharum — *s. Candi,* Saccharum candidum — *s. du Foie,* see Saccharum — *s. de Lait,* Sugar of milk—*s. de Saturne,* Plumbi superacetas — *s. Tors,* Pēnidium.

Su'crose, (from *sucre,*) see Saccharum.

Suc'tio, (*sugere, suctum,* 'to suck,') Exsuctio, Sucking.

Suc'tion Pow'er. The force presumed to be exerted on the blood in the veins by the active dilatation of the heart. See Derivation.

Sucto'ria, (*sugere, suctum,* 'to suck.') Animals provided with mouths for sucking. Also, organs for sucking or adhesion; hence termed *suctorial* — as *suctorial* oscula.

Sucto'rial, see Suctoria.

Suc'tus, gen. *Suc'tûs,* Sucking.

Su'cus, gen. *Su'cûs,* Succus.

Sudam'ina, pl. of *suda'men, Hydro'ata, Hidro'ta, Pap'ulæ sudora'les, Suffersu'ræ, Alha'sef, Plan'ta noc'tis, Bo'a,* (from *sudor.*) Small vesicles which appear upon the skin, especially in the summer time, in hot countries, and in diseases attended with much sweating, *sweat vesicles.* It is a miliary eruption. See Miliary fever.

Sudam'ina, Desudatio, Echauboulures, Lichen tropicus.

Suda'rium, Achicolum.

Suda'tio, Ephidrosis.

Sudatun'cula, (dim. of *sudatio,*) Ephidrosis.

Sudatoire, Sudatory.

Sudato'ria, Hidrosis — s. Maligna, see Sudor Anglicus.

Sudato'rium, Achicolum.

Su'datory, Achicolum. As an adjective, (F.) *Sudatoire,* anything that excites, or is accompanied by, sweating.

Su'dor, gen. *Sudo'ris, Hi'dros, Mate'ria perspirato'ria,* (F.) *Sueur,* 'sweat.' The product of cutaneous transpiration when visible on the surface of the body. It is colorless; of an odor more or less strong and variable; and of a saline taste. It is composed, according to Berzelius, of water, lactic acid, lactate of soda united with a little animal matter, chloride of sodium, and a little chloride of potassium, an atom of earthy phosphate, and some oxide of iron.

Su'dor, Miliary fever.

Su'dor An'glicus, *S. Anglica'nus, Hidron'osus, Hidrop'yra, Hidropyr'etus, Fe'bris* seu *Milia'ris sudato'ria, Sudor milia'ris, Mor'bus sudatorius, Ephem'era malig'na* seu *sudato'ria* seu *Britan'nica* seu *An'glica pes'tilens, Pes'tis Britan'nica, Sudato'ria malig'na, Sweat'ing Sick'ness, Sweat'ing Fe'ver,* (F.) *Suette, S. miliaire, S. épidémique, Sueur Anglaise.* A very severe epidemic disease, characterized by profuse sweating, which appeared in England in 1486, and recurred at different times until about the middle of the sixteenth century. It was accompanied with coldness, excessive prostration of strength, palpitation, frequency and inequality of the pulse, &c., and terminated favorably or unfavorably in the course of 24 hours. The French have given the name Suette de Picardie, *Suette des Picards, Fièvre suante, Milia'ris sudato'ria, Su'dor Picard'icus,* to an epidemic disease, which has appeared several times in that province, the principal symptoms of which were profuse sweats and a miliary eruption. The disease recurred in 1821, and has been described at length by M. Rayer, who considers it to consist of a simultaneous state of inflammation of various tissues, and proposes to class it with variola, scarlatina, and measles.

A form of it in which the perspiration was of a black color was called *Sudor An'glicus ni'ger, Melanephidro'sis, Black English sweating sickness* or *fever.*

Su'dor Colliquati'vus, S. profusus.

Su'dor Cruen'tus, *S. sanguin'eus, Hæmatidrosis, Hæmathidro'sis, Ephidro'sis cruen'ta, Hæmorrhag''ia per Cu'tem,* (F.) *Hématidrose, Sueur de Sang, Sweating of blood, Bloody sweat, Hæm'orrhage from the skin.* Cutaneous perspiration intermixed with blood; — a very uncommon affection.

Su'dor Dul'cis, *Saccharorrhœ'a cuta'nea, Ephidro'sis sacchara'ta.* A discharge of saccharine matter by perspiration.

Su'dor Lac'teus, Galactidrosis — s. Localis, Meridrosis — s. Miliaris, Miliary fever, Sudor Anglicus — s. Partialis, Meridrosis — s. Picardicus, see Sudor Anglicus.

Su'dor Profu'sus, *S. Colliquati'vus.* A profuse or immoderate sweat.

Su'dor Sanguin'eus, Sudor cruentus — s. Universalis, Panhidrosis — s. Urinosus, Uridrosis.

Sudo'ral Diarrhœ'a, see Diarrhœa.

Sudo'ral Exanthem'ata. Cutaneous eruptions concurrent with profuse perspirations, in young children especially.

Sudor'ifer, Sudoriferous, Sudorific.

Sudorif'erous, *Su'datory, Sudor'ifer, Hydroph'orus,* (*sudor,* and *fero,* 'I carry.') That which carries sweat; as the *sudoriferous* ducts or glands.

Sudorif'ic, *Hidrot'ic, Sudorif'icum, Sudor'ifer, Hidrot'icum, Hidrote'rium, Hydrotopœ'um, Hidropoët'icum,* (F.) *Sudorifique, Hidrotique,* (*sudor,* and *facio,* 'I make.') A medicine which provokes sweating. See Diaphoretic.

Four Sudorif'ic Woods, *Quat'uor ligna sudorif'ica,* were, formerly, *guaiacum, perfumed cherry, sarsaparilla,* and *sassafras.*

Sudorip'arous, (*sudor,* and *pario,* 'I produce,') see Perspiration.

Sudo'ris Nul'litas, 'non-existence of sweat,' Anidrosis — s. Privatio, Anidrosis — s. Suppressio, Ischidrosis.

Su'et, Sevum.

Suette, Sudor Anglicus — *s. Épidémique,* Sudor Anglicus — *s. Miliaire,* Sudor Anglicus — *s. de Picardie,* Sudor Picardicus — *s. des Picards,* Sudor Picardicus.

Sueur, Sudor — *s. Anglaise,* Sudor Anglicus — *s. d'Expression,* Expression, sweat of — *s. de Sang,* Diapedesis, Sudor cruentus — *s. Urineuse,* Uridrosis.

Suf, as a prefix, Sub.

Suf'fering, (F.) *Souffrance,* (*suf,* and *fero,* 'I bear.') Any painful feeling produced by a general or local pathological condition.

Suffersu'ræ, (*suf,* and *fervere,* 'to be hot,') Sudamina.

Suffi'men, gen. *Suffi'minis,* Suffimentum.

Suffimen'tum, *Hypocapnis'ma, Suffi'men, Thymia'ma, Suffi'tus, Suffumiga'tio, Suffumiga'tion,* (F.) *Parfum; (suffio, suffitum,* 'I perfume.') A perfume; suffumige; fumigation.

Suffit''io, Fumigation.

Suffi'tus, gen. *Suffi'tûs,* Fumigation, Suffimentum.

Suffla'tio, (*suf,* and *flare, flatum,* 'to blow,') Puffiness.

Suffoca'tio, Suffocation, Orthopnœa — s. Hypochondriaca, Hypochondriasis — s. Hysterica, Angone — s. Mulierum, Hysteria — s. Stridula, Cynanche trachealis — s. Uterina, Angone.

Suffoca'tion, *Suffoca'tio, Præfoca'tio, Apopnix'is, Asphyx'ia, Melanæ'ma,* (*suffocare, suffocatum,* 'to stop the breath,' from *suf,* and *fauces,* 'the jaws.' [?]) Death, or suspended animation from impeded respiration, whether caused by the *inhalation of noxious gases, drowning, hanging, strangling,* or *smothering.* The principal morbid appearances in such cases are: the lungs of a deep-blue color, with the blood extravasated in the air-cells; right auricle and ventricle more or less filled with dark blood, as well as the neighboring veins; lividity of the countenance, turgescence, and, perhaps, rupture of the vessels of the brain; left side of the heart containing much less blood. See Asphyxia.

Treatment of suspended animation by suffocation in general. The patient must be conveyed into a room not too warm. Bloodletting must be used, if at all, with caution; — friction must be employed

with salt, or warm flannels; stimulating fluids, in a dilute state, be poured into the stomach by means of a tube, and attempts be made to inflate the lungs. Laryngotomy, if necessary.

For the treatment suggested by Dr. Marshall Hall, and by Dr. Silvester, see Ready method, and Silvester's method.

Suffoca'tion, *Pnigopho'bia*, (F.) *Étouffement*, is used, as *strangling* is, for threatened suffocation. It means the state of dyspnœa and oppression experienced when a sufficient quantity of air does not enter the lungs, or when the chemical phenomena of respiration are imperfectly executed; as in cases of asthma.

Suffocation de Matrice, Hysteria — *s. Utérine,* Angone, Hysteria.

Suffra'go, gen. *Suffra'ginis,* Poples.

Suffumiga'tion, (*suf,* and *fumigare,* 'to produce smoke,') Suffimentum.

Suf'fumige, Suffimentum.

Suffumig''ium, Fumigation.

Suffumina'tio, Fumigation.

Suffu'sio, (*suf,* and *fundere, fusum,* 'to pour,') Pseudoblepsia — s. Auriginosa, Icterus — s. Bilis, Icterus—s. Colorans, Chromopsia—s. Congenita, see Cataract—s. Dimidians, Hemiopia — s. Dura, see Cataract — s. Exclarans, Oxyopia — s. Fellis, Icterus — s. Lentis crystallinæ, Cataract — s. Metamorphopsis, Metamorphopsia — s. Mollis, see Cataract—s. Multiplicans, see Diplopia—s. Myodes, Metamorphopsia — s. Nigra, Amaurosis — s. Oculi, Cataract, Pseudoblepsia — s. Oculorum, Metamorphopsia—s. Radians, Scotasma—s. Sanguinis, Ecchymoma—s. ex Vulnere, see Cataract.

Sug, as a prefix, Sub.

Sug'ar, Saccharum—s. Barley, Penidium, Saccharum hordeatum — s. Black, Extractum glycyrrhizæ—s. Candy, Saccharum candidum—s. Cane, see Saccharum—s. Cane, Chinese, see Saccharum —s. Diabetic, Glucose—s. Fruit, Glucose—s. Fungus, see Urine — s. of Gelatin, Glycosin — s. Grape, Glucose — s. Hepatic, see Saccharum — s. Honey, Glucose — s. of Lead, Plumbi superacetas — s. Liver, see Saccharum.

Sug'ar, Magnet'ic, *Sac'charum Magnet'icum.* A quack preparation, said to be composed of sugar and cannabis. It is given in nervous cases.

Sug'ar, Ma'ple, Saccharum acernum, see Acer saccharinum.

Sug'ar of Milk, *Sac'charum lac'tis, Galac'tosac'charum, Lac'tose, Lac'tine* or *Lac'tin,* (F.) *Sucre de Lait, Sel de Lait,* is obtained from whey by evaporation and crystallization; s. g. 1. It possesses the demulcent properties of the sugars.

Sug'ar, Mus'cle, Inosite — s. Pine, see Arrowroot—s. Starch, Glucose—s. Urinary, Glucose — s. Various, see Saccharum.

Sug'arberry, Celtis occidentalis.

Sugarcoat'ed. Covered with a layer of refined sugar. Sugarcoated pills are prepared like the sugarplums of the confectioners, and are much used in modern pharmacy, especially when they are composed of nauseous ingredients. See Dragée.

Sug'arloaf Stump. A conical shape assumed by the stump after amputation, presenting the appearance described by its name; due to excessive muscular retraction.

Suggilla'tion, *Sugilla'tio, Li'vor, Œde'ma cruen'tum, Sugillation, Bruise,* (*sugillare, sugillatum,* 'to beat black and blue.') By most authors used synonymously with ecchymosis and ecchymoma. It is, also, applied to the spots or ecchymoses which occur in consequence of intrinsic causes,—in disease and in incipient putrefaction. It is common in dead bodies, *Li'vor* seu *mac'ula emortua'lis.* To this last case it is, indeed, restricted by some medico-legal writers; and an interesting question sometimes arises:—Whether the appearance has been induced before death or afterwards? Whether it is a case of *ecchymosis* or of *suggillation?* In the former, the extravasated blood will usually be coagulated; not so in the latter. It is often, however, difficult to form a correct judgment without reference to the history of the case.

Suggrun'dium, (*sug,* and *gradior,* 'I go.') The eave of a house.

Suggrun'dium Oc'uli, Superciliary arch — s. Superciliorum, Frontal protuberance.

Suici'da, Suicide.

Suici'dal Insan'ity, Suicide.

Su'icide, *Suici'dium,* (*sui cædes,* 'murder of one's self.') The act of killing one's self. *Autochi'ra, Autocton'ia, Idiocton'ia, Autophon'ia.* Suicide is very frequently the result of disease of the mind; the individual seeming, at times, to be irresistibly impelled to self-destruction;—*Melancho'lia Suicid'ium* seu *autochi'ria, Auto'phonoma'nia, Suici'dal Insan'ity.* Also, one who commits self-murder; *Suici'da, Autochir.*

Suie, (Gael. *suithe,*) Fuligo.

Suif, Sevum.

Suintement, Exudation.

Suites de Couches, 'sequels of labor,' Lochia.

Sulca'tus, (from *sulcus,*) Cannelé, Grooved.

Sul'ci (plural of *sulcus*) **Cilia'res,** Halo signatus.

Sul'culus (dim. of *Sulcus*) **La'bii Superio'ris,** Lacuna labii superioris.

Sul'cus, (akin to ὁλκος, 'a furrow,') *Semicana'lis, Semicanalic'ulus.* A furrow, a groove, (F.) *Sillon.* Anatomists have given this name to grooves on the surface of bones and other organs. See Anfractuosity.

French writers on anatomy often use the term *Sillons* for the grooves which lodge the arteries and creep on the surface of bones; while those that receive veins are called *gouttières,* 'gutters.' Also, the vulva.

Sul'cus An'teroposte'rior Jec'oris, see Liver — s. ad Aquæductum vestibuli, see Crista vestibuli — s. Auris, anterior, Incisura auris — s. inter Helicem et Anthelicem, Navicular fossa—s. Labii superioris, Lacuna labii superioris — s. Laryngopharyngeal, Sinus, pyramidal.

Sul'cus, Lat'eral Ante'rior, of the Spi'nal Mar'row. A mere trace on the marrow, marked only by the attachment of the filaments of the anterior roots of the spinal nerves.

Sulcus, Lat'eral Pharynge'al, Sinus, pyramidal.

Sul'cus, Lat'eral Poste'rior, of the Spi'nal Mar'row, corresponds with the attachment of the posterior roots of the spinal nerves.

Sul'cus Retroglandula'ris, see Glans — s. Sinus lateralis, Fossa sigmoidea.

Sul'cus Fronta'lis. A groove on the cerebral surface of the temporal bone, which lodges the commencement of the longitudinal sinus.

Sul'cus Spira'lis. A groove in the cochlea, which separates the margin of the denticulate lamina from that to which the basilar membrane is attached.

Sul'cus Transversa'lis, see Liver — s. Umbilicalis, see Liver.

Sulfate, see Sulphuric acid — *s. d'Alumine,* Aluminæ sulphas, Soufre precipité — *s. de Cadmium,* Cadmii sulphas — *s. de Manganèse* ou *Manganeux,* Manganese, sulphate of.

Sulfi'dum Carbo'nii, Carbonis sulphuretum.

Sulfite, see Sulphurous acid — *s. de Chaux,* Calcis sulphis.

Sul'fur, Sulphur.

Sulfuration, see Vulcanite.

Sulfure, see Sulphur — *s. d'Antimoine,* see Antimonium — *s. de Carbon,* Carbonis sulphuretum—*s. de Calcium impur,* Calcis sulphuretum—*s. de Fer,* Ferri sulphuretum.

Sulfuré, Sulphureous.

Sulfureux, Sulphureux.

Sul'phas, gen. *Sulpha'tis,* see Sulphuric acid—s. Aluminaris, Alumen — s. Ammoniacæ Cupratus, Cuprum ammoniatum—s. Cadmicus, Cadmii sulphas—s. Kalicoäluminicum, Alumen—s. Natricus, Soda, sulphate of—s. Zincicum, Zinci sulphas.

Sul'phite, see Sulphurous acid.

Sulphocar'bolates, *Sulphophc'uates, Phe'nylsul'phates.* A class of salts prepared by heating together pure carbolic and sulphuric acids, diluting with water, and saturating with the base, as soda, zinc, &c. They are employed in diseases supposed to have a parasitic origin, as zymotic diseases, &c. The *Sulphocarbolates of magnesium, potassium, sodium, iron, copper, ammonium, lead, calcium, quinia, zinc,* &c., have been prepared, and several of them employed therapeutically; the *Zinc sulphocarbolate* as an injection in gonorrhœa, vaginitis, &c., and a dressing to suppurating wounds, gr. v. to f℥j.; and also internally in diarrhœa in the same doses as the sulphate. The *Lead sulphocarbolate* has sometimes been employed as a substitute for the acetate. The *Sodium sulphocarbolate* has been used in phthisis and zymotic diseases in doses of ten to sixty grains, and in smaller doses, as well as externally, in children in stomatitis, scarlatina with severe sorethroat, thrush, &c. The *Calcium sulphocarbolate* has been prescribed in doses of five grains to young rachitic children.

Sulphocarbol'ic Ac''id, *Sulphophe'nic Acid, Phenylsulphu'ric Acid.* A compound soluble crystalline acid, resulting from the union of hydrated sulphuric acid and pure carbolic acid. Its odor is similar to that of carbolic acid, and its action as a disinfectant and antiseptic is considered by some to be more potent than that of carbolic acid alone. See Sulphocarbolates.

Sulphophe'nates. Salts formed by the combination of sulphuric and phenic acids with bases, as soda, &c. See Sulphocarbolates.

Sulphosin'apisin. A peculiar ingredient of sinapis alba; a white, bitter, soluble neutral substance.

Sulphovi'nate of So'da. A crystalline salt prepared by the action of sulphuric acid on alcohol, at a specific temperature, carbonate of baryta being added, the resulting sulphovinate of baryta being neutralized by carbonate of soda. It is a purgative in the dose of five or six drachms. *Sulphovinic* or *sulphethyl'ic acid* is itself a bisulphate of the oxide of ethyl.

Sulphovi'nic Ac'id, see Sulphovinate of soda.

Sul'phur, gen. *Sul'phuris, Sul'fur, Sco'rith, Thei'on, Thi'on, A'verich, Ter'ra folia'ta, Fu'mus cit'rinus, Aq'nila, Brim'stone,* (F.) *Soufre. Na'tive Sul'phur* is called *Rock* and *Black Sulphur, Sul'phur vi'vum* seu *ui'grum.* Sulphur, as we meet with it, is in *rolls, Sulphur in rot'ulis* seu *rotun'dum, Roll Brim'stone.* It is a volcanic production, and is obtained, in large quantities, from Solfatara, in Italy. *Roll Sulphur* is impure sulphur, melted, and run into moulds. It is unpleasantly odorous, when heated or rubbed; insipid; solid, and brittle. S. g. 1·99. Fusible at 226°; volatilizable by heat, and condensing unchanged.

When sulphur is combined with a simple body or a compound radical it forms a *sulphuret,* (F.) *Sulfure.*

Sul'phur Al'cohol, Mercaptan.

Sul'phur Antimonia'tum, Antimonii sulphuretum præcipitatum — s. Caballinum, see Sulphur sublimatum — s. Carburet of, Carbonis sulphuretum — s. Chloratum, Sulphur, chloride of.

Sul'phur, Chlo'ride of, *Sul'phuris Chlo'ridum* seu *Dichlo'ridum, Sul'phur chlora'tum, Hypochlore'tum sulphuro'sum, Chlo'rum hypersulphura'tum, Dichlo'ride* or *Protochlo'ride* or *Hypochlo'ride* or *Subchlo'ride of Sul'phur, Bisulph'uret of Chlo'rine,* is obtained by passing *dry chlorine gas* over washed and dried *flowers of sulphur,* until they are for the most part dissolved, and distilling the decanted fluid from the excess of dissolved sulphur. One drachm of the liquid to an ounce of lard has been used in lepra, psoriasis, and other chronic cutaneous diseases. Ten drops, dissolved in ether, have been given in adynamic fever.

Sul'phur, Dichlo'ride of, Sulphur, chloride of — s. Hypochloride of, Sulphur, chloride of — s. Iodatum, Sulphuris iodidum — s. Iodide of, Sulphuris iodidum — s. Iodoret of, Sulphuris iodidum — s. Liver of, Potassæ sulphuretum.

Sul'phur Lo'tum, *Sulphur sublima'tum lo'tum, Wash'ed Sulphur, Magiste'rium Sul'phuris, Sulphuris Flo'res lo'ti,* is prepared by pouring boiling water on sublimed sulphur, so as to wash away any acid it may contain, and then drying it.

Sul'phur Ni'grum, Sulphur vivum, see Sulphur sublimatum.

Sul'phur Præcipita'tum, *Lac Sul'phuris, Milk of Sulphur, Precip'itated Sul'phur,* (F.) *Crème de Soufre, Soufre précipité,* is prepared by boiling sublimed sulphur and lime together, and adding muriatic acid to precipitate the sulphur.

Sul'phur, Protochlo'ride of, Sulphur, chloride of — s. Subchloride of, Sulphur, chloride of.

Sul'phur Sublima'tum, *Sulphur, Sublimed Sulphur, Flow'ers of Sulphur,* (F.) *Soufre sublimé, Fleurs de Soufre,* is the sulphur of commerce, sublimed in close vessels.

Sulphur is possessed of stimulant, laxative, and diaphoretic properties. As a laxative, it is used in hemorrhoidal and other affections. In the itch, applied externally and taken internally, it has been considered as a specific, and it is a valuable remedy in most cutaneous affections that are local. Dose, ʒss. to ʒij.

The fæces or dregs, left in the purification or sublimation of sulphur, are called *Horse Brim'stone, Dregs of Sulphur vi'vum, Sulphur caballi'num* seu *vivum, Sul'phuris vi'vi recremen'ta.* They are very impure, and are only used externally.

Sul'phur, Veg''etable, Lycopodium — s. Wort, Peucedanum.

Sulphura'tus, Sulphureous, Sulphurated.

Sulphu'reous, *Sulphuro'sus, Sulphu'rius, Sulphura'tus, Sul'phuretted, Sul'phurous,* (F.) *Sulfureux, Sulfuré.* Possessing the properties of, or relating to, or containing sulphur.

Sul'phuret, see Sulphur.

Sul'phuretted, Sulphureous — s. Hydrogen, see Hydrogen, sulphuretted.

Sulphure'tum Ammoni'acæ, Ammoniæ sulphuretum — s. Ammoniæ hydrogenatum, Liquor fumans Boylii — s. Kalicum, Potassæ sulphuretum — s. Lixiviæ, Potassæ sulphuretum — s. Stibicum, see Antimonium.

Sulphu'ric or **Sul'phuric Acid,** *Ac''idum Sulphu'ricum* seu *Sulfu'ricum, O'leum Vitri'oli, Spir'itus Vitri'oli* seu *vitri'oli for'tis, Ac''idum vitriol''icum, A. Vitri'oli dephlogistica'tum, Oil of Vit'riol, Spir'it of Vit'riol, Vitriol'ic Ac''id, A'cor* seu *Spir'itus Sul'phuris,* (F.) *Acide Sulphurique* ou *Sulfurique.* Sulphuric acid is inodorous; has a strong acid taste, and is corrosive. S. g. 1·843, (Ph. U. S.) It is escharotic, stimulant, and rubefacient. Mixed with lard, it is sometimes used in local pains, and certain cutaneous affections. United with bases it forms *sulphates,* (F.) *Sulfates.*

Sulphu'ric Ac''id, Aromat'ic, *Ac''idum Sulphu'ricum Aromat'icum, A. vitriol'icum aromat'icum* seu *vitriolicum alcoho'lē aromat'icum, Elix'ir vitri'oli* seu *vitrioli aromaticum* seu *vitrioli Mynsich'ti* seu *vitrioli Edinburgen'sium* seu *vitrioli cum tinctu'râ aromaticâ* seu *vitrioli dulcē* seu *acido-aromat'icum, Al'cohol cum aromat'ibus sulphurica'tus, Tinctu'ra ac''idi sulphu'rici,* is formed of

Sulphuric acid, f℥iijss., *Ginger*, bruised, ℥j., *Cinnamon*, bruised, ℥jss., *Alcohol*, Oij. (Ph. U. S., 1842.) In the last edition (1873) it is made of *Sulphuric acid*, ℥vj., *Ginger*, in coarse powder, ℥j., *Cinnamon*, in coarse powder, ℥jss., *Alcohol*, q. s. Mix gradually the acid with Oj. of alcohol, and allow the liquid to cool. Mix the cinnamon and ginger, and, in a percolator, pour alcohol upon them gradually until a pint has passed. Then mix the diluted acid and the tincture. Dose, gtt. x. to xxx. Its properties are like those of the next preparation, than which it is more frequently employed, being more agreeable.

Sulphu'ric or *Sul'phuric Ac''id Lemonade*, (F.) *Limonade Sulfurique*, is made by adding together sulphuric acid, water, and syrup. Nitric and phosphoric lemonades are similarly prepared.

Sulphu'ric Ac''id, Dilu'ted, *Ac''idum Sulphuricum dilu'tum*, *A. vitriol'icum dilu'tum*, *Elix'ir vitri'oli*, *Spiritus vitrioli ac''idus Vogle'ri*, *Elix'ir of Vi'triol*, (F.) *Acide sulfurique délayé* ou *dilué*, is formed, according to the Pharmacopœia of the United States, (1842,) by adding *Aq. destillat.*, f℥xiij., to *Acid. sulph.*, f℥j. According to the last edition, (1873,) it consists of *Acid. sulphur.*, ℥ij., *Aquæ destillat.*, q. s. to make together a pint. Its s. g. is 1·082. It is tonic, astringent, and refrigerant. Dose, gtt. x. to xx., largely diluted. When used as a gargle, half a drachm may be added to f℥vj. of water.

Very dilute sulphuric acid was formerly termed *Phleg'ma vitri'oli*.

Sul'phuris Carbure'tum, Carbonis sulphuretum.

Sul'phuris Chlo'ridum, Sulphur, chloride of — s. Dichloridum, Sulphur, chloride of.

Sul'phuris Io'didum, *S. Iodure'tum*, *Sul'phur Ioda'tum*, *Iod'uret* or *Iodide of Sulphur*, (F.) *Soufre Iodure*, *Iodure de Soufre*. It is thus directed to be prepared in the Ph. U. S., 1873: *Iodin.*, ℥iv., *Sulphur. sublimat.*, ℥j. Rub together until they are thoroughly mixed. Put the mixture into a flask, close the orifice loosely, and apply a gentle heat, so as to darken the mass without melting it. When the color has become uniformly dark throughout, increase the heat so as to produce liquefaction, incline the flask in different directions, in order to return into the liquid any portions of iodine which may have condensed on the inner surface of the vessel; allow the flask to cool; break it, and put the iodide into bottles, which are to be well stopped.

Sulphu'rius, Sulphureous.

Sulphuro'sus, Sulphureous.

Sul'phurous, Sulphureous.

Sul'phurous Ac''id, *Ac''idum Sulphuros'icum* seu *Sul'phuris volat'ilē* seu *Sulphuro'sum* seu *Sulfurosum*, *Spir'itus sulphuris* seu *sulphuro'sus* seu *volat'ilis* seu *sulphuris per campa'nam* seu *vitri'oli phlogistica'tus*, *Gas sulphuris*, (F.) *Acide Sulfureux*, *Air Acide Vitriolique*. (Obtained by treating *mercury* with *concentrated sulphuric acid*, or by burning sulphur.) *Acidum sulphurosum*, *Sulphurous acid*, prepared by treating *sulphuric acid* with *charcoal* by means of heat, receiving the acid into *distilled water*, was admitted into the Pharmacopœia U. S. for 1863. Its s. g. is 1·035. It is sometimes used in the gaseous, at others in the liquid, state. Sulphurous acid gas is used to disinfect clothes, confined air, letters coming from infected places, &c. It is also exhibited with great success, in the form of fumigation, in the treatment of certain chronic cutaneous affections, and of sciatic and rheumatic pains in general. If respired pure, it acts in the manner of violent irritants, and is not long in producing death. It has been considered to be fatal to the lower forms of animal and vegetable life, by denying them the oxygen necessary for their existence, and hence has been used as a parasiticide and to prevent fermentation, and likewise in zymotic diseases in general.

United with bases, it forms *Sulphites*, (F.) *Sulfites*, which have been employed in the cases for which sulphurous acid is indicated. The sulphites of soda, potassa, ammonia, magnesia, and lime have been used, but the two first mentioned are alone officinal. The *bisulphites* are also resorted to, especially that of lime, which is said to preserve oleaginous or fatty substances against spontaneous changes. The *hyposulphites* are used for the same purposes and in the same doses as the sulphites.

Sultz'malt, Min'eral Waters of. Sultzmalt is a village in the department of the Upper Rhine, where are several sources of cold, acidulous waters, which seem to contain carbonic acid, subcarbonate of soda, subcarbonate of lime, sulphate of lime, and a little bitumen. They are refrigerant, aperient, and alterative.

Sumac, Rhus coriaria — *s. des Corroyeurs*, Rhus coriaria — *s. Vénéneux*, Rhus toxicodendron.

Su'mach, Rhus coriaria — s. Chinese, Ailanthus glandulosa — s. Mountain, Rhus copallina — s. Myrtle-leaved, Coriaria myrtifolia — s. Poison, Rhus venenata — s. Stag's horn, Rhus typhina.

Sum'bul. The name of a root, *Sum'bul radix*, (Ph. B., 1867,) *Jatamansi*, *Muskroot*, presumed to belong to the Umbelliferæ family, much employed in Russia and Germany against cholera. Its exact botanical history is not determined. It contains a strongly odorous principle like that of musk, and is regarded as an antispasmodic.

Sum'bul Ra'dix, Sumbul root.

Su'men, gen. *Su'minis*, (*sugimen*, from *sugere*, 'to suck,' — formerly the breast,) Hypogastrium.

Sum'mer Catarrh', Fever, hay.

Sum'mer Complaint'. A popular name in the United States for diarrhœa occurring in summer. It is often also made to include dysentery and cholera infantum. With some, it means cholera infantum only.

Sum'mer Diseases, see Estival — s. Plant Winter Worm, Sphæria sinensis—s. Rash, Lichen tropicus.

Sum'mer Spots, Ephelides.

Sum'mitas Cu'tis, (*summus*, for *supinus*, from *superus*, 'highest,') Epidermis.

Sum'mus Hu'merus, Acromion.

Sun'burn, Ephelides.

Sun Dew, Drosera rotundifolia.

Sun Fever. A fever of tropical regions, which is probably a severe form of febricula or simple fever.

Sun Flower, False, Helenium autumnale — s. Flower, swamp, Helenium autumnale — s. Flower, tickweed, Coreopsis trichosperma — s. Flower, turpentine, Silphium perfoliatum — s. Pain, see Hemicrania — s. Rash, Lichen — s. Spots, Ephelides — s. Stroke, Coup de soleil — s. Stroke, Egyptian, Coup de soleil.

Sup, as a prefix, Sub.

Supale, see Valeriana.

Supellec'tilē Diog''enis, Palm.

Supel'lex Anatom'ica, (*supellex*, *supellectilis*, 'household goods,') Museum anatomicum — s. Diogenis, Palm.

Su'per (L.), in composition, 'above.'

Superbe, ([L.] *superbus*, 'proud,) Rectus superior oculi.

Super'bus, 'proud,' Rectus superior oculi.

Superchlo'ridum Formyl'icum, Chloroform.

Supercilia'ris, Corrugator supercilii, Superciliary.

Supercil'iary, *Supercilia'ris*, (from *supercilium*.) That which relates to the supercilia or eyebrows, (F.) *Sourcilier* ou *Surcilier*.

Supercil'iary Arches, *Superciliary Ridges*, *Ar'cus supercilia'res*, *Suggrun'dia oculo'rum*, (F.)

Arcades sourcilières, are two slightly projecting apophyses situate at the anterior surface of the os frontis, above the superior margin of the orbits. They are separated by the nasal *bosse*, and covered by the superciliaris muscle, to which they give attachment.

Supercil'iary Ridges, Superciliary arches.

Supercil'ium, (pl. *supercil'ia,*) *Oph'rys, Oph'rya, Val'lum,* (F.) *Sourcil,* (*super,* and *cilium,* 'the tarsal cartilage.') The *eye'brows,* (Sc.) *Brees,* (Prov.) *Eyebreen,* are two arched eminences — convex above, and more or less prominent, according to the individual — which lie on the superciliary arch of the os frontis, above the eyelids, and extend from the sides of the root of the nose to the temple. Their inner extremity or *head* is more prominent than the outer or *tail.* The eyebrows are covered with short and stiff hairs, which are directed obliquely from within outwards, and are commonly of the color of the hair. The skin in which these hairs are implanted rests on the *orbicularis palpebrarum,* the *frontalis,* and *superciliaris* muscles, which move the eyebrows in different directions. The eyebrows serve as an ornament to the countenance, and by covering the eye defend it from the impression of too strong a light. They direct the perspiration also from the eye.

Supercil'ium Acetab'uli. The edge of the cotyloid cavity of the os innominatum.

Superconcep'tion, see Superfœtation.

Superevacua'tio, Hypercrisis.

Superfecunda'tion, see Superfœtation.

Superfétation, Superfœtation.

Superfibrina'tion, Hyperinosis.

Superficia'lis Col'li, (from *superficies,* 'surface,') *Subcuta'neus Col'li.* A nerve formed by communicating branches from the second and third cervical nerves. It is distributed to the superficial parts of the neck.

Superfic''ies Orbita'lis, (*super,* and *facere,* 'face,' 'the surface,') see Maxillary bone (superior) — s. Plantaris Pedis, Sole.

Superfœcunda'tio, Superfœtation.

Superfœta'tio, Superfœtation.

Superfœta'tion, *Superfœta'tio, Epicye'sis, Hypercye'sis, Hypercye'ma, Superimpræg'natio, Epiy'mē, Superfœcunda'tio, Superfœcunda'tion, Superimpregna'tion,* (F.) *Superfétation,* (*super,* and *fetare,* 'to breed.') Conception of a fœtus — *epicye'ma* — in a uterus which already contains one. The impregnation of a female already pregnant. The possibility of this has been denied; but there is abundant evidence to show that it is possible at a very early period of pregnancy. Twin cases may be of this kind of *superconception.*

Supergemina'lis, (*super,* and *gemini,* 'the testicles,') Epididymis.

Supergenua'lis, (*super,* and *genu,* 'the knee,') Patella.

Superhumera'lē, (*super,* and *humerus,* 'the shoulder,') Epomis.

Superimpregna'tio, Superfœtation.

Superinvolu'tion of the U'terus. A term applied by Sir J. Y. Simpson to excessive involution, leading to atrophy of the uterus by producing increased absorption.

Supe'rior Aur'is, Attolens aurem — s. Rotundus clitoridis, Ischiocavernosus.

Superla'bia, (*super,* and *labia,* 'the labia pudendi,') Clitoris.

Superliga'men, gen. *Superliga'minis,* (*super,* and *ligare,* 'to bind,') Epidesmus.

Superlig'ula, (*super,* and *ligula,* dim. of *lingua,* 'a tongue,') Epiglottis.

Supernu'merary Fin'ger, (*super,* and *numerus,* 'a number,') Digitus supernumerarius.

Supernutrit''io, (*super,* and *nutrire, nutritum,* 'to nourish,') Hypertrophy — s. Lienis, Splenoncus — s. Splenis, Splenoncus.

Supernutrit''ion, Hypertrophy.

Superox'alas (gen. *Superoxala'tis*) **Ka'licum,** Potassa, oxalate of.

Superpos'itus Medico'rum, (*super,* and *positus,* 'placed,') Archiater.

Superpurga'tio, (*super,* and *purgare, purgatum,* 'to purge,') Hypercatharsis.

Superscapula'ris, (*super,* and *scapula,*) Supraspinatus — s. Inferior, Infraspinatus.

Superse'dent, *Super'sedens,* (*super,* and *sedere,* 'to sit.') A term used by Professor George B. Wood for a medicine whose operation on any part or organ is to displace or prevent diseased action in that part or organ. An antiperiodic is a supersedent.

Superstib''ias Potas'sicus, Antimonium diaphoreticum.

Supervacua'tio, Hypercrisis.

Supier, Sambucus.

Supinateur, Supinator — *s. Court* ou *petit,* Supinator radii brevis — *s. Grand* ou *long,* Supinator radii longus.

Supina'tion, *Supina'tio,* (from *supinus,* 'lying on the back.') The movement in which the forearm and hand are carried outwards, so that the *anterior* surface of the latter becomes *superior.*

In Pathology, *Supination, Supina'tio, Hyptias'ma, Hyptias'mus,* means the horizontal position on the back, with the head thrown back, and the legs and arms extended. It is often a sign of great weakness in disease.

Supina'tor, (F.) *Supinateur.* That which produces supination. A name given to two muscles of the forearm.

Supina'tor Bre'vis seu Mi'nor, Supinator radii brevis — s. Longus seu Major, Supinator radii longus.

Supina'tor Ra'dii Bre'vis, *S. bre'vis* seu *mi'nor,* (F.) *Épicondylo-radial* (Ch.), *Supinateur court* ou *petit supinateur.* A muscle seated at the outer and back part of the forearm. It is flattened, triangular, and curved upon itself in such a manner that it embraces the superior extremity of the radius. It is attached, on the one hand, to the external tuberosity of the humerus, and to a small portion of the posterior surface of the ulna, and is inserted into the upper third of the outer and upper surfaces of the radius. It produces, by contracting, the motion of supination.

Supina'tor Ra'dii Lon'gus, *S. longus* seu *ma'jor, Brachioradia'lis,* (F.) *Huméro-sus-radial,* (Ch.) *Long* ou *grand supinateur,* is seated at the anterior and outer part of the forearm. It arises from the inferior part of the outer edge of the os humeri, and from the external intermuscular aponeurosis; and is inserted, by a long tendon, into the outer edge of the radius, near the base of the styloid process. It causes the supination of the forearm, which it can likewise bend on the arm.

Suppeda'nea, (*sup,* and *pes,* gen. *pedis,* 'foot,') Hypopodia.

Supplanta'lia, (*sup,* and *planta,* 'the sole of the foot,') Hypopodia.

Supplemen'ta Epiplo'ica, (*sup,* and *pleo,* 'I fill,') Appendiculæ pinguedinosæ.

Supplemen'tary Air, see Respiration.

Support'er, Abdom'inal, (*sup,* and *portare,* 'to carry.') Belt, Russian — s. Uteroäbdominal, see Belt, Russian.

Supporteur Abdominal, Belt, Russian.

Suppos'iter, (*sup,* and *ponere, positum,* 'to place.') An instrument intended for the introduction of a suppository into the rectum.

Supposition de Part, (*supponere, suppositum, — sup,* and *ponere,* 'to put,' — 'to counterfeit,') Pregnancy, pretended.

Suppositoire, Suppositorium.

Supposito'ria, (pl. of *suppositorium,*) see Suppository.

Supposito'ria Ac''idi Carbol'ici, *Suppos'itories of Carbol'ic Ac''id.* (*Acid. carbolic.*, gr. xij., *Ol. theobrom.*, gr. cccxlviij., *Aquæ*, q. s. Mix the carbolic acid, previously dissolved in a few drops of water, thoroughly with sixty grains of the oil of theobroma, and then, having melted the remainder of the oil, proceed according to the general formula given under Suppository.)

Supposito'ria Ac''idi Tan'nici, *Suppos'itories of Tan'nic Ac''id.* (*Acid. tannic.*, gr. lx., *Ol. theobrom.*, gr. ccc. Mix the tannic acid thoroughly with sixty grains of the oil of theobroma, and continue the process as directed under Suppositoria acidi carbolici.)

Suppositoria Acidi Tannici (Ph. B., 1867) are prepared by a process similar to that for Suppositoria hydrargyri.

Supposito'ria Aloës, *Suppos'itories of Aloes.* (*Aloës purificat.* in pulv. subtiliss., gr. lx., *Ol. theobromæ*, gr. ccc. Prepared by a process similar to that for Suppositoria acidi tannici.)

Supposito'ria Assafœt'idæ, *Suppos'itories of Assafœt'ida.* (*Tinct. assafœtidæ*, f℥j., *Ol. theobromæ*, gr. cccxx. Expose the tincture to the air, in a capsule, in a moderately warm place, and allow it to evaporate spontaneously until reduced to the consistence of a thick syrup. Mix this thoroughly with sixty grains of the oil, and then, having melted the remainder of the oil, proceed according to the general formula under Suppository.)

Supposito'ria Belladon'næ, *Suppos'itories of Belladon'na.* (*Extract. belladonnæ alcoholic.*, gr. vj., *Ol. theobromæ*, gr. ccclv., *Aquæ*, q. s. Rub the extract into a smooth paste, with the addition of a drop or two of water, mix thoroughly with sixty grains of the oil, and continue the process as directed under Suppositoria acidi carbolici.)

Supposito'ria Hydrar'gyri, *Mercu'rial Suppositories.* (*Unguent. hydrargyri*, gr. lx., *Adipis benzoat.*, *Ceræ albæ*, āā gr. xx., *Ol. theobromæ*, gr. lxxx. Melt the lard, wax, and oil with a gentle heat, add the ointment, and having mixed all the ingredients thoroughly, without applying more heat, immediately pour the mixture, before it has congealed, into suitable moulds of the capacity of fifteen grains; or the fluid mixture may be allowed to cool, and then be divided into twelve equal parts, each of which shall be made into a suppository. Ph. B., 1867.)

Supposito'ria Mor'phiæ, *Suppos'itories of Mor'phia.* (*Morphiæ sulph.*, gr. vj., *Ol. theobromæ*, gr. ccccliv. Prepared by a process similar to that for Suppositoria acidi tannici.)

Suppositoria Morphiæ (Ph. B., 1867) are prepared by a process similar to that for Suppositoria hydrargyri.

Supposito'ria O'pii, *Suppos'itories of O'pium.* (*Extract. opii*, gr. xij., *Ol. theobromæ*, gr. cccxlviij., *Aquæ*, q. s. Prepared by a process similar to that for Suppositoria belladonnæ.)

Supposito'ria Plum'bi, *Suppos'itories of Lead.* (*Plumbi acetatis* in pulv. subtiliss., gr. xxxvj., *Ol. theobromæ*, gr. cccxxiv. Prepared by a process similar to that for Suppositoria acidi tannici.)

Supposito'ria Plum'bi et O'pii, *Suppos'itories of Lead and O'pium.* (*Plumbi acet.* in pulv. subtiliss., gr. xxxvj., *Extract. opii*, gr. vj., *Ol. theobromæ*, gr. cccxviij., *Aquæ*, q. s. Rub the acetate of lead and extract of opium into a smooth paste, with the addition of a few drops of water, and continue the process as directed under Suppositoria acidi carbolici. Ph. U. S., 1873.)

The Ph. B. (1867) contains a formula for *Supposito'ria Plum'bi compos'ita, Com'pound Lead Suppos'itories*, the ingredients of which are *acetate of lead, opium, benzoated lard, white wax*, and *oil of theobroma*. It is prepared by a process similar to that for Suppositoria hydrargyri.

Suppos'itories, Suppositoria — s. of Aloes, Suppositoria aloës — s. of Assafœtida, Suppositoria assafœtidæ — s. of Belladonna, Suppositoria belladonnæ — s. of Carbolic acid, Suppositoria acidi carbolici — s. of Lead, Suppositoria plumbi — s. of Lead, compound, Suppositoria plumbi composita — s. of Lead and Opium, Suppositoria plumbi et opii — s. Mercurial, Suppositoria hydrargyri — s. of Morphia, Suppositoria morphiæ — s. of Opium, Suppositoria opii — s. of Tannic Acid, Suppositoria acidi tannici.

Supposito'rium, Suppository — s. Uterinum, Pessary.

Suppos'itory, *Supposito'rium, Hypoth'eton, Hypoth'ema, Bacil'lus, Bal'anus, Glans, G. subdidit''ia, Nod'ulus intestina'lis*, (*supponere, suppositum, — sub*, and *ponere*, 'to put,'—'to put under,') (F.) *Suppositoire.* A solid medicine, in the form of a cone or cylinder, usually intended to be introduced into the rectum; — either for the purpose of favoring or of restraining evacuations, or to act as an anodyne. The vehicle commonly used for the active ingredients is Cacao butter, *Oil of theobroma.* It may require admixture with one-eighth part of wax to give it the proper consistence. Tallow with the same proportion of wax is used at times. The application of a suppository is termed *Balanismus.*

Uterine and *vaginal suppositories* are also prepared for introduction into the uterine cavity, or cervical canal and the vagina. These are now made, like suppositories for the rectum, of cocoa butter, with or without wax, impregnated with the medicine to be exhibited, as acetate of lead, opium, bromide of potassium, morphia, tannin, &c. Gelatin and glycerin have been substituted for cocoa butter. *Urethral suppositories, med'icated bougies*, have also been employed.

The last edition of the U. S. Pharmacopœia (1873) contains formulæ for suppositories of carbolic acid, tannic acid, aloes, assafœtida, belladonna, morphia, opium, lead, and lead and opium. The British Pharmacopœia (1867) has formulæ for only four officinal suppositories,—tannic acid, mercury, morphia, and lead. See Suppositoria acidi carbolici, S. acidi tannici, &c.

According to a general formula in the Ph. U. S. (1873), the medicinal portion of each suppository is to be mixed with a small quantity of *oil of theobroma*, by rubbing them together, the mixture being then added to the remainder of the *oil* previously melted and cooled to the temperature of 95°. Mix thoroughly, without applying more heat, and immediately pour the mixture into suitable moulds, having the capacity of thirty grains each. The moulds, previously made cold, must be kept so by immersion in iced water. All difficulty in removing suppositories from the moulds may be obviated by having the moulds previously dusted with lycopodium. In the absence of suitable moulds, suppositories may be formed by allowing the mixture, prepared as above, to cool, care being taken to keep the ingredients well mixed, and dividing it into parts, each of which shall weigh thirty grains, and may be made into a conical or other convenient form for a suppository.

Suppos'itory, Ure'thral, see Suppository—s. Vaginal, see Pessaries, and Suppository.

Suppres'sio Al'vi, (*sup*, and *premere, pressum*, 'to press,') Constipation — s. Lochiorum, Ischolochia—s. Lotii, Ischuria—s. Mensium, Amenorrhœa — s. Menstruationis, Amenorrhœa — s. Sudoris, Ischidrosis.

Suppression du Flux Menstruel, Amenorrhœa — *s. de Part,* see Parturition — *s. d'Urine,* Ischuria.

Suppu'rans, Suppurative.

Suppura'rē, Suppurate.

Sup'purate, *Suppura'rē, Matter, Beal,* (F.) *Suppurer.* To form or secrete pus.

Suppuratif, Suppurative.

Suppura'tion, *Suppura'tio, Ecpye'ma, Purulen'tia, Pyo'sis, Pye'sis, Diapye'ma, Diapye'sis. Pyogen'ia simplex, Pu'rulence, Pu'rulency, Gath'ering, Beal'ing,* (F.) *Suppuration, Aboutissement.* Formation or secretion of pus, (from *sup,* and *pus,* gen. *puris.*) Sec, also, *Pyogenia.* It is a frequent termination of inflammation, and may occur in almost any of the tissues. This termination is announced by slight chills; by remission of the pain, which, from being lancinating, becomes heavy; by a sense of weight in the part, and, when the collection of pus can be easily felt, by fluctuation. When the collection of pus becomes prominent, the abscess is said to *point* or to *come to a head.* When pus is thus formed in the arcolar membrane, and is collected in one or more cavities, it constitutes an *abscess.* If it be formed from a surface exposed to the air, it is an *ulcer;* and such ulcers we are in the habit of establishing artificially in certain cases of disease.

Sup'purative, *Suppu'rans, Suppurati'vus, Diapye'ticus, Ecpye'ticus, Sup'purant,* (F.) *Suppuratif, Pyopoétique.* That which facilitates suppuration. Suppuratives are generally vesicants mixed with lard.

Suppurer, Suppurate.

Su'pra (L.), in composition, above.

Supraclavic'ular, *Supraclavicula'ris,* (*supra,* and *clavicula.*) That which is above the clavicle.

Supracosta'les, *Levato'res Costa'rum,* (F.) *Surcostaux,* (from *supra,* and *costa,* 'a rib.') A name given to twelve small fleshy fasciculi, which are flattened, triangular, and with radiating fibres. They pass from the transverse processes of the dorsal vertebræ to the superior margin of the rib beneath. Spigelius, Cowper, Boyer, Chaussier, and others consider them to form part of the intercostales externi.

Suprahepat'ic Veins, see Hepatic veins.

Supraömphalodym'ia, (*supra,* ὀμφαλος, 'navel,' and δύω, 'I mingle,') see Somatodymia.

Su'pra-et-In'fraömphalodym'ia, see Somatodymia.

Supraör'bital Arch. A curved and prominent margin of bone, forming the upper boundary of the orbit, and separating the horizontal from the vertical portion of the bone.

Supraör'bital Ar'tery, see Frontal.

Supraör'bitar, *Supraorbital, Supraorbita'lis, Supraorbita'rius,* (F.) *Sus-orbitaire,* (*supra,* and *orbita.*) That which is situate above the orbit.

Supraör'bitar Fora'men, *F. Supraorbita'rium* seu *orbitarium supe'rius,* (F.) *Trou sus-orbitaire* ou *orbitaire supérieur,* is a notch or foramen completed by a ligament at the inner third of the orbitar arch. It gives passage to the *supraorbitar* or *superciliary artery,* a branch of the ophthalmic, which ascends the forehead, and is distributed thereto.

Suprapu'bian, *Suprapu'bic, Suprapubia'nus,* (*supra,* and *pubes.*) That which is seated above the pubis.

Suprapu'bian Nerve, (F.) *Nerf suspubien,* is the internal ramus of the inguino-cutaneous branch of the first lumbar nerve. It is the *genitocrural* branch of Bichat. It descends almost vertically before the psoas muscle; and near the crural arch divides into two branches. One of these accompanies the spermatic cord, and is distributed to the cremaster, scrotum, and integuments on the inner part of the thigh. The other issues from the pelvis with the femoral filaments, traverses the aponeurosis of the thigh, and is distributed to the integuments of the upper and anterior part of the limb.

Suprare'nal, *Suprarena'lis,* (F.) *Surrénal,* (*supra,* and *ren,* 'the kidney.') Seated above the kidney; as the *suprarenal* capsule.

Suprare'nal Bod'y, Capsule, renal — s. Capsule, Capsule, renal.

Suprascap'ular, *Suprascapula'ris,* (*supra,* and *scapula.*) Seated above the scapula; as

Suprascap'ular Nerve. This arises from the fifth cervical, passes through the suprascapular noteh, and is distributed to the supraspinatus and infraspinatus muscles.

Suprascapula'ris, Suprascapular, and Supraspinatus muscle.

Suprasem'iorbicula'ris, Orbicularis oris.

Supraspi'nal, Supraspinatus.

Supraspina'ta Fos'sa, (F.) *Fosse sus-épineuse.* A triangular depression above the spine of the scapula.

Supraspina'tus, *Supraspino'sus, Supraspina'lis, Supraspi'nal, Supraspi'nous,* (F.) *Sur-épineux, Sus-épineux,* (*supra,* and *spina.*) That which is seated above a spine.

Supraspina'tus Mus'cle, *Superscapula'ris, Suprascapularis,* (F.) *Sus-spino-scapulo-trochitérien, Petit sus-scapulo-trochitérien* (Ch.), is situate in the fossa supraspinata. It is elongated, thick, and triangular, and is attached, on the one hand, to the two inner thirds of the fossa supraspinata; and terminates, on the other, at the anterior part of the great tuberosity of the humerus. This muscle raises the arm.

Supraspino'sa Ligamen'ta, *Supraspinal ligaments,* are two in number. 1. The *Dorsolumbosupraspinal ligament,* (F.) *Ligament sur-épineux dorso-lombaire,* extending above the spinous processes of the dorsal and lumbar vertebræ from the 7th cervical as far as the median crista of the sacrum. 2. *Cervical supraspinal ligament,* (F.) *Ligament sur-épineux cervical,* which extends above all the cervical spinous processes, and is attached, above, to the outer occipital protuberance.

Supraster'nal, *Suprasterna'lis,* (*supra,* and *sternum.*) That which is above the sternum or breast-bone. The *Fos'sa suprasterna'lis, Jugu'lum, Fos'sa Jugula'ris,* (F.) *Jiégion trachéale,* is the depressed space in the neck above the sternum.

Sur (F.), (L.) *Supra,* in composition, 'above.'

Su'ra, *Gastrocne'mē, Gastrocne'mia, Gastrocne'mium, Calf of the leg,* (F.) *Mollet, Gras de Jambe.* The projection formed at the posterior part of the leg by the gastrocnemii muscle. Also, the fibula.

Su'ral, *Sura'lis.* (from *sura.*) Appertaining or relating to the calf of the leg.

Sura'lis, Sural, see Gastrocnemii.

Surcilier, (*sur,* and *cil,* 'the tarsal cartilage, an eyelash,') Corrugator supercilii, Superciliary.

Surcostaux, (*sur,* and *costal,* 'belonging to the ribs,') Supracostales.

Surculation, (from *surculus,*) see Gencration.

Sur'culi Fel'lei, pl. of *surculus,* Pori biliarii.

Sur'culus, 'a young branch,' Ramuseulus.

Surdent (F.), (*sur,* and *dent,* 'a tooth.') When a milktooth does not fall out at the period of the second dentition, but is merely forced to one side by the new tooth, it is called a *surdent.*

Surdi-mutité, Mutitas surdorum.

Sur'ditas, (from *surdus,*) Cophosis, Deafness — s. Mutorum, Mutitas surdorum.

Surdité, Cophosis, Deafness.

Surdomu'titas, (*surdus,* and *mutus,* 'mute,') Mutitas surdorum.

Sur'dus, Deaf.

Sureau Commun, Sambucus.

Surelle, ([Sax.] ɼuɼ, 'sour,') Oxalis acetosella, Rumex acetosa.

Sur-épineux, (*sur,* and *épine,* 'a spine,') Supraspinatus.

Sur-excitation, see Excitement and Superexcitation.

Sur'feit, (*sur,* and *fait,* 'done,') Acrasia, Colica crapulosa.

Sur'geon, *Chirur'geon, Chiro'nax, Chirur'gus, Vul'nerum med'icus, Cheiria'ter, Chiria'ter, Iä'trus,* (F.) *Chirurgien,* (old French) *Surgien,* (χειρ, 'the hand,' and ἐργον, 'work.') One who practises surgery. The surgeon, says Celsus, ought to be young, or, at all events, not advanced in life. His hand must be steady, expert, and never tremulous; he must use the right or left with equal facility; his sight must be clear and penetrating; his mind intrepid; and, although unmoved when he proceeds to operate, he must not be in haste, nor cut less than is necessary, but finish his operation, as if the cries of the patient made no impression upon him.

In the Middle Ages, the universities of Italy and Spain sent out educated surgeons, as well as physicians, under the name *chirur'gi phys'ici.*

Sur'geon-accoucheur', Accoucheur, see Surgeon-apothecary.

Sur'geon-apoth'ecary. One who unites the practice of surgery with that of the apothecary. A *general practitioner.* He is the ordinary *medical man* or family medical attendant in England, and when he combines, as he usually does, obstetrics with his practice, he is termed a *surgeon-accoucheur,* in contradistinction to the *physician-accoucheur,* who practises as a physician and an accoucheur. See Apothecary.

Sur'geon-den'tist, Dentist.

Sur'geoncy. The office of a surgeon.

Sur'gery, *Chirur'gia, Chiriatri'a, Cheirix'is, Chi'risis, Chirix'is, Chiris'mus, Metacheirix'is, Metachi'risis, Metachiris'mus, Tracta'tio manua'ria, Medici'na operati'va* seu *ef'ficax,* (F.) *Chirurgie.* The part of the healing art which relates to external diseases, their treatment, and especially to the manual operations adapted for their cure. Also, a surgeon's office.

Sur'gery, Anaplas'tic, Morioplastice — s. Autoplastic, Morioplastice — s. Conservative, Surgery, salvation — s. Dental, Dentistry — s. Major, see Surgery, operative.

Sur'gery, Mil'itary, *Chirur'gia milita'ris,* (F.) *Chirurgie militaire,* is that which relates to the operations to be performed on the field of battle, or subsequently, with the attention to be paid to the wounded, &c.

Sur'gery, Mi'nor, see Surgery, operative.

Sur'gery, Op'erative, is termed *Aciur'gia, Acur'gia,* and *Acidur'gia,* (F.) *Médecine opératoire. Major surgery* comprises the *capital* or more important operations; *Minor surgery,* the lesser, or those of everyday occurrence.

Sur'gery, Plas'tic, Morioplastice.

Sur'gery, Salva'tion, *Conserv'ative Sur'gery,* (F.) *Chirurgie conservative,* is that which looks rather to the preservation of a part — a limb, for example — than its removal. One who is addicted to operating in almost all cases is sometimes called a *kaifesman.*

Sur'gical, *Chirur'gicus,* (F.) *Chirur'gical, Chirurgique.* That which relates to surgery, as *surgical* anatomy, *surgical* operations, *surgical* instruments, &c.

Sur'gical Fe'ver, Fever, surgical—s. Typhus, Pyæmia.

Surgien, Surgeon.

Su'rinamine, see Geoffræa Surinamensis.

Sur-irritation, see Irritation.

Sur-numéraire (Doigt), (*sur,* and *numéro,* 'number,') Digitus supernumerarius.

Suroxygénèses, (*sur,* and *oxygen.*) A name given by Baumes to diseases attributed by him to superabundance of oxygen.

Surpeau, (*sur,* and *peau,* 'skin,') Epidermis.

Surprise', Cer'ebral, Cerebral surprise.

Surrec'ta Al'ba, Ranunculus flammula.

Sur-rénal, Suprarenal.

Surroga'tum, (*surrogare,* — *sur* for *sub,* and *rogare, rogatum,* 'to ask,' — 'to substitute,') Succedaneum.

Sursels, (*sur,* and *sel,* 'a salt,') Supersalts, see Salt.

Surtouts Ligamenteux de la Colonne Vertébrale, (*sur,* and *tout,* 'all,') Vertebral ligaments.

Surumpe (S.). A disease to which the traveller in the Cordilleras is liable. It consists of a violent inflammation of the eyes, caused by the reflection of the bright rays of the sun. The conjunctiva is highly inflamed, and the lids swell and bleed. The pain is intense, and frequently induces delirium.

Survie, (*sur,* and *vie,* 'life,') Survivorship.

Survi'vorship, (F.) *Survie, (supervivere,* — *super,* and *vivere,* 'to live,' — 'to live above or longer.') In *legal medicine,* this word means the probability that any individual has survived others in an accident which has been fatal to all. This is often an important question connected with the inheritance of property, and on which physiology can rarely afford more than presumptive grounds for conclusion.

Sus, same as *sursum,* 'above.' A prefix in certain Romanic words signifying above.

Sus-carpien (F.), (*sus,* and *carpe,* 'the wrist.') Above the wrist. An epithet given by Chaussier to the dorsal artery of the wrist — *Artère sus-carpienne* — a branch of the radial.

Sus-épineux, Supraspinatus — *s. Hépatique,* see Hepatic veins — *s. Maxillo-labial,* Levator anguli oris — *s. Maxillo-labial, grand,* Levator labii superioris alæque nasi — *s. Maxillo-labial moyen,* Levator labii superioris proprius — *s. Maxillo-nasal,* Compressor naris — *s. Omphalodymie,* see Somatodymia — *s. Optico-sphéno-sclevoticien,* Rectus superior oculi — *s. Orbitaire,* Supraörbitar — *s. Phalangien du pouce,* Abductor pollicis brevis — *s. Pubio-fémoral,* Pectinalis — *s. Scapulo-trochitérien le plus petit,* Teres minor — *s. Scapulo-trochitérien petit,* Supraspinatus — *s. Spino-scapulo-trochitérien,* Supraspinatus.

Susceptibil'ity, *facilè suspicieus,* (*sus,* and *capio,* 'I take,' — 'easily taking, or undertaking.') Sensibility in its most enlarged acceptation. Impressibility. This term, with the epithet *nervous,* is sometimes used for that increase in the moral sensibility which is particularly observed in nervous affections.

Suscep'tio Intestino'rum, Intussusception.

Suspendic'ulum, (*sus,* and *pendere,* 'to hang,') Cremaster.

Suspen'sa, (*sus,* and *pendere, pensum,* 'to hang,') Enæorema.

Suspenseur, Suspensory.

Suspensoire, Suspensory.

Suspenso'rium, Suspensory — s. Hepatis, Suspensory ligament of the liver — s. Testis, Cremaster.

Suspen'sory, *Suspenso'rius,* (F.) *Suspenseur.* That which sustains or suspends.

Suspen'sory Ban'dage, *Suspenso'rium,* (F.) *Suspensoir* ou *Suspensoire,* is a bandage intended to support the scrotum in cases of diseases of the testicles or of scrotal hernia. It consists of a kind of bag, fixed above to a cincture, and retained below by strings passing between the thighs and fixed to the cincture behind.

Suspen'sory Lig'ament of the Lens. A thin, transparent membranous structure between the vitreous body and the ciliary processes of the choroid connecting the anterior margin of the retina with the anterior surface of the lens, and assisting in retaining the lens in its position.

Suspen'sory Lig'ament of the Liv'er, *Falciform Lig'ament, Broad Lig'ament of the Liver, Ligamen'tum la'tum, Suspenso'rium he'patis, Perpendic'ulum he'patis,* is a triangular duplicature

of the peritoneum, between the inferior surface of the diaphragm and the upper surface of the liver, which is continuous with the great falx of the umbilical vein.

Suspen'sory Lig'ament of the Mam'ma. Fibrous processes passing from the anterior layer of the superficial fascia to the integument and nipple, inclosing in their areolæ masses of fat.

Suspen'sory Lig'ament of the Pe'nis is a fibrocellular fascia, of a triangular shape, which extends from the anterior part of the symphysis pubis to the corpus cavernosum, which it sustains. A similar ligament belongs to the clitoris.

Suspen'sory Lig'ament of the Spleen. A fold of peritoneum connecting the spleen with the diaphragm.

Suspen'sum, Enæorema — s. Urinæ, Enæorema.

Suspira'tion, (*su* for *sub*, and *spirare, spiratum*, 'to breathe,') Suspirium.

Suspira'tus, gen. *Suspira'tûs*, Suspirium.

Suspir'itus, gen. *Suspir'itûs*, Suspirium.

Suspir'ium, *Suspira'tio, Suspira'tus, Suspir'itus, Myg'mus, Mych'mus, Mychthis'mus, Stenag'mus, Steuax'is, Sigh, Suspira'tion,* (old E.) *Sithe, Sythe,* (F.) *Soupir.* A short, audible breathing. Also, voluntary contraction of the diaphragm and intercostal muscles, the effect of which is to restore the due relation between the circulation and respiration, or to free ourselves from an inconvenient sense of weight felt in the chest when we are much depressed — a weight which appears to be chiefly dependent on the functions of the heart being disturbed through the moral influence. The sigh differs from the *sob*, the latter being involuntary and spasmodic. Sighing, occurring in fevers to a great extent, indicates considerable depression. If accompanied with a vocal sound, it constitutes a *groan.*

When the respiration, on auscultation, resembles sighing, it is called, by some, *Sus'pirous* or *Suspir'ious,* (F.) *Suspirieuse.*

Suspir'ium Cardi'acum, Angina pectoris.

Sustentac'ulum, (*sus,* and *teneo, tentum,* 'I hold,') Aliment — s. Tali, see Calcaneum.

Sustenta'tor Clito'ridis, Erector clitoridis — s. Penis, Erector penis.

Susurra'tion, (*susurrare, susurratum,* 'to murmur, to whisper,') Whispering.

Susur'rus, 'a murmur,' Bourdonnement — s. Aurium, Tinnitus aurium.

Sute'la, (*suere, sutum,* 'to sow,') Suture.

Su'terberry, Xanthoxylum fraxineum.

Suto'rius, (*sutor,* 'a shoemaker,') Sartorius.

Sut'ter, Saccharum.

Sutu'ra, gen. *Sutu'ræ,* Suture—s. Abdominalis, Gastroraphy — s. Arcualis, Coronal suture — s. Biparietalis, Sagittal suture—s. Clavata, Suture, quilled—s. Corporis Callosi externa, see Raphe—s. Cranii squamosa, Squamous suture — s. Dentata, see Suture — s. Frontoparietalis, Coronal suture.

Sutu'ra Incisi'va. A suture in the jaw during fœtal life, which extends from the incisive foramen to the septum between the alveoli of the lateral incisors and canines.

Sutu'ra Interparieta'lis, Sagittal suture—s. Jugalis, Sagittal suture—s. Lambdoidalis, Lambdoid suture — s. Lepidoides, Squamous suture — s. Limbosa, see Suture — s. Mendosa, Squamous suture — s. Notha, see Suture — s. Obelæa, Sagittal suture — s. Ossium spuria, Harmony — s. Proræ, Lambdoid suture — s. Punctata, Suture, common — s. Puppis, Coronal suture — s. Rhabdoides, Sagittal suture — s. Serrata, see Suture, Sagittal suture — s. Spuria, see Suture — s. Squamosa, see Suture — s. Vera, see Suture.

Su'tural, *Sutura'lis;* (same etymon as Suture.) Relating to a suture.

Su'tural Lig'ament, Ligament, sutural.

Su'ture, *Sutu'ra, Sute'la, Ar'mē, Rha'phē,* (*suere, sutum,* 'to stitch,') *Dovetail joint,* (F.) *Engrenure.* A kind of immovable articulation, in which the bones unite by means of serrated edges, which are, as it were, *dovetailed* into each other. The articulations of the greater part of the bones of the skull are of this kind. The coronal, lambdoidal, and sagittal sutures are called *true sutures, Sutu'ræ ve'ræ,* the two temporal are called *false sutures, sutu'ræ no'thæ* seu *spu'riæ* seu *squamo'sæ.*

A *dentated suture* — *Sutu'ra denta'ta* — is one in which the processes are long and dentiform, as in the interparietal suture. In a *ser'rated suture* — *sutu'ra* seu *syntax'is serra'ta*—the indentations and processes are small and fine, like the teeth of a saw, as in the suture between the two portions of the frontal bone. In the *sutu'ra limbo'sa* there is, along with the dentated margins, a degree of bevelling of one, so that one bone rests on the other, as in the occipitoparietal suture.

Su'ture, in Surgery, *Rha'phē, Stitch,* is an operation which consists in stitching the lips of a wound to procure their union. The suture was, at one time, largely employed; but, in modern times, its use has been wisely restricted. There are few wounds in which the edges may not be brought together by adhesive plaster appropriately applied. This kind of union, by adhesive plaster simply, has been absurdly termed *Sutu'ra sic'ca* or *dry su'ture,* in opposition to the *Sutu'ra cruen'ta,* (F.) *Suture sanglante,* or *Suture* properly so called. The suture is generally formed with waxed thread and straight or curved needles, according to the arrangement of parts. The chief sutures are the *interrup'ted su'ture,* the *quilled su'ture,* the *glov'er's suture,* and the *twist'ed suture.*

1. The Interrup'ted Su'ture, (F.) *Suture à points séparés, Suture entrecoupée,* is formed by passing a needle, armed with a ligature, through the lips of the wound previously brought into contact; and then tying the extremities of the thread. The other stitches are made in the same manner. They are separate or interrupted. It is the suture most commonly used.

2. The Quilled Suture, *Sutu'ra clava'ta,* (F.) *Suture enchevillée* ou *emplumée* ou *empennée, Compound Suture,* is merely the interrupted suture, with this difference, that the ligatures are not tied over the face of the wound, but over two quills or rolls of plasters, or bougies, which are laid along the sides of the wound. It is used by some surgeons, on account of there being less danger of the stitches tearing out. It is not much employed. The Clamp Suture, used by Dr. Sims, of New York, in the treatment of vesicovaginal fistulæ, is a modification of this. It is formed by two cylinders of silver or lead, perforated at several points for the passage of small pieces of fine silver wire, which are to supply the places of thread, and are prevented from slipping by perforated shot carried down upon them, pressed against the cylinders, and kept in place by being firmly pinched with pliers.

3. The Glover's Suture, *Contin'ued* or *Uninterrup'ted Su'ture,* (F.) *Suture de l'elletier* ou *en surget,* is executed by introducing the needle first into one lip of the wound from within outwards, then into the other in the same way; and, in this manner, sewing up the whole extent of the wound. It has been chiefly used in wounds of the intestinal canal. It is now rarely employed except for stitching up dead bodies. The common stitch or suture, *Sutura punctu'ta,* (F.) *Suture à points passés,* has been used in similar cases. Various other sutures or stitches have been proposed for the union of the intestines in wounds thereof, as the *suture of the four masters,* (F.) *Suture des quatre maîtres,* in which both ends of the intes-

tines are stitched on a piece of the windpipe of some animal, or on a cylinder of cardboard oiled; —the *Suture of Ramdohr*, with ensheathing or invagination of the upper into the lower part of the intestine; — the *Suture of Bertrandi*, (F.) *Suture à points passés*, which differs only from the continued suture in the ligature being passed through, not over, the margins of the solution of continuity; —the *Suture of Jobert*, in which a union of the serous surfaces, brought in contact, is promoted by a kind of invagination; — the *Suture of Lembert*, which consists in stitching the mucous surfaces together, without implicating the serous coat, tying the knots, and leaving the ends of the ligatures internally. In *Gély's suture*, a modification of Lembert's, two needles are inserted near the angle of the wound, then carried along the interior of the bowel, parallel with the wound, for the sixth of an inch, and brought out precisely at the same level. The threads are then crossed, each needle being passed through the puncture made by the other, the threads tied and cut off.

4. The Royal Stitch or Suture is the name of an old operation for the cure of bubonocele. It consisted in putting a ligature under the hernial sac, close to the abdominal ring, and then tying that part of the sac, so as to render it impervious by the adhesive inflammation thus excited.

5. The Sta'ple Suture consists of a piece of steel wire, shaped like a staple, the ends of which are ground to a triangular or glover's point. In using it, the points of the staple are to be brought through both margins of the wound, and then bent back.

6. The Twist'ed Suture, (F.) *Suture entortillée*, is employed, chiefly, to unite wounds of the cheeks and of the free edges of the lips. To perform it, a pin or needle is passed through the edges of the wound, so as to keep them thoroughly in contact. A piece of thread is then wound accurately around the pin, from one side of the division to the other, in the form of the figure 8. Delicate rings of India-rubber have been substituted for the figure of 8 turns, especially after ovariotomy. This form of suture is then called the *India-rubber suture*. The number of pins and sutures must, of course, correspond with the extent of the wound. This is the suture used in cases of harelip. The Button Suture of Dr. Bozeman, of Alabama, employed in vesicovaginal fistula, is a modification of this.

7. The *Suture à Anse* or *Loop stitch* of Le Dran has only been employed in cases of wounds of the intestines. For this purpose, the edges of the wound are brought together, and as many needles, with unwaxed threads, used as there are to be stitches. Each stitch is then made by passing a needle through the edges; and all the ligatures which belong to one side of the wound are tied together, and twisted so as to form a thread, which is fixed externally.

8. The Implant'ed Suture, (F.) *Suture implantée*, is formed by pins arranged parallel to the edges of the wounds, and *implanted* in their substance. By means of threads, the needles are approximated so as to bring the edges of the wound together.

9. The Plas'tic Suture, so called by Prof. Pancoast, of Philadelphia, its proposer, is a suture by tongue and groove. The groove is made by an incision in the part, which is to receive the flap. The tongue is made on the flap by bevelling off the two surfaces, cuticular and adipose. The suture is made by passing a loop of thread, by two punctures, deep through the inner lip of the groove. The two needles are passed through the base of the tongue, and again through the outer lip of the groove. The two ends of the thread are then tied over a small roll of adhesive plaster, by which the tongue is, of necessity, forced deep into the groove. Four raw surfaces are thus firmly held in connection, making the union of parts, by this suture, a very certain process. In the *Shot'ted Su'ture*, perforated shot are used for purposes of compression in connection with wires and a metal bar through which a hole is drilled for the passage of the wires, in wounds.

Suture à Anse, see Suture — s. Antiseptic, Ligature, antiseptic — s. of Bertrandi, see Suture — s. Biparietal, Sagittal suture — s. Button, see Suture, twisted — s. Clamp, see Suture, quilled — s. Compound, Suture, quilled — s. Continued, Suture, glover's — *s. Écailleuse*, Squamous suture — *s. Empennée*, Suture, quilled — *s. Emplumée*, Suture, quilled — *s. Swab, ([Sax.] ꝑpebban, 'to clean with a mop.') A piece of sponge or rag tied to a rod of whalebone or wood, for cleansing the mouth of the sick, or applying remedial agents to deep-seated parts. The process is termed *Swab'bing*.

Swad'dling-clothes, Swathing-clothes.

Swag'belly, Physconia.

Swal'low, Hirundo — s. Wort, Asclepias vincetoxicum — s. Wort, orange, Asclepias tuberosa — s. Wort, tuberousrooted, Asclepias tuberosa — s. Wort, white, Asclepias vincetoxicum.

Swal'low's Nest, Nidus hirundinis.

Swalme, ([Sax.] ꝑpam, [G.] Schwamm,) Excrescence, Tumor.

Swamp Cab'bage, Dracontium fœtidum — s. Dogwood, Petela trifoliata — s. Sickness, Milksickness — s. Wood, Cephalanthus occidentalis, Dirca palustris.

Swan Al'ley Sore, see Phagedenic chancre.

Swarff, Stupor, Syncope.

Swa'thing-clothes, *Swad'dling-clothes, Incunab'ula, Fas'ciæ, Pan'ni*, ([Sax.] ꝑpeðan, 'to bind,') (F.) *Maillot*. The kind of clothing or bandaging formerly applied to children during the first year of life. It is now properly laid aside, and every freedom allowed to muscular exertion.

Sweam'ish, see Syncope.

Sweat, ([Sax.] ꝑpaꞇ,) Sudor—s. Bloody, Sudor cruentus — s. Blue, red, &c., see Chromidrosis — s. Colliquative, see Colliquative — s. Glands, see Perspiration—s. Pores, see Pore — s. Root, Polemonium reptans — s. Scab, Crusta genu equinæ.

Sweat Ves'icle, Sudamina.

Sweat'ing, Ephidrosis — s. Bath, Achicolum —s. of Blood, see Diapedesis, and Sudor cruentus — s. House, Achicolum — s. Plant, Eupatorium perfoliatum — s. Room, Achicolum — s. Sickness, Sudor Anglicus.

Sweat'ing Sick'ness, Mal'wah. A disease which appears to be allied to the worst form of cholera, and to bear a close relation to malignant congestive fever. As its name imports, it occurs in Malwah, in India.

Sweb'bing, Syncope.

Swee, (sway,) Vertigo.

Sweem'ing, Syncope.

Sweem'ish, see Syncope.

Sweet, Bit'ter, Solanum dulcamara.

Sweet Bit'ter, Triosteum — s. Bread, Pancreas, Thymus — s. Bush, Comptonia asplenifolia — s. Fern, Comptonia asplenifolia, Adiantum pedatum — s. Flag, Acorus calamus — s. Pod, Ceratonium siliqua — s. Root, Aralia nudicaulis.

Swell'ing, *Epanaste'ma, Exar'ma, Exœde'sis, Pre'sis, Pres'ma, On'cus, Extumefac'tio, Tu'mor, Tumefac'tio,* (Prov.) *Blaw'ing, Boist, Coul,* (old English) *Boche, Bol'lynge, Bol'ning,* (F.) *Enflure, Gonflement,* (from [Sax.] ꝑpellan, 'to swell.') Morbid increase of bulk in a part of the body. See Tumor.

Swell'ing, Cloud'y, see Cloudy.

Swell'ing, Glass'y. A term applied to the external appearance presented by croupous membrane. Also, amyloid infiltration.

Swell'ing, White, Hydrarthrus.

Swelt'ing, see Syncope.

Swen'sie, (quinsy,) Cynanche tonsillaris.

Swen'yng, Somnium.

Swerf, Stupor, Syncope.

Swer'tia Chirayi'ta, (after Emanuel Swert, a Dutch botanist,) Gentiana chirayita — s. Difformis, see Calumba — s. Frasera, see Calumba — s. Lutea, Gentiana lutea.

Sweu'in, Somnium.

Swe'vyng, Somnium.

Swe'vynyng, Somnium.

Swiete'nia Febrif'uga, (after Van Swieten,) *S. Somi'da, Soymi'da* seu *Cedre'la febrif'uga, Feb'rifuge Swiete'nia,* (F.) *Mahogan fébrifuge. Ord.* Meliaceæ. *Sex. Syst.* Decandria Monogynia. The bark of this tree, which is a native of the East Indies, called there *Rohena Bark,* has an aromatic odor and bitter taste. It is tonic and stomachic, and has been used in intermittents, and in diseases where bitter tonics are indicated. Dose, ℈j. to ℈ij. of the powder.

Swiete'nia Mahog'ani, *Ce'drus Mahog'ani, Mahay'oui, Maag'oni, Mahog'any Tree,* grows in the West Indies and tropical America, and is possessed of similar properties.

Swiete'nia Senegalen'sis, *Khaya Senegalen'sis.* A common forest tree on the borders of the Gambia. The bark called *Cail-cedra,* and *Karsou Khayi,* is bitter and antiperiodic.

Swiete'nia Somi'da, S. febrifuga.

Swim, Air bladder.

Swim'bladder, Air bladder.

Swim'ming, Natation — s. Bladder, Air bladder — s. of the Head, Vertigo.

Swin'acie, Cynanche tonsillaris.

Swine'pox, see Varicella.

Swine'same, Adeps.

Swinethis'tle, Sonchus.

Swin'nying, Vertigo.

Swit'zerland, Min'eral Wa'ters of. Several of these springs are frequented. The principal are the thermal waters of Ragatz and Pfeffers, the saline chalybeate waters of Leuk, the chalybeate springs of St. Moritz, and the iodurated chalybeate waters of Wildegg and Saxon. See Baden, Pfeffers, &c.

Swoon, (from [Sax.] aꝛꝑanan, 'to languish,') Syncope.

Swoon'ing, Syncope.

Swound'ing, Syncope.

Sy, in composition, with, 'together,' see Sym.

Syaladeni'tis, gen. *Syaladeni'tidis,* see Sialadenitis.

Sycami'num, (συκαμινον,) see Morus nigra.

Sycami'nus, (συκαμινος,) Morus nigra.

Sy'cē, (συκη,) Ficus, Ficus carica.

Sy'cea, (συκια,) Ficus.

Syceph'alus, (*sy,* for *sym,* and κεφαλη, 'head.') A monster having two heads united together.

Sy'cion, (συκιον, from *sycē.*) A decoction of dried figs.

Sy'cios Angula'tus, (σικυος, 'a gourd,') *One-seeded star cu'cumber, Wild Bry'ony.* The roots and seeds of this indigenous plant, *Order,* Cucurbitaceæ, are bitter, purgative, and diuretic. It is used in dropsy in the same cases as bryony.

Syci'tes, (συκιτης, from συκη, 'a fig.') Made of figs. See Catorchites.

Syco'ma, gen. *Syco'matis,* (συκωμα, from *syce,* and *oma,*) Ficus.

Syco'sis, *Syko'sis,* (συκωσις.) A tumor of the shape of a fig. Also, a fungous ulcer; the fungous growth resembling the pulp of the fig. A horny excrescence about the eyelids. Dr. Bateman applies the term to an eruption of inflamed but not very hard tubercles occurring on the bearded portion of the face and on the scalp, in adults, and usually clustering together in irregular patches — *Phy'ma Sycosis, Fi'cous phy'ma, Rose'ola fico'sa, Ac'nē men'tagra.* Of this he has given two species: 1. *Sycosis Meu'ti, S. barbæ, Men'tagra, Meuti'go, Va'rus Men'tagra, Phytomen'tagra, Chin'welk, Chin'whelk, Bar'ber's Itch,* (F.) *Dartre pustuleuse mentagre.* 2. *Sycosis Capil'li, S. Capillit''ii.* The treatment, in both cases, resembles that for porrigo favosa. See Mentagraphyte.

Syco'sis, Ficus.

Sy'cum, (συκον,) Ficus.

Sydera'tio, Sideratio.

Syko'sis, Sycosis.

Syllepsiolog''ia, *Syllepsol'ogy, Syllepsiol'ogy,* (*syllepsis,* and λογος, 'a description.') The doctrine of conception.

Syllep'sis, (συλληψις,) Conception.

Sym, Syn, (συν, 'with, together,') like the *cum, con, col, cor,* &c., of the Latins. A common prefix. Before *b, p, ph, ps,* and *m* — *sym,* or *syn,* is changed into *sym* or *xym,* (com;) before *c, ch, g, k,* and *x,* into *syn* or *xyn,* συγ, ξυγ, (con;) before *l,* into *syl* or *xyl,* (col;) before *r,* into *syr* or *xyr,* (cor;) and before *s,* into *sy* or *xy,* and *sys,* (co and cos.)

Symbleph'aron, (*sym,* and βλεφαρον,) Symblepharosis, see Ankyloblepharon.

Symblepharo'sis, *Symbleph'aron,* (*sym,* and βλεφαρον, 'an eyelid,') *Concre'tio palpebra'rum cum bul'bo oc'uli.* Preternatural adhesion between the eyelids, and especially between the upper eyelid and globe of the eye.

Symblepharo'sis, Ankyloblepharon.

Sym'bol, (συμβολον, 'a sign,') *Sym'bolum, Character,* (F.) *Caractère.* A sign or representation of something else.

The following are the symbols commonly used in prescriptions:

℞, Recipe. See R.
gr., *Granum,* a grain.
℈, *Scrupulus* seu *scrupulum,* a scruple.
ʒ, *Drachma,* a drachm.
℥, *Uncia,* an ounce.
℔, *Libra,* a pound.
lb, *Libræ,* pounds.
♏, *Minimum,* a minim.
fʒ, *Fluidrachma,* a fluidrachm.
f℥, *Fluiduncia,* a fluidounce.
O, *Octarius,* a pint.
C, *Congius,* a gallon. See Abbreviations and Weights and Measures.

Sym'bolē, (συμβολη, 'a bringing together,' from *sym,* and βαλλω, 'I throw,') Commissure.

Symboleu'sis, (from συμβολη, 'a bringing together,') Consultation.

Symbolis'mus, (from *symbolum,*) Sympathy.

Symboliza'tio, Sympathy.

Symbolog''ica, (συμβολον, 'a sign,' and λογος, 'a treatise,') Symptomatology.

Symbol'ogy, (*symbolum,* and λογος, 'a description,') Symptomatology.

Sym'bolum, (συμβολον,) Symbol, Sympathy.

Syme's Amputa'tion, see Amputation.

Symétrie, Symmetry.

Symétrique, Symmetrical.

Sym'meles, (*sym,* and μελος, 'a limb,') *Monopus.* A genus of monsters, with I. G. St. Hilaire, whose extremities are joined together — *Sirens.*

Symmet'ria, Symmetry.

Symmet'rical, *Symmet'ricus,* (F.) *Symétrique.* An epithet given to those parts of the body which, if seated on the median line, may be divided into two equal and perfectly like halves: or which, if situate the one to the right, the other to the left of this line, have a similar conformation and a perfectly analogous arrangement.

Symmet'rical Diseases, see Symmetry.

Sym'metry, (συμμετρια, from *sym,* and μετρειν, 'to measure,') *Symmet'ria, Commen'sum, Membro'rum Om'nium Competen'tia, Proportio,* (F.) *Symétrie.* The regularity in form observed in many parts situate on the median line, and also the resemblance which exists between many organs that are situate on each side of the median line — *Bilat'eral Sym'metry.* Bichat first noticed that this symmetry was confined to the organs of animal life — as the head, brain, spine, organs of sense, locomotion, &c.

It has been affirmed — and there is evidence in favor of the assertion — to be a law of the animal economy, that, owing to *symmetry of nutrition,* when uninfluenced by disturbing agents, all general or constitutional diseases affect equally and similarly the corresponding parts of the two sides of the body. This has been called the *Symmetry of Diseases,* and the resulting diseases are said to be *symmet'rical.*

Sym'metry of Diseases, see Symmetry — s. of Nutrition, see Symmetry.

Symparatere'sis, (*sym,* and παρατηρησις, 'the act of observing,') Observation.

Sympas'ma, gen. *Sympas'matis,* (συμπασμα, from *sym,* and πασσω, 'I sprinkle,') Catapasma.

Sympathe'sis, (συμπαθησις,) Sympathy.

Sympathet'ic, *Sympath'icus, Sympathet'icus,* (F.) *Sympathique,* (from *sympathy.*) That which depends on sympathy. Sympathetic affections of an organ are those morbid phenomena that supervene without any morbific cause acting directly on it, and by the reaction of another organ primarily affected. Thus, itching of the nose is a *sympathetic affection,* produced by irritation in the intestinal canal.

The epithet *sympathetic* is also given to different nerves. See Trisplanchnic, Pneumogastric, and Facial.

Sympathet'ic, Great, Trisplanchnic nerve — s. Middle, Pneumogastric — s. Nerve, Trisplanchnic nerve.

Sympathet'ic Pow'der, *Pul'vis sympathet'icus* or *Pow'der of sym'pathy* of Sir Kenelme Digby, was composed of *calcined sulphate of iron* prepared in a particular manner. It was long supposed to be able to cure a wound if applied to the weapon that inflicted it, or even to a portion of the bloody clothes. It is proper to remark, however, that the wound itself was carefully excluded from the air and from all irritation. The notion is still occasionally met with of cleaning and polishing the instrument with which the wound was inflicted until the latter heals. (See Author's "History of Medicine," Philada., 1872, p. 236.)

Sympathet'icus Mi'nor, Facial nerve.

Sympathetis'mus, Sympathy.

Sympathi'a, Sympathy. Consent of parts.

Sympath'icus, Sympathetic.

Sympathique, Sympathetic — *s. Nerf,* Trisplanchnic nerve.

Sym'pathy, (συμπαθεια, from *sym,* and παθος, 'suffering,') *Sympathi'a, Sympathe'sis, Compas'sio, Consen'sus, Sympathetis'mus, Xympathi'a, Confluxio, Conspira'tio, Commer'cium, Consor'tium, Homoiopathi'a, Homoëth'nia, Adelphix'is, Symbolis'mus, Symboliza'tio, Sym'bolum.*

The connection that exists between the action of two or more organs more or less distant from each other, so that the affection of the first is transmitted secondarily to the others, or to one of the others, by means unknown. A knowledge of the particular sympathies between different organs throws light on the etiology of diseases, their seat, and the particular organs toward which our therapeutical means should be directed. See Irritation.

Sympathy of Continuity is seen in the case of a membrane that is continuous, as in the action of demulcents in catarrh; *Sympathy of Contiguity* in the case of parts that are near, as in the action of aloes in amenorrhœa; and *Remote Sympathy* concerns organs that are at a distance from the part impressed, as in the case of tetanus from an injury.

Sym'pathy, Cure by, *Medici'na sympathet'ica, M. Magnet'ica.* A mode of treatment, at one time prevalent, which was based on the idea that a mysterious consent exists between parts of the body and agents, for which there was no real foundation. See Sympathetic powder and Trial by Bier-right.

Sympep'sis, (*sym,* and πεψις, 'coction, digestion,') Coction.

Sympexions, see Sympexis.

Sympex'is, (συμπηξις,) Concretion. M. Robin has applied the term *Sympexions* to solid concretions found in the vesicles of the thyroid gland, spleen, lymphatic ganglion, in the small cysts of the glands of the neck and body of the uterus, and, almost always, in the liquid of the vesiculæ seminales. Little is known of their composition.

Sym'phora, (συμφορα, from *sym,* and φερω, 'I carry,') Congestion.

Symphore'ma, gen. *Symphore'matis,* (συμφορημα.) Congestion.

Symphore'sis, (συμφορησις,) Congestion.

Symphoricar'pus Racemo'sus, *Snowberry,* (συμφορεω, 'I bear together,' and καρπος, 'fruit,' owing to the clustered berries.) An indigenous plant, *Order,* Caprifoliaceæ, *Tribe,* Loniceræ, whose berries are large, bright white, and remain till winter; flowering from June to September. The root is tonic and astringent, and has been used in ague, and by the Indians in syphilis.

Symphy'ia, (συμφυια,) Symphysis.

Symphyoceph'alus, *Metopa'gus, Cephalopa'gus,* (from συμφυης, — *sym,* and φυω, 'I grow,'—'united together,' and κεφαλη, 'head.') A monstrosity, in which twins are united by the head.

Symphyse, Symphysis.

Symphyse Cardiaque. (Same etymon as Symphysis.) Adhesion of the pericardium, the result of inflammation.

Symphyseot'omy, *Symphysot'omy, Symphysiot'omy, Synchondrot'omy, Symphyseotom'ia, Symphysiotom'ia,* (from *symphysis,* and τεμνω, 'I cut.') The *operation* or *section of the Sym'physis, Sigault'ian operation* or *section.* This operation is performed with the view of augmenting the diameter of the pelvis, in order to facilitate delivery in certain cases of faulty conformation of that cavity, with wedging of the head of the child therein. To perform the operation, (F.) *désymphyser,* the female is placed on her back; the pubes is shaved; and, with a strong scalpel, the soft parts are divided on the median line. The articulation is then cut. As soon as the fibrous parts which hold the bones together are divided, they separate to a certain distance from each other; and the delivery may be accomplished. The knife with which the operation is performed is called, by the French, *Coutcau symphysien.*

Symphys'ia, (from *συμφυω*, 'I grow together.') A malformation consisting in the union of parts that are usually divided.

Symphysien, see Symphyseotomy.

Symphysiotom'ia, Symphyseotomy.

Symphysiot'omy, Symphyseotomy.

Sym'physis, *Symphy'ia, Coalescen'tia, Coal'itus, Coalit''ia,* (F.) *Symphysie,* (*συμφυσις,* from *sym,* and *φυω,* 'I grow.') A union of bones. The bond of such union. The aggregate of means used for retaining bones *in situ* in the articulations. The name *symphysis,* (F.) *Symphyse,* has, however, been more particularly appropriated to certain articulations; as to the *symphysis pubis, sacroïliac symphysis,* &c. See Monster.

Sym'physis, Coalescence, Commissure, Insertion — s. Cartilaginea, Synchondrosis — s. Ligamentosa, Syndesmosis — s. Menti, see Maxillary bone, inferior—s. Ossium muscularis, Syssarcosis — s. Pubis, Pubic articulation.

Symphysodactyl'ia, (*symphysis,* and *δακτυλος,* 'a finger.') An abnormal union of the fingers.

Symphysop'sia, (*symphysis,* and *ωψ,* 'the eye.') A monstrous fusion of the two eyes into one.

Symphysot'omy, Symphyseotomy.

Sym'phytos, (*συμφυτος,* 'grown or produced with,') Hereditary.

Sym'phytum, (*συμφυτον,*) *Symphytum officina'lē* seu *album* seu *Bohe'micum, Consol'ida ma'jor, Com'frey, Al'um, Al'us,* (Prov.) *Knitback,* (F.) *Grande Consoude, Oreilles d'âne. Ord.* Boraginaceæ. *Sex. Syst.* Pentandria Monogynia. The roots of this European plant are very mucilaginous, and are employed as emollients. They are used in decoction in hæmoptysis, dysentery, chronic diarrhœa, &c.

Sym'phytum, Solidago virgaurea — s. Album, Symphytum — s. Bohemicum, Symphytum — s. Minimum, Bellis — s. Minus, Prunella — s. Officinale, Symphytum.

Sym'phytum Petræ'um, *Co'ris Monspelien'sis, Montpel'lier Co'ris.* An intensely bitter and nauseous plant, which is said to have been useful in syphilis. See, also, Sanicula.

Symplocar'pus Angustispa'tha, (from *συμπλοκη,* 'connection,' and *καρπος,* 'fruit,' from the coalescing ovaries,) Dracontium angustispatha — s. Fœtidus, Dracontium fœtidum.

Sympod'ia, *Monopod'ia,* (*sym,* and *πους,* gen. *ποδος,* 'a foot.') A monstrosity in which there is coalescence of the lower extremities.

Symp'tom, *Sympto'ma, Semei'on, Ac'cidens, Ca'sus,* (F.) *Symptôme,* (*συμπτωμα,* from *sym,* and *πτωμα,* 'a fall,' from *πιπτω,* 'I fall.') Any change, perceptible to the senses in any organ or function, which is connected with morbific influence. It is by the aggregate and succession of symptoms that a disease is detected. The term *Symptoms of Symptoms* has been used for the effects which result from the symptoms of a disease; but which effects are not essentially connected with the disease itself. Thus, the debility arising from the frequency of evacuations in dysentery is a symptom of symptoms. *Symptom,* at one time, was generally used in the same sense as *sign;* but with many, perhaps most, of the present day, the former signifies a functional or vital phenomenon of disease, while the latter is applied to that which is more directly physical; and hence the expressions *functional* or *vital phenomena* or *symptoms,* in contradistinction to the *physical signs* afforded by auscultation, percussion, &c. See Sign.

Sympto'ma, gen. *Sympto'matis,* Symptom — s. Turpitudinis, Nymphomania.

Symptomat'ic, (*συμπτωματικος,*) *Symptomat'icus,* (F.) *Symptomatique.* Relating or appertaining to symptoms or signs, *Semiot'ic, Semiot'icus.* That which is a symptom of some other affection. Thus, we speak of a *symptomatic* disease, in opposition to one that is idiopathic, *symptomatic* fever, &c.

Symptomatog'raphy, (*symptoma,* and *γραφη,* 'a description,') Semeiography.

Symptomatol'ogy, *Symptomatolog''ia, Symbol'ogy, Symbolog''ica,* (*symptoma,* and *λογος,* 'a treatise.') The branch of pathology, the object of which is the observation (*phænomenoscop'ia*) and knowledge of symptoms.

Sympto'sis, (*συμπτωσις,* from *sym,* and *πιπτω,* 'I fall.') Depression or collapse, emaciation or atrophy, either of the whole body or of a part.

Syn, as a prefix, Sym.

Synæ'rema, gen. *Synære'matis,* (*συναιρεμα,*) Corrugation.

Synæ'tion, (*συναιτια,* from *syn,* and *αιτια,* 'a cause,') Concausa.

Synan'chē, Cynanche, Cynanche tonsillaris.

Synancie, Cynanehe.

Synaphymeni'tis, gen. *Synaphymeni'tidis,* (*συναφη,* 'a conjunction,' *ὑμην,* 'a membrane,' and *itis,*) see Ophthalmia.

Synap'tase, (*syn,* and *απτειν,* 'to join;' with amygdalin it forms hydrocyanic acid,) see Amygdalin.

Synarthro'dia, Synarthrosis.

Synarthro'dial, *Synarthrodia'lis.* That which belongs to synarthrosis; as *Synarthrodial articulation.*

Synarthrose, Synarthrosis.

Synarthro'sis, (*συναρθρωσις,* from *syn,* and *αρθρωσις,* 'articulation,') *Synarthro'dia, Abarticula'tio, Coarticula'tio,* (F.) *Synarthrose.* An immovable articulation. Synarthrosis includes three species: *Suture, Harmony,* and *Gomphosis.*

Synathrois'is, (*συναθροισις, syn,* and *αθροιζειν,* 'to collect,') Congestion.

Synathrois'mus, (*συναθροισμος,*) Congestion.

Syncan'thus, (*syn,* and *κανθος,* 'the corner of the eye.') A morbid adhesion between the globe of the eye and the orbit.

Syn'chiton, (*syn,* and *χιτων,* 'a coat,') Conjunctiva membrana.

Synchondro'sis, *Sym'physis* seu *Cop'ula* seu *Connex'io cartilagin'ea, Chondrosyndes'mus,* (*syn, χονδρος,* 'a cartilage,' and *osis.*) Union or articulation of bones by means of cartilage; as the articulations of the ribs with the sternum, by means of their cartilages of prolongation.

Synchondrot'omy, (*syn, χονδρος,* 'cartilage,' and *τεμνειν,* 'to cut,') Symphyseotomy.

Synchron'ius, Synchronous.

Syn'chronous, *Syn'chronus, Synchron'ius, Isoch'ronous,* (*συγχρονος,* from *syn,* and *χρονος,* 'time.') That which occurs at the same time. Thus, the pulsations of an artery are said to be synchronous with those of the heart.

Syn'chronus, (*συγχρονος,*) Synchronous.

Syn'chysis, (*συγχυσις,* from *syn,* and *χυω,* 'I pour,') Confusio — s. Scintillans, Confusio — s. Sparkling, Confusio.

Syn'ciput, Sinciput.

Syn'clitism, (*συν,* 'together,' and *κλιτος,* 'inclined,') *Synclit'ic move'ment of the fœ'tal head.* Parallelism of the plane of the child's head, in a natural presentation, to the planes of the pelvis and vagina.

Synclit'ic. Relating to synclitism. See Synclitism and Enclitic.

Synclone'sis, (*συγκλονησις,*) Synclonus.

Syn'clonus, *Synclone'sis,* (*συγκλονεω, — syn,* and *κλονεω,* 'I shake,' — 'I shake together.') Tremulous, simultaneous, and chronic agitation of various muscles, especially when excited by the will; *Clon'ici universa'les, Clo'nus.* (Young.) Also, general spasm, *spas'mus universa'lis.* See Tremor, Chorea, &c.

Syn'clonus Ballis'mus, Paralysis agitans — s. Beriberia, Beriberi — s. Chorea, Chorea — s. Ra-

phania, Raphania — s. Saltans, Chorea — s. Tremor, Paralysis agitans, Tremor.

Syncomis'tus, (*συγκομιστος*, from *συγκομιζω*, — *syn*, and *κομιζω*, 'I bring,' — 'I bring together,') *Autop'yros, Pu'nis domes'ticus, P. secunda'rius, P. ciba'rius, P. confusa'neus.* Bread of the whole wheat, or of the unsifted meal. *House'hold bread.* Also, a cataplasm made of the same.

Syn'copal, *Syncopa'lis, Syncop'ticus, Syncop'tus,* (from *syncope.*) Relating or appertaining to syncope; as *Syn'copal Fe'ver, Fe'bris Syncopa'lis.* A pernicious intermittent, characterized by repeated attacks of syncope.

Syn'copē, (*συγκοπη*, from *συγκοπτω*, — *syn*, and *κοπτω*, 'I fall,' — 'I fall down,') *Defec'tio* seu *Deliq'uium An'imæ* seu *An'imi, Leipopsych'ia, Lipopsych'ia, Apsych'ia, Apsyx'ia, Lip'sis An'imi, Asphyx'ia, Apopsych'ia, Lipothym'ia, Leipothym'ia, Liposphyx'ia, Eclip'sis, Snb'itus an'imi ca'sus, Anencephalohæ'mia, Ap'sychy, Swoon, Swoon'ing, Swalt'ing, Faint'ing, Faint'ing fit, Faint'ness, Exclu'tion,* (Sc.) *Drow, Dualm, Swarff, Swerf, Swarth,* (Prov.) *Fower, Sweb'bing, Sween'ing, Swound'ing, Sonud,* (F.) *Évanouissement, Défaillance, Pâmoison.* Complete, and, commonly, sudden loss of sensation and motion, with considerable diminution, or entire suspension of the pulsations of the heart and the respiratory movements. Syncope is, commonly, an affection of no consequence; but, sometimes, it is an index of diseased heart. Placing the patient in the horizontal posture; sprinkling cold water over the face, and the application of volatile substances to the nose, are all that will be required during the fit. See Asphyxia and Suffocation.

An approach to this condition is termed *faintishness;* and the person is said to be *faint;* (old E. and Prov.) *Sweenish* or *Sweamish.*

Syn'copē An'gens, Angina pectoris — s. Anginosa, Angina pectoris.

Syncop'ticus, (*συγκοπτικος,*) Syncopal.

Syncop'tus, Syncopal.

Syncrit'ica, (from *συγκρινω*, 'I put together,') Condensantia.

Syndac'tylus, (*syn*, and *δακτυλος*, 'a finger,') Aschistodactylus.

Syndee'tomy, (*συνδεω*, 'I bind together,' and *τομη*, 'excision,') *Perit'omy, Circumci'sion of the Cor'nea.* An operation designed to cut off the supply of blood from the cornea by a division and part removal, not only of the conjunctival but also of the subconjunctival vessels. It is resorted to in pannus.

Syndesmi'tis, gen. *Syndesmi'tidis,* see Ophthalmia. Also, inflammation of articular ligaments; *Inflamma'tio ligamento'rum,* (from *syndesmus,* 'ligament,' and *itis.*)

Syndesmog''raphy, *Syndesmograph'ia,* (*syndesmus,* and *γραφη*, 'a description.') A description of the ligaments. The part of anatomy which describes the ligaments.

Syndesmol'ogy, *Syndesmolog''ia,* (*syndesmus,* and *λογος*, 'a treatise, discourse.') A treatise on the ligaments.

Syndes'mopharynge'us. A fasciculus of the constrictor pharyngis superior.

Syndesmo'sis, *Synneuro'sis, Synymen'sis, Connex'io* seu *Sym'physis ligamento'sa, Commissu'ra ner'vea, Conserva'tio, Colliga'tio,* (F.) *Synnévrose,* (from *syndesmus,* and *osis.*) The articulation of two or more bones by means of ligament; as of the radius with the ulna.

Syndesmot'omy, *Syndesmotom'ia,* (*syndesmus,* and *τεμνω*, 'I cut or dissect.') Dissection of the ligaments.

Syndes'mus, (*συνδεσμος,*) Bandage, Ligament.

Syn'dromē, (*συνδρομη*, from *syn*, and *δρομος*, 'a course,') *Concur'sus, Con'course.* A name given by the Empirical Sect to the union of symptoms which takes place in diseases: *Syn'dromē pletho'rica,* for example, meant the aggregate of symptoms produced by plethora.

Syndyas'mus, (*συνδυασμος,* from *syn*, and *δυο*, 'two,') Coition.

Syn'eches, (*συνεχης*, 'continuous,') see Continued fever.

Synechi'a, (*συνεχεια*, from *syn*, and *εχειν*, 'to have,' or 'to hold.') Adhesion between the iris and transparent cornea, or between the iris and crystalline lens. The former case is called *Synechia ante'rior;* the latter, *S. poste'rior, Ptosis diplopia.* If exudations of plastic lymph from the edge of the pupil are thrown out, so as to fringe its whole circumference, tying it down to the capsule of the lens, the centre of the pupil remaining clear, the condition is called *Cir'cular* or *an'nular synechia,* or *exclu'sion of the pu'pil.* When the pupil is occluded by a thick nodule of exudation, it is called *occlu'sion of the pu'pil.*

Synenergi'a, Synergy.

Synergi'a, Synergy.

Synergie, Synergy.

Syn'ergy, (*συνεργεια,*) *Synergi'a, Synenergi'a,* (F.) *Synergie,* (from *syn*, and *εργον*, 'work.') A correlation or concourse of action between different organs in health; and, according to some, in disease.

Syn'esis, (*συνεσις,*) Intellect.

Syneuro'sis, (*συννευρωσις,* from *syn*, and *νευρον*, 'a sinew,') see Syndesmosis.

Synezi'sis, *Synize'sis, Consiaen'tia,* (from *syn*, and *ζευγνυειν*, 'to join,' or from *συνιζειν*, 'to sit down together,' from *syn*, and *ιζω*, 'I sit.') A falling together.

Synezi'sis Pupil'læ, *Parop'sis Synizesis, Cali'go à Synize'si, Cali'go* seu *Imperfora'tio* seu *Phthi'sis pupil'læ, Clo'sure* or *occlu'sion* or *oblitera'tion of the Pupil.* This disease is sometimes a faulty conformation, depending upon the continued existence of the membrana pupillaris, or the absence of the pupil. It is, in other words, *congenital.* At other times, it is owing to accident, and supervenes on violent ophthalmia, or on the operation for cataract. They who are affected with synezisis are completely blind, the iris having no central aperture. In certain cases, a remedy may be obtained by making an opening in the iris, which may supply the place of the pupil, and through which the rays of light may reach the retina. The operation is called the *operation for artificial pupil.*

Syn'genes, (*συγγενης,* from *syn*, and *γενναω*, 'I beget,') Hereditary.

Syngen'icus, (*συγγενικος,*) Congenital.

Synhymen'sis, Synymensis.

Synimen'sis, Synymensis.

Synize'sis, Considentia, see Synezisis.

Synneuro'sis, (*συννευρωσις,* from *syn*, *νευρον*, 'a tendon,' and *osis,*) Syndesmosis.

Synnévrose, Syndesmosis.

Syn'ocha, (from *συνεχω*, — *syn*, and *εχω*, 'I have or hold,' — 'I continue,') *Inflam'matory* or *Dynam'ic Fe'ver, Angiop'yra, Stenop'yra, Fe'bris causo'des* seu *caumato'des* seu *dei'rens* seu *ar'dens* seu *contin'ua sanguin'ea* seu *contin'ua non pu'tris* seu *acmas'tica* seu *acu'ta* seu *acu'ta sanguin'ea* seu *con'tinens* seu *continens non pu'trida* seu *angioten'ica* seu *sthen'ica* seu *sanguin'ea* seu *inflammato'ria, Homot'onos, Syn'ochus* (Vogel), *S. impu'tris* (Galen), *Ene'cia cau'ma* seu *ton'ica, Phlogop'yra, Cau'ma, Calentu'ra contin'ua,* (F.) *Fièvre ardente* ou *continente inflammatoire* ou *sanguine* ou *irritative* ou *angioténique* ou *inflammatoire, Gastro-entérite intense; General inflammation.* A species of continued fever, characterized by increased heat; and by quick, strong, and hard pulse; urine high-colored; disturbance of mind slight. It requires, of course, the most active treatment.

Syn'ocha Rheumat'ica, Rheumatism, acute — s. Vaccina, Vaccina.

Syn'ochal, *Synocha'lis.* Relating to, or having the characters of, synocha.

Syn'ochus, (συνοχος, 'continued,') *Ene'cia syn'ochus, Fe'bris len'ta,* (Linnæus.) Continued fever, compounded of synocha and typhus:—in its commencement often resembling the former; in its progress, the latter: *Mix'ed fe'ver, Com'mon contin'ued fe'ver, Syn'ochoid fe'ver.* See Acmasticus, Continued fever, Fever, and Typhus.

Syn'ochus, Synocha—s. Biliosa, Fever, gastric, Fever, bilious—s. Catarrhalis, Influenza—s. Icterodes, Fever, yellow — s. Imputris, Synocha — s. Miliaria, Miliary fever — s. Varicella, Varicella.

Synol'cē, (συνολκη, from *syn,* and ελκω, 'I draw,') Spasm.

Synosteog'raphy, *Synosteograph'ia,* (*syn,* οστεον, 'a bone,' and γραφω, 'I describe.') The part of anatomy which describes the joints.

Synosteol'ogy, *Synosteolog''ia,* (*syn,* οστεον, 'a bone,' and λογος, 'a treatise.') A treatise on the joints.

Synosteo'sis, *Synosto'sis,* (*syn,* οστεον, 'a bone,' and *osis.*) Union by means of bone.

Synosteot'omy, *Synosteotom'ia,* (*syn,* οστεον, 'a bone,' and τεμνειν, 'to cut.') Dissection of joints.

Synosto'sis, Synosteosis. The term has also been applied to the premature and abnormous obliteration of the sutures, as a cause of deformity and irregularity of the human skull.

Synostot'ic, *Synosto'ticus.* Relating or appertaining to Synostosis.

Synote, (*syn,* and ους, ωτος, 'an ear.') A genus of double monsters of I. G. St. Hilaire, the second face of which is represented only by two ears close together, or a double median ear.

Syno'via, (*syn,* and ωον, 'ovum, an egg,') *Mucila'go, Un'guen* seu *Unguen'tum* seu *Smeg'ma articula'rē, Axun'gia articula'ris, Mucila'go articulo'rum* seu *junctura'rum, Hu'mor articula'ris, Hydrar'thrus, Hu'mor* seu *Hu'midum nati'vum* seu *Glu'ten articulo'rum, Arthrohydri'nē, Jointoil,* (F.) *Synovie.* A fluid resembling the white of egg, which is exhaled by the synovial membranes surrounding the movable articulations. The synovia has been found, on analysis, to consist of water, albumen, soda, chloride of sodium, phosphate of lime, and—Fourcroy fancied—uric acid. Its use is to lubricate the joints, and the sheaths in which tendons play.

Syno'vial, *Synovia'lis.* That which relates to the synovia.

Syno'vial Cap'sules, see Membrane.

Syno'vial Cysts. These include dropsies and enlargements of synovial sheaths, as from localized pressure, under which bursæ may also be newly formed; cystic transformation, and dilatation from follicular obstruction.

Syno'vial Glands, *Hav'ers's Glands, Glan'dulæ articula'res* seu *Synovia'les* seu *Haversia'næ,* are the secretory fringes which float in the interior of the synovial capsules. See Capsules. They do not seem to be glandular. They have been called *Syno'vial fim'briæ,* (F.) *Franges synoviales.*

Syno'vial Mem'branes, see Membrane.

Synovi'tis, gen. *Synovi'tidis,* (*synovia,* and *itis.*) A term, badly compounded, applied at times to inflammation of the synovial membrane, *arthrophlogo'sis synovia'lis.* When it affects the bursæ, it is sometimes called *Bursi'tis.* When of strumous origin, the inflammation is often accompanied with a gelatiniform or pulpy degeneration of the synovial membrane, constituting *Arthri'tis Gelatino'sa.*

Synovi'tis Rheumatisma'lis, Rheumatism, (acute).

Syn'tasis, (συντασις, from συντεινω, — *syn,* and τεινω, 'I stretch,'—'I strain.') Tension of parts: hence συντατικα are medicines which render parts tense. *Syntex'is,* on the other hand, means *Colliqua'tio,* or wasting of the body, (from συντηκω, 'I melt together.')

Syntax'is, (συνταξις, from *syn,* and ταασειν, 'to put in order,') Articulation, Reduction, Taxis—s. Serrata, see Suture.

Syntecop'yra, (*syntexis,* and πυρ, 'fever,') Hectic fever.

Syntectycop'yra, Hectic fever.

Synteno'sis, (*syn,* τενων, 'a tendon,' and *osis.*) A species of articulation in which two bones are joined by means of tendon; as the sesamoid bones with the toes, the rotula with the tibia, &c.

Syntere'sis, (συντηρησις, from *syn,* and τερειν, 'to keep,') Prophylaxis.

Syntere'ticus, (συντηρητικος,) Prophylactic.

Syntex'is, (συντηξις,) Colliquation, Consumption, see Syntasis.

Synthena. A term employed by Paracelsus to designate a species of epilepsy, accompanied by cardialgia and tormina.

Syn'thesis, (συνθεσις,) *Reu'nio,* 'composition or putting together,' (from *syn,* and τιθημι, 'I place.') A surgical operation, which consists in uniting parts that are divided; and approximating such as are separated or distant from each other. *Reu'nio par'tium separata'rum, Syn'thesis of continu'ity,* means the union of the edges of a wound, or the approximation of the extremities of a fractured bone. *Synthesis of contigu'ity* is the reduction of displaced organs; as in cases of hernia and luxations. See Composition.

Synthetis'mus. The aggregate of operations and means for reducing a fracture, and maintaining it reduced: — comprising extension, counter-extension, coaptation, and bandaging.

Syn'tonin, (*syn,* and τονος, 'a muscle,') see Fibrin.

Syntrim'ma, gen. *Syntrim'matis,* (συντριμμα, from *syn,* and τριβω, 'I rub,') Contritio.

Syntrip'sis, (συντριψις,) Contritio.

Syn'trophus, (συντροφος, from *syn,* and τρεφω, 'I nourish,') Connutritus.

Synulo'sis, (συνουλωσις, from *syn,* ουλοω, 'I cicatrize,' and *osis,*) Cicatrization.

Synulo'tica, (συνουλωτικα,) Cicatrisantia.

Synu'sia, (συνουσια,) Coition.

Synymen'sis, *Synhymeu'sis, Synimen'sis,* (*syn,* and ὑμην, 'a membrane.') Union of bones by membrane, as in the case of the bones of the head in the fœtus. Syndesmosis.

Sy'phac, Peritoneum.

Syph'ilides, (F.) *Syphilides, Dermo-syphilides, Dermatosies vêroleuses,* (from *syphilis.*) The cutaneous eruptions that appertain to constitutional syphilis are so denominated by the French writers. The principal varieties of these are *Syphilit'ic mac'ulæ,* or pigmentary stains, exanthematous eruptions, and a variety of papular, vesicular, and other *Syphiloder'mata.*

Syphilidia'ter, gen. *Syphilidia'tri, Syphilidia'trus,* (*syphilis,* and ιατρος, 'a physician.') A pox doctor. One who occupies himself in treating syphilis.

Syphilidog'raphy, Syphilography.

Syphilidol'ogy, Syphilology.

Syphilidoma'nia, Syphilomania.

Syph'iline, (from *syphilis.*) A term proposed by Dr. Wm. Farr for the specific zymotic principle by which syphilis is propagated.

Syphilipho'bia, (*syphilis,* and φοβος, 'dread,') *Monoma'nia Syphilit'ica.* A morbid dread of syphilis, giving rise to fancied symptoms of the disease; a form of hypochondriasis.

Syph'ilis, gen. *Syphil'idis, S. vene'rea* seu *malig'na, Siphilis, Syphilis'mus, Cachex'ia* seu *Cacochym'ia Vene'rea, Mā'lum vene'reum, Pudendagra, Me'vium, Lu'es, L. vene'rea* seu *syphilis, Mor'bus Gal'licus* seu *Ital'icus* seu *Hispau'icus* seu *Neapolita'nus* seu *In'dicus* seu *aphrodis'ius, Patur'sa, Basilis'cus, Bo'æ, Sod'oma Gallo'rum; Vene'real, Vene'real Disease, Pox, French Pox, French Crust, French Distem'per, Foul* or *Bad Disease,*

old cant term *Grin'comes*, (Prov.) *Pip*, (Sc.) *Glengore*, *Glengour*, *Grandgore*, (F.) *Vérole* ou *Grosse Vérole*, *Maladie vénérienne*, *Mal de Naples*, *Mal Français*, *Maladie de Vénus*. (The etymology of syphilis is unknown. Some consider it to proceed from συς, 'a hog,' and φιλεω, 'I love;' others, from συν, 'with,' and φιλεω, 'I love;' and others, with more probability, from σιφλος, — formed, by contraction, from σιπαλος, — 'a reproach,' &c.) It is an infectious disease, communicable by coition, or by the contact of parts that are only lined with a thin epidermis; as the lips, nipple, &c. It generally makes its first appearance by a chancre, followed sooner or later by a bubo. The chancre is a *primary* symptom, and there are other symptoms which are *secondary* or *constitutional*. These are: — ulcers in the throat; coppercolored blotches on the skin; pains in the bones, nodes, &c.: the last are sometimes termed *tertiary* phenomena. Hence the terms *Primary Syphilis*, *S. Primigenia*, (F.) *S. Primitive; Secondary Syphilis*, *S. Secundaria*, (F.) *S. Secondaire;* and *Tertiary Syphilis*, *S. Inveterata*, (F.) *S. Tertiaire*, are applied to the disease according to the stage of the syphilitic infection. The origin of syphilis is not known. It is believed to have been introduced into Europe from America, at the end of the 15th century. [?] Its progress is extremely variable, as well as its duration, which is often unlimited, if left to itself. Mercury is by many esteemed the best remedy, but the disease admits of cure without it. Almost every antisyphilitic composition, whose use is attended with success, probably contains mercury united with diaphoretics or other medicines. It is generally sufficient to keep the mouth sore for a fortnight for the cure of chancre: for venereal sorethroat, and other recent constitutional symptoms, eight or ten weeks may be required; and, of course, a longer time, if these symptoms have persisted longer. Sometimes, after mercury has been given for a time, the symptoms continue stationary; and do not yield until the mercury has been discontinued, and tonics and eutrophics have been administered. The preparations of iodine have been much used in the revellent treatment of this disease, especially the iodide of potassium.

Syph'ilis Cor'puscles. Microscopic bodies, said to have been noticed by some observers in the blood of syphilitic patients.

Syph'ilis Hereditā'ria, *S. ingen'ita, Hered'itary Syphilis*. Constitutional syphilis of the child, derived during fœtal life from one of the parents.

Syph'ilis In'dica, Framboesia — s. Ingenita, Syphilis hereditaria—s. Inveterata, see Syphilis — s. Primary, see Syphilis — s. Primigenia, see Syphilis — s. Primitive, see Syphilis.

Syph'ilis Pseudosyph'ilis, *Lu'es Syphilo'ides, Pseudosyphilis*. A term given to ulcers or other affections that resemble syphilis, but are indeterminate in their character—the symptoms being irregular in their appearance, and usually yielding spontaneously, or under the use of tonics, change of air, &c. The condition has not been at all well defined. *Sivvens, Radesyge*, &c., have been referred to this head.

Syph'ilis, Sec'ondary, see Syphilis—s. Secundaria, see Syphilis — s. Tertiary, see Syphilis — s. Vaccinal, Vaccino-syphilis.

Syphilisation, Syphilization.

Syphilis'mus, Syphilis.

Syphilit'ic, *Syphilit'icus*, (F.) *Syphilitique, Vérolique, Vérolé*. Belonging or relating to, or affected with, syphilis, (F.) *Syphilisé*.

Syphiliza'tion, *Syphilisa'tio*, (F.) *Syphilisation*. Saturation of the system by inoculation with the matter of syphilis. It has been used as a curative procedure in syphilis, as well as a preventive of that disease, and for the cure of other cachexiæ, as cancer.

Syphiloderm'a, pl. *syphiloder'mata*, gen. *Syphiloderm'atis*, (*syphilis*, and δερμα, 'skin.') A cutaneous eruption of a syphilitic character.

Syphilog''eny, *Syphilogen'ia*, (*syphilis*, and γενναω, 'I generate.') The origin or generation of syphilis.

Syphilog'rapher, (*syphilis*, and γραφω, 'I describe.') A writer on syphilis.

Syphilog'raphy, *Syphilograph'ia, Syphilidography, Syphilidograph'ia*, (*syphilis*, and γραφω, 'I describe.') A description of syphilis.

Syph'iloid, *Syphiloï'des*, (*syphilis*, and ειδος, 'resemblance.') Resembling syphilis; as 'a *syphiloid* affection.'

Syphilol'ogy, *Syphilolog''ia, Syphilodol'ogy, Syphilodolog''ia*, (*syphilis*, and λογος, 'a discourse.') The doctrine of syphilis and its management. A treatise on syphilis.

Syphilo'ma, gen. *Syphilo'matis*, (*syphilis*, and *oma*.) A term given by Wagner to what he regards as a specific syphilitic new formation, having a definite structure of cells and nuclei; just as there is a specific carcinomatous new formation in cancer.

Syphiloma'nia, *Syphilidoma'nia* — vulgarly, *Nod'dle Pox*. A mania, with which some persons are affected, so that they subject themselves to antivenereal treatment, under the erroneous impression that they are affected with syphilis.

Syph'ita, Somnambulism.

Sy'phon, see Siphon.

Syrigmopho'nia, (συριγμος, 'piping,' and φωνη, 'voice.') A piping state of the voice.

Syrig'mus, (συριγμος,) Tinnitus aurium.

Syrin'ga, (from *syrinx*,) Eustachian tube, Fistula, Syringe, Trachea — s. Clysmatica, Syringe (clyster).

Syrin'ga Vulga'ris, *Li'lac vulga'ris, Com'mon Li'lac. Ord.* Oleaceæ. The leaves and fruit are bitter and somewhat acrid, and have been used as tonics and antiperiodics.

Syr'inge, *Syr'inx*, *Syrin'ga, Si'pho, Siphun'culus, Squirt*, (F.) *Seringue*, (from συριγξ, gen. συριγγος, 'a pipe.') A familiar apparatus through which any liquor is injected.

Various forms of syringe are used in medicine and surgery.

Syr'inge, Clys'ter, *Syrin'ga clysmat'ica, Clysantli'um*, (F.) *Clysopompe*. A syringe for administering clysters.

Syr'inge, Cup'ping, Antlia sanguisuga.

Syrin'ges (pl. of *syrinx*) **Aërif'eri,** 'air tubes,' see Bronchia.

Syring'icus, (from *syrinx*,) Fistulous.

Syringi'tis Eusta'chii, (*syringa*, and *itis*,) Inflammation of the Eustachian tube.

Syring'mus, (συριγμος,) Tinnitus aurium.

Syringo'des, (συριγγωδης,) Fistulous.

Syringotome, *Syringot'omus, Syringot'omum*, (*syrinx*, 'fistula,' and τεμνειν, 'to cut.') A surgical instrument, formerly used in the operation for *fistula in ano*. It is a bistoury, concave at its edge, and terminated by a long, flexible, probe-pointed stylet. This stylet or probe was first introduced by the external opening of the fistula into the rectum, whence it was drawn externally through the anus, carrying with it the cutting edge of the instrument, which divided the intermediate parts.

Syringot'omy, *Syringotom'ia*. The operation for fistula in ano by incision.

Syr'inx, gen. *Syrin''gis*, (συριγξ, gen. συριγγος,) Eustachian tube, Fistula, Syringe, Trachea — s. Hiera, Vertebral column.

Syrmais'mus, (from συρμαιζω, 'I evacuate.') A gentle evacuation by vomiting or stool.

Syrop, Sirop.

Syr'up, *Sir'up, Syru'pus* or *Syr'upus, Serapi'-*

um, Serape'um, (F.) *Sirop, Syrop, Saccharolé liquide, Saccharhydrolé,* (derived, according to some, from συρω, 'I draw,' and οπος, 'juice;' but, more probably, from the Arabic *Sirup, Sirab,* or *Scharab,* which signifies 'a potion.') A saturated solution of sugar in water, either simply or united with some vegetable or other principle. Syrups, in general, require two pounds of sugar to the pint, and they are judged to be sufficiently boiled when a portion, taken up in a spoon, flows like oil. In the Pharmacopœia of the United States, it was directed that syrups, whose density is not precisely determined by the process, should have the s.g. 1·261 when boiling, and about 1·319 at ordinary temperatures. Syrups should be kept in small bottles in a cool place. They are chiefly used to render medicines palatable. See Syrupus simplex.

Syr'up of Al'monds, Syrupus amygdalæ — s. Antiscorbutic, Syrupus antiscorbuticus — s. Aromatic, Syrupus aromaticus — s. of Assafœtida, Syrupus assafœtidæ — s. Balsamic, Syrupus tolutanus — s. of Blackberry root, Syrupus rubi — s. of Buckthorn, Syrupus rhamni — s. of Calf's lungs, see Sirop — s. of Capillaire, common, Syrupus simplex — s. of Cinchona with wine, Syrupus de kinâ kinâ cum vino — s. of Cinchonia, Syrupus cinchoniæ — s. Syr'up, Veg''etable, of Velno, (F.) *Sirop végétal de Velno.* (Made of the roots of *burdock* and *dandelion,* leaves of *spearmint, senna, coriander, liquorice, sugar,* and *water.*) It has been prescribed as a eutrophic, especially in syphilis; but, like the syrups of sarsaparilla, is, perhaps, mainly indebted for its efficacy to the sugar. The corrosive chloride of mercury is often added to it.

Syr'up of Vin'egar, Syrupus aceti—s. of Violets, Syrupus violæ—s. of Wild cherry bark, Syrupus pruni Virginianæ.

Syru'pus, S. simplex.

Syru'pus Aca'ciæ, *Syr'up of Gum Ar'abic,* (F.) *Sirop de Gomme.* (*Acaciæ,* ℥ij., *Sacchar.,* ℥xiv., *Aquæ,* f℥viij. Dissolve the gum in the water; add the sugar, dissolve with a gentle heat, and strain. Ph. U. S., 1873.) A good pectoral syrup. Dose, f℥j. to f℥iij.

Syru'pus Ace'ti, *S. Ac''idi Aceto'si, Syr'up of Vin'egar,* (F.) *Sirop de Vinaigre.* (*Aceti,* Oijss., *Sacch. purif.,* ℔iijss. Boil to form a syrup. Ph. E.) It is refrigerant and antiseptic. Dose, f℥j. to f℥ij.

Syru'pus Ac''idi Aceto'si, S. aceti.

Syru'pus Ac''idi Ci'trici, *Syr'up of Cit'ric Ac''id,* (F.) *Sirop d'acide citrique.* (*Acid. citric.* pulv., ℥ij., *Ol. limon.,* ♏iv., *Syrup.,* Oij. Rub the acid and oil with a fluidounce of the syrup; add the rest of the syrup, and dissolve with a gentle heat. Ph. U. S., 1873.) Virtues the same as those of the Syrupus limonis.

Syru'pus Ac''idi Tartar'ici, (F.) *Sirop d'acide Tartarique,* is similarly prepared.

Syru'pus cum Æ'therĕ Sulphu'rico Para'tus, *Syr'up of E'ther,* (F.) *Sirop d'éther.* (Very *Pure sugar,* 1000 p., *Distilled water,* 500 p.; dissolve in the cold, and strain; add *Sulphuric ether,* 48 p. Shake for five or six days, and draw off the limpid syrup. Ph. L.) Properties like those of ether.

Syru'pus Al'lii, *Syr'up of Gar'lic,* (F.) *Sirop d'ail.* (*Allii* recent. concis. et contus., ℥vj., *Acet. destillat.,* Oj., *Sacchar.,* ℥xxiv. Macerate the garlic with f℥x. of the acid, in a glass vessel, for four days; then express the liquid; mix the residue with the remainder of the acid, and express until a pint is obtained by filtration; lastly, introduce the sugar into the clear liquid, and agitate until dissolved. Ph. U. S., 1873.) Use, same as that of garlic. Dose, f℥j. to f℥iv.

Syru'pus Althæ'æ, *S. ex Althæ'â* seu *de Althæâ* seu *Althæ'æ officina'lis, Syr'up of Marsh'mallow,* (F.) *Sirop de Guimauve.* (*Althææ rad.* recent. cont., ℔ss., *Sacch. pur.,* ℔ij., *Aquæ,* Oiv. Boil the root in the water to one-half, and press out the liquor; when cold, defecate; add the sugar, and boil. Ph. L.) Emollient and demulcent. Dose, f℥j. to f℥iij.

Syru'pus Amo'mi Zingib'eris, S. zingiberis.

Syru'pus Amyg'dalæ, *Syrup of Al'monds, S. of Or'geat, Or'geat,* (F.) *Sirop d'amandes, S. d'orgeat.* (*Amygdal. dulc.,* ℥xij., *Amygdal. amar.,* ℥iv., *Aquæ,* Oiij., *Sacchar.,* ℥lxxij. Blanch the almonds, and rub them in a mortar to a very fine paste, adding, during the trituration, three fluidounces of the water, and a pound of the sugar. Mix the paste thoroughly with the remainder of the water; strain with strong expression; add the remainder of the sugar to the strained liquid, and dissolve it with the aid of a gentle heat. Strain the syrup through muslin, and having allowed it to cool, put it into bottles, well stopped, in a cool place. Ph. U. S., 1873.) Demulcent.

Syru'pus Anticauso'ticus, see Anticausodic.

Syru'pus Antiscorbu'ticus, *S. de Armora'ciâ compos'itus, Antiscorbu'tic Syr'up,* (F.) *Sirop antiscorbutique, S. de Raifort composé.* (*Leaves of Cochlearia, Buckbean, Watercresses, Horseradish root,* and *Bitter oranges,* each ℔j., *Cinnamon,* ℥jss. Cut, and pour on *White wine,* ℔iv. Macerate for two days; distil over Oj. in a sand-bath; add to this *Sugar,* ℔ij., and form a syrup. Again, take what remains in the cucurbit: pass it through cloth; let it rest; decant, and add *Sugar,* ℔ij.;

make into a syrup, and clarify with white of egg. Mix it with the first while yet warm. Ph. P.) Antiscorbutic, alterative, tonic, stomachic, &c. Dose, f℥ij. to f℥ij.

Syru'pus de Armora'ciâ Compos'itus, S. antiscorbuticus.

Syru'pus Aromat'icus, *S. de Artemis'iâ compos'itus, Aromat'ic Syrup, Com'pound Syr'up of Mug'wort*, (F.) *Sirop d'armoise composé.* (*Tops of artemisia vulgaris*, in flower, ℥vj., *Inula root, Ligusticum levisticum*, and *Fennel*, each ℥ss., *Pennyroyal, Catmint, Savine leaves*, each ℥vj., *Marjoram, Hyssop, Pyrethrum, Rue, Basil*, each ℥iij., *Aniseed* and *Cinnamon*, each ℥ix.; bruise and macerate in *Hydromel*, ℔xviij.; distil over Oss.; add to this a pound of *sugar*. Again, take the liquid that remains in the cucurbit, strain it gently; and add *Sugar*, ℔iv. Then mix the two. Ph. P.) Tonic, emmenagogue, &c.

Syru'pus de Artemis'iâ Compos'itus, S. antiscorbuticus — s. Asparagi, see Asparagus.

Syru'pus Auran'tii, *S. Aurantio'rum* seu *Ci'tri Auran'tii* seu *Cor'ticis auran'tii* seu *Auran'tii Cor'ticis* (Ph. U. S.) seu *e Cortic''ibus Aurantio'rum* seu *de Cor'ticĕ Aurantio'rum, Syr'up of Or'ange peel.* (*Aurant. dulc. cort.* pulv., ℥ij., *Magnes. carb.*, ℥ss., *Sacchar.* pulv., ℥xxviij., *Alcohol., Aquæ*, āā q. s. Moisten the peel with alcohol, f℥ss., introduce into a conical percolator, and pour alcohol upon it until f℥vj. of tincture have passed. Evaporate this portion at a temperature not above 120° to f℥ij., add the carbonate of magnesium and sugar, ℥j. Rub them together, gradually adding water, Oss. Filter, add sufficient water to make Oj.; dissolve in it the remainder of the sugar with a gentle heat, and strain. Ph. U. S., 1873.) In the British Pharmacopœia (1867), it is made by mixing *Tincture of orange peel*, f℥j. with *Syrup*, f℥vij. Stomachic. Dose, f℥j. to f℥ij.

A *Syrup of Or'ange Juice, Or'ange Sherbet', Syrupus e Suc'co Aurantio'rum*, may be made by adding *white sugar*, ℔ij., to ℔j. of the juice of oranges, strained and clarified.

Syru'pus Auran'tii Flo'rum, *Syrup of Orange Flowers, S. Aurantii Flo'ris.* (Ph. B., 1867.) (*Aq. Aurant. flor.*, f℥xx., *Sacchar.*, ℥xxxvj. Dissolve the sugar in the water with the aid of a gentle heat. Ph. U. S., 1873.)

Syru'pus Balsam'icus, S. tolutanus.

Syru'pus Cal'cis, *Syr'up of Lime, Sac'charate of Lime, Su'crate of Lime*, is made by adding alcohol to a strong solution of slaked lime in syrup. It was proposed as a substitute for lime-water.

Syru'pus Cal'cis Lactophospha'tis, *Syr'up of Lactophos'phate of Lime.* An unofficinal syrup, variously made; one formula for which includes lactic acid, freshly precipitated phosphate of lime, orange-flower water, and white sugar. See Calcis lactophosphas.

Syru'pus Caryophyl'li Ru'bri, *S. Infusio'nis flo'rum caryophyllo'rum, S. Dian'thi Caryophyl'li, Syr'up of Clove July flower* or *of Clove Pinks.* (*Petalorum dianth., Caryoph.* recent. unguibus resectis, ℔j., *Aquæ bull.*, Oiv., *Sacch. purif.*, ℔vij. Ph. E.) Aromatic.

Syru'pus Cas'siæ Sen'næ, S. sennæ.

Syru'pus de Cicho'rio Compos'itus, *S. de Rhe'o, Com'pound Syrup of Succory*, (F.) *Sirop de chicorée composé, Syrup de Rhubarbe composé.* (*Root of Succory*, ℥vj., *Leaves of succory*, ℥ix., *Leaves of fumitory* and *scolopendrium*, each ℥iij., *Alkekengi berries*, ℥ij. Boil in *water*, Oxiv. to Oxij.; pass through cloth, and dissolve in it *white sugar*, ℔v. Boil till it has the consistence of syrup. Again, take *Water*, Oviij., *Rhubarb*, ℥vj., *Yellow sanders* and *Cinnamon*, each ℥ss. Infuse for twenty-four hours; pass through linen, and add the preceding syrup. Ph. P.) It is laxative and stomachic. Dose, f℥j. to f℥ss.

Syru'pus Cincho'næ cum Vi'no, S. de kinâ kinâ cum vino.

Syru'pus Cincho'niæ, *Syr'up of Cincho'nia.* (*Simple syrup*, one pound, *Sulphate of cinchonia*, nine grains. Mix.) Six spoonfuls are commonly sufficient to arrest an intermittent.

Syru'pus Ci'tri Auran'tii, S. aurantii — s. Citri medicæ, S. limonum.

Syru'pus Coc'ci. *Syrup of Cochineal'.* (*Cocc.* cont., ℈iv., *Aq. destillat. bullient.*, Oj. [Imp. meas.], *Sacchar.*, ℔iij. vel q. s., *Sp. rectificat.*, f℥ijss. vel q. s. Ph. L.) Chiefly used as a coloring agent.

Syru'pus cum Codei'nâ, (F.) *Sirop de Codéine.* The French Codex (1866) has a syrup of codeia, made by dissolving *codeine* in *distilled water*, and adding *white sugar.*

Syru'pus Col'chici Autumna'lis, *S. Colchici, Syr'up of Mead'ow Saf'fron.* (*Rad. colch. autumn.* recent., ℥j., *Acidi acetosi*, f℥xvi., *Sacch. pur.*, ℥xxvj. Macerate the root in the vinegar for two days, occasionally shaking the vessel; then strain with gentle expression. To the strained fluid add the sugar, and boil to a syrup. Ph. E.) Diuretic, antiarthritic. Dose, f℥j. to f℥ss. or more.

Syru'pus Cor'ticis Auran'tii, S. aurantii — s. e Succo citronum, S. limonum.

Syru'pus Cro'ci, *Syrup of Saf'fron*, (F.) *Sirop de Safran.* (*Croci stigmat.*, ℥j., *Aquæ fervent.*, Oj., *Sacch. purif.*, ℔ijss. Ph. L.) Cardiac. Chiefly used for coloring.

Syru'pus Diaco'dion, Diacodium — s. Dianthi caryophylli, S. caryophylli rubri.

Syru'pus Emeti'næ, *Syrup of Em'etine.* (*Simple syrup*, ℔j., *Emetine*, gr. xvj.) In small doses, expectorant, and in large, emetic.

Syru'pus Empyreumat'icus, Molasses — s. Ferri iodidi, Liquor ferri iodidi — s. Ferri phosphatis, see Ferri phosphas — s. Fuscus, Molasses.

Syru'pus Hemides'mi, *Syrup of In'dian Sarsaparilla, Syr'up of Hemides'mus.* (*Hemidesm.* cont., ℥iv., *Aq. destillat. bullient.*, Oj., *Sacchar. purificat.*, ℥xxviij. Ph. B., 1867.) A weak preparation of hemidesmus. Dose, f℥j.

Syru'pus Hydrar'gyri, Syrupus de mercurio mediante gummi — s. Infusionis florum caryophyllorum, Syrupus caryophylli rubri.

Syru'pus Ipecacuan'hæ, *Syrup of Ipecacuan'ha*, (F.) *Sirop d'Ipécacuanha.* (*Ipecac.* in pulv. crass., ℥j., *Alcohol. dilut.*, Oj., *Sacchar.*, ℔ijss., *Aquæ*, q. s. Macerate the ipecacuanha in the alcohol for fourteen days, and filter. Evaporate the filtered liquor to six fluidounces, again filter, and add sufficient water to make the liquid measure a pint; add the sugar, and evaporate by a water-bath to a proper consistence.) In the Ph. U. S., 1873, it is directed to be made by mixing *Ext. Ipecac. fluid.*, f℥ij., with *Syrup*, f℥xxx. It may also be made by displacement. The French Codex (1866) contains also *Sirop d'Ipécacuanha composé, S. de Desessartz.*

Syru'pus de Jalap'æ, *Syr'up of Jal'ap.* (*Jalapæ* pulv., ℥x., *Sem. coriandr., Fœnicul. dulc.*, āā ℥ss., *Aquæ*, f℥xijss., *Sacch.*, ℥xxv. Ph. P.) Cathartic. Dose, f℥ij. to f℥ss. for children.

Syru'pus de Ki'nâ Ki'nâ cum Vi'no, *S. Cincho'næ cum vi'no, Syrup of Cincho'na with wine*, (F.) *Sirop de quinquina au vin.* (*Cort. cinchonæ officinalis*, ℥ij., *Ext. cinchonæ*, ℥vj., *Vini albi* [*Vin. Lunel.* seu *cujusvis ei similis*], Oj., *Alcohol.* [s. g. ·985 to ·915], f℥j., *Sacchar. alb.*, ℔ijss. Bruise the cinchona; gradually add the alcohol, so as to form a soft mass; pour on the wine; macerate for two days, and strain. Dissolve the extract, add the sugar, and make a syrup. Ph. P.) Dose, f℥ss. to f℥j.

Syru'pus Krame'riæ, *Syrup of Rhat'any.* (F.) *Sirop de Ratanhia.* (*Ext. kramer. fluid.*, f℥xij., *Syrup.* f℥xxiv. Mix them. Ph. U. S., 1873. It may also be made by displacement from *Kramer.* in pulv. crass., ℔j., *Sacchar.*, ℔ijss., *Aquæ*, q. s.)

An adjunct to astringent mixtures; or given in diarrhœa, a teaspoonful to a child.

Syru'pus Lactuca'rii, *Syr'up of Lactuca'rium*, (F.) *Sirop de Thridace.* (*Lactuc.*, ℥j., *Syrup.*, f℥xiv., *Alcohol. dil.*, q. s. Rub the lactucarium with enough of diluted alcohol to give a syrupy consistence. Pass half a pint of tincture by percolation; evaporate, at a heat not above 160°, to f℥ij.; mix with the syrup previously heated, and strain, while hot. Ph. U. S., 1873.) Anodyne; but not of much efficacy.

Syru'pus Limo'nis, S. limonum—s. Succi limonis, S. limonum.

Syru'pus Limo'num, *S. Limo'nis* (Ph. U. S.) seu *citri med'icæ* seu *e suc'co citro'num* seu *e suc'co limo'num* seu *suc'ci limo'nis*, *Syrup of Lem'on*, *Lemon Syrup*, (F.) *Sirop de Limon.* (*Limon. succ.* colat., Oj., *Sacchar.*, ℥xlviij., *Aquæ*, Oj. Mix, dissolve, and strain.) Cooling and agreeable.

Syru'pus e Meco'nio, S. papaveris — s. de Melle, Mellitum simplex.

Syru'pus Mercu'rio Median'tē Gum'mi, *S. Hydrar'gyri*, *Mercu'rius gummo'sus Pleuck''ii*, (F.) *Sirop de Mercure*, *Mercure gommeux de Pleuck.* (*Hydrargyri pur.*, ℥j., *Gum. acaciæ*, ℥iij., *Syrup. diacod.*, ℥ss. Rub together till the mercury is extinguished. Ph. P.) Possesses the properties of blue pill. Dose, gr. ij. to viij. or more.

Syru'pus Mo'ri, *S. e suc'co muro'rum* seu *suc'ci mo'ri*, *Syr'up of Mulberries*, (F.) *Sirop de mûres.* (*Mori succ.* colat., Oj., *Sacchar. purif.*, ℔ij. Ph. L.) Gratefully refrigerant.

Syru'pus e Suc'co-Moro'rum, S. mori.

Syru'pus Mor'phiæ Aceta'tis, *Syrup of ac''etate of mor'phia.* (*Liq. morphiæ acet.*, f℥j., *Syrup.*, f℥xv. Ph. D.) Dose, f℥ss. to f℥j., as an opiate.

Syru'pus Mor'phiæ Muria'tis, *Syr'up of mu'riate* or *hydrochlorate of mor'phia.* (*Liq. morph. muriat.*, f℥j., *Syrup.*, f℥xvij. M. Ph. D.) Dose, f℥ss. to f℥j., as an opiate. A formula for *Sirop de Chlorhydrate de morphine*, *Sirop de morphine*, is given in the French Codex (1866).

Syru'pus Mor'phiæ Sulpha'tis may be made in the same way.

Syru'pus Ni'ger, Molasses—s. Opii, see Syrupus papaveris.

Syru'pus Papav'eris, *S. papaveris somnif'eri* seu *papaveris al'bi* seu *e meco'nio* seu *de meconio*, *Diaco'dium*, *Syr'up of pop'pies*, (F.) *Sirop de pavots blancs* ou *diacode.* (*Papav. capsul.* exsiccat. et contus. exemptis seminibus, ℥xxxvj., *Spirit. rectificat.*, f℥xvj., *Sacchar. purificat.*, ℔iv., *Aquæ destillat. bullient.*, q. s.) A process for its preparation is given in the Ph. B., 1867.

The Dublin college had a Syru'pus O'pii, called *Com'mon Syr'up of Pop'pies*, which was made by dissolving 18 grains of the *Watery Extract of Opium* in 18 ounces of boiling water. Properties those of opium and syrup.

A *Syrup of Opium*, *Sirop d'Opium*, is officinal in the French Codex (1866).

Syru'pus de Papav'ere Errat'ico, S. rhœados — s. de Pomis compositus, see S. sennæ — s. Proteæ, see Protea mellifera.

Syru'pus Pru'ni Virginia'næ, *Syrup of Wild cherry bark.* (*Prunī Virginian.* in pulv. crass., ℥v., *Sacchar.*, ℥xxviij., *Aquæ*, q. s. Moisten the bark with water; let it stand for 24 hours; transfer it to a percolator; pour water gradually upon it, until a pint of filtered liquor has passed. Add the sugar in a bottle, and dissolve by agitation. Ph. U. S.) Dose, as a demulcent expectorant, f℥j. to f℥iij.

Syru'pus e Pulmon'ibus Vituli'nis, see Sirop.

Syru'pus Qui'niæ, *Syr'up of Qui'nia.* (*Simple syrup*, 2 pints, *Sulphate of quinia*, 64 grains.) Six spoonfuls are commonly sufficient to arrest an intermittent.

Syru'pus e Quin'quē Radi'cibus, *Syr'up of five roots*, (F.) *Sirop des cinq racines*, *S. diurétique.* (*Rad. Apii*, *Fœniculi*, *Apii petroselini*, āā ℥v. Infuse for 24 hours in boiling water, Oijss., and strain. Add *Rad. asparag.*, *Rusci aculeati*, āā ℥v., *Aquæ*, Ovij. Boil and reduce to half; adding, towards the end, the residue of the preceding infusion. Boil again for some minutes; strain, and add *White sugar*, ℔vj. Ph. P.) Aperient and diuretic. Used in obstructions of the liver, spleen, and mesentery; and in dropsy, &c. Dose, f℥ss. to f℥j. or more.

Syru'pus Rham'ni, *S. Rhamni cathar'tici* seu *de Spi'nâ cervi'nâ* seu *spi'næ cervi'næ*, *Syr'up of Buck'thorn*, (F.) *Sirop de nerprun.* (*Rhamn. succ.*, Oiv., *Zingib.* concis., *Pimentæ* contrit., āā ℥ß, *Sacch. purif.*, ℔v., or q. s., *Spirit rectificat.*, f℥vj.) The process for its preparation is given in Ph. B., 1867. Cathartic, but apt to gripe. Dose, f℥iv. to f℥ij.

A factitious syrup has been made of aloes, dissolved in simple syrup.

Syru'pus Rhe'i, *Syr'up of Rhu'barb.* (*Rhei* in pulv. crass., ℥ij., *Alcohol.*, Oss., *Aquæ*, Ojss., *Sacchar.*, ℔ij. Mix the alcohol and water; pour f℥iv. on the rhubarb, mixed with an equal bulk of sand, and allow the whole to stand four hours; put the mass into a percolator, and gradually pour on the alcohol and water. By means of a water-bath, evaporate to f℥xiij., add the sugar, and make a syrup. Ph. U. S., 1851.) In the Ph. U. S. for 1873, it is made by mixing *Ext. Rhei fluid.*, f℥iij., with *Syrup*, f℥xxix. Dose to a child, as a laxative, one or two teaspoonfuls.

Syru'pus Rhe'i Aromat'icus, *Aromat'ic* or *Spiced Syr'up of Rhu'barb.* (*Rhei* pulv., ℥ijss., *Caryophyl.* pulv., *Cinnam.* pulv., āā ℥ss., *Myrist.* pulv., ℥ij., *Alcohol. dilut.*, q. s., *Syrup.*, Ovj. Mix the powders, and, having moistened the mixture with f℥ij. of the alcohol, introduce it into a conical percolator, and pour diluted alcohol until a pint of tincture has passed. Add this to the syrup, previously heated, and mix thoroughly.) The aromatic syrup of rhubarb is a gentle carminative cathartic. Dose to a child, f℥j.; to an adult, f℥j.

Syru'pus de Rhe'o, Syrupus de cichorio compositus.

Syru'pus Rhœ'ados, *S. de papav'erē errat'ico* seu *papaveris erratici*, *Syr'up of Red Pop'py*, (F.) *Sirop de coquelicot.* The Ph. B. (1867) has a formula for the preparation of this syrup from fresh *red poppy petals*, *refined sugar*, *distilled water*, and *rectified spirit.* Dose, f℥j.

Syru'pus Ro'sæ, *S. rosa'rum soluti'vus* seu *e ro'sis sic'cis* seu *ro'sæ centifo'liæ* seu *rosa'ceus soluti'vus*, *Syr'up of Ro'ses*, (F.) *Sirop de roses pâles.* A formula for this syrup was given in an earlier edition of the London Pharmacopœia. Gently laxative. Dose, f℥ij. to f℥ijss. or more.

Syru'pus Ro'sæ Gal'licæ, *Syr'up of Red Ro'ses*, (F.) *Sirop de roses rouges.* Made by moistening *red rose*, in powder, with *diluted alcohol*, and, in a percolator, pouring on diluted alcohol until a certain portion of the tincture has passed; evaporating this to a certain point, and adding *water*; then, having added the sugar, dissolving it with a gentle heat. (Ph. U. S., 1873.) Mildly astringent. Added to stomachic infusions.

Syru'pus Ru'bi, *Syrup of Black'berry Root.* In the Ph. U. S. (1873) it is directed to be made by mixing *fluid extract of blackberry*, Oss., with *syrup*, Ojss. In that of 1863, it was made by percolation. Gently astringent, and used as an addition to prescriptions for diarrhœa of children.

Syru'pus Sac'chari, S. simplex — s. Sarsæ, S. sarsaparillæ.

Syru'pus Sarsaparil'læ, *S. Sar'sæ*, *S. Sar'zæ*, *Syr'up of Sarsaparil'la*, (F.) *Sirop de Salsepareille.* (*Rad. Sarsap.* cont., ℔j., *Aquæ bullient.*, cong., *Sacch. purif.*, ℔j. Macerate the root for 24 hours; boil to Oiv. Strain while hot; add the

sugar, and boil. Ph. L.) Used in the same cases as the root. Dose, f℥j. to f℥iv. and more.

Syru'pus de Sarsaparil'lâ et Sen'nâ Compos'itus, *Com'pound Syr'up of Sarsaparil'la and Sen'na*, (F.) *Sirop de Caisinier*. (*Rad. Sarsap.* concis., ℔ij. Infuse for 24 hours in *Warm water*, Oxij.; boil for a quarter of an hour; pass with expression, and boil again the residuum in Ox. of water. Reduce this to Ovj., and repeat the operation 2 or 3 times. Mix all the liquors and boil them together with *Flowers of borage, White roses, Senna leaves*, and *Aniseed*, each ℥ij.; reduce to half; pass, and add *Honey*, ℔ij. Boil to a syrup. Ph. P.) It is considered to be alterant, depurative, and sudorific. Dose, f℥ss. to f℥ij. Corrosive chloride of mercury is sometimes added to it.

A similar syrup, under the name Syrupus Sarsaparil'læ Compos'itus, *Com'pound Syr'up of Sarsaparil'la*, (F.) *Sirop de Salsepareille Composé*, is directed in the Pharmacopœia of the United States. (*Sarsaparill.* pulv., ℔ij., *Lign. guaiac.* pulv., ℥iij., *Rosæ centifol., Sennæ, Glycyrrhiz.*, ää ℥ij., *Ol. Sassafras, Ol. Anisi*, ää ♏v., *Ol. Gaultheriæ*, ♏ij., *Aquæ*, Oj., *Alcohol. dilut.*, q. s., *Sacchar.*, ℔viij. Mix the solid ingredients, except the sugar, with Oiij. of diluted alcohol, and let it stand for four days; add in a percolator diluted alcohol until Ovj. of tincture have passed. Evaporate to Oiij., add water, filter, add the sugar, dissolve with aid of heat, and strain while hot. Rub the oils with a small portion of the solution, and mix thoroughly with the remainder. Ph. U. S., 1873.)

A syrup under the name of *Rob antisyphilit'icum de Laffecteur*, (F.) *Rob* ou *sirop antisyphilitique de Laffecteur*, although a secret preparation, has been much used on the continent of Europe. Numerous formulæ have been given for making it. Bouchardat makes it of *sarsaparilla, senna leaves, aniseed, cinnamon, syrup of elder, sugar*, and *water*.

Syru'pus Sar'zæ, S. sarsaparillæ.

Syru'pus de Scammo'nio, *Syr'up of Scam'mony*. (*Pulv. scammon.*, ℥ss., *Sacch. alb.*, ℥iv., *Alcohol.*, — s. g. ·935 to ·915,— f℥viij. Heat the mixture moderately, then set fire to the alcohol with a lighted taper, and agitate constantly, until the flame is extinguished. Suffer it to cool, pass through cloth, and add *Syrup of violets*, f℥iv. Ph. P.) Each f℥j. contains 20 grains of scammony. Cathartic. Dose, f℥j. to f℥ss.

Syru'pus Scil'læ, *S. scillit'icus* seu *scil'læ marit'imæ, Syrup of squills*. (*Acet. scillæ.*, Oj., *Sacch.*, ℔ij. Dissolve and strain. Ph. U. S., 1873.) Diuretic, expectorant, and emetic. Used in the same cases as the oxymel.

Syru'pus Scil'læ Compos'itus, *Mel Scil'læ Compos'itum, Com'pound honey of squill, Com'pound syrup of squill, Hive syrup*. (*Scillæ* pulv., *Senegæ* pulv., ää ℥iv., *Antim. et Potass. Tart.*, gr. xlviij., *Sacchar.*, ℔iijss., *Alcohol. dilut., Aquæ*, ää q. s. Mix the squill and seneka, moisten the mixture with half a pint of diluted alcohol, let it stand for four days, then by percolation with diluted alcohol obtain a pint of tincture. Boil this for a few minutes, evaporate by means of a water-bath to half a pint, add f℥xiv. of boiling water, and filter. Dissolve in this the sugar, heat to the boiling point, and strain while hot. Dissolve in it while still hot the tartrate, and add enough boiling water through the strainer to make three pints, and mix the whole thoroughly together.)

It is often given as an emetic in cases of croup, and in catarrh, especially in children. Dose, to infants, 10 drops to a drachm, repeated every 15 minutes, if vomiting be desirable.

Syru'pus Sen'egæ, *Syrup of Sen'eka*. (*Senegæ* pulv., ℥iv., *Sacchar.* pulv., ℥xv., *Alcohol. dilut.*, Oij. Made by percolation, evaporation, &c. Ph. U. S., 1873.)

This is a favorite stimulant expectorant with many practitioners. Dose, f℥j. or f℥ij.

Syru'pus Sen'næ, *S. cas'siæ sen'næ, Syrup of Sen'na*. (*Sennæ*, ℥ij., *Sem. fœnicul.* cont., ℥j., *Sacch. pur.*, ℥xv., *Aquæ bullient.*, Oj. Macerate the senna leaves and fennel seeds with a gentle heat for an hour, strain, add the sugar, and make into a syrup.) Cathartic. Dose, f℥ij. to f℥jss. or more.

The Parisian Codex formerly had a *Syrupus de Sennâ* of a compound character, called *Syrupus de po'mis compos'itus*, (F.) *Sirop de pommes composé*. It contains also borage, bugloss, &c. Dose, f℥ss. to f℥ij.

Syru'pus Sim'plex, *Syru'pus*, (Ph. U. S.,) *S. sacchari, Saccharum clarifica'tum, Liqua'rium, Sim'ple syrup, Syr'up, Com'mon syrup of capillaire*. (*Sacchar.* pulv., ℥xxxvj., *Aquæ destillat.*, q. s. Dissolve the sugar by heat in f℥xx. of the water, raise the temperature to the boiling point, and strain while hot. Incorporate with the solution sufficient distilled water through the strainer to make the syrup measure Oij., f℥xij., or weigh ℥lv. Ph. U. S., 1873.) Syrup thus prepared has the specific gravity 1·317. The Ph. B. (1867) has a different formula. Used to cover nauseous tastes, &c.

Syru'pus de Spi'nâ Cervi'nâ, Syrupus rhamni — s. de Stœchade communis, see Lavandula.

Syru'pus Toluta'nus, *S. Tolnta'ni* seu *toluif'eræ bal'sami* seu *balsam'icus, Balsam'ic syrup, Syr'up of Tolu*, (F.) *Sirop de Baume de Tolu*. (*Tinct. Tolut.*, f℥ij., *Aquæ*, Oj., *Sacchar.*, ℥xxvj., *Magnes. carb.*, gr. cxx. Rub the tincture with the carbonate and ℥ij. of sugar, and then with the water; filter, add remainder of sugar, dissolve and strain. Ph. U. S., 1873.) Used as a demulcent and to give flavor.

Syru'pus Vi'olæ, *S. violæ odora'tæ, S. viola'rum, S. e suc'co viola'rum, Syrup of violets*. (*Flor. recent. viol. odorat.*, ℔ij., *Aq. bull.*, Oviij., *Sacch. pur.*, ℔xv. Maceratc in a covercd vessel for 24 hours, pass without expression through linen, add the sugar so as to form a syrup. Ph. E.) Very gently laxative. Dose, f℥j. to f℥j.

Syru'pus e Suc'co Viola'rum, S. violæ.

Syru'pus Zingib'eris, *S. amo'mi zingiberis, Syrup of gin'ger*, (F.) *Sirop de gingembre*. (*Extract. Zingib. Fluid.*, f℥j., *Aquæ*, f℥xlij., *Sacchar.*, ℥lxxij., *Magnes. carb.*, gr. clx. Made like syrupus senegæ. Ph. U. S., 1873.) Excitant. Dose, f℥j. to f℥ss.

Sys, as a prefix, like *Sym*.

Sysomiens, (*sys*, and *σωμα*, 'body.') A family of double monsters, of I. G. St. Hilaire, characterized by the union or fusion of two bodies surmounted by heads completely separate.

Syspa'sia, (*συσπασις*, from *συσπαω*, — *sys*, and *σπαω*, 'I draw,' — 'I contract.') Clonic spasm, with diminished sensibility and inability of utterance. A genus in Good's nosology, which includes convulsion, epilepsy, and hysteria.

Syspa'sia Convul'sio, Convulsion — s. Epilepsia. Epilepsy — s. Hysteria, Hysteria.

Syssarco'sis, (*sys*, *σαρξ*, gen. *σαρκος*, 'flesh,' and *osis*,) *Commissu'ra os'sium car'nea, Sym'physis os'sium muscula'ris, Connex'io os'sium carno'sa, Carna'tio, Concarna'tio*. Union of bones by means of muscles, such as the union of the os hyoides with the lower jaw, of the scapula with the ribs, &c.

Systal'sis, Systole.

Systal'tic, (*συσταλτικος*,) *Systal'ticus, Peristal'tic*, (*συστελλω*, — *sys*, and *στελλω*, — 'I contract,') (F.) *Systaltique*. A *systaltic motion* in a part is one in

which there is alternate contraction and dilatation. See Systole.

Systat'ica, (from *συνιστημι*, — *sys*, and *ιστημι*, 'I place,' — 'I associate.') Diseases affecting several or all of the sensorial powers simultaneously; irritation or inertness of mind extending to the muscles or external senses, or of the muscles or external senses extending to the mind — the 4th order, class *Neurotica*, of Good.

Sys'tem, *Syste'ma*, (*συστημα*, from *sys*, and *ιστημι*, 'I place,') (F.) *Système*. This word, taken in a good sense, means the collection and arrangement of different matters having an analogy to each other, or working towards the same end. In natural history, it means a methodical arrangement of objects for the purpose of facilitating their study. System is, however, sometimes used in an unfavorable sense in physical science, and often means a purely gratuitous supposition, by which the march of nature is attempted to be universally explained, and to which everything is made to bend. In anatomy, system is an assemblage of organs composed of the same tissues and intended for similar functions — for instance, the *nervous system*, *muscular system*, &c.

Syste'ma, gen. *Syste'matis*, System — s. Vasorum, Vascular system.

Sys'tematism. A method, according to which every fact of a science is collected around an opinion, true or false. One who reduces things to such a method is called a *Sys'tematist*.

Sys'tematist, see Systematism.

Sys'tematol'ogy, *Systematolog''ia*, (*systema*, and *λογος*, 'a discourse.') The doctrine of or a treatise on systems.

Système, System — *s. Vasculaire à sang noir,* see Vascular — *s. Vasculaire à sang rouge,* see Vascular.

System'ic or **Sys'temic.** Belonging to the general system — as '*systemic* circulation' in contradistinction to the '*pulmonic*.'

Sys'tolē, (*συστολη*, from *sys*, and *στελλω*, 'I contract,') *Systal'sis*, *Constric'tio*, *Contrac'tio* seu *Angusta'tio* seu *Submis'sio* seu *Mica'tio cor'dis*. The movement of constriction or contraction of the heart, to give impulse to the blood, or to cause its progression. It is opposed to the *Diastole* of the organ.

Systol'ic or **Sys'tolic,** *Systol'icus*, (F.) *Systolique*. Relating to the systole of the heart, — as 'systolic murmur.'

Sythe, ([Sax.] ɼican, 'to sigh,') Suspirium.

Syzyg'ium Nervo'rum, (*συζυγος*, 'united,' from *sys*, and *ζυγος*, 'a yoke,') Par nervorum.

T.

T-bandage, *T fas'cia*, *Fas'cia T-for'mis* seu *Heliodo'ri*, *Cru'cial Ban'dage*. A bandage shaped like the letter T. It consists of a strip of linen, of variable length and breadth, the middle of which is attached, at right angles, to the extremity of another strip, also of variable length and breadth. When two such strips are attached, at a distance from each other, the bandage is called a *double T*. This bandage is used, principally, for supporting the dressings after the operation for fistula in ano, in discases of the perinæum, groin, anus, &c.

T-Fas'cia, T-bandage.

Tabac, 'tobacco,' Nicotiana tabacum — *t. des Montagnes*, Arnica montana — *t. des Savoyards*, Arnica montana — *t. des Vosges*, Arnica montana.

Taba'ci Fo'lia, Nicotiana tabacum.

Taba'cum, 'tobacco,' Nicotiana tabacum.

Tab'anus, 'the horsefly.' A troublesome fly in the Hudson's Bay territory, called, by the *voyageurs*, *Bulldog*, which makes a perforation like a leechbite, from which it sucks the blood.

Tabardillo (S.). A kind of highly adynamic fever, common in South America.

Tabarzet, Saccharum album.

Tab'asheer, *Tab'aschir*, *Tab'axir*. A substance found in the knots of the bamboo, in the East Indies, as a consequence of a morbid condition of the part. It is distinguished for its great proportion of silicic acid, in combination with a small quantity of mineral and vegetable matters; as well as for its slight refractive property. It has been used in obstruction of the bowels. The sweet juice of the bamboo stalks has also been called *Tabasheer*.

Tabefac'tion, (*tabes*, and *facere*, 'to make,') Emaciation.

Tab'efy, Emaciate.

Tabel'la, *Tab'ula*, *Tabula'tum*, *Lozan'ga*, *Lozan'gia*, *Mor'sulus*, *Morsel'lus*, *Loz'enge*, *Tessel'la*, (F.) *Tablette*, *Losange*. A solid medicine, composed of a powder, sugar, and mucilage, *Electua'rium sol'idum*; and generally shaped like a disk. See Pastil and Troch. The three comprise the *Saccharolés solides*.

Tabel'la, (dim. of *tubula*, 'a table,') Table.

Tabel'læ Absorben'tes, T. de magnesiâ.

Tabel'læ Ac''idi Oxal'ici, *T. ad si'tem*, *Loz'enges of Oxal'ic Ac''id*. (*Acid. oxalic.*, ʒj., *Sacch. alb.*, ʒss., *Ol. limonis*, gtt. xij. seu gtt. xviij. Make into lozenges with *Mucilage of gum tragacanth*. Ph. P.) Lozenges are made in the same way with the citric and tartaric acids. They are refrigerant.

Tabel'læ de Althæ'â, *Loz'enges of Marsh'mallows*. (*Rad. althææ* pulv., ℥jss., *Sacchar. alb.* pulv., ʒivss.; f. massa. Ph. P.) Demulcent; expectorant.

Tabel'læ Antimonia'les Kuncke'lii, *T. de stib'ii sulphure'to*, *Loz'enges of Sul'phuret of Ant'imony*, *Mor'suli antimonia'les* seu *stib'ii* seu *stibia'ti*, *Trochis'ci stibiati*. (*Amygdal. dulc.*, ʒj., *Sacch.*, ℔ss., *Sem. cardam.*, *cinnam.* pulv., *Sulph. antim. præpar.*, āā ʒj.; fiant tabellæ. Ph. P. Each to weigh 10 grains.) Recommended in cutaneous diseases, blennorrhagia, arthritic pains, &c. Dose, 4 or more.

Tabel'læ ad Ardo'rem Ventric'uli, Trochisci carbonatis calcis — t. Cardialgicæ, Trochisci carbonatis calcis.

Tabel'læ de Cat'echu et Magne'sia, *Loz'enges of Cat'echu and Magne'sia*, (F.) *Tablettes de cachou et de magnésie*. (*Catech.* pulv., ʒvj., *Magnes.* p., ʒiv., *Cinnam.* p., ʒiij., *Sacch. alb.*, ℔ss., *G. tragac.*, gr. xij., *Aq. cinnam.*, q. s. ut f. massa. Ph. P. Each to weigh 12 gr.) Antacid, absorbent, and stomachic. Dose, 5 to 10 lozenges.

Tabel'læ Cinchо'næ, *T. de Ki'nâ Ki'nâ*, *Bark Loz'enges*. (*Ext. cinchon.* sicc., ʒss., *Sacch.*, ʒiv., *Cinnam.*, ʒss., *Mucilag. g. trag.*, q. s. ut f. massa. Ph. P.) Tonic.

Tabel'læ de Ci'tro et Diacar'thamo, T. de scammonio et sennâ.

Tabel'læ de Fer'ro, *Steel loz'enges*, *Tab'ulæ*

martia'les seu *instauran'tes* seu *antichlorot'icæ*. (*Ferri limat. porphyriz.*, ℥ss., *Cinnam.* pulv., ʒj., *Sacch.* p., ʒv., *G. trag.* et *Aq. cinnam.*, q. s. ut fiat massa. Each lozenge to weigh 12 gr. Ph. P.) Tonic, stomachic. Dose, 5 to 10.

Aromat'ic loz'enges of steel consist of *sulphate of iron*, with a small proportion of the *Tincture of cantharides*.

Tabel'læ de Ki'nâ Ki'nâ, T. cinchonæ.

Tabel'læ de Magne'siâ, *T. absorben'tes, Magne'sia loz'enges.* (*Magnes.*, ʒj., *Sacchar. alb.*, ℥iv., *Mucil. g. tragac.*, q. s. Ph. P.) Absorbent and antacid.

Tabel'læ de Rhe'o, *Rhu'barb loz'enges.* (*Rhej* p., ℥ss., *Sacch.*, ʒv., *Mucilag. gum. tragac.*, q. s.; f. massa. Each to contain 12 grains. Ph. P.) Stomachic and laxative.

Tabel'læ de Scammo'nio et Sen'nâ Compos'itæ, *T. de ci'tro et diacar'thamo, Com'pound loz'enges of scam'mony and sen'na.* (*Scammon.*, ʒiij., *Sennæ*, ʒivss., *Rhej.*, ʒjss., *Caryoph.*, ʒj., *Corticis limon. confect.*, ʒj., *Sacch.*, ℥vj.; f. massa. Ph. P.) Purgative. Dose, ʒij. to ʒvj. or more.

Tabel'læ ad Si'tem, T. acidi oxalici — t. ad Sodam, Trochisci carbonatis calcis — t. de Stibii sulphureto, T. antimoniales Kunckelii.

Tabel'læ de Sul'phure Sim'plices, *Sim'ple sul'phur loz'enges*, (F.) *Tablettes de Soufre.* (*Sulphur lot.*, ℥ss., *Sacch.*, ℥iv., *Muc. g. tragac.* cum aquâ rosâ præpar., q. s. Ph. P.) Expectorant, demulcent, &c. Used in diseases of the chest, and in cutaneous affections. Dose, a lozenge.

Tabel'læ de Sul'phurē Compos'itæ, *Com'pound sul'phur loz'enges* (*Sulph. lot.*, ʒij., *Acid. benzoic.*, gr. xij., *Rad. irid.* p., ℥ss., *Ol. anisi*, gtt. viij., *Sacch.*, ℥vss., *G. trag.*, q. s. Ph. P.) Aperient, expectorant, and stimulant. [?] Dose, 4 a day.

Taber'na Med'ica, (*taberna*, 'a shop,') Pharmacopolium.

Tabernæmonta'na U'tilis, (after Tabernæmontanus, a German botanist.) A tree of British Guiana, of the *family* Apocynaceæ, called by the natives *Hya-Hya*, the bark and pith of which yield a milk which is used by the savages as a refreshing drink.

Ta'bes, gen. *Ta'bis, Maras'mus Ta'bes,* (*tabere*, 'to decay,') *Te'kedon, Apotex'is, Atroph'ia, Tab'idness, Decline, Consump'tion, Wast'ing.* Emaciation of the whole body, with general languor, hectic fever, and, for the most part, depressed spirits.

Ta'bes, Atrophy, Phthisis — t. Coxaria, Ischiophthisis — t. Diabetica, Diabetes mellitus — t. Diuretica, Diabetes mellitus.

Ta'bes Dorsa'lis, *T. Dorsua'lis, Atroph'ia Spina'lis, Maras'mus ta'bes dorsa'lis, Phthi'sis no'tias* seu *dorsa'lis* seu *sic'ca, Myelophthi'sis, Rhaciomyelophthi'sis, Myelatroph'ia, Myelanalo'sis, Ta'bes os'sis sa'cri.* A wasting of the body, attended at first with a pain in the back or loins, and afterwards in the neck or head, sometimes caused, it has been conceived, by too early or too frequent addiction to venery. The term has also been employed synonymously with locomotor ataxy.

Ta'bes Glandula'ris, T. mesenterica, Scrofula — t. Ischiadica, Ischiophthisis — t. Lactea, Atrophia lactantium, see Galactia.

Ta'bes Mesenter'ica, *T. glandula'ris* seu *scrofulo'sa, Atroph'ia mesenter'ica* seu *infan'tum* seu *glandula'ris* seu *infan'tilis* seu *dor'si, Parabys'ma mesenter'ieum, Ma'cies infan'tum, Pædatroph'ia, Scrof'ula* seu *Rachial'gia* seu *Physco'nia mesenterica, Myelophthi'sis sic'ca, Fe'bris hec'tica infan'tum, Phthi'sis mesara'ica, Mesenterophthi'sis, Mesenter'ic disease,* (F.) *Carreau, Chartre, Scrofules* ou *Écrouelles mésentériques, Étisie* ou *Rachialgie* ou *Atrophie* ou *Physconie mésentérique, Entéro-mésentérite, Tubercules des ganglions mésentériques, Phthisie mesentérique.* An engorgement and tubercular degeneration of the mesenteric glands, followed by emaciation and general disorder of the nutritive functions. The disease is often owing to inflammation or irritation of the lining membrane of the intestines, giving occasion to enlargement of the glands of the mesentery — as injury to the upper or lower extremities causes inflammation and enlargement of the lymphatic glands of the axilla and groin. It occurs particularly in children of a scrofulous diathesis, and in those who are weaned too early or fed on indigestible substances. Diarrhœa, emaciation, anorexia, or immoderate appetite, hardness and swelling of the abdomen, and, towards the end, hectic fever, are the chief symptoms of this affection, the prognosis of which is unfavorable. On opening the bodies of those who die of the disease, the mesenteric glands are found disorganized, tubercular, or in a more or less advanced state of suppuration. The treatment is the same as in scrofulosis. Frictions may be added over the abdomen and spine, and mercury given in small doses, so as to excite a new action in the system. The food must be easy of digestion, and the bowels be kept soluble.

Ta'bes Nutri'cum, Atrophia lactantium, see Galactia — t. Ossis sacri, Tabes dorsalis — t. Pectorea, Rachitis — t. Pulmonalis, Phthisis pulmonalis — t. Scrofulosa, T. mesenterica — t. Senum, Marasmus senilis.

Tabes'cerē, (*tabere*, 'to decay,') Emaciate.

Tab'id, *Tab'idus,* (F.) *Tabide.* Relating or appertaining to tabes. Wasted by disease.

Tab'idness, Tabes.

Tabif'ic, *Tabif'icus,* (F.) *Tabifique,* (*tabes,* and *facere*, 'to make.') That which causes consumption or phthisis.

Ta'ble, *Tab'ula, Tabel'la, Tabula'tum, Lam'ina, Pa'ries, Squa'ma.* A name given to the plates of compact tissue which form the bones of the cranium. Of these, one is *external*, the other *internal*, and called *Tab'ula vi'trea,* (F.) *Lame vitrée,* on account of its brittleness.

Tables de Mortalité, Mortality, bills of.

Tab'let, 'a small table,' Trochiscus — t. Votive, Tabula votiva.

Tablette, 'tablet,' Tabella.

Tablettes de Bicarbonate de Soude, see Trochisci sodæ carbonatis — *t. de Bouillon,* Soup, portable — *t. de Cachou,* Trochisci catechu — *t. de Cachou et de Magnésie,* Tabellæ de catechu et magnesiâ — *t. de Chlorate de Potasse,* Trochisci potassæ chloratis — *t. de Magnésie,* Tabellæ de magnesiâ — *t. de Soufre,* Tabellæ de sulphure.

Tablier, 'an apron,' Ventrale cutaneum.

Tabouret, Thlaspi bursa.

Tab'ula, Tabella, Table — t. Vitrea, see Table.

Tab'ula Voti'va, *Vo'tive tab'let.* A tablet hung up as an offering — *anathe'ma* — in the ancient temples by the sick, descriptive of their diseases and mode of cure, or by those who had been preserved from some calamity.

Tab'ulæ Antichlorot'icæ, Tabellæ de ferro — t. Instaurantes, Tabellæ de ferro — t. Martiales, Tabellæ de ferro.

Tabula'tum, (from *tabula,*) Tabella, Table.

Ta'bum, (allied to *tabes,*) Ichor, Sanies, Plague.

Tac, Influenza.

Tacamaha'ca, Fagara octandra — t. Caragna, Caranna.

Tac'ca (Malay name) **Ocean'ica,** see Arrowroot, Tahiti.

Tache (F.), 'spot,' Macula, see Taches — *t. Aveugle,* see Optic nerve.

Tache Cérébrale, Tache méningitique. A red mark or stain, observable, according to M. Trousseau, in a large number of hydrocephalic children when pressure is made on the skin.

Tache Embryonnaire, 'embryonic spot,' *Cu'-*

mulus, C. germinati'vus seu *prolig''erus, A'rea germinati'va, Stratum germinati'vum, Blastostro'ma, Nu'clens cicatric'ulæ* seu *blastoder'matis, Ger'minal cu'mulus, Ger'minal disk.* A name given by M. Coste to a spot seen on the blastoderma about the end of the first week, from which the development of the embryo proceeds.

According to Bischoff, the blastodermic vesicle consists here of a double layer — (F.) *Feuillet* — the upper one the *serous* or *animal*, the lower the *mucous* or *vegetative*, and between these is afterwards formed the *vascular layer.*

Tache Germinative, 'germinal spot,' see Molecule — *t. Jaune,* see Foramen centrale retinæ — *t. Mélanienne,* see Nævus — *t. Méningitique,* Tache cérébrale, Macula meningea — *t. de Naissance,* Nævus — *t. Pigmentaire,* Nævus — *t. Sanguine,* see Nævus.

Taches (pl. of *tache*) ***Hépatiques,*** Chloasma.

Taches Laiteuses, Plaques laiteuses, 'milky spots or patches.' White spots occasionally seen on the heart, and regarded by many pathologists as the results of previous pericarditis.

Taches Lenticulaires, Spots, red — *t. Rouges,* Spots, red — *t. de Rousseur,* Ephelides — *t. de Vin,* Telangeiectasia.

Tacheté de Rousseurs, 'spotted with freckles,' see Ephelides.

Tachom'eter, (*ταχυς,* 'quick,' and *μετρον,* 'measure,') see Hæmatochometer.

Tachycar'dia Strumo'sa, (*ταχυς,* 'quick,' and *καρδια,* 'heart,') see Exophthalmia.

Tachyia'ter, (*ταχυς,* 'quick,' and *ιατρος,* 'a physician,') *Tachyia'trus.* A physician who cures speedily.

Tachyiatri'a, (*ταχυς,* 'quick,' and *ιατρεια,* 'healing.') The art of curing quickly.

Tach'ytomy, *Tachytom'ia,* (*ταχυς,* 'quick,' and *τομη,* 'incision.') The art of cutting or operating rapidly.

Tacitur'nity, *Tacitur'nitas, Si'gē,* (from *tacere, tacitum,* 'to be silent.') State of a person who does not speak. Morbid taciturnity sometimes exists as a symptom of the neuroses, especially of melancholy.

Tact, *Tac'tus,* (from *tangere, tactum,* 'to touch.') A modification of the sense of touch. Passive judgment by the cutaneous nerves regarding bodies exterior to the skin. Tact is passive; touch, active.

Tac'tile, *Tac'tilis.* Relating or appertaining to tact or touch.

Tac'tion, Touch.

Tac'tus, Tact, Touch — t. Dolorificus, Haptodysphoria — t. Eruditus, see Palpation.

Tae, 'toe,' Digitus pedis.

Tæ'da, *Te'da, Dæs,* 'a torch.' A term used for a medicine employed under the form of fumigation, pessary, or troch.

Tæ'nia, *Te'nia, Fas'cia,* (*ταινια,* 'a band, a fillet, a ribbon.') See Bandage. Also, a genus of intestinal worms — *Tapeworms* — characterized by an elongated, flattened, and articulated body, with suctorial oscula on the head. Of this genus three only inhabit the human body — the *Tænia lata,* (see Bothriocephalus latus,) *Tænia solium,* and *Tænia canellata.*

Tæ'nia Acanthot'rias, see Parasites—t. Acephala, Bothriocephalus latus — *t. à Anneaux courts,* Bothriocephalus latus—*t. à Anneaux longs,* Tænia solium — t. Armata, Tænia solium — t. Articulos demittens, Tænia solium—t. Canellata, see Tænia —t. Cœnurus, see Cœnurus — t. Cucurbitina, Tænia solium — t. Dentata, Bothriocephalus latus— t. Elliptica, see Parasites — t. Flavopuncta, see Parasites — t. Grisea, Bothriocephalus latus — t. Hippocampi, Corpora fimbriata — t. Humana armata, Tænia solium — t. Humana inermis, Bothriocephalus latus — t. Hydatigena, Hydatid — t. Lata, Bothriocephalus latus—*t. à Longues articulations,* Tænia solium — t. Lophosoma, see Parasites — t. Medio-canellata, see Parasites, and Worms — t. Membranacea, Bothriocephalus latus —t. Nana, see Worms, and Parasites—t. Nervosa Halleri, Ganglion of Gasser — *t. Non armé,* Bothriocephalus latus—t. Osculis lateralibus geminis, Bothriocephalus latus—t. Osculis lateralibus solitariis, Bothriocephalus latus — t. Osculis marginalibus solitariis, Tænia solium—t. Osculis superficialibus, Bothriocephalus latus—t. Prima, Bothriocephalus latus—*t. Sans épine,* Tænia solium—t. Secunda, Tænia solium.

Tæ'nia Semicircula'ris, *T. striata, Gem'inum cen'trum semicircula're, Lim'bus poste'rior cor'poris stria'ti, Stri'æ cor'neæ* seu *semilunu'res* seu *termina'les, Fræ'nulum no'vum, Fas'cia semicircula'ris,* (F.) *Bandelette des éminences pyriformes* (Ch.), *Bandelette, B. demicirculaire, Lame cornée.* A medullary, grayish, semitransparent layer, situate in the groove that separates the thalamus opticus from the corpus striatum in the lateral ventricle.

Tæ'nia So'lium, (from *solus,* 'alone,' because, at one time, supposed to be always alone,) *T. os'culis marginal'ibus solita'riis* seu *cucurbiti'na* seu *huma'na arma'ta* seu *artic'ulos demit'tens* seu *secun'da, Hal'ysis so'lium, Ver'mis cucurbiti'nus, Lumbri'cus la'tus, So'lium,* (F.) *Ténia sans épine* ou *à longues articulations* ou *à anneaux longs, Ver solitaire* ou *cucurbitin, Long Tapeworm,* has an almost hemispherical, discrete head; an obtuse beak; the neck full anteriorly; all the joints slightly obtuse, the anterior very short; the next almost square, and the rest oblong; the marginal foramina vaguely alternated. The tænia solium is commonly a few feet long; sometimes its length is enormous. It is said to have been met with 600 feet long. It principally inhabits the small intestines, and is not common. Brayera anthelmintica ('kousso'), pumpkin seeds, male fern, and pomegranate root, are among the best remedies. See Parasites and Worms.

Tæ'nia Stria'ta, T. semicircularis—t. Tarini, Lamina cornea—t. Tenella, Bothriocephalus latus — t. Vulgaris, Bothriocephalus latus.

Tæ'niacide, (*tænia,* and *cædere,* 'to kill,') Tæniafuge.

Tæ'niæ Co'li, (pl. of *tænia,* 'a band,') see Colon — t. Longitudinales, see Colon — t. Valsalvæ coli, see Colon — t. Violacea, see Locus cærulcus.

Tæ'niafuge, *Tæ'nifuge, Tæ'niacide, Tæniaf'ugum,* (F.) *Ténifuge,* (*tænia,* and *fugo,* 'I drive off.') A remedy calculated to expel or destroy tænia.

Tæ'nicide, (*tænia,* and *cædere,* 'to kill.') A destroyer of tænia or tapeworm.

Tæ'nifuge, Tæniafuge.

Tæ'niin or **Tæ'nine,** see Hagenia Abyssinica.

Tæni'ola, *Bandelette,* (dim. of *Tænia.*) Used by Gerber for a simple, bandlike, or flat fibre — *Fi'lum tæniafor'mē* — seen under the microscope.

Taffetas Agglutinatif, Sparadrapum adhæsivum — *t. d'Angleterre,* see Sparadrapum adhæsivum—*t. Épispastique,* Sparadrapum vesicatorium — *t. Gommé,* see Sparadrapum adhæsivum — *t. Vésicant,* Sparadrapum vesicatorium.

Taf'ia, Rum.

Tag Al'der, Alnus incana.

Tag Sore. A name popularly given in England to ovine variola.

Tagliacozzi, Opération de, (after G. Tagliacozzi, of Bologna, died 1599,) see Rhinoplasty.

Taie, (from *tegere,* 'to cover,') see Caligo.

Tail'bone, Coccyx.

Taillade, (from *tailler,* 'to cut,') Incision, see Entaille.

Taille, (from *tailler,* 'to cut,') Lithotomy, Stature—*t. Hypogastrique,* Hypogastric operation

of lithotomy, see Lithotomy — *t. Postérieure,* see Lithotomy — *t. Recto-vésicale,* see Lithotomy — *t. par le Rectum,* see Lithotomy — *t. Sus-pubienne,* see Lithotomy.

Takamaha'ka, Fagara octandra.

Take, Attack.

Ta'ken Down, see Attack.

Ta'king, see Contagious.

Tal. A word formerly employed for alkali. It also meant the dung of the peacock.

Talc Earth, Magnesia.

Tal'cum Nephrit'icum, Nephreticus lapis.

Talen'tum, (ταλαντον.) An ancient weight equal to 54 pounds 2 oz. 5 dr. and 24 grains, *Poids de Marc.* See Weights and measures.

Tale'olus, (dim. of *talus,*) Malleolus.

Taliaco'tian Opera'tion, (after *Taliacotius* or *Tagliacozzi,*) Rhinoplasty. See Tagliacozzi.

Tali'num Umbella'tum, see Mistura.

Tal'ipes, (*talipedo,* 'I am weak in the foot,') Kyllosis (Clubfoot) — t. Calcaneo-varus, see Kyllosis — t. Calcaneus, see Kyllosis — t. Equino-valgus, see Kyllosis — t. Equinus, see Kyllosis — t. Valgus, see Kyllosis — t. Varus, see Kyllosis.

Tallahat'ta Springs, see Alabama, mineral waters of.

Tal'low, Bayberry, see Wax, myrtle.

Ta'lo-calca'neal, (*talus,* and *calcaneum.*) Relating to the astragalus and calcaneum; as the *talo-calcaneal* articulation.

Talon, (from *talus,*) see Calcaneum.

Ta'loscaph'oid, *Astrag'alo-scaph'oid, Talo-scaphoï'des,* (*talus,* and *scaphoid.*) Relating or appertaining to the astragalus and scaphoid; as the '*taloscaphoid* ligament.'

Tal'pa, 'a mole,' *Topina'ria, Tupina'ria, Talpa'ria, Testu'do,* (F.) *Taupe.* A tumor situate on the head, which has been supposed to burrow like a mole.

Talpa'ria, Talpa.

Ta'lus, Astragalus, Malleolus, see Calcaneum, Pessary.

Tam'ara Con'ga, Averrhoa carambola.

Tamaræ'a Zec'la, Tamarindus.

Tamarin, Tamarindus.

Tamarin'di Pul'pa, *Pulp of Tam'arinds.* (*Tamarindi,* q. s. Digest them with a small quantity of water, until they become of a uniform consistence; then separate the seeds and filaments by pressing through a hair sieve.)

Tam'arinds, Pulp of, Tamarindi pulpa.

Tamarin'dus, (from [Arab.] *tamar hendi,* 'Indian date,') *T. In'dica, Thamarin'dus, Oxyphæ'nicon, Sil'iqua Arab'ica, Balampul'li, Tamaræ'a zec'la, Oxyphœni'cia, Acacia In'dica, Tam'arind tree,* (F.) *Tamarin. Ord.* Leguminosæ. *Sex. Syst.* Triandria Digynia. The pulp of the tamarind, with the seeds connected by numerous tough strings, *Tamarindus,* (Ph. U. S.,) is exported from the West Indies, preserved in syrup. It is refrigerant and laxative. *Tamarind whey* is made by boiling ℥j. of the pulp with ℔jss. of milk. When strained, it is used as a diluent in fever.

Tamaris'cus, (from *Tamaris,* now *Tambro,* on the borders of the Pyrenees,) Tamarix.

Tam'arix, gen. *Tamari'cis, T. Gal'lica* seu *Peutan'dra, Tamaris'cus.* The *Tam'arisk tree. Ord.* Tamariscineæ. *Sex. Syst.* Pentandria Pentagynia. The bark, wood, and leaves were formerly employed medicinally; — the former for its aperient and corroborant virtues in obstructions of the liver; the latter in icterus, hæmoptysis, and some cutaneous affections.

Tambour, Cavité du, 'cavity of the drum,' Tympanum.

Tam'nus Commu'nis, Tamus communis.

Tam'pa Bay, see Saint Augustine.

Tam'pan. An insect belonging to the group of Acaridæ or Ticks, well known in South Africa, and described by Dr. Livingstone as dreaded by the inhabitants for its bite and the consequences.

Tampon (F.), 'a bung, a plug,' see Plugging.

Tamponnement, Plugging.

Ta'mus seu **Tam'nus Commu'nis,** *Am'pelos melæ'na* (Dioscorides), *Chiro'nia, Gynæcan'thē* seu *Apro'nia* (Pliny), *Bryo'nia ni'gra, Com'mon Black Bry'ony.* The root is diuretic, and has been given as an antilithic. In the herbshops of Europe it is sold as a topical application for removing bruise marks, and in France is called *Herbe aux femmes battues,* 'herb for beaten or bruised women.'

Tanace'tic Ac''id, *Tanis'ic Acid.* Prepared by the distillation of the heads of common tansy. It is deposited in colored crystals, soluble in alcohol and ether. It operates as a vermifuge in the same doses as santonine.

Tanace'tum, *T. vulga'rē, Tana'sia, Athana'sia, Partheni'um vras, Hindheel, Tan'sy,* (F.) *Tanaisie vulgaire, Herbe aux vers, Coq des Jardins. Ord.* Compositæ. *Sex. Syst.* Syngenesia Polygamia. The leaves and flowers of tansy, and the whole herb — *Tanacetum* (Ph. U. S.) — have a peculiar, strong odor, and warm, bitter taste. They are tonic, 'deobstruent,' and anthelmintic. Dose, ℥ss. to ℥j. The infusion is usually drunk as tea.

Tanace'tum Balsami'ta, *T. horten'sē, Balsami'ta mas* seu *vulga'ris* seu *suave'olens* seu *ma'jor, Cos'tus horto'rum, Men'tha Roma'na* seu *Saracen'ica, Cost'mary, A'lecost, Cockmint,* (F.) *Menthe coq, Herbe au coq, Grand Baume.* A fragrant-smelling herb, somewhat resembling mint, and formerly much esteemed as a corroborant, carminative, and emmenagogue.

Tanace'tum Horten'sē, T. balsamita.

Tanace'tum Multiflo'rum. A South African plant, which is used as a tonic, antispasmodic, and anthelmintic. It is given in flatulency, gout, amenorrhœa, and dropsy; but is especially prescribed in cases of ascarides lumbricoïdes and other entozoa. It is administered in the form of powder or infusion; the latter acting also as a diaphoretic and diuretic. It is used likewise as a resolvent and anodyne fomentation.

Tanaisie Vulgaire, Tanacetum.

Tana'sia, Tanacetum.

Tan'gē, (ταγγη, 'rancidity.') A putrescent tumor.

Tanghin'ia, (Madagascar tanghin,) Cerbera tanghin.

Tan'gle, Laminaria digitata — t. Big, Pila marina — t. Blue, Gaylussacia dumosa — t. Sea, Laminaria digitata.

Tani'num, Tanninum.

Tanis'ic Ac''id, Tanacetic acid.

Tanjore Pill, Pilulæ Asiaticæ.

Tanne, see Acne.

Tan'nic Ac''id, Tannin.

Tan'nicum Pu'rum, Tannin.

Tan'nin, ([F.] *tanner,* 'to tan,') *Tan'nicum pu'rum, Tanni'num, Tani'num, Princip'ium Adstrin'gens* seu *Scytodep'sicum* seu *Byrsodep'sicum* seu *Coria'ceum, Scytodep'sium, Mate'ria Scytodeph'ica, Ac''idum Tan'nicum* seu *Scytodeph'icum* seu *Quercitan'nicum, Tan'nic acid,* (F.) *Acide tannique.* A principle obtained from oak bark and other astringent vegetables, so called from its forming the chief agent in the process of *tanning.* Pure tannin, obtained from *galls,* by the action of *ether,* (Ph. U. S.,) has been employed as an excellent and powerful astringent. Dose, two grains, repeated several times a day.

Tan'sy, Tanacetum—t. Maudlin, Achillea ageratum — t. Wild, Potentilla anserina.

Tàofoo, see Casein.

Tapei'nocephal'ic, (ταπεινος, 'low, debased,' and κεφαλη, 'head.') A term applied to skulls, the conformation of which indicates a low type of development.

Ta'per, High, Verbascum nigrum.

Ta'pes, (ταπης, 'a carpet,') Tapetum.

Tape'tum, *Ta'pes, Tape'tē,* (F.) *Tapis,* 'tapestry, a carpet,' see Corpus callosum.

Tape'tum Choroïde'æ, *T. lu'cidum.* A shining spot on the outside of the optic nerve in the eyes of certain animals, which is owing to the absence of the pigmentum nigrum, occasioning the reflection of a portion of the rays from the membrana Ruyschiana. Its use appears to be, by reflecting the rays, to cause a double impression on the retina, and thus add to the intensity of vision.

Tape'tum Alve'oli, *Membra'na exter'na den'tium.* The outer membrane of the teeth. The lining membrane or periosteum of the alveoli.

Tape'tum Lu'cidum, T. choroideæ.

Tape'worm, Tænia—t. Broad, Bothriocephalus latus — t. Long, Tænia solium.

Tapio'ca, see Jatropha manihot — t. Pearl, see Jatropha manihot.

Ta'pis, (from *tapes,* 'a carpet,') Tapetum.

Tap'ping, (from [Sax.] tæppan, 'to broach,' as a cask,) Paracentesis.

Tapsa'ria, Decoctum hordei.

Tap'sus Barba'tus, Verbascum nigrum.

Tar, ([Sax.] tape,) see Pinus sylvestris — t. Barbadoes, Petroleum.

Tar Ac'ne. A form of acne resulting from the application of fluid tar or from the action of the atmosphere impregnated with the vapor of tar.

Tar Beer, see Pinus sylvestris — t. Infusion of, see Pinus sylvestris — t. Mineral, Pissasphaltum — t. Water, see Pinus sylvestris — t. Wine, see Pinus sylvestris.

Ta'ra. An epidemicocontagious disease seen by Gmelin in Siberia, in the town of Tara, which appears to have resembled somewhat the Button Scurvy of Ireland.

Tar'achē, (ταραχη,) *Tarax'is, Tarag'ma, Tarag'mus,* 'disorder.' A disorder of sight which arises from a blow, compression of the eye, or the action of dust, smoke, or other external cause. By some it is understood to signify mild or incipient ophthalmia.

Ταραχη της κοιλιας, 'disturbance of the belly,' Diarrhœa.

Tarag'ma, gen. *Tarag'matis,* (ταραγμα,) Tarache.

Tarag'mus, (ταραγμος,) Tarache.

Tar'agon, Artemisia dracunculus.

Tar'aho, Peltandra Virginica.

Tarantis'mus, *Tarentis'mus, Tarantalis'mus, Dinoma'nia, Chore'a Sanc'ti Valenti'ni, Taren'tulism, Tar'antism,* (from *Tarentum* or *Taranto,* where it was observed.) A feigned or imaginary disease in Apulia, characterized by excessive avidity for dancing at the sound of instruments, and which was ascribed by the vulgar to the bite of the tarantula. A sort of tarantismus, considered peculiar to Africa, and believed to be spontaneous, has been called *Tarentis'mus Tangita'nus, Janon-tarentisme.*

Taran'tula, (same etymon,) *Taren'tula,* (F.) *Tarentule.* A species of spider — the *Ara'nea Taren'tula* of Linnæus, *Lyco'sa Tarentula* of Latreille—whose bite has been looked upon as dangerous. Music has been thought to cure it.

Taras'con, Min'eral Wa'ters of. Chalybeate springs in the department of Arriège, France. They contain iron and carbonic acid.

Tarasp, Wa'ters of. The cold gaseous springs at Tarasp in the Grisons, Switzerland, resemble those of Marienbad, and as resolvents and aperients are useful in plethora of the abdominal viscera, gout, rheumatism, abnormal obesity, and incipient phthisis.

Tarax'aci Ra'dix, Leontodon taraxacum.

Tarax'acum, (from ταρασσειν, 'to disturb or disorder,') Leontodon taraxacum — t. Dens leonis, Leontodon taraxacum.

Tarax'is, (ταραξις,) Tarache, see Ophthalmia.

Tar'chon Sylves'tris, Achillea ptarmica.

Tarentis'mus, Tarantismus — t. Tangitanus, Tarantismus.

Taren'tula, Tarantula.

Taren'tulism, Tarantismus.

Tar'gar, Juniperus communis.

Tari. Palm or cocoa wine, from which sugar was obtained, called *Jagre.* It was once used as a tonic.

Tari'ni Pons, (after the anatomist Tarin,) (F.) *Pont de Tarin.* A cineritious substance, between the corpora albicantia, which unites the crura, and assists in forming the bottom of the third ventricle. The fossa at the bottom of which it is placed is called *Lo'cus perfora'tus posti'cus, Poste'rior per'forated space, Substan'tia* seu *Lam'ina perfora'ta poste'rior.*

Ta'ro, Arum esculentum.

Tarrant's Efferves'cing Selt'zer Ape'rient, see Seltz.

Tar'sal, *Tarsa'lis, Tar'seus,* (from *tarsus,*) (F.) *Tarsien.* That which relates to the tarsus.

Tar'sal Articula'tions result from the union of the bones of the tarsus with each other.

Tar'sal Car'tilages, see Tarsus — t. Cyst, Chalaza — t. Tumor, Chalaza.

Tarsal'gia, (F.) *Arthralgie tarsienne,* (*tarsus,* and αλγος, 'pain.') Pain, gouty or other, in the tarsus.

Tar'sea La'ta (Ligamen'ta). Three ligaments, described by Winslow as stretching from the edge of the orbit to that of the tarsi, with which he thought they formed a complete layer of the eyelids. Zinn could not trace the ligaments all the way to the tarsi; while Haller doubted altogether their ligamentous texture, and Zeis regards them as merely areolar substance.

Tar'seus, Tarsal.

Tarsien, Tarsal.

Tarsometatar'sal, *Tarsometatar'seus.* That which relates to tarsus and metatarsus.

Tarsometatar'sal Articula'tions are those between the bones of the second row of the tarsus and the metatarsal bones. The term *Tarsometatarsal* is likewise applied to ligaments connected with these joints, some of which are *dorsal,* and others *plantar.*

Tarso-métatarsi-phalangien du Pouce, Adductor pollicis pedis — t. *Phalangien du pouce,* Flexor brevis pollicis pedis — t. *Sous-phalangien du petit orteil,* Flexor minimi digiti pedis — t. *Sous-phalangettien du premier orteil,* Flexor brevis pollicis pedis.

Tarsophy'ma, gen. *Tarsophy'matis,* (*tarsus,* and φυμα, 'a tumor.') A swelling of the tarsus.

Tarsor'raphy, *Tarsorraph'ia, Tarsoraph'ia,* (*tarsus,* and ραφη, 'suture.') An operation for diminishing the size of the opening between the eyelids when it is enlarged by surrounding cicatrices.

Tarsot'omy, *Tarsotom'ia,* (*tarsus,* and τομη, 'incision.') The section or removal of the tarsal cartilages.

Tar'sus, (ταρσος,) *Plan'ta pri'ma* seu *Rasse'ta* seu *Rasce'ta pe'dis, Pe'dium, Clavic'ulæ pe'dis no'dus.* 1. The posterior part of the foot. The tarsus consists of 7 bones arranged transversely in two rows, between which amputation is sometimes performed. The *first* or *Tib'ial row,* (F.) *Première rangée, R. jambière,* consists of the astragalus and os calcis; the *second* or *metatar'sal,* (F.) *Seconde rangée, R. métatarsienne,* of the scaphoides, cuboides, and three ossa cuneiformia. 2. The *Tar'si, Tar'sal car'tilages, Tar'sal fibrocartilages, Or'choi* seu *Or'chi, Crepid'ines* seu *Coro'næ* seu *Che'læ* seu *Un'gulæ Palpebra'rum, Thar'si, Cil'ia,* are two small cartilaginous layers, seated in the substance of the free edge of each eyelid. The upper is larger and broader than the lower. Both commence at the bifurcated extremity of the tendon of the orbicularis palpebrarum, and

pass to the opposite commissure of the eyelids. They are broader in the middle than at their extremities.

Tar'tar, (from *tart,* 'acid' [?],) Antimonium tartarizatum (improperly), Potassæ supertartras impurus—t. Calcareous, Potassæ subcarbonas—t. Crystals of, Potassæ supertartras—t. Emetic, Antimonium tartarizatum — t. Salt of, see Potash and Potassæ subcarbonas — t. Soluble, Potassæ tartras, see Potash—t. of the Teeth, Odontolithus.

Tarta'rei Mor'bi. A term employed by Paracelsus to designate certain diseases which he attributed to tartar.

Tar'tari Crystal'li, Potassæ supertartras.

Tartar'ic Ac''id, *Ac''idum tartar'icum* seu *tartaro'sum* seu *tar'tari essentia'lē, A'cor tartar'icus, Sal tar'tari essentia'lē, Tarta'reous ac''id,* (F.) *Acide tartrique.* (*Potassæ bitart.,* ℔ijss., *Aq. destillat. serv.,* cong. iij., *Cretæ ppt.,* ℔j., *Acidi sulph.,* ℔j. Boil the bitartrate with two gallons of the water, and gradually add the prepared chalk until no more bubbles appear; let the tartrate of lime subside; then pour off the fluid, and wash the tartrate of lime with distilled water until it is tasteless. Pour upon it the sulphuric acid, diluted with three pints of the distilled water, boil for half an hour with repeated stirring, and filter through calico; evaporate to sp. gr. 1·21, let it cool, separate crystals of sulphate of lime, evaporate, crystallize, and purify by filtration, etc. Ph. B., 1867.) It is refrigerant and antiseptic, but is chiefly used for making effervescent draughts with soda.

Tartar'ic Lemonade, Tartaric Acid Lemonade, is made by adding syrup of tartaric acid to water.

Tar'tarum, Potassæ supertartras impurus — t. Solubile, Potassæ tartras — t. Vitriolatum, Potassæ sulphas.

Tar'tarus Ammo'niæ, Ammoniæ tartras — t. Chalybeatus, Ferrum tartarizatum — t. Crudus, Potassæ supertartras impurus—t. Dentium, Odontolithus — t. Emeticus, Antimonium tartarizatum — t. Kalicoferricus, Ferrum tartarizatum — t. Kalinus, Potassæ tartras — t. Lixiviæ, Potassæ tartras—t. Martialis, Ferrum tartarizatum—t. Potassæ ferruginosus, Ferrum tartarizatum —t. Stibiatus, Antimonium tartarizatum—t. Subpotassicus, Potassæ supertartras — t. Superpotassicus, Potassæ supertartras — t. Tartarizatus, Potassæ tartras.

Tarton-raire, Passerina tartonraira.

Tartrate d'Ammoniaque, Ammoniæ tartras —*t. Borico-potassique,* see Potassæ supertartras.

Tartre Brut, 'crude tartar,' Potassæ supertartras impurus — *t. Cru,* Potassæ supertartras impurus—*t. des Dents,* Odontolithus—*t. Émétique,* Antimonium tartarizatum — *t. Ferrico-potassique,* Ferrum tartarizatum—*t. Stibié,* Antimonium tartarizatum.

Ta'sis, (ταση,) Extension, Tension.

Taste, (from [F.] *tâter,* [old F.] *taster,* 'to taste, feel,' [G.] t a s t e n, 'to feel,') *Gus'tus, Gev'sis, Gev'ma, Geuth'mos,* (F.) *Goût.* One of the five external senses which instructs us of the savors of bodies, and of which the tongue is the principal organ. *Gusta'tion, Gusta'tio,* is the exercise of this faculty. In disease the taste frequently becomes variously vitiated. The nerves of taste are probably the glossopharyngeal, and, perhaps, also, the lingual branch of the fifth pair. See Savor.

Tatouage, Tattooing.

Tattoo'ing, (F.) *Tatouage.* A practice with the South Sea Islanders of puncturing the skin, and forcing coloring matters into the punctures. Sailors in all countries are in the custom of practising it by rubbing or forcing gunpowder into the punctures. The figures thus formed remain through life.

The process has also been employed surgically, as in cases of opacity of the cornea.

Tatzé. The fruit of *Myrsi'na Africa'na,* a native of Abyssinia, the Cape of Good Hope, the Azores, and Algeria, which is used as a tæniafuge.

Taupe, Talpa.

Taur'in. A substance found in the decomposed bile of the intestines and the muscles of the mollusca.

Tauroch'olic Ac'id, see Cholic acid.

Taurocol'la, (ταυρος, 'a bull,' and κολλα, 'glue.') Glue made of the ears and genitals of the bull. It was formerly much esteemed.

Taur'us, (ταυρος,) Penis, Perinæum. Of old, the lower part of the male organ with the raphe extending to the anus.

Tax'is, (ταξις, 'arrangement,' from τασσω, 'I order,' 'I arrange,') *Reposit''io, Reduc'tio, Syntax'is.* A methodical pressure exerted by the hand on a hernial tumor, for the purpose of reducing it. This operation is generally easy in herniæ that are free from adhesions, of small size, and with a large opening into the sac; but it is very difficult and frequently impracticable in those that are adherent or strangulated. To perform the taxis, the patient should be put in the horizontal posture, and in one in which the parietes of the abdomen are relaxed. The manual procedure varies in each species of hernia. In all cases, too strong pressure of the parts must be avoided; as inflammation and gangrene might be induced. The displaced organs must be pushed into the abdomen, according to the direction of the axis of the hernial sac. The reduction is sometimes favored by bloodletting *ad deliquium;* the warm bath; warm fomentations; tobacco; emollient glysters; and, at times, by cold applications, as ice, &c. In a case of strangulated hernia, should the taxis fail, an operation becomes necessary.

Taxo'dium Dis'tichum, (*taxus,* and ειδος, 'resemblance,') *Cupres'sus dis'ticha, Schuber'tia dis'ticha, Cy'press, Amer'ican* or *Bald Cypress;* indigenous. *Nat. Ord.* Coniferæ. A balsam obtained from it is applied to cuts and wounds. The resin from the cones is diuretic and carminative.

Taxonom'ic, *Taxonom'icus,* (F.) *Taxonomique.* Relating or appertaining to taxonomy or biotaxy.

Taxon'omy, (ταξις, 'order,' and νομος, 'law,') Biotaxy.

Tax'us Bacca'ta, (ταξος,) the *Yew tree, Smi'lax,* (F.) *If. Family,* Coniferæ. *Sex. Syst.* Diœcia Monadelphia. The ancients believed the yew to be poisonous; but the fruit may be eaten without inconvenience. The leaves have been often recommended in epilepsy. The resin obtained from the bark has been called *albir.*

Tax'us Canaden'sis, *Amer'ican Yew, Ground Hem'lock;* indigenous. The leaves are said to be sedative. [?]

Tax'wax, see Nucha.

Tuye, (from [L.] *tego,* 'I cover,') Caligo.

Tay'lor's Rem'edy for Deaf'ness, see Allium.

Tea, Thea — t. Apple, see Apple tea — t. Bahama, Lantana camara — t. Beef, see Beef tea — t. Berried, Gaultheria—t. Blankenheim, see Galeopsis grandiflora — t. Brazil, Lantana pseudothea — t. Tea'berry, Gaultheria.

Teak, Paronychia.

Tear, ([Sax.] *teaɹ*,) *Lac'ryma*, *Lach'ryma*, *Lac'ruma*, *Lac'ruma*, *Da'cry*, *Dac'ryma*, *Dac'cyon*, *Hu'mor lacryma'lis*, *Eye'drop*, *Weep'ingtear*, (F.) *Larme*. An excrementitious humor, secreted by the lachrymal gland, and poured between the globe of the eye and the eyelids, to facilitate the motions of those parts. The tears are saline, inodorous, and colorless. They turn the syrup of violets green; and contain chloride of sodium, with excess of base, phosphates of lime and soda, and albumen, and a special organic matter called *Lac'rymine* and *Thræn'ine*.

In Pharmacology, tear means any gummy or other exudation, the droplike form of which has been considered to resemble tears.

Tear Punc'ta, Lachrymal puneta.

Tears, Deers', Bezoar of the deer.

Teas'el, Cul'tivated, Dipsacus sylvestris.

Teas'ick, (*phthisic*,) Phthisis pulmonalis.

Teat, (*τιτθη*, [Sax.] *tit*,) Nipple.

Teat, Sug'ar. A very objectionable artificial method of feeding infants with powdered sugar crackers in milk or water to form a dough, which is tied up like a ball in a linen rag for the child to suck.

Teaz'el, ([Sax.] *tæɹel*,) Eupatorium perfoliatum.

Te'cedon, (*τηκεδων*,) Phthisis.

Tecnocton'ia, (*τεκνοκτονια*, from *τεκνον*, 'a child,' and *κτειναι*, 'to kill,') Infanticide.

Tecnol'ogy, *Tecol'ogy*, *Tecaolog''ia*, *Tecolog''ia*, (*τεκνον*, and *τεκος*, 'a child,' and *λογος*, 'a discourse.') A treatise on children.

Tecol'ithos, (*τηκω*, 'I dissolve,' and *λιθος*, 'a stone,') Judæus (lapis).

Tecol'ogy, (*τεκος*, 'a child,' and *λογος*, 'a discourse,') Tecnology.

Teco'ma Radi'cans, *Bigno'nia radi'cans*, *Trum'pet flower*, *Trum'pet creep'er*, *Virgin'ia creep'er*. Indigenous; the orange and scarlet flowers appearing in July. *Order*, Bignoniaceæ. The leaves are acrid.

Tecta'ria Calahua'la, see Calagualæ radix—t. Ferruginea, see Calagualæ radix.

Te'da, Tæda.

Teeth, see Tooth — t. Artificial, see Artificial—t. Barred, Barrées (Dents).

Teeth, Block. In dentistry, two or more artificial teeth carved from a piece of ivory, or formed from porcelain paste, afterwards baked and finished.

Teeth, Eye, Canine teeth — t. Incorruptible, see Artificial — t. Jaw, Molar teeth — t. Milk, see Dentition — t. Mineral, see Artificial — t. Neck of the, Collum dentium — t. Plate, Porrigo decalvans — t. Porcelain, see Artificial — t. Serpent, see Serpent teeth — t. Shedding of the, see Dentition — t. Sockets of, see Alveolus — t. Vitreous substance of the, Enamel of the teeth — t. Vitrescent, see Artificial — t. Wisdom, see Dentition — t. Wit, see Dentition.

Teeth'ing, Dentition.

Tege'nera Medicina'lis, Cantharis.

Teg'imen, (*tegere*, *tectum*, 'to cover,') Integument.

Teg'men, Integument.

Tegmen'tum. The upper portion of the main body of peduncular fibres of the cerebrum, composed principally of the fasciculus teres and posterior pyramid.

Tegmen'tum Vasculo'sum. This corresponds, in the ear of birds, to the stria vascularis of the mammalia.

Teg'ula Hiber'nica, 'a tile,' Hibernieus lapis.

Teg'umen, gen. *Tegu'minis*, (*tegere*, *tectum*, 'to cover,') Integument.

Tegument, Integument.

Tegumen'tary, *Tegumenta'rius*, (F.) *Tégumentaire*. Relating or appertaining to the integument.

Tegumen'tum, Integument — t. Auris, see Tympanum — t. Ventriculorum cerebri, Centre, oval, of the brain.

Teigne, (*tinea*,) Pityriasis, Porrigo, Porrigo lupinosa — *t. Achromateuse*, Alopecia — *t. Annulaire*, Porrigo scutulata — *t. en Anneau*, Porrigo scutulata — *t. Faveuse*, Porrigo favosa — *t. Furfuracée*, Porrigo furfurans — *t. Nummulaire*, Porrigo scutulata — *t. Pelade*, Porrigo decalvans — *t. Tondante*, Porrigo decalvans — *t. Tonsurante*, Porrigo decalvans.

Teines'mus, (*τεινεσμος*,) Tenesmus.

Teinodyn'ia, (*τεινειν*, 'to extend,' and *οδυνη*, 'pain.') Pain of the sinews or tendons.

Teinophlogo'sis, (*τεινειν*, 'to extend,' and *φλογωσις*, 'inflammation.') Inflammation of the sinews or tendons.

Teinture, Tincture—*t. Éthérée*, see Æthereal—*t. de Mars Tartarizée*, see Ferrum tartarizatum—*t. Rubéfiante*, Tinctura cantharidis.

Tek'edon, gen. *Teke'donis*, (*τηκεδον*,) Tabes.

Te'la, 'a web,' Texture, Tissue — t. Accidentalis Medullaris, Encephaloid — t. Cavernosa, Cavernous texture — t. Cellulosa, Cellular tissue—t. Choroidea, Choroidea tela — t. Cornea, Corneous tissue—t. Emplastica, Sparadrapum—t. Erectilis, Erectile tissue—t. Fibrosa, see Fibrous—t. Galteri, Sparadrapum Galteri — t. Hippocratis cribrosa, Cellular tissue — t. Hymenochondrodes, Tissue, cartilaginous—t. Hymenochondroides, Tissue, cartilaginous—t. Ichthyocollæ glutinans, see Sparadrapum adhæsivum—t. Inodularis, Tissue, inodular—t. Mucosa, Cellular tissue—t. Organica, Histos—t. Sclerosa, Tissue, sclerous—t. Vesicatoria, Sparadrapum vesicatorium.

Tel'amon, (*τελαμων*,) Habena.

Telamo'nes, (*τελαμωνες*, 'bandages.') Charpie, used for wounds; or linen employed for bandages.

Telangec'tasis, Telangiectasia.

Telangiecta'sia, *Telangiec'tasis*, *Telangec'tasis*, *Angeiotelecta'sia*, *Hæmatotelangio'sis*, *Hæmotelangio'sis*, *Angiecta'sia*, *Anastomo'sis aneurysmat'ica*, (*τηλε*, 'far,' *αγγειον*, 'vessel,' and *εκτασις*, 'dilatation.') Dilatation of far or capillary vessels. Nævus maternus, *Wine spots*, *Claret stains*, (F.) *Taches de Vin*. Aneurism by anastomosis. According to some, fungus hæmatodes. See Hæmatodes fungus.

Telangiecta'sia Oc'uli, Cirsophthalmus.

Teleangeiec'tasis, Telangiectasia.

Teleorgan'ic, (*τελος*, 'end or object,') see Organic.

Teleosclero'sis Rheumat'ica, Scleroderma.

Teleph'ium, (after *Τηλεφος*, *Telephus*, son of Hercules.) *Ulcus telephium*, *Achille'um*, *Tele'phian ul'cer*. The ancients gave this name to any ulcer of a very bad kind, and difficult to cure, because the wound which Achilles inflicted on Telephus degenerated into a similar ulcer.

Teleph'ium, Sedum telephium.

Tellu'rium, (F.) *Tellure*, (from *tellus*, gen. *telluris*, 'the earth.') A metal first met with in the gold mines of Transylvania. It is of a bluish-white color, very volatilizable; specific gravity 6·115; and oxidizable in the air and by heat.

The salts of tellurium occasion the exhalation

of so disagreeable an alliaceous odor from the body, that they have not been much experimented with as therapeutical agents.

Telor'asis, (τηλε, 'far,' and οραω, 'I view,') Presbytia.

Te'lum, 'a dart,' Penis.

Tempe, Temple.

Tem'perament, *Temperamen'tum, Temperatu'ra, Tempera'tio, Tempe'ries,* (from *temporare,* 'to moderate,' originally from *tempus,* gen. *temporis,* 'time,' the great *temperer,*) *Complexi'o, Cra'sis, Eucra'sia.* A name given to the remarkable differences that exist between individuals, in consequence of the variety of relations and proportions between the constituent parts of the body. Thus, of old, it was supposed that, according to the predominance of any one of the four humors then generally admitted,—blood, lymph, bile, and atrabilis, or black bile,—the manifestations of the functions were *tempered* or modified so as to give rise to a *sanguine, lymphatic, choleric,* or *atrabilious* or *melancholic* predominance or temperament. The idea of the existence of certain of these humors has been banished; yet the influence of some, as of the blood, lymph, and bile, is still admitted by many. Too much influence has, doubtless, been assigned to temperament in the sense in which it was formerly, and still is, generally understood, although there can be no question that difference of organization occasions a difference in the activity of organs.

Tem'perament, Bil'ious, Choleric temperament.

Tem'perance, *Temperan'tia, Sophros'ynē, Nephali'otes, Sobri'ctas, Sobri'ety.* Moderation, opposed to gluttony and drunkenness. The advantage of temperance, in a hygienic point of view, requires no comment.

Tempérants, (from *temporare,* 'to mitigate,') Sedatives.

Tempera'tio, Temperament.

Temperatu'ra, Temperament.

Tem'perature, see Heat.

Tempe'ries, Temperament.

Tempes'tas, gen. *Tempesta'tis,* (from *tempus,* 'time,') Season.

Tem'ple, *Tem'pus, Re'gio Tempora'lis, Crot'aphus,* (F.) *Tempe.* A depression, on each side of the head, between the forehead and eye anteriorly, and the ear posteriorly. The *temples,* distinguished into *right* and *left,* correspond to the temporal fossa on each side. (The word is said to be from the Latin *tempus,* 'time,' because in this part the hair first begins to turn white, and to indicate age.)

Tem'poral, *Tempora'lis,* (from *tempus.*) That which relates to the temples.

Tem'poral Aponeuro'sis or Fas'cia is a very strong aponeurosis, of a bluish, shining color, which is attached to the whole of the curved line of the temporal bone; to the posterior edge of the malar bone; to the superior margin of the zygomatic arch; and forms an envelope for the temporal muscle.

Tem'poral Ar'teries, *Crot'aphite Ar'teries,* are several: — I. The *Temporal Artery,* properly so called, arises from the outer side of the superior part of the external carotid. It ascends between the ramus of the jaw, the meatus auditorius externus, and the parotid gland, which covers it as far as the zygomatic arch. Above this it becomes subcutaneous; and, when it has attained the middle of the temporal region, it divides into two branches; the one anterior — *A. tempora'lis fronta'lis* seu *inter'na* seu *ante'rior;* the other posterior — the *A. temporalis occipita'lis* seu *exter'na* seu *superior.* The temporal artery, before its division, gives off—1. Branches to the parotid; to the joint of the lower jaw; to the meatus auditorius, and to the masseter. 2. The *trans'verse artery of the face.* 3. The *mid'dle tem'poral,* which arises beneath the cheekbones, and traverses the temporal aponeurosis immediately beneath that bone. II. The *Deepseated Tem'porals* — *A. tempora'les profun'dæ.* These are two in number. They arise from the internal maxillary, and have been distinguished, from their position, into *anterior* and *posterior.* They send their principal divisions to the temporal muscle.

Tem'poral Bone, *Os tem'poris* seu *tempora'lē* seu *arcua'lē* seu *arma'lē* seu *parieta'lē iufe'rius* seu *crot'aphum* seu *memen'to mo'ri* seu *mendo'sum* seu *crotaphit'icum* seu *lapido'sum,* is seated at the lateral and inferior part of the cranium, of which it forms part; and contains, within it, the special organs of audition. It is usually divided into three portions — 1. The *Squa'mous, Pars squamo'sa, Squa'ma, Lepis'ma, Os lepidoï'des* seu *squamo'sum* seu *squamifor'mē,* (F.) *Portion écailleuse* ou *squameuse.* 2. The *Mas'toid por'tion.* 3. The *Pe'trous por'tion, Pe'trous Proc''ess, Pyr'amis trigo'na, Os lapide'um* seu *lapido'sum* seu *sax'eum* seu *petro'sum* seu *lithoï'des* seu *du'rum* seu *prærup'tæ ru'pi assimila'tum* seu *nerva'lē, Pars petro'sa, P. pyramida'lis os'sis tem'poris,* (F.) *Portion pierreuse, Rocher, Os pétreux, Apophyse pyramidale, A. pétrée.*

It has — 1. An *auric'ular* or *exter'nal face,* on which is a surface that makes part of the temporal fossa; the *zygomatic process;* the *glenoid cavity;* the *fissure of Glaser;* the *meatus auditorius externus;* the *mastoid process;* the *digastric groove;* the *canalis caroticus;* the *jugular fossa;* the *styloid process;* the *stylomastoid foramen,* &c. 2. A *cer'ebral* or *inter'nal sur'face,* which corresponds to the cavity of the cranium, and on which is the *Pars petrosa,* the *hiatus Fallopii,* the *meatus auditorius internus,* the *fissure of the aquæductus vestibuli, a portion of the gutter for the lateral sinus,* &c. 3. A circumference, on which are observed the orifice of the *bony portion of the Eustachian tube,* the *aquæductus cochleæ,* &c. The temporal bone is articulated with the sphenoid, occipital, paricta, malar, and inferior maxillary bones. It is developed from five points of ossification.

Tem'poral Fas'cia, Temporal aponeurosis.

Tem'poral Fos'sa, *Fos'sa tempora'lis,* is an excavation observed at each side of the head. It is filled by the muscle whose name it bears, and is formed by the temporal and sphenoid bones below; by the parietal and frontal above; is separated by a transverse crista from the zygomatic fossa; and completed, before, by the cheekbone.

Tem'poral Mus'cle, *Tempora'lis, Crotaphi'tes,* (F.) *Arcadi-temporo-maxillaire, Temporo-maxillaire* (Ch.), is a broad, flattened, triangular muscle, which fills the temporal fossa. Its fibres are attached to the temporal aponeurosis and fossa; and all converge into a strong tendon, which passes under the zygomatic arch, and is inserted into the coronoid process of the lower jaw. This muscle raises the lower jaw, and applies the teeth against each other.

Tem'poral Nerves. These are distinguished into the *superficial temporal,* furnished by the inferior maxillary branch of the fifth pair, behind the condyle of the jaw; and the *temporales profundi—anterior* and *posterior* — furnished by the same nerve at its exit from the cranium. Sömmering has given the name *temporal* to the divisions sent by the facial nerve to the temporal regions.

Tem'poral Veins were formerly called *Aëtioi Phleb'es, Aq'uilæ Ve'næ.*

Tempora'lis, Temporal.

Tem'poro, (*tempus,* gen. *tem'poris,* 'temple,') in composition, the temple.

Temporoäuriculaire, Attollens aurem.

Temporofa'cial, *Temporofacia'lis.* Belonging to the temple and face.

Tem'porofa'cial Nerve, *Ner'vus temporofacia'lis.* A branch of the facial nerve distributed to the face and temple.

Temporomaxillaire, Temporomaxillary, see Temporal muscle.

Temporomax'illary, *Temporomaxilla'ris,* (F.) *Temporomaxillaire.* That which belongs to the temporal bone and lower jaw.

Temporomax'illary Articula'tion, or joint of the lower jaw, is seated between the glenoid cavity and transverse process of the temporal bone on the one hand, and the condyle of the lower jaw on the other. Two thin cartilages cover the surfaces of these bones. The one is common to the transverse process, and the portion of the glenoid cavity anterior to the fissure of Glaser; the other belongs to the condyle. This articulation is furnished with an interarticular fibrocartilage, two synovial capsules, and two lateral ligaments: the one internal, and the other external.

Temporomax'illary Nerves of Bichat are the divisions of the facial nerve distributed to the temporal and maxillary regions.

Temporopari'etal Su'ture. The suture connecting the temporal and parietal bones, consisting of two parts — the *squamous suture,* and the *parieto-mastoid suture.*

Temps Critique, see Menses.

Tem'pus, gen. *Tem'poris,* 'time,' Temple — t. Intercalare, Apyrexia, Intermission.

Tem'ulence, *Ebri'etas, Ebrios'itas, Methys'mus, Meth'ysis, Temulen'tia, Tem'ulency, Inebria'tion, Intoxica'tion, Drunk'enness;* — from wine, *Œnophlyg''ia, Œnophlyx'is, Vinolen'tia, Vi'nolence,* (F.) *Ivresse,* (from *teme'tum,* 'wine, any intoxicating drink.') Plater gave this name to delirium: Ettmuller, to an apoplectic condition, depending upon drunkenness, the *Apoplex'ia Temulen'ta* or dead-drunkenness. Commonly *Temulentia* is used synonymously with drunkenness — *Me'thē* — and is often employed in the description of diseases to indicate a state resembling drunkenness. *Mania e Temulentiâ* is the same as *Delirium Tremens.* The French use the term *Ivresse* for drunkenness, *Ivrognerie* for habitual drunkenness. *Chron'ic alcohol'ic intoxica'tion* is used in the same sense as the latter.

Temulen'tia, Temulence.

Tenac'ula, pl. of *tenaculum,* Bonenippers — t. Volsella, Forceps (lithotomy).

Tenac'ulum, (*tenax, tenacis,* 'holding fast,' from *teneo,* 'I hold.') A kind of fine hook attached to a handle which is thrust through the parietes of a bloodvessel to draw it out and enable it to be tied.

Tenac'ulum, Assali'ni's. An ingenious instrument, invented by Assalini. It consists of a forceps, or double tenaculum, the points of which are fine, sharp, and bifurcated, so as to be readily received into each other when the instrument is closed on the artery, which it is by a spring. It is of great use when the surgeon has no assistant at hand. (The instrument is figured in S. Cooper's "First Lines.")

Tenaille Incisive, (from *tenacula,*) Bonenippers.

Ténalgie Crépitante, see Aï.

Tenas'mus, Tenesmus.

Ten'dines (pl. of *ten'do*) **Corona'riæ,** Coronary tendons.

Ten'dinous, *Tendino'sus, Tendin'eus, Sin'ewy,* (F.) *Tendineux,* (*tendo,* gen. *ten'dinis,* 'a tendon.') Relating or appertaining to, or having the nature of, tendons.

Ten'dinous Tu'mor. A term used synonymously with fibroid tumor.

Ten'do, gen. *Ten'dinis,* Tendon — t. Achillis, Achillis tendo — t. Cordiformis, Centre, phrenic — t. Cordis venosus, Circulus callosus Halleri — t. Intermedius, Centre, phrenic — t. Oculi, Ligament of Zinn — t. Palpebrarum, see Orbicular muscles.

Ten'don, *Ten'do, Pronerva'tio, Ten'on,* (from *τεινω,* 'I stretch,') *Sin'ew, Thew, Leader,* (Prov.) *Guider.* A fibrous cord, more or less round, long, or flattened; of a white, pearl color, and composed of very close parallel fibres. The tendons are attached to the bones, by one extremity; by the other they receive the insertions of the fleshy fibres: sometimes they afford attachment to fleshy fibres at both ends — as in the digastric muscle. The tendons must be considered as so many cords for transmitting the motion of muscles to the bones or levers.

Tendon d'Achille, Achillis tendo—t. Achillis, Achillis tendo — t. Central or cordiform of the diaphragm, Centre, phrenic.

Ten'don, Tre'foil. The cordiform tendon of the diaphragm. See Centre, phrenic.

Ten'don of Zinn, Ligament of Zinn.

Ten'dons, Twitch'ing of the, Subsultus tendinum.

Teneotom'ia, Tenotomy.

Ténesme, Tenesmus—*t. de l'Œsophage,* Œsophagismus — *t. Vésical,* Bradysuria.

Tenes'mus, *Teines'mus,* (*τεινεσμος,*) *Tenas'mus, Tines'mus,* (from *τεινω,* 'I stretch,') *Proc'tica* seu *Obstipa'tio Tenesmus, Proctospas'mus, Tinag'mus,* (F.) *Ténesme, Épreintes.* Frequent, vain, and painful desires to evacuate; one of the chief symptoms of inflammation of the lining membrane of the digestive tube, as of dysentery.

Used at times, also, for forcing-down pains of the uterus and bladder.

Tenes'mus Vesi'cæ, Bradysuria — t. Vesicæ mucosus, Cystirrhœa.

Tenette, (from [F.] *tenir,* [L.] *teneo,* 'I hold,') see Forceps.

Ténia, Tænia.

Ténifuge, Tæniafuge.

Tennessee', Min'eral Wa'ters of. On the waters of the French Broad River, in this State, is a large, clear, thermal spring. The heat is so great that, on first going into the water, it is almost insupportable. There are calcic chalybeate springs at Montvale, in Blount Co., which have a reputation in chronic diarrhœa and scrofula; and chalybeate waters at Beersheba, in Grundy Co.

Ten'on, (*τενων,* gen. *τενοντος,*) Tendon.

Tenon, Cap'sule of, Fascia of Tenon — t. Fascia of, Fascia of Tenon — t. Membrane of, Fascia of Tenon — t. Space of, see Fascia of Tenon.

Tenoni'tis, (after Tenon.) Inflammation of the capsule of Tenon.

Tenont'agra, (*tenon,* and *αγρα,* 'seizure.') A variety of gout, which affects the tendinous parts of muscles, or the tendinous ligaments which strengthen certain articulations.

Tenontotom'ia, Tenotomy.

Tenontotro'ti, (*tenon,* and *τιτρωσκω,* 'I wound.') They who are wounded in the tendons.

Ténophyte, (*tenon,* and *φυειν,* 'to grow.') A growth of an osseous or cartilaginous nature on a tendon.

Tenor'rhaphy, *Tenorrhaph'ia,* (*τενων,* 'a tendon,' and *ῥαφη,* 'a suture.') Union of a tendon by suture after it has been divided.

Ténosynite Crépitante, see Aï.

Tenosyni'tis, gen. *Tenosyni'tidis, Tenosynovi'tis* [?], (F.) *Ténosynite.* An imperfectly formed term, (*tenon, syn,* and *itis,*) denoting inflammation of the synovial sheath of a tendon. See Aï.

Tenosynovi'tis, (*tenon,* and *synovitis.*) Inflammation of tendons and their sheaths, the result of injury, or of gout, rheumatism, &c.

Ténotome, *Tenot'omus,* (from *tenon,* and *τομη,*

'incision.') An instrument for dividing tendons, especially by the subcutaneous method.

Tenot'omy, *Tenotom'ia, Teneotom'ia, Tenontom'ia, Tenontotom'ia, Sec'tio* seu *Dissec'tio ten'dinum,* (F.) *Ténotomie.* The operation of dividing a tendon, often practised for the removal of loxarthrus, or deviation of the joints, — as in clubfoot.

Tenseur, Tensor — *t. de l'Aponévrose fémorale,* Fascia lata muscle.

Ten'sion, *Ten'sio, Tensu'ra, Ta'sis, Diat'asis, Enton'ia,* (*Entonia* is also used for overtension,) *Conten'sio, Disten'sio,* (from *tendere, tensum,* 'to stretch.') State of a part which is stretched, when its textures are distended by the afflux of fluids, or the accumulation of gas; or when its fibres are drawn, as it were, in an opposite direction, and are, consequently, more resisting than usual.

The tension of the eyeball, *ocular* or *intraocular tension,* varies in degree in health and disease, especially in glaucoma, intraocular tumors, &c.

Ten'sive, *Tensi'vus, Teno'des,* (F.) *Tensif.* Accompanied by tension, or by a feeling of tension, — as a *tensive* pain.

Ten'sor, gen. *Tenso'ris,* (F.) *Tenseur.* That which stretches or renders tense.

Ten'sor Choroïde'æ, Ciliary muscle—t. Palati, Circumflexus musculus.

Ten'sor Tar'si, *Lach'rymal Muscle.* A small muscle belonging to the inner commissure of the eyelids, well described by Professor Horner, of Philadelphia, and hence termed *Mus'cle of Horner.* It is about three lines broad and six long; arises from the posterior flat surface of the os unguis, near its junction with the ethmoid bone, and passes forwards and outwards, lying on the posterior face of the lachrymal ducts. As it approaches the commissure of the lids, it splits into two nearly equal parts, each of which is appropriated to a duct, and inserted along its course, almost to the punctum lacrymale. Its chief office seems to be to influence the position of the punctum lacrymale, and to regulate the course of the tears through the lachrymal ducts.

Ten'sor Tym'pani, *Inter'nus Aur'is, Internus Mal'lei,* (F.) *Salpingo-malléen.* A small muscle which arises from the petrous portion of the temporal bone, and the cartilage of the Eustachian tube, and terminates by a tendon, which is reflected over the processus cochleaformis, and is inserted into the apophysis of the handle of the malleus.

Ten'sor Vagi'næ Fem'oris, Fascia lata muscle.

Tensu'ra, (*tendere, tensum,* 'to stretch,') Tension.

Ten'sus, (*tendere, tensum,* 'to stretch,') Penis.

Tent, *Ten'ta, Turun'da,* and its dim. *Turun'dula, Penic'ulus, Penicil'lus, Penicil'lum, Mo'tos, Lemnis'cus, Licin'ium, Linamen'tum, Priapis'cus, Stylis'cus,* (F.) *Tente, Mèche,* (*tendere, tensum* or *tentum,* 'to stretch.') In surgery, tents are small rolls of lint, of a cylindrical or pyramidal shape, which are introduced into wounds and deep ulcers, to prevent them from closing before they are filled up from the bottom. Tents are sometimes, also, made of prepared sponge, gentian root, slippery elm, &c., &c. They are not so much used as they formerly were; except, perhaps, for dilating the os and cervix uteri. *Tangle tents* — made of *Lamina'ria digita'ta* — are generally used for this purpose.

Tent, Sponge, see Spongia.

Tentacula'ria, Filaria hominis bronchialis.

Tentac'ulum Cerebel'li, (from *tendere, tensum* or *tentum,* 'to stretch,') Tentorium.

Tenta'men Med'icum, 'a medical trial,' (from *tentare,* 'to try.') An examination in medicine, in the Prussian universities, which is conducted both in writing and *vivâ voce* before the dean of the medical faculty.

Tente, Tent — *t. du Cervelet,* Tentorium.

Tenti'go, gen. *Tentig''inis,* (from *tendere, tensum* or *tentum,* 'to stretch,') Priapism—t. Venerea, Nymphomania — t. Veretri, Satyriasis.

Tentipel'lum, (*tendere, tensum* or *tentum,* 'to stretch,' and *pellis,* 'the skin.') Ancient name of a cosmetic, with which, it was pretended, wrinkles could be effaced.

Tento'rium, *T. cerebel'lo superexten'sum, T. cerebel'li, Tentac'ulum cerebel'li, Sep'tum enceph'ali, Diaphrag'ma cer'ebri, Intersep'ta horizonta'lia Pacchio'ni, Proces'sus transver'sus du'ræ ma'tris, Lat'eral proc'esses of the du'ra ma'ter, Transverse septum,* (F.) *Tente du cervelet, Plancher du Cerveau, Septum transverse* (Ch.), (*tendere, tensum* or *tentum,* 'to stretch.') A process of the dura mater, which separates the cerebrum from the cerebellum. It extends from the internal horizontal spine of the occipital bone, directly forwards to the sella Turcica of the sphenoid.

Tento'rium Cerebel'li, Tentorium.

Ten'tum, (from *tendere, tensum* or *tentum,* 'to stretch,') Penis.

Tent'wort, Asplenium ruta muraria.

Ten'uis Ma'ter, Pia mater.

Tenui'tas Aquo'sa, 'watery thinness,' Prædominum aquæ.

Tephro'sia Apolline'a, (τεφρος, 'ash-colored, gray,') *Gale'ga Apolline'a* of Egypt and Nubia. *Order,* Leguminosæ. The leaves are often mixed with senna.

Tephro'sia Purpu'rea, *Gale'ga purpu'rea* of the coast of Coromandel. The root is bitter, and a decoction of it is prescribed by the native doctors in dysentery, lientery, and tympanites.

Tephro'sia Sen'na. The leaves are used for senna by the people of Popayan.

Tephro'sia Toxica'ria, *Gale'ga toxica'ria* of Cayenne. The leaves are used for poisoning fish. It has been suggested as a substitute for digitalis.

Tephro'sia Virginia'na, Galega Virginiana.

Tepida'rium, (*tepidus,* 'moderately warm,') see Stove.

Tep'litz, Töplitz.

Te'ras, gen. *Ter'atis,* (τερας, gen. τερατος,) Monster.

Teratog''eny, *Teratogen'ia,* (*teras,* and γενεσις 'generation.') The formation of monsters.

Teratolog''ical, *Teratolog''icus,* (F.) *Tératologique.* Same etymon as the next. Relating or appertaining to Teratology.

Teratol'ogy, *Teratolog''ia,* (τερατολογια, from *teras,* and λογος, 'a discourse.') A treatise on monsters.

Terato'sis, see Monster.

Ter'ceron, (from [F.] *tierce,* [L.] *tertius,* 'third,') see Mulatto — t. Black, see Mulatto.

Terebdel'lum, (F.) *Terabdelle,* (*teras,* and βδελλα, 'a leech.') A pneumatic machine, which, when connected with a cupping apparatus, largely increases the amount of local depletion. The term is also applied to an instrument for perforating the fœtal cranium. See Terebellum.

Terebel'la, (from τερεω, 'I bore,') Trepan.

Terebel'lum. A name given by Dugès to a perforator, *Perce-crâne,* of his invention.

Terebin'thina, (from τερεβινθος, 'the turpentine tree,') *Tur'pentine, Bo'tin, Al'botin, Altil'ibat, Bruti'no,* (F.) *Térébinthine.* A substance of the consistence of honey, which flows from many trees of the Terebinthinaceæ and Coniferæ families. It is viscid; shining; more or less transparent; inflammable; of a warm, pungent taste; strong smell; and is entirely composed of resin and essential oil, without benzoic acid. It is soluble in alcohol. See Pinus sylvestris. All the turpentines are stimulant, diuretic, and cathar-

tic. *Terebinthina* (Ph. U. S.) is the concrete juice of *Pinus palustris* and other species of *Pinus*.

Terebin'thina Argentoraten'sis, see Pinus picea — t. Balsamea, see Pinus balsamea — t. Canadensis, see Pinus balsamea — t. Chia, see Pistacia terebinthus — t. Communis, see Pinus sylvestris — t. Cypria, see Pistacia terebinthus — t. Empyreumatica, see Pinus sylvestris—t. Laricina, see Pinus larix — t. Veneta, see Pinus larix — t. Vera, see Pistacia terebinthus — t. Vulgaris, see Pinus sylvestris.

Terebin'thinate, *Terebinthina'tus*, (F.) *Térébinthiné, Abiétique.* Having the qualities of or impregnated with turpentine.

Térébinthine, Terebinthina — *t. de Bordeaux*, see Pinus sylvestris—*t. de Chic*, see Pistacia terebinthus — *t. Commune*, see Pinus sylvestris — *t. de Copahu*, Copaiba — *t. d'Égypte*, see Amyris opobalsamum—*t. de Gilead*, see Amyris opobalsamum —*t. du Grand Caire*, see Amyris opobalsamum — *t. de Judée*, see Amyris opobalsamum — *t. de Mélèze*, see Pinus larix — *t. de Vénise*, see Pinus larix.

Térébinthiné, Terebinthinate.

Terebin'thus, (τερεβινθος,) Terminthus — t. Gummifera, Bursera gummifera — t. Lentiscus, Pistacia lentiscus — t. Vulgaris, Pistacia terebinthus.

Ter'ebra, (τρεω, 'I bore,') 'a borer,' Trepan.

Térébrant, see Terebratio.

Terebra'tio, (from *terebrare, terebratum*, 'to bore,') Trepanning. The French use the term *Térébration* for the puncturing of a bone by any instrument, and a pain is said to be *térébrant*, when it seems as if the part was penetrated or bored.

Térébration, see Terebratio.

Tere'do (gen. *Tere'dinis*) **Os'sium,** (τρεω, 'I bore,') Caries, Spina ventosa.

Te'res, gen. *Ter'etis*, ('long and round,' from *tero*, 'I rub;' as if 'rubbed smooth or rounded,') *Stron'gylus, Cylindroi'des.* An epithet given to many organs, the fibres of which are collected into round fasciculi.

Te'res Ligamen'tum, (F.) *Ligament rond.* This name is given to the round ligament in the cotyloid cavity of the os innominatum, which is attached to the head of the bone, and to the bottom of the cavity. It is, also, given to a small fibrous fascia, which extends from the coronoid process of the ulna to below the bicipital tubercle of the radius. Also the round ligament of the uterus.

Te'res Ma'jor, (F.) *Anguli-scapulo-huméral, Scapulo-huméral* (Ch.), *Grand rond*, is situate at the inferior and posterior part of the shoulder. It is attached, on the one hand, to the outer surface of the scapula; to the corresponding part of its axillary margin; and, on the other, to the posterior margin of the bicipital groove of the humerus. It carries the arm backwards and inwards, and carries it, also, inwards in rotation. When it acts with the longissimus dorsi and pectoralis major, it applies the arm against the lateral part of the chest, and keeps it forcibly there.

Te'res Mi'nor, *No'nus hu'meri Placenti'ni*, (F.) *Le plus petit sus-scapulo-trochitérien* (Ch.), *Petit rond, Margini-sus-scapulo-trochitérien*, is situate at the posterior and inferior part of the shoulder; it is narrow and flattened, from above to below, in its inner half; and, from before to behind, in the outer. It is attached, on the one hand, to the outer surface of the scapula, near its inferior angle; and, on the other, to the inferior part of the great tuberosity of the humerus. It depresses the arm, and causes it to turn on its axis from within outwards. It also carries it backwards.

Tere'sis, (τηρησις,) Observation.

Teret'rium, (τερετριον, from τρεω, 'I bore,') Trepan.

Ter'etron, (τερετρον,) Trepan.

Ter'gal, (from *tergum*, 'the back,') Dorsal.

Tergem'ini, Trigemini.

Ter'gum, Dorsum, Vertebral column.

Ter'minal Cav'ities, see Pulmo.

Termina'lia, sec Myrobalanus.

Terminol'ogy, (*termen*, gen. *ter'minis*, 'a term,' and λογος, 'a discourse,') Nomenclature.

Termin'thus, *Terebin'thus*, (τερμινθος, 'the turpentine tree,') *Phy'ma An'thrax Terminthus, Ber'ry* or *Fun'gous car'buncle.* The ancients gave this name to a tumor, surmounted by a black pustule, and resembling the fruit of the turpentine tree.

Termin'thus, Pistacia terebinthus.

Ter'minus ('limit') **Supe'rior As'peræ Arte'riæ,** Larynx.

Termonol'ogy, (*termo*, gen. *termo'nis*, 'a term,' and λογος, 'a discourse,') Nomenclature.

Terms, (periods,) Menses.

Ter'ra Absor'bens Minera'lis, 'absorbent mineral earth,' Magnesiæ carbonas—t. Aluminis, Argilla pura — t. Amara aërata, Magnesiæ carbonas — t. Amara sulphurica, Magnesiæ sulphas — t. Argillacea hydrata, Argilla pura — t. Argillacea pura, Argilla pura—t. Bolaris, Argilla pura — t. Foliata, Sulphur — t. Foliata mineralis, Soda acetata — t. Foliata tartari, Potassæ acetas — t. Fornacum, see Bricks — t. Fullonica, Cimolia purpurescens — t. Japonica, Catechu, Nauclea gambir.

Ter'ra Lem'nia, *Lemp'nias, Argil'la bo'lus fla'va, Lem'nian Earth.* A name given by the ancients to a solid, reddish, astringent substance, prepared with the pulp of the fruit of the Baobab, an African tree, according to Prosper Alpinus. It seems, however, to be an argillaceous earth. It has been employed as an astringent.

Ter'ra Livon'ica. A *terra sigilla'ta* or *sealed earth* from Livonia, redder than that from Silesia, and very astringent.

Ter'ra Mari'ta, Curcuma longa.

Ter'ra Noceria'na. A whitish, soft, and astringent earth, found in the environs of Nocera, in Italy.

Ter'ra Orlea'na, *Pigmen'tum uru'cu, Uru'cu, Annotto, Aruotta*, (F.) *Rocou, Roucou, Bichet.* A pigmental matter obtained from the seeds of *Bix'a Orlea'na* seu *Orella'na* seu *America'na, Orella'na.* In Jamaica, it is recommended in dysentery, and is considered to possess astringent and stomachic qualities. It is called, according to its shape, *Flag, Roll*, or *Egg Annotto.*

Span'ish Annot'to, Bix'a, is in small, oblong cakes. It is chiefly employed as a coloring matter.

Ter'ra Os'sea, *Mate'ria os'sea.* Bony matter. The earthy portion of bones.

Ter'ra Pondero'sa, Baryta — t. Ponderosa muriata, Baryta, muriate of—t. Ponderosa salita, Baryta, muriate of.

Ter'ra Portugal'lica, *Bar'ros, Bucaros.* A reddish, astringent, styptic earth, obtained from Portugal.

Ter'ra Sapona'ria, Cimolia purpurescens.

Ter'ra Sigilla'ta, (*sigillatus*, furnished with little figures — *sigilla*,) *Sealed Earth.* A bole or earthy matter, made into little cakes or flat masses, and stamped with certain impressions, as with the head of the Grand Seignior. To these belong the *Terra Silesi'aca, Terra Lem'nia, T. Tac'cica.* See Bole and Bolus alba.

Ter'ra Silesi'aca, see Terra sigillata—t. Talcosa oxyanthracôdes, Magnesiæ carbonas — t. Turcica, see Terra sigillata.

Ter'ra Uri'næ. The earthy deposit in the urine.

Ter'ra Vitri'oli Dul'cis, Colcothar.

Ter'rapin, Emys palustris.

Terre Bolaire, 'bolar earth,' Bolus — *t. Foliée Minerale,* Sodæ acetas — *t. Foliée de Tartre,* Potassæ acetas—*t. Magnésienne,* Magnesiæ carbonas — *t. Noix,* Bunium bulbocastanum — *t. Pesante,* Baryta — *t. Sigillée,* see Bole.

Terrette, Glechoma hederacea.

Ter'ritory, Cell, see Cell.

Ter'rors, Night, see Night terrors.

Ter'tian Fe'ver, *Fe'bris tertia'na, An'etus tertianus, Tritæ'us, Ter'tian* or *Third Day A'gue, Third Day Fe'ver,* (F.) *Fièvre tierce,* (from *tertius,* 'the third.') An intermittent, whose paroxysms recur every *third* day, or every 48 hours. The *mildest,* and the most *pernicious,* intermittents belong to this head. As a general rule, it is the most manageable form of ague.

A *double tertian,* (F.) *Double tierce* (*Fièvre*), has a paroxysm every day, — the paroxysms of alternate days being associated.

Tertiana'ria, (from its virtues in tertian fever,) Scutellaria galericulata.

Tes'sara, (τεσσαρα, 'four,') Cuboid.

Tessel'la, (dim. of *tessera,* 'a small quadrangular stone for paving,' &c.,) Tabella.

Tess'ellated, *Tesselle'tus,* ('furnished with small quadrangular stones.') Having a quadrangular arrangement, like a pavement. See Epithelium.

Tes'sera, 'a quadrangular stone, wood,' &c. Cuboid.

Test, Dan'iel's, (from *testis,* 'a witness,') see Docimasia pulmonum — t. Hydrostatic, see Docimasia pulmonum — t. Ploucquet's, see Docimasia pulmonum — t. Static, see Docimasia pulmonum.

Test Types. Printed matter in type of various sizes, from the smallest to the largest, employed by the oculist to determine the acuteness of vision.

Tes'ta, 'a shell,' see Ostrea—t. Ovi, see Ovum, Membrana putaminis.

Tes'ta Præpara'ta, *Prepared Oys'tershell.* Oystershell, freed from extraneous matter, washed with boiling water, reduced to powder, and prepared in the same manner as Creta præparata.

Testa'ceous, *Testa'ceus,* (F.) *Testacé,* (from *testa.*) A powder, consisting of burnt shells. These contain carbonate of lime chiefly, and hence the term has been applied to cretaceous substances. See Creta.

Tes'tæ Forna'ceæ, (*fornax,* gen. *forna'cis,* 'a furnace,') Bricks — t. Ostreæ, see Ostrea.

Tes'ter, Lung, see Lung tester.

Tes'tes, (pl. of *testis,* 'a witness.') The Testicles; see Testicle. Vulgarly, the *Stones, Ballocks.* A name, also, given to the inferior tubercles of the corpora quadrigemina, to distinguish them from the superior, called *Nates.*

Tes'tes Cer'ebri, see Quadrigemina tubercula — t. Muliebres, see Ovarium.

Tes'ticle, *Tes'tis, T. viri'lis, Testic'ulus, Or'chis, Po'mum amo'ris, Did'ymus, Androa'rium, Her'nia, Gem'ini, Gemelli, O'vum, Codling,* (F.) *Testicule,* (dim. of *testis,* 'a witness,' because the testicles are 'witnesses' of virility.) The name of two glandular organs, contained in the scrotum, whose office is to secrete sperm. The substance of the testicle, *Pul'pa tes'tis,* consists of numerous conical, flattened lobules—*lob'uli testis* — whose bases are directed towards the surface of the organ, and the apices towards the corpus Highmorianum. They are formed of a gray and softish substance, composed of tortuous canals, called *Tu'buli* seu *Canalic'uli* seu *Duc'tus seminif'eri* seu *semina'les, Vasa semina'lia, Vas'cula serpenti'na,* folded on each other, and of extreme fineness; the number of which, according to the estimate of Monro, is 62,500, and the total length 5208 feet. All these canals, uniting in their course, pass through the corpus Highmorianum, concur in forming the epididymis, and give origin to the vas deferens. The testicles are covered, immediately, by a fibrous membrane, of an opaque white color, and very tough, called *Tu'nica Albugin'ea, Du'ra ma'ter tes'tis,* or, simply, *Albugin'ea, Perites'tis,* (F.) *Pérididyme,* of which the corpus Highmorianum is only an enlargement. See Albuginea. Over this, again, is the tunica vaginalis, the second envelope of the testis. See Vaginal coat of the testicle.

Tes'ticle, Can'cer of, see Sarcocele — t. Cystic Disease of, see Sarcocele — t. Fungus of, benign, Hernia testis — t. Granular Swelling of, Hernia testis — t. Hernia of, Hernia testis.

Tes'ticle, Ir'ritable. Abnormal sensibility of that organ, which is painful on manipulation. It has been termed also *Chron'ic Neural'gia of the testicle.* Castration should never be practised for its relief. See Orchidalgia.

Tes'ticle, Retained, see Crypsorchis — t. Swelled, Hernia humoralis.

Testicon'dus, (*testis,* and *condere,* 'to hide,') Crypsorchis.

Testic'ular, *Testicula'ris,* (F.) *Testiculaire.* Belonging or relating to the testicle.

Testicule, Testicle.

Testic'ulus, Testicle—t. Accessorius, Epididymis — t. Caninus, Orchis mascula.

Testimo'nium Maturita'tis, 'evidence of fitness.' A certificate of complete education, required, in the Prussian universities, of a candidate, before he can be admitted to examination for the degree of Doctor of Medicine.

Tes'tis, Testicle — t. Femineus, Ovary — t. Irritable, Orchidalgia, Testicle, irritable — t. Minor, Prostate—t. Muliebris, Ovary—t. Virilis, Testicle.

Testi'tis, gen. *Testi'tidis,* (from *testis,* and *itis,*) Hernia humoralis.

Testudina'tio Cra'nii, 'arched like the back of a tortoise,' (from *testudo,*) Camarosis.

Testu'do, gen. *Testu'dinis,* (from *testa,* 'a shell,') *Chelo'nē,* (F.) *Tortue.* A genus of reptiles, including the turtle, the flesh of which is much esteemed as an article of diet.

Also, an encysted tumor, which has been supposed to resemble the shell of a testudo; *Emphy'ma encys'tis gan'glion.* See Talpa.

Testu'do Cer'ebri, Fornix — t. Scapulæ, see Scapula.

Tete, (teat,) Nipple.

Tetan'ic, *Tetan'icum, Spas'ticum, Convulsi'vum, Convul'sive,* (F.) *Tétanique,* (from *tetanus.*) A remedy which acts on the nerves, and, through them, on the muscles, occasioning, in large doses, convulsions. The chief agents of this class are *Nux Vomica, Strychnia, Brucia, Arnica,* and *Toxicodendron.* Also, an epithet for a tonic convulsion.

Tetan'illa, (dim. of *tetanus.*) A paroxysmal disease, described by Trousseau as of a rheumatic character, which is preceded by formication, and affects the hands, arms, or lower limbs, unattended with pain or fever. This is the mildest form; but in graver cases, the whole body becomes implicated, and the fingers are said to be invariably drawn up into a cone. Its most frequent causes are diarrhœa and lactation. It has been called, also, *Tet'any, Intermit'tent tet'anus, Idiopath'ic contrac'tion and paral'ysis, Idiopath'ic mus'cular spasm, Contrac'tion of the extrem'ities,* and *Intermit'tent rheumat'ic contrac'tions.*

Tet'anin, Strychnia.

Tet'anine, (from *tetanus.*) A term proposed by Dr. Wm. Farr for the specific poisonous principle by which tetanus is produced.

Teta'nium, Strychnia.

Tetaniza'tion, *Tetanisa'tio.* The production

or condition of tetanic spasms, in which the patient is said to be *tet'anized.*

Tetano'mata, pl. of *tetano'ma,* (*τετανωματα,*) Tetanothra.

Tētanos, Tetanus.

Tetano'thra, pl. of *tetano'thrum,* (*τετανωθρα,*) *Tetano'mata, Erugato'ria,* (from *τετανος,* 'stretched free from wrinkles.') Medicines which remove wrinkles.

Tet'anus, (*τετανος,* 'stretched,' from *τεινω,* 'I stretch,') *Spasm with rigid'ity, Convul'sio In'dica, Holoton'ia, Holoton'icus, Holotet'anus, Tet'anus universa'lis, Ri'gor nervo'sus* seu *nervo'rum, Exten'sio* seu *Disten'sio, Enta'sia tet'anus, Cat'ochus cervi'nus* seu *holoton'icus,* (F.) *Tétanos, Mal de cerf.* A disease which consists in a permanent contraction of all the muscles or merely of some, without alternations of relaxation. It is characterized by closure of the jaws; difficulty or impracticability of deglutition; rigidity and immobility of the limbs and trunk, which is sometimes curved forwards (*Emprosthot'onus*), sometimes backwards (*Opisthot'onus*), and sometimes to one side (*Pleurothot'onus*). When tetanus is confined to the muscles of the jaws, it is called *Tris'mus.* It is a most formidable affection. The means of treatment are: — copious and repeated bloodletting; bathing, cold and warm; powerful doses of opium, and anæsthetics. In *Traumat'ic Tetanus,* or that which supervenes on a wound, every extraneous matter must, of course, be removed from the wound, and soothing applications be made to it. When occurring in the puerperal condition, it is called *Puerperal Tetanus, Tetanus Puerperarum.* Tetanus is sometimes also produced by the action of morbid poisons, as strychnia, brucia, &c.

Tet'anus Anti'cus, Emprosthotonus—t. Dolorificus, Cramp — t. Dorsalis, Opisthotonus — t. Intermittent, Tetanilla — t. Lateralis, Pleurothotonus — t. Maxillæ inferioris, Trismus — t. Posterganeus, Opisthotonus — t. Posticus, Opisthotonus — t. Puerperarum, see Tetanus — t. Universalis, see Tetanus.

Tet'any, Tetanilla.

Tetartæ'us, (*τεταρταιος,* 'occurring on the fourth day,' from *τεταρτος,* 'the fourth,') Quartan.

Tetartophu'ïa, (*τεταρτος,* 'the fourth,' and *φυω,* 'I arise,') *Quarta'nus remit'tens.* A quartan, in which the intermission is inordinately short or imperfect.

Tête, (from [L.] *testa,* 'the skull,') Caput, Head — *t. de Veau,* Elephantiasis of the Greeks.

Tet'ra, (*τετρα,* 'four,') in composition, four.

Tetradrach'mon, (*τετραδραχμον,* from *tetra,* and *δραχμη,* 'a drachm.') A weight of four drachms or half an ounce.

Tetrago'nus, (*τετραγωνος,* from *tetra,* and *γωνια,* 'an angle,') Platysma myoides.

Tet'rahit Longiflo'rum, Galeopsis grandiflora.

Tetramas'thus, (*tetra,* and *μαστος,* 'a breast,') Quadrimammatus.

Tetra'myron, (*τετραμυρον,* from *tetra,* and *μυρον,* 'an ointment.') An ointment consisting of four ingredients.

Tetrangu'ria, (*tetra,* and *anguria,*) Cucurbita citrullus.

Tetranthe'ra Pichu'rim, (*tetra,* and *ανθηρα,* 'anther,') Pichurim beans.

Tet'rao (gen. *Tetrao'nis*) **Cotur'nix,** (after *τετραξ,*) *Cotur'nix,* the *Quail,* (F.) *Caille; Class,* Aves; *Ord.* Gallinaceæ. The quail is an esteemed article of diet. The Greek name is *ορτυξ,* gen. *ορτυγος*; and the places, called *Ortyg'ia,* are named after it. The excrements of the quail were formerly extolled in epilepsy, and the fat in specks of the eye.

Tetraphar'macum, (*tetra,* and *φαρμακον,* 'a medicine.') A medicine consisting of four ingredients.

Tetras'celus, (*tetra,* and *σκελος,* 'leg.') A monster having four legs.

Tetras'toma Rena'le, see Parasites.

Tetrob'olon, (*τετρωβολον,* from *τετρα,* and *οβολος, obolus.*) The weight of four oboli or two scruples.

Tetro'ros, (*τετρωρος.*) Astragalus.

Tet'ter, ([Sax.] *ᵹetep,*) Herpes — t. Crusted, Impetigo—t. Eating, Lupus—t. Honeycomb, Porrigo favosa — t. Humid, Eczema impetigo — t. Milky, Porrigo larvalis — t. Moist, Eczema — t. Pustular, Impetigo — t. Running, Impetigo — t. Scaly, Psoriasis.

Tet'terwort, Chelidonium majus.

Teuc'rium Ægypti'acum, (*τευκριον,* after Teucer,) T. capitatum — t. Belium, T. capitatum.

Teuc'rium Capita'tum, *T. Bel'ium* seu *Ægypti'acum, Po'lium Capita'tum, Po'ley Moun'tain of Montpel'lier, Ord.* Labiatæ, is, generally, substituted for T. chamædrys. The common *Poley Mountain* is the *Teucrium monta'num*; and the *Gold'en Po'ley Moun'tain,* the *Teu'crium Po'lium, Po'lion.*

Teuc'rium Chamæ'drys, *T. officina'lē, Chamædrys, C. mi'nor re'pens* seu *vulga'ris, Quer'cula mi'nor* seu *Calamaudri'na, Trissa'go, Chamædrops, Trixa'go, Com'mon, Creeping* or *Small German'der, English Treacle,* (F.) *Petit chêne, Chênette, Germandrée officinale.* This is possessed of aromatic and bitter properties. The dose of the dried powder is from ʒss. to ʒj.

Teuc'rium Chamæ'pitys, *Chamæpitys, Arthet'ica, Arthret'ica, Aju'ga, A.* seu *Bu'gula Chamæpitys, Ab'iga, Chamæmo'rus, I'va arthrit'ica, Holo'cyron, Io'nia, Sideri'tis, Com'mon Ground'pine,* (F.) *Petite Ivette.* Properties like the last. The tops and leaves have been recommended as aperients and tonics, especially in female obstructions, and in paralytic disorders.

Teuc'rium Cre'ticum, *T. hyssopifo'lium* seu *rosmarinifo'lium, Rosmari'nus stœ'chadis fa'ciē, Poley Mountain of Candy, Po'lium Cre'ticum.* The tops and whole herb enter into the old compounds, *Mithridate* and *Theriaca.* It has a moderately aromatic smell, and a nauseous, bitter taste, and is placed among the aperients and corroborants.

Teuc'rium Fla'vum has similar properties to T. chamædrys.

Teuc'rium Hyssopifo'lium, T. creticum.

Teuc'rium I'va, *Chamæ'pitys moscha'ta, I'va, I. moscha'ta Monspelien'sium, Chamæpitys anthyl'lus, French Ground'pine,* (F.) *Ivette musquée.* It has similar virtues to T. chamæpitys, but is weaker.

Teuc'rium Marit'imum, T. marum.

Teuc'rium Ma'rum, *T. marit'imum, Ma'rum Syri'acum* seu *Cre'ticum* seu *ve'rum* seu *Cortu'si, Majora'na Syri'aca, Chamæ'drys inca'na marit'ima* seu *ma'rum, Orig'anum Syri'acum, Ma'rum german'der, Syr'ian herb mas'tich, Cat thyme,* (F.) *Marum* ou *Germandrée maritime, Herbe aux chats.* A very aromatic plant, of a camphorated smell; formerly much used in medicine as a tonic, antispasmodic, emmenagogue, &c.

Teuc'rium Officina'lē, T. chamædrys—t. Palustre, T. scordium — t. Pyramidale, Ajuga — t. Rosmarinifolium, T. creticum.

Teuc'rium Scor'dium, *T. palus'trē, Scor'dium, Trissa'go palus'tris, Chamæ'drys palus'tris* seu *scor'dium, Al'lium red'olens, Wa'ter German'der,* (F.) *Germandrée scorodone, Sauge des bois, Germandrée aquatique.* The leaves have a garlicky smell, and bitterish, slightly pungent taste. It has the tonic properties of the other Teucria.

Tex'tum Interlobula'rē, (*texere, textum,* 'to weave,') Interlobular tissue.

Textu'ra, Texture — t. Organica, Histos.

Tex'tural, *Textura'lis.* Relating or appertaining to a texture.

Tex'ture, *Textu'ra, Tex'tus,* (from *texere, tex-*

tum, 'to weave,') *Te'la, Hy'pha, Hy'phē.* The particular arrangement of the tissues that constitute an organ.

Tex'tus, gen. *Textûs*, Texture, Tissue — t. Cellulosus, Cellular tissue — t. Desmosus, Desmoid tissue — t. Erectilis, Erectile texture — t. Nervorum, Plexus nervorum—t. Organicus, Cellular tissue — t. Papillaris, Corpus papillare — t. Parenchymalis, Cellular tissue.

Thæ'ria, (θηρ, 'a wild animal,') Radzyge.

Thal'ami Cor'porum Cavernoso'rum Pe'nis, see Cavernous bodies.

Thal'ami Nervo'rum Optico'rum seu Op'tici, *Eminen'tiæ mag'na cer'ebri, Gan'glia cer'ebri posti'ca, Cru'ra medul'læ oblonga'tæ* (of some), *Stria'ta cor'pora super'na posterio'ra, Collic'uli nervo'rum optico'rum, Op'tic thal'ami, Poste'rior cer'ebral gan'glia,* (F.) *Couches des nerfs oculaires* (Ch.), *C. des nerfs optiques, C. optiques.* Two rounded and irregular surfaces, which are seen exposed in the lateral ventricles of the brain, and in the third ventricle, the inferior surface of which presents two projections, called *Corpora genicula'ta,* that furnish several filaments to the optic nerves. The name was given from a belief that the optic nerves originate from them. They, however, arise more posteriorly from the corpora quadrigemina or optic lobes; and adhere merely to the inner margin of those bodies. Gall considers that the thalami act as ganglions to the nerves; and, hence, he calls them *Grands ganglions cérébrals inférieurs.* They are, also, called *Poste'rior gan'glion of the cer'ebrum.* From the thalami and corpora striata fibres proceed upwards to constitute the convolutions of the brain, and the various bands that connect the different parts of the brain together. The upper and inner parts of the thalami are so closely connected as to form one continued surface, called *Commissu'ra mollis.* The posterior parts turn downwards and outwards; after which they are elongated to form the two white cords, termed *Tractus op'tici.*

Thal'amus, pl. *thal'ami,* (θαλαμος,) (F.) *Couche.* 'A room or chamber; a bed.' The place in which a nerve originates, or has been considered to originate.

Thal'amus Rega'lis, Pericardium.

Thalassolu'trum, (θαλασσα, 'sea,' and λουτρον, 'a bath,') Bath, sea.

Thalassom'eli, (θαλασσα, 'sea,' and μελι, 'honey.') A cathartic medicine, composed of equal parts of sea water, honey, and rain water, exposed to the sun during the dog days in a pitched vessel.

Thalic'tron, (θαλικτρον,) *Thalictrum, T. mag'num* seu *fla'vum* seu *flaves'cens* seu *praten'sē* seu *ni'gricans* seu *rugo'sum* seu *vagina'tum, Rhabar'barum pau'perum, Meadow rue, Poor man's rhu'barb,* (F.) *Pigamon jaunâtre, Rue des prés, Fausse-rhabarbe, Rhabarbe des pauvres. Ord.* Ranunculaceæ. *Sex. Syst.* Polyandria Polygynia. The root resembles rhubarb in its properties.

Thalic'trum Anemonoï'des, *Mead'ow Rue, Rue-leaved Anem'ony.* An indigenous plant, flowering in April and May.

Thal'lium, (from θαλλος, [L.] *thallus,* 'a green bud or shoot.') A metal discovered in 1861 by spectrum analysis, in which it gives a very brilliant green ray. It is found in certain seleniferous and telluriferous deposits, in the native sulphur of Lipari, &c., and resembles lead physically in its aspect, color, density, &c., as well as in its toxical action on the economy.

The salts of thallium, especially the nitrate, are very soluble.

Thal'lus, 'a shoot.' A condition of the filaments of a fungus when, by excessive multiplication and interweaving, they become matted together.

Thamarin'dus, Tamarindus.

Thame, (thumb,) Pollex.

Thanas'imus, (θανασιμος, from θανατος, 'death,') Mortal.

Thanat'icus, (from *thanatus.*) Relating or appertaining to death. *Thanat'ici* (*morbi*) of Dr. Wm. Farr are fatal affections from violence.

Thanat'odes, (θανατωδης.) Mortal.

Thanatognomon'ic, *Thanatognomon'icus,* (*thanatus,* and γινωσκω, 'I know.') Characteristic of death — as a *thanatognomonic* sign.

Than'atoid, *Thanatoï'des,* (*thanatus,* and ειδος, 'resemblance.') Resembling death. Apparently dead.

Thanatolog''ical, *Thanatolog''icus,* (F.) *Thanatologique.* Relating or appertaining to thanatology.

Thanatol'ogy, (*thanatus,* and λογος, 'a discourse,') *Thanatolog''ia, Thnescolog''ia,* (F.) *Thanatologie.* A treatise on, or the doctrine of, death.

Than'atus, (θανατος,) Death.

Thap'sia, (from the island Thapsus.) The *Deadly car'rot, Thap'sia ascle'pias. Family,* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. The bark of the root operates violently, both upward and downward. It is not used.

Thap'sia Silph'ium, a North African plant, has similar properties. Six to ten grains of the powder produce several alvine evacuations.

Thap'sium Actæifo'lium, (after the isle of Thapsus,) Ligusticum actæifolium.

Thap'sium Atropurpu'reum, *T. corda'tum, Roundheart. Order,* Umbelliferæ. The flowers, which appear in June, are of a dark purple.

Thap'sium Barbino'dē, *Mead'ow Par'snep.* An indigenous plant of the Northern and Western States, which flowers in June. Flowers, yellow.

Both these plants have been esteemed vulnerary, antisyphilitic, and diaphoretic, and as antidotes to the bite of a rattlesnake.

Thap'sium Corda'tum, T. atropurpureum.

Thap'sus Barba'tus, Verbascum nigrum.

Thar'si, see Tarsus.

The, Thigh.

Thē, Thea — *t. des Apalaches,* Ilex vomitoria — *t. du Canada,* Gaultheria — *t. d'Europe,* Salvia veronica — *t. de France,* Salvia — *t. de Jersey,* Celastrus — *t. de la Mer du Sud,* Ilex vomitoria — *t. du Méxique,* Chenopodium ambrosioides — *t. du Paraguay,* Ilex Paraguensis.

Thé de Saint Germain, Espèces Purgatives. An infusion of a powder composed of *senna leaves, flowers of sambucus, aniseed, fennel seed,* and *cream of tartar,* officinal in the French Codex (1866).

Thé de Simon Pauli, Myrica gale — *t. Suisse,* Falltranck.

The'a, (Chinese tcha,) *Cha'a, Tea,* (F.) *Thé.* There are two principal varieties of teaplant, *Thea Sinen'sis,* — the *Thea Bohe'a,* and *Thea viridis,* the *black tea,* and the *green. Ord.* Camellieæ. *Sex. Syst.* Polyandria Monogynia. In commerce, many kinds of tea are met with. Several of the differences between these appear to result from the age at which the leaves have been collected, and the mode of their desiccation.

Tea-drinking was introduced into Europe about the year 1666, since which time its use has become almost universal; and, in spite of the assertions of medical terrorists, it is, except in particular idiosyncrasies, entirely harmless. It is not unfrequently adulterated. See Falsifications, table of. Tea is astringent, and gently excitant in nervous headache, &c.

By an analogical transferrence, very common in language, the word *Tea* has been used almost synonymously with infusion — as *Beef tea, Mint tea,* &c.

The'a German'ica, Veronica.

Theba'ina, Paramorphia.

Thebe'sius, Veins of. A name given to suppositious branches of the coronary veins, which Christopher Adam Thebesius, a German anatomist, described as opening into the heart by small depressions observable in the right auricle, and which have been called *Foram'ina Thebe'sii.* No such veins can be demonstrated. The valve at the orifice of the coronary vein, in the right ventricle, is called *Val'vula Thebe'sii, V. Guiffartia'na, V. ve'næ mag'næ, Valve of Thebesius.*

The'ca, (θηκη,) Case, Vagina, Sheath — t. Cerebri, Cranium — t. Cordis, Pericardium — t. Folliculi, see Folliculi Graafiani — t. Vertebralis, see Vertebral canal.

The'cal, *Theca'lis,* (from *theca,* 'a sheath.') Relating or appertaining to a sheath — as of a tendon.

Theci'tis, gen. *Theci'tidis,* (*theca,* and *itis.*) A term of hybrid formation, signifying inflammation of the sheaths of tendons.

The'in, (from *thea,*) see Coffea Arabica.

Thei'on, (θειον,) Sulphur.

Theiope'gæ, (*theion,* and πηγη, 'a spring,') Waters, mineral, sulphureous.

Theiother'mæ, (*theion,* and θερμη, 'heat,') Waters, mineral, sulphureous.

Thela'sis, (θηλαζω, 'I give suck,') Lactation.

Thelas'mus, (θηλασμος,) Lactation.

Thelas'tria, (θηλαστρια,) Nurse.

The'lē, (θηλη,) Mamma, Nipple.

Theli'tis, gen. *Theli'tidis,* (F.) *Thélite,* (*thele,* and *itis,*) Inflammation of the nipple.

Thelon'cus, (*thele,* and ογκος, 'a swelling,') Mastoncus.

Thelorrhag''ia, (*thele,* and ῥαγη, 'a rupture,') Hemorrhage from the nipple.

Thelygon'ia, (θηλυς, 'female,' and γονη, 'generation.') The part taken by the female in the act of generation. The procreation of female children. Also, nymphomania.

Thelyg'onum, (θηλυς, 'female,' and γονη, 'sperm,') Sperm (of the female).

Thelyp'teris, gen. *Thelypter'idis,* (θηλυς, 'female,' and *pteris,*) Pteris aquilina.

The'nad, Thenal.

The'nal, *The'nar,* (from *thenar.*) Relating or appertaining to the thenar.

The'nal As'pect. An aspect towards the side on which the thenar is situated. (Barclay.) *Thenad* is used adverbially by the same writer to signify 'towards the thenal aspect.'

The'nar, (θεναρ, from θεινω, 'I strike,' 'I push.') The palm of the hand or sole of the foot.

The'nar, Flexor brevis pollicis manûs, Palm.

The'nar or The'nal Em'inence is the projection at the anterior and outer part of the hand formed by the abductor brevis, opponens, and flexor brevis pollicis.

The'nar or The'nal Mus'cle. Riolan and Winslow give this name to the fleshy mass, formed of the abductor brevis, opponens pollicis, and the interior part of the flexor brevis pollicis. In the foot, Winslow gives the name *Thenal muscle* to the abductor and flexor brevis pollicis pedis.

Theobro'ma (gen. *Theobro'matis*) **Ca'cao,** (θεος, 'God,' and βρωμα, 'food,') Cacao.

Theobro'mina. A substance obtained from the cocoanut, resembling caffein, but more bitter and less soluble.

Theoma'nia, (θεομανια, from θεος, 'God,' and *mania,*) Demonomania.

Theople'gia, (θεος, 'God,' and πληγη, 'a stroke,') Apoplexy.

Theoplex'ia, (θεος, 'God,' and πλησσω, 'I strike,') Apoplexy.

Theoret'ical, (θεορητικος,) *Theoret'icus, Theo'ricus,* (θεωρεω, 'I contemplate.') (F.) *Théorétique, Théorique.* That which is confined to theory, or is connected with it. An epithet also applied to a sect of physicians, who founded their doctrine chiefly on reasoning.

Theo'ria, (θεωρια,) Theory.

Théorique, Theoretical.

The'ory, (θεωρια,) *Theo'ria,* (F.) *Théorie.* The speculative part of a science. The connection established in the mind between a general fact, or the least possible number of general facts, and all the particular facts dependent thereon: for example, the motions of the heavenly bodies, and the most important natural phenomena are connected with a single fact, previously known by observation; viz. that the force of gravity acts inversely according to the square of the distance. This constitutes the theory of universal gravitation. *Theory* must not be confounded with *system.* Theory regards nature as it is, and is a rigid deduction from facts. *System* is too often the creature of the imagination, to which nature is made to bend.

The'ory of Med'icine, *In'stitutes of Med'icine, Theoret'ical Med'icine,* is that part of the science which attempts philosophically to account for the various phenomena that present themselves during health as well as in disease. It is the philosophy of medicine. The *Institutes of Medicine* are generally considered to comprise Physiology and its applications to Pathology, Hygiene, and Therapeutics. By some they are considered to include General Pathology and General Therapeutics.

Therapei'a, (θεραπεια,) Curation, Therapeutics.

Therapeu'sis, Therapeutics.

Therapeu'ta, (θεραπευτης,) Therapeutist.

Therapeu'ter, (θεραπευτηρ,) Therapeutist.

Therapeu'tes, (θεραπευτης,) Therapeutist.

Therapeu'tical, *Therapeu'ticus.* Relating or appertaining to Therapeutics.

Therapeu'ticē, (θεραπευτικη, [τεχνη,]) Therapeutics.

Therapeu'tics, *Therapeu'ticē, Therapeu'sia, Therapeu'sis, Iatrotech'nicē, Therapei'a, Therapi'a, Curato'ria Meth'odus, Methodus Meden'di, Prac'tice of Phys'ic,* (F.) *Thérapeutique, Thérapie,* (from θεραπευω, 'I wait upon, I alleviate, I attend upon the sick.') That part of medicine, the object of which is the treatment of disease. With others, the department which comprises an explanation of the *modus operandi* of medicines.

Therapeu'ticus, Therapeutical.

Thérapeutique, Therapeutics.

Therapeu'tist, *Therapeu'ta, Therapeu'tes, Therapeu'ter.* One who practises therapeutics. A practitioner of medicine. To be a good therapeutist, a man must be well versed in every department of medicine, and capable of observing and reasoning well. He may be a good *observer,* and yet a bad *reasoner.* He cannot practise well unless he is both. Hence, the comparatively small number of good therapeutists.

Therapi'a, (θεραπεια,) Therapeutics.

Thérapie, Therapeutics.

The'ria, (θηρ, 'a wild animal,') Radzyge.

The'riac, Theriaca—t. of Antipater, Antipatri theriaca.

Theri'aca, (θεριακα,) *The'riac,* (from θηρ, 'a ferocious or venomous animal,') *Trc'acle, Molas'ses,* (F.) *Thériaque.* Also, a medicine, believed to be capable of curing or preventing the effects of the bite of a venomous animal. In this sense it is chiefly used by writers. *The'riac* and *The'riacal* have been used adjectively for medicinal.

Theri'aca Androm'achi, *Ven'ice Trea'cle,* is an ancient *alexipharmic electuary;* consisting of a farrago of 61 different ingredients, which possessed the most opposite properties. It was invented by Andromachus of Crete, and prepared by order of Nero. It has received various modi-

fications; and, to the discredit of the *Faculté de Médecine* of Paris, held its place in their Codex, with even an additional number of ingredients. The French Codex (1866) still retains it under the name of *Thériaque*, with all its ingredients, 57 of these being first formed into a powder, *Poudre Thériacale*. The *Electua'rium Opia'tum polypharmacum* of the Codex has contained *acid ingredients*, 5; *astringent*, 5; *bitter*, 22; *indigenous aromatics*, 10; *umbelliferous aromatics*, 7; *balsams and resinous substances*, 8; *fetid ingredients*, 6; *narcotics*, 1: *earthy substances*, 1; *gummy* or *amylaceous*, 4: *saccharine*, 3; total, 72! and one of these the *flesh of the viper!* A little more than a grain of opium is contained in each drachm of the compound.

Theri'aca Articulo'rum, Colchicum — t. Celestis, Tinctura opii — t. Communis, Molasses — t. Edinensis, Confectio opii.

Theri'aca Germano'rum. An extract or rob, prepared from juniper berries. Used as a stomachic.

Theri'aca Londinen'sis, *Cataplas'ma Cymi'ni*. A cataplasm of *cumin seed, bay berries, germander, snakeroot, cloves, honey,* and sometimes *opium,* or *syrup of poppies.*

Theri'aca Rustico'rum, Allium.

Theriaki. In Turkey, *opium-eaters*, or they who indulge largely in the use of opium, are so called.

Thériaque, Theriaca.

Theriat'rica, (θηρ, 'an animal,' and ιατρεια, 'medicine.') Veterinary art.

Therio'des, (θηριωδης, from θηρ, 'a venomous animal,' and *odes,*) Ferine.

Therio'ma, gen. *Therio'matis, The'rion,* (θηριωμα, from θηρ, 'a venomous animal,' and *oma.*) Any extremely malignant ulcer. Sometimes confined to ulcers of the lungs.

The'rion, (θηριον.) Therioma.

Theriot'omy, (θηρ, 'an animal,' and τεμνειν, 'to cut,') Zootomy.

Ther'ma, (θερμη,) Heat — t. Emphytum, Animal heat.

Ther'mæ, pl. of *therma,* (θερμαι.) Warm baths or springs. See Waters, mineral.

Ther'mæ Faba'riæ, Pfeffers, mineral waters of — t. Piperinæ, Pfeffers, mineral waters of — t. Plumbariæ, Plombières, mineral waters of.

Ther'mal, *Therma'lis,* (from *therma.*) Relating or appertaining to heat. Hot, warm, — as 'a *thermal* mineral water.'

Ther'mal Ham'mer, see Hammer.

Therman'tica, (θερμαντικα.) Calefacients.

Thermas'ma, gen. *Thermas'matis,* (θερμασμα,) Fomentation.

Therme, see Heat.

Ther'mic, *Ther'micus,* (from *therma.*) Relating or appertaining to heat.

Ther'mic Fe'ver. A term proposed by Dr. H. C. Wood, Jr., for sunstroke. See Coup de soleil.

Thermolu'sia, (*therma,* and λυω, 'I wash,') Bath, warm.

Thermom'eter, (*therma,* and μετρον, 'measure,') see Heat — t. Centigrade, Fahrenheit, &c., see Heat.

Thermom'etry. The application of the thermometer in disease, the heat varying in different morbid conditions.

Thermosystal'tic, *Thermosystal'ticus,* (F.) *Thermosystaltique,* (*therma,* and συσταλτικος, 'adapted for contracting.') A term applied to a muscle which is influenced, in its contraction, by heat and cold, — as *athermosystaltic* means one not so influenced.

Thermote'rion, (*therma,* and τηρειν, 'to preserve.') An apparatus for keeping food warm in the nursery, sick-chamber, or when travelling.

Thermotherapei'a, (*therma,* and *therapeia,* 'treatment of disease.') Treatment by means of heat, and especially of hot air.

Ther'mum Em'phytum, (*therma,* and εμφυτος, 'innate.') Animal heat, Biolychnium.

The'sis, (θεσις, 'a proposition,' from τιθημι, 'I put.') 'A position or proposition.' *Disserta'tio* seu *Disputa'tio inaugura'lis, Inaug'ural Dissertation.* The name usually given to the essay composed by a candidate for graduation in medicine, which he is at times required to defend publicly. Often, however, it is a mere form, giving useless labor and trouble to the student, inasmuch as it is executed as a task, and never afterwards regarded by the preceptor or by others. Sandifort, Haller, Smellie, and Stoll have published collections of these. In many universities, of Germany especially, the *Disputatio inauguralis* is the public dissertation; while the *Theses* are questions put to the candidate, and answered in writing, in the Latin language.

Theve'tia Ahouäi, (after Andrew Thevet, a French monk, who travelled in Brazil in the sixteenth century,) *Ahouai. Fam.* Apocyneæ. The kernels of the nut of this Brazilian tree are said to be a violent poison. In the Antilles its nuts are called *Noix de Serpent;* and they are used against the bites of serpents.

Theve'tia Nerifo'lia, *Yel'low Oleander, Exile Tree.* This tree, common in the gardens of Southern India, has similar acrid properties. It has been given in tincture prepared from the bark as an antiperiodic in intermittent fever.

Thew, ([Sax.] θeop,) Tendon.

They, Thigh.

Thicklist'ed, Pursy.

Thieves' Vin'egar, Acetum aromaticum.

Thigh, ([Sax.] θeoh,) *Fe'mur, Fe'men, Crus, Me'rus, Me'rium,* (Sc.) *The, They,* (F.) *Cuisse.* (Of old, *Fe'mur* meant the thigh generally, and especially the outer part; *Fe'men,* the inner.) The part of the lower limb which extends from the pelvis to the leg. The thigh is larger at its superior than inferior part, and has the form of an inverted and truncated cone, slightly depressed from within outwards. *Above,* it is bounded, *anteriorly,* by the groin; *externally,* by the hip; *behind,* by the fold of the nates; and *within,* by the perineal region. *Below,* it is bounded, *anteriorly,* by the prominence of the knee; *posteriorly,* by the ham. It is formed of a considerable number of muscles, bloodvessels, lymphatics, nerves, &c., and is covered by a strong aponeurosis.

Thigh'bone, Femur — t. Neck of the, Collum femoris.

Thim'bleweed, Rudbeckia laciniata.

Thi'on, (θειον,) Sulphur.

Thirst, ([Sax.] θyrt,) *Si'tis, Dip'sa, Potio'nis deside'rium,* (F.) *Soif.* A simple desire for, or absolute want of, liquids. Physiologists are not entirely agreed regarding the seat of thirst; some place it in the fauces, others in the stomach. Its immediate cause is not known. It has been attributed to a dry condition of the nervous papillæ of the mouth and fauces from suppression of the salivary and mucous secretions. This is probably true; but, again, it is owing to the wants of the system, — a supply of fluid being required to compensate the numerous losses that are constantly taking place. Thirst is an *internal sensation,* — an *instinctive want,* — arising from organization, and inexplicable. It is an urgent symptom in many diseases, particularly in those of vascular excitement.

Thirst, Exces'sive, Polydipsia — t. Morbid, Dipsosis.

Thirst'y, Dipsodes.

Thistle, Blessed, ([Sax.] θirtel,) Centaurea benedicta — t. Cotton, Onopordium acanthium — t. Globe, Echinops — t. Holy, Centaurea benedicta

— t. Ladies', Carduus Marianus — t. Milk, common, Carduus Marianus — t. Pine, Atractylus gummifera — t. Sow, Sonchus oleraceus — t. Star, Centaurea calcitrapa—t. Yellow, Argemone Mexicana.

Thla'dias, (θλαδίας, from θλαω, 'I crush,') Eunuch.

Thla'sias, (θλασιας,) Eunuch.

Thla'sis, (θλασις,) Contusion — t. Depressio, Depression.

Thlas'ma, gen. *Thlas'matis,* (θλασμα,) Contusion — t. Concussio, Concussion — t. Stremma, Sprain.

Thlas'pi, (θλασπις,) *Pen'nycress. Ord.* Cruciferæ. *Sex. Syst.* Tetradynamia Siliculosa. Two species of thlaspi are directed in some pharmacopœias for medical use: *Thlaspi arven'sē* or *Tre'acle mus'tard;* and *Thlaspi campes'trē* seu *hirsu'tum* seu *vulga'tius, Lepid'ium campes'trē, Lep'ia* seu *Ibe'ris campes'tris, Mith'ridate mus'tard.* The pharmaceutical properties of both kinds resemble those of common mustard.

Thlas'pi Bur'sa, *T. bursa'tum, Thlaspi* seu *Capsel'la* seu *Ibe'ris* seu *Nastur'tium* seu *Rodschied'ia bur'sa pasto'ris, Bur'sa pasto'ris, Shep'herd's purse, Co'coxcort, St. James's wort, Poor man's Parmacit'y,* (F.) *Fleur de St. Jacques, Bourse à berger* ou *à pasteur, Tabouret.* A common European plant, introduced into this country. It is slightly astringent, but is little used.

Thlas'pi Bursa'tum, Thlaspi bursa — t. Nasturtium, Lepidium sativum — t. Sativum, Lepidium sativum.

Thlib'ias, (θλιβιας, from θλιβω, 'I crush,') Eunuch.

Thlipsencepha'lia, see Derencephalia.

Thlipsenceph'alus, (θλιψις, 'compression,' and εγκεφαλος, 'the encephalon.') A monster in whom the skull is open, not merely in the frontal and parietal, but also in the occipital, region, a distinct fontanelle not existing.

Thlip'sis, (θλιψις,) *Compres'sio.* Compression, and especially constriction of vessels by an external cause. Oppression.

Thnescolog''ia, (θνησκω, 'I die,' and λογος, 'a discourse,') Thanatology.

Thnétoblaste, (θνητος, 'mortal,' and βλαστος, 'germ.') A term proposed by M. Robin for the heteromorphous and anatomical element of the different tumors called 'cancerous.'

Thnétoblastique, Cancerous.

Tho'lus, (θολος, 'a vaulted chamber,') Achicolum — t. Diocleus, Scapha.

Thomso'nian. One who practises or believes in Thomsonianism.

Thomso'nianism, *Thom'sonism.* A fanciful doctrine, of which a person of the name of Thomson, of New England, was the founder. One of its leading principles is, that the human body is composed of four *elements* [?] — earth, air, fire, and water; and one of its apothegms, that metals and minerals are in the earth, and, being extracted from the depths of the earth, have a tendency to carry all down into the earth who use them; that the tendency of all vegetables is to spring up from the earth, and therefore to uphold mankind from the grave.

The Thomsonians are Botanical Doctors. See Herb doctor.

Thoracente'sis, Thoracocentesis.

Thorachique, Thoracic.

Thorac''ic, *Thorac''icus,* (from *thorax,*) (F.) *Thoracique* ou *Thorachique.* That which relates or belongs to the chest; as *Thoracic vis'cera,* &c.

Thorac''ic Infe'rior Ar'tery, *Arte'ria Thorac''ica Exter'na Infe'rior* seu *Lon'ga* seu *Mamma'ria exter'na* seu *Thorac''ica infe'rior,* (F.) *Deuxième des Thoraciques* (Ch.), arises from the axillary, a little below the preceding, and descends vertically over the latter part of the thorax, and the serratus major anticus. It afterwards bends inwards, becomes subcutaneous, and divides into several branches, which embrace the breast. It gives numerous ramifications to the pectoralis major, serratus anticus, intercostals, ganglions of the axilla, mamma, &c.

Thorac''ic Supe'rior Ar'tery, *Arte'ria Thoracica Exter'na Supe'rior,* (F.) *Artère thoracique supérieure, Première des Thoraciques* (Ch.), arises from the axillary artery or from the acromial, and descends forwards between the pectoralis major and p. minor, to which it distributes itself by a great number of branches. In some subjects there are two or three *Arte'riæ thorac''icæ exter'næ superio'res.*

Thorac''ic Duct, *Duc'tus thorac''icus* seu *thoracicus poste'rior* seu *vertebra'lis* seu *chy'lifer* seu *chy'li* seu *lac'teus* seu *ro'rifer* seu *Pecqueti* seu *Pecquetia'nus, Ve'na al'ba thora'cis, Al'veus ampulles'cens, Distributo'ria lac'tea thorac''ica, Galax'ia, Duct of Pec'quet, Alimen'tary duct,* (F.) *Canal* ou *Conduit thoracique* ou *de Pecquet,* is the duct in which the lymphatics of the lower limbs, abdomen, left superior extremity, left side of the head, neck, and thorax terminate. It begins at the *receptaculum chyli,* which is formed by the union of five or six large lymphatic trunks — themselves formed from the union of all the absorbent plexuses of the abdomen. The duct ascends into the chest through the pillars of the diaphragm, and by the side of the aorta and vena azygos. It contracts in dimension as far as the 6th dorsal vertebra, when it inclines toward the left hand, ascends behind the arch of the aorta, passes behind the left internal jugular vein, and opens at the posterior part of the subclavian vein of the same side. Its embouchure is furnished with two valves, which prevent the blood from passing from the vein into the duet.

Thorac''ic Limbs are the upper limbs, so called because they are articulated with the lateral and upper parts of the chest.

Thorac''ic, Long or Infe'rior, Mammary inferior external artery.

Thorac''ic Nerves. The *short* or *anterior thoracic nerves* are two in number. They arise from the brachial plexus, and divide into an anterior and a posterior branch, the former distributed to the pectoralis major muscle, the latter uniting with a branch of the other to form a loop, from which numerous branches are given off to the pectoralis major and p. minor.

The *long thoracic nerve, Poste'rior thorac''ic, Exter'nal res'piratory* of Sir Charles Bell, is a long branch which arises from the fourth and fifth cervical nerves, immediately after their escape from the intervertebral foramina, and passes downward to be distributed upon the serratus magnus muscle.

Thorac''ic Regions are the different regions of the chest. Thus, we say, *anterior, lateral,* and *superior thoracic,* &c.

Thorac''ica, (from *thorax,*) Pectoralis.

Thorac''ics, First of the, Mammary superior external artery.

Thoracique, Thoracic.

Tho'raco, (from *thorax.*) In composition, the thorax or chest.

Thoracocente'sis, *Thoracente'sis, Thoracot'omy,* (*thoraco,* and κεντησις, 'puncture,') *Paracente'sis thora'cis.* Perforation of the chest to evacuate contained fluid — as in empyema.

Thoracocys'tis, gen. *Thoracocys'tidis,* Thoracystis.

Thoracodid'ymus, (*thoraco,* and διδυμος, 'a twin.') A monstrosity in which twins are united by the thorax.

Thoracod'ynē, (*thoraco,* and οδυνη, 'pain,') Pleurodynia.

Thoracodyn'ia, Pleurodynia.

Thoraco-facial, Platysma myoides.

Tho'racogastrodid'ymus, *Did'ymus symphyothoracogas'trius, Xiphodid'ymus,* (*thoraco,* γαστηρ, 'the belly,' and διδυμος, 'a twin.') A monstrosity in which twins are united by the chest and abdomen.

Thoraco-maxillo-facial, Platysma myoides.

Thoracom'eter, (*thoraco,* and μετρον, 'measure,') Stethometer.

Thoracomyodyn'ia, (*thoraco,* and *myodynia,*) Pleurodynia.

Thoracopathi'a, (*thoraco,* and παθος, 'disease.') Disease or suffering in the chest.

Thoracoscop'ia, (*thoraco,* and σκοπεω, 'I inspect,') see Auscultation.

Thoracoscop'ium, Stethoscope.

Thoracot'omy, (*thoraco,* and τεμνειν, 'to cut,') Thoracocentesis.

Thoracys'tis, gen. *Thoracys'tidis, Thoracocys'tis,* (*thorax,* and κυστις, 'a bladder.') Encysted dropsy of the chest. Hydatids in the chest.

Tho'rax, gen. *Thora'cis,* (θωραξ, gen. θωρακος, 'a cuirass,' 'a coat of mail,') *Cith'rus, Ven'ter me'dius, Pec'tus, Ste'thus, Scu'tum pec'toris, Bir, Che'lys, Cas'sa,* the *Breast,* the *Chest,* (F.) *Poitrine.* One of the splanchnic cavities, *Ca'vum thora'cis,* bounded posteriorly by the vertebræ, laterally by the ribs and scapula, anteriorly by the sternum, above by the clavicle, and below by the diaphragm. It is destined to lodge and protect the chief organs of respiration and circulation — the lungs and the heart.

Tho'rax, Corset.

Tho'rē, (θορη,) Sperm.

Thorn'apple, Datura stramonium — t. Red, Datura sanguinea.

Thor'oughstem, Eupatorium perfoliatum.

Thor'oughwax, Eupatorium perfoliatum.

Thor'oughwort, Eupatorium perfoliatum.

Thor'owwax, Bupleurum rotundifolium.

Thor'ulus Stramin'eus, 'a straw pad,' Fanon.

Thræ'nine, ([G.] Thräne, 'a tear,') see Tears.

Thread'worm, Dracunculus — t. Long, Trichocephalus.

Threp'sis, (θρεψις, from τρεφω, 'I nourish,') Assimilation, Nutrition.

Threpsol'ogy, *Threpsolog''ia,* (*threpsis,* and λογος, 'a description.') The doctrine of, or a treatise on, the nutrition of organized bodies.

Thrid'acē, (from *thridax,*) Lactucarium. *Thridacium* is obtained by expression from lactuca sativa.

Thridaci'nē, (θριδακινη,) Lactuca.

Thrida'cium, see Thridace.

Thri'dax, gen. *Thri'dacis,* (θριδαξ, gen. θριδακος,) Lactuca.

Thrift, Amer'ican, Statice Caroliniana — t. Lavender, Statice limonium — t. Seaside, Statice Caroliniana.

Thrix, (θριξ, gen. τριχος,) Capillus, Hair.

Throat, ([Sax.] θrote, θrota,) *Ju'gulum interstit''ium, Jugula'rē, Gut'ter, Spha'gē,* (Prov.) *Chokes, Droat, Hause, Hose,* (Sc.) *Halse, Hawse, Witter.* The anterior part of the neck. (F.) *Gorge.* Also, the pharynx.

Throat'root, Geum Virginianum, Liatris.

Throat'wort, Campanula trachelium.

Throb'bing, *Pulsati'vus, Sphyg'micus, Sphygmo'des, Pul'satory,* (F.) *Pulsatif.* A *throbbing pain,* (Prov.) *Stang,* (F.) *Douleur pulsative,* is a kind of pain which is, or seems to be, caused or augmented by the pulsation of arteries.

Throe, (from [Sax.] θropian, 'to suffer,') Agony; Pains, labor.

Thromballo'sis, (θρομβος, 'a clot,' and αλλοιοω, 'I change.') The change resulting from coagulation of blood in the veins. See Thrombosis.

Throm'bi (pl. of *thrombus*) **Lac'tei,** Infarctus mammæ lacteus.

Thrombocys'tis, (*thrombus,* and κυστις 'a cyst.') The cyst occasionally surrounding a clot of blood — as in encephalic hemorrhage.

Thrombo'sis, (θρομβωσις, from *thrombus,* and *osis.*) Coagulation; applied especially to coagulation of blood in a bloodvessel. It now generally designates the partial or complete obstruction of any portion of the circulatory apparatus by a morbid product developed *in situ.* The clot — *thrombus, autochthonous clot* — is usually fibrinous. The coagulum may be carried onward, (see Embolism,) or it may go on to suppuration, independent of other disturbances caused by its presence.

Throm'bus, (θρομβος, 'a clot,') see Thrombosis. Also a small, hard, round, bluish tumor, *Hæmato'ma,* formed by effusion of blood in the vicinity of a vein opened in the operation of bloodletting. It is commonly owing to the opening of the vein and that of the skin not corresponding, to excessive smallness of the cutaneous orifice, or to small, fatty granules which prevent the discharge of the blood. Compresses dipped in salt water, camphorated spirit, and slight compression, usually disperse it. See Blood.

Throm'bus Neonato'rum, Cephalæmatoma—t. Pelvic, Hæmatocele, pelvic—t. of Vulva and Vagina, Hæmatocele, pudendal.

Throp'ill, (corr. from *throat,*) Trachea.

Throp'ple, Trachea.

Throt'tle, (dim. of *throat,*) Trachea.

Throt'tle, (from *throat.*) To press powerfully or continuously with the fingers on the throat, so as to endanger or produce apnœa and death.

Throw, (from [Sax.] θropian, 'to suffer,') Agony; Pains, labor.

Thro'wort, Leonurus cardiaca.

Thrush, Aphthæ—t. Fungus, see Aphthæ — t. Milk, Aphthæ — t. White, Aphthæ.

Thrus'ty, Dipsodes.

Thryp'sis, (θρυπσις, from θρυπτω, 'I break in pieces,') Comminution.

Thu'ja Occidenta'lis, Thuya occidentalis.

Thumb, ([Sax.] θuma,) Pollex. "To bite the thumb" at any one is to bid defiance to him. — Shakspeare, "Romeo and Juliet," Act I., Scene 1.

Thu'rea, (from *thus,*) Juniperus lycia—t. Virga, Juniperus lycia.

Thus, gen. *Thu'ris,* (from θυω, 'I burn perfumes,') see Pinus abies — t. Americanum, see Pinus sylvestris — t. Fœminium, see Pinus abies — t. Judæorum, Croton cascarilla, Styrax, Thymiama—t. Libanotos, Juniperus lycia—t. Masculum, Juniperus lycia — t. Verum, Juniperus lycia — t. Vulgare, see Pinus abies.

Thu'ya Aphyl'la, (θυος, 'incense,') see Sandarac.

Thu'ya (θυια, from θυος, 'incense') seu Thu'ja Occidenta'lis, *T. obtu'sa, Cupres'sus Ar'bor Vi'tæ, Amer'ican Ar'bor Vi'tæ, Tree of Life. Ord.* Coniferæ. The leaves and wood were formerly in high repute as resolvents, sudorifics, and expectorants, and were given in phthisical affections, intermittent fevers, and dropsies. The expressed juice has been applied to condylomata. The arrangement of the medullary matter of the cerebellum, termed *Ar'bor Vi'tæ,* is also called *Thuya.*

Thylacii'tis, (θυλακιον, 'a small sac,' and *itis,*) Gutta rosea.

Thym, Thymus.

Thy'ma, gen. *Thy'matis,* Ecthyma, Thymion.

Thymasth'ma, gen. *Thymasth'matis,* Asthma thymicum.

Thym'bra, (θυμβρα,) Satureia hortensis—t. Hispanica, Thymus mastichina.

Thyme, Thymus — t. Cat, Teucrium Marum — t. Common, Thymus — t. Garden, Thymus — t. Lemon, see Thymus serpyllum — t. Mother of, Thymus serpyllum — t. Oil of, see Thymus — t.

Virginia, Pycnanthemum linifolium — t. Wild, Thymus serpyllum.

Thymelæ'a, (*θυμος*, 'thyme,' and *ελαια*, 'the olive tree,') Daphne gnidium—t. Laureola, Daphne laureola — t. Mezereum, Daphne mezereum — t. Monspeliaca, Daphne gnidium.

Thymelco'sis, (*thymus*, and *ἑλκος*, 'an ulcer.') Ulceration of the thymus gland.

Thymia'ma, gen. *Thymia'matis*, (*θυμιαμα*, from *θυω*, 'I burn perfumes,' 'a perfume,') *Thus Judæo'rum, Muskwood*, (F.) *Narcaphthe*. A bark from Syria, Cilicia, &c., supposed to be the product of the liquid storax tree. It has an agreeable balsamic smell, approaching that of liquid storax. See Lacaphthon and Narcaphthon.

Thymia'ma, Fumigation, Suffimentum.

Thymiasiotech'nia, (*thymiasis*, and *τεχνη*, 'art,') Thymiatechny.

Thymia'sis, (*θυμιασις*,) Fumigation.

Thymiatech'ny, *Thymiatech'nia, Thymiasiotech'nia, Cu'ra fumigato'ria*, (*θυμιαμα*, 'a perfume,' and *τεχνη*, 'art.') The art of employing perfumes in medicine.

Thy'mic, *Thy'micus*, (F.) *Thymique*. Having relation to the thymus, as *thymic* asthma. — Relating to thyme, as *thymic* acid.

Thy'mic Ac''id, (pron. *ty'mic,*) *Thy'mol*, (F.) *Acide Thymique*. An antiseptic acid analogous with carbolic acid, obtained as a solid by refrigeration of the oil of thyme, or in the liquid form by treating the essence of thyme, in which it is associated with a hydrocarbon, called *thymene*, with an aqueous solution of an alkali, as soda or potash, and separating it from the thymate thus formed by the addition of an acid. In a concentrated form, it has been employed for cauterization of the dental nerves. In very weak solution, it has been used as a dressing for wounds, &c. It is almost insoluble in water, but soluble in ether and alcohol.

Thy'mion, (*θυμιον*,) *Thy'ma, Thy'mus, Por'rum, Por'rus, Verru'ca rhagoï'des, Verru'ca mi'nor*, (from *θυμος*, 'thyme.') A small wart on the skin, resembling a bud of thyme.

Thymio'sis, (from *thymion*,) Framboesia — t. Indica, Framboesia.

Thymique, Thymic.

Thymi'tes, (*θυμιτης*,) Wine impregnated with thyme.

Thymi'tis, (*θυμος*, 'thymus,' and *itis*.') Inflammation of the thymus gland.

Thy'mol, (pron. *ty'mol*,) Thymic acid.

Thymopathi'a, *Psychopathi'a*, (*θυμος*, 'the mind,' and *παθος*, 'affection.') A disease of the mind.

Thy'mos, (*θυμος*,) Rage, Thymus.

Thymoxal'mē, (*θυμος*, 'thyme,' *οξυς*, 'acid,' and *ἁλς*, 'salt.') A compound of thyme, vinegar, and salt.

Thy'mum, Thymus.

Thy'mus, (*θυμος*,) *Glan'dula Thy'mus, Cor'pus Thymia'num* seu *Thy'micum, Glan'dium, Thy'mus gland, Cor'pus incomprehensib'ilē* of Joseph Frank, — *Sweet'bread* of the butcher. An organ, concerned in hæmatosis, which is seated in the upper separation of the anterior mediastinum. The thymus has the appearance of a glandular body. It is oblong; bilobate; soft, and very variable in size and color. In the fœtus, it is very large, and contains in a central cavity—*reservoir of the thymus*—a milky fluid; but it gradually disappears, and in old age is scarcely discernible. The arteries, called *thy'mic*, are from the inferior thyroid, internal mammary, bronchial, and mediastinal. The veins have the same arrangement. It receives some nervous filaments from the pneumogastric nerves, the phrenic, and the inferior cervical ganglia.

Thy'mus, (*θυμος*,) *Thy'mum, T. vulga'ris* seu *tenuifo'lius* seu *horteu'sis, Common* or *Garden Thyme*, (F.) *Thym, T. ordinaire, Farigoule. Ord.* Labiatæ. *Sex. Syst.* Didynamia Gymnospermia. This herb has an agreeable, aromatic smell; and a warm, pungent taste. It is reputed to be resolvent, emmenagogue, tonic, and stomachic. It is not much used. The volatile oil, *O'leum Thy'mi, Oil of Thyme*, is officinal. It has been used on cotton as an application to carious teeth, and also as an ingredient in liniments.

Thy'mus, (*θυμος*,) Psyche, Saturcia capitata, Thymion—t. Calaminthus, Melissa calamintha—t. Capitatus, Satureia capitata — t. Ciliatus, T. mastichina — t. Creticus, Satureia crepitata — t. Hortensis, Thymus — t. Includens, T. serpyllum.

Thy'mus Mastichi'na, *T. Cilia'tus, Ma'rum vulga'rē, Clinopod'ia, Mastichi'na Gallo'rum, Thym'bra Hispan'ica, Ja'ca In'dica, Com'mon herb Mas'tich*. A low shrubby, Spanish plant, used as an errhine. It has a smell like mastich. Its virtues resemble those of the *Marum Syriacum*, but it is said to be less powerful.

Thy'mus Multiflo'rus, Melissa nepeta — t. Nepeta, Melissa nepeta.

Thy'mus, Res'ervoir of the, see Thymus.

Thy'mus Serpyl'lum, *T. inclu'dens, Herpy'los, Herpyl'los, Serpyl'lum, Serpul'lum, Serpil'lum, Gila'rum, Serpyl'lum vulga'rē mi'nus, Moth'er of Thyme, Wild Thyme*, (F.) *Serpolet*. This plant has the same sensible properties as the garden thyme, but has a milder and rather more grateful flavor. *Lem'on Thyme, Serpyl'lum citra'tum*, is merely a variety of *Thy'mus Serpyl'lum*. It is very pungent; and has a particularly grateful odor, approaching that of lemons.

Thy'mus Sylvat'icus, Clinopodium vulgare — t. Sylvestris, Satureia capitata — t. Tenuifolius, Thymus — t. Vulgaris, Thymus.

Thyremphrax'is, (*thyreo*, and *εμφραξις*, 'obstruction,') Bronchocele.

Thy'reo, *Thyro*, (from *θυρεος*, 'a shield,') in composition, the thyroid cartilage or gland.

Thyreoädeni'tis, Thyreoitis.

Thyreoäryt'enoid, *Thyroärytenoïde'us*, or *Thyroärytenoï'des*. That which relates to the thyroid and arytenoid cartilages.

Thyreoäryt'enoid Lig'aments, *Ligamen'ta thyreoärytænoïde'a* seu *voca'lia, Infe'rior Lig'aments of the Lar'ynx, Lips of the Glot'tis, Vocal Cords* or *Ligaments*, are two ligaments about two lines broad, formed of elastic and parallel fibres, which are contained in a duplicature of the mucous membrane of the larynx. They extend horizontally from the anterior projection at the base of each arytenoid cartilage to the middle of the angle of union of the thyroid cartilage. They are the essential organs of voice. See Glottis.

Thyreoäryt'enoid Mus'cles, Thyreoärytenoïde'i, are thin muscles, which arise from the middle and inferior part of the posterior surface of the thyroid cartilage; whence they proceed backwards and outwards, to be inserted into the outer part of the base of the arytenoid cartilage. They give the necessary tension to the ligaments of the glottis, in the production of the voice. Santorini has given the name *Thyreoärytenoïdeus obliquus* to a portion of the *arytenoïdeus* muscle.

Thyreoce'lē, (*thyreo*, and *κηλη*, 'a tumor,') Bronchocele.

Thyreoëpiglot'tic, *Thyreoëpiglottide'us, Thyreopiglot'ticus*. Sabatier and Santorini have given this name to the outer portion of the thyroarytenoid musele; because it passes from the thyroid cartilage to the anterior part of the epiglottis.

Thyreohy'oid, *Thyreohyoïde'us, Thyrohyoï'des, Thyrohy'oid, Hyoedeothyreo'des*. That which belongs or relates to the thyroid cartilage and os hyoides.

Thyreohy'oid,- Thyrohy'oid or Hyothy'roid Mem'brane is a very broad, yellowish, fibrous membrane, thicker at the middle than at the extremities, which is attached, above, to the posterior surface of the body and great cornu of the

os hyoides; and, below, to the whole superior edge of the thyroid cartilage. The *lateral thyrohyoid ligaments* may be considered as the margins of the thyrohyoid membrane. They pass between the superior cornua of the thyroid cartilage to the extremities of the greater cornua of the os hyoides. A small cartilaginous or bony nodule — *cartila'go tritic''ea, corpus'culum tritic''eum* — is sometimes found in each.

Thyreohyoïde'us or *Hyothyreoïde'us Mus'cle* is situate at the anterior and superior part of the neck. It is attached to the oblique line on the anterior surface of the thyroid cartilage; to the inferior edge of the body of the os hyoides, and to the anterior portion of its great cornu. It approximates the thyroid cartilage and os hyoides to each other, by raising the cartilage, and with it the whole larynx; or, it can depress the os hyoides.

Thy'reoid, Thyroid.

Thyreoïde'us, Thyroideal.

Thyreoïdien, Thyroideal.

Thyreoï'tis, *Thyreoädeni'tis, Thyreoïdi'tis, Angi'na thyreoïde'a,* (*thyreo,* and *itis.*) Inflammation of the thyroid gland.

Thyreon'cus, (*thyreo,* and *ογκος,* 'a tumor,') Bronchoccle.

Thyreopharynge'us, Thyropharyngeus.

Thyreopharyn'go-palati'nus. The chief muscular mass of the soft palate, consisting of a thyreopalatine and a pharyngopalatine portion (Luschka).

Thyreophrax'ia, (*thyreo,* and *φρασσω,* 'I obstruct,') Bronchocele.

Thyrepiglot'icus, Thyreoëpiglottic.

Thy'ro, in composition, see Thyreo.

Thyroäryt'enoïd, Thyreoärytenoid.

Thyroce'lē, (*thyro,* and *κηλη,* 'a tumor,') Bronchocele.

Thy'rocri'copharynge'us, see Cricopharyngeal.

Thyrohy'oid, Thyreohyoid.

Thyropharyn'gostaphyli'nus, Palatopharyngeus.

Thy'roid, *Thy'reoid, Thyroï'des,* (*θυροειδης,* from *θυρα,* 'a gate or folding-door,' or from *θυρεος,* 'a shield,' and *ειδος,* 'form.') That which has the shape of a folding-door.

Thy'roid Ar'teries, Thyroideal arteries — t. Artery of Neubauer, see Thyroideal arteries.

Thy'roid Ax'is. A short, thick trunk, arising from the first portion of the subclavian artery, dividing almost immediately into the inferior thyroid, suprascapular, and transversalis colli.

Thy'roid Bod'y, Thyroid gland.

Thy'roid Car'tilage, *Cartila'go Scutifor'mis* seu *Scuta'lis* seu *Clypea'lis, Coöperato'rium, C. pelta'lis* seu *pelta'tus, Scu'tum, Ada'mi Mor'sûs Os,* is the largest of the cartilages of the larynx, at the anterior part of which it is situate. It is larger transversely than vertically; broader above than below; and seems formed by the junction of the two quadrilateral plates, which produce, by their union, an angle that projects forwards. Its two posterior margins terminate above, and on each side, by an ensiform prolongation, called the *greater cornu of the thyroid cartilage, cornu supe'rius* seu *longum;* and, below, by a less prominent eminence, the *lesser cornu, Cornu infe'rius* seu *bre'vē,* which is articulated with the cricoid.

Thy'roid Gland or Bod'y, *Cor'pus Thyreoïde'um, Glan'dula Thyreoïdea,* (F.) *Gland* ou *Corps Thyroïde,* is an organ, the uses of which are not known. It covers the anterior and inferior part of the larynx, as well as the first rings of the trachea, and seems to be composed of two lobes, flattened from before to behind, which are united by a transverse prolongation of the same nature as themselves, called the *Isthmus.* At times, there arises from the upper border of the isthmus, or the lateral lobes in the neighborhood of the isthmus, a third or middle lobe — *Pyr'amis, Proces'sus pyramida'lis, Colum'na me'dia, Appen'dix glan'dulæ thyreoïde'æ.* This lobe is sometimes independent, and forms a number of roundish or longish lobes; when it has been called *Glan'dula thyreoïdea accesso'ria.* The tissue of the thyroid is soft, spongy, and of a brownish color; but its intimate structure is unknown. It is formed of several distinct lobules; collected in lobes of greater or less size. They are composed of granulations, some of which contain a yellowish or milky fluid. The thyroid gland receives four large arteries, called *Thyroideal,* as well as corresponding veins. Its nerves proceed from the pneumogastric, and from the cervical ganglia. No excretory duct has ever been found in it.

Thyroide'al or **Thyroid'eal,** *Thyroïde'us, Thyreoïde'us,* (F.) *Thyroïdien, Thyréoïdien.* That which concerns the thyroid gland or cartilage.

Thyroide'al or Thy'roid Ar'teries are two on each side. 1. The *supe'rior Thyroideal, supe'rior laryngeal, superior guttural,* arises from the anterior part of the external carotid, and proceeds to the upper part of the thyroid gland, after having given off a *laryngeal branch* and a *cricothyroid.* 2. The *inferior Thyroideal, infe'rior gut'tural,* much larger than the last, arises from the upper part of the subclavian. It passes, in a serpentine manner, to the inferior part of the thyroid gland, to which it is distributed, after having given a number of branches to the neighboring parts, among which is the *cervicalis ascendens.* The inferior thyroideal artery is occasionally replaced by the *Thyroid artery of Neubauer, Artery of Neubauer,* which arises directly from the curvature of the aorta.

Thyroide'al Veins are—1. A *supe'rior thyroideal,* and several *mid'dle thyroideal,* which open into the internal jugular vein. 2. An *infe'rior thyroideal,* much larger than the preceding, whose branches form — by anastomosing with those of the opposite side, in front of the trachea — a very remarkable venous plexus, which J. Cloquet calls the *infrathyroideal plexus.* The inferior thyroideal veins open,— the left into the corresponding subclavian; the right, into the vena cava superior.

Thyroïdien, Thyroideal.

Thyropharynge'us, *Thyreopharynge'us.* Valsalva, Morgagni, Santorini, and Winslow have given this name to the portion of the constrictor pharyngis inferior, which is attached to the thyroid cartilage.

Thyropharynge'us, Constrictor pharyngis, see Cricopharyngeal.

Thyrophrax'ia, (*thyro,* and *φρασσω,* 'I obstruct,') Bronchocele.

Thyrot'omy, (*thyro,* and *τομη,* 'section.') Division of the thyroid cartilage, as for the removal of foreign bodies in the larynx, &c.

Thyr'sus, (*θυρσος.*) Penis.

Thysseli'num, Peucedanum palustre — t. Palustre, Peucedanum palustre.

Tiarel'la Cordifo'lia, (dim. of *τιαρα, tiara,* 'the turban of the Persian sovereigns,' from the form of the capsules.) *Coolwort.* A tonic and diuretic.

Tibi-péronéo-tarsien, Peronæus longus.

Tib'ia, 'a flute or pipe,' *Cne'mē, Procne'mium, Fo'cilē ma'jus, Arun'do* seu *Can'na ma'jor, Can'na ma'jor* seu *domes'tica cru'ris, Shin'bone.* The largest bone of the leg. A long, irregular, and triangular bone, situate on the inner side of the fibula. It has: 1. A *Supe'rior* or *fem'oral extrem'ity,* which is very large, rounded, and has two eminences at the sides, called *Tuberos'ities of the Tib'ia,* or *Tib'ial tuberos'ities.* The outermost is articulated with the fibula. On its head are two articular, oval, concave surfaces, separated by a process, called *Spine of the tibia,* which are articulated with the condyles of the *Os femoris.*

2. An *infe'rior* or *tar'sal extrem'ity*, having an articular surface beneath, which joins the astragalus; within, a triangular eminence, which forms the malleolus internus; and, on the outside, a triangular surface, which articulates with the fibula. 3. The body or shaft of the tibia has three faces, separated by three angles, the anterior of which is the most prominent, and is called the *spine* or *cris'ta of the tib'ia* or *tib'ial spine*. It is the *shin*. The tibia is articulated with the femur, fibula, and astragalus. It is developed by three points of ossification, one for the body, and one for each extremity.

Tib'ia Min'ima, Fibula.

Tib'iad, see Tibial aspect.

Tibiæ'us, Tibial — t. Anticus, Tibialis anticus.

Tib'ial, *Tibia'lis, Tibiæ'us*, (F.) *Tibial, Jambier*, (from *tibia*.) That which relates to the tibia or to the leg.

Tib'ial Aponeuro'sis, (F.) *Aponévrose Jambière*, surrounds the muscles of the leg. It is continuous, above, with the femoral aponeurosis, and arises, also, from the head of the fibula, and from several fibrous expansions which detach themselves from the tendons of the triceps, sartorius, gracilis, and semitendinosus. Thence it descends around the leg, attaching itself to the whole extent of the anterior and inner edges of the tibia. It sends, below, an expansion, which passes before the tendo Achillis, and is continuous with the anterior annular ligament of the tarsus. It is attached, also, to the sheath of the peroneal muscles.

Tib'ial Ar'teries are two in number. 1. *Arte'ria Tibia'lis Anti'ca*, which arises from the popliteal, before its bifurcation; passes immediately through the opening in the upper part of the interosseous ligament, and reaches the anterior part of the leg; when it turns downwards, and descends obliquely between the extensor communis digitorum pedis and the tibialis anticus, anterior to the interosseous ligament; glides under the anterior annular ligament of the tarsus, and takes the name *Dorsa'lis tarsi*. Among the numerous branches given off by the tibialis antica may be distinguished — the *Tibia'lis recur'rens, A. malleola'ris inter'na*, and *A. malleola'ris exter'na*. 2. *A. Tibia'lis posti'ca*, arises from the bifurcation of the popliteal artery; and, slightly tortuous, descends between the two planes of the posterior muscles of the leg, until it arrives under the arch of the calcaneum, where it divides into two branches — the *Plantar arteries*.

Tib'ial As'pect. An aspect towards the side on which the tibia is situated. (Barclay.) *Tibiad* is used adverbially, by the same writer, to signify 'towards the tibial aspect.'

Tib'ial Nerves are two in number. 1. The *anterior tibial nerve, Prétibio-sus-plantaire* (Ch.). One of the two branches in which the external popliteal terminates. It accompanies the arteria tibialis antica. 2. The *posterior tibial nerve, Branche tibiale du nerf fémoro-poplitée* (Ch.), is the *internal popliteal*.

Tib'ial Veins, Ante'rior and Poste'rior, have the same arrangement as the arteries which they accompany.

Tibia'lis Anti'cus, *Tibiæ'us anti'cus* seu *ante'rior, Hip'picus, Cate'næ mus'culus*, (F.) *Tibio-susmétatarsien, Tibio-sus-tarsien* (Ch.), *Jambier antérieur*. A muscle situate at the anterior part of the leg. Above, it has the shape of a triangular prism; below, it is slender and tendinous. It is attached, above, to the anterior part of the external tuberosity of the tibia; to the superior half of the outer surface of that bone; and to the anterior surface of the interosseous ligament. Below, its tendon terminates at the base of the first cuneiform bone, and at the posterior extremity of the first metatarsal bone. This muscle bends the foot on the leg, and directs its points inwards, at the same time that it raises its inner edge. It can, also, bend the leg on the foot, and prevent it from falling backwards in standing.

Tibia'lis Grac''ilis, Plantar muscle.

Tibia'lis Posti'cus, (F.) *Tibio-tarsien, Tibio-sous-tarsien* (Ch.), *Jambier postérieur*. This muscle is situate at the posterior and deep part of the leg. It is thicker above than below, and is attached, above, to the posterior surface of the fibula, to the posterior surface of the tibia, and to the interosseous ligament. Its tendon terminates, below, at the tuberosity on the inferior extremity of the os scaphoides. This muscle extends the foot on the leg, at the same time raising its inner edge. It likewise extends the leg on the foot. It was called *Nauti'cus* by Spigelius, because sailors bring it chiefly into action in climbing the mast.

Tibio-calcanien, Soleus — *t. Phalangettien*, Flexor longus digitorum pedis profundus perforans — *t. Sous-tarsien*, Tibialis anticus — *t. Sus-métatarsien*, Tibialis anticus — *t. Sus-tarsien*, Tibialis anticus.

Tibiotar'sal, *Tibiotar'seus*, (F.) *Tibio-tarsienne*. What relates to the tibia and tarsus.

Tibiotar'sal Articula'tion is the articulation of the foot with the leg. It is formed by the tibia and the astragalus, and is strengthened by lateral and by anterior and posterior ligaments.

Tibio-tarsien, Tibialis posticus.

Tic, (from [Sax.] ᵹeoᵹan, [G.] ziehen, 'to draw,') *Twitch'ing, Vellica'tion*. A local and habitual convulsive motion of certain muscles, and especially of some of those of the face. It is sometimes called *Tic convulsif* ou *Tic non douloureux, Spasmodic Tic, Hypercinesia of the facial nerve, Histrion'ic* or *Mimic Spasm of the Face, Spas'mus facia'lis*, (F.) *Hyperkinésie du facial, Spasme facial, Convulsion mimique*, to distinguish it from *Tic douloureux, Névralgie du trijumeau, N. faciale, Prosopalgie, Douleur faciale, Neural'gia fa'ciei, Epilep'tiform Neural'gia, Chore'a Neural'gica*, and has been termed a *par'tial chore'a* or form of *Chron'ic chore'a, Chore'a fa'ciei*. See Neuralgia.

Tic Douloureux, 'painful tic,' Neuralgia, facial — *t. Non douloureux*, see Tic.

Tic Rotatoire, Hyperkinésie de l'accessoire de Willis. A hypercinesia of the muscles supplied with nervous distribution from the external branch of the spinal nerve. The term *torticolis spasmodique* has been applied to one variety of it.

Tic, Spasmod'ic, Neuralgia.

Tick, (F.) *Tique*, (G.) Zecke, Ixodes ricinus — t. Wood, Ixodes ricinus.

Tick'le Weed, Veratrum viride.

Tick'ling, ([L.] *titillare*, [Sax.] ticklan, 'to tickle,') (Sc.) *Kit'tling, Kit'tilling*, (F.) *Chatouillement*. This word sometimes means the action of tickling, (*titilla'tio, titilla'tion*,) at others, the sensation produced by this action (*prurit'us*). A vivid sensation, which commonly causes laughter, and a state of general spasm that may be dangerous if too long protracted. There are some parts of the body where we are easier tickled than others; for example, the soles of the feet, and the hypochondriac region.

Tick'seed Sun'flower, Coreopsis trichosperma.

Tick'weed, Hedeoma—t. Sunflower, Coreopsis trichosperma.

Tico'rea Febrif'uga. A Brazilian plant, *Order*, Rutaceæ, the bark of which is intensely bitter, astringent, and antiperiodic.

Tico'rea Jasminiflo'ra. A decoction of the leaves is said to be drunk by the Brazilians as a cure for framboesia.

Ti'dal Air, (from *tide*,) see Respiration.

Tierce, ([L.] *tertius,* 'third,') see Tertian.

Tig'ala, Saccharum.

Tige ('a stalk') ***Pituitaire,*** Infundibulum of the brain — *t. Sus-sphénoïdale,* Infundibulum of the brain.

Tig'lia seu **Tig'lii Gra'na,** see Croton tiglium.

Tigretier, see Mania, dancing.

Tikim'ma, Cacoucia coccinea.

Til'bury, Min'eral Wa'ters of. A saline chalybeate at West Tilbury, in Essex, England. It is not much frequented.

Til'ia, *T. Europæ'a* seu *grandiflo'ra* seu *cardiflo'lia* seu *pauciflo'ra* seu *plataphyll'a,* (akin to πτελεα, 'the elm tree,') *Phily'ra.* The *Lime, Lind,* or *Lin'den tree,* (F.) *Tilleul. Ord.* Tiliaceæ. The flowers have been supposed to possess anodyne and antispasmodic virtues.

Til'ia America'na, *T. gla'bra* seu *Canaden'sis, Lin'den, Linn, Bass'wood, White'wood, Spoon'wood.* A mucilage, prepared by macerating the inner bark in cold water, has been applied to burns. It may be made into a cataplasm by thickening it with bran.

Til'ia Canaden'sis, T. Americana—t. Glabra, T. Americana.

Tilleul, Tilia.

Tillicher'ry Cor'tex, Nerium antidysentericum.

Til'ma, gen. *Til'matis,* (τιλμα, from τιλλω, 'I pluck,') Linteum.

Til'mus, (τιλμος,) Carphologia, Evulsion.

Til'y, of the In'dians, Viburnum dentatum.

Timac. The name of an East India root, but of what vegetable is not clear. It is said to possess diuretic properties; and hence has been given in dropsies.

Timbales (F.), 'kettle-drums.' Folded membranes inclosed in a cavity on the under part of the abdomen of insects, giving rise, by the rapidity of their movements, to a drumming noise.

Timbre (F.), 'the sound of a bell,' (τυμπανον, from τυπτω, 'I strike.' [?]) The quality of sound by which one voice, or one instrument, can be distinguished from another when producing the same note.

Tim'idus, Rectus inferior oculi.

Tin, ([Sax.] τιn,) *Stan'num, Cassit'erus, Cattit'erus, Ju'piter, Stu'pig, La'os, Plum'bum al'bum* seu *can'didum,* (F.) *Étain.* A solid metal; of a characteristic odor when rubbed; insipid; whitish: s. g. 7·291; giving a peculiar *tinkling* sound when struck. It is used, in medicine, only as a mechanical anthelmintic. Dose, ʒj. of the *Pulvis Stanni, Stannum granula'tum* or *Granular tin,* (F.) *Poudre d'Étain,* in molasses. (This is made by melting tin in an iron vessel over the fire, and, while it is cooling, stirring until it is reduced to a powder, which is passed through a sieve.)

The French Codex (1866) has a preparation, *Limaille d'Étain, Limatu'ra Stan'ni, Tin filing.*

Tin, But'ter of, Tin, muriate of — t. Chloride or Chloruret of, Tin, muriate of — t. Deutohydrochlorate of, Tin, muriate of.

Tin'foil, *Stannum folia'tum, Stanni'olum,* is used for plugging carious teeth, &c.

Tin Glass, Bismuth.

Tin, Gran'ular, see Tin — t. Muriate of, superoxygenated, Tin, muriate of.

Tin, Mu'riate of, *Fu'ming liq'uor of Liba'vius, Mu'rias Stan'ni* seu *Oxyd'uli Stan'ni, Stan'ni chlo'ridum, Stannum chlora'tum* seu *muriat'icum, Salt of Tin, Butter, Chloride* or *Dentohydrochlo'rate* or *Superox'ygenated Mu'riate of Tin,* (F.) *Sel d'Étain.* (This is formed of *tin,* one part, *concentrated muriatic acid,* three parts. To be crystallized by the aid of heat.) A violent cathartic. Dose, gr. ij. or iij. It is also used for injection in gonorrhœal and purulent discharges from the vagina.

Tin, Salt of, Tin, muriate of — t. Sulphuret of, Aurum musivum.

Tinag'mus, (τιναγμος,) Concussion.

Tinas'mus, Tenesmus.

Tinctu'ra, (from *tingere, tinctum,* 'to dye.') *Tinc'ture, Essen'tia,* (F.) *Teinture Alcoolique, Alcoolé, Alcohol, Alcoolature.* The term tincture is generally restricted to spirituous solutions of vegetable, animal, and some saline substances. It corresponds, therefore, with the word *Quintessence,* in one of its old significations; and with the *Alcoola'tum* of the *Codex* of Paris. It is not unusual, however, to speak of *a'queous tinc'ture, ethe'real tinc'ture* (*Éthérolature,* Béral), &c. Tinctures are usually made either with pure alcohol or proof spirit. Those made with pure alcohol are precipitated by water; and, therefore, are seldom used internally; those with proof spirit are common additions to infusions, decoctions, &c. Tinctures ought not, of course, to be united with any vehicle which can decompose them, or separate anything from them in a palpable form; unless such decomposition is desired by the prescriber. In making tinctures, the ingredients should be reduced to a coarse powder, — maceration being made in close vessels, exposed to a heat of about 80°,—and frequently shaken. When completed, they must be filtered, and put away for use in close bottles. When the process of percolation is employed, great care must be taken so that the substances treated may be, as far as possible, exhausted of their soluble principles, and a perfectly clear tincture be obtained. To those who are not familiar with the process, the plan of maceration is preferable. (For full directions in regard to percolation, see U. S. Pharmacopœia, 1873, p. 3.)

Tinctu'ra Absin'thii Compos'ita, *Esscu'tia absin'thii compos'ita* seu *ama'ra, Com'pound tinc'ture of absinth* or *worm'wood.* (*Absinth., Artem. pontic., Caryoph.,* āā ʒss., *Sacch.,* ʒij., *Alcohol.,* Oss. Macerate for fifteen days. Ph. P.) Tonic, stomachic, vermifuge, and carminative. Dose, fʒij. to fʒss.

Tinctu'ra Aca'ciæ Cat'echu, T. catechu — t. Acetatis Ferri cum Alcohole, see T. ferri acetatis — t. Acidi Sulphurici, Sulphuricum acidum aromaticum.

Tinctu'ra Aconi'ti, (Ph. U. S., 1842,) *Tinctu'ra Aconi'ti folio'rum,* (Ph. U. S., 1851,) *T. A. Fo'lii,* (Ph. U. S., 1863,) *Tincture of Ac'onite.* (*Aconit. folior.,* ʒiv., *Alcohol. dilut.,* Oij. Macerate for 14 days, express, and filter through paper. It may also be made by displacement. Ph. U. S., 1863.) Dose, gtt. xx. or xxx. It is rubbed on the seat of neuralgia. This preparation is dismissed in the last edition (1873).

Tinctu'ra Aconi'ti Radi'cis, *Tinc'ture of Aconite root.* (*Aconit. radicis* in pulv. subtil., ʒxij., *Alcohol.,* Oij. Prepared by percolation. Ph. U. S., 1873.) Uses, same as the last.

Tinctu'ra Æthe'rea Camphora'ta, *Solu'tio cam'phoræ æthe'rea, Li'quor nervi'nus Bang'ii, Spiritus sulphu'rico-æthe'reus camphora'tus, Naph'tha vitri'oli camphora'ta.* (*Camphor.,* p. i., *Æther, sulphuric.,* p. ii.) Stimulant in atonic diseases, arthritic cardialgia, and spasm. Dose, 20 to 30 drops in white wine.

Tinctu'ra Æthe'rea Fer'ri, Alcohol (seu Tinctura) sulphurico-æthereus ferri — t. Alcoholicæ Chinæ composita, T. cinchonæ compositæ—t. Alcoholica corticum aurantiorum Whyttii, Tinctura cinchonæ amara — t. Alexipharmica Huxhami, Tinctura cinchonæ composita.

Tinctu'ra Al'oës, *T. Al'oës Socotri'næ, Essen'tia Al'oës, Al'cohol cum Al'oë perfolia'tâ, Tinc'ture of Al'oes.* (*Aloës Socot.* pulv., ʒj., *Glycyrrh.,* ʒiij., *Aquæ,* Ojss., *Alcohol.,* Oss. Macerate for 7 days, and filter. Ph. U. S., 1873.) Properties, those of aloes. Dose, fʒss. to fʒjss.

Tinctu'ra Al'oës Æthe'rea, *T. Aloës vitriola'ta, Æthe'real Tinc'ture of Al'oes.* (*Aloes So-*

cot., Myrrh., āā ℥jss., *Croci*, ℥j., *Sp. ætheris sulph.*, Oj. Digest the myrrh in the ether for 4 days; then add the aloes and saffron. Ph. E.) Stimulant and cathartic. Dose, f℥j. to f℥ij.

Tinctu'ra Al'oës Compos'ita, *Elix'ir Proprieta'tis* seu *Proprieta'tis Paracel'si* seu *aperitif'vum* seu *Al'oës, Tinctu'ra Al'oës cum Myr'rhâ* seu *Aloës et Myr'rhæ* (Ph. U. S.) seu *Al'oës et Myr'rhæ croca'ta, Elix'ir of long-life, Com'pound Tinc'ture of Al'oes*, (F.) *Elixir de longue vie, Baume de vie de Lelièvre.* (*Aloës Socot.* in pulv., *Myrrhæ* pulv., āā ℥iij., *Alcohol.*, q. s. Mix the powders, and obtain two pints of tincture by percolation. It may also be obtained by maceration.) Purgative and stomachic. Dose, f℥j. to f℥ij.

Boer'haave's Elix'ir consisted of *aloes, myrrh, saffron*, and *tartrate of potassa*, digested in *alcohol* and *water.*

Rad'cliffe's Elix'ir is formed of *Aloes Socotr.*, ℥vj., *Cort. cinnam., Rad. zedoar*, āā ℥ss., *Rad. rhei*, ℥j., *Coccinell*, ℥ss., *Syrup. rhamni*, ℥ij., *Sp. tenuior.*, Oj., *Aquæ puræ*, f℥v.

Tinctu'ra Al'oës et Myr'rhæ, T. aloës composita—t. Aloës et Myrrhæ crocata, T. aloës composita — t. Aloës vitriolata, T. aloës ætherea — t. Amara, T. gentianæ composita — t. Ammoniæ composita, Spiritus ammoniæ succinatus — t. Amomi repentis, T. cardamomi — t. Amomi zingiberis, T. zingiberis.

Tinctu'ra Angustu'ræ, *T. Cuspa'riæ, Tinc'ture of Angustu'ra.* (*Cort. cuspar.* in pulv. crass. redact., ℥ij., *Sp. vin. ten.*, Oij. Digest. Ph. D.) Dose, f℥j. to f℥ij.

Tinc'tura Antifebri'lis Warbur'gi, see Bebeeru.

Tinc'tura Antiodontal'gica, *Tooth'ache Tinc'ture.* (*Tanniu.*, ℈j., *Mastich.*, gr. v., *Æther.*, ℥ij. M.) To be applied on cotton wool to the tooth previously dried.

Tinctu'ra Aristolochi'æ Serpenta'riæ, T. serpentariæ.

Tinctu'ra Ar'nicæ, *Tincture of Ar'nica.* (*Arnic.*, ℥vj., *Alcohol.*, Ojss., *Aquæ*, Oss., *Alcohol. dilut.*, q. s. Mix the alcohol and water, slightly moisten the arnica with a portion of the mixture, bruise thoroughly in a mortar; pack it firmly in a percolator, and pour on it the remainder of the mixture, and then sufficient diluted alcohol to measure two pints. Ph. U. S., 1873.) Dose, gtt. v. to x. Applied, diluted with an equal proportion of water, by means of lint, as an excitant to bruises, and in cases of neuralgia. *Tinctura Arnicæ* of the British Pharmacopœia (1867), made by percolation, from the root—the U. S. preparation being from the flowers—is much weaker.

Tinctu'ra Aromat'ica, T. cinnamomi composita — t. Aromatica ammoniata, Spiritus ammoniæ aromaticus.

Tinctu'ra Assafœ'tidæ, *T. Fer'ulæ Assafœtidæ, Tinctura fœ'tida, Tinc'ture of Assafet'ida.* (*Assafœtid.* contus., ℥iv., *Alcohol.*, Oij. Macerate for 7 days, and filter. Ph. U. S., 1873.) Dose, gtt. xv. to f℥j.

Tinctu'ra Assafœ'tidæ Ammonia'ta, Spiritus ammoniæ fœtidus.

Tinctu'ra Auran'tii, *T. Cor'ticis Aurantii, Tinc'ture of Or'ange Peel.* (*Aurant. cort. amar.* in pulv., ℥iv., *Alcohol. dilut.*, q. s. Moisten the powder with two fluidounces of diluted alcohol, pack in a conical percolator, and gradually pour upon it diluted alcohol, until two pints of tincture are obtained. Ph. U. S., 1873.) Stomachic. Used as an adjunct to stomachic draughts. Dose, f℥ss. to f℥ij.

Tinctu'ra Aur'ea, Alcohol (seu tinctura) sulphuricoæthereus ferri.

Tinctu'ra Belladon'næ, *Tinc'ture of Belladon'na.* (*Belladonnæ folior.*, ℥iv., *Alcohol. dilut.*, q. s. Made like Tinct. aurantii. Ph. U. S., 1873.) Dose, gtt. xv. to xxx.

Tinctura Belladonnæ of the British Pharmacopœia (1867), made by percolation, is half the strength of the preceding.

Tinctu'ra Benzo'ini, *Tinc'ture of Benzoin.* (*Benzoin.* in pulv., ℥vj., *Alcohol.*, Oij. Macerate for 7 days and filter through paper. Ph. U. S., 1873.)

Tinctu'ra Benzo'ini Compos'ita, *T. Ben'zoës composita, Bal'samum Cathol'icum* seu *Per'sicum* seu *traumat'icum, Elix'ir traumaticum, Bal'samum Commendato'ris, Com'pound Tinc'ture of Ben'zoin, Fri'ar's* or *Ver'vain's Bal'sam, Wade's* or *Jes'uit's drops, Commander's* or *Wound Balsam, Balsam for Cuts.* (*Benzoin.* pulv., ℥iij., *Styrac.*, ℥ij., *Balsam. tolut.*, ℥j., *Aloës Socot.* pulv., ℥ss., *Alcohol.*, Oij. Macerate for 7 days, and filter. Ph. U. S., 1873.) Stimulant. Used chiefly to wounds and ulcers.

The basis of *Tur'lington's Bal'sam of Life, Tur'lington's Bal'sam*, is the Compound Tincture of Benzoin. The following form is recommended by a committee of the Philadelphia College of Pharmacy: — *Alcohol.*, Oviij., *Benzoin.*, ℥xij., *Styrac. liquid.*, ℥iv., *Aloës Socotrin.*, ℥j., *Balsam. Peruvian.*, ℥ij., *Myrrhæ*, ℥j., *Rad. angelic.*, ℥ss., *Balsam. tolut., Ext. glycyrrh.*, āā ℥iv. Digest for 10 days, and strain.

The *Es'sence of Colts'foot* consists of equal parts of the *Compound Tincture of Benzoin* and *Balsam of Tolu*, to which is added double the quantity of *Rectified Spirit of Wine.* It is sold as a pectoral.

Tinctu'ra Buch'u, *T. Bucku, T. Bucco, Tincture of Buchu.* (*Buch.*, ℥ijss., *Spirit. tenuior.*, Oj. Prepared by maceration, percolation, and filtration. Ph. B., 1867.) Dose, f℥j. to f℥iv. See Diosma.

Tinctu'ra Buck'u, Tinctura buchu.

Tinctu'ra Calum'bæ, (Ph. U. S., 1873,) *T. Calum'bæ* seu *Colom'bæ*, (Ph. U. S., 1851,) *Tincture of Calumba* or *Colum'bo, Colum'bo Bit'ters.* (*Columb. rad.* cont., ℥iv., *Alcohol. dilut.*, q. s. Moisten the powder with a fluidounce of diluted alcohol, transfer to a conical percolator, and gradually pour diluted alcohol upon it until two pints of tincture are obtained. Ph. U. S., 1873.) Dose, f℥ss. to f℥iv.

Tinctu'ra Cam'phoræ, Spiritus camphoræ.

Tinctu'ra Cam'phoræ Compos'ita, *T. O'pii Camphora'ta*, (Ph. U. S.,) *T. Cam'phoræ cum o'pio, Com'pound Tinc'ture* or *Cam'phorated Tinc'ture of O'pium, Compound Tincture of Camphor, Elix'ir Paregor'icum, Paregor'ic Elix'ir.* (*Opii* in pulv., *Acid. Benzoic.*, āā ℥j., *Ol. anisi*, f℥j., *Mellis despumat.*, ℥ij., *Camphor.*, ℈ij., *Alcohol. dilut.*, Oij. Mix. Macerate for 7 days, and filter through paper. Ph. U. S., 1873.) One fluidounce contains nearly gr. ij. of opium. Anodyne. Dose, f℥j. to f℥iij.

Squire's Elixir, an empirical carminative preparation, is thus made, according to one formula. (*Opii*, ℥iv., *Camphor*, ℥j., *Coccinell.*, ℥j., *Fœnicul. dulc.*, ℥ij., *Tinct. serpent.*, Oj., *Sp. anisi*, cong. ij., *Aquæ*, Oij., *Auri musivi*, ℥vj.

Tinctu'ra Can'nabis In'dicæ, *Tinc'ture of In'dian Hemp, Tinctura Cannabis*, (Ph. U. S., 1873,) *Tinc'ture of Hemp.* (*Ext. Cannab. Indicæ*, ℥vj., *Alcohol.*, Oj. Dissolve and filter. Ph. U. S.) Dose, about 40 drops.

Tinctu'ra Canthar'idis, *T. C. Vesicato'riæ, T. Lyt'tæ* seu *Mel'oës vesicato'rii, Tinc'ture of Canthar'ides, Tinc'ture of Blis'tering Flies, T. of Span'ish Flies*, (F.) *Teinture rubéfiante.* (*Cantharid.* pulv., ℥j., *Alcohol. dilut.*, q. s. Moisten the powder with f℥ss. of diluted alcohol, and obtain two pints of tincture by percolation with diluted alcohol. Ph. U. S., 1873.) Stimulant and diuretic, but not often used internally. Externally, stimulant. Dose, gtt. x.–xx.

Matthews's Injec'tion, a once celebrated nostrum for fistula in ano, consisted wholly of a dilute *Tincture of Cantharides.*

Tinctu'ra Cap'sici, *Tincture of Cap'sicum* or *Cayenne' Pep'per.* (*Capsic.* pulv., ℥j., *Alcohol. dil.*, q. s. Prepared like Tinctura cantharidis. Ph. U. S., 1873.) Stimulant. Dose, f℥ss. to f℥j.

Tinctu'ra Cardamo'mi, *T. Amo'mi repen'tis, Tinc'ture of Car'damom.* (*Cardam.* pulv., ℥iv., *Alcohol. dilut.*, q. s. Prepared like Tinct. aurantii. Ph. U. S., 1873.) Use, the same as the seeds. Dose, f℥j. to f℥iv.

Sol'omon's Balm of Gil'ead, an empirical preparation, seems to be an aromatic tincture, — of which *Cardamom* forms a leading ingredient, — made with brandy. Some affirm that it contains *cantharides.*

Tinctu'ra Cardamo'mi Compos'ita, *Tinctu'ra Stomach'ica, Com'pound Tinc'ture of Car'damom, Stom'ach Tinc'ture.* (*Cardamom.* pulv., ℥vj., *Carui* pulv., ℥ij., *Cinnam.* pulv., ℥v., *Cocci.* pulv., ℥j., *Mel. despum.*, ℥ij., *Alcohol. dilut.*, q. s. Mix the powders, and having moistened the mixture with f℥ss. of diluted alcohol, pack in a cylindrical percolator, and gradually pour diluted alcohol upon it until Oij. f℥vj. of tincture are obtained. Mix with the honey and filter.) Stomachic and carminative. Dose, f℥ij. to f℥iv.

Tinctu'ra Carminati'va Syl'vii, *Alcoöla'tum Carminati'vum Sylvii, Carmin'ative Elix'ir of Syl'vius.* (*Rad. angelic.*, 4 p., *Rad. imperator., Galang.*, ää 6 p., *Fol. rosmarin., Majoran., Rutæ, Basilic.*, ää 48 p., *Baccar. laur. nobil.*, 12 p., *Sem. angelic., Lignst. lerist., Anis.*. ää 16 p., *Zingib., Nuc. moschat.*, ää 6 p., *Cinnam.*, 12 p., *Caryoph., Cort. limon.*, ää 4 p. Add *Alcohol*, 1500 p. Macerate and distil 1000 p. Ph. P.) A warm stomachic, carminative, &c. Dose, f℥ss. to f℥ss.

Tinctu'ra Cascaril'læ, *T. Croto'nis Eleuthe'riæ, Al'cohol cum Croto'nē Cascarillâ, Tincture of Cascarilla.* (*Cascarill. cort.* cont., ℥ijss., *Sp. ten.*, Oj. Prepared by maceration, percolation, and filtration.) Dose, f℥j. to f℥iv.

Tinctu'ra Casto'rei, *T. Castorei Ros'cici* seu *Castorei Canaden'sis, Essen'tia Castorei, Al'cohol castoria'tum, Tinc'ture of Cas'tor.* (*Castor.* cont., ℥ij., *Alcohol.*, Oij. Macerate for 7 days, express, and filter. Ph. U. S., 1873.) Tonic and antispasmodic. Dose, gtt. xx. to f℥ij. or more.

Tinctu'ra Casto'rei Compos'ita, *T. Castorei ammonia'ta, Com'pound Tinc'ture of Cas'tor.* (*Cast.*, ℥j., *Assafœtid.*, ℥ss., *Alcohol. ammoniat.*, Oj. Ph. E.) Antispasmodic. Dose, f℥j. to f℥iv. Called, also, *Elixir fœ'tidum, Tinctura castorei fœtida* seu *fœtida ammonia'ta.*

Tinctu'ra Cat'echu, *Tinctu'ra Japon'ica* seu *Mimo'sæ Cat'echu* seu *Acu'ciæ Cat'echu, Tinc'ture of Cat'echu.* (*Catech.* pulv., ℥iij., *Cinnam.* pulv., ℥ij., *Alcohol. dilut.*, q. s. Mix the powders, moisten with f℥j. of diluted alcohol, and obtain two pints of tincture by percolation with additional diluted alcohol.) Astringent. Dose, f℥j. to f℥ij.

The *Con'centrated Solution of Char'coal,* sold for cleaning the teeth, seems to be little more than the tincture of catechu.

Tinctu'ra Chiret'tæ, *T. Chira'tæ,* (Ph. B., 1867,) *Tinc'ture of Chiret'ta.* (*Chirett.* cont., ℥ijss., *Spirit. tenuior.*, Oj. Prepared by maceration, percolation, and filtration.) Dose, f℥j. or f℥ij., as a tonic.

Tinctu'ra Chlorofor'mi Compos'ita, *Com'pound Tinc'ture of Chlo'roform.* (*Chloroform.*, f℥ij., *Spirit. rectificat.*, f℥viij., *Tinct. cardamom. comp.*, f℥x. M. Ph. B., 1867.) Dose, ♏xx.–lx.

Tinctu'ra Cicu'tæ, T. conii maculati.

Tinctu'ra Cincho'næ, *T. Cor'ticis Peruvia'ni Sim'plex* seu *Cort. Peruvia'ni, Tinc'ture of Cincho'na* or *of Bark.* (*Cinchon. flav.* in pulv., ℥vj., *Alcohol., Aquæ,* ää q. s. Mix three measures of alcohol with one of water, moisten the powder with f℥ij. of the mixture, and obtain Oij. of tincture by percolation with the remainder of the mixture. Ph. U. S., 1873.) Dose, f℥j. to f℥iv. or more.

Tinctu'ra Cincho'næ Æthe'rea Compos'ita, *T. Ki'næ Æthe'rea compos'ita, Elixir'ium Antisep'ticum Docto'ris Chaussier, Chaussier's Antisep'tic Elix'ir.* (*Cinchon. officin.*, ℥ij., *Cascarill.*, ℥ss., *Cinnam.*, ℥iij., *Croci*, ℥ss., *Sacch. alb.*, ℥xxxviij. Put these bruised into a matrass, and add *Vin. alb. Hispanic.* vel *Vin. muscat., Alcohol.*, ää Oj. Macerate for two days, and add *Æther. sulphuric.*, f℥jss. Ph. P.) Tonic, stimulant, and antiseptic. Dose, f℥ss. to f℥j.

Tinctu'ra Cincho'næ Ama'ra seu *alcohol'ica cor'ticum aurantio'rum Whyt'tii* seu *Kinki'næ ama'ra, Elix'ir antihypochondri'acum* seu *rob'orans Whyt'tii* seu *Whyt'tii* seu *stomach'icum spirituo'sum, Essen'tia Cor'ticis Peruvia'ni Compos'ita.* (*Cinch.*, p. viij., *Gentian. rad., Cort. aurant.*, ää p. iij., *Alcohol.* [s. g. ·900], 96 p. Digest.) Dose, one or two teaspoonfuls.

Tinctu'ra Cincho'næ Ammonia'ta, *T. Cor'ticis Peruvia'ni volat'ilis, Ammo'niated* or *Vol'atile Tinc'ture of Bark.* (*Cinchon. lancifol. cort.* cont., ℥iv., *Sp. ammon. aromat.*, Oij. Ph. L.) In dyspepsia, combined with acidity and languor.

Tinctu'ra Cincho'næ Compos'ita, *T. Cor'ticis Peruvia'ni Compos'ita* seu *febrif'uga Docto'ris Huxha'mi* seu *Alexiphar'maca Huxha'mi* seu *Alcohol'ica Chi'næ Compos'ita, Essen'tia Chi'næ* seu *Cor'ticis Peruvia'ni Alexiphar'maca Huxha'mi* seu *antisep'tica Hnxha'mi, Com'pound Tinc'ture of Cincho'na* or *Bark, Huxham's Tincture of Bark.* (*Cinchon. rubr.* pulv., ℥iv., *Aurant. amar. cort.* pulv., ℥iij., *Serpent.* pulv., ℥vj., *Alcohol., Aquæ,* ää q. s. Mix three measures of alcohol with one of water; having mixed the powders, moisten them with f℥iv. of the menstruum, pack them firmly in a conical glass percolator, and gradually pour on the menstruum until Oijss. of tincture are obtained.) More grateful than the simple tincture. Dose, f℥j. to f℥iij.

Tinctu'ra Cincho'næ Fla'væ, *Tinc'ture of Yel'low Cincho'na.* (*Cinchon. Flav.* pulv., ℥iv., *Spirit. tenuior.*, Oj. Prepared by maceration, percolation, and filtration. Ph. B., 1867.) Dose, f℥ss.–ij.

Tinctu'ra Cinnamo'mi, *T. Lau'ri Cinnamo'mi, Essen'tia Cinnamo'mi, Tinc'ture of Cin'namon.* (*Cinnam.* cont., ℥iij., *Alcohol., Aquæ,* ää q. s. Mix two measures of alcohol with one of water. Moisten the powder with f℥j. of the mixture, pack moderately in a conical percolator, and gradually pour the mixture upon it until Oij. of filtered liquid are obtained. Ph. U. S., 1873.) Stomachic. Dose, f℥j. to f℥ij.

Tinctu'ra Cinnamo'mi Compos'ita, *T.* seu *Essen'tia Aromat'ica, Al'cohol cum Aromat'ibus Compos'itus, Com'pound Tinc'ture of Cin'namon,* (F.) *Eau de Bonferme* ou *d'Armagnac.* (*Cinnam.* cont., ℥j., *Cardam.* cont., ℥ss., *Zingib.* cont., ℥iij., *Alcohol. dilut.*, Oij. Macerate for 14 days, express, and filter. It may, also, be prepared by displacement.) Use, same as the last. Dose, f℥j. to f℥iij.

Tinctu'ra Coc'ci Cac'ti, *T. Coc'ci,* (Ph. B.,) *Tinc'ture of Coch'ineal.* (*Cocci* pulv., ℥ijss., *Spirit. tenuior.*, Oj. Prepared by maceration. Ph. B., 1867.) Chiefly a coloring ingredient. At times, given in nervous affections. Dose, gtt. xij. to f℥j.

Tinctu'ra de Cochlea'riis, *Alcoöla'tum de Cochlea'riis* seu *antiscorbu'ticum.* (*Fol. cochlear. recent.*, 2500 p., *Rad. armoraciæ,* 230 p., *Alcohol.* (22° to 32° Beaumé), 3000 p.; distil off 2000 p. Ph. P.) Antiscorbutic. Dose, f℥ij. to f℥j.

Tinctu'ra Col'chici, (Ph. U. S., 1873,) *T. C. Sem'inis,* (Ph. U. S., 1851,) *Tinc'ture of Col'chicum, T. of Colchicum Seed.* (*Colchic. sem.* pulv., ℥iv., *Alcohol. dilut.*, Oij. Prepared by percolation. Ph. U. S., 1873.) Dose, ten to sixty drops.

Tinctu'ra Col'chici Compos'ita, Spiritus colchici ammoniatus—t. Colchici seminis, T. colchici —t. Colombæ, T. calumbæ.

Tinctu'ra Coni'i, *T. C. Macula'ti, T. Cicu'tæ, Tinc'ture of Hem'lock, T. of Conium.* (*Conii fol.*, ℥iv., *Alcohol. dil.*, Oij. Made by percolation. Ph. U. S., 1873.) Use, the same as that of the leaves. Dose, ♏xx. to f℥j. A *Tincture of Hemlock Fruit, Tinctura Coni'i*, formed of *Hemlock fruit* or *seeds*, bruised, ℥ijss., to *Proof spirit*, Oj., made by maceration and percolation, is officinal in the British Pharmacopœia for 1867. Dose, gtt. xxx.

Tinctu'ra Coni'i Macula'ti, T. conii—t. Convolvuli jalapæ, T. jalapii—t. corticis aurantii, T. aurantii—t. Corticis Peruviani composita, T. cinchonæ comp. —t. Corticis Peruviani simplex, T. cinchonæ—t. Corticis Peruviani volatilis, T. cinchonæ ammoniata.

Tinctu'ra Cro'ci Sati'vi, *T. Cro'ci, Tinc'ture of Saf'fron.* (*Croci Angl.* cont., ℥j., *Alcohol. dilut.*, Oj. Prepared by maceration and percolation. Ph. B., 1867.) Slightly stomachic. [?] Dose, f℥j. to f℥iij.

Tinctu'ra de Cro'co Compos'ita, *Elixir'ium de Ga'rus, Alcoola'tum de Cro'co Compos'itum, Com'pound Tinc'ture of Saf'fron, Elix'ir of Ga'rus.* (*Aloës Socotr.*, 320 p., *Myrrh.*, 64 p., *Croci*, 32 p., *Cinnam., Nuc. moschat., Caryoph.*, āā 16 p., *Alcohol.*, 1000 p., *Aq. flor. aurant.*, 5000 p. Digest for two days; distil 4000 p. and add *Syrup of capillaire*, 5000 p. Ph. P.) Aromatic, cordial, stomachic. It is also called *Elix'ir cordia'lē et stomach'icum*, and *E. anticol'icum croca'tum.*

Tinctu'ra Croto'nis, *Tinc'ture of Cro'ton.* Under this name Mr. E. Wilson recommends 'a most valuable cutaneous stimulant,' made by adding four fluidounces of *Alcohol* to one ounce of the bruised seeds of *Croton tiglium.*

Tinctu'ra Croto'nis Eleuthe'riæ, T. cascarillæ.

Tinctu'ra Cubeb'æ, *Tincture of Cu'beb* or *Cu'bebs.* (*Cubeb.* cont., ℥iv., *Alcohol. dilut.*, Oij. Prepared by percolation. Ph. U. S., 1873.) Dose, one or two fluidrachms.

Tinctu'ra Cuspa'riæ, Tinctura angusturæ.

Tinctu'ra Digita'lis, *T. Digita'lis purpu'reæ, Tinc'ture of Digita'lis.* (*Digital.*, ℥iv., *Alcohol. dilut.*, Oij. Prepared by percolation. Ph. U. S., 1873.) Use, same as that of the leaves. Dose, gtt. x.

Tinctu'ra Er'gotæ, *Tincture of Ergot.* (*Ergot.* in pulv. crass., ℥v., *Sp. tenuior.*, Oj. Prepared by maceration, percolation, and filtration. Dose, ♏x.–f℥j.

Tinctu'ra Er'gotæ Æthe'rea, *Ethe'real Tincture of Ergot.* (*Ergot.* contus., ℥xv., *Æther.*, Oij. (Imp. meas.). Macerate for 7 days, express, and filter. Ph. L.) Dose, 60 to 90 minims.

Tinctu'ra Febrif'uga Docto'ris Huxha'mi, T. cinchonæ composita.

Tinctu'ra Fer'ri Aceta'tis, *Tinc'ture of Acetate of Iron.* (*Liquor. ferri persulphat.*, f℥ijss., *Potass. acetat.*, ℥ij., *Spirit. rectificat.*, q. s. Made by solution and filtration, a pint of tincture being obtained. Ph. B., 1867.) Dose, ♏v.–xxx. Tonic and astringent.

Tinctu'ra Fer'ri Ammonia'ta, *T. Fer'ri ammoniaca'lis* seu *Flo'rum martia'lium* seu *Mar'tis Mynsich'ti, Tinc'ture of Ammoniated Iron.* (*Ferri ammon.*, ℥iv., *Sp. ten.*, Oj. Ph. L.) Use, same as that of the ammoniated iron. Dose, f℥ss. to f℥ij.

Tinctu'ra Fer'ri Ammo'niochlo'ridi, *Tincture of Ammo'niochlo'ride of Iron.* (*Ferri ammoniochlorid.*, ℥iv., *Alcohol. dilut.*, *Aquæ destillat.*, āā Oj. (Imp. meas.) Dissolve and filter. Ph. L.) Dose, gtt. x. to xx.

Tinctu'ra Fer'ri Chlo'ridi, T. ferri muriatis.

Tinctu'ra Fer'ri Muria'tis, *T. Fer'ri chlo'ridi* (Ph. U. S.) seu *sesquichlo'ridi* seu *Mar'tis in spiritu sa'lis* seu *Mar'tis cum spir'itu sa'lis* seu *Fer'ri Muria'ti, Liquor Ferri Muria'tis, Tincture of Muriate of Iron, Tincture of Steel, Alcohol ferra'tus.* (*Liq. ferri chloridi*, Oss., *Alcohol.*, Ojss. Mix, and preserve in a well-stopped bottle. Ph. U. S., 1873.) S. g. 0990. Tonic and styptic. It has been given also with advantage in erysipelas and scarlatina, in the dose of ♏x. to ♏xx. every two or three hours.

Tinctu'ra Fer'ri Perchlo'ridi, *Tinc'ture of Perchlo'ride of Iron*, of the British Pharmacopœia, is made of *strong solution of perchloride of iron*, f℥v., and *rectified spirit*, f℥xv. S. g. 0992. Dose, ♏x.–xxx.

Bestucheff's Tincture or *Klaproth's Tincture* is an ethereal tincture of chloride of iron. It is composed of dry *perchloride of iron*, one part; *Hoffmann's anodyne liquor*, seven parts.

The *Antivene'real Drops*, at one time so celebrated at Amsterdam, were examined by Scheele, and found to be a tincture of chloride of iron and corrosive sublimate.

Tinctu'ra Fer'ri Sesquichlo'ridi, T. ferri muriatis —t. Ferulæ assafœtidæ, T. assafœtidæ —t. Florum martialium, T. ferri ammoniata —t. Fœtida, T. assafœtidæ —t. Fœtida ammoniata, T. castorei composita —t. Fuliginis, see Fuligo.

Tinctu'ra Gal'bani, *Tincture of Gal'banum.* (*Galb.*, ℥ij., *Sp. tenuior.*, Oij. Ph. D.) Stimulant and antispasmodic. Dose, f℥j. to f℥iij.

Tinctu'ra Galla'rum, *T. Gal'læ*, (Ph. U. S.,) *Tincture of Galls, T. of Nut'gall.* (*Gall.* contus., ℥iv., *Alcohol. dilut.*, Oij. Prepared by percolation. Ph. U. S. 1873.) Astringent. Dose, f℥j. to f℥iij.

Tinctu'ra Gentia'næ Compos'ita, *Tinct. Ama'ra, Elix'ir Stomach'icum, Com'pound Tincture of Gen'tian, Spirit Bitters.* (*Gent.* pulv., ℥ij., *Aurant. cort.*, ℥j., *Cardam.* cont., ℥ss., *Alcohol. dilut.*, Oij. Prepared by percolation. Ph. U. S., 1873.) Tonic and stomachic. Dose, f℥j. to f℥iij.

The French Codex (1866) has a different formula for *Teinture de Gentiane Composée, Élixir Amer de Peyrilhe.*

Bro'dum's Nervous Cordial consists of the *Tinctures of Gentian, Calumba, Cardamom*, and *Bark*, with the *Compound Spirit of Lavender* and *Wine of Iron.*

Stoughton's Elixir is a compound tincture of gentian. The *Elixir'ium Docto'ris Stoughton* seu *Tinctura Amara* of the Parisian Codex is prepared as follows: *Absinth. summat.* exsiccat., *Teucri chamædryos, Rad. gentian., Cort. aurant.*, āā ℥vj., *Cascarillæ*, ℥j., *Rhei*, ℥ss., *Aloës Socotr.*, ℥j., *Alcohol.*, Oij. Digest. Dose, f℥j. to f℥iij.

The *Elixir Viscera'lē Hoffman'ni* does not differ essentially from these preparations.

Tinctu'ra Guai'aci, *T. Guai'aci Officina'lis, Tincture of Guai'acum, T. of Guaiac.* (*Guaiac.*, ℥vj., *Alcohol.*, Oij. Prepared by percolation. Ph. U. S., 1873.) Stimulant and sudorific. Used especially in rheumatic and arthritic cases. Nearly the same as *Hill's Essence of Bardana* or *Burdock.*

Tinctu'ra Guai'aci Ammonia'ta, *T. Guaiaci'na Volat'ilis, T. Guai'aci, Elixir Guai'aci Volat'ilis, Alcohol cum Guai'aco officina'lē ammoni'atus, A. Ammo'niæ et Guai'aci, Ammo'niated Tincture of Guai'acum, Vol'atile Tinc'ture of Guai'acum.* (*Guaiac.* pulv., ℥vj., *Sp. ammon. arom.*, Oij. Macerate for 7 days, and filter. Ph. U. S., 1873.) Properties, same as the last. Dose, f℥j. to f℥ij.

Hatfield's Tincture — a nostrum — consists of *Guaiacum* and *Soap*, āā ℥ij., *Rectified spirit*, Ojss.

Tinctu'ra Helleb'ori, *T. Helleb'ori Ni'gra, T. Melampo'dii, Tinc'ture of Black Hel'lebore.* (*Helleb. nigr.* cont., ℥iv., *Alcohol. dilut.*, Oij. Prepared by percolation. Ph. U. S., 1873.) Dose, f℥ss. to f℥j.

Tinctu'ra Hi'era, Vinum aloës.

Tinctu'ra Hu'muli, *T. Lu'puli, Tinc'ture of Hops.* (*Humuli,* ℥v., *Alcohol. dilut.,* Oij. Prepared by percolation.) Tonic and sedative. Dose, f℥ss. to f℥iij.

Tinctu'ra Hyoscy'ami, *T. Hyoscy'ami ni'gri, Tincture of Hen'bane, T. of Hyoscy'amus.* (*Hyoscyam. fol.,* ℥iv., *Alcohol. dilut.,* Oij. Prepared by percolation. Ph. U. S., 1873.) Narcotic, anodyne. Dose, gtt. xx. to f℥ij.

Tinctu'ra Io'dini, (Ph. U. S., 1842,) *T. Iodin'ii,* (Ph. U. S., 1873.) *Alcohol Io'dii, Tinc'ture of Iodine.* (*Iodin.,* ℥j., *Alcohol.,* Oj. Dissolve. Ph. U. S.) The tincture spoils by keeping, or at least deposits the iodine. It has been much used in goitre, &c. Dose, ten drops three times a day.

Tinctura I'odi (Ph. B., 1867) is made of *Iodine,* ℥ss., *Iodide of potassium,* ℥¼, *Rectified spirit,* Oj. Dose, ♏x. to xx.

An ethereal and a chloroform tincture of iodine have been used, to affect the system with iodine by inhalation.

Under the name *Tinctura Iodinii Decolora'ta,* a colorless alcoholic solution of iodine in alcohol has been proposed, in which the color of the iodine has been destroyed by the action of ammonia.

Tinctu'ra Io'dini Compos'ita, (Ph. U. S., 1842,) *T. Iodin'ii Compos'ita,* (Ph. U. S., 1873,) *Com'pound Tinc'ture of Iodine.* (*Iodin.,* ℥ss., *Potassii iodid.,* ℥j., *Alcohol.,* Oj. Dissolve. Ph. U. S., 1873.) Dose, 10 to 30 drops.

Tinctu'ra Jala'pii, *T. Jala'pæ* (Ph. U. S.) seu *Convol'vuli Jalapæ, Vali'ga, Tinc'ture of Jal'ap.* (℥vj. of jalap being moistened with alcohol, 2 measures, and water, 1 measure, and Oij. of tincture passed by percolation. Ph. U. S., 1873.) Cathartic. Dose, f℥j. to f℥iv.

Tinctu'ra Jala'pii Compos'ita, *Elix'ir Jalap'æ Compos'itum* seu *pur'gans* seu *anthelmin'ticum succo'rum, Essen'tia cathol'ica pur'gans Roth'ii,* (F.) *Eau de vie Allemande.* (*Jalap.,* ℔ss., *Scammon.,* ℥j., *Alcohol.* (22°), Ovj. Macerate for eight days. Ph. P.) Dose, 60 to 100 drops.

Tinctu'ra Japon'ica, Tinctura catechu — t. Kinæ kinæ ætherea composita, Tinctura cinchonæ ætherea composita—t. Kinkinæ amara, Tinctura cinchonæ amara.

Tinctu'ra Ki'no, *Tinc'ture of Ki'no.* (*Kino* in pulv., ℥vj., *Alcohol., Aquæ,* ää q. s. Put the kino, mixed with an equal bulk of sand, into a percolator, and gradually pour on alcohol and water, two measures of the former to one of the latter, until f℥viij. of filtered liquor pass. Ph. U. S., 1873.) Astringent. Dose, f℥j. to f℥ij.

Tinctu'ra Krame'riæ, *Tinc'ture of Rhat'any.* (*Kramer.* in pulv., ℥vj., *Alcohol. dilut.,* Oij. Prepared by percolation. Ph. U. S., 1873.) Dose, f℥j. to f℥ij.

Tinctu'ra Lactuca'rii, *Tinc'ture of Lactuca'rium.* (*Lactucar.* in pulv., ℥iv., *Sp. tenuior.,* Oij. (Imp. meas.). Best prepared by percolation. Ph. E.) Dose, 30 minims to f℥j.

Tinctu'ra Lau'ri Cinnamo'mi, Tinctura cinnamomi—t. Lavandulæ composita, Spiritus lavand. comp.

Tinctu'ra Limo'nis, *Tinc'ture of Lem'on peel.* (*Limon. cort.,* ℥ijss., *Sp. tenuior.,* Oj. Macerate for 7 days, express, and filter. Ph. B., 1867.) Dose, f℥j. to f℥ij.

Tinctu'ra Lobe'liæ, *Tinc'ture of Lobe'lia.* (*Lobel.,* ℥iv., *Alcohol. dilut.,* Oij. Prepared by percolation. Ph. U. S., 1873.) Dose, f℥j. to f℥ij.

Tinctu'ra Lobe'liæ Æthe'rea, *Ethe'real Tinc'ture of Lobe'lia.* (*Lobel.* pulv., ℥ijss., *Sp. æther. sulph.,* Oj. Ph. B., 1867.) Dose, same as the last.

Tinctu'ra Lu'puli, Tinctura humuli, T. lupulinæ.

Tinctu'ra Lupuli'næ, *T. Lu'puli,* (Ph. E.,) *Tinc'ture of Lu'pulin.* (*Lupulin.,* ℥iv., *Alcohol.,* Oij. Prepared by percolation. Ph. U. S., 1873.) Dose, f℥j. to f℥ij.

Tinctu'ra Lyt'tæ, Tinctura cantharidis — t. Martis Glauberi, see Ferrum tartarizatum — t. Martis Mynsichti, Tinctura ferri ammoniata — t. Martis in Spiritû salis, Tinctura ferri muriatis — t. Martis tartarizata, see Ferrum tartarizatum — t. Martis vinosa, Vinum ferri.

Tinctu'ra Mati'co, *Tinc'ture of Mati'co.* (*Matico* in pulv. crass., ℥viij. (avoird.), *Sp. tenuior.,* Oij. (Imp. meas.). Macerate for 14 days, express, and filter. Ph. D.) Dose, f℥j. to f℥iij.

Tinctu'ra Melampo'dii, Tinctura hellebori nigri—t. Meloës vesicatorii, Tinctura cantharidis — t. Metallorum, Lilium Paracelsi — t. Mimosæ catechu, Tinctura catechu.

Tinctu'ra Mos'chi, *Tinc'ture* or *Es'sence of Musk.* (*Mosch.* in pulv. redact., ℥ij., *Sp. vini rect.,* Oj.) Dose, f℥j. to f℥iv.

Tinctu'ra Myr'rhæ, *Tinc'ture of Myrrh, Simple Tinc'ture of Myrrh.* (*Myrrhæ* cont., ℥iij., *Alcohol.,* Oij. Prepared by percolation. Ph. U. S., 1873.) Tonic, 'deobstruent,' antiseptic, and detergent. It is chiefly used in gargles, and applied to foul ulcers, spongy gums, &c.

Hud'son's Preser'vative for the Teeth and Gums consists of *Tinct. myrrh., Tinct. cinch., Aq. cinnam.,* ää ℥iij., *Eau d'arquebusade,* ℥j., *Pulv. gum. Arab.,* ℥ss. M.

Tinctu'ra Nervi'na Bestuchef'ii, Tinctura (seu alcohol) sulphuricoætherea ferri—t. Nervina Halensis, Tinctura (seu alcohol) sulphuricoætherea ferri — t. Nervinotonica, Lamotte's, Alcohol (seu Tinctura) sulphuricoæthereus ferri.

Tinctu'ra Nu'cis Vom'icæ, *Tinc'ture of Nux Vom'ica.* (*Alcohol.,* s. g. 837, f℥j., *Dry Extract of Vux Vomica,* 3 gr.) Dose, gtt. v. to xxx., in cases where the nux vomica is indicated. It is directed in the Ph. U. S. (1873) to be prepared as follows: *Nucis vomicæ* pulv., ℥viij., *Alcohol.,* Oij. Prepared by percolation. Dose, gtt. v. to xx.

Tinctu'ra O'lei Men'thæ Piperi'tæ, Spiritus menthæ piperitæ.

Tinctu'ra O'lei Men'thæ Vir'idis, Spiritus menthæ viridis.

Tinctu'ra O'pii, *T. Theba'ica seu Sedati'va, Theri'aca cœles'tis, Al'cohol cum O'pio, Tinc'ture of O'pium, Liq'uid Lau'danum.* (*Opii* pulv., ℥ijss., *Aquæ, Alcohol.,* ää Oj., *Alcohol. dilut.,* q. s. Macerate the opium with the water for three days, with frequent agitation; then add the alcohol, and continue the maceration for three days longer. Introduce the mixture into a percolator, and when the liquid has ceased to pass, pour diluted alcohol upon it until two pints of tincture are obtained.) Thirteen minims represent one grain of opium. Properties, those of opium. Dose, gtt. xx. to lx. By macerating the dregs remaining after making the *Tinctura Opii* in a solution of *Tartaric Acid,* a solution is obtained which is said to be devoid of the exciting and constipating properties of the tincture of opium. Gray calls it *Haden's Li'quor O'pii Sedati'vus.*

Tinctu'ra O'pii Aceta'ta, *Ac''etated Tinc'ture of O'pium.* (*Opii* exsiccat. pulv., ℥ij., *Aceti destill.,* f℥xij., *Alcohol.,* Oss. Rub the opium with the vinegar, add the alcohol, and having macerated for 7 days, express, and filter. Ph. U. S., 1873.) Twenty drops are equivalent to a grain of opium.

Tinctu'ra O'pii Ammonia'ta, *Ammo'niated Tinc'ture of O'pium, Ed'inburgh Paregor'ic Elix'ir.* (*Acid. benz., Croci,* ää ℥iij., *Opii,* gr. c., *Ol. anisi,* f℥j., *Liquor. ammoniæ fort.,* f℥iv., *Spirit. rectificat.,* f℥xvj. Macerate for 7 days, express and filter. Ph. B., 1867.) Each f℥j. contains 5 grains of opium. Used like the *Tinctura Camphoræ Composita.*

Tinctu'ra O'pii Camphora'ta, Tinctura camphoræ composita.

Tinctu'ra Plum'bosa, Liquor plumbi subacetatis dilutus.

Tinctu'ra O'pii Deodora'ta, *Deo'dorized Tinc'ture of O'pium.* (A solution of dried pulverized *opium*, ℥ijss., in *water*, shaken with *ether;* and, the ethereal solution having been poured off, evaporating until all traces of ether have disappeared; mixing with *water*, and filtering; and adding *water* through the filter sufficient to make the liquid a pint and a half; adding, lastly, half a pint of *alcohol*, and mixing. Ph. U. S., 1873.) By treating the opium with water in place of alcohol, the resinous and odorous principles are sparingly taken up. Its strength is that of Tinctura opii.

Tinctu'ra Pyre'thri, *Tinc'ture of Pel'litory.* (*Pyreth.* pulv., ℥iv., *Spirit. rectificat.*, Oj. Prepared by maceration, percolation, and filtration. Ph. B., 1867.)

Tinctu'ra Quas'siæ, *T. Quas'siæ excel'sæ, Tinc'ture of Quas'sia.* (*Quassiæ* pulv., ℥ij., *Alcohol. dilut.*, Oij. Prepared by percolation. Ph. U. S., 1873.) Tonic. Dose, f℥j. to f℥ij.

Tinctu'ra Quas'siæ Compos'ita, *Com'pound Tinc'ture of Quas'sia.* (*Cardam. sem.* contus., *Cocci* contus., āā ℥ss., *Cinnam., Quassiæ*, āā ℥vj., *Uvar. passar.*, ℥vij., *Sp. tenuior.*, Oij. [Imp. meas.]. Digest for 7 days, express, and filter. May be prepared also by percolation. Ph. E.) Dose, as a tonic, f℥j. or f℥ij.

Tinctu'ra Qui'næ Compos'ita, *Com'pound Tinc'ture of Qui'na.* (*Quinæ sulph.*, ℥v. and ℈j., *Tinct. aurantii*, Oij. [Imp. meas.]. Digest for 7 days, and filter. Ph. L.) Each fluidrachm contains a grain of the sulphate.

Tinctu'ra Qui'næ Sulpha'tis, *Tinc'ture of Sul'phate of Qui'nia.* (*Sulphate of Quinia*, gr. vj., *Alcohol.* [·847], f℥j. M.) Dose, f℥j. to f℥iv., in the day.—*Tinctu'ra Cincho'næ Sulpha'tis* may be made in a similar manner.

Tinctu'ra Qui'niæ, *Tinc'ture of Qui'nia.* (*Quin. sulph.*, gr. clx., *Tinct. aurantii*, Oj. Dissolve by gentle heat, let it stand for three days in a closed vessel, and filter. Ph. B., 1867.) Dose, f℥ss.–ij.

Tinctu'ra Rhabar'bari, Tinctura rhei — t. Rhabarbari composita, Tinctura rhei composita — t. Rhabarbari vinosa, Vinum rhei palmati.

Tinctu'ra Rhe'i, *T. Rhabar'bari* seu *Rhabarbari spirituo'sa* seu *Rhæ'i* seu *Rhe'i palma'ti, Tinc'ture of Rhu'barb.* (*Rhei* pulv., ℥iij., *Cardam.* pulv., ℥ss., *Alcohol. dilut.*, Oij. Prepared by percolation. Ph. U. S., 1873.) Stomachic or purgative, according to the dose employed — f℥j. to ℥ij. as a stomachic; f℥iv. to f℥j. as a purgative.

Tinctu'ra Rhe'i Compos'ita, *T. Rhabar'bari compos'ita, Com'pound Tinc'ture of Rhu'barb.* (*Rhei rad.* concis., ℥ij., *Glycyrrhiz. rad.* cont., ℥ss., *Zingib. rad.* concis., *Croci stigmat.*, āā ℥ij., *Aquæ*, f℥xij., *Sp. ten.*, Oj. Ph. L.) Properties, same as the last.

Tinctu'ra Rhe'i et Al'oës, *Elix'ir sa'crum, Tinc'ture of Rhu'barb and Al'oes.* (*Rhei* concis., ℥x., *Aloes* pulv., ℥vj., *Cardam.* cont., ℥ss., *Alcohol. dilut.*, Oij. Macerate for 14 days, express, and filter.) Properties, like the last.

Ry'mer's Car'diac Tinc'ture consists of an infusion of *Capsicum, Camphor, Cardamom seeds, Rhubarb, Aloes,* and *Castor* in *Proof Spirit,* with a very small quantity of *Sulphuric Acid.*

Tinctu'ra Rhe'i et Gentia'næ, *Tinctu'ra Rhe'i Ama'ra, Tinc'ture of Rhu'barb with Gen'tian.* (*Rhei* cont., ℥ij., *Gentian* cont., ℥ss., *Alcohol. dilut.*, Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement.) Properties, same as the last.

Tinctu'ra Rhe'i et Sen'næ, *Tinc'ture of Rhu'barb and Sen'na, War'ner's Gout Cor'dial.* (*Rhei* pulv., ℥j., *Sennæ* pulv., ℥ij., *Coriandr.* pulv., *Fœnicul.* pulv., āā ℥j., *Glycyrrhiz.* pulv., ℥ss., *Uvar. passar.* acinis exemptis., ℔ss., *Alcohol. dilut.*, Oiij. Macerate for 7 days, express, and filter. Ph. U. S., 1873.) Dose, f℥ss. to f℥ij.

Tinctu'ra Rhœ'i, Tinctura rhei — t. Rhœi amara, Tinctura rhei et gentianæ — t. Sacra, Vinum aloës.

Tinctu'ra Sabi'næ, *Tinc'ture of Sav'ine.* (*Savine,* dried and powdered, ℥ijss., *Proof Spirit,* Oj. Made by maceration and percolation. Ph. B., 1867.) Dose, ♏xv. to xxx.

Tinctu'ra Sanguina'riæ, *Tinc'ture of Blood'-root.* (*Sanguinar.*, ℥iv., *Alcohol., Aquæ*, āā q. s. — three measures of alcohol to one of water. Prepared by percolation. Ph. U. S., 1873.) Dose, 30 to 60 drops.

Tinctu'ra Sapo'nis Camphora'ta, Linimentum saponis camphoratum — t. Saponis et Opii, Linimentum saponis et opii.

Tinctu'ra Scil'læ, *Tinc'ture of Squill.* (*Scillæ*, ℥iv., *Alcohol. dilut.*, Oij. Prepared by percolation. Ph. U. S., 1873.) Dose, gtt. xv. to lx.

Tinctu'ra Sedati'va, Tinctura opii.

Tinctu'ra Sen'egæ, *Tinc'ture of Sen'ega.* (*Senegæ rad.* pulv., ℥ijss., *Spirit. tenuior.*, Oj. Prepared by maceration and percolation. Ph. B., 1867.) Dose, f℥ss.–ij.

Tinctu'ra Sen'næ, *T. Sen'næ compos'ita, Elix'ir Salu'tis, Daf'fy's Elix'ir, Tinc'ture of Sen'na.* (*Sennæ fol.*, ℥ijss., *Carui sem.* cont., *Coriandr.* cont., āā ℥ss., *Uvarum passarum* demptis acinis, ℥ij., *Sp. ten.*, Oj. Prepared by maceration and percolation. Ph. B., 1867.) Dose, f℥j.–iv. Stomachic, carminative, and cathartic.

Tinctu'ra Sen'næ et Jala'pæ, *Tinc'ture of Sen'na and Jal'ap.* (*Sennæ*, ℥iij., *Jalap.* pulv., ℥j., *Coriandr.* cont., *Carui* cont., āā ℥ss., *Cardam.* cont., ℥ij., *Sacch.*, ℥iv., *Alcohol. dilut.*, Oiij. Macerate for 14 days, express, and filter. It may also be prepared by displacement.) Dose, f℥ij. to f℥j.

Tinctu'ra Serpenta'riæ, *T. Serpenta'riæ* seu *Virginia'næ* seu *Aristolochi'æ Serpentariæ, Tinc'ture of Snake'root.* (*Serpent.*, ℥iv., *Alcohol. dilut.*, Oij. Prepared by percolation. Ph. U. S., 1873.) Tonic. Dose, f℥ss. to f℥ij.

Tinctu'ra Stomach'ica, Tinctura cardamomi composita.

Tinctu'ra Stramo'nii, *Tinc'ture of Stramo'nium.* (*Stramon. sem.* pulv., ℥iv., *Alcohol. dilut.*, Oij. Prepared by percolation. Ph. U. S., 1873.) Dose, ten to twenty minims.

Tinctu'ra Strych'niæ, *Tinc'ture of Strych'nia.* (*Alcohol.*, s. g. ·837, Oj., *Strychniæ*, gr. iij.) Dose, 6 drops to 24. Properties, those of strychnia.

Tinctu'ra (seu Al'cohol) Sulphu'ricoæthe'rea Fer'ri, *Gut'tæ nervi'næ, Liq'uor Anod'ynus Martia'lis, Al'cohol æthe'reus ferra'tus, Naph'tha Vitri'oli Martia'lis, Solu'tio Muria'tis fer'rici æthe'rea, Spir'itus sulphu'ricoæthe'reus martia'lis, Tinctu'ra nervi'na Halen'sis* seu *ton'iconervi'na Halen'sis* seu *aur'ca* seu *nervi'na Bestuchef'fi* seu *nervinoton'ica* (Lamotte's) seu *æthe'rea fer'ri, Æ'ther Martia'lis, De La Motte's Gold'en Drops, Bestucheff's Ner'vous Tinc'ture,* (F.) *Elixir d'Or de M. le Général de la Motte.* An ethereal solution of chloride of iron. It is much used in gout, hypochondriasis, &c.

Tinctu'ra Sul'phuris Volat'ilis, Liquor fumans Boylii.

Tinctu'ra Sum'bul, *Tinc'ture of Sum'bul.* (*Sumbul. rad.* in pulv. crass., ℥ijss., *Spirit. tenuior.*, Oj. Prepared by maceration and percolation. Ph. B., 1867.) Dose, ♏x.–xxx.

Tinctu'ra Theba'ica, Tinctura opii, Vinum opii.

Tinctu'ra Toluif'eræ Bal'sami, *T. Bal'sami Toluta'ni, T. Toluta'ni,* (Ph. U. S., 1842,) *T. Toluta'na,* (Ph. U. S., 1863,) *T. Tolu,* (Ph. U. S., 1873,) *Tinc'ture of Bal'sam of Tolu'.* (*Bals. Tolutan.,*

℥iij., *Alcohol.*, Oij.) Reputed to be expectorant and corroborant. Dose, f℥ss. to f℥j. or more.

Tinctu'ra Ton'ica Nervi'na Halen'sis, Tinctura (seu Alcohol) sulphuricoætherea ferri.

Tinctu'ra Valeria'næ, *Tinc'ture of Vale'rian.* (*Valerian.* pulv., ℥iv., *Alcohol. dilut.*, Oij. Prepared by percolation. Ph. U. S., 1873.) Stimulant and antispasmodic. Dose, f℥ss. to f℥ij.

Tinctu'ra Valeria'næ Ammonia'ta, *T. Valeria'næ volat'ilis, Ammo'niated* or *Vol'atile Tinc'ture of Vale'rian.* (*Valerianæ* cont., ℥iv., *Sp. ammon. arom.*, Oij. Macerate for seven days, express, and filter. Ph. U. S., 1873.) Like the former. Dose, f℥ss. to f℥ij.

Tinctu'ra Vera'tri, *T. Veratri al'bi, Tinc'ture of White Hel'lebore.* (*Rad. verat. alb.* cont., ℥viij., *Alcohol. dilut.*, Oijss. Ph. E.) Emetic and cathartic, but not very manageable. Dose, gtt. v. to x.

Tinctu'ra Vera'tri Vir'idis, *Tinc'ture of Green* or *Amer'ican Hel'lebore.* (*Veratr. virid.* pulv., ℥xvj., *Alcohol.*, Oij. Moisten the powder with f℥iv. of alcohol, pack it firmly in a cylindrical percolator, and gradually pour alcohol upon it until Oij. of tincture are obtained. Ph. U. S., 1873.) Sedative. Dose, gtt. vij. every three hours until the pulse is reduced.

Tinctu'ra Zingib'eris, *T. Amo'mi Zingib'eris, Tinc'ture of Gin'ger.* (*Zingib.* pulv., ℥viij., *Alcohol.*, Oij. Made by percolation. Ph. U. S., 1873.) Stimulant and carminative. Dose, f℥ss. to f℥j.

Tinctu'ra Zingib'eris For'tior, *Strong Tinc'ture of Gin'ger, Essence of Ginger.* (*Zingib.* pulv. subtil., ℥x., *Spirit. rectificat.*, Oj. Prepared by percolation.) Dose, ♏v.–xx.

Tin'der, ([Sax.] tyndre, tendre, from tynan, 'to kindle,') Boletus igniarius.

Tin'ea, 'a gnawing worm,' Porrigo — t. Capitis, Porrigo — t. Ciliaris, see Ophthalmia tarsi — t. Circinata, see Herpes — t. Decalvans, Porrigo decalvans — t. of the Eyelids, see Ophthalmia tarsi — t. Faciei, Porrigo larvalis — t. Favosa, Porrigo favosa — t. Ficosa, Porrigo scutulata — t. Furfuracea, Porrigo furfurans — t. Granulata,

Porrigo scutulata, Porrigo lupinosa — t. Lactea, Porrigo larvalis — t. Lupina, Porrigo lupinosa — t. Mucosa, Porrigo lupinosa — t. Porriginosa, Porrigo furfurans—t. Tarsi, see Ophthalmia tarsi — t. Tondens, Porrigo decalvans — t. Tonsurans, Porrigo decalvans.

Tin'ea Un'guis. A condition of the nail in which it appears to be eroded.

Tin'ea Ve'ra, Porrigo favosa.

Tin'eæ, pl. of *tinea,* Worms.

Tines'mus, Tenesmus.

Ting'ling, (*tinnire,* 'to jingle,') (Sc.) *Dirling.* A sharp, purring or thrilling sensation, not always painful.

Tink'er's Weed, Triosteum.

Tink'ling, Metal'lic, (like tingling,) Tintement métallique.

Tin'na, see Chloasma.

Tinnimen'tum Metal'licum, (from *tinnio,* 'I tinkle,') Tintement métallique.

Tinni'tus (gen. *Tinnitûs*) **Aur'ium,** (from *tinnio, tinnitum,* 'I tinkle,') 'ringing of the ears,' *Fluctua'tio* seu *Son'itus* seu *Susur'rus* seu *Sib'ilus* seu *Strep'itus* seu *Sibilis'mus aurium, Paracu'sis imaginaria, Ote'chus, Syrig'mus, Syring'mus, Sib'ilus clango'sus, E'chos, Eneche'ma, Bom'bus, Bombita'tio, Mur'mur,* (F.) *Tintement, T. d'Oreille, Tintouin, Bourdonnement, Bruissement.* An imaginary sound, like the ringing of a bell, the noise of wind, the murmur of water, &c., heard in health and in sickness. It is often an accompaniment of cerebral disorder.

Tintement, Tinnitus aurium — *t. Bullaire,* T. métallique.

Tintement Métallique (F.), *Cliquetis métallique, Tintement bullaire, Tinnimen'tum metal'licum, Ca'nor stethoscop'icus, Metal'lic Respiration, Metal'lic Voice, Metal'lic Tink'ling.* A particular noise, heard by the stethoscope when applied to the chest, and which, according to Laënnec, resembles that caused by striking glass, metal, or porcelain with a pin; but is, perhaps, more like the sound of the keys of a musical snuff-box. The *tintement métallique* or *metallic tinkling* is heard on causing the patient to speak or breathe; but is more distinct when he coughs. When the phenomenon is not so strongly marked, it produces only the *metal'lic res'onance.* The 'metallic tinkling' is a pathognomonic symptom of a communication between the bronchia and cavity of the chest; in other words, of *Pneumothorax.*

Tintement d'Oreille, Tinnitus aurium.

Tintinnab'ulum, 'a bell,' (from *tintinnio,* 'I ring.') Uvula.

Tintouin, Tinnitus aurium.

Tipfoot, see Kyllosis.

Tipsa'ria, Decoctum hordei.

Tique (F.), (G.) Zecke, Ixodes ricinus.

Tire-balle, (*tirer,* 'to draw,' and *balle,* 'a ball,') Forceps (bullet).

Tire-fond (F.), (*tirer,* 'to draw,' and *fond,* 'bottom.') A surgical instrument, formerly used to elevate the piece of bone sawed off by the trephine.

Tire-pus, Pyulcon.

Tire-tête (F.), (*tirer,* 'to draw,' and *tête,* 'head.') *Tractor.* A name given to different instruments used for extracting the head of the child when left in the uterus, and in certain cases of difficult labor. The crotchet is one of those, as well as the *Tire-tête à bascule* of Levret, &c.

Tires, Milksickness.

Tiretoir (F.), *Tirtoir,* (from *tirer,* 'to draw.') An instrument used by dentists for extracting the incisors of the lower jaw.

Tisane (F.), *Ptis'ana* or *Ptis'sana, Ptisan,* (from πτισανη, 'pearl barley,' itself from πτισσω, 'I decorticate,') (F.) *Hydrolé.* A name given to aqueous medicines, containing but little, if any, medicinal agent. The ancients gave the name particularly to the decoction of barley. The French Codex (1866) has formulæ for a large number of *Tisanes.*

Tisane Commune, Decoctum hordei.

Tisane de Feltz. A celebrated antisyphilitic, formed of *sarsaparilla, isinglass, sulphuret of antimony,* and *water,* boiled together. According to some, bichloride of mercury, and to others, arsenic, enters into its composition. M. Rayer, supposing that it acted by the arsenic it contains, proposed to replace it by arseniate of potassa; and Guibourt, who was of the same opinion, by arsenious acid, in order to insure certainty of action.

Tis'ic, Phthisis.

Tis'ical, Phthisicus.

Tis'sick, see Phthisic.

Tissu, (from *texere, textum,* 'to weave,') Tissue — *t. Accidentel,* see Accidental, and Tissue, accidental—*t. Aréolaire,* Cellular tissue—*t. Caverneux,* Cavernous texture — *t. Cellulaire,* Cellular tissue — *t. Celluleux des os,* Cancelli—*t. Conjonctif,* Cellular tissue — *t. Cribleux,* Cellular tissue.

Tissu Fibrinoplastique. The spindle-celled tissue characteristic of spindle-celled sarcoma.

Tissu Inodulaire, Tissue, inodular—*t. Jaune,* see Fibrous — *t. Lamineux,* Cellular tissue — *t. Lardacé,* see Lardaceous — *t. Muqueux,* Cellular tissue — *t. Phanérogène,* see Phanerogenous — *t. Poreux,* Cellular tissue—*t. Réticulé,* Cellular tissue — *t. Scléreux,* Tissue, sclerous — *t. Spongoïde,* Spongoid tissue — *t. Unitif,* Cellular tissue.

Tis'sue, *Tex'tus, Te'la,* (F.) *Tissu.* By this term, in anatomy, is meant the various parts, which, by their union, form the organs, and are, as it were, their anatomical elements. Histological anatomy is the anatomy of the tissues, which are the seat of the investigations of the pathological anatomist. The best division, indeed, of diseases would be according to the tissues mainly implicated. For the elementary tissues, see Fibre. The compound tissues, which, by associating or combining variously, form every organ of the body, have been variously classed; but every division is imperfect and liable to objection.

Tis'sue, Acciden'tal or **Adventit''ious,** (F.) *Tissu Accidentel,* consists of every substance — foreign to the primitive organization of the economy, but yet organized and living — which may be developed in the interior or at the surface of organs. Laënnec divides the accidental tissues into two sections: 1. Those that resemble others in the animal economy, or *anal'ogous accidental tissues.* 2. Those that have nothing analogous in the body, and which are always the result of a morbid process—the *heterol'ogous* or *het'eroclite accidental tissues.* To the first class belong ossifications, accidental fibrous, fibroeartilaginous, cartilaginous, areolar, and corneous tissues, hairs, the serous membranes of certain encysted tumors, the mucous membranes of fistulous canals, and accidental synovial membranes. To the second belong tubercles, scirrhus, melanosis, &c.

Tis'sue, Are'olar, Cellular tissue.

Tis'sue, Cartilag''inous, *Hymenochondro'des* seu *Hymenochondroï'des* (*Textu'ra* seu *Te'la*). See Cartilage.

Tis'sue, Cel'lular, Cellular tissue — t. Conjunctive, Cellular tissue — t. Connective, Cellular tissue—t. Cribriform, Cellular tissue—t. Fibrous, see Fibrous — t. Filamentous, Cellular tissue.

Tis'sue Forma'tion, Histogeny—t. Heteroclite, see Homology and Tissue, accidental — t. Heterologous, see Homology and Tissue, accidental — t. Heteromorphous, see Homology.

Tis'sue, Inod'ular, *Te'la inodula'ris,* (F.) *Inodule, Tissu inodulaire.* A name given by Delpech to an accidental fibrous tissue, developed in suppurating wounds, which is the principal agent in cicatrization. It has at first the appearance

of a reddish cellulofibrous layer; but soon loses its vascularity; and its fibres, which pass in all directions, become of a dull white color, and of a consistence and hardness that may be compared to those of the strongest articular ligaments. It is well seen in the cicatrix left after burns.

Tis'sue, Lam'inated, Cellular tissue — t. Ligamentous, Desmoid tissue — t. Mucous, Cellular tissue — t. Phanerogenous, see Phanerogenous — t. Phanerophorous, see Phanerogenous — t. Porous, Cellular tissue — t. Reticulated, Cellular tissue.

Tis'sue, Scle'rous, *Te'la sclero'sa*, (F.) *Tissu scléreux*. This name has been used collectively for the cartilaginous, osseous, and fibrous tissues.

Tis'sue-ma'king, Histogenetic.

Tit, (τιτθη, [Sax.] τιτ,) Nipple.

Tithe'nē, (τιθηνη,) Nurse.

Tithym'alus Cyparis'sias, (τιθυμαλος,) Euphorbia cyparissias — t. Lathyris, Euphorbia lathyris — t. Latifolius, Euphorbia lathyris — t. Palustris, Euphorbia palustris — t. Paralias, Euphorbia paralias.

Titillamen'tum, Gargarism.

Titilla'tion, (*titillare, titillatum*, 'to tickle,') Tickling.

Tit'thē, (τιτθη,) Mamma, Nipple.

Tit'thion, (τιτθιον, dim. of *titthos*,) Nipple.

Tit'this, (τιτθις,) Mamma, Nipple.

Tit'thos, (τιτθος,) Mamma, Nipple.

Tit'ty, Mamma, Nipple.

Tituban'tia, 'a staggering,' Bredouillement.

Tituba'tio, (*titubare, titubatum*, 'to stagger or totter,') Fidgets, Vacillatio — t. Linguæ, Balbuties.

Tjettek, Upas tieuté.

Tme'tica, (τμητικα, from τεμνω, 'I cut,') Incidentia.

To-and-fro Sound, Bruit de frottement.

Toad'flax, Antirhinum linaria — t. Bastard, Comandra umbellata.

Toast'water, *A'qua tos'tæ pa'nis*, (F.) *Eau panée*. (Toast well half a slice of a stale loaf of bread, put it into a pitcher, and pour over it a quart of water. After two hours, decant the water from the bread.) It is a common drink in febrile affections.

Tobac'co, (from *tabacos*, the Caribbean name for the pipe in which it was smoked [?],) Nicotiana tabacum — t. English, Nicotiana rustica — t. Indian, Lobelia inflata — t. Poison, Hyoscyamus niger.

Tobac'co Amauro'sis. A form of amaurosis, with atrophy of the optic nerve, said to be met with in those addicted to the excessive use of tobacco.

Tobac'co Root, see Valeriana.

Tobac'co, Wild, Lobelia inflata, Nicotiana rustica.

Toc'etus, (τοκετος,) Parturition.

Tocodomycodori'tis (gen. *Tocodomycodori'tidis*) **Malig'na Vagina'lis**, (*tocus*, μυκος, 'mucus,' ὁρα, 'skin,' and *itis*,) Colpocace puerperarum.

Tocol'ogy, (*tocus*, and λογος, 'a discourse,') Obstetrics.

To'cus, (τοκος,) Parturition.

Tod'dy. A name given by the English to sweet, delicious, and refreshing liquors procured in India by wounding the *spathæ* of certain palms. The best is obtained from the Cocos nucifera.

It is obtained in large quantities from *Saguë'rus sac'charifer* seu *Rum'phii, Pal'ma In'dica vina'ria secun'da, Saguë'rus* seu *Gomu'tus Gomu'to, Aren'ga saccharif'era, Gomu'to palm*. It is called, also, *Ne'va*, and by boiling yields a coarse kind of sugar, called *Jag'gery*. The inhabitants of the Moluccas used in their wars a liquor obtained by macerating the fruit, which the Dutch called *Hell water, A'qua inferna'lis*.

Toddy is, also, the common name for a mixture of spirit and water sweetened, and usually spiced with nutmeg.

Tod'dy Tree, Mamei.

Toe, ([Sax.] τα,) Digitus pedis — t. Hammer, see Hammer toe—t. Supernumerary, see Monster.

Toep'litz, see Töplitz.

To'fus, Tophus.

Toile, (from [L.] *tela*,) a web; as—

Toile d'Araignée, 'spider's web,' Araneæ tela — *t. Choroïdienne*, see Choroid — *t. de Gautier*, Sparadrapum Galteri.

To'kas, (τοκας, gen. τοκαδος,) Puerpera.

To'ken, Plague, see Plague token.

Tokodynamom'eter, (*tocus*, δυναμις, 'power, and μετρον, 'measure.') An instrument devised for the purpose of measuring the force of uterine contraction.

Tokol'ogy, (*tocus*, and λογος, 'a discourse,') Obstetrics.

To'la, Tonsil.

Tol'erance, *Toleran'tia*, (*tolerare*, 'to bear.') The power of bearing. A word used by the Italian school of Rasori, to signify the power of bearing large doses of certain potent remedies, as tartrate of antimony and potassa. See Contrastimulus.

To'les, Tonsil.

To'lium, Tonsil.

Tol'les, Tonsil.

Tol'lum, Tonsil.

Tolu', (from Tolu in South America,) see Toluifera balsamum.

Toluif'era Bal'samum, (*tolu*, and *ferre*, 'to bear,') *Myrox'ylon* seu *Myrosperm'um Toluif'erum. Ord.* Leguminosæ. *Sex. Syst.* Decandria Monogynia. The name of the tree which affords the *Tolu, Bal'sam of Tolu', Bal'samum Toluta'num*, (Ph. U. S.,) *Toluta'num, Toluif'eræ Bal'sami Bal'samum, Goac'onaz, Red Bal'sam of Peru'*, (F.) *Baume de Tolu, B. de Carthagène* ou *d'Amérique* ou *de Saint Thomas*. It has a very fragrant odor, and warm, sweetish taste; is thick, and of a reddish-yellow color. It is stimulant and expectorant [?], and is used in coughs. It is chiefly, however, employed on account of its flavor.

Toluta'num, see Toluifera balsamum.

Tom of Bed'lam, see Abraham man.

Tomac'inum, (τομη, 'a cutting up,') Isicium.

Tom'aclum, (same etymon,) Isicium.

Tomac'ulum, (same etymon,) Isicium.

Toma'ta, (Indian,) Solanum lycopersicum.

Toma'to, Solanum lycopersicum.

To'mē, *To'mus, Tomy*, (τομη, τομος, 'incision.') A common suffix, as in Litho*tome*, Bronchoto*my*, &c.

To'mē, Cut, Incision.

Tomei'on, (τομειον,) Knife.

Tomen'tum Cer'ebri, (*tomentum*, 'a flock of wool.') The infinite number of small vessels which pass between the pia mater and convolutions of the brain. They enter the substance of the brain at right angles.

Tom'eus, (τομευς,) Knife.

To'mis, (τομις,) Scissors.

Tomotoc'ia, (τομη, 'section,' and τοκος, 'parturition,') Cæsarean section.

Tom Toe, Pollex, see Digitus pedis.

Tone, *To'nus*, (τονος, from τοιοω, 'I brace or give vigor.') The state of tension or firmness proper to each organic tissue. It is the effect of tonicity. See Elasticity.

Ton'ga, see Datura sanguinea.

Ton'gres, Min'eral Wa'ters of. The town of Tongres is about a league from Maestricht in the Low Countries. The springs, of which there are several, are chalybeate, containing carbonates of iron and magnesia.

Tongue, (Sax. τυnʒ, [D.] Tong,) *Lin'gua, Glos'sa, Glot'ta*, (F.) *Langue*. The tongue is a muscular, symmetrical, and very mobile organ; situate in the mouth, from the os hyoides and

epiglottis to the incisor teeth. Its particular use is, to procure the sensation of savors; and it aids in the acts of sucking, mastication, deglutition, pronunciation, and exspuition. It has the shape of a pyramid, flattened above and below; rounded at its angles, and terminated, anteriorly, by a blunt point. Its *upper surface*, called the *dorsum*, is free, flat, and divided into two portions by a median furrow, *lin'ea media'na;* at the posterior extremity of which is the *fora'men cæ'cum* or *fora'men of Morgag'ni*. The *inferior surface* is free, and covered by the mucous membrane on its anterior third and sides; but behind and in the middle it is attached to the lower jaw by means of the genioglossus; and to the hyoides by the hyoglossus. Its *margins* are rounded; thick behind, thinner anteriorly. Its *tip*, or *point*, or *dental extremity* is rounded and free: — the *root, base*, or *hy'oid extrem'ity, ra'dix lin'guæ*, is continuous with the epiglottis and velum palati. It is very thick at the foramen cæcum; but thinner as it approaches the hyoid bone. The tongue is composed of muscles, and covered by a mucous membrane—*Periglot'tis, Involu'crum lin'guæ, Membra'na* seu *Tu'nica vagina'lis* seu *Cu'tis* seu *Epider'mis* seu *Tu'nica* seu *Involu'crum muco'sum* seu *Crus'ta villo'sa lin'guæ*—which forms also the frænum beneath the tongue. On this membrane are seen the different *papillæ*. The nerves of the organ proceed from the *inferior maxillary, glossopharyngeal* and *hypoglossal*. The first and second are connected with taste; the last with the motions of the organ. Some recent observers, however, consider the glossopharyngeal to be the special nerve of gustation. The arteries are the *lin'gual*, from the external carotid; and the *pal'atine* and *ton'sillar*, from the labial. The veins are the *superficialis lin'guæ, ran'ina, lingua'lis*, and *submenta'lis*. They open into those of the pharynx and larynx. Its lymphatic vessels pass into numerous ganglia, situate at the edge of the hyoglossi muscles. Two glands beneath the tongue, immediately behind the frænum, have received the name *glands of Blandin*, after that anatomist. See Sublingual gland.

Tongue, Black. A fever which prevailed in the Western States in the winter of 1842–3; probably typhoid fever. According to some, an epidemic erysipelas.

Tongue Depres'sor, (F.) *Abaisse-langue*. An instrument, consisting of a spatula attached to a handle, for depressing the tongue in examinations of the mouth.

Tongue, Her'nia of the, Glossocele.

Tongue, Inflamma'tion of the, Glossitis — t. Red, Fever, see Typhus.

Tonguehold'er, Glossocatochus.

Tonguescra'per, Cure-langue—t. Tie, see Ankyloglossia.

Ton'ic, (τονικος,) *Ton'icus*, (F.) *Tonique*. Relating to tone.

Tonic, Ton'icus, Tono'ticus, Antasthen'icus, (F.) *Tonique, Fortifiant*, in Therapeutics, means a medicine which has the power of exciting slowly, and by insensible degrees, the organic actions of the different systems of the animal economy, and of augmenting their strength in a durable manner. Bitter, vegetable substances which are not associated with an acrid or narcotic principle, preparations of iron, cold water, &c., act as tonics. Tonics are also called *Comfortan'tia, Confortati'va, Corroboran'tia, Confirman'tia, Roboran'tia*, &c.

The following are the chief Tonics: — Acidum Arseniosum, Acidum Nitricum, Acidum Sulphuricum, Argenti Nitras, Bismuthi Subnitras, Carbo Ligni, Cascarilla, Cinchona, Cinchonia, Colomba, Cornus Florida, Cupri Acetas, Cupri Sulphas, Cuprum ammoniatum, Cusparia, Eupatorium perfoliatum, Ferri Præparata, Gentiana, Lirioidendron, Lupulina, Piperina, Prunus Virginiana, Quassia, Quinia, Salix, Salicina, Serpentaria, Zinci præparata, Aquæ Minerales acidulæ et ferruginea; and Mental Tonics, (Confidence, Hope, Amusement.)

Ton'ic Pow'er, Irritability.

Ton'ic Spasm, *Spas'mus ton'icus, Convul'sio tonica, Conduc'tio, Spas'tic, Tonus, Enton'ia, Ent'tasis, Enta'sia*. A rigid contraction of muscles without relaxation, as in trismus, tetanus, &c. See Tetanus and Spasm.

Tonic''ity, *Tonic''itas*. The faculty that determines the general tone of the solids. Excessive tonicity causes *er'ethism* or *crispness;* deficient tonicity, *at'ony* or *weakness*. *Tonicity* has been used in the same sense as irritability.

Tonique, Tonic.

Ton'ka Bean, Dipterix odorata.

Tono'des, (τονωδης,) Tensive.

Tonomètre, (τονος, 'tension,' and μετρον, 'measure.') An instrument devised by Von Graefe to measure the degree of tension of the eyeball, as in glaucoma.

Tonom'etry, (same etymon.) Measurement of tension, as of the eyeball. See Tonomètre.

Tono'ticus, (τονωτικος,) Tonic.

Ton'sil, *Tousil'la, Amyg'dala, Paristh'mia, Paristh'mium, Amphibran'chium, Glan'dula colli, To'la, Tol'ics, To'les, To'lium, Tol'lum, Spoug'os, An'tias*, (pl. *Anti'ades,*) *Al'monds of the ear, Al'monds* or *Bulbs of the throat*, (F.) *Amygdale, Tonsille*, (Prov.) *Earkecker*. An ovoid collection of follicles, about half an inch in length, similar in shape to an almond, and situate, on each side, between the pillars of the velum palati. The inner surface, projecting into the isthmus of the throat, is covered by the mucous membrane, in which are the orifices of a dozen cells, whence a transparent, viscid mucus oozes on pressure. This mucus is destined to facilitate deglutition, by lubricating the isthmus faucium; and is forced out during the passage of the alimentary bolus.

Tonsil-guillotine, Amygdalatome.

Tonsil'la, pl. *tonsillæ*, Tonsil.

Tonsil'læ Pestilen'tes, Cynanche maligna.

Ton'sillar, *Tousilla'ris*, (F.) *Tonsillaire*. Appertaining or relating to the tonsils.

Tonsilla'rum Gangræ'na, Cynanche maligna.

Tonsille, Tonsil.

Tonsil'lia, Cynanche tonsillaris.

Tonsillit'ic, *Tonsillit'icus*, (better *Tonsillar.*) Belonging or relating to the tonsils; as the '*tonsillitic* branches of the glossopharyngeal nerve.'

Tonsilli'tis, (*tonsilla*, and *itis*,) Cynanche tonsillaris.

Tonsillitome, (*tonsilla*, and τεμνειν, 'to cut,') Amygdalatome.

Tonso'rius Cul'ter, (*tonsor*, 'a barber,' and *culter*, 'a knife,') Razor.

To'nus, (τονος,) Tonic spasm—t. Trismus, Trismus.

Too'dle, Tooth.

Toot, Coriaria ruscifolia.

Tooth, (Sax. τοð,) *Dens, Mor'dex, O'dous*, (Prov.) *Toodle*, (F.) *Dent*. The teeth, *Den'tes, Mord'icES*, are small, hard bodies fixed in the alveoli of each jaw, and serving to seize, and to cut, tear, and triturate, alimentary substances. True teeth are found only in man, the mammalia, reptiles, and fish. The teeth have, in general, the shape of an irregular cone, the base of which is towards the interior of the mouth; and the apex, single or divided, towards the bottom of the alveoli. Each tooth has a part situate out of the alveolus, and covered by a vitriform substance. This part is called the *crown* or *coro'na*. It is bounded by a narrower portion, called the *cervix*, (F.) *collet*, which separates it from the portion in the alveolus — the *fang* or *root, odontorrhi'za*, (F.) *racine*. In the adult, the teeth are 32 in

number, 16 to each jaw; these consist of 4 *incisors*, 2 *canines*, 4 *bicuspids*, and 6 *molars*. (See these various terms.) The teeth inclose a vascular and nervous pulp, in a central cavity, *Cav'itas Pul'pæ*, *Ca'vum Den'tis*, *An'trum denta'lē*. They are formed of a very hard, compact tissue; and the corona is covered by a vitreous substance called *Enam'el*, *Substan'tia vit'rea* seu *adaman'tina*, (F.) *Émail*. The *Enamel organ*, *Organon adamantinum*, is a peculiar structure formed in the development of the teeth, by the growth and multiplication of epithelial cells dipping down into the mucous tissue. With a papilliform process developed in the same tissue, the rudiment of the tooth is formed. The incisor and canine teeth are developed by a single point of ossification; the lesser molares, by two; and the larger, by four or five. See Dentition. Researches by Retzius, Müller, and others, have led them to believe that the *ivory* of the tooth, *Den'tine* or *Dentin*, *E'bur*, *Substan'tia ebur'nea*, *Substan'tia os'sea* of Malpighi, *proper tooth substance*, *bone of the tooth*, *os'seous sub'stance of tooth*, *toothbone*, consists of tubular fibres,—*Den'tinal fibres*,—which contain organic deposits of calcareous salts; and of intertubular substance, in which are observed corpuscles or osscous cells of the tooth, called, by Professor Owen, *calcig''erous cells*, which also contain earthy salts. At the part where the enamel terminates at the cervix of the tooth, the *crus'ta petro'sa* seu *fibro'sa*, *cor'tex os'seus*, *cæmen'tum*, *cemen'tum* or *cortical sub'stance*, commences in an extremely thin stratum, in a thin layer of true bone, slightly modified in structure; passes down and gradually increases in thickness towards the extremity of the root, where it is generally the thickest. It is said by Nasmyth to have been traced on the enamel, and Purkinje and Fränkel thought that it lined the cavitas pulpæ. They gave it the name *Substantia ostoïdea*. It is the *mate'ria tarta'rea* of Malpighi. It has been found, however, that the hard substance deposited on the inner surface of the dentine, at the age of twenty years or later, and which encroaches on the cavity, has a distinct structure from the cement, and resembles in part dentine, and in part bone. It is the *horn'y sub'stance* of Blumenbach, the *osteoden'tine* of Owen, and the *sec'oudary den'tine* of Tomes. In the compound teeth of the herbivorous animal, a deposition is found on the surface of the enamel, which has been called *cementum*. Müller, however, regards it to be a deposit from the salts and the saliva, and to be essentially the same as what is called tartar in the human subject. The *Den'tal glands* of Serres are small white bodies which are seen, anterior to the eruption of the teeth, studding the mucous membrane. They are caused by the prominences of the outer epithelial layer of the enamel organ.

Tooth Bone, see Tooth.

Tooth, Denu'ding Proc''ess of. The gradual removal of the enamel without evidence of disease. It is most common in old persons.

Tooth Edge, Agacement des dents, Hæmodia—t. Paste, Dentifricium—t. Rake, Dentiscalpium—t. Rash, Strophulus — t. Shell, dog-like, Dentalium.

Tooth Wounds. Wounds inflicted by the teeth of animals, and which do not owe their gravity to any poison conveyed into the tissues. They are punctured, penetrating, or lacerated, and often serious in result.

Tooth'ache, Odontalgia — t. Bush, Xanthoxylum fraxineum — t. Tree, Aralia spinosa, Xanthoxylum clava Herculis.

Topha'ceous, *Topha'ceus*, (F.) *Tophacé*, (from *tophus*.) Relating or belonging to tophus, — as 'a *tophaceous* concretion.'

Topha'ceous Concre'tion, Tophus.

To'phi, see Tophus.

To'phus, (τοφος,) *To'fus*, 'a porous or friable stone,' *Osteot'ophus*, *Topha'ceous Concre'tion*. A collection of hard, calcareous matter, which forms, particularly at the surface of joints affected with gout, *Arthrot'ophus*, (see Calculi, arthritic,) and, occasionally, in the interior of organs, around the teeth, &c. It likewise meant gravel, and chalaza.

Top'ic, *Top'icus*, (from τοπος, *locus*, 'a place.') A local application, (F.) *Topique*. See Local.

Top'icus, (τοπικος,) Local, Topic.

Topina'ria, Talpa.

Topique, Topic.

Töp'litz or **Tep'litz, Min'eral Wa'ters of.** Töplitz is a town of Bohemia, celebrated for its numerous thermal springs. The water resembles that of Gastein, and is employed for bathing purposes in gouty and paralytic affections, functional uterine derangement, &c. Temp. 120° Fah. Season, from the 1st of June to the 15th of September.

Topograph'ical Anat'omy, (τοπος, 'a place or region,' and γραφω, 'I describe,') see Anatomy.

Toque, (a kind of hat,) Scutellaria galericulata.

Tor'cular, (from *torqueo*, 'I twist,') Tourniquet. A press for wine, oil, or cider.

Tor'cular Heroph'ili, *Press of Heroph'ilus*, *Lechenei'on*, *Le'nos*, *Le'nus*, *Fourth Sinus*, *Confluence of the Sinuses*, (F.) *Confluent des Sinus*, *Pressoir d'Hérophile*. A smooth and polished cavity, of irregular shape, in which several sinuses of the dura mater meet. It is situate before the internal occipital protuberance, at the union of the three great duplicatures of the dura mater. It has six openings into it:—one above, that of the superior longitudinal sinus; two below, answering to the occipital sinuses; one anterior, belonging to the straight sinus; and two lateral, and very broad, which lead into the lateral sinus, and convey from the cavity the blood that has been poured into it by the others.

Tor'culum, (from *torqueo*, 'I twist,') Tourniquet.

Tordyl'ium, (τορδυλιον,) *T. Officina'lē*, *Tor'dylon*, (τορδυλον,) *Ses'eli Cre'ticum* seu *Monta'num*, (F.) *Séseli de Crète*. *Family*, Umbelliferæ. *Sex. Syst.* Pentandria Digynia. The seeds and roots of this Southern European plant are considered carminative and diuretic. They enter into the theriaca.

Tore'nia Asiat'ica, (after Olaf Toren, of Gothenburg, a pupil of Linnæus,) *Cala-dolo*. A small Malabar plant, the juice of whose leaves, sweetened with sugar, is said to cure gonorrhœa.

Tor'mentil, Geranium maculatum, Tormentilla.

Tormentil'la, (from *tormina*, for which it was used,) *T. erec'ta* seu *sylves'tris* seu *officina'lis* seu *tubero'sa*, *Fraga'ria tormentil'la officina'lis*, *Potentil'la tormentil'la*, *Heptaphyl'lum*, *Consol'ida ru'bra*, *Com'mon Tor'mentil*, *Up'right Sept'foil*, (F.) *Tormentille*. *Ord.* Rosaceæ. *Sex. Syst.* Icosandria Polygynia. The root, *Tormentilla*, (Ph. U. S.,) has a slightly aromatic odor, and austere, styptic taste. It is astringent. Dose of the powder, gr. x. to ʒj.

Tormen'tum, 'pain, suffering,' (from *torqueo*, 'I twist,') Ileus, Intussusceptio.

Tor'mina, pl. of *tormen*, *Stro'phus*, *Cœlial'gia*, *Encœlial'gia*, *Anile'ma*, *Anile'sis*, *Gripes*, *Mul'ligrubs*, *Fret'ting*, (F.) *Tranchées*, (from *torqueo*, 'I twist.') Acute colicky pains. Dysentery.

Tor'mina Cel'si, Dysentery—t. Parturientium, Pains, labor — t. Post partum, see Pains, labor.

Tornac'ulum, (from *torquere*, 'to twist,') Tourniquet.

Toros'itas, (from *torosus*, 'brawny,' — *torus*,

'brawn,') *Corpulen'tia carno'sa, Hab'itus athlet'icus.* Muscular strength.

Toro'sus, Muscular.

Torpe'do, gen. *Torpe'dinis,* (*torpeo,* 'I am torpid,') Narcosis.

Torpefac'tio Universa'lis, (*torpeo,* 'I am torpid,' and *facere,* 'to make,') Holonarcosis.

Torpeur, Torpor.

Tor'pid, *Tor'pidus,* (F.) *Torpide, Engourdi,* (from *torpeo,* 'I am sluggish.') Numb. Incapable of exertion and of feeling. Dull, stupid, inactive.

Torpid'itas, Torpor.

Tor'pidus, Narcotized, Torpid.

Tor'por, gen. *Torpo'ris, Torpid'itas, Noth'rotes, Parap'sis ex'pers, Torpid'ity,* (F.) *Engourdissement.* State of a part which becomes numb, and almost incapable of motion. *Tor'por, Torpid'ity, Torpid'ness, Tor'pitude* are also applied to a debilitated, sluggish condition of a part, or of the whole of the body; *Aër'gia,* (F.) *Accablement.* See Hibernation.

Tor'por, Narcosis — t. of the Colon, see Colon, torpor of the—t. Intestinorum, Constipation — t. Soporificus, Nocar.

Torquay, (pron. *Torkee'.*) A town in Devonshire, England, which, on account of the mildness of its climate, and its sheltered situation from the bleaker winds, is a frequent retreat for the phthisical invalid.

Tor'sion, *Tor'sio,* (from *torquere, tortum,* 'to twist.') The act of twisting. Torsion of the extremities of bleeding vessels — *Angios'trophē* — is sometimes used to arrest hemorrhage.

Torsk, see Oleum morrhuæ.

Tortelle, Erysimum.

Torticolis Spasmodique, Tic rotatoire.

Torticol'lis, (*torquere, tortum,* 'to twist,' and *collum,* 'the neck,') *Tortico'lis, Ca'put* seu *Col'lum obsti'pum, Obsti'pa cer'vix, Cer'vix rig''ida, Obstip'itas cap'itis* seu *col'li, Trachel'agra, Enta'sia Lox'ia, Lox'ias, Cephaloloxi'a, Ancylod'erē, Ancylod'eris, Rhæbocra'nia, Rhæbau'chen, Rhæbod'erē, Auchenorrheu'ma, Rheumatis'mus col'li* seu *cervi'cis, Stiff neck, Wry'neck,* (Prov.) *Slab,* (F.) *Obstipité.* A variety of rheumatism, seated in the muscles of the neck, which prevents the motion of the head, and causes the patient to hold it inclined to the side affected. It is, commonly, of short duration; usually disappearing in a few days. Rubefacients are the best topical applications. The term is also applied to permanent contraction of the muscles of the neck, which causes the head to be held to one side. The remedy is the division of the contracted muscles.

Tor'toise, Fresh-wa'ter, Great, (*torquere, tortum,* 'to twist, to wind,') Hydraspis expansa.

Tortue, 'tortoise,' Testudo.

Tortu'ra O'ris, (from *torqueo,* 'I twist,') Canine laugh, Neuralgia facici — t. Oris paralytica Linnæi, Paralysis, Bell's.

Tor'ula Cerevis'iæ, (from *torus,* 'a knot,') *T. Ace'ti, Saccharom'yces* seu *Mycoder'ma cerevis'iæ, Cryptococ'cus fermen'tum* seu *cerevis'iæ, Yeast plant,* (F.) *Champignon du ferment.* One of the simplest forms of vegetation, capable, under favorable circumstances, of vegetating rapidly, and assisting in producing the fermentation of saccharine substances. The plant has been found in vomited fluids, and in fæces. See Parasites.

Tor'ulus Glan'dis, (dim. of *torus,* 'a fleshy part,') Crown of the glans.

To'rus, 'a fleshy part,' Muscle — t. Manûs, Metacarpus.

To'ta Bo'na, 'all good,' Chenopodium bonus Henricus.

Totsu Kaso, Sphæria Sinensis.

Tot'ty, Vertiginous.

To'tum Carno'sum, 'all fleshy,' Pancreas.

Touch, *Tac'tus, Tac'tio, Ha'phē, Hap'sis, Tac'tion, Palpa'tion,* (F.) *Toucher,* (from [I.] *toccare,* 'to touch.') One of the five senses, and that which makes known to us the palpable qualities of bodies, such as their consistence, quality, &c. It is seated, particularly, in the hands; and differs from tact in being active. See Esaphe and Palpation.

'*To touch* the mouth with mercury' is to produce the constitutional effects of that agent, as evinced by the falling away of the gums, &c.

Touch Bod'ies, Corpuscula tactûs — t. Corpuscles, Corpuscula tactûs.

Touch-me-not, Impatiens fulva.

Touch, Roy'al. It was at one time almost universally believed, in England, that the royal touch would remove *Scrofula* or *King's Evil* (as it was thence called). This superstition is now entirely exploded. Edward the Confessor was the first English king who *touched* for the Evil. Medals of gold or silver were often suspended around the necks of the persons touched. These were called *touching* or *healing pieces.*

Toucher, 'touch,' Esaphe, Touch — *t. Vaginal,* Esaphe.

Touch'ing Piece, see Touch, royal.

Touch'wood, Boletus igniarius.

Touloucounin, see Carapa touloucouna.

Tour de Maître, 'a master turn or feat,' Coup de maître.

Tourbillon Vasculaire, (from *turbo,* gen. *turbinis,* 'a whirlpool,') Vasa vasorum.

Tournesol, ([F.] *tourner,* 'to turn,' and *sol,* 'the sun,' — a translation of ἡλιοτροπιον, *heliotropium,*) Heliotropium Europæum, Lichen roccella.

Tourniole, (from *tourner,* 'to turn,' like *Run-round,*) Paronychia.

Tour'niquet, (pron. *toorniket* or *turniket,*) *Tor'cular, Tor'culum, Tornac'ulum, Præ'lum, Præ'lum, Præ'lium* seu *Prelum arteria'lē, Verticil'lum, Fas'cia tor'tilis,* (from [F.] *tourner,* 'to turn.') A surgical instrument for stopping the course of blood in a limb, by exerting a strong compression upon the principal artery. It was invented by a French surgeon, Morel, in the middle of the 17th century; and was modified, subsequently, by Nuck, Verduc, Monro, Petit, and Louis. It is used to suspend, for a time, the circulation in a limb during great operations; to arrest arterial hemorrhage in cases of wounds; to compress certain aneurismal and other tumors, &c.

Tournis, ([F.] *tourner,* 'to turn,') see Cœnurus.

Tous-les-mois, 'every month,' *Am'ylum canna'ceum, Canna,* (Ph. U. S., 1873,) *Can'na Starch.* A fecula obtained from the rhizome of *Canna edu'lis,* which flowers every month. It resembles potato starch, and may be substituted for arrowroot. It is procured from St. Kitts. According to the Ph. U. S. (1873), it is derived from an undetermined species of Canna.

Tout, Nates.

Toute Bonne, 'all good,' Salvia sclarea.

Toute Épice, 'all spice,' see Myrtus pimenta — *t. Sainte,* Sanicula.

Toux, Tussis — *t. Bleue,* Pertussis — *t. Bronchique,* Bronchial cough, Cough, tubal — *t. Caverneuse,* see Cavernous respiration — *t. Convulsive,* Pertussis — *t. Quinteuse,* Pertussis — *t. Tubaire,* Bronchial cough, Cough, tubal.

Tow, ([Sax.] τοp,) Stupa.

Town Cachex'ia. The general cachectic condition of pallor and anæmia met with in densely-populated towns.

Toxæ'mia, Toxicohæmia.

Toxæ'mic, *Toxicohæ'mic, Toxicæ'mic, Hæmatox'ic, Hæmatotox'ic, Hæmotox'ic, Hæmotoxæ'micus, Toxicohæ'micus, Tpxæ'micus, Hæmatox'icus, Hæmatotox'icus, Hæmotox'icus.* Relating or appertaining to a poisoned state of the blood.

Toxémie, Toxicohæmia.

Toxhæ'mia, Toxicohæmia.

Tox'ic, (from *toxicus,*) Poisonous.

Toxicæ'mia, Toxicohæmia.

Tox'ical, Poisonous.

Toxica'ria Macassarien'sis, see Upas.

Toxica'tio, (from *toxicum,*) Poisoning.

Toxicêmie, Toxicohæmia.

Toxicoden'dron, (*toxicum,* and *δενδρον,* 'a tree,') Rhus toxicodendron.

Toxicohæ'mia, *Toxicæ'mia, Toxihæ'mia, Toxæ'mia, Toxhæ'mia,* (F.) *Toxicohémie, Toxicémie, Toxémie,* (*toxicum,* and *αἱμα,* 'blood.') Poisoning of the blood.

Toxicohémie, Toxicohæmia.

Tox'icoid, *Toxicoï'des,* (*toxicum,* and *εἰδος,* 'resemblance.') Resembling poison.

Toxicol'ogy, *Toxicolog''ia,* (*toxicum,* and *λογος,* 'a description.') A treatise on poisons.

Toxico'ses, (G.) Toxikosen, (from *toxicum,* 'an arrow,' originally 'arrow poison,' and *osis.*) A family of diseases, according to the classification of Fuchs, caused by the reception of poisons into the system.

Tox'icum, (*τοξικον,* from *τοξον,*) Poison, Venom.

Toxihæ'mia, Toxicohæmia.

Toxique, Poisonous.

Trabec'ula, (dim. of *trabs,* gen. *trabis,* 'a beam,') (F.) *Trabécule,* 'a small beam.' Applied to prolongations of fibrous membranes which form septa, as in the corpora cavernosa and the testes; to the medullary fibres, which form the commissures; and to the fleshy projections, which form the columnæ carneæ, &c.

Trabec'ula Cer'ebri, Corpus callosum.

Trabec'ulæ Car'neæ, Columnæ carneæ — t. Cordis, Columnæ carneæ — t. Corporum cavernosorum, see Cavernous bodies — t. Splenis, see Spleen — t. Willisii, Chordæ Willisii.

Tra'bes Cor'dis, (pl. of *trabs,* 'a beam,') Columnæ carneæ.

Trabs, 'a beam,' Penis — t. Cerebri, Corpus callosum — t. Medullaris, Corpus callosum.

Trace, Prim'itive, Groove, primitive.

Trache'a, (*τραχεια,* fem. of *τραχυς,* 'rough,' *αρτηρια,* understood,) (generally, however, accented *Tra'chea;*) *Trache'a* seu *Trachei'a arte'ria,* (*τραχεια αρτηρια,*) *Trache'lus, Bron'chus, As'pera arte'ria, Fis'tula spiritua'lis* seu *pulmona'lis, Can'na, Syrin'ga, Sy'rinx;* the *Wind'pipe, Wo'sen, Weas'and, Wizen, Wee'sel, Throt'tle,* (Sc.) *Throp'ill,* (Prov.) *Keck'coru, Keck'er, Throp'ple,* (F.) *Trachée, Trachée artère;* (composed of *αηρ,* 'air,' and *τηρειν,* 'to keep.') The trachea is a cylindrical, fibrocartilaginous and membranous tube, flattened behind, and situate on the median line, before the vertebral column, from the inferior part of the larynx, as far as the third dorsal vertebra. There it divides into two branches, the *bronchiæ,* which separate, one to go to each lung. The trachea, the function of which is to convey air to the lungs during respiration, is composed: 1. Of cartilaginous rings, *An'nuli cartilagin'ei, Segmen'ta cartilagin'ea, Or'bes cartilagino'si,* incomplete behind; situate one above the other, and kept *in situ* by a fibrous membrane. 2. Of a mucous membrane, which lines it internally, and contains numerous mucous follicles. 3. Of transverse muscular fibres, not well marked, which occupy its posterior surface. 4. Of vessels, which proceed from the superior and inferior thyroideal. 5. Of nerves, that are given off by the pneumogastric and cervical ganglia.

The breathing tubes of insects are termed *Trache'æ.*

Trache'a Arte'ria, Trachea.

Trache'æ, sec Trachea.

Tra'cheal, *Trachea'lis,* (F.) *Trachéal.* Appertaining to the trachea. An epithet applied to respiration as heard through the stethoscope opposite the trachea, larynx, and root of the bronchia; the air appearing as if sucked in from the cylinder during inspiration, and expelled during expiration.

Tra'cheal Glands. Mucous follicles on the posterior surface of the trachea. They are small, flattened, ovoid bodies.

Trachea'lia, (from *trachea,*) Cynanche trachealis.

Trachea'lis. The fibres of unstriped muscle, which pass from one portion of each of the tracheal cartilages to the other, at the posterior part of the trachea, have been so called by some anatomists. When they contract, they approximate the extremities of the cartilage; diminish the calibre of the trachea; and thus increase the velocity of the air forced through it, as in coughing; and facilitate the removal of any irritating substance in contact with the lining membrane.

Trachée, Trachea — t. *Artère,* Trachea.

Trachei'tis, (*trachea,* and *itis,*) Cynanche trachealis.

Trachel'agra, Torticollis, (*τραχηλος,* 'neck,' and *αγρα,* 'seizure.') Also, gout in the neck.

Trache'lian, (from *trachelus,*) Cervical.

Trachelis'mus, (from *trachelus.*) A term proposed by Dr. Marshall Hall, for a fancied spasmodic action of the muscles of the neck, which he esteems to be the cause of many morbid phenomena, by inducing compression of the veins of the neck and an impeded return of blood from the head.

Tracheli'tis, (*trachelus,* and *itis,*) Cynanche trachealis.

Trache'lium America'num, (from *trachelus,* having been used in throat affections,) Lobelia cardinalis.

Trachélo - atloïdo - basilaire, Rectus capitis lateralis — *t. Atloïdo-occipital,* Obliquus superior capitis — *t. Basilaire,* Rectus capitis internus major — *t. Basilaire, petit,* Rectus capitis internus minor.

Trache'lodiaphragmat'ic, *Trache'lodiaphragmat'icus.* The fourth pair of cervical nerves, whence the phrenic nerve chiefly arises.

Trachelodyn'ia, (*trachelus,* and *οδυνη,* 'pain.') Pain in the neck.

Trachélo-mastoïdien, Complexus minor — *t. Occipital,* Complexus — *t. Scapulaire,* Levator scapulæ.

Trache'lus, Collum, Trachea.

Trache'obronchi'tis. Inflammation of the trachea and bronchia.

Tracheoce'lê, (*trachea,* and *κηλη,* 'a tumor,') Bronchocele.

Tracheoph'ony, (*trachea,* and *φωνη,* 'voice,') Laryngophony.

Tracheophthi'sis, see Phthisis laryngea.

Tracheophy'ma, gen. *Tracheophy'matis,* (*trachea,* and *φυμα,* 'a swelling,') Bronchocele.

Tracheop'yra, (*trachea,* and *πυρ,* 'fever,') Cynanche trachealis.

Tracheorrhag''ia, *Hæmop'toë* seu *Hæmop'tysis larynge'a et trachea'lis,* (*trachea,* and *ῥηγνυμι,* 'I break forth.') Hemorrhage from the trachea.

Trach'eoscopy, (*trachea,* and *σκοπεω,* 'I view.') Inspection of the trachea by a mirror, &c., similar to that for examination of the larynx.

Tracheosteno'sis, (*trachea,* and *στενωσις,* 'contraction.') Contraction or narrowness of the trachea.

Trach'eotome, (*trachea,* and *τεμνω,* 'I cut.') An instrument of the trocar kind for opening the trachea.

Tracheot'omy, see Bronchotomy.

Trachi'tis, gen. *Trachi'tidis,* (*trachea,* and *itis,*) Cynanche trachealis.

Tracho'ma, gen. *Tracho'matis,* (from *τραχυς,* 'rough,') *Aspre'do, Aspritu'do, Pladar'otes, Asperitu'do, Scabrit''ies, Gran'ular conjuncti'va, Gran'ular eye'lid, Chron'ic gran'ular conjunctivi'tis,* (F.) *Aspérité des Paupières.* A roughness of

the inner surface of the eyelids. A variety of ophthalmia, of which three kinds have been designated — *T. sabulo'sum*, from sand, &c. getting between the eyelids; *T. carunculo'sum*, *Pladar'otes*, *Pladaro'sis*, *Morum pal'pebræ inter'næ*, from fleshy excrescences; and *T. herpet'icum*, from hard pustules on the inner surface of the eyelids. This last is also called *Fico'sis*, and *Pal'pebra fico'sa*. See Blepharoxystum.

Tracho'ma Glands, see Bruch.

Trachypho'nia, (τραχυς, 'rough,' and φωνη, 'voice.') Roughness of the voice.

Tract, *Trac'tus*, (from *trahere*, *tractum*, 'to draw out lengthwise.') A track or course; a region.

Tract, Op'tic, see Optic nerves — t. Respiratory, see Respiratory tract.

Tracta'tio Manua'ria, (*tractare*, *tractatum*, 'to handle,') Diacheirismus, Surgery.

Trac'tor, (*trahere*, *tractum*, 'to draw,') Lever, Tire-tête.

Tractora'tion, (*trahere*, *tractum*, 'to attract, influence,') Perkinism. See Tractors, metallic.

Tracto'res, (*tractare*, *tractatum*, 'to handle,') see Shampooing.

Trac'tors, Metal'lic. Metallic agents introduced by Dr. Elisha Perkins, of Connecticut, about the end of the last century, to cure diseases. The parts were rubbed with these tractors, and hundreds of thousands of cases were reported to have been cured by the *Tractora'tion*. The affections in which they were chiefly used were local inflammations and pâins in different parts. The good effects were doubtless owing to the influence exerted by the mind over the body. The bubble did not exist long. See Perkinism.

Trac'tus, Tract.

Trac'tus Interme'dio-latera'lis. A small group of cells forming a projection of gray matter of the spinal cord opposite the junction of the anterior and posterior cornua.

Trac'tus Intestino'rum, Intestinal tube — t. Opticus, see Optic nerves — t. Respiratorius, Respiratory tract.

Trac'tus Spira'lis Foraminulen'tus, *T. Spira'lis foramino'sus* seu *foraminum cochleæ*. Minute openings at the base of the modiolus, arranged in a spiral manner, which transmit the filaments of the cochlear nerve. The central canal of the Tractus is longer than the rest, and is called *Cana'lis* seu *Tu'bulus centra'lis modi'oli* seu *cochleæ*. Winding closely round the modiolus is a small canal — *Cana'lis spira'lis modi'olus* (Rosenthal), *Tu'bulus spira'lis modi'oli*, *Cana'lis periphe'ricus modi'oli*, *C. ganglion a'ris*.

Tradescan'tia Virgin'ica, (after John Tradescant, gardener to Charles I.,) *Spi'derwort*; indigenous; *Order*, Commelynaceæ; flowering from May to August. The roots are demulcent.

Tragacan'tha, (τραγος, 'a goat,' and ακανθα, 'a thorn,' owing to its hirsute boughs,) *Gummi Tragacan'tha* seu *Astrag'ali Tragacan'thæ*, *Gum Trag'acanth*, *Gum Dragon*. The concrete juice of *Astrag'alus Tragacan'tha* or *Astragalus Ve'rus*, a native of Persia. *Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. (F.) *Gomme Adragant*, *Adragant*, *Adragante*, *Adragauthe*. This gum is inodorous, nearly insipid, of a whitish color, semitransparent and striated. It is in thin, vermiform pieces, and does not form a smooth, uniform mucilage with water. It is demulcent, but is rarely used alone.

Trage'a, Tragema — t. Aromatica, Pulvis cinnamomi compositus.

Trage'ma, gen. *Trage'matis*, (τραγημα, 'a sweetmeat.') Of old, in the plural — *Trage'mata* — it meant a dessert. Afterward, like *Tragea*, it meant an aromatic powder containing much sugar.

Tragi Bar'bula, see Tragus.

Trag''icus, *Tragien* (Ch.), (from Tragus.) A small, flat, triangular muscle which almost wholly covers the outer surface of the tragus, arising from its base and terminating at the top of the eminence.

Tragien, Tragicus.

Tragomascha'lia, *Tragomas'chalē*, (τραγος, 'a goat,' and μασχαλη, 'axilla.') The strong, unpleasant odor of the armpits.

Tragopho'nia, (τραγος, 'a goat,' and φωνη, 'voice,') Egophony.

Tragopo'gon, *Bar'ba hir'ci*, (τραγος, 'a goat,' and πωγων, 'beard.') A genus of plants, *Ord.* Cichoraceæ; *Sex. Syst.* Syngenesia Polygamia Æqualis; (F.) *Barbe de Bouc*,—of which the roots of the *Tragopo'gon porrifo'lium*, *Sal'sifi*, *Sal'sify*, *Sal'safy*, *Oysterplant*, *Oysterroot*, *Vegetable oyster*, (F.) *Salsifis* ou *Cercifis*, and the young shoots of the *T. praten'sē*, *Mead'ow Sal'sifi*, *Common Goat's Beard*, (F.) *Salsifis des près*, are eaten as food. The root of the latter has been used as a diuretic.

Tragoseli'num, (τραγος, 'a goat,' and σελινον, 'parsley,') Pimpinella saxifraga — t. Angelica, Ligusticum podagraria — t. Magnum, Pimpinella magna — t. Majus, Pimpinella magna — t. Saxifraga, Pimpinella magna.

Tra'gus, (τραγος, 'a goat,' from its being furnished, in some persons, with hair, like the beard of a goat,) *Hir'cus*, *Hir'qunis*. A small, flattened, triangular nipple situate before the meatus auditorius externus, which it appears to conceal. It is covered with hair in old people, whence its name, *Tra'gi* seu *Hir'ci bar'bula*. Also, the peculiar, goatlike smell of the axillæ.

Tra'gus Matthi'oli, Salsola kali.

Trainasse, (from *trainer*, 'to trail,') Polygonum aviculare.

Train'ing, ([F.] *trainer*, from *trahere*, 'to draw,') (F.) *Entraînement*. A system of treating man and animals, so as to develop their full physical powers. It is practised especially as regards the prize-fighter and the race-horse, and appertains to what have been termed by the French *Organoplasties*.

Traitement, ([L.] *tractare*, [F.] *traiter*, 'to treat,') Curatio — *t. Palliatif*, see Palliation.

Tra'mē, (τραμη,) Perinæum.

Tra'mis, (τραμις,) Perinæum.

Trance, Catalepsy, Ecstasis — t. Death, see Asphyxia.

Tranchées, (from *transcindere*, 'to cut across,') Tormina — *t. Utérines*, Pains, after.

Trans, in composition, through, across, over, or beyond.

Transfigura'tio, (*trans*, and *figurare*, *figuratum*, 'to form,') Transformation.

Transfora'tion, (F.) *Sphenotrésie*, (*trans*, and *foro*, 'I pierce.') Repeated perforation of the base of the skull in craniotomy.

Transforma'tion, *Transforma'tio*, *Transfigura'tio*, *Transmuta'tio*, *Metab'olē*, (*trans*, and *forma*, 'form.') Change of form. M. Quatrefages uses the term *transformation* for changes which take place in the egg,—*metamorphosis* for alterations which occur after its exclusion.

Transformations de Tissu (F.). The French pathologists designate thus the change that occurs in an organ, the tissue of which becomes similar to that of another organ. The chief transformations are cartilaginous, osseous, and adipous. See Tissue.

Transfu'sion, *Transfu'sio*, *Metach'ysis*, (from *transfundere* — *trans*, and *fundere*, *fusum*, — 'to pour.') To pour from one vessel into another.

Transfu'sion of Blood, *Transfu'sio San'guinis*, *Cu'ra Medea'na*, *Methæmachym'ia*, *Hæmatometach'ysis*, *Hæmontetach'ysis*, *Diach'ysis*, *Transplanta'tio med'ica no'va*, *Chirur'gia transfuso'ria*, *Exotichæmato'sis*. The act of passing the blood of one animal into the veins of another; an operation which was formerly used to fulfil various

therapeutical intentions. It has been revived in cases of uterine hemorrhage; and, apparently, with some success.

Transit''ion Tu'mor, Tumor, transition.

Transla'tion, (*trans*, and *ferre, latum*, 'to carry,') Metastasis.

Transmigra'tion of the O'vum. Occasionally a corpus luteum is found in the ovary opposite to that in which the ovum was developed. Such a transition, whether occurring by an extraüterine or an intraüterine channel, is called the *transmigration of the ovum*.

Transmissibil'ity, (*trans*, and *mittere, missum*, 'to send,') see Sensibility.

Transmuta'tio, (*trans*, and *mutare, mutatum*, 'to change,') Transformation.

Transpira'tio, (*trans*, and *spirare, spiratum*, 'to breathe,') Perspiration — t. Unilatera, Hemidiaphoresis.

Transpiratoire, Perspiratory.

Transplanta'tio, (*trans*, and *plantare, plantatum*, 'to plant,') *Metaphytei'a*. A pretended method of curing diseases, devised by Paracelsus — by making them pass from one individual to another, either animal or vegetable.

Transplanta'tio, Morioplastice.

Transplanta'tio Den'tis, *Insit''io dentis, Transplanta'tion of a tooth*. The act of transplanting a tooth from one person to another.

Transplanta'tio Med'ica No'va, Transfusion.

Transplanta'tion, Transplantatio.

Transplanta'tion of the Cor'nea. The insertion of the cornea of other animals as a substitute for that of man, in cases in which the latter has been destroyed; — a useless and unsuccessful operation.

Transplanta'tion of the Skin, Skin-grafting — t. of a Tooth, Transplantatio dentis.

Trans'port, (*trans*, and *portare*, 'to carry,') Delirium.

Transposit''io, (*trans*, and *ponere, positum*, 'to place,') Metathesis, Transposition.

Transposit''ion, *Transposit''io, Metath'esis*. Change of situation.

Transposit''ion of the Vis'cera, *Polype'ria promis'cua translati'va, In'tus inver'sus*, is a congenital vice of conformation, which consists in the viscera being found out of the situations they ordinarily occupy: the heart, for example, being on the right side; the liver on the left, &c.

Trans'udate, see Transudation.

Transuda'tio, (*trans*, and *sudare, sudatum*, 'to sweat,') Diapedesis, Transudation.

Transuda'tion, *Transuda'tio*, (F.) *Transsudation*. The passage of a fluid through the tissue of any organ, which may collect in small drops on the opposite surface, or evaporate from it. The material that so transudes is called a *trans'udate, transuda'tum*.

Transuda'tion, Exosmose.

Transuda'tum, see Transudation.

Transversaire, Transverse — *t. Épineux*, Transversalis dorsi—*t. Épineux du con*, Semispinalis colli—*t. Épineux du dos*, Semispinatus dorsi — *t. Grêle*, see Sacrolumbalis.

Transversal de la Conque, Transversalis auris — *t. du Nez*, Compressor nasi — *t. des Orteils*, Transversus pedis.

Transversa'lis, (from *transverse*.) Transverse.

Transversa'lis Abdom'inis, (F.) *Lombo-abdominal* (Ch.), *Transverse de l'Abdomen*. This muscle is seated, deeply, on the lateral parts of the abdomen. It is flat, thin, and broader before than behind. It is attached, above, to the cartilage of the last true rib, and to that of every false rib; and, below, to the inner lip of the crista of the ilium; to the two outer thirds of the crural arch, and to the upper part of the pubis. Its fibres, moreover, are inserted, behind, by means of broad aponeuroses, into the top of the transverse and spinous processes of the first four lumbar vertebræ; and, before, into the linea alba, and the ensiform cartilage. This muscle, all of whose fibres have a transverse direction, constricts the belly, and diminishes the base of the chest, by drawing inwards the ribs to which it is attached.

Transversa'lis Anti'cus Pri'mus, Rectus capitis lateralis — t. Collateralis colli, see Sacrolumbalis.

Transversa'lis Col'li, *Transversalis Ma'jor col'li, Longis'simus Cervi'cis, Por'tion of the Sa'crospi'nal* (Ch.), (F.) *Transversaire*. A muscle, seated at the posterior and lateral part of the neck and upper part of the back. It is attached to the transverse processes of the five or six lowest vertebræ of the neck; and to those of the four or five first dorsal. It extends the vertebræ of the neck, and inclines them to its side. See Semispinalis colli.

Transversa'lis Dor'si, *Transversospina'lis, Multif'idus Spi'næ, Lumbocer'vical por'tion of the Spi'nal* (Ch.), (*Transverso-spina'lis Lumbo'rum, Transversospinalis Dor'si, Transversospinalis Col'li,*) *Mus'culus sa'cer, Spina'les et transversa'les lumbo'rum, Semispina'lis inter'nus* sive *Transversospina'lis col'li pars inter'na* (Winslow), *Lombodorsi-spinal*, &c., (F.) *Transversaire épineux*. This muscle, usually called, by English anatomists, *Multifidus spi'næ*, and including all the *Transversospinales*, is situate in the vertebral gutters extending from the posterior parts of the sacrum to the second cervical vertebra. It is thicker in the neck and loins than in the back and behind the sacrum. Its use is to straighten the vertebral column, and to impress upon it a slight rotary motion.

Transversa'lis Fa'ciei, see Artery and Temporal — t. Nasi, Compressor naris.

Transversa'rius, Transverse.

Trans'verse, *Transver'sus, Transversa'lis, Transversa'rius*, (F.) *Transverse, Transversaire*, (from *trans*, 'across,' and *vertere, versum*, 'to turn.') That which runs across: also, that which relates to the transverse processes of the vertebræ.

Trans'verse Ar'tery of the Face arises from the temporal; passes transversely across the face, in front of the condyle of the lower jaw, and gives its branches to the different muscles of the cheek.

Trans'verse Fis'sure, see Liver—t. Fossa, see Liver — t. Ligament of the Atlas, Annular ligament.

Trans'verse Perine'al Ar'tery, *Urethrobulbar* (Ch.), is given off from the upper branch of the internal pudic; and passes inwards and forwards above the transversus perinæi muscles, as far as the bulb of the urethra, into which it dips, subdividing into numerous branches.

Trans'verse Perine'al Mus'cle, Transversus perinæi.

Trans'verse Proc''esses of the Ver'tebræ, *Diapoph'yses* of Owen, (F.) *Apophyses transverses des vertèbres*, are the bony eminences that jut out transversely and posteriorly from the sides of the vertebræ.

Trans'verse Su'ture, *Sutu'ra transversa'lis*, runs across the face, and sinks into the orbit; joining the bones of the skull to those of the face, but with so many irregularities and interruptions, that it can scarcely be recognized as a suture.

Transverse, Transverse — *t. de l'Abdomen*, Transversalis abdominis — *t. de l'Oricule*, Transversus auris—*t. du Périnée*, Transversus perinæi.

Transversospi'nal, Semispinalis colli, Semispinalis dorsi—t. Spinalis, Transversalis dorsi — t. Spinalis colli, Semispinalis colli — t. Spinalis dorsi, Semispinalis dorsi.

Transver'sus, Transverse.

Transver'sus Aur'is, *Transversus Auric'ulæ*,

(F.) *Transverse de l'Orienle* (Ch.), *Transversal de la Conque*, is often wanting. A muscular ligament formed of some transverse fibres, situate semicircularly behind the projection of the helix which divides the concha into two portions.

Transver'sus Pec'toris, Triangularis sterni.

Transver'sus Pe'dis, *Scandula'rius*, (F.) *Transversal des Orteils, Métatarso-sous-phalangien transversal du premier orteil* (Chaussier). A muscle which arises by fleshy slips from the heads of the metatarsal bones of the three outer toes. Its tendon is inserted into the base of the first phalanx of the greater toe, being blended with that of the adductor pollicis.

Transver'sus Perinæ'i, *Leva'tor A'ni par'vus, Trans'verse perine'al mus'cle*, (F.) *Ischio-périnéal* (Ch.), *Transverse du Périnée*, is placed at the posterior part of the perinæum. It is thin, triangular, and situate transversely. Its external extremity is attached to the ramus and tuberosity of the ischium: its inner extremity is confounded with its fellow of the opposite side, and with the anterior part of the sphincter ani and posterior part of the bulbocavernosus. The use of this muscle is, to compress the urethra, and to support the rectum and bladder. To a fasciculus of this muscle, Santorini has given the name *Eleva'tor* seu *Ejaenla'tor Ure'thræ*.

Transver'sus Perinæ'i Al'ter, *Prostat'icus infe'rior*. A small muscle, which occasionally accompanies the last.

Transver'sus Pros'tatæ, Compressor prostatæ.

Tra'pa Na'tans, *Trib'alus*, (F.) *Macre flottante, Noix* ou *Châtaigne d'Eau*. *Ord.* Onagraceæ. *Sex. Syst.* Tetrandria Monogynia. The plant which affords the *Nu'ces aquat'icæ, Trib'uli aquatici, Caltrops*. The nut is considered nutrient and demulcent, and is said to be useful in diarrhœa from abrasion of the bowels, and in calculus. A poultice is sometimes made of it to discuss hard and indolent tumors.

Trap'eza, (τραπεζα,) Mensa.

Trapèze, Trapezium, Trapezius.

Trape'zium Os, (τραπεζιον, 'a trapezium.') So called from its shape: *Os multan'gulum* seu *polygo'num ma'jus*, (F.) *Os trapèze*. The first bone of the second row of the carpus. It is articulated above with the scaphoides; below, with the first bone of the metacarpus; within, with the trapezoides and second metacarpal bone. Anteriorly, posteriorly, and externally, it gives attachment to ligaments.

Trape'zius, *Cuculla'ris*, (F.) *Dorso-susacromien* (Ch.), *Trapèze, Capuchon*. A muscle, seated at the posterior part of the neck and shoulder, and at the upper part of the back. It has the shape of a trapezium; is attached, on the one hand, to the inner third of the upper curved line of the occipital bone; to the posterior cervical ligament; to the spinous processes of the seventh cervical vertebra; and of all the dorsal vertebræ; and, on the other hand, to the spine of the scapula; the acromion and the outer third of the posterior margin of the clavicle. Its upper fibres are situate obliquely downwards and outwards; the transverse and inferior, obliquely outwards and inwards. This muscle elevates the shoulder; carries it backwards, or depresses it, according as its upper, middle, or lower fibres contract separately. It straightens the head, also, and inclines it to one side.

Trap'ezoid, (τραπεζιον, 'a trapezium,' and ειδος, 'a shape or resemblance,') Trapezoïdes.

Trap'ezoid Lig'ament, *Ligamen'tum trapezoï'des*. The anterior part of the coracoclavicular ligament. It is a very strong fibrous fasciculus, which has the shape of a trapezium, and is situate obliquely between the acromion process and clavicle.

Trapezoï'des Os, *Os multan'gulum* seu *polygo'num mi'nus* seu *pyramida'lē car'pi*. The second bone of the second row of the carpus — so called from its shape. It is smaller than the trapezium, on the inside of which it is situate. It is articulated, above, with the os naviculare; below, with the second metacarpal bone; on the outside, with the trapezium; and internally, with the magnum. Anteriorly and posteriorly, it affords attachment to ligaments.

Trappis'tine, (after the monks of La Trappe,) see Arquebusade, Eau d'.

Traube's Curves. A term applied by physiologists to rhythmical variations of arterial pressure occurring in animals that have been subjected to the action of curara, after total cessation of respiratory movements and section of both vagi.

Traubenkur, Grape cure.

Traulis'mus, (τραυλισμος,) see Balbuties, and Blæsitas.

Traul'otes, (τραυλοτης,) see Blæsitas.

Trau'ma, gen. *Trau'matis*, (τραυμα, gen. τραυματος,) Wound.

Traumat'ic, *Traumat'icus*, *Vulnera'rius*, *Vulnerary*, (F.) *Traumatique*, (τραυματικος, from *trauma*.) Anything relating to a wound or injury; as *traumatic affections of the skin*,—pernio, parasitic diseases, &c.

Traumat'ica, Detergents, Vulneraries.

Traumaticine, (from *trauma*,) Liquor guttæ perchæ.

Traumat'icus, Traumatic, Vulnerary.

Trau'matism, *Traumatis'mus*, (F.) *Traumatisme*. The condition of the organism occasioned by a grave wound. The *Trau'matism of Labor* includes lesions arising in the course of parturition, as laceration of the os and vagina, &c.

Traumatocomi'um, (*trauma*, and κομεω, 'I take care of.') A hospital for the reception of the wounded.

Traumatopnœ'a, (*trauma*, and πνεω, 'I breathe.') A condition met with in wounds of the lung and pleura, in which the air passes in and out the wound during respiration.

Traumatop'yra, *Fe'bris traumat'ica*, (*trauma*, and πυρ, 'fever.') A wound fever, or fever consecutive to a wound.

Trav'ail, ([F.] *travailler*, 'to labor,') Parturition.

Travail d'Enfant, 'child labor,' Parturition.

Trav'eller's Joy, Clematis vitalba.

Treac'le, (from τηριακα,) (F.) *Thériaque*, (old E.) *Triacle*, Molasses, Theriaca — t. English, Teucrium chamædrys — t. Venice, Theriaca.

Tread, Cicatricula — t. of the Cock, Molecule.

Treat'ment, (from [L.] *tractare*, [F.] *traiter*, 'to treat,') Curatio.

Treat'ment, Dry. One in which the patient is almost wholly, if not wholly, interdicted from the alimentary use of fluids; a valuable *modus medendi* in inflammatory and hemorrhagic conditions.

Tree, Elk, Andromeda arborea—t. of Heaven, Ailanthus glandulosa—t. of Life, Thuya occidentalis — t. Sour, Andromeda arborea.

Treeak Farook. A native nostrum, used in India for beriberi. Its composition is unknown. It is a thick extract into which some terebinthinate enters, and is said, by regular practitioners in India, who have used it, to subdue the pulse.

Trèfle Aponévrotique, Centre, phrenic, (from [L.] *trifolium*, from *tri*, and *folium*, 'a leaf,') Menyanthes trifoliata — *t. d'Eau*, Menyanthes trifoliata — *t. des Marais*, Menyanthes trifoliata.

Tre'foil, Hepatica triloba — t. Bean, stinking, Anagyris — t. Marsh, Menyanthes verna — t. Shrubby, Ptelea trifoliata—t. Sour, Oxalis acetosella — t. Tendon, see Tendon, trefoil — t. Water, Menyanthes trifoliata.

Tre'ma, gen. *Tre'matis*, (τρημα,) Foramen, Vulva.

Tremblement, Tremor — *t. Métallique*, see Tremor.

Trem'bles, Milksickness.

Trem'bling, Tremor — t. Fevers, Intermittent fever — *t. Mercuriel,* Palsy, mercurial.

Trem'bling, Se'nile, *Chore'a seni'lis.* Involuntary but uniform contractions of muscles, occurring over a limited space, and succeeding each other with excessive rapidity, in old persons generally.

Tremel'la Auric'ula Ju'dæ, (from *tremere,* 'to tremble,') Peziza auricula.

Tre'mor, *Trepida'tio, Syn'clonus Tre'mor, Tro'mospas'mus, Trō'mus, Trem'bling,* (F.) *Tremblement,* (from *tremere,* 'to tremble.') Involuntary agitation of the body, or of some part of it, without any obstacle to voluntary motion. It depends, generally, upon debility of the muscular, or of the nervous system; and, hence, is observed in convalescence, and in typhoid affections. It occurs, also, in old people; in hard drinkers; and in workers in certain metals, as mercury and lead. In the last case, it is called *Tremor metal'licus* seu *metallurgo'rum, Paral'ysis ag''itans metal'lica, Rheumatis'mus metallicus, Metal'lic sha'king pal'sy,* (F.) *Tremblement métallique.* Tremor seems to resemble paralysis more than convulsion. See Palsy, mercurial, Paralysis agitans, and Pavitatio.

Tre'mor Ar'tuum, Paralysis agitans—t. Coactus, Paralysis agitans—t. Cordis, Hippus, Palpitation — t. ab Hydrargyro, Palsy, mercurial — t. Lead, Palsy, lead—t. Mercurial, Palsy, mercurial — t. Metallicus, see Tremor — t. Metallurgorum, see Tremor — t. Potatorum, see Delirium tremens — t. Purring, Frémissement cataire.

Trepan', *Trep'anum,* (τρυπανον,) *Try'panon, Trip'anon, Terebel'la, Perete'rium, Peretor'ium, Ser'ra versat'ilis, Chœn'icis, Chœnic'ion, Ter'ebra, Ter'etron, Tere'trium, Vertib'ulum,* (F.) *Trépan,* (from τρεπω, 'I turn,' or from τρυπαω, 'I perforate.') A surgical instrument resembling a wimble, and worked in the same manner. It is used for removing portions of bone, and particularly of the bones of the skull. The term *trepan* is given more particularly to the part of the instrument that makes the perforation. The handle is so constructed as to receive different bits, — as the crown, the *Trépan perforatif* or *Perite'rion,* the *T. exfoliatif* or *Desquamato'rium trep'anum,* and the *T. abaptis'ta.* '*To trepan*' is to use the trepan.

In Great Britain and the United States this instrument has been superseded by the trephine, which is more manageable.

Trepana'tio, Trepanning.

Trépanation, Trepanning.

Trepang', Biche de mer.

Trepan'ning, *Terebra'tio, Anatre'sis, Cephalotrype'sis, Craniotrype'sis, Trepana'tio, Trype'sis, Tre'sis, Pri'sis, Pris'mus, Fora'tio,* (F.) *Trépanation.* The methodical application of the trepan.

Trep'anum, Trepan.

Trephine', (from τρεπω, 'I turn.') The instrument which has replaced the trepan in some countries. It consists of a simple, cylindrical saw, with a handle placed transversely like that of a gimlet, and from the centre of the circle, described by the teeth of the saw, a sharp little perforator projects, called the *Cen'trepin.* The centrepin is capable of being removed, at the surgeon's option, by means of a key for the purpose. It is used to fix the instrument until the teeth of the saw have made a circular groove, sufficiently deep for it to work steadily. The pin must then be removed. Sometimes the pin is made to slide up and down, and to be fixed in any position, by means of a screw. See Trepan. '*To trephine*' is to use the trephine.

Trepida'tio, (*trepidare, trepidatum,* 'to be agitated,') Tremor — t. Cordis, Cardiotromus.

Trépied (tripod) ***Cœliaque,*** see Cœliac artery — *t. Vital,* Tripod, vital.

Trepon'do, (*tres,* 'three,' and *pondus,* 'a pound.') A weight of three pounds.

Tre'sis, (τρησις, from τρεω, 'I bore.') Properly, a perforation. A wound. A forcible solution of continuity in a soft part, commencing externally. A genus in the nosology of Good.

Tre'sis, Trepanning, Wound — t. Causis, Burn — t. Punctura, Puncture — t. Vulnus, Wound—t. Vulnus laceratum, see Laceration—t. Vulnus simplex, Cut.

Tressaillement, (*trans,* 'beyond,' and *salio,* 'I leap,') Shuddering.

Tresso'ria, (low Latin,) *Episi'on.* A term formerly applied to the hair covering the mons veneris, the absence of which has, by the vulgar, been esteemed a matter of reproach.

Tri, (τρι,) in composition, three.

Tri'acle (old E.), Molasses.

Tri'al, Beset'ting, Masturbation.

Tri'al by Bier'right. An ordeal, founded on a superstition formerly prevalent, that the wounds of a murdered person would bleed afresh if the body were touched ever so lightly, in any part, by the murderer.

Tri'angle, Carot'id, see Cervical triangles.

Tri'angle of Hess'elbach. A triangular interval on the posterior aspect of the abdominal wall, through which direct inguinal hernia finds its way, and the sides of which are formed by the epigastric artery, and the margin of the rectus muscle; and the base by Poupart's ligament.

Triangle Médullaire, (*tri,* and *angulus,* 'an angle,') Fornix.

Tri'angle, Occip'ital, see Cervical triangles.

Tri'angle of Scar'pa. A triangular depression in the upper part of the thigh, the base of which is formed by Poupart's ligament; the outer side by the tendon of the psoas and iliacus muscles, and the sartorius; and the inner side by the pectineus and adductor longus. Through the centre of this hollow, the femoral artery runs, with the femoral vein internal to it.

Tri'angle, Subcla'vian, see Cervical triangles — t. Submaxillary, see Cervical triangles — t. Vesical, see Urinary bladder.

Tri'angles, Cer'vical, see Cervical.

Trian'gular, *Trigo'nos, Triangula'ris,* (F.) *Triangulaire.* That which has three angles.

Trian'gular or Infrapu'bian Lig'ament, *Ligamen'tum triangula'rē* seu *infrapubia'num,* is a ligamentous fascia with short fibres, situate transversely beneath the symphysis pubis, which it strengthens. Also, a ligament extending from the coracoid to the acromial process of the scapula.

Triangula'ris, Depressor anguli oris — t. Coccygis, Coccygeus — t. Nasi, Compressor naris.

Triangula'ris Ster'ni, *Sternocostal* (Ch.), *Pectora'lis inter'nus, Transver'sus pec'toris.* A muscle situate at the anterior and inner part of the chest, behind the cartilages of the ribs. It has the shape of a lengthened triangle, the base of which is directed downwards. It is attached to the posterior, lateral, and inferior part of the sternum, whence its fibres pass upwards and outwards, and terminate by as many distinct digitations at the cartilages of the 3d, 4th, 5th, and 6th true ribs. This muscle depresses the ribs and contributes to expiration.

Tri'badism, see Tribas.

Trib'alus, (τριβαλος,) Trapa natans.

Tri'bas, gen. *Tri'badis,* (τριβας,) (F.) *Tribade,* (from τριβω, 'I rub,') *Fric'trix, Frica'trix, Futu'trix, Mas'cula, Subagita'trix, Subigita'trix, Etæris'tria.* A female whose clitoris is so large as to cause her to be regarded as a hermaphrodite. One who acts as a male with another female or practises *tribadism.*

Triba'sic, (from *tri,* and *basis,*) see Salt.

Trib'uli Aquat'ici, (pl. of *tribulus,* from τριβαλος,) see Trapa natans.

Tribu'tum Luna'rē, 'lunar or monthly tribute,' Menses — t. Menstruum, Menses.

Tri'cæ, (from θριξ, gen. τριχος, 'a hair,') Plica — t. Ineuborum, Plica — t. Scroforum, Plica.

Trica'go, gen. *Tricag''inis*, Teucrium chamædrys.

Tricauda'lis, (*tri*, and *cauda*, 'a tail,') Retrahens auris.

Triceph'alus, (*tri*, and κεφαλη, 'head.') A monster with three heads.

Tri'ceps, gen. *Tricip'itis*, (*tri*, and *caput*, 'head.') A name given to muscles that have three fleshy bundles at one of their extremities.

Tri'ceps Adduc'tor Fem'oris. Under this appellation are comprehended three distinct muscles; *Adductor brevis*, *A. longus*, and *A. magnus*. See Adductor.

Tri'ceps Aur'is, Retrahens auris — t. Brachialis, Triceps extensor cubiti — t. Brachii, Triceps extensor cubiti — t. Crural, Triceps cruris.

Tri'ceps Cru'ris, *Femora'lis*, (F.) *Trifémoro-rotulien* (Ch.), *Crural*, *Trifémoro-tibi-rotulien*, *Triceps crural* ou *de la cuisse*, is situate at the anterior, inner, and outer part of the thigh. It is formed of three bundles at its superior extremity, viz.: 1. A middle fasciculus, the *Crura'lis* of most anatomists, *Crure'us*, *Femore'us*; see Cruralis. 2. An external fasciculus, the *Vastus externus*, *Exten'sor cru'ris vastus* seu *extern'us*. 3. An inner fasciculus, the *Vastus internus*. It is attached, above, to the anterior, inner, and outer surfaces of the femur, and to the two edges of the linea aspera, from the base of the trochanter to within four fingers' breadth of the knee. Below, it terminates by a large tendon, which is attached to the base and edges of the patella, as well as to the inner and outer tuberosities of the tibia. The triceps extends the leg on the thigh, and conversely.

Triceps de la Cuisse, Triceps cruris.

Tri'ceps Exten'sor Cu'biti, *Tri'ceps brachia'lis* seu *bra'chii* seu *exten'sor*, *Exten'sor tri'ceps* seu *cu'biti*, (F.) *Scapulo-huméro-olécranien* (Ch.), *Triceps brachial*. This muscle, which occupies all the posterior part of the os humeri, is described as two muscles by Douglas, and as three by Winslow. It arises by three heads. The first or long head — *long head of the biceps externus* of Douglas, *Ancone'us ma'jor* of Winslow—arises from the anterior extremity of the inferior costa of the scapula, near its neck, and below the origin of the teres minor. The second head, or *short head of the biceps externus* of Douglas, *Ancone'us externus* of Winslow, arises from the upper and outer part of the os humeri, at the base of the great tuberosity; and the third head,—*Brachialis externus* of Douglas, *Ancone'us inter'nus* of Winslow, — the shortest of the three, arises from the back part of the os humeri, behind the flat tendon of the latissimus dorsi. These three portions unite about the middle of the arm, so as to form one thick and powerful muscle, which is inserted at the upper part of the olecranon. It extends the forearm on the arm, and conversely.

Tri'ceps Mag'nus, Adductor magnus — t. Minor, Adductor longus femoris — t. Secundus, Adductor brevis — t. Suræ, see Gastrocnemii.

Tri'chæ Incubo'rum, (θριξ, gen. τριχος, 'a hair,' and *incubi*, 'the Fauns' [?],) Plica.

Trichangi'a, (*tricho*, and αγγεια, 'vessels,') Capillary vessels.

Trichangiecta'sia, *Angidiecta'sia*, *Trichocir'sus*, (*tricho*, αγγειον, 'a vessel,' and εκτασις, 'dilatation.') Morbid dilatation of the capillary vessels.

Trichatroph'ia, (*tricho*, and *atrophia*.) A disease of the hair, in which it becomes altered in structure, soft and brittle, with atrophy of the hair-bulb.

Trichaux'ē, *Trichaux'is*, (*tricho*, and αυξη, 'increase.') Increase in the quantity and size of the hair, without change of texture.

Trichaux'is, Trichauxe.

Triche'ra Arven'sis, (from θριξ, gen. τριχος, 'hair,') Scabiosa.

Trich'ia, (from θριξ, gen. τριχος, 'hair,') Entropion.

Trichi'asis, *Trichio'sis*, *Tricho'sis*, (from θριξ, gen. τριχος, 'hair,') *Mor'bus pila'ris*. This name has been given to several affections. 1. To a disease of the kidneys or bladder, in which filamentous substances, resembling hairs, are passed in the urine. This is also called *Pilimic'tio*. It must be regarded as a variety of *Catar'rhus vesi'cæ*. 2. To a painful swelling of the breasts, in childbed women, when the milk is exercted with difficulty; a disease attributed, by Aristotle, to a hair swallowed by accident, and carried to the breasts through the circulation. 3. To inversion of the eyelashes, *Trichi'asis Cilio'rum*. See Entropion. *Trichi'asis Coac'ta* is a matting and interlacing of hair, either from neglect and dirt, or in bedridden women and children.

Trichi'asis Cilio'rum, see Trichiasis — t. Coacta, see Trichiasis—t. Lactea, Infarctus mammæ lacteus.

Trichil'ia Emet'ica, *Elcaja*. A tree, *Order*, Meliaceæ, common on the mountains of Yemen and in Senegal. The fruit is used by the Arabs as an emetic. The ripe seeds are formed with sesamum oil into an ointment for the itch.

Trichil'ia Trifolia'ta, a bush of Curaçoa, a decoction of the roots of which is used to promote abortion.

Trich'ina Spira'lis, (from θριξ, gen. τριχος, 'hair,' from its small size,) *Pseuda'lius trich'ina*. A small species of entozoa, *Fam.* Nematoidea, discovered in the muscles of voluntary motion. Trichinæ consist of very minute cysts, of an oblong figure, having considerable resemblance, in size and color, to young pedieuli, and are somewhat allied to the eels found in paste and vinegar. Küchenmeister regarded them as the primitive state of Trichocephalus dispar; but this has not been confirmed. When taken with the food, they multiply in the intestines and then migrate to the muscles. No symptoms have, as yet, been observed to be pathognomonic of their presence in the muscles. It would appear, however, that they may be the cause of the morbid phenomena produced by eating the flesh of animals in which they existed, and likewise of sausage poisoning (see *Allantotoxicum*), and of the poisoning resulting from eating pork and ham. The condition thus induced has been called *Trichini'asis*, *Trichini'tis*, *Trich'ina*, *Trich'inous* or *Trichin'atous disease*. See Parasites and Worms.

Trichini'asis, see Trichina spiralis.

Trichini'tis, see Trichina spiralis.

Trichino'sis, (*trichina*, and *osis*,) see Trichina spiralis.

Trich'inous, *Trichino'sus*. Relating or appertaining to trichina, as *trichinous* disease, *trichinous* pork, &c.

Trichino'sis, see Parasites.

Trichio'sis, (from θριξ, gen. τριχος, 'hair,') Trichiasis — t. Distrix, Distrix.

Trichis'mus, *Capilla'tio*, *Fissu'ra pila'ris*. A capillary fracture, fissure, or crack.

Trichiu'ria, (*tricho*, and ουρα, 'tail,') Trichocephalus.

Tri'cho, (θριξ, gen. τριχος, 'hair,') in composition, hair.

Trichocéphale de l'Homme, Trichocephalus.

Trichoceph'alus, *Trichoceph'alus dis'par*, (*tricho*, and κεφαλη, 'head,') *Trichu'ris*, *T. vulga'ris* seu *intestina'lis*, *As'caris trichu'ria*, *Trichiu'ria*, *Trichoceph'alus* seu *Mastigo'des hom'inis*, *Long thread'worm*, *Whip'worm*, (F.) *Trichocéphale de l'homme*. A worm, from an inch and a half to two

inches long; the head acute; the body spirally involuted in the male, almost straight in the female. The *trichocephalus dispar* generally inhabits the cæcum and colon, and is rarely met with in the small intestines. It gives rise to no peculiar symptoms, and requires the usual anthelmintic treatment.

Trichocir'sus, (*tricho*, and *κιρσος*, 'a dilated vessel,') Trichangiectasia.

Trichocla'sia, (*tricho*, and *κλασις*, 'fracture,') *Trichocla'sis*, *Fragil'itas Crin'ium*. A breaking of the hair, giving it an appearance as if jointed.

Trichocla'sis, Trichoclasia.

Trichodyschroi'a, (*tricho*, and *δυσχροια*, 'bad or defective color.') Discoloration of the hair; alteration or variation of the natural pigment of the hair.

Trichog"enous, (*tricho*, and *γενναω*, 'I generate.') Hair-forming; as a '*trichogenous* remedy,' — one that promotes the growth of hair.

Trichol'abis, (*τριχολαβις*, from *tricho*, and *λαμβανω*, 'I seize hold of,') Madisterium.

Trichola'bium, (*τριχολαβιον*,) Madisterium.

Tricholog"ia, (*tricho*, and *λεγω*, 'I collect or pluck,') Carphologia. See Trichology.

Trichol'ogy, *Tricholog"ia*, (*tricho*, and *λογος*, 'a description.') A treatise on the hair.

Tricho'ma, gen. *Tricho'matis*, (from *θριξ*, gen. *τριχος*, 'hair,') Capillamentum, Plica.

Trichom'anes, (*tricho*, and *μανος*, 'thin,') Asplenium trichomanoides — t. Crenata, Asplenium trichomanoides.

Tricho'maphyte, *Trichomaph'yton*, (*trichoma*, 'plica,' and *φυτον*, 'a vegetable.') A cryptogamous growth, found in plica, and said, by some, to be its cause. Mycoderma plicæ.

Trichoma'tion, (*τριχωματιον*,) Capillamentum.

Trichom'atose Hair, (from *trichoma*,) Plica.

Trichom'onas, gen. *Trichomon'adis*, *Trichom'onad*, (*tricho*, and *monad*.) An animalcule found by M. Donné in the mucus of the vagina, where cleanliness had not been attended to, and to which he has given the name *Trichom'onas vagina'lis*. By some it is considered to be nothing more than ciliated epithelium separated from the uterus.

Trichom'yces Decal'vans, (*tricho*, and *μυκης*, 'fungus,') see Porrigo decalvans — t. Tonsurans, see Porrigo decalvans.

Trichono'sis, Porrigo — t. Cana, Canities — t. Furfuracea, Porrigo decalvans — t. Plica, Plica — t. Poliosis, Poliosis.

Trichono'sus, (*tricho*, and *νοσος*, 'disease.') A disease of the hair.

Trichopathi'a (*tricho*, and *παθος*, 'affection') **Pli'ca**, Plica Polonica.

Trichopath'ic, (samê etymon.) Relating or appertaining to affections of the hair.

Trichophy'ia, *Trichophyt'ica*, (*tricho*, and *φυειν*, 'to grow.') Remedies that promote the growth of the hair.

Trichophytie (F.), (*tricho*, and *φυτον*, 'a vegetable.') A cutaneous affection produced by the trichophyton, as *Trichophytie Sycosique*, or *Tinea Sycosis*.

Trichoph'yton, (*tricho*, and *φυτον*, 'a vegetable,') see Plica — t. Decalvans, see Porrigo decalvans — t. Sporuloides, see Fungus, Parasites, and Plica — t. Tonsurans, see Fungus and Porrigo decalvans.

Trichorrhœ'a, (*tricho*, and *ρεω*, 'I flow,') *Defluv'ium Capillo'rum*. A simple fall of the hair from any cause.

Trichosan'thes Ama'ra, (*tricho*, and *ανθη*, 'a flower,' from the ciliated corollæ.) *Order*, Cucurbitaceæ. A plant of India; the seeds are bitter and astringent, sometimes emetic. In Jamaica, it is considered to be a poison, and is used for killing rats.

Trichosan'thes Corda'ta. The root is used by the natives of India as a substitute for calumba root.

Trichosan'thes Cucumer'ina. The fruit is considered in India to be anthelmintic.

Trichosan'thes Inci'sa. *Gashed Trichosanthes*, of the forests of India. The fruit is esteemed to be poisonous. Pounded and intimately blended with cocoanut oil, it is used in India as an application to offensive sores of the ears, and to ozæna.

Trichosan'thes Villo'sa, of Java. The fruit acts like colocynth.

Trichos'chisis, (*tricho*, and *σχιζω*, 'I split,') Schizatrichia.

Tricho'sis, *Pila'rē ma'lum*, (from *θριξ*, gen. *τριχος*, 'hair,' and *osis*.) Morbid organization or deficiency of hair. A genus in the system of Good.

Tricho'sis, Entropion, Trichiasis — t. Area, Porrigo decalvans — t. Athrix, Alopecia — t. Distrix, Distrix — t. Furfuracea, Porrigo furfurans — t. Hirsuties, Hirsuties — t. Plica, Plica — t. Poliosis, Poliosis — t. Setosa, Hystriciasis.

Trichosyphilo'sis, (*tricho*, and *syphilis*,) *Syphilo'ma of the Hair*. A change in the structure of the hair, the shaft of which becomes swollen and dark-colored, drying up and splitting or breaking off; — a result of the syphilitic taint.

Trichothe'cium, (*tricho*, and *θηκη*, 'a place of deposit.') A form of fungus, giving rise to a vegetable parasitic disease of the hair.

Tricho'ton, (*τριχωτος*, 'covered with hair,') Scalp.

Trichu'ris, (*tricho*, and *ουρα*, 'a tail,') Trichocephalus.

Triclisper'ma (gen. *Triclisper'matis*) **Grandiflo'ra**, (*θριξ*, 'hair,' and *σπερμα*, 'seed,') Polygala paucifolia.

Tricoptilose (F.), (*τριξ*, gen. *τριχος*, 'hair,' and *πτιλος*, 'a feather.') A diseased condition of the hair characterized by a longitudinal division similar to the barbs of a feather, and by dryness, brittleness, &c.

Tricrot'ic, see Pulse, tricrotic.

Tric'rotous, see Pulse, tricrotic.

Tricus'pid, *Tricus'pis*, *Tricuspida'lis*, *Tricuspida'tus*, (*tri*, and *cuspis*, gen. *cuspidis*, 'a cusp, a point.') That which has three points.

Tricus'pid Valves, *Val'vulæ tricus'pides* seu *triglo'chines* seu *trisul'cæ*, are three triangular valvular duplicatures, formed by the inner membrane of the right cavities of the heart, around the orifice by which the auricle communicates with the ventricle. The elongated and pointed top of each of these valves is continuous with the chordæ tendineæ, which set out from the columnæ carneæ of the heart. These valves are depressed to allow the blood to flow from the auricle into the ventricle; and are raised to prevent its reflux into the auricle.

Tricus'pis, gen. *Tricus'pidis*, Tricuspid.

Trienceph'alus, *Trioceph'alus*, (F.) *Triencéphale*, *Triocéphale*, (*tri*, and *εγκεφαλος*, 'the encephalon.') A monster wanting three cephalic organs of sense—smell, hearing, and vision. See Aprosopia.

Tri'ens, *Un'ciæ quat'uor*. (From *tri*, 'three.') The third part of a pound. Four ounces, troy.

Trifa'cial, Trigemini.

Trifēmoro-rotulien, Triceps cruris — *t. Tibirotulien*, Triceps cruris.

Trifo'lium Aceto'sum, (*tri*, and *folium*, 'a leaf,') Oxalis acetosella — t. Aquaticum, Menyanthes trifoliata — t. Aureum, Hepatica triloba — t. Cervinum, Eupatorium cannabinum — t. Fibrinum, Menyanthes trifoliata — t. Hepaticum, Hepatica triloba.

Trifo'lium Melilo'tus Officina'lis, *T. officina'lē* seu *odora'tum* seu *caballi'num*; (from *tri*,

and *folium*, 'a leaf;') *Melilo'tus, Melilo'tus cit'rina, Lo'tus sylves'tris, Ser'tula Campa'na, Coro'na re'gia, Com'mon mel'ilot*, (F.) *Mélilot*. *Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. The infusion or distilled water of this plant has been employed in cases of ophthalmia. It has also been used in fomentations, glysters, &c.

Trifo'lium Officina'lē, T. melilotus officinalis — t. Paludosum, Menyanthes trifoliata — t. Palustre, Menyanthes trifoliata.

Trigas'tric, *Trigas'tricus, Triven'ter*, (*tri*, and γαστηρ, 'belly.') That which has three bellies. An epithet for muscles so circumstanced.

Trigem'ini, *Tergem'ini*, (*tri*, and *gem'inus*, 'double;' 'threefold,' 'triplets.') The *fifth pair of nerves, Nervi divi'si* seu *gustato'rii, Ner'vus quin'tus* seu *tremel'lus* seu *mix'tus* seu *sympathet'icus me'dius* seu *sympath'icus me'dius* seu *anon'ymus* seu *innomina'tus, Par trigem'inum* seu *quin'tum nervo'rum cerebra'lium* seu *tri'um fnniculo'rum, Trifa'cial* or *Trigem'inal nerve*, (F.) *Nerf gustatif innominé, Nerf à trois cordes, Nerf trijumeau*. This nerve arises below the tuber annulare by one large posterior root from the corpora restiformia, and by two small anterior roots from the corpora olivaria, whence, proceeding forwards to the side of the sella Turcica, the filaments composing the large root form a ganglion — the Gasserian. Emerging from this ganglion, the filaments, of which the large root consists, form, with those constituting the small roots, and which had not passed through the ganglion, two flattened trunks, each of which is soon divided into three branches, in such a manner, however, that the *first* or *ophthal'mic branch*, and the *second* or *upper maxillary*, are composed exclusively of the filaments that arose from the corpora restiformia and passed through the Gasserian ganglion; while the *third* or *lower maxillary branch* is composed in part of those filaments, and in part of those that arose from the corpora olivaria, and passed on one side of the ganglion without going through it. The whole of the first and second branches, and a part of the third are sensiferous nerves, while the remaining part of the third — the *man'ducatory* or *mas'ticatory* — is entirely motiferous, and passes to the pterygoid and other muscles concerned in mastication.

Trigo'na Cervica'lia, Cervical triangles.

Trigone Cérébral, (τριγωνον, 'a triangle,') Fornix — t. *Vésical*, see Urinary bladder.

Trigonel'la Fœ'num, *T. Fœ'num Græ'cum*, (dim. of τριγωνον, 'a triangle,' from the shape of its flower,) *Fen'ugreek, Fœ'nugreek, Fœ'num Græ'cum, Bu'ceras, B. Fœ'num Græ'cum, Car'phos, Ægoc''eras*, (F.) *Fénugrec, Sénégrain*. *Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. A native of the south of France. The seeds have a strong, disagreeable smell, and an unctuous, farinaceous taste; accompanied by a slight bitterness. They are chiefly used in poultices.

Trigo'nos, (τριγωνος,) Triangular.

Trigo'num Lieutaud'i, Urinary bladder — t. Olfactorium, 'olfactory triangle,' see Mammillary eminence — t. Vesicæ, see Urinary bladder.

Trigo'nus Lieutaud'i, (τριγωνον,) see Urinary bladder — t. Vesicæ, see Urinary bladder.

Trijumeaux, (*tri*, and *jumeau*, 'a twin,') Trigemini.

Trilabe, Pince à trois branches. A lithotrite consisting of a sheath containing a stem with three branches at its vesical end, and an independent branch in the centre.

Tril'lium Latifo'lium, (from *trilix*, 'triple,' its parts being chiefly in *threes*,) *Broadleaf Bethroot, Beth'root, Rattlesnake root, Wake'robin, Cough'root, In'dian Balm, Ground Lil'y, Jews' Harp, In'dian Sham'rock, Pariswort, Truelove*. *Ord.* Trilliaceæ. *Sex. Syst.* Hexandria Trigynia. A plant peculiar to North America, which blossoms in the spring. The root is astringent.

There are many species of Trillium, all of which possess the same properties.

Trimeth'ylamin, *Trimethyl'ia*. A volatile liquid prepared from the same source as propylamin, and isomeric with it. It is obtained from decomposition of certain bodies, as fish, and also from ergot, from certain weeds, &c. It is said to be efficacious in the treatment of acute articular rheumatism.

Trintanelle Malherbe, Passerina tartonraira.

Triocéphale, Triocephalus.

Triocepha'lia, Aprosopia, see Triencephalus.

Trioceph'alus, Trienecephalus.

Trior'chis, gen. *Trior'chidis*, (*tri*, and ορχις, 'a testicle.') One who has three testicles.

Triosteosper'mum, Triosteum.

Trios'teum, *T. perfolia'tum* seu *ma'jus*, (*tri*, and οστεον, 'a bone,' in allusion to the three bony nuts,) *Triosteosper'mum, Bas'tard Ipecacuan'ha, Fe'ver root, Fever'wort, Tink'er's weed, Horse gin'seng* or *gen'tian, Ip'ecac, Wild Cof'fee, White gin'seng, Gen'tian, White Gen'tian, Sweet Bit'ter*. Indigenous; *Ord.* Caprifoliaceæ. In very large doses, *Triosteum* (Ph. U. S.) proves emetic. It is a good cathartic, in doses of twenty or thirty grains. It sometimes operates as a diuretic.

Trios'teum Angustifo'lium, *T. minus*, has similar virtues.

Tripe de Roche, 'rock tripe.' Different lichens —*Rock li'chens, Stone moss*—of the species Gyrophora, inhabiting the Arctic regions of America, bear this name. They are eaten as food by the hunters.

Triphar'macum, (τριφαρμακον, from *tri*, and φαρμακον, 'a medicine.') A medicine composed of three ingredients.

Trip'le Phos'phate, see Calculi, urinary.

Trip'let, (*triplex*, 'triple.') One of three children born at the same accouchement or gestation. Also, relating to triplets — as a '*triplet* conception.'

Trip'let Mon'sters, *Mon'stra trip'lica* seu *trigem'ina*, are such as have parts of the body tripled. They are rare.

Tri'pod, Vi'tal, (τριπους, from *tri*, and πους, gen. ποδος, 'foot,') (F.) *Trépied vital*. The heart, lungs, and brain have been so called, as their united action is necessary for the maintenance of life.

Trip'sis, (τριψις,) Contusio, Trituration.

Tripudia'tio Spas'tica, (*tripudiare, tripudiatum*, 'to leap, to dance,') Chorea.

Tri'pus ('tripod') **Cœli'acus seu Halle'ri,** see Cœliac artery.

Trique-madame, Sedum album.

Triq'uetra Os'sa, (*triquetrus*, 'three-cornered,') Wormiana ossa.

Triq'uetrum (Os), Cuneiform (bone).

Tris'mus, (τρισμος, from τριζω, 'I gnash,') *Enta'sia* seu *To'nus Trismus, Capis'trum, Mas'ticatory spasm of the face, Lock'ed Jaw, Spas'mus* seu *Ri'gor* seu *Tet'anus maxill'æ inferio'ris, Gnathospas'mus, Stomatospas'mus*, (F.) *Mal de Machoire*. Spastic closure of the under jaw, a partial tetanus, arising from erethism of the masticatory or motor branch of the fifth pair of nerves. Cullen makes two varieties — *T. nascen'tium* seu *neonato'rum, Nineday fits*, (F.) *Sarrète*, attacking infants during two weeks from birth, and *T. traumaticus*, originating from a wound.

In the West Indies, and in South America, Trismus nascentium is called *Seven days' disease*, (F.) *Maladie de sept Jours*.

Tris'mus Capistra'tus, Brédissure — t. Catarrhalis maxillaris, Neuralgia maxillaris — t. Clonicus, Neuralgia faciei — t. Cynicus, see Canine laugh — t. Diastrophe Sauvagesii, Paralysis. Bell's — t. Dolorificus, Neuralgia faciei — t. Maxillaris, Neuralgia faciei — t. Nascentium, see

Trismus — t. Neonatorum, see Trismus — t. Sardonicus, Risus sardonicus.

Trisper'mum, (*tri,* and *σπερμα,* 'a grain or seed.') An ancient cataplasm, consisting of three seeds — *cumin, bay,* and *smallage.*

Trisplanch'nia, (*tri,* and *σπλαγχνον,* 'viscus,') Cholera.

Trisplanch'nic, *Trisplanch'nicus,* (F.) *Trisplanchnique.* That which relates to the viscera of the great cavities.

Trisplanch'nic Nerve, *Ner'vus trisplanch'nicus* seu *sympathet'icus mag'nus* seu *sympath'icus* seu *ganglion'icus* seu *vasomoto'rius,* (F.) *Nerf sympathique* ou *grand sympathique; Great sympathet'ic, Intercos'tal, Ganglion'ic* or *Vertebral nerve, Nerve of organ'ic life* — named by Bichat the *organic nervous system,* in opposition to the other nervous parts, called the *animal nervous system.* Gall terms it the *nervous system of the automatic functions.* It has also been called the *ganglionic nervous system.* It is termed *Trisplanch'nic* because it distributes its branches to the organs in the three great splanchnic cavities — the cranium, chest, and abdomen. It is composed of a series of ganglia, united by intermediate branches, and passing along the side of the spine to the lowest part of the trunk, communicating by a branch with each of the thirty pairs of spinal nerves and several of the cerebral nerves, and detaching nerves from its several ganglia which accompany the arteries, and are distributed particularly to the organs of involuntary functions. At its upper part it is concealed in the canalis caroticus and cavernous sinus, and is joined there by a branch of the 6th pair of nerves and by a twig from the Vidian nerve of the 5th pair. In passing down by the side of the spine, it forms three ganglions in the neck — the *supe'rior, middle (thy'roid gan'glion),* and *infe'rior (ver'tebral gan'glion);* 12 in the back — the *thorac''ic;* 5 in the loins — the *lumbar;* and three or four *sa'cral.* When it reaches the coccyx it unites with its fellow from the opposite side, forming a small ganglion — the *coccyge'al, gan'glion im'par, az'ygous gan'glion.* Meckel divides it into two portions — 1. The *central ganglions* or *central part,* composed of the numerous ganglionic plexuses in the abdomen, the centre of which is the *semilunar* and *solar plexuses.* 2. The *external ganglions, limitrophes,* or *external part,* which comprise the series of ganglions situate at the sides of the spine, from the base of the cranium to the sacrum. The great sympathetic seems to form a distinct nervous system, destined for the organs of involuntary motion; for although communicating with both brain and spinal marrow, it does not seem to be immediately under the influence of either. Its special functions are not yet, however, well understood, and are the subject — as they have always been — of much interesting investigation.

Trisplanchni'tis, (*trisplanchnic,* and *itis,*) Cholera (spasmodic).

Trissa'go, gen. *Trissag''inis,* Teucrium chamædrys — t. Palustris, Teucrium scordium.

Tristema'nia, (*triste,* 'sad,' and *mania,*) Melancholy.

Trister'nal. Béclard has given this name to the third bony portion of the sternum — that which corresponds to the third intercostal space.

Tristit''ia, (from *tristis,* 'sad,') Athymia, Mœror.

Tritæophy'a America'na, Fever, yellow.

Tritæoph'yes, *Tritæoph'ya,* (*τριταιοφυης,* from *tritæus,* and *φυη,* 'form.') A fever whose type approaches the tertian. Sauvages gave the name *Tritæophya Vratislavien'sis* to an epidemic which broke out in the Prussian army at Breslau, in the middle of the last century.

Tritæ'us, (*τριταιος,*) Tertian fever.

Trit'icum Æsti'vum, (from *terere, tritum,* 'to thrash,') *T. cerea'lē,* seu *Cevallos* seu *compac'tum* seu *erina'ceum* seu *Gaertneria'num* seu *Linnæa'num* seu *pruino'sum, Sum'merwheat,* and Trit'icum Hybern'um seu *Glau'cum* seu *Mu'ticum* seu *Sic'ulum, Win'terwheat,* (F.) *Froment. Ord.* Gramineæ. *Sex. Syst.* Triandria Digynia. From these plants our wheaten flour is obtained, by grinding the seeds — *Wheat, Py'rus, Frumen'tum* — and to them we are indebted for our bread and pastry. The nutritive properties of wheaten flour are so well known as not to need comment.

Bread, Pa'nis, (F.) *Pain,* mixed with milk, constitutes the ordinary emollient poultice; and the *crumbs of bread, Mi'cæ pa'nis,* are a common excipient for pills and boluses.

Mi'ca Pa'nis is officinal in the British Pharmacopœia (1867), and is used as an ingredient of Cataplasma carbonis.

Trit'icum Arven'sē, T. repens — t. Cereale, T. æstivum — t. Cevallos, T. æstivum — t. Compactum, T. æstivum — t. Erinaceum, Triticum æstivum — t. Faginum, Polygonum fagopyrum — t. Gaertnerianum, T. æstivum — t. Glaucum, see T. æstivum and T. repens — t. Hybernum, see T. æstivum — t. Linnæanum, T. æstivum — t. Muticum, see T. æstivum—t. Pruinosum, T. æstivum.

Trit'icum Re'pens, *T. arven'sē* seu *glau'cum, Agrop'yrum lævis'simum, Bro'mus gla'ber, Gra'men* seu *Gra'men cani'num* seu *Dioscor'idis* seu *re'pens, Lolia'ceum radi'cē repen'tē, Grass, Dog'grass, Couch'grass, Quick'ens, Twitch'grass,* (Sc.) *Ronnachs,* (F.) *Chiendent.* The roots are sweet, and possess aperient properties. They are said also to be diuretic.

Trit'icum Sic'ulum, T. hybernum — t. Spelta, see Alica.

Tri'tio, (*terere, tritum,* 'to rub, to grind,') Contritio, Trituration.

Tri'ton Palus'tris, (from *Τριτων,* 'the sea deity,') see Ectozoa.

Trito'rium, (from *terere, tritum,* 'to wear away,') Infundibulum.

Tritu'ra, Contritio, Trituration.

Tritura'tion, *Tritura'tio, Tritu'ra, Tri'tus, Tri'tio, Trip'sis,* (*terere, tritum,* 'to rub, to grind.') The act of reducing a substance to powder. See Contritio.

Tri'tus, gen. *Tritûs,* Contritio, Trituration.

Triven'ter, gen. *Triven'tris,* (*tri,* and *venter,* 'belly,') Trigastric.

Tro'car, *Tro'char, A'cus paracent'icus* seu *paracentet'ica* seu *triq'uetra vulga'ris, Paracenti'cion, Paracentete'rion,* (corrupted from the [F.] *Trois-quarts* or *Trocart,* 'three quarters,') so called from the triangular shape of the point — *Triq'uetrum.* An instrument used for evacuating fluids from cavities, particularly in ascites, hydrocele, &c. A trocar consists of a perforator or stylet and a canula, which is so adapted to the perforator, that when the puncture is made, both enter the wound with facility; after which, the stylet being withdrawn, the canula remains in the wound, and affords the fluid a ready passage outwards.

Trocart, Trocar.

Troch, (from *τροχος,* 'a wheel,') Trochiscus.

Trochan'ter, gen. *Trochante'ris, Trokan'ter, Rota'tor,* (from *τροχαω,* 'I run or roll.') Anatomists have given the names *great* and *little trochanter* to two processes at the upper extremity of the femur. The great *trochan'ter, glu'tus,* is the one on the outside; the *less* is lower down and more internal. Both afford attachment to rotator muscles of the thigh, and hence their name. Chaussier, by the word *trochanter,* means the larger process; the smaller he calls *trochantin.*

Trochanter'ian, *Trochanteria'nus, Trokanter'ian.* That which belongs or relates to the great trochanter.

Trochantin'ian, *Trokantin'ian, Trochantinia'nus.* That which belongs or relates to the trochantin or less trochanter.

Tro'char, Trocar.

Troches (pl. of *troch*) **of Bicar'bonate of So'da,** Trochisci sodæ bicarbonatis — t. of Bismuth, Trochisci bismuthi—t. of Carbonate of lime, Trochisci carbonatis calcis — t. of Catechu, Trochisci catechu — t. of Chalk, Trochisci carbonatis calcis—t. of Chlorate of potash, Trochisci potassæ chloratis—t. of Cubebs, Trochisci cubebæ—t. Escharotic, Trochisci escharotici—t. of Ginger, Trochisci zingiberis — t. Gum, Trochisci gummosi — t. of Gum Arabic, Trochisci acaciæ—t. of Ipecacuanha, Trochisci ipecacuanhæ — t. of Iron, subcarbonate of, Trochisci ferri subcarbonatis — t. of Lactucarium, Trochisci lactucarii — t. Liquoriec, Trochisci glycyrrhizæ — t. Liquorice with opium, Trochisci glycyrrhizæ cum opio — t. of Magnesia, Trochisci magnesiæ — t. of Morphia, Trochisci morphiæ — t. of Morphia and Ipecacuanha, Trochisci morphiæ et ipecacuanha — t. Nitre, Trochisci nitratis potassæ — t. of Peppermint, Trochisci menthæ piperitæ — t. of Santonin, Trochisci santonini—t. of Tannic acid, Trochisci acidi tannici—t. of Tartaric acid, Trochisci acidi tartarici.

Troch'ia, (τροχια, 'the rut of a wheel,') Orbit.

Trochil'ia, (τροχιλια,) Trochlea.

Trochin, (from τροχαειν, 'to turn.') Chaussier has given this name to the smaller of the tuberosities at the upper extremity of the os humeri; because it gives attachment to one of the rotator muscles of the arm — the subscapularis.

Trochin'ian, *Trochinia'nus.* That which belongs or relates to the trochin.

Trochis'ci, (pl. of *trochiscus,*) see Trochiscus.

Trochis'ci Aca'ciæ, *Troches of Gum Ar'abic,* (F.) *Tablettes de Gomme Arabique.* (*Acac.,* ℥iv., *Amyli,* ℥j., *Sacchar.,* ℔j. Make into a mass with *rose water,* and form lozenges. Ph. E.) To allay cough.

Trochis'ci Ac''idi Tan'nici, *Tan'nic Acid* or *Tan'nin Loz'enges.* (*Acid. tannic.,* gr. ccclx., *Tinct. tolut.,* f℥ss., *Sacchar. purif.,* ℥xxv., *Acaciæ* pulv., ℥j., *Mucilag. acaciæ,* f℥ij., *Aq. destillat.,* f℥j. To be divided into 720 lozenges. Mix. Ph. B., 1867.) Each lozenge contains half a grain of tannic acid. The last edition of the U. S. Pharmacopœia (1873) directs them to be made as follows: *Acid. tannic,* ℥j., *Sacchar.* pulv., ℥x., *Tragacanth.* pulv., gr. cxx., *Aquæ aurant. flor.,* q. s. To be divided into 480 lozenges.

Trochis'ci Ac''idi Tartar'ici, *Troches of Tartar'ic Ac''id.* (*Acid. tartar.,* ℥ij., *Sacchar.,* ℥viij., *Ol. limon.,* ♏x. Form into troches with mucilage. Ph. E.) Refrigerant and demulcent.

Trochis'ci Ammo'niæ, see T. pectorales — t. Bechici nigri, T. glycyrrhizæ glabræ.

Trochis'ci Bismu'thi, *Bis'muth Loz'enges.* (*Bismuth. alb.,* gr. 1440, *Magnes. carb.,* ℥iv., *Calcis carb. præcip.,* ℥vj., *Sacchar. purif.,* ℥xxix., *Acaciæ* pulv., ℥j., *Mucilag. acaciæ,* f℥ij., *Aquæ rosæ,* q. s. To be divided into 720 lozenges. Ph. B., 1867.)

Trochis'ci Carbona'tis Cal'cis, *T. e Cre'tâ, T. Cre'tæ,* (Ph. U. S.,) *Troches of Car'bonate of lime* or *chalk, Loz'enges for the heart'burn, Tabel'læ ad ardo'rem ventric'uli* seu *cardial'giæ* seu *ad so'dam.* (*Cret. præp.,* ℥iv., *Acaciæ* pulv., ℥j., *Myrist.* pulv., ℥j , *Sacch.* pulv., ℥vj. M. Form into troches with *water.* Ph. U. S., 1873.) Antacid and absorbent.

Trochis'ci Cat'echu, *Cat'echu Loz'enges,* (F.) *Tablettes de Cachou.* (*Catechu* pulv., gr. dcexx., *Sacchar. purif.,* ℥xxv., *Acaciæ* pulv., ℥j., *Mucilag. acaciæ,* f℥ij., *Aq. destillat.,* q. s. Mix, and divide into 720 lozenges. Ph. B., 1867.)

Trochis'ci e Cre'tâ, T. carbonatis calcis — t. Cretæ, T. carbonatis calcis.

Trochis'ci Cubeb'æ, *Troches of Cu'beb.* (*Oleoresin. cubeb.,* f℥ss., *Ol. sassaf.,* f℥j., *Glycyrrhiz.* pulv., ℥iv., *Acaciæ* pulv., ℥ij., *Sacchar.* pulv., ℥iij., *Syrup. tolutan.,* q. s. To be divided into 480 troches. Ph. U. S., 1873.) Excitant; in relaxed sorethroat, &c.

Trochis'ci seu Pastil'li Emeti'næ Pectora'les, *Pec'toral Loz'enges of Em'etine.* (*Sugar,* ℥iv., *Emetine,* gr. xxxii. Form into lozenges of nine grains each.) One is a dose.

Trochis'ci Escharot'ici, *Escharot'ic Troches.* (*Hydrarg. oxymur.,* p. 8, *Amyli,* p. 16, *Mucilag. g. tragac.,* q. s. Make into troches, to which a few drops of laudanum may be added. Ph. P.) Used in foul ulcers, to remove excrescences, &c.

Trochis'ci Escharot'ici de Min'io. (*Plumbi. oxid. rubr.,* p. 16, *Hydrarg. oxymur.,* p. 32, *Mic. panis,* p. 128, *Aq. rosæ,* q. s. Ph. P.) Used like the last.

Trochis'ci Fer'ri Redac'ti, *Reduced I'ron Loz'enges.* (*Ferri redact.,* gr. dcexx., *Sacchar. purificat.* pulv., ℥xxv., *Acaciæ* pulv., ℥j., *Mucilag. acaciæ,* f℥ij., *Aquæ destillat.,* f℥j. *vel.* q. s. M. Ph. B., 1867.)

Trochis'ci Fer'ri Subcarbona'tis, *Troches of Subcar'bonate of I'ron.* (*Ferri subcarb.,* ℥v., *Vanill.,* gr. xxx., *Sacchar.* in pulv., ℥xv., *Mucilag. tragac.,* q. s. To be divided into 480 troches. Ph. U. S., 1873.) Tonic.

Trochis'ci Glycyrrhi'zæ, *T. G. Gla'bræ* seu *Be'chici ni'gri, Liq'uorice troches, Black pec'toral loz'enges.* (*Ext. glyc. glabr., Gum. acac.,* āā p. j., *Sacch. purif.,* p. ij. Dissolve in warm water; strain; evaporate, and form into troches. Ph. E.) Demulcent. To allay cough.

Trochis'ci Glycyrrhi'zæ cum O'pio, *T. Glycyrrhizæ et O'pii* (Ph. U. S.) seu *Theba'ici* seu *sedati'vo-balsam'ici* seu *pectora'les ve'gis Dano'rum, Liq'uorice Troches with O'pium, Wis'tar's Loz'enges.* (*Extract. opii* in pulv., gr. xxiv., *Glycyrrhiz.* in pulv., ℥ij., *Sacchar.* in pulv., ℥iij., *Acaciæ* in pulv., ℥j., *Ol. anisi,* ♏xv. Make into 480 troches. Ph. U. S., 1873.) Demulcent and anodyne. An analogous formula is given in the British Pharmacopœia (1867), under the name *Trochisci O'pii, Opium lozenges.*

Spit'ta's Loz'enges for coryza, hoarseness, and sorethroat, are composed as follows: *Cubeb. recent.* in pulv., ℥ij., *Extract. glycyrrhiz.,* ℥j., *Myroxyl.,* ℥j., *Acaciæ,* ℥iv., *Syrup.,* q. s. Make into troches of ten grains each.

Trochis'ci Gummo'si, *Gum Troches.* (*G. acac.,* p. v., *Amyli,* p. j., *Sacch. pur.,* p. xij. Make up the troches with rose-water. Ph. E.) Demulcent.

Trochis'ci Ipecacuan'hæ, *Ipecacuan'ha Loz'enges, Troches of Ipecacuan'ha,* (F.) *Tablettes d'Ipécacuanha.* (*Ipecacuanh.* in pulv., gr. cxx., *Sacchar.* in pulv., ℥viij., *Marantæ* in pulv., ℥ij., *Tragacanth.* in pulv., gr. cxx., *Syrup. aurant. cort.,* q. s. Make into 480 troches. Ph. U. S., 1873.)

Trochis'ci Lactuca'rii, *Troches of Lactuca'rium.* (Prepared with *Lactucarium* in the same proportion and manner as the opium lozenges. Ph. E.) Each lozenge contains between the fifth and sixth of a grain of lactucarium.

Trochis'ci Magne'siæ, *Troches of Magne'sia.* (*Magnes.,* ℥iij., *Sacchar.* pulv., ℥ix., *Myrist.* pulv., ℥j., *Mucilag. tragacanth.,* q. s. Make into 480 troches. Ph. U. S., 1873.) Useful in acidity of the stomach, with constipation.

Trochis'ci Men'thæ Piperi'tæ, *Troches of Peppermint.* (*Ol. menth. piperit.,* f℥j., *Sacchar.* in pulv., ℔j., *Mucilag. tragacanthæ,* q. s. Make into 480 troches. Ph. U. S., 1873.) Used as a carminative.

Trochis'ci Mor'phiæ, *Troches of Mor'phia, Morphia Loz'enges.* (*Morphiæ hydrochlor.,* gr.

xx., *Tinct. tolu.*, f℥ss.. *Sacchar. purificat.* pulv., ℥xxiv., *Acaciæ* pulv., ℥j., *Mucilag. Acaciæ*, q. s., *Aquæ destill.*, f℥ss. M. Divide into 720 lozenges, each of which contains $\frac{1}{36}$ of a grain of the hydrochlorate. Ph. B., 1867.) Used to allay cough.

Trochis'ci Mor'phiæ et Ipecacuan'hæ, *Troches of Morphia and Ipecacuan'ha, Morphia and Ipecacuan'ha Loz'enges.* (*Morph. sulph.*, gr. xij., *Ipecac.* pulv., gr. xl., *Sacchar.* pulv., ℥x., *Ol. Gaulther.*, ♏v.. *Mucilag. tragacanth.*, q. s. Make into 480 troches. Each lozenge contains about $\frac{1}{40}$ of a grain of the sulphate. Ph. U. S., 1873.) Used to allay cough.

Trochis'ci Nitra'tis Potas'sæ, *Ni'tre Troches.* (*Potassæ nitrat.*, p. j., *Sacch. pur.*, p. iij. Make into troches with mucilage of tragacanth. Ph. E.) In slight inflammatory sorethroat and fever.

Trochis'ci O'pii, see T. glycyrrhizæ cum opio.

Trochis'ci Pectora'les, *Jack'son's Pec'toral Loz'enges.* The following formulæ, proposed by the late Professor Jackson, of the University of Pennsylvania, have been much used in Philadelphia and elsewhere: *Ipecac.* pulv., gr. x., *Antim. sulphur. præcip.*, gr. v., *Morphiæ muriat.*, gr. vj., *Acaciæ* pulv., *Sacchar.* pulv., *Ext. glycyrrhiz.*, āā ℥xj., *Tinct. tolut.*, ℥iv., *Ol. sassaf.*, gtt. iv. To be made with syrup into 200 lozenges, or into lozenges of ten grains each.

Trochis'ci Ammo'niæ, Ammo'nia Loz'enges. (*Ammon. muriat.*, ℥jss., *Morphiæ muriat.*, gr. iij., *Ulmi* pulv., *Acaciæ* pulv., *Sacchar.* pulv., *Extract. glycyrrhiz.*, āā ℥vij., *Tinct. tolut.*, ℥iij., *Ol. gaultheriæ*, gtt. iv. To be made into lozenges with syrup, and divided like the above.)

Trochis'ci Pectora'les Re'gis Dano'rum, T. glycyrrhizæ cum opio.

Trochis'ci Potas'sii Chlora'tis, *Troches of Chlo'rate of Potas'sium* or *Potas'sa, Chlorate of Potash Lozenges*, (F.) *Tablettes de Chlorate de Potasse.* (*Potass. chlor.* pulv., ℥v., *Sacchar.* pulv., ℥xviij., *Tragacanth.* pulv., ℥ij., *Vanillæ*, gr. xxx. Make into 480 troches. Ph. U. S., 1873.) Used in affections of the throat and fauces.

Trochis'ci Santoni'ni, *Troches of Santonin.* (*Santonin.* pulv., ℥ss., *Sacchar.* pulv., ℥xviij., *Tragacanth.* pulv., ℥ss., *Aquæ aurant. flor.*, q. s. Make into 480 troches. Ph. U. S., 1873.)

Trochis'ci Sedati'vo-balsam'ica, T. glycyrrhizæ cum opio.

Trochis'ci So'dæ Bicarbona'tis, *T. So'dii Bicarbonatis*, (Ph. U. S., 1873,) *Bicarbonate of Soda Lozenges, Troches of Bicar'bonate of So'da* or *Sodium.* (*Sodii bicarb.*, ℥iij., *Myrist.* pulv., gr. lx., *Sacchar.* in pulv., ℥ix., *Mucilag. tragacanth.*, q. s. To be divided into 480 troches. Ph. U. S., 1873.) Antacid.

The *Pastilles de Vichy, Tablettes de Bicarbonate de Soude, Pastilles digestives d'Hauterive - Vichy* ou *de D'Arcet, Pastil'li digesti'vi Darcet'ii*, composed of *Bicarbonate of Soda, Oil of peppermint*, and *Sugar*, are much used in France, like the Vichy waters, in cardialgia, gout, and lithiasis.

Trochis'ci Stibia'ti, Tabellæ antimoniales Kunckelii—t. Thebaici, T. glycyrrhizæ cum opio.

Trochis'ci Zingib'eris, *Troches of Gin'ger.* (*Tinct. Zingib.*, f℥ij., *Tragac.* pulv., ℥ss., *Sacchar.* pulv., ℥xx., *Syrup. zingib.*, q. s. Make into 480 troches. Ph. U. S., 1873.)

Trochis'cus, (τροχισκος,) *Phtho'is, Artis'cus, Col'lix, Co'lix, Phthois'cus, Rot'ula, Cyclis'mus*, (dim. of τροχος, 'a wheel,' 'anything circular.') A *troch* or *round* table, (F.) *Trochisque.* See Pastil and Tabella. A solid medicine, prepared of powders, incorporated by means of mucilage, crumb of bread, juices of plants, &c. In French nomenclature, the *trochisque* differs from the *tablette*, — the former containing no sugar. This form of preparation is adapted for the purpose of allowing the medicines of which the troch is composed to dissolve slowly in the mouth, and to pass gradually into the stomach. See Trochisci.

The Parisian Codex has two formulæ for troches for external use.

Trochisque, Trochiscus.

Troch'iter, gen. *Trochite'ris*, (from τροχαειν, 'to turn.') The larger of the two tuberosities at the upper extremity of the os humeri; so called because it affords insertion to rotator muscles.

Trochite'rian, *Trochitérien* (Chaussier). Anything belonging or relating to the trochiter.

Troch'lea, (τροχιλια,) *Trochil'ia*, (F.) *Trochlée* ou *Troklée.* A *pulley*; (from τροχαειν, 'to turn,') — for example, the articular surface at the lower extremity of the os humeri; so called from its forming a kind of pulley on which the ulna moves, in flexion and extension of the forearm. Also, the cartilaginous pulley over which the tendon of the trochlearis muscle passes, at the upper and inner part of the orbit. Pulleys are needed as mechanical powers in the reduction of dislocations where much force is required.

Troch'lea Labyrin'thi, Cochlea.

Trochlea'ris, Obliquus superior oculi.

Trochléateur, Grand, Obliquus superior oculi — *t. Petit*, Obliquus superior oculi.

Trochlée, Trochlea.

Tro'choid, (τροχοειδης, from τροχος, 'a wheel,' and ειδος, 'resemblance,') *Trochoï'des, Ax'ea commissu'ra.* An articulation in which one bone turns upon another, like a wheel upon its axle; as the *Atloïdoäxoid articulation.* See Axea commissura.

Trochne, Ligustrum vulgare.

Troisquarts, (*trois*, 'three,' and *quarts*, pl. of *quart*, 'a fourth,') Trocar.

Trokan'ter, gen. *Trokante'ris*, Trochanter.

Trokante'rian, Trochanterian.

Trokantin'ian, Trochantinian.

Troklée, Trochlea.

Troll'ius Lax'us, *T. America'nus. Globeflower; Order*, Ranunculaceæ; indigenous; has the same medical properties as the Ranunculus.

Troltsch, Cor'puscles of, (after their discoverer.) Corpuscles imbedded between the fibres of the two layers making up the middle fibrous layer of the membrana tympani, analogous to the corpuscles of the cornea.

Trom'mer's Test. A test for the presence of grape-sugar. The fluid being boiled, after the addition of a slightly alkaline solution of tartrate of copper, a yellowish-red precipitate of oxide of copper indicates the presence of grape-sugar.

Tromoma'nia, (*tromus*, and *mania*,) Delirium tremens.

Tromoparanœ'a, (*tromus*, and *paranœa*,) Delirium tremens.

Tro'mos, (τρομος,) Paralysis agitans, Tremor.

Tromospas'mus, (*tromus*, and *spasmus*,) Tremor.

Trompe, 'a trump,' Tuba — *t. d'Eustache*, Eustachian tube — *t. de Fallope*, Tuba Fallopiana — *t. Utérine*, Tuba Fallopiana.

Tro'mus, (τρομος,) Paralysis agitans, Tremor.

Tromyle, (τρομος, 'trembling,' and ὑλη, 'matter,') see Cilia.

Tronc, Trunk — *t. Basilaire*, Basilary artery — *t. Brachial*, Brachial artery.

Tronchin, see Humerus.

Tropæ'olum Ma'jus, (from τροπαιον, 'a trophy,' the leaves resembling a buckler,) *Nastur'tium Ind'icum* seu *Peruvia'num, Acrivi'ola, Flos sanguin'eus monar'di, Cardami'num minus, Ind'ian Cress. Ord.* Geraniaceæ. *Sex. Syst.* Octandria Monogynia. (F.) *Cresson des Indes, Cresson du Mexique, Capucine.* An antiscorbutic.

Tropæ'olum Tubero'sum, *Ulluco.* A tuberous plant, cultivated in the Sierra, Peru. It is smaller than the potato.

Troph'alis, gen. *Trophal'idis*, (from τροφη, 'nourishment,') Colostrum.

Tro'phē, (τροφη,) Aliment, Cibatio, Pabulum.

Troph'esy. A name proposed by Prof. Laycock for the results of disorder of the nerve-force of a motor order regulating nutrition.

Tro'phi, (from τροφη, 'nourishment.') In insects, the parts of the mouth that are employed in receiving and preparing the food.

Troph'ic, Trophical.

Troph'ical, *Troph'ic, Troph'icus,* (from *trophe,*) (F.) *Trophique.* Relating to nourishment or nutrition.

Troph'ical or Troph'ic Nerves, *Mo'tor Spi'nal Nerves.* The organic nerve or nerves of the sympathetic system have been so termed, from the belief that they are concerned in nutrition.

Troph'imus, (τροφιμος,) Nutritous.

Tropho'des, (τροφωδης, from τροφη, 'nourishment,' and *odes,*) Nutritious.

Trophoneuro'ses, (τροφη, 'nourishment,' and *neurosis.*) Morbid conditions of the process of nutrition, owing to modified nervous influence.

Trophon'osi, *Trophonu'si,* (τροφη, 'nourishment,' and νοσος, 'a disease.') Diseases of nutrition.

Troph'y, *Troph'ia,* (τροφη, a suffix denoting 'nourishment or nutrition,') as in hyper*trophy,* 'excess of nourishment or nutrition.'

Troponu'si, *Morbi trop'ici,* (τροπη, 'the solstitial or tropical point where the sun turns or alters its course,' and νουσος, 'a disease.') Diseases that prevail in the tropics.

Tros'ter, ([G.] 'a comforter,') see Spirit.

Trou, Foramen — *t. Anonyme,* Foramen stylomastoideum — *t. Aveugle* ou *Borgne,* Cæcum foramen — *t. Borgne* of the Medulla oblongata, Foramen cæcum of the medulla oblongata — *t. de Botal,* Botal foramen, Ovale foramen — *t. Déchiré antérieur,* Lacerum anterius foramen — *t. Déchiré postérieur,* Lacerum posterius foramen — *t. Epineux,* Spinale foramen — *t. de Galien,* Botal foramen—*t. Mentonnier,* Mental foramen—*t. Optique,* Foramen opticum—*t. Orbitaire supérieur,* Orbitar foramen superior — *t. Orale,* Ovale foramen — *t. Rond, petit,* Spinale foramen — *t. Sous-orbitaire,* see Suborbitar canal — *t. Sous-pubien,* Obturatorium foramen — *t. Sphéno-épineux,* Spinale foramen—*t. Sus-orbitaire,* Foramen supraörbitarium.

Trous (pl. of *trou*) ***Carotidiens,*** Carotica foramina — *t. Condyloïdiens,* Condyloidea foramina — *t. de Conjugaison,* Conjugationis foramina, see Vertebræ — *t. Olfactifs,* Olfactory foramina — *t. Rachidiens,* Spinal foramina.

Trousse, Case (pocket).

Trousse-galant, (*trousser,* 'to dispatch,' and *galant,* 'a gallant,') Cholera morbus.

Trousseau, 'a bundle,' Fasciculus.

Trousseaux Arrière-mésentériques (F.). A name given by Winslow to the nervous plexus situate between the two mesenteric plexuses of which it is a dependence, and which descends into the pelvis to concur in the formation of the hypogastric plexus.

Trouts (Ir.), (perhaps from the speckled appearance of the skin,) see Melasma.

Trubs, Lycoperdon tuber.

Truck, see Medicament.

Truculen'tus, (from *trux,* gen. *trucis,* 'ferocious,') Homicidal.

Trudge'backed, see Hump.

True'love, Paris, Trillium latifolium.

Truffe, Lycoperdon tuber.

Truf'fle, (pron. *Troofle,*) Lycoperdon tuber—t. Hart's, Elaphomyces granulatus.

Trum'pet Creep'er, Tecoma radicans — t. Flower, Tecoma radicans — t. Weed, Eupatorium purpureum.

Trun'cus, Trunk.

Trunk, *Trun'cus,* (F.) *Tronc.* The principal part of the body, to which the limbs are articulated. The trunk has been divided into three parts: — a *superior,* the *head;* a *middle,* the *thorax,* and an *inferior,* the *pelvis.* These three regions contain the great splanchnic cavities. They are united by a common *stalk* — the vertebral column. To the *middle* are articulated the superior extremities; and, to the *inferior,* the lower extremities.

The *trunk* of an artery, vein, nerve, or lymphatic, is its largest part, which has not yet given off branches. It is, also, applied to the parent vessel, after branches have been sent off.

Truss, ([F.] *tronsser,* 'to tie up,') *Brache'rium, Brachie'rium, Brachi'lē, Brachi'rolum, Bracheri'olum, Am'ma, Hom'ma, Subligac'ulum, Subligatu'ra,* (F.) *Brayer.* A hernial bandage for keeping hernia reduced. The ancient trusses were inelastic. They consisted simply of a pad and strap. At the present day, elastic bandages are alone employed. They possess the advantage of making an equable and continuous pressure on the aperture of the sac, and of yielding to the changes of form in the abdominal parietes. The most important part of these bandages is a piece of narrow steel, flat, and adapted to the shape of the body. This is the *spring,* (F.) *Ressort.* It embraces the body on the side affected; extends from beyond the spine, and terminates, opposite the ruptured part, by an iron plate, to which it is riveted. The posterior surface of this plate is furnished with a convex *pad,* (F.) *Pelote,* adapted in shape and size to the aperture which it has to close. The spring is covered with leather, and its inner surface is padded; a strap extends from its posterior extremity; passes round the sound side, and is attached to the plate of the pad. This strap is pierced with numerous holes, which allow the patient to tighten or slacken it at pleasure. Trusses have been variously constructed; and different patents obtained for the modifications. They all act upon the above principle. Sometimes they have a double pad.

Trygo'des, (τρυγωδης, from τρυξ, gen. τρυγος, 'lees,' and *odes,*) Feculent.

Tryp'anon, (τρυπανον,) Trepan.

Trype'sis, (τρυπησις, from τρυπαω, 'I bore,') Trepanning.

Tryp'sis, (τρυω, 'I rub,') Friction.

Tsaraäth. True leprosy is so called by the Jews.

Tsa-Tsin, Rhynchosia excavata.

Tscherbet', Sherbet.

Tsetse, Glossina morsitans.

Tshettik, Upas tieuté.

Tsia'na, Costus.

Tsit'la. A South African root of the Araceæ family, which contains a very large quantity of sweet tasted starch. According to Dr. Livingstone, when dried, pounded into meal, and allowed to ferment, it is not an unpleasant article for food.

Tsjampaca, Michelia champaca.

Tu'ba, 'a trumpet,' Tube — t. Acustica, Eustachian tube — t. Aristotelica, Eustachian tube — t. Cæca, Tuba Fallopiana—t. Eustachii, Eustachian tube — t. Uterina, Tuba Fallopiana — t. Vocalis, Tube, vocal.

Tu'bage, see Catheterismus.

Tubaire, Tubal.

Tu'bal, *Tuba'ris,* (F.) *Tubaire,* (from *tuba,* and *tubus.*) Relating to a tube or tubes, and especially to the Fallopian.

Tu'bal Nephri'tis, Kidney, Bright's disease of the — t. Pregnancy, see Pregnancy, tubal — t. Respiration, see Murmur, respiratory.

Tub'boe. A form of frambœsia or yaws attacking the feet.

Tube. A name given to some parts which are hollow, and which have, at times, the shape of a trumpet, *Tu'ba, Tu'bus, Sal'pinx,* (F.) *Trompe, Tube.*

Tube, Alimen'tary, Canal, alimentary—t. Auditory, see Auditory canal, external.

Tube Casts. A term applied to the casts or moulds of the uriniferous tubes of the kidney, observed in the urine by the microscope in diseases of those organs. The casts are fatty, desquamative, hyaline, granular, &c., and are observed especially in Bright's disease.

Tube of the Coch'lea, see Scalæ of the cochlea — t. Eustachian, Eustachian tube.

Tube, Fallo'pian, *Tu'ba Fallopia'na* seu *Fallo'pii* seu *Fallo'piæ* seu *uteri'na* seu *cæ'ca*, *Me'trosal'pinx*, *Hys'terosal'pinx*, *Oviduc'tus muli'ebris*, *Vas def'erens muli'eris*, *Duc'tus varico'sus uteri*, *Proces'sus latera'lis uteri*, *Mea'tus semina'lis uteri*, *Me'atus semina'rius u'teri*, *Cor'nu u'teri*, *O'viduct*, *U'terine tubes*, *Vec'tor canal'*, (F.) *Trompe de Fallope* ou *utérine*, is a canal floating in the abdomen, and extending on each side from the superior angle of the uterus as far as the sides of the brim of the pelvis. They are 4 or 5 inches long. Near the uterus, they are straight and very narrow; but, in their course, they widen, become tortuous, and terminate by a free, expanded, and *Fim'briated extrem'ity*; called, also, *Foliu'ceum ornamen'tum*, *Mor'sus diab'oli*, *Infundib'ulum* seu *Digitatio'nes* seu *Fim'briæ* seu *Vexil'læ* seu *Lacin'iæ tuba'rum Fallo'pii*, (F.) *Morceau frangé*, *Pavillon de la trompe*, *Morceau* ou *Morsure du diable*. Within, the tubes are hollow and lined by a mucous membrane: the tissue exterior to which is spongy and erectile. The use of the Fallopian tubes is to conduct the sperm to the ovarium, and the fecundated ovum back to the uterus. They establish a communication between the cavity of the peritoneum and that of the uterus, the abdominal termination being termed *Os'tium abdomina'lē* seu *oär'icum*; the uterine, *Os'tium uteri'num*, *Apertu'ra uteri'na*. When the tube embraces the ovary, a funnelshaped cavity — *Coroll'a infundibulifor'mis* — is formed at its extremity, into which the ovule passes.

Tube, Intes'tinal, Canal, alimentary.

Tube, Œsophage'al, *Stomach Tube*. A long elastic gum tube, capable of being passed into the œsophagus or stomach.

Tube, Pol'len, see Pollen.

Tube, Rec'tal, *Defeca'tion tube*. An elastic gum tube, similar to the stomach tube, which is sometimes passed into the colon, to remove air from that intestine, or to enable enemata to be thrown up into it.

Tube, Stom'ach, see Tube, œsophageal.

Tube, Vo'cal, *Tu'ba vocu'lis*. The part of the air passages above the inferior ligaments of the larynx, including the passages through the nose and mouth.

Tu'ber, gen. *Tu'beris*, ([L.] 'a bump, a protuberance,') Hump, Lycoperdon tuber, Tubercle — t. Annulare, Pons Varolii — *t. Atloïdo-occipital*, Rectus capitis posticus minor.

Tu'ber Cal'cis. The posterior extremity of the os calcis.

Tu'ber Cervi'num, Elaphomyces granulatus — t. Cibarium, Lycoperdon tuber.

Tu'ber Cine'reum, *T. C. cum Infundib'ulo*. A grayish tubercle, seen at the base of the brain behind the commissure of the optic nerves, which is continuous with the infundibulum.

Tu'ber Cor'poris Callo'si, see Corpus callosum.

Tu'ber Fronta'lē, Frontal protuberance — t. Gulosorum, Lycoperdon tuber — t. Gutturosum, Bronchocele — t. Ischii, see Ischiatic — *t. Ischiotrochantérien*, Quadratus femoris — t. Nigrum, Lycoperdon tuber — t. Parietale, see Parietal bones — t. Pellagra, Pellagra — t. Tympani, Promontory of the tympanum.

Tu'bera Ter'ræ, Lycoperdon tuber.

Tu'bercle, *Tuber'culum*, (dim. of *tuber*,) *Tu'ber*, *Strangal'ion*, *Stran'galis*, *Tuber'culous Depos'it*, (vulg.) a *Ker'nel*, *a Knot*, (F.) *Tubercule*. A tumor in the substance of organs, from the production of new matter; — sensation null; growth sluggish. In Pathological Anatomy, the term is generally given to a species of degeneration which consists of an opaque matter, of a pale yellow color; having, in its crude condition, a consistence analogous to that of concrete albumen. It subsequently becomes soft and friable, and gradually acquires a consistence and appearance analogous to those of pus. Tubercles may be developed in different parts of the body, as in the tissue of the alimentary canal; in serous structures, as the pleura, peritoneum, and arachnoid; in the liver, kidney, spleen, and lungs; in the lymphatic glands, &c., but they are most frequently observed in the lungs and mesentery. Pulmonary tubercles, *Pneumophy'mata*, *Tuber'cula Pulmo'num*, (F.) *Tubercules pulmonaires*, characterize *Tuber'cular Phthi'sis*. See Phthisis pulmonalis. *Mesenter'ic tu'bercles* are often met with in the same affection, but particularly in *Tabes Mesenterica*.

Laënnec classed tubercles among the accidental tissues, which have no resemblance to the natural tissues, and which never exist except in consequence of morbid action. The prevalent doctrine at the present day is that they are the products of a scrofulous degeneration. Tubercle is, in other words, merely a local expression of a constitutional scrofulous affection. The view has been held by some writers that tubercle is a degeneration of previously existing structures — whether physiological or pathological; by others that it is a morbid exudation, a new formation. According to Virchow, although tubercle is a result of the death of healthy or diseased tissues, the local process — *tuberculosis* — also results in the exudation of a material during a *tuberculous inflammation*; such material undergoing a kind of organization, succeeded by its death, and by its breaking and shrivelling up into a *tubercle*. This gradual change is termed *tuberculization*. Broussais conceived that tubercles were formed exclusively by inflammation of the white vessels, but no such vessels are now described. Tubercle is produced independent of inflammation, but the latter may be excited around a tubercle or a mass of tubercles, and promote their further development or their progress towards softening and destruction of structure. When tubercles in any organ are few in number, they may pass to the state of permanent induration without danger to the patient; but when they are very numerous, they usually cause serious mischief. Dr. Baron considered that they were produced by hydatids.

The morbid condition which gives rise to the development of tubercles, *Tuberculiza'tion*, is termed *Tuber'culous disease*, *Tuberculo'sis*, *Mor'bus tuberculo'sus*, *Strumo'sis* seu *Phymato'sis pulmo'num*, and *Dyscra'sia Tuberculo'sa*. Tubercles are seen of various forms, — to wit, in fine points, (F.) *Poussière tuberculeuse*, gray and yellow granulations, the former being miliary tubercles; and gray and yellow tubercular masses, softened, and cretaceous. The tubercular mass may undergo a *cheesy degeneration*, a yellow spot being visible at first and afterwards involving the whole structure. When tubercular matter is examined under the microscope, small, irregular-shaped bodies — *Tu'bercle cor'puscles*, (F.) *Corpuscles tuberculeux*, associated with molecules and granules — are visible, their longest diameter being $\frac{1}{2000}$ to the $\frac{1}{1200}$ of an inch. They contain several granules, and of course vary in appearance with the progress of the disease, approximating, perhaps, pus cells in their general character. See Phthisis pulmonalis.

Tu'bercle. Anatomically, a tubercle is a small prominence or projection, usually on the surface of a bone.

Tu'bercle, Black, Melanosis — t. Anatomical, Verruca necrogenica — t. Cancerous of the face,

Lupus — t. Corpuscles, see Tubercle — t. Genital, see Genital — t. of Lower, Lower, tubercle of — t. Mammillary, see Mammillary eminence — t. Mucous, see Condyloma—t. Optic, Quadrigemina tubercula — t. Painful subcutaneous, see Neuroma.

Tu'bercle of Rolan'do, *Tuberculo cinereo.* A tubercle formed by the blending of the lateral crescentic portions of the gray matter of the medulla oblongata with the fibres of the corpora restiformia.

Tu'bercles of the Are'ola, see Mamma—t. Cretaceous, see Cretaceous—t. Miliary, see Granulation and Tubercle.

Tu'bercles, Pearl'y, *Seba'ceous mil'iary tubercles, Follic'ular eleva'tions.* Small collections of sebaceous matter in the sebaceous glands or ducts, often seen in the thin skin of the lower eyelids, where they sometimes attain an inconvenient size.

Tu'bercles, Seba'ceous Mil'iary, T. pearly.

Tuber'cula (pl. of *tuberculum*) **Aran'tii,** *Corpora* seu *Corpus'cula Aran'tii, Tu'bercles of Aran'tius* or *Aran'zi.* Small eminences at the middle part of the convex edge of the semilunar valves of the pulmonary artery and aorta.

Tuber'cula Areo'læ, see Mamma—t. Arthritica, Calculi, arthritic—t. Cerebri, Encephalophymata—t. Dolorosa, see Neuroma—t. Gonorrhoïca, Gonorrhœa impura—t. Gummata, see Gumma — t. Hepatis, Hépatostrumosie — t. Intestinorum, Enterophymata—t. Mammillaria, see Mammillary eminence — t. Nervorum nodosa, Ganglions, nervous—t. Parva durœ matris, Glandulæ Pacchioni —t. Peritonæi, Cœliophymata—t. Pulmonum, see Phthisis pulmonalis — t. Quadrigemina, Quadrigemina tubercula.

Tuber'cular, *Tuber'culous, Tuberculo'sus, Tuber'culate, Tuber'culated,* (F.) *Tuberculeux, Tuberculé.* That which relates to tubercles, or which is formed by tubercles.

Tuber'cular or Tuber'culous Constitu'tion or Diath'esis, *Phthisio'sis,* is the habit of body which predisposes to tubercular phthisis; as *Tuberculous Cachex'ia, Tuberculo'sis, Morbus tuberculo'sus, Dyscra'sia tuberculo'sa,* is the constitutional condition of one affected with tubercles.

Tuber'cular Matter. A morbid production, contained in cysts, or loose in the tissue of organs. It varies, in its consistence, at the different periods of the tubercular affection: being, at first, compact, and yellowish; at times, calcareous; afterwards pultaceous, semifluid, and curdy. See Tubercle.

Tuber'cular Phthi'sis is that produced by the development of tubercles, as in the lungs.

Tuber'cular Sorethroat, Pharyngitis, follicular.

Tuber'culate, Tubercular.

Tuber'culate Sarco'ma of Ab'ernethy, *Emphy'ma Sarco'ma tuberculo'sum, Tu'mor tuberculo'sus.* Tubercles, firm, round, and clustering; pea-sized or bean-sized; yellowish or brownish-red; when large, disposed to ulcerate, and produce a painful, malignant, and often fatal sore. Found chiefly in the lymphatic glands of the neck; often, simultaneously, in other glands and organs.

Tuber'culated, Tubercular—t. Liver, Cirrhosis.

Tubercule, Tubercle—*t. Cartilagineux,* see Nasal cartilage.

Tuberculé, Tubercular.

Tubercules Bijumeaux, Quadrigemina tubercula—*t. Crétacés,* see Cretaceous—*t. du Foie,* Hépatostrumosie — *t. des Ganglions Mésentériques,* Tabes mesenterica — *t. des Glandes lymphatiques,* Scrofula — t. of the Larynx and Fauces, Pharyngitis, follicular — t. Miliary, see Granulation — *t. Papillaires,* see Mamma—*t. Pisiformes,* Mammillary tubercles — *t. Pulmonaires,* see Tubercle — *t. Quadrijumeaux,* Quadrigemina corpora.

Tuberculeux, Tubercular.

Tuberculiser, Tubereulize.

Tuberculi'tis, gen. *Tuberculi'tidis,* (*tubercle,* and *itis.*) Inflammation of a tubercle or of tubercular masses.

Tuberculiza'tion, see Tuberele.

Tuber'culize, (F.) *Tuberculiser.* To become tubercular.

Tuberculo Cinereo, Tuberele of Rolando.

Tuberculo'sis, see Tubercle and Tubercular cachexia — t. Laryngis et Tracheæ, Phthisis laryngea — t. Pulmonum, Phthisis pulmonalis — t. Vertebrarum, Vertebral disease.

Tuberculo'sus, Tubercular.

Tuberculot'ic, Tubereular.

Tuber'culous, Tubercular—t. Deposit, Tuberele — t. Disease, see Tuberele — t. Disease of the lungs, Phthisis pulmonalis — t. Dust, Poussière tuberculeuse.

Tuber'culous Nod'ules of the Brain, *Phthisis tuberculo'sa of the brain.* A morbid process affecting the cerebral organs, analogous to the destruction of the kidneys by localized miliary tuberculosis.

Tuber'culum, (dim. of *tuber,*) Tubercle — t. Adenosum, Molluscum contagiosum.

Tuber'culum Cine'reum, *Fasci'ola cine'rea.* A mass of cineritious substance at the top of the calamus scriptorius, which is continuous below with the posterior horn of cineritious substance in the cord, and on the sides with the corpus restiforme.

Tuber'culum Lacryma'lē, see Lachrymal puncta — t. Loweri, Lower, tuberele of.

Tuberculum Pharynge'um. The tubercle from which springs the medial band which connects the pharynx with the occipital bone.

Tuberos'itas, Tuberosity — t. Tympani, Promontory of the tympanum.

Tubérosité Bicipitale, Bicipital tubercle — *t. Sciatique,* see Ischiatic.

Tuberos'ity, *Tuberos'itas,* (F.) *Tubérosité,* (from *tuber,* 'a bump or protuberance.') Anatomists have given this name to an eminence or process, the surface of which is unequal and rough, and which gives attachment to muscles or ligaments.

Tubes of Ferrein, see Uriniferous tubes — t. Uterine, Tube, Fallopian.

Tu'bi (pl. of *tubus,* 'a tube') **Membrana'cei,** see Villous membranes.

Tu'bing, see Drainage tubes.

Tu'bular, *Tubula'ris, Tubulo'sus,* (F.) *Tubuleux, Tubulaire,* (from *tubule.*) Relating to or having the form of a small tube. An epithet applied to glands — *Glan'dulæ tubulo'sæ* — which, like those of the stomach, have the shape of small tubes. It is also applied to the primary nervous and muscular tissues.

Tu'bular Blow'ing Sound, see Murmur, respiratory — t. Neurine, see Neurine — t. Substance of the Kidney, see Kidney.

Tu'bule, *Tu'bulus,* (dim. of *tubus,* 'a tube.') A small tube or tubelet.

Tubuleux, Tubular.

Tu'buli (pl. of *tubulus*) **Belli'ni,** Uriniferous tubes — t. Contorti, see Uriniferous tubes — t. Dental, Dental tubuli — t. Duræ matris, Sinuses of the dura mater — t. Ferreini, see Uriniferous tubes — t. Galaetophori, see Lactiferous vessels — t. Lactiferi, see Lactiferous vessels — t. Morgagnii, see Prostate — t. Nervei, Nerve fibres — t. Pelvis renum, see Calix — t. Recti, see Rete testis and Uriniferous tubes — t. Semicireulares membranacei, see Semicircular canals — t. Seminales, see Testicle — t. Seminiferi, see Testicle — t. Seminiferi recti, see Rete testis — t. Uriniferi Bellini, Uriniferous tubes.

Tubulo'sus, Tubular.

Tu'bulus, (dim. of *tubus,* 'a tube,') Canula, Tubule — t. Centralis modioli, see Tractus spiralis

foraminulentus — t. Spiralis modioli, see Tractus spiralis foraminulentus.

Tu'bus, Tube — t. Acusticus, Ear-trumpet — t. Alimentarius, Canal, alimentary — t. Intestinorum, Canal, alimentary — t. Nervorum, Neurilemma — t. Pollinicus, see Pollen — t. Vermicularis cæci, Appendix vermiformis cæci.

Tuckaho, Lycoperdon tuber.

Tucupi, (a Brazilian word,) see Jatropha manihot.

Tue-chien, 'kill dog,' Colchicum autumnale, Veratrum album — *t. Loup,* 'kill wolf,' Aconitum napellus.

Tulbag'hia Allia'cea, (after Tulbagh, a Dutch governor of the Cape of Good Hope.) A South African plant, *Nat. Ord.* Asphodeleæ, the bulbs of which, boiled in milk, are recommended in phthisis and as an anthelmintic.

Tulbaghia cepa'cea and *T. viola'cea* serve the same purpose.

Tu'lip, Cape, Homeria collina — t. Tree, Liriodendron.

Tulipier, Liriodendron.

Tulipif'era Lirioden'dron, (*tulipa,* 'tulip,' and *ferre,* 'to bear,') Liriodendron tulipifera.

Tul'pius, Valve of, Bauhin, valve of.

Tum'bleties, see Irregular practitioner.

Tumefac'tio, (*tumere,* 'to swell,' and *facere,* 'to make,') Swelling — t. Mollis, Puffiness.

Tumescen'tia Pituito'sa, (from *tumescere,* 'to swell,') Leucophlegmatia.

Tumeur, Tumor — *t. Anomale,* see Hæmatodes fungus — *t. Arénacée,* Psammoma.

Tumeur Blanche. The French use this term synonymously with *White Swell'ing.* See Hydrarthrus. The term is, however, applied by the generality of surgeons to swellings of the greater joints, without change of color of the skin, and of a more or less firm consistence, which are dependent upon disease of the osseous or of the soft parts about the joint.

Tumeur Caverneuse, see Hæmatodes fungus — *t. Encephaloïde,* Encephaloid — *t. Erectile,* see Hæmatodes fungus — *t. Fongoïde,* Encephaloid — *t. Fonguense,* Encephaloid — *t. Gommeuse,* Gumma — *t. Hémorrhagiale circonscrite,* see Aneurism — *t. Lymphatique des articulations,* Hydrarthrus — *t. Ossivore,* Encephaloid — *t. Perlée,* Cholesteatoma — *t. Pulpeuse,* Encephaloid — *t. Spléniforme,* Encephaloid — *t. Spongieuse,* Encephaloid — *t. Variqueuse,* see Hæmatodes fungus.

Tu'mor, (*tumere,* 'to swell,') *Ou'cos, Ou'cus, Epar'ma, Epar'sis, Emphy'ma, Excrescen'tia* (Sauvages), *Ecphy'ma,* (Sc.) *Swalme,* (F.) *Tumeur.* A rising or prominence, of greater or less size, developed by a morbific cause in some part of the body. Cullen defines a tumor to be "a partial swelling without inflammation." Sauvages restricts the term to a rising formed by the congestion of a fluid, and he calls *excrescences* those which have a fleshy or osseous consistence. Boyer defines it "any preternatural eminence developed on any part of the body." Good uses it synonymously with tubercle. Boyer's is the best general definition. Tumors differ greatly from each other, according to their seat, the organs interested, their nature, &c. According to Virchow, a tumor, however parasitic it may appear to be, is always a part of the body from which it springs: the laws of the body govern also the growth of the tumor.

According to Paget, the term *Tumor* is applied to such morbid growths or growing parts as — 1, are isolated from surrounding parts by distinct investing layers of tissue; 2, though continuous with the natural parts, are abruptly circumscribed in the greater part of their extent; or, 3, are formed of new materials infiltrated and growing in the interstices of natural parts. See Swelling.

Tu'mor, A'denoid, Adenoma — t. Adiposus, Lipoma — t. Albus, Hydrarthrus — t. Anomalous, Hæmatodes fungus — t. Artuum, Obdormitio — t. Butyroid, see Butyroid — t. Capitis Sanguineus, Cephalæmatoma — t. Carneus, Sarcoma — t. Cartilaginosus, Chondroma.

Tu'mor, Cav'ernous. A tumor whose structure is of so loosely reticulated a nature as to resemble the corpora cavernosa of the penis.

Tu'mor, Cel'lular. A form of tumor occurring in cellular tissue which does not contain fat.

Tu'mor, Cellulofi'brous, Tumor, fibrocellular — t. Cheloïdes, see Cancroid — t. Cysticus, Encystis — t. Cysticus serosus, Hygroma — t. Desmoides, Tumor, fibrous — t. Dilatation, Retention cyst — t. Epithelial, see Epithelial.

Tu'mor, Erec'tile. A tumor produced by the development of a soft, vascular tissue which is susceptible of elevation and depression. See Erectile.

Tu'mor, Fat'ty, Lipoma — t. Fibroädiposus, Tumor, fibrofatty.

Tu'mor, Fibrocalca'reous, *Tu'mor fibrocalca'reus.* A fibrous tumor containing earthy matter.

Tu'mor, Fibrocel'lular, *Cellulofi'brous tumor, Tumor fibrocellulo'sus.* A soft and elastic form of fibrous tumor, a variety of the *gelat'inous sarco'ma* of Rokitansky, of which the softer kind of polypus of the nose is an example.

Tu'mor Fibrocellulo'sus, Tumor, fibrocellular.

Tu'mor, Fibrocys'tic, *Tumor fibrocys'ticus.* A fibrous tumor containing cysts.

Tu'mor, Fibrofat'ty, *Tumor fibroädipo'sus.* A fibrous tumor containing fat.

Tu'mor, Fibromus'cular, see Myoma — t. Fibromusculosus, see Myoma.

Tu'mor, Fibronu'cleated, *Tumor fibronucleo'sus.* A tumor composed of fibrous tissue mixed with elongated nuclei.

Tu'mor, Fibronucleo'sus, Tumor, fibronucleated — t. Fibroplastic, Sarcoma, Myeloid — t. Fibrosus, Tumor, fibrous — t. Fibrosus recurrens, see Tumor, fibrous.

Tu'mor, Fi'brous, *Des'moid Tumor, Fi'brous growth, Fibro'ma, Fi'broid, Ino'ma, Tumor fibro'sus* seu *desmoïdes, Inohylo'ma.* A tumor or growth formed of fibrous tissue. When recurring after repeated removal, the term *Recur'rent fi'broid, Sarco'ma fusocellula'rē, Tumor fibro'sus recur'rens,* is applied to it.

Tu'mor Fico'sus, Ficus — t. Flatulentus, Emphysema.

Tu'mor, Float'ing. A mass movable in the abdomen, about the size and shape of a kidney. It may be a movable kidney or a loosely attached ovarian cyst, a collection of fæces, &c.

Tu'mor Fugax, see Fugacious — t. Fungating, see Fungating — t. Fungosus articuli, Spina ventosa — t. Fungosus sanguineus, Hæmatodes fungus — t. Gangliformis, Ganglion, nervous — t. Genarum, Meloncus — t. Genu albus, Genocace — t. Glandulæ parotideæ, Parotidoncus.

Tu'mor, Glan'dular, *Tumor Glandulo'sus.* A tumor growing in or near a gland, and resembling it in structure. See Adenoma.

Tu'mor Glandulo'sus, Tumor, glandular — t. Granulation, see Granulation — t. Gummatus, Gumma — t. Gummy, Gumma — t. Histioid, see Sarcoma and Histoid — t. Lacteus, Galactocele — t. Laminated nacreous fatty, Cholesteatoma — t. Lardeus, Steatoma — t. Leucæmic or Leukæmic, Lymphoma — t. Lymphoid, Lymphoma — t. Malarum, Meloncus — t. Milklike, Encephaloid.

Tu'mor, Mixed. A tumor in the composition of which more than one kind of tissue is implicated, — the fibromuscular, for example.

Tu'mor, Mu'cous, Myxoma — t. Muscular, see Fantom Myoma — t. Myelodes, see Myeloid — t. Myelogenic, see Myelogenic — t. Nerve, Neuroma — t. Osseus, see Exostosis, Osteoma, &c. — t. Osseus ossis, Exostosis — t. Ovarii, Oarioncus, Ovarian tumors — t. Papillary, Papilloma — t. Parotidis, Parotidoncus — t. Pearly, Cholesteatoma — t. Phantom, see Fantom — t. Prostatæ, Prostatoncus — t. Renalis, Nephroncus — t. Reten-

tion, Retention cyst — t. Sand, Psammoma — t. Sanguineus, Hæmatoma — t. Sanguineous pelvic, Hæmatocele, pelvic — t. Sarcomatous, see Sarcoma — t. Sebaceus, see Sebaceous — t. Squamiformis carnosus, Lepidosarcoma — t. Tarsal, Chalaza — t. Tendinous, see Tendinous.

Tu'mor, Transit''ion. A recurrent tumor in which there is a disposition to assume a more malignant form.

Tu'mor Tuberculo'sus, Tuberculate sarcoma — t. Tunicatus, Encystis — t. Uteri, Hysteroncus.

Tu'mor, Var'icose, *Tumor varico'sus.* A circumscribed, bluish tumor, formed by the dilatation and turgescence of the capillary vessels of a part.

Tu'mor, Vas'cular, see Hæmorrhois, Nævus, and Angioma — t. Vascular of urethra, see Urethra — t. Vasculosus, Angioma — t. Villosus, Papilloma — t. Villous, Papilloma — t. Warty of cicatrices, see Warty tumor.

Tumul'tus Cor'dis. Irregularity of action of the heart.

Tun'belly, Physconia.

Tun'bridge Wells, Min'eral Wa'ters of. A celebrated acidulous chalybeate in Kent, England, a few miles distant from the village of Tunbridge, and thirty-six miles south of London, which is much frequented, especially for cases of anæmia, chlorosis, &c. It contains carbonic acid, carbonate of iron, and sulphate of magnesia.

Tun'da Oc'uli, Conjunctiva membrana.

Tun'dus Cor'dis, Mucro cordis.

Tunga, Chique.

Tu'nic, *Tu'nica, Chi'ton, Coat,* (F.) *Tunique.* An envelope. A name given to different membranes, which envelop organs: as the tunics or coats of the eye, stomach, bladder, &c.

Tu'nica, Tunic — t. Acinalis, Uvea — t. Aciniformis, Uvea—t. Acinosa, Uvea—t. Adnata, Conjunctiva — t. Adventitia, see Artery — t. Agnata, Conjunctiva—t. Alba oculi, Sclerotic—t. Albuginea, Albuginea, see Kidney — t. Albuginea oculi, Sclerotic—t. Albuginea testis, Albuginea testis—t. Allantoides, Allantois — t. Amphiblestroides, Retina — t. Arachnodes, Arachnoid membrane — t. Aranea, Arachnoid membrane—t. Caduca, Decidua — t. Candida oculi, Sclerotic — t. Carnea, Dartos — t. Carnosa, Panniculus carnosus — t. Cellularis, see Artery — t. Conjunctiva, Conjunctiva — t. Costalis, Pleura — t. Crassa, Decidua — t. Crystallina, Arachnoid membrane — t. Dartos, see Dartos—t. Dura oculi, Sclerotic—t. Durior et crassa, Sclerotic—t. Elastica, see Artery—t. Elytroides, Vaginal coat — t. Erythroides, Cremaster —t. Exterior ovi, Decidua—t. Externa, see Artery — t. Extima oculi, Sclerotic—t. Farciminalis, Allantois—t. Fibrosa albuginea testis, see Cavernous bodies and Folliculi Graafiani — t. Fibrosa communis, Vaginal coat of the testicle — t. Filamentosa, Decidua — t. Glabra, see Artery.

Tu'nica Granulo'sa, 'granular coat.' An investment of the ovum exterior to the zona pellucida, described by Dr. Barry, but the existence of which as a structure, distinct and independent from the membrana granulosa, is denied.

Tu'nica Horten'sis, Dianthus caryophyllus — t. Innominata oculi, Sclerotic — t. Interna oculi, Retina — t. Intima, see Artery — t. Intima oculi, Retina.

Tu'nica Jaco'bi, *Membra'na Jaco'bi, Ja'cob's coat* or *mem'brane.* A highly delicate serous membrane, interposed between the retina and the choroid coat, discovered by Dr. Jacob, of Dublin. Its structure is curious, being composed of cylindrical, transparent, highly refractive staffshaped bodies, *Bacil'li,* — hence called *Stra'tum bacillo'sum* seu *bacilla'tum* seu *cylindro'rum, Bac''illar lay'er of the ret'ina,* — which are arranged perpendicularly to the surface of the retina, their outer extremities being imbedded, to a greater or less depth, in a layer of the pigmentum nigrum, and are continued into the more internal layers of the retina by means of thin processes — the *filaments* or *fibres of Müller.*

Tu'nica Me'dia, 'middle coat,' see Artery — t. Muscularis, Dartos — t. Nervea oculi, Retina — t. Nervorum, Neurilemma — t. Perforata, Uvea — t. Prætensa abdominis, Peritonæum — t. Propria, see Kidney—t. Reticularis, Retina—t. Retiformis, Retina—t. Rhagoides, Choroïdea tunica, Uvea — t. Rubicunda scroti, Dartos — t. Rubra, Dianthos caryophyllus — t. Ruyschiana, see Choroid — t. Subcostalis, Pleura—t. Tendinosa oculi, see Sclerotic — t. Thoracis, Corset — t. Uvalis, Uvea — t. Uvea, Uvea — t. Uviformis, Uvea — t. Vaginalis, see Vaginal — t. Vaginalis bulbi, Capsule of Bonnet — t. Vaginalis communis et funiculi spermatici, Vaginal coat of the testicle — t. Vaginalis linguæ, see Tongue — t. Vaginalis propria, Vaginal coat of the testicle—t. Vaginalis reflexa, Vaginal coat of the testicle — t. Vaginalis testis, see Testicle.

Tu'nica Vasculo'sa Halle'ri. One of the two layers of vessels of the choroid, formed by the coarser arterial and venous trunks.

Tu'nica Vasculo'sa Oc'uli, Choroid, see Eye.

Tu'nica Vasculo'sa Tes'tis, 'vascular coat of the testis,' *Pi'a ma'ter tes'tis.* An extremely delicate membrane, consisting of minute ramifications of the spermatic vessels united by areolar tissue, which separates the lobules of the testis from each other. It is situate immediately within the tunica albuginea, and incloses the substance of the gland. It sends processes inward that separate the lobules, in the same manner as the pia mater is reflected between the convolutions of the brain.

Tu'nica Vit'rea, Hyaloid membrane.

Tunic'ula, (dim. of *tunica,*) *Tu'nicle,* (F.) *Tunicule.* A fine membrane, coat, or skin. Clitoris.

Tunique, Tunic — *t. Albuginée,* Albuginea — *t. Commune de Bichat,* Endangium — *t. Striée,* see Artery.

Tun'nelling. A term sometimes employed for the treatment of stricture of the urethra, by making pressure upon it from within so as to promote its removal by absorption. It is also applied to catheters, sounds, urethrotomes, as *tunnelled* catheters, &c., which are not solid throughout, but have a tunnelled cavity.

Tun'nyfish, Salt'ed, Omotarichos.

Tuphloënteri'tis, Typhloënteritis.

Tu'phus, Typhus.

Tupina'ria, Talpa.

Tur'ba Hæmorrhoida'lis, 'hemorrhoidal disorder,' see Hæmorrhois.

Turbatio'nes An'imi, (*turbare, turbatum,* 'to disorder,') Affections of the mind.

Tur'binated Bones, *Ossa turbina'ta.* Bones shaped like a top, (from *turba,* gen. *turbinis,* or *turben,* 'a top,') *Os'sa spongio'sa, O. ter'tia maxil'læ superio'ris, Cor'nua, Con'chæ na'rium* seu *ven'eris, Tur'bines na'si* seu *na'rium, Conchyl'ia, Bucci'na, Lam'inæ spongio'sæ na'si,* (F.) *Cornets.* Very thin, bony plates, rolled up in the form of horns, and situate in the nasal fossa. 1. *Os spongio'sum supe'rius* or *Cornet de Morgagni,* — the highest. 2. *Os spongiosum me'dium,* the *middle cor'nu* of French anatomists—the *ethmoid'al cor'nu* or *Os spongio'sum supe'rius* seu *turbina'tum* of English anatomists, *Os convolu'tum supe'rius, Con'cha, C. na'rium supe'rior* seu *Morgagnia'na,* (F.) *Cornet moyen.* This bone projects inwards and downwards into the cavity of the nose, from the ethmoid cells at the side of the nasal lamella, and serves to enlarge the organ of smell. It is convex towards the septum, and concave outwards. 3. *Os spongio'sum* seu *turbina'tum infe'rius, Con'cha infe'rior, Convolu'tum infe'rius os, Os sous-ethmoïdal* (Ch.), projects at the under part of the side of the nose, is convex towards the septum

and concave outwards. It is connected to the os maxillare, os palati, and os unguis. 4. *Sphenoid'al cornu.* All the turbinated bones extend the olfactory surface.

Tur'bines Na'si seu **Na'rium,** (pl. of *turbo,* gen. *turbinis,* 'a top,') Turbinated bones.

Turbith Blanc, Globularia alypum — t. Mineral, Hydrargyrus vitriolatus — t. Montpellier, Globularia alypum—*t. Noir,* see Hydrargyri oxydum cinereum—t. Plant, Convolvulus turpethum.

Tur'bo Cer'ebri, Pineal gland.

Turgen'tia, Turgescence.

Turges'cence, *Turges'cency, Turgid'ity, Tur'gidness, Turgescen'tia, Turgen'tia, Orgas'mus,* (from *turgescere,* 'to begin to swell,' *turgere,* 'to swell.') Superabundance of humors in a part. The term *Turges'cence of Bile* was formerly used to denote the passage of that fluid into the stomach, and its discharge by vomiting. A vital action of turgescence or expansibility — *Turgor vita'lis*—has been presumed to exist in the capillaries of certain organs and in erectile tissues; but the generality of physiologists do not admit it.

Turgescen'tia, Turgescence.

Turgescen'tia Vesic'ulæ Fel'leæ, *Asci'tes Hepatocys'tieus, Physco'nia* seu *Cystoce'lē bilio'sa, Hepatal'gia Petitia'na, Hydrocholecys'tis, Hydrops vesi'cæ fell'eæ,* (F.) *Hydropisie de la Vésicule du Fiel, Distension de la Vésicule du Fiel, Cholicystiectasie.* Distension of the gall-bladder by bile.

Turgid'ity, Turgescence.

Tur'gidness, Turgescence.

Tur'gor Vita'lis, see Turgescence.

Tur'key Corn, Corydalis formosa — t. Pea, Corydalis formosa.

Turk'ish Bath. A form of bath of Turkish origin, in which the individual passes into bathing apartments of increasing temperature, after which he undergoes shampooing of the whole body, &c. See Stove.

Tur'meric, Curcuma longa, Sanguinaria Canadensis.

Turn of Life, see Menses.

Turn'ing, *Ver'sio, Ver'sion,* (from [F.] *tourner,* 'to turn,') (F.) *Version,* — as

Turn'ing of the Fœ'tus, *Ver'sio Fœtûs.* Generally, the operation of bringing down the feet, or some part of the lower extremity, when the presentation of the child is such that it cannot be delivered by the natural efforts. This has been termed *podal'ic version,* in contradistinction to *cephal'ic ver'sion,* which consists in bringing the head down, — in shoulder-presentations, for example,—and is termed *internal version;* to distinguish it from *external version* or that which is induced by external pressure, applied through the parietes of the abdomen and uterus. *Bimanual version* and *bipolar version* are intended to act simultaneously on both poles of the fœtal ovoid, — the former externally, through the abdominal walls; the latter both externally and internally.

Tur'nip, (*turn,* and [Sax.] næpe, 'navew,') Brassica rapa — t. Dragon, Arum triphyllum — t. Indian, Arum triphyllum, Psoralea esculenta — t. Pepper, Arum triphyllum — t. Prairie, Camasia esculenta.

Turns, Menses.

Turn'sick, Vertiginous, see Cœnurus.

Turn'sole, Lichen roccella.

Tur'pentine, Terebinthina — t. Bordeaux, see Pinus sylvestris — t. Briançon, see Pinus cembra — t. Chio, see Pistacia terebinthus — t. Common, see Pinus sylvestris — t. Common, American, see Pinus sylvestris—t. Cyprus, see Pistacia terebinthus — t. Damarra, see Pinus damarra — t. Dombeya, see Dombeya excelsa — t. Horse, see Pinus sylvestris — t. Strasburg, see Pinus picea.

Tur'pentine Tree, Pistacia terebinthus.

Tur'pentine, Ven'ice, see Pinus larix — t. Venice, true, see Pistacia terebinthus — t. White, see Pinus sylvestris.

Tur'peth Min'eral, Hydrargyrus vitriolatus.

Turpe'thum, Convolvulus turpethum—t. Minerale, Hydrargyrus vitriolatus — t. Nigrum, Hydrargyri oxydum cinereum.

Turquette, (from Turkey,) Herniaria glabra.

Tur'quoise, (from [I.] *turchino,* 'greenish-blue.') This stone has been long imagined to change its color, according as the wearer is at the time in good or bad health; a superstitious notion.

Tur'tle Bloom, Chelone glabra — t. Green, Chelonia mydas — t. Head, Chelone glabra.

Tur'tur, gen. *Tur'turis,* Penis.

Turun'da, Tent.

Turun'dæ Ital'icæ. Paste made of the finest and most glutinous wheat — known under the names of *Macaroni, Vermicelli,* and *Italian* or *Cagliaria paste.* Similar preparations, made in Pennsylvania of flour and eggs, are called *noodles,* from the German Nudeln, 'pastry.'

Turun'dula, (dim. of *turunda,*) Tent.

Turunjebun, Alhagi Maurorum.

Tus, see Pinus abies.

Tuscaro'ra Ac''id Spring, see Canada, mineral waters of.

Tussa'ca Reticula'ta, (after G. R. De Tussac, a French botanist,) Goodyera pubescens.

Tusse'do, gen. *Tusse'dinis,* Tustis.

Tussic'ula, see Tussis.

Tussic'ular, *Tussicula'ris, Tussiculo'sus,* (from *tussicula.*) Relating to cough, or slight cough.

Tussiculo'sus, Tussicular.

Tussila'go, gen. *Tussilag''inis, T. Far'fara* seu *vulga'ris,* (from *tussis,* which it relieves,) *Be'chium, Be'chion, Cal'ceum equi'num, Chamælen'ce, Chamægei'ron, Fil'ius an'tē pa'trem, Farfarel'la, Galiomar'chus, Far'fara, F. Be'chium, Un'gula caballi'na, Colts'foot, Foal'foot,* (F.) *Pas d'âne, Herbe de Saint-Quirin. Ord.* Compositæ. *Sex. Syst.* Syngenesia Polygamia Superflua. It is demulcent and expectorant, and has been used in coughs, and pulmonary affections in general, and in some cutaneous diseases.

Tussila'go Far'fara, Tussilago — t. Hybrida, T. petasites.

Tussila'go Petasi'tes, *T. hy'brida* seu *petasi'tes hermaphrodi'ta, Petasi'tes, P. ma'jor* seu *ru'bens* seu *officina'lis* seu *hy'bridus* seu *vulga'ris, But'terbur, Pest'ilentwort,* (F.) *Pétasite, Herbe aux teigneux, Chapelière.* The roots of this plant have been recommended as aperient and alexipharmic. They have a strong smell, and a bitterish, acrid taste, aromatic, but not agreeable.

Tussila'go Petasi'tes Hermaphrodi'ta, T. petasites — t. Vulgaris, Tussilago.

Tus'sis, (dim. *Tussic'ula.*) *Beg'ma, Bex, Tusse'do, Bex'is, Tus'sis nerro'sa, Catar'rhus, Pneu'sis Tus'sis, Cough, Cough'ing, Haust, Hoast,* (Prov.) *Couf,* (Sc.) *Host, Hoist,* (F.) *Toux.* A violent, sonorous, frequent, and short expiration, by means of which the air, in passing rapidly through the bronchia and trachea, carries along with it the mucus of the parts, which forms the sputa. The cough is said to be *dry,* when unaccompanied by expectoration. It is symptomatic of many diseases. See Bronchitis.

Tus'sis Amphemer'ina, Pertussis — t. Asinina, Pertussis — t. Bronchica, Cough, tubal, see Bronchitis — t. Canina, Pertussis—t. Catarrhalis Simplex, Catarrh — t. Clamosa, Pertussis — t. Clangosa, Pertussis — t. Convulsiva, Pertussis — t. Delassans, Pertussis — t. Ferina, Pertussis — t. Pueros strangulans, Pertussis — t. Quinta, Pertussis — t. Senilis, Bronchitis (chronic)—t. Spasmodica, Pertussis — t. Stomachalis, Pertussis—t. Suffocans, Pertussis — t. Suffocativa, Pertussis — t. Tussiculosa, Pertussis.

Tus'sive, *Tussi'vus,* (from *tussis.*) Belonging or relating to cough; — as *tussive* vibration; the

vibration of the parietes of the chest, caused by coughing.

Tuta'mina, pl. of *tuta'men*, 'a defence,' 'a protection,' (from *tutare*, 'to defend.') Parts are so called which defend or protect others.

Tuta'mina Cer'ebri are the scalp, pericranium, bones of the skull, and the meninges.

Tuta'mina Oc'uli are the eyebrows, eyelids, and lachrymal apparatus.

Tutenag, Zincum.

Tut'hia, Tutia.

Tu'tia, *Pom'pholyx*, *Cadmi'a*, *Alfasa*, *Mesera*, *Capni'tis*, *Tu'thia*, *Ox'idum zin'ci impu'rum*, *Tutty*. The oxide of zinc that attaches itself to the chimneys of furnaces in which ores of zinc are smelted. It is in the form of gray incrustations; and is sometimes used for making an eye-salve. It is prepared, for this purpose, by levigation.

Tut'tering, Stuttering.

Tut'ty, Tutia.

Tutu, Coriaria myrtifolia.

Twigg's Hair Dye, see Hair dye.

Twin, ([Sax.] τpa, τpi, 'two,') Gemellus.

Twinge, (from [D.] *dwingen*, 'to force,') see Pain.

Twink'ling of the Eye, Nictation.

Twin'leaf, Com'mon, Jeffersonia Bartoni.

Twin'root, Orchis.

Twins, Caroli'na, see Carolina twins.

Twins, Joined. Two beings united together, as in the Carolina or Siamese twins.

Twins, Siamese'. Two brothers, Chang and Eng, connected by means of a ligamentous band passing from the epigastrium of one to that of the other, who were exhibited in various parts of Europe and America, about the year 1830. They have lived in North Carolina, are married, and have children. See Xiphopages.

Twitch'grass, Triticum repens.

Twitch'ing, (from [Sax.] τpiccian, 'to wrest,') Tic.

Tych'ica, (from τυχη, 'accident.') Fortuitous lesions or deformities. The 7th class of Good's *Nosology*; *tych'ici mor'bi*, of Dr. Wm. Farr.

Ty'lê, (τυλη,) Callosity.

Tylo'ma, gen. *Tylo'matis*, (τυλωμα, from *tylus*, and *oma*,) Callosity.

Tyloph'ora Asthmat'ica, (*tylus*, and φερειν, 'to bear,' from the fleshiness of the leaflets of the corolla,) *Ascle'pias asthmat'ica*, *Cynan'chum Ipecacuan'ha* seu *vomito'rium* seu *viridiflo'rum* seu *tomento'sum*, *Ipecacuan'ha of the Isle of France*, (F.) *Ipecacuanha blanc de l'Île de France*. *Order*, Asclepiadaceæ. A native of various parts of the East Indies, both of the continent and islands. The root is acrid, and is used on the coast of Coromandel as a substitute for ipecacuanha. In large doses, it is emetic; in smaller, often repeated, it is cathartic. It is recommended, also, as a diaphoretic, and especially in humoral asthma.

Tylo'sis, (τυλωσις, from *tylus*, and *osis*,) Callosity. Applied also to inflammation of the lids, when the substance of the lid, along the margin, is thickened and hardened.

Ty'lus, (τυλος, 'a knot,') Callosity.

Tym'ma, gen. *Tym'matis*, (τυμμα,) Wound.

Tympan, Tympanum — *t. Membrane du*, see Tympanum.

Tym'panal, Tympanic.

Tympanal, Cadre du tympan.

Tympa'nia, Tympanites.

Tympa'nias, Tympanites.

Tympan'ic or **Tym'panic**, *Tympan'icus*, *Tympa'nal*, (F.) *Tympanique*, (from *tympanum*.) Relating to the tympanum, as '*tympanic* canal.'

Tympan'ic Bone, (F.) *Os Tympanal*. A curved plate of bone in the adult, forming the front and lower parts of the auditory canal, but existing in the fœtus as a separate ring, under this name.

Tympan'ic Nerve, see Petrous ganglion.

Tympanique, Tympanic.

Tym'panism, *Tympanis'mus*, (from *tympanum*.) State of parts affected with tympanites.

Tympani'ta, Tympanites.

Tympanite, Tympanites.

Tympani'tes, (τυμπανιτης,) *Emphyse'ma* seu *Pneumato'sis abdom'inis*, *Hy'drops tympanites*, *Affec'tio tympanit'ica*, *Ectympano'sis*, *Hy'drops abdom'inis oë'reus*, *Aëro'sis*, *A'ërocënterecta'sia*, *Aërenterecta'sia*, *Enteraërecta'sia*, *Physocœ'lia*, *Tympano'sis*, *Physe'ma*, *Physe'sis*, *Hy'drops sic'cus et flatulen'tus*, *Tympa'nia*, *Tympa'nias*, *Tympani'ta*, *Tympani'tis*, *Emphyse'ma tympanites*, *E. tympanit'icum*, *Meteoris'mus*, *Tym'pany*, *Me'teorism*, *Drum belly*, *Wind drop'sy*, (F.) *Tympanite*, *Pneumatose péritonéale*, *Ballonnement*, (from τυμπανον, 'a drum,' so called because the abdomen is distended with wind, and sounds like a drum when struck.) A swelling of the abdomen, caused by accumulation of air in the intestinal tube or in the peritoneum. Tympanites may be idiopathic or symptomatic. The former depends upon exhalation of air from the inner surface of the intestine, or from decomposition of substances contained in it; the latter is the result of some organic affection, and often depends upon obliteration of the digestive tube, which prevents the gas from escaping. Idiopathic tympanites may be more readily cured. The symptomatic is usually fatal. On dissection, in such cases, the stomach and intestines are found enormously distended; with strangulation or disorganization of some part of the mucous membrane of the intestine. Carminatives may be proper when tympanites depends upon atony of the digestive organs; but, in cases of the symptomatic kind, they cannot be productive of advantage, and may do harm.

Sometimes the air is contained in the cavity of the peritoneum — constituting *Tympanites abdomina'lis*, *Aéropéritonie* of some — the accumulation in the intestines being called *Tympanites intestina'lis*.

Tympani'tes, U'terine, Physometra.

Tympani'tis, gen. *Tympani'tidis*, *Inflamma'tio tym'pani*, (*tympanum*, and *itis*.) Inflammation of the lining membrane of the middle ear. Also, tympanites.

Tympano'sis, Tympanites.

Tym'panum, (τυμπανον, 'a drum.') The *Drum* or *bar'rel of the ear*, *Ear drum*. The names *Cav'ity of the Tym'panum* or *of the Drum*, *Cav'itas* seu *Cav'um Tym'pani*, *An'trum* seu *cav'itas antro'sa Au'ris*, (F.) *Tympan*, *Cavité du tympan*, *Caisse du tambour* ou *du tympan* — have been given to a cavity of an irregular shape, which constitutes the middle ear, and has been compared to a drum. It is situate in the pars petrosa of the temporal bone, between the meatus auditorius externus and the labyrinth. This cavity is lined by a mucous membrane; and communicates, externally by means of the Eustachian tube, which is situate between it and the pharynx. The tympanum has six parietes. 1. An external, which is almost entirely formed of the *Mem'brane of the Drum*, *Membra'na tym'pani*, *Diaphrag'ma* seu *Mediasti'num Tegumen'tum au'ris* seu *Sep'tum membrana'ceum*, *Myrin'ga*, *My'rinx*, (F.) *Membrane du tympan* — a species of thin, transparent circular septum; convex within and concave without, which closes the inner extremity of the meatus auditorius. 2. An *internal*, on which are the *Fenes'træ ova'lis*, *Prom'ontory*, and *Fora'men rotun'dum*. 3. A *superior*. 4. An *inferior*, on which is the *glenoid fissure*. 5. A *posterior*, on which are the opening of the mastoid cells, and the pyramid. 6. An *anterior* on which are the

Proces'sus cochleafor'mis and the inner orifice of the *Eusta'chian tube.* The cavity of the tympanum is crossed by a series of four small bones, articulated with each other by diarthrosis, moved by certain muscles, and representing a kind of bent lever extending from the membrana tympani to the fenestra ovalis. They are called the *Bones* or *Os'sicles of the Ear,* and are the malleus, incus, os orbiculare, and stapes.

For the nervous plexus of the tympanum, see Petrosal ganglion and Otic ganglion.

Tym'panum Mi'nus, see Fenestra — t. Secundarium, see Fenestra.

Tym'pany, Tympanites — t. of the Womb, Physometra.

Type, *Ty'pus, Peri'odus mor'bi,* (τυπος, 'a stamp,' itself from τυπτω, 'I strike.') The *type* is the order in which the symptoms of a disease exhibit themselves and succeed each other. It may be continued, intermittent, or remittent.

Ty'pha Angustifo'lia, (τυφη,) has the same properties as

Ty'pha Aromat'ica, Acorus calamus, and

Ty'pha Latifo'lia, *Cattail, Reedmace, Greater Reedmace, Bullsegg,* (F.) *Massette, Masse* ou *Quenouille d'Eau.* A plant common in marshes and ponds, in this country and Europe. *Ord.* Typhaceæ. *Sex. Syst.* Monœcia Triandria. Its roots have been used in dysentery and blenorrhagia. The young shoots, before they reach the surface of the water, when boiled, taste like asparagus.

The down, (F.) *Aigrette, Poils,* which accompanies the flowers, has been applied, like cotton, to burns.

Typhfe'ver, see Typhus.

Typh'ia, Typhoid fever.

Typh'icus, (from *typhus,*) Typhoid.

Typh'ine, (from *typhus.*) A term proposed by Dr. Wm. Farr for the specific zymotic principle by which typhus fever is propagated.

Typhin'ia, Relapsing fever.

Typhique, Typhoid, Typhus.

Typhisation à petites doses, Typhization.

Typhiza'tion, (F.) *Typhisation à petites doses.* The aggregate of symptoms met with in those who are constantly exposed to typhus contagion.

Typhlite, Typhlitis.

Typhli'tis, gen. *Typhli'tidis,* (*typhlo,* and *itis,*) Typhloënteritis—t. Stercoralis, Typhloënteritis.

Typh'lo, (from τυφλος, *cæcus,* 'blind,') in composition, the cæcum.

Typhlodiclidi'tis, gen. *Typhlodiclidi'tidis,* (*typhlo,* δικλις, gen. δικλιδος, 'a double door, a valve,' and *itis.*) Inflammation of the ileocæcal valve.

Typhloënteri'tis, gen. *Typhloenteri'tidis, Typhloënteritis, Typhli'tis, T. Stercora'lis, Inflamma'tio Cæ'ci, Cæci'tis, Phleg'monous Tu'mor of the Cæ'cum,* (F.) *Inflammation du Cæcum, Cécité, Typhlite, Typhloenterite, Cæcite* (Piorry), *Typhlite stercorale,* (*typhlo,* and *enteritis,* 'inflammation of the intestines.') Inflammation of the cæcum, occasionally leading to perforative ulceration, and usually accompanied with inflammation of the ascending colon.

Typhloën'terum, (*typhlo,* and εντερον, 'intestine,') Cæcum.

Typh'lops, (*typhlo,* and ωψ, 'eye,') Cæcum.

Typhlo'sis, (τυφλωσις,) Cæcitas.

Typhloteri'tis, gen. *Typhloteri'tidis,* (*typhloterum,* and *itis,*) Typhloënteritis.

Typhlot'erum, Cæcum.

Typh'lotes, (τυφλοτες,) Cæcitas.

Typho, (from τυφος, 'stupor,') in composition, typhus.

Typho'des, (τυφωδες, affected with τυφος, 'stupor,') Typhous.

Typhoëmie, Typhohæmia — t. *Entérique,* see Typhus.

Typhohæ'mia, (*typhus,* and αιμα, 'blood,') see Putrefaction.

Ty'phoid, *Typhoï'des,* (τυφωδης, 'stupefied,') *Ty'phicus, Typho'sus, Lac'tica,* (F.) *Typhique, Typhoïde,* (*typho,* and ειδος, 'resemblance.') Appertaining to or resembling typhus; as *Typhoid Fever.* Also, according to some, *Typhous Fever,* typhus. Fuchs has employed the word *Typhoïde* for a family of diseases, to distinguish them from *Phlogoses;* of this family, *Stomacace, Pharyngocace,* and *Pneumocace* are examples.

Ty'phoid Affec'tion, see Typhus—t. Cholera, Cholera typhoid — t. Fever, see Typhus.

Ty'phoid Fe'ver of In'dia, Cholera — t. Sinking, see Adynamic.

Typhoma'nia, (τυφομανια, from *typho,* and μανια, 'delirium.') *Delir'ium with stu'por, Subdelir'ium.* The kind of delirium common in typhus. See also Coma vigil, Insomnia.

Typho'nia, (from *typhus,*) Coma vigil.

Ty'pho-rube'oloid. Typhus fever was so called by Roupell, from the appearance of the cutaneous eruption.

Typhosep'ses, Typhoseptoses.

Typhosepto'ses, *Typhosep'ses,* (*typho,* and σηψις, 'putrefaction.') Typhous affections.

Typho'sis, (*typhus,* and *osis.*) The typhous condition or diathesis.

Typho'sus, (from *typhus,*) Typhoid, Typhous.

Ty'phous, *Ty'phic, Typho'sus,* (F.) *Typhique, Typhode.* Belonging or relating to typhus.

Ty'phous Depos'it. A peculiar substance of new formation found in the areolar membrane, between the mucous and muscular coats of the patches of Peyer in typhoid fever.

Ty'phous Fe'ver, see Typhoid.

Ty'phus, *Semipes'tis, Tu'phus, Fe'bris typho'des* seu *asthen'ica* seu *adynam'ica, Asthenop'yra, Ene'cia typhus,* (F.) *Fièvre adynamique* ou *ataxique* ou *adynamique ataxique, typhus d'Europe;* (from τυφος, 'stupor.') A fever characterized by small, weak, and unequal, but usually frequent pulse, with great prostration of strength, and much cerebral disturbance; its duration being generally from a fortnight to three weeks or longer. It is continued fever, accompanied with great cerebral irritation and prostration. (See Fever.) By most writers, this disease was formerly divided into two varieties—*ty'phus mit''ior* and *ty'phus gra'vior.* Dr. Thomas King Chambers treats of both under one generic name — *typhfever.* The term *Ty'phus ambulato'rius* is applied to a walking case of typhous fever, in which the infection induces local changes, as in the intestines, without any appreciable constitutional disturbance, although at times fatal in its results.

Ty'phus Mit''ior seu *sim'plex* seu *nervo'sus* seu *comato'sus, Fe'bris len'ta nervo'sa* seu *pu'trida nervo'sa* seu *hec'tica malig'na nervo'sa, Blechrop'yrus, Neurop'yra, Neuropyr'etus, Ner'vous Fe'ver,* (F.) *Fièvre nerveuse,* is characterized by slight shiverings; heavy, vertiginous headache; great oppression, peculiar expression of anxiety, nausea, sighing, despondency, and coma or quiet delirium.

Ty'phus Gra'vior seu *car'cerum* seu *castren'sis* seu *anthropophthor'acus* seu *contagio'sus exanthemat'icus* seu *nos'tras* seu *Europæ'us* seu *commu'nis* seu *bel'licus* seu *exanthemat'icus* seu *Hiber'nicus* seu *petechia'lis, Fe'bris nervo'sa epidem'ica* seu *nervo'sa exanthemat'ica* seu *malig'na cum sopo'rē* seu *typho'des* seu *nervo'sa petechia'lis* seu *pestilentia'lis Euro'pæ* seu *punctícula'ris* seu *saprop'yra* seu *car'cerum et nosocomio'rum* seu *pu'trida* seu *con'tinens pu'trida* seu *contin'ua pu'trida* seu *pes'tilens malig'na* seu *naut'ica pestilentia'lis* seu *petechia'lis, Septop'yra, Porphyroty'phus, Saproty'phus, Pulicula'ris mor'bus, Pes'tis bel'lica, True* or *exanthemat'ic* or *conta'gious ty'phus, Ner'vous fe'ver with exanthem'atous erup'tion, Pu'trid, Jail, Hos'pital* or *Ship Fe'ver,* (F.) *Fièvre des Camps, F. nautique, F. d'hôpital, F. nosocomiale, F. des*

Prisons, F. lenticulaire, Typhus contagieux, is attended with rigors and heat, alternating; little or no perspiration; pulse, tense and hard, usually quick, but fluttering; pain over the forehead and vertex; a 'mulberry rash,' appearing on the fifth to the seventh day of the disease, and lasting till the end; delirium succeeded by stupor, signs of incipient putrescency,—as true petechiæ, vibices, hemorrhages, &c., *Petec'hial, Mac'ulated* or *Spotted Fever, Febris maculo'sa*. See Fever, purpuric malignant. Typhus, under particular circumstances, seems to be communicable; but if proper attention be paid to cleanliness and ventilation, there is not much danger of communication. The general principles of treatment, laid down under the head of Fever, are applicable here. All the varieties of continued fever resemble each other in the cardinal points, although they may differ in many of their characters. Ventilation and cleanliness; warm or cold ablution or sponging; keeping the bowels free; and attending to symptoms as they may rise, with the avoiding of all irritation of every kind, are the main indications. When symptoms of great prostration occur, the strength must be supported by wine; and tonics be exhibited, with the mineral acids. Of the tonics, the sulphate of quinia is perhaps as good as any, while it is free from the objection which applies to most others,—of being too bulky. In the whole management of this affection, however, the physician has to discriminate carefully between oppression and prostration. The former may require evacuants; the latter cannot.

It is now maintained that there is an essential difference between the two varieties, typhoid fever and typhus; that the former is essentially an abdominal affection, and dependent upon, or connected with, an inflamed or ulcerated condition of the follicles or glands of Peyer; hence it has received the names *Fièvre mésentérique, F. typhoïde, Maladie* ou *Affection typhoïde, F. entéro-mésentérique, Entérite typhohémique, Typhoémie entérique, Entéro-mésentérite typhoïde, Exanthème intestinale, Dothinentérie, Dothinentérite, Dothienenterie*, &c., *Ileodiclidite, Typhodiclidite, Entérite folliculense, Gastro-entérite* with nervous affection of the brain, *Follic'ular gastroënteri'tis, F. enteri'tis, Enteri'tis folliculo'sa, Ty'phus abdomina'lis, T. intestina'lis, T. sporad'icus, Enteroty'phus, T. gangliona'ris abdomina'lis, Fe'bris intestina'lis ulcero'sa, F. nervo'sa gas'trica, F. nervo'sa enter'ica, F. enter'ica* seu *mesenterica* seu *intestina'lis, F. nervo'sa mesenter'ica, Enterhelco'sis nervo'sa, Ty'phus enter'icus, Ileop'yra, Ileoty'phus, Ty'phoid affec'tion, Enter'ic, Intes'tinal* or *Peye'rian fe'ver, Pythogen'ic fever, Abdom'inal Ty'phus, Night Soil fever*. Accompanying this form of fever there is generally pain or gurgling on pressing the right iliac fossa, over the seat of the intestinal lesion; with more or less diarrhœa, and a typhoid eruption, consisting of rose-red papulæ, (see Spots, red,) which appears mostly on the abdomen in the second week of the disease. They are distinct from true petechiæ, as they can be removed by pressure; and distinct also from sudamina, which are perhaps the universal accompaniments of sweating, and are consequently a variety of miliaria. The common continued fever or synochus of Great Britain and of this country belongs to this variety, and the *Red Tongue Fever* of Kentucky was considered by Professor Bartlett to be typhoid fever.

Certain modern French writers have considered the Typhus of the European continent, *Ty'phus of Europe, pestilen'tial fe'ver, conta'gious ty'phus, Hun'gary fe'ver, hos'pital fe'ver, camp fe'ver, jail fe'ver, lentic'ular pete'chial fe'ver*, (F.) *Peste d'Europe*, &c., to be identical with the typhoid affection. They admit but one fever on the European continent—the typhoid. Typhus, they maintain —but by no means establish the position — to be peculiar to England.

Ty'phus Abdomina'lis, see Typhus — *t. d'Amérique*, Fever, yellow—t. Anthracicus, Plague — t. Anthropopothoracus, Typhus — t. Aphthoideus, Aphthæ — t. Bellicus, Typhus — t. Bengalensis, Cholera—t. Bubonicus, Plague—t. Carcerum, Typhus gravior — t. Castrensis, Typhus gravior — t. Cerebral, Meningitis, cerebrospinal — *t. Cérébro-spinal*, Meningitis, cerebrospinal — t. Convulsivo-cerebral, Chorea, electric — *t. d'Europe*, Typhus — t. of Europe, see Typhus — t. Exanthematicus, Typhus — t. Ganglionaris abdominalis, see Typhus — t. Gravissimus, Plague — t. Hibernicus, T. gravior — t. Icterodes, Fever, yellow — t. Intestinalis, see Typhus — *t. Jaune*, Fever, yellow — *t. Miasmatique ataxique putride jaune*, Fever, yellow — t. Morbillosus, Rubeola — t. Nervosus, Typhus mitior — t. Nostras, Typhus — *t. d'Orient*, Plague — t. Pestilentialis, Plague — t. Pestis, Plague — t. Petechialis, Typhus gravior — *t. Puerpéral*, see Peritonitis — t. Recurrens, see Relapse — t. Scarlatinus, Scarlatina.

Ty'phus Sid'erans, (*sido*, 'I sink.') Typhoid fever running its course to a fatal conclusion on the second or third day, with nervous symptoms of remarkable violence.

Ty'phus Sim'plex, Typhus mitior — t. Sporadicus, see Typhus — t. Syncopal, Meningitis, cerebrospinal — t. Tropicus, Fever, yellow — t. True, Typhus — t. Vesicularis, Pemphigus.

Typ'ic, *Typ'ical, Typ'icus*, (τυπικος,) (F.) *Typique*. Characterized by a particular type, as a '*typical* fever.'

Typo'ses, (from *typus*,) see Periodicity.

Ty'pus, (τυπος,) Type.

Tyran'nus, 'a tyrant,' see Critical days.

Tyrba'sia, (τυρβασια,) Agitation.

Tyr'bē, (τυρβη,) Agitation.

Tyrem'esis, *Tyrotem'esis*, (*tyros*, and εμεσις, 'vomiting,') *Tyro'sis, Tyreu'sis*. Vomiting of curdy matter, in infants especially.

Tyreu'sis, (τυρευσις, 'cheese-making,') Tyremesis, Tyrosis.

Tyr'ia, Porrigo decalvans.

Tyri'asis, Elephantiasis Arabica.

Ty'rine, (from *tyrus*,) Casein.

Tyro'des, (τυρωδης, from *tyrus*, and *odes*,) Cheesy.

Tyro'ma, gen. *Tyro'matis*, Porrigo decalvans.

Ty'rosin, *Ty'rosine*, (from *tyrus*.) A crystallizable substance, in white silky needles, obtained by treating *casein* with *hydrate of potassa*. It has been found, like leucin, in the urine in typhoid fever, and in acute yellow atrophy of the liver.

Tyro'sis, (from *tyrus*, and *osis*,) Tyremesis. Also, the curdling of milk in the stomach, *Tyreu'sis*.

Tyrotem'esis, (τυρωτος, 'made into cheese,' and εμεσις, 'vomiting,') Tyremesis.

Ty'rus, (τυρος,) Cheese.

U.

U'ber, see Mamma and Nipple.

U'beris A'pex, 'apex of the mamma,' Nipple, Papilla.

Ud'der, (Sax. uðep,) see Mamma.

U'la, (*ουλα*, from *ουλος*, 'solid,') Gingivæ.

Ulæmorrhag''ia, Ulorrhagia.

Ulatroph'ia, (*ουλον*, 'the gum,' and *atrophia*, 'atrophy.) Shrinking of the gums; falling away of the gums.

Ul'cer, (ἑλκος,) *Ul'cus*, *Hel'cos*, *Elco'sis*, *Elco'ma*, *Hel'cus*, *Helco'ma*, a *Sore*, (Sc.) *Sair*, (Prov.) *Kile*, (F.) *Ulcère*. A solution of continuity in the soft parts, of longer or shorter standing, and kept up by some local disease or constitutional cause. Richerand makes four great distinctions between a wound and an ulcer. 1. A wound arises from the action of an extraneous body: the cause of an ulcer is inherent in the economy. 2. A wound is always idiopathic: an ulcer is always symptomatic. 3. A wound has essentially a tendency to heal, because the action of its cause has been momentary: an ulcer, on the contrary, has a tendency to enlarge, because its cause persists. 4. The treatment of a wound is purely surgical; that of an ulcer is medical as well. The immediate cause of an ulcer is perverted nutrition, the formative cells losing their plastic power. Ulcers have been variously divided, according to their nature — into *simple*, *sinuous*, *fistulous*, *fungous*, *gangrenous*, *scorbutic*, *syphilitic*, *cancerous*, *scirrhous*, *epithelial*, *encephaloid*, *inveterate*, *rodent*, *scrofulous*, *phagedenic*, *virulent*, *cacoëthic*, *sordid*, *carious*, *varicose*, &c. The treatment consists in removing, by appropriate means, the internal and the local causes which keep up the ulceration, and in exciting the vessels of the part, where necessary, by appropriate bandaging, &c.

Ul'cer, A'den, see Beriberi — u. Cancroid, Lupus — u. Chironian, Chironium — u. Cochin China, see Cochin China and Beriberi.

Ul'cer, Cold. A term applied by Mr. Paget to small inflammatory ulcers occurring spontaneously at the extremities of the body, sometimes preceded by gangrenous spots, and resembling in some respects ulcerated chilblains.

Ul'cer, Corro'ding, Ulcer, rodent — u. Delhi, see Delhi — u. Erosive, of the Derma, Lupus.

Ul'cer, Gout'y. A form of ulcer, usually superficial, observed in gouty parts of the body or over gouty deposits.

Ul'cer, Hemorrhag''iç. A form of ulceration characterized by occasional bleeding from its surface. It may be connected with a hemorrhagic diathesis or be an outlet for vicarious menstruation. An ulcer associated with varicose veins is usually called a *varicose ulcer*.

Ul'cer, Ir'ritable, *Neural'gic Ulcer*. An ulcer, usually occurring in the tibial region, characterized by intense pain and hyperæsthesia.

Ul'cer, Ja'cob's, Lupus — u. Lupoid, Ulcer, Rodent — u. Malignant, Hospital gangrene — u. Putrid, Hospital gangrene.

Ul'cer, Ro'dent, *Lu'poid* or *Corro'ding Ulcer*. A destructive local cancerous affection, beginning as a dry wart, afterwards ulcerating, becoming converted into an indolent sore, without granulation. When of extensive size, it is accompanied with a fetid purulent discharge. It is to be treated by the cautery, by escharotics, or the knife.

Ul'cer, Round, Ulcer of the stomach, perforating.

Ul'cer, Scorbu'tic. An ulcer or sore modified in its progress by the general scorbutic taint.

Ul'cer, Se'nile. Dry, dusky ulcers commonly met with in the dry, withered limbs of those who have a degeneracy of the arteries, &c., from old age.

Ul'cer of the Stomach, Per'forating. An ulcerated condition of the stomach, dependent on obstruction of the bloodvessels of that organ, usually occurring in the posterior wall of the pyloric portion. The perforation of the serous coat has the appearance of having been cut with a punch. It is called also *Round ulcer*, *Ul'cus ventric'uli rotun'dum* seu *per'forans*.

The term *Gastrelco'sis* has been applied generically to ulceration of the stomach from any cause.

Ul'cer, Tel'ephian, Telephium — u. Varicose, see Ulcer, hemorrhagic — u. Warty of Marjolin, see Warty tumor of cicatrices — u. Yemen, see Beriberi.

Ul'cera (pl. of *ulcus*) **Intestina'lia**, Gastrelcosis — u. Laryngis, Phthisis laryngea — u. Serpentaria oris, Aphthæ — u. Uteri, see Metrophthisis — u. Ventriculi, Gastrelcosis — u. Vesicæ, Cystophthisis.

Ul'cerated, *Ulcera'tus*, *Exulcera'tus*, *Helco'des*, (F.) *Ulcéré*, (*ulcerore*, *ulceratum*, 'to make sore,' from *ulcus*.) In the state of an ulcer. Affected with ulcers.

Ulcera'tio, Ulceration — u. Intestinalis, Enterelcosis — u. Ventriculi, Gastrelcosis.

Ulcera'tion, *Ulcera'tio*, *Exulcera'tio*, *Pyogen'ia corrosi'va*. A superficial ulcer. The formation of an ulcer — *Exelco'sis*, *Elco'sis*, and *Helco'sis*.

Ul'cerative, *Ulcerati'vus*, (F.) *Ulcératif*. Relating to ulceration — as an '*ulcerative* process.'

Ulcère, Ulcer — *u. Chancreux du Visage*, Lupus — *u. du Larynx*, Phthisis laryngea — *u. Rongeant*, Lupus.

Ulcéreux, Ulcerous.

Ul'cerous, *Ulcero'sus*, *Helco'des*, *Helcoï'des*, (from *ulcus*,) (F.) *Ulcéreux*. Having the character of an ulcer. Affected with ulcers.

Ul'cers, Egyp'tian, Ægyptia ulcera.

Ul'cus, gen. *Ul'ceris*, (ἑλκος,) Ulcer — u. Atonicum, Rupia — u. Cacoëthes, see Cacoëthes — u. Cancrosum, Cancer, Chancre — u. Dacryodes, see Dacryodes — u. Depascens, Phagedenic ulcer — u. Erodeus, Lupus — u. Ferinum, Phagedenic ulcer — u. Fistulosum, Hypophora — u. Grave, Mycetoma — u. Hypulum, see Hypulus — u. Narium fœtens, Ozæna — u. Obambulans, Phagedenic ulcer — u. Phagedænicum, Phagedenic ulcer — u. Phagedænicum colis, Phagedænic chancre — u. Pulmonum, Phthisis pulmonalis — u. Sinuosum, Hypophora — u. Syphiliticum, Chancre — u. Syriacum, Cynanche maligna — u. Telephium, Telephium — u. Tuberculosum, Lupus — u. Uteri, Hysterelcosis, Leucorrhœa — u. Venereum durum, Chancre — u. Ventriculi perforans, Ulcer of the stomach, perforating — u. Ventriculi rotundum, Ulcer of the stomach, perforating.

Ulcus'cula Præpu'tii, (pl. of *ulcusculum*,) Herpes præputii.

Ulcus'culum, (dim. of *ulcus*,) Ulcer — u. Cancrosum, Chancre.

U'lē, (υλη,) Cicatrix.

Ule'ticus, (from *ulon*,) Gingivalis.

U'licus, Gingivalis.

Uli'tis, gen. *Uli'tidis*, (*ulon*, and *itis*,) *Ouli'tis*, *Gingivi'tis*, *Inflamma'tio gingi'væ*, *Periodonti'tis*, *Gingiva'rum*, (F.) *Ulite*, *Gengivite*, *Inflammation des gencives*. Inflammation of the gums.

Uli'tis Sep'tica, Cancer aquaticus.

Ulluco, Tropæolum tuberosum.

Ulmaire, Spiræa ulmaria.

Ulma'ria, (from *ulmus*,) Spiræa ulmaria — u. Palustris, Spiræa ulmaria.

Ul'mus, *U. campes'tris* seu *gla'bra* seu *monta'na* seu *nu'da* seu *suti'va* seu *sca'bra, Pte'lea, Common Elm,* (F.) *Orme, Ormeau, Orme pyramidale* ou *champêtre. Ord.* Ulmaceæ. *Sex. Syst.* Pentandria Digynia. The inner, rough bark — *Ulmi Cortex* (Ph. B., 1867) — of this tree is inodorous, and has a bitter, austere, and mucilaginous taste. It is considered tonic, alterative, and diuretic, and has been used chiefly in lepra and other cutaneous affections. See Ulmus Americana.

Ul'mus Ala'ta, *Lynn Wahoo'.* The bark of the root has been used successfully as a cataplasm in phlegmonous inflammation.

Ul'mus America'na, *U. ful'va* seu *ru'bra, Rough'leaved, Red,* or *Slip'pery Elm.* The inner bark — *Ulmus fulva,* (Ph. U. S., 1863,) *Ul'mus,* (Ph. U. S., 1873,) is highly mucilaginous, and is used in coughs, diarrhœas, and dysenteries, and as a poultice for tumors, lacerated and contused wounds, &c. It may be employed, also, as a tent for dilating openings or passages.

Ul'mus Campes'tris, Ulmus — u. Fulva, U. Americana, U. rubra — u. Glabra, Ulmus — u. Montana, Ulmus — u. Nuda, Ulmus — u. Sativa, Ulmus — u. Scabra, Ulmus.

Ul'na, (ωλενη,) *O'lenē, Foc''ilē infe'rius* seu *ma'jus, Can'na bra'chii, Os cu'biti infe'rius, Os procubita'lē, Cu'bitus, Arun'do bra'chii ma'jor, Cu'bit.* Anatomists have given this name to the bone of the forearm which forms the prominence of the elbow, during the flexion of that joint. It is the longer and larger of the two bones, and is inserted at the inner side. Its upper and larger extremity has, behind, a considerable process, called *olec'ranon;* and, before, a smaller one, called *cor'onoid.* These two eminences are separated from each other by the greater *sig'moid* or *semilu'nar fos'sa* or *olec'ranoid cav'ity,* which receives the articular trochlea of the humerus. The tubercle of the ulna is a small, rough spot, under the root of the coronoid process, for the insertion of the *Brachialis internus.* On the outside of this extremity of the bone is the *less'er sig'moid cav'ity.* It is articulated with the head of the radius. The inferior extremity of the cubitus, which is much smaller than the superior, and articulated with the radius, has a surface that corresponds to the fibrocartilage which separates it from the os cuneiforme; and a pointed process called *sty'loid.* The body of the ulna is manifestly triangular. It is articulated with the os humeri and radius, and, mediately, with the os cuneiforme. It is developed by three points of ossification. — Also the elbow.

Ul'nad, see Ulnar aspect.

Ulnaire, Ulnar.

Ul'nar, Cubital.

Ul'nar Artery. The larger of the two subdivisions of the brachial artery, commencing immediately below the bend of the elbow, running along the ulnar side of the arm to the wrist, and passing across the palm of the hand to form the superficial palmar arch. The anterior and posterior *ulnar recurrent* arteries are branches of the ulnar given off in the forearm.

Ul'nar As'pect. An aspect towards the side on which the ulna is situated. (Barclay.) *Ulnad* is used adverbially by the same writer, to signify 'towards the ulnar aspect.'

Ul'nar Nerve is a branch of the brachial plexus, from which it arises in common with the inner head of the median and internal cutaneous nerve, and is distributed to the muscles and integument of the forearm and hand.

Ul'nar Recur'rent Ar'tery, see Ulnar.

Ul'nar Veins are two veins, *anterior* and *posterior,* distributed to the forearm.

Ulna'ris, (from *ulna,*) Cubital — u. Externus, see Cubital muscles — u. Gracilis, Palmaris longus — u. Internus, see Cubital muscles.

Uloc'acē, (*ulon,* and κακος, 'evil,') Cancer aquaticus, Stomacace.

U'lon, (ουλον,) Gingiva.

Ulon'cus, (F.) *Uloncie,* (*ulon,* and ογκος, 'tumor.') Swelling of the gums; epulis.

Ulorrhag''ia, *Ulæmorrhag''ia, Oulorrhag''ia, Stomatorrhag''ia, Hæmorrhag''ia gingiva'rum, Ulorrhœ'a,* (*ulon,* and ῥηγνυμι, 'I break forth.') Bleeding from the gums.

Ulorrhœ'a, (*ulon,* and ῥεω, 'I flow,') Ulorrhagia.

Ulo'sis, (*ule,* and the suffix *osis,*) Cicatrization.

Ulot'ica, (from *ule,*) Cicatrisantia.

Ulot'richi, (υλη, 'wood,' and τριξ, gen. τριχος, 'hair.') Those who have woolly hair.

Ultimister'nal. Professor Béclard gave this appellation to the sixth or last bony portion of the sternum. He calls it also *Ensister'nal.*

Ul'timum Mo'riens, 'last dying.' A term given to the part of the economy which dies last. The muscular contractility of the right auricle is said to be the last to disappear. See Punctum saliens.

U'lum, (ουλον,) Gingiva.

Ul'va Cris'pa, Fucus crispus.

Ul'va Latis'sima, *Broad Green La'ver, Green Sloke, Oys'ter green; Order,* Algæ; is used at table cooked in the same way as the next, to which it is greatly inferior.

Ul'va Umbilica'lis, *Por'phyra lacinia'ta* seu *umbilica'lis, Laciu'iated Pur'ple La'ver,* abundant on the shores of Great Britain, is pickled with salt and sold in London as *La'ver.* It is eaten at table, stewed with pepper, butter or oil and lemon-juice or vinegar. It has been suggested, also, as an antiscorbutic.

Um'bel, Yel'low, Cypripedium luteum.

Um'bilic, Umbilical, Umbilicus.

Umbil'ical, *Um'bilic, Umbilica'lis,* (F.) *Ombilical,* (from *umbilicus.*) That which belongs or relates to the navel.

Umbil'ical Ar'teries, which exist only in the fœtus, seem, as it were, continuations of the primitive iliacs. They clear the umbilical ring, and proceed to the placenta, to which they carry the residuum of the blood sent to the fœtus by the umbilical vein. As soon as respiration is established, the blood ceases to pass by the umbilical arteries, which become obliterated, as well as the vein, and are transformed into two very strong ligamentous cords,— the vein forming the *Ligamen'tum rotun'dum* of the liver.

Umbil'ical Cord, Funiculus umbilicalis.

Umbil'ical Re'gion, *Re'gio umbilica'lis* seu *gas'trica* seu *mesogas'trica, Mesogas'trium,* (F.) *Région ombilicale,* is the middle region of the abdomen, in which the umbilicus is placed. The sides of this are called the *flanks* or *lum'bar re'gions.* In the umbilical region are the omentum majus; the inferior extremity of the duodenum; the jejunum; and the greater part of the mesentery; the aorta; vena cava; the trunks of the renal arteries and veins; the origin of the spermatic arteries, &c.

Umbil'ical Ring, *An'nulus umbilica'lis,* (F.) *Anneau ombilical,* is a fibrous ring, which surrounds the aperture of the umbilicus, and through which umbilical hernia occurs in children.

Umbil'ical Ves'icæ, Vesicula umbilicalis.

Umbil'ical Ves'sels, (F.) *Vaisseaux ombilicaux,* include the two arteries and umbilical vein. The umbilical vein arises from the placenta, and terminates at the fissure on the inferior surface of the liver of the fœtus, to which it conveys the blood necessary for its nutrition.

Umbilica'lis, Umbilical.

Umbil'icated, *Umbilica'tus,* (F.) *Ombiliqué.* Depressed in the centre like the umbilicus, — as an '*umbilicated* pustule.' The term *Umbilication* is applied to such a condition of depression.

Umbilica'tion, see Umbilicated.

Umbili'cus, *Umbili'cum, Um'bo, Om'phalos, Ra'dix* seu *Me'dium ven'tris, Mesompha'lium, Mesom'phalum, Protme'sis (navel of a new-born child);* the *Um'bilic, Na'vel,* (Prov.) *Spoon,* (from *umbo,* 'the button or prominence in the middle of a buckler,' or from *υμφαλος,* or rather *ομφαλος,* which signifies the same, as well as the navel,) (F.) *Ombilic, Nombril.* A round cicatrix, about the median line of the abdomen. It is in the situation of an aperture, which, in the fœtus, affords passage to the vessels of the umbilical cord.

Umbili'cus Mari'nus, *Cotyle'don mari'na, Andro'sacē. Acetab'ulum mari'num, Andro'sacē Matthi'oli, Fun'gus petræ'us mari'nus.* A submarine production, found on rocks and the shells of fishes, in the south of France. It is reputed to be anthelmintic and diuretic.

Um'bo, gen. *Umbo'nis.* The deepest part of the arched membrana tympani, corresponding to the termination of the handle of the malleus. Elbow, Umbilicus.

Umbrel'la Tree, (dim. of *umbra,* 'a shade,') Magnolia tripetala.

Umschlag, ([G.] um, 'around,' and schlagen, 'to throw,') see Compress.

Unbow'elling, Exenterismus.

Unca'ria Gam'bir, Nauclea gambir.

Un'cas, In'dian, Veratrum viride.

Un'cia, (*ουγγια,*) Ounce.

Un'ciform, *Uncifor'mis, Uncina'tus,* (*uncus,* and *forma,* 'shape.') That which has the shape of a hook.

Un'ciform Bone, *Os uncifor'mē* seu *hama'tum* seu *uncina'tum,* (F.) *Os crochu.* The fourth bone of the second row of the carpus. Its shape is very irregular. Inwards and forwards, it has a considerable eminence, which is curved upon itself, and gives attachment to the annular ligament of the carpus. It is articulated with the os semilunare, os magnum, os cuneiforme, and the fourth and fifth metacarpal bones. It is developed from a single point of ossification.

Un'ciform Em'inence, Hippocampus minor.

Un'ciform Proc''ess, *Proces'sus uncina'tus* seu *Blumenbach'ii, Great Proc''ess of the Eth'moid.* The most considerable of the thin irregularly twisted laminæ on the inferior surface of the ethmoid bone, which narrow the opening of the maxillary sinuses.

Uncina'tus, (from *uncinus,*) Unciform.

Un'cinus, Hook.

Uncon'scious, *Non-con'scius,* (*un,* and *conscious,*) (F.) *Inconscient.* Without cerebral appreciation, or that which occurs without such appreciation, as 'an *unconscious* movement.'

Unc'tion, (*ungere, unctum,* 'to anoint,') Inunction, Unguentum, Unguentum hydrargyri.

Unc'tor, (same etymon.) The anointer in ancient bathing establishments.

Uncto'rium, Elæothesion.

Unctua'rium, Elæothesion.

Unctuos'itas Elephant'ina. An increased secretion of sebaceous matter in the congestive stage of Elephantiasis Græcorum.

Un'cus, gen. *Unci,* Hook.

Un'dercliff, Isle of Wight, Cli'mate of. The Undercliff comprehends a tract of country from Dunnose to St. Catherine's Hill, on the southeast coast, about six miles in length, and from a quarter to half a mile in breadth. It is well protected from the colder winds; and the climate is remarkably equable, as well as mild and dry, so that there are not many days during the winter in which the invalid cannot take exercise in the open air. It is an excellent climate for the pulmonary valetudinarian.

Undim'ia. A name given by Paracelsus to a tumor filled with a gelatinous matter, like the white of egg.

Undo'sus, (from *unda,* 'a wave,') Cymatodes.

Undula'tio, (from *unda,* 'a wave,') Fluctuation.

U'nedo, gen. *Unedo'nis,* Arbutus unedo — u. Papyracea, Arbutus unedo.

Un'gual, *Ungueа'lis, Un'gueal, Ungua'lis,* (from *unguis,* 'a nail.') Belonging or relating to the nails of the hands or feet.

Un'gual Fur'row. A transverse groove in the nail from loss of substance, — an evidence of a cachectic condition.

Un'gual Ma'trix, see Nail.

Un'guen, gen. *Un'guinis,* (from *unguere, unctum,* 'to anoint,') Unguentum — u. Articulare, Synovia.

Un'guent, Ar'matory, Hoplochrysma.

Unguenta'ria, see Myristica moschata.

Unguenta'rius, *Myrep'sus, Myropœ'us, Myropo'lcs, Myropo'lus, Pigmenta'rius,* (from *unguentum.*) One who makes and sells ointments. A perfumer.

Unguen'tum, *Un'guen, Diachrysm'a, My'ron, Unc'tion, Salve,* (F.) *Onguent,* (from *ungere, unctum,* 'to anoint.') Ointment. Ointments are topical applications, of a consistence more or less analogous to that of lard. They are used chiefly as local applications to ulcers and wounds; but are sometimes rubbed upon a part in cutaneous affections; and, especially, where it is desired that the constituents of the ointment shall be absorbed. Ointments are of less consistence than cerates, although the terms are often used indiscriminately. *Unguen'tum* (Ph. U. S., 1873) is adopted as the name of *Unguentum Adipis* (Ph. U. S., 1863). See Unguentum ceræ; Pomatum.

Unguen'tum Ac''idi Carbol'ici, *Oint'ment of Carbol'ic Ac''id.* (*Acid. carbolic.,* gr. lx., *Unguent.,* gr. cccxx. Mix thoroughly. Ph. U. S., 1873.) Used in cases in which carbolic acid is indicated externally.

Unguen'tum Ac''idi Nitro'si, *Oint'ment of Ni''trous Ac''id, Poma'tum* seu *Unguen'tum Ni'tricum* seu *Oxygena'tum,* (F.) *Pommade oxygénée, Graisse oxygénée, Pommade d'Alyon.* (*Adip. suilli,* ℔j., *Acid nitros.,* ʒvj. Melt the fat, and rub in the acid gradually, till cold. Ph. E.) Stimulant. Used in itch and other cutaneous eruptions, and in foul ulcers.

The French Codex (1866) has also a *Pommade Nitrique, P. oxygénée,* composed of *nitric acid* and *lard.*

Unguen'tum Ac''idi Tan'nici, *Ointment of Tannic Acid.* (*Acid. tannic.,* gr. xxx., *Adipis.,* ʒj. Rub together until thoroughly mixed. Ph. U. S., 1873.) Used like Unguentum gallæ.

Unguen'tum Aconit''læ, *Ointment of Aconit''ia.* (*Aconitiæ,* gr. viij., *Sp. rectif.,* ʇss., *Adipis præparat.,* ʒj. Ph. B., 1867.) In neuralgic pains.

Unguen'tum Ad'ipis, U. ceræ.

Unguen'tum Adipoce'ræ Ceto'rum, Ceratum cetacei — u. Ægyptiacum, Linimentum æruginis — u. Ægyptium album, Crinomyron — u. Æruginis, U. subacetatis cupri — u. Alabastrinum, see Alabaster—u. Album, Unguentum cetacei—u. Album resolvens, Linimentum ammoniæ fortius.

Unguen'tum de Althæ'â, *U. de terebin'thinâ et ce'râ* seu *cit'rinum* seu *resi'næ pi'ni sylves'tris compos'itum* seu *resumpti'vum* seu *leniti'vum, Cera'tum de althæ'â, Emplas'trum mucilagino'sum* seu *emol'liens* seu *cit'rinum* seu *fla'vum* seu *de Althæ'â, Unguentum fla'vum, Marshmallow Oint'ment,* (F.) *Onguent de guimauve, O. d'althéa.* (*Olei de mucilaginibus,* 1000 p., *Ceræ flavæ,* 250 p., *Resinæ, Terebinthin.,* āā 125 p. Liquefy; strain and stir till cold. Ph. P.—*Common olive oil* might be substituted for the *Oil of mucilages.*)

Unguen'tum Ammoniaca'lē Gondre'ti, Pommade de Gondret — u. Amygdalinum, Ceratum Galeni.

Unguen'tum Antimo'nii, (Ph. U. S.,) *U. Anti-*

monia'lē, U. Antimonii Tartariza'ti, Unguen'tum Antimonii Tartara'ti, (Ph. B.,) *U. Antimonii Potassiotartra'tis, U. tartari emet'iei, Oint'ment of tar'tarized* or *tarturated an'timony, Antimo'nial Oint'ment, Tar'tar emet'ic oint'ment. (Antimon. et potass. tartrat.* in pulv. subtiliss., gr. c., *Adipis,* gr. cccc. Ph. U. S., 1873.) If a drachm of this ointment be rubbed upon any part, night and morning, it will excite, in a few days, a painful pustular eruption. Hence, it is employed as a counterirritant. This preparation is also called *Ung. Tar'tari stibia'ti* seu *emet'iei, Ung. e Tar'taro stibia'to, A'deps tar'tarē stib'ii medica'tus, Ung. Tartra'tis Potas'sæ stibia'ti,* (F.) *Pommade d'Antenrieth, Pommade stibiée.* This method of employing the tartrate of antimony and potassa, as a revellent, is, at times, called *stibioder'mie,* (F.) *La méthode stibio-dermique.*

Unguen'tum Antimo'nii Potas'siotartra'tis, Unguentum antimonii — u. Antimonii tartarizati, U. antimonii—u. Antipernium, see Antipernius—u. Antipsoricum Werlhofii, Unguentum hydrargyri præcipitati albi.

Unguen'tum A'quæ Ro'sæ, *Oint'ment of Rose wa'ter, Cold Cream. (Aquæ Rosæ,* f℥ij., *Ol. amygdal.* express., ℥iijss., *Cetacei,* ℥j., *Ceræ albæ,* gr. cxx. Melt together, in a water-bath, the oil, spermaceti, and wax; then add the rose-water, and stir while cooling. Ph. U. S., 1873.) Cooling to irritated surfaces.

Unguen'tum Arma'rium, Hoplochrysma — u. Arthanitæ, see Arthanita—u. Articulare, Synovia.

Unguen'tum Atro'piæ, *Ointment of Atro'pia. (Atropiæ,* gr. viij., *Spir. rectif.,* f℥ss., *Adipis præparat.,* ℥j. M. Ph. B., 1867.) Smeared around the eye to dilate the pupil.

Unguen'tum Basil'icon Fla'vum, Ceratum resinæ — u. Basilicon nigrum, Unguentum resinæ nigræ — u. Basilicum viride, Unguentum subacetatis cupri.

Unguen'tum Belladon'næ, *Oint'ment of Belladon'na. (Ext. belladonnæ,* ℥j., *Aquæ,* f℥ss., *Adipis,* gr. cccxx. M. Ph. U. S., 1873.) An anodyne application to irritable ulcers, &c.

Unguen'tum Benzo'ini, *Ointment of Ben'zoin, Ben'zoated Lard. (Tinct. Benzoin.,* ℥ij., *Adipis,* ℥xvj. Melt the lard by means of a water-bath, add the tincture, and when the alcohol has evaporated, remove the ointment and stir. Ph. U. S., 1873.) The Ph. B. (1867) has a different formula, under the name of *A'deps Benzoä'tus.* A substitute for lard in seasons when the latter may become rancid.

Unguen'tum Cadmi'i Io'didi, *Oint'ment of I'odide of Cadmium. (Cadmii Iodid.* pulv., gr. lxij., *Unguent. Simpl.,* ℥j. M. Ph. B., 1867.)

Unguen'tum Calomel'anos, *U. Hydrar'gyri Subchlo'ridi, Ointment of Cal'omel, Oint'ment of Subchlo'ride of Mer'cury. (Calomel,* gr. lxxx., *Prepared Lard,* ℥j. In chronic cutaneous affections.

Unguen'tum Calomel'anos Compos'itum, *Com'pound Oint'ment of Cal'omel, Ban'yer's Oint'ment. (Calomel,* ℥ij., *Burnt alum,* ℥iv., *Carbonate of lead,* ℥iv., *Veniee turpentine,* ℥vj., *Spermaceti ointment,* ℥jss.) In scalled head and other chronic cutaneous affections.

Unguen'tum Canthar'idis, Unguentum lyttæ.

Unguen'tum Ce'ræ, (*al'bæ* vel *fla'væ,*) *Unguen'tum sim'plex,* (Ph. U. S., 1851,) *Unguentum adipis,* (Ph. U. S., 1863.) *Unguen'tum,* (Ph. U. S., 1873,) *Linimen'tum sim'plex, Wax Ointment, Ointment of Lard, Oil and Beeswax,* (F.) *Ongnent de eire. (Ceræ flav.,* ℥ij., *Adipis,* ℥viij., [Ph. U. S.,] or — *Ceræ,* ℥ij., *Ol. oliv.,* ℥v.)

In the Ph. B. (1867), under the name *Unguen'tum simplex,* it is prepared by melting together, *White wax,* ℥ij., *Prepared lard,* ℥iij., *Almond oil,* f℥iij.

Emollient. A mild dressing. Also, the basis of most of the compound ointments.

Unguen'tum Cera'tum, Ceratum Galeni — u. Cerussæ, Unguentum oxidi plumbi albi, Unguentum plumbi subcarbonatis — u. Cerussæ acetatæ, Ceratum plumbi superacetatis, U. plumbi superacetatis.

Unguen'tum Ceta'cei, *U. Sper'matis Ce'ti* seu *al'bum, Linimen'tum al'bum, Spermace'ti oint'ment,* (F.) *Onguent de blanc de baleine. (Cetacei,* ℥vj., *Ceræ albæ,* ℥j., *Ol. amygd.,* Oj., vel q. s. Ph. B., 1867.) The ordinary dressing for blisters and excoriations. See Ceratum cetacei.

Unguen'tum Cit'rinum, U. de althæâ, U. hydrargyri nitratis.

Unguen'tum Coc'culi, *Oint'ment of Coc'culus In'dicus. (Take* any quantity of *Coceulus Indicus;* separate and preserve the kernels; beat them well in a mortar, first alone, and then with a little *lard;* then add *lard* till it amounts altogether to five times the weight of the kernels. Ph. E.) Used to destroy vermin, and to cure scabies, and ringworm of the scalp.

Unguen'tum Coni'i, *Oint'ment of Hem'lock. (Conii fol.* recent., *Adipis,* āā ℔j. Boil the hemlock in the lard till it becomes crisp, and express through linen. Ph. L.) Used to irritable tumors and ulcers.

Unguen'tum Con'tra Sca'biem Werlhof'ii, Unguentum hydrargyri præcipitati albi.

Unguen'tum Creaso'ti, *Oint'ment of Cre'asote. (Creasot.,* f℥ss., *Adipis,* ℥j. Mix thoroughly. Ph. U. S., 1873.) Used in chronic cutaneous affections.

It is double this strength in the Ph. B., 1867.

Unguen'tum Cu'pri Subaceta'tis, Unguentum subacetatis cupri.

Unguen'tum Diach'yli Al'bi, *Unguen'tum Lithar'gyri.* (Prepared by mixing equal parts of *Litharge* and *Linseed oil,* or by boiling together *Olive oil,* ℥xv., *Litharge,* ℥iij. ℥vj., and *Lavender oil,* ℥ij.) Employed in certain forms of eczema and in profuse sweating of the feet.

Unguen'tum Diapomphol'ygos, Unguentum oxidi zinci impuri.

Unguen'tum Digesti'vum Sim'plex, *U. Terebin'thinæ et ovo'rum vitel'li, Sim'ple diges'tive oint'ment,* (F.) *Onguent digestif simple. (Terebinthin. pur.,* 64 p., *Vitell. ovorum,* no. 2, vel 32 p. Mix for a long time in a glass mortar, and add, gradually, enough of the *Oil of Hyperieum* (*Millepertuis*) to make a soft ointment. Ph. P.) Detergent. It may be rendered more so by adding a little of the *Acetate of copper.*

Unguen'tum El'emi, *Oint'ment of El'emi. (Elemi,* ℥ij., *Unguent. simpl.,* ℥j. Melt, strain through flannel, and stir until the ointment solidifies. Ph. B., 1867.) Uses, the same as the next.

Unguen'tum El'emi Compos'itum, *Unguen'tum e gum'mi el'emi* seu *de terebin'thinâ et adip'ibus* seu *El'emi, Linimen'tum* seu *Bal'samum Arcæ'i, Com'pound Oint'ment of El'emi, Bal'sam of Arcæ'us,* (F.) *Baume* ou *Onguent d'Arcéus. (Elemi,* ℔j., *Terebinthinæ vulgaris,* ℥x., *Sevi præparati,* ℔j., *Olivæ olei,* f℥ij. Melt the elemi with the suet, remove it from the fire, and mix in the turpentine and oil. Strain the mixture through a linen cloth. Ph. L.) Stimulant and digestive. To keep open issues, &c.

Unguen'tum Epispas'ticum de Daph'nē Gnid'io, *A'deps cor'ticē daph'nes gnid'ii mediea'tus,* (F.) *Pommade de Garou. (Adip. præpar.,* 320 p., *Ceræ,* 32 p., *Cort. daphn. gnid.,* 128 p. Melt the fat and wax, and add the bark softened in water. Boil until the water is evaporated; then pass through cloth. Ph. P.) To keep open blisters, issues, &c. See Unguentum mezerei.

Unguen'tum Epispas'ticum For'tius, Cerato of cantharides—u. Epispasticum mitius, Unguentum lyttæ — u. Epispasticum viride, Unguentum

lyttæ medicatum — u. Flavum, Unguentum de althæâ.

Unguen'tum Gal'læ, *Oint'ment of Galls, O. of Nut'gall.* (*Gallæ* in pulv., ℥j., *Adipis*, ℥vij. M. Ph. U. S., 1873.) As an astringent in piles, indolent ulcers, &c.

Unguen'tum Gal'læ Compos'itum, *U. Gallæ et O'pii, U. Gallæ cum O'pio*, (Ph. B., 1867,) *Com'pound Oint'ment of Galls, Oint'ment of Galls and O'pium.* (*Gall.* in pulv. subtil., ℥vj., *Adipis*, ℥vj., *Opii* pulv., ʒjss. M. Ph. L.) Used in painful hemorrhoids. ʒss. or ʒj. of camphor is sometimes added.

Unguen'tum e Gum'mi El'emi. Unguentum compositum — u. Hellebori albi, Unguentum veratri.

Unguen'tum Helmon'di. (*Hydrarg. ammoniat.*, ʒj., *Unguent. sulphuris*, ʒj.) Employed in psoriasis of the scalp and face.

Unguen'tum Hydrar'gyri, *U. cæru'leum* seu *Neapolita'num* seu *mercuria'lē, Cera'tum mercuria'lē, A'deps Hydrar'gyro medica'tus, Mercu'rial Oint'ment, Neapolitan ointment, Blue oint'ment, Unc'tion*, (F.) *Onguent mercuriel* ou *Napolitain.*

The *Strong Mercu'rial Oint'ment, Unguen'tum Hydrar'gyri for'tius*, of the London Pharmacopœias, *U. Hydrar'gyri*, (Ph. U. S., 1873,) is thus made: *Hydrarg.*, ℥xxiv., *Adipis, Sevi*, āā ℥xij. Rub till the globules cease to be visible.

The *Mild'er Mercu'rial Oint'ment, U. Hydrargyri Mit''ius*, is made by adding, to one pound of the strong, two pounds of lard.

Mercurial ointment is antisyphilitic and discutient. It is rubbed on the inside of the thigh, in venereal affections; especially in those cases where mercury, given internally, runs off by the bowels. The *stronger* ointment is used for this purpose. The *weaker* is employed as a dressing, or as an application to cutaneous eruptions.

Unguen'tum Hydrar'gyri Ammonia'ti, Unguentum hydrargyri præcipitati albi—u. Hydrargyri calcis albæ, Unguentum hydrargyri præcipitati albi.

Unguen'tum Hydrar'gyri Compos'itum, *Com'pound Oint'ment of Mer'cury.* (*Unguent. hydrarg.*, ℥vj., *Ceræ flav., Ol. olivæ*, āā ℥iij., *Camphor*, ʒjss. Ph. B., 1867.)

Unguen'tum Hydrar'gyri Deutox'ydi Nitra'ti, Unguentum hydrargyri nitricoöxydi.

Unguen'tum Hydrar'gyri Io'didi, *Oint'ment of Iodide of Mer'cury*, (F.) *Pommade de Protiodure de Mercure.* (*Hydrarg. iodid.*, ʒj., *Ceræ alb.*, ʒij., *Adipis*, ℥vj. Ph. L.)

Unguen'tum Hydrar'gyri Io'didi Ru'bri, *Oint'ment of Red Iodide of Mer'cury.* (*Hydrarg. iodid. rubr.* in pulv. subtilis., gr. xvj., *Unguent.*, ʒj. Rub together thoroughly until mixed. Ph. U. S., 1873.) Both these ointments may be applied to scrofulous and indolent ulcers.

Unguen'tum ex Hydrar'gyro mit'ius dic'tum Cine'reum, Unguentum oxydi hydrargyri cinereum.

Unguen'tum Hydrar'gyri Nitra'tis, *U. hydrargyri nitra'ti* seu *supernitra'tis hydrar'gyri* seu *hydrar'gyri compos'itum* seu *mercuria'lē cit'rinum* seu *cit'rinum ad sca'biem, Bal'samum mercuria'lē, A'deps hydrar'gyri nitra'tē medica'tus, Oint'ment of Ni'trate of Mer'cury, Cit'rine Oint'ment*, (F.) *Onguent de nitrate de mercure, O. citrin contre la gale, Pommade citriné.* (*Hydrarg.*, ℥jss., *Acid. nitric.*, ℥iijss., *Adipis*, ℥xvjss. Dissolve the mercury in the acid, heat the lard in an earthen vessel, and when the temperature reaches 200°, remove it from the fire. Add the mercurial solution, and stir with a wooden spatula as long as effervescence continues, and afterwards occasionally until the ointment stiffens. Ph. U. S., 1873.)

In the Ph. B. (1867) the ingredients are: *Mercury*, ℥iv., *Nitric acid*, f℥xij., *Prepared lard*, ℥xv., *Olive oil*, f℥xxxij.

A milder ointment, *Unguentum nitra'tis hydrar'gyri mit''ius*, is made with triple the quantity of oil and lard. It is stimulant and detergent, and is much used as an application to herpes, porrigo, and cutaneous eruptions. The weaker ointment is sometimes used in ophthalmia tarsi, &c.

Unguen'tum Hydrar'gyri Ni'tricoöx'idi, *U. subnitra'tis hydrar'gyri* seu *Ox'ydi hydrar'gyri ru'bri, U. H. ox'idi ru'bri*, (Ph. U. S., 1873,) *U. deutox'ydi hydrarg. nitra'ti* seu *hydrargyri ru'bri* seu *ex hydrar'gyro oxyda'to ru'bro* seu *mercu'rii ru'brum* seu *ophthal'micum ru'brum* seu *subnitra'tis hydrargyr'ici, Bal'samum ophthal'micum ru'brum, Oint'ment of Ni'tric* or *Red Ox'ide of Mer'cury, Red Precip'itate Oint'ment, Gold'en Oint'ment, Sin'gleton's Eye Salve*, (F.) *Pommade de Lyon, P. d'Oxide Rouge de Mercure.* (*Hydrarg. oxid. rubr.* in pulv. subtiliss., ʒj., *Unguent.*, gr. ccccxx. Rub the oxide of mercury with the ointment, gradually added, until they are thoroughly mixed. Ph. U. S., 1873.)

In the Ph. B. (1867) it is made by mixing *Red oxide of mercury*, in very fine powder, gr. 62, with *Yellow wax*, ʒ¼, and *Oil of almonds*, ʒ¾.

Stimulant and escharotic. Applied to foul ulcers, to inflammation of the tarsi, &c.

Belleville's Ce'rate, which has been long used in cases of scalled head, and of chronic cutaneous diseases in general, is made as follows: *Plumbi acet.*, ʒj., *Hydrarg. oxyd. rubr.*, ʒss., *Hyd. chlorid. mit.*, ʒij., *Ceræ albæ*, ʒiv., *Ol. oliv.*, ʒvj. Melt the last two, and add the others in fine powder.

Unguen'tum Hydrar'gyri Ox'idi Fla'vi, *Ointment of Yellow Oxide of Mercury.* (*Hydrarg. Oxidi Flav.* in pulv. subtiliss., gr. lx., *Unguent.*, gr. ccccxx. Rub together until thoroughly mixed. Ph. U. S., 1873.) The oxide is perfectly amorphous, without any crystalline grains, and is therefore adapted for application to the conjunctiva.

Unguen'tum Hydrar'gyri Ox'idi Ru'bri, Unguentum hydrargyri nitricoöxydi — u. ex Hydrargyro oxydato rubro, Unguentum hydrargyri nitricoöxydi.

Unguen'tum Hydrar'gyri Præcipita'ti Al'bi, *U. Hydrar'gyri ammonia'ti* (Ph. U. S.) seu *submuria'tis hydrargyri ammonia'ti* seu *ammo'niochlo'ridi* seu *antispor'icum Werlhofii* seu *ad sca'biem Zelleri* seu *mercuria'lē album* seu *mundif'icans Zelleri* seu *e mercu'rio præcipita'to* seu *calcis hydrar'gyri albæ, Ointment of white precipitate, O. of ammo'niated mer'cury.* (*Hydrarg. ammon.*, gr. xl., *Ung.*, ʒj. Rub together until mixed. Ph. U. S., 1873.) Detergent. Used in cutaneous eruptions, to destroy vermin, &c.

Unguen'tum Hydrar'gyri Ru'bri, U. hydrargyri nitricoöxydi — u. Hydrargyri subchloridi, U. calomelanos — u. Hydrargyri submuriatis ammoniati, U. hydrargyri præcipitati albi — u. Hydrargyri subnitratis, U. hydrargyri nitricoöxydi — u. Hydrargyri supernitratis, U. hydrargyri nitratis — u. Hydrargyrici subnitratis, U. hydrargyri nitricoöxydi — u. Infusi meloës vesicatorii, U. lyttæ — u. Iodi, see Unguentum iodinii.

Unguen'tum Io'dini, *U. Iodin'ii*, (Ph. U. S.,) *Oint'ment of Iodine, Io'dine Oint'ment.* (*Iodin.*, ʒj., *Potass. iodid.*, gr. iv., *Aquæ*, ♏vj., *Adipis*, ʒj. Rub the iodine and iodide first with the water and then with the lard until mixed. Ph. U. S., 1873.) Used as a local application to goitrous and other swellings.

Unguen'tum I'odi (Ph. B., 1867) is composed of *Iodin.*, gr. xxxij., *Potass. iodid.*, gr. xxxij., *Spirit. tenuior.*, f℥j., *Adeps præparat.*, ℥ij.

Unguen'tum Io'dini Compos'itum, *U. Iodin'ii compos'itum*, (Ph. U. S.,) *Com'pound Oint'ment of Iodine.* (*Iodin.*, gr. xv., *Potassii iodid.*, gr. xxx., *Aq.*, ♏xxx., *Adipis*, ʒj. Rub the iodine and

iodide first with the water and then with the lard until they are thoroughly mixed. Ph. U. S., 1873.)

Unguen'tum Iodin'ii, U. iodini — u. Irritans, U. lyttæ.

Unguen'tum Lauri'num, *O'leum lauri'num, Adeps lauro medica'tus, Bay Ointment,* (F.) *Onguent ou Huile ou Pommade de laurier.* (*Fol. lauri,* 500 p., *Adip. suilli,* 1000 p. Bruise in a marble mortar; evaporate all humidity by boiling; and add *Bay berries,* in powder, 500 p. Digest and pass through linen. Ph. P.) Reputed to be corroborant and nervine. It is simply emollient.

Unguen'tum Leniti'vum, U. de althææ — u. Liliaceum, Crinomyron — u. Lithargyri, Unguentum diachyli albi.

Unguen'tum Lyt'tæ, *Unguen'tum canthar'idis* seu *vesicato'rium* seu *irri'tans* seu *ad vesica'ta* seu *infu'si mel'oës vēsicato'rii* seu *epispas'ticum mit''ius, Blis'tering Salve, Oint'ment of Spanish Flies, Oint'ment of Infu'sion of Spanish Flies, Milder Blistering Ointment.* (*Cerat. cantharidis,* gr. cxx., *Cerat. resin.,* gr. cccxl. Mix thoroughly. Ph. U. S., 1873.) It is stimulant and epispastic, and is chiefly used for keeping up the discharge from a blistered surface.

Unguen'tum Lyt'tæ Medica'tum, *Adeps cantharid'ibus medica'tus, Poma'tum* seu *Unguen'tum epispas'ticum vir'idē stim'ulans ac'ribus, Green Blis'tering Oint'ment,* (F.) *Pommade épispastique verte.* (*Pomati* seu *unguenti cantharid.,* 64 p., *Unguent. populei,* 168 p., *Ceræ albæ,* 256 p., *Cupri acetat., Ext. opii,* āā 24 p. Melt the unguentum populeum and wax, and add as they cool the oxide of copper, cantharides, and opium. Ph. P.) Use, same as the last.

Unguen'tum Lyt'tæ Medica'tum A'liud, *Adeps cantharid'ibus medica'tus a'lius, Poma'tum epispas'ticum fla'vum et mit''ius, Yellow Blistering Ointment,* (F.) *Pommade épispastique jaune.* (*Pulv. cantharid.,* 120 p., *Adip. præp.,* 1680 p., *Aquæ,* 250 p. Melt the lard, mix the cantharides, and add the water at the same time; place the whole on a gentle fire, stir continually for two hours, and add a little water to replace that which has been evaporated. Pass through linen and strain. Keep it in a water-bath, and add powdered *Turmeric,* 8 p. Let it cool till the superfluous liquid separates, pour off, and add *Yellow wax,* 250 p., *Oil of lemon,* 8 p. Ph. P.) A complex preparation. Use, same as the last.

An ointment, not very philosophically combined, was used by Dr. Physick, which is known by the name of "*Dr. Physick's Issue Ointment.*" It is made by boiling half an ounce of powdered *Cantharides* in two ounces of *Rose-water,* and evaporating until one-half of the fluid is driven off, having previously added 15 grains of *Tartar emetic.* The decoction is to be strained, and three ounces of *Olive oil,* an ounce and a half of *White wax,* and one ounce of *Spermaceti* added to it, and the mixture then boiled till all the water is evaporated.

Unguen'tum Melan'icum Caus'ticum, Causticum Æthiopicum.

Unguen'tum Mercuria'lē, Unguentum hydrargyri — u. Mercuriale album, Unguentum hydrargyri præcipitati albi — u. Mercuriale citrinum, Unguentum hydrargyri nitratis — u. e Mercurio præcipitato, Unguentum hydrargyri præcipitati albi — u. Mercurii rubrum, Unguentum hydrargyri nitricoöxidi.

Unguen'tum Meze'rei, *Oint'ment of Meze'reon, Mezereon Ointment.* (*Extract. mezerei fluid.,* f℥iv., *Adipis,* ℥xiv., *Ceræ flav.,* ℥ij. Melt the lard and wax together at a moderate heat, add the extract, and stir until the alcohol has evaporated. Stir while cooling. Ph. U. S., 1873.) To keep open blisters, issues, &c.

Unguen'tum Mundif'icans Zelle'ri, Unguentum hydrargyri præcipitati albi.

Unguen'tum Muria'tis Hydrar'gyri Oxygena'to Medica'tum, *Adeps muria'tē hydrar'gyri oxygena'to medica'tus, Cyril'lo's Ointment,* (F.) *Pommade de Cyrillo.* (*Hydrarg. oxymur.,* 4 p., *Adipis suilli præp.,* 32 p. Ph. P.) Antivenereal and alterative. Used in friction, ℥ss. at a time.

Unguen'tum Nardi'num, see Nardus Indica — u. Neapolitanum, Unguentum hydrargyri — u. Nervinum, Unguentum sambuci — u. Nitricum seu oxygenatum, Unguentum acidi nitrosi — u. Nutritum, Unguentum plumbi superacetatis.

Unguen'tum Ophthal'micum, *Adeps hydrargyri oxido ru'bro et plum'bi aceta'tē medica'tus, Regent's pommade ophthalmique,* (F.) *Pommade ophthalmique.* (*Butyr. recent. Aq. rosar. lavat.,* p. 68, *Camphor.,* p. 0·3, *Oxyd. hydrarg. rubr., Acetatis plumbi,* āā p. 4. Mix intimately. Ph. P.) In chronic inflammation of the conjunctiva or tarsi.

Unguen'tum Ophthal'micum, Unguentum oxidi zinci impuri — u. Ophthalmicum rubrum, Unguentum hydrargyri nitricoöxydi.

Unguen'tum O'pii, *Ointment of O'pium.* (*Opii* pulv., ℈j., *Adipis,* ℥j. M. Ph. L.) To be used where the local application of opium by inunction is needed.

Unguen'tum Ox'idi Hydrar'gyri Cine'rei, *A'deps* seu *Unguen'tum ex hydrar'gyro mit''ius dic'tum cine'reum, Ointment of gray oxide of mercury,* (F.) *Onguent gris.* (*Oxyd. hydrarg. ciner.,* p. j., *Adipis suilli,* p. iij. Ph. E.) Properties, like the mercurial ointment. It is not much used.

Unguen'tum Ox'idi Plum'bi Al'bi, *U. cerus'sæ* seu *al'bum, Oint'ment of white ox'ide of lead, White oint'ment.* (*Ung. simplicis,* p. v.; *Oxyd. plumb. alb.,* p. j. Ph.E. and P.) Cooling and desiccative. Applied to excoriated and burnt surfaces.

Unguen'tum Ox'idi Plum'bi Carbona'ti, U. Plumbi subcarbonatis — u. Oxidi zinci, Unguentum zinci.

Unguen'tum Ox'idi Zin'ci Impu'ri, *U. tu'tiæ* seu *ophthal'micum* seu *diapomphol'ygos, A'deps ox'ido zin'ci medica'tus, Eye'salve, Tut'ty oint'ment, Oint'ment of impure ox'ide of zinc.* (*Linim. simpl.,* p. v.; *Oxyd. zinc. impur. præp.,* p. j. Ph. E.) Generally used in ophthalmia tarsi and atonic ophthalmia.

Unguen'tum Pi'cis Liq'uidæ, *U. Pi'cis* seu *e Pi'cē, Tar Oint'ment.* (*Picis liquid., Sevi,* sing., ℔j. Melt, strain, and stir till cold. Ph. U. S., 1873.) In the Ph. B. (1867) it is made of *tar,* ℥v., and *yellow wax,* ℥ij. Stimulant and detergent. Used in tinea capitis, and other cutaneous eruptions.

Unguen'tum Pi'cis Ni'græ, Unguentum resinæ nigræ — u. Plumbi acetatis, Ceratum plumbi superacetatis — u. Plumbi carbonatis, Unguentum plumbi subcarbonatis.

Unguen'tum Plum'bi Compos'itum, *Com'pound Oint'ment of Lead.* (*Emp. plumbi,* ℔iij., *Ol. oliv.,* f℥xviij., *Cret. præpar.,* ℥vj., *Acid. acet. dil.,* f℥vj. Dissolve the plaster in the oil with a slow fire; then add the chalk, and afterwards the acid, constantly stirring until they become cold. Ph. L.) Used as a dressing to flabby, indolent ulcers.

Unguen'tum Plum'bi Io'didi, *Oint'ment of I'odide of Lead,* (F.) *Pommade d'Iodure de Plomb.* (*Plumb. iodid.* in pulv. subtiliss., gr. lx., *Unguent.,* gr. cccxx. Ph. U. S., 1873.) In the Ph. B. (1867) it is made by mixing thoroughly *Iodide of lead,* in fine powder, gr. lxij., with *Simple ointment,* ℥j. Used as a eutrophic in chronic, glandular, and other swellings.

Unguen'tum Plum'bi Ox'idi Carbona'ti, Unguentum plumbi subcarbonatis.

Unguen'tum Plum'bi Subaceta'tis Compos'itum. The Ph. B. (1867) has a formula for the preparation of this ointment somewhat different from the *Ceratum Plumbi Subacetatis.* The ingredients are *Solution of subacetate of lead,* f℥vj., *Camphor,* gr. lx., *White wax,* ℥viij., and *Oil of Almonds,* 0j.

Unguen'tum Plum'bi Subcarbona'tis, *U. plum'bi carbona'tis* (Ph. U. S., 1873) seu *al'bum* seu *al'bum sim'plex* seu *carbona'tis plum'bici* seu *cerus'sæ* seu *oxi'di plum'bi carbona'ti, Cera'tum de cerus'sâ, Ointment of carbonate of lead,* (F.) *Pommade de Carbonate de Plomb, Onguent blanc de Rhazes, O. de Céruse, O. de Tornamira.* (*Plumbi carbonat.* in pulv. subtiliss., gr. lx., *Unguent.*, gr. cccexx. Rub together until thoroughly mixed. Ph. U. S., 1873.) In the Ph. B. (1867) it is made by mixing thoroughly *Carbonate of lead,* in fine powder, gr. lxij., with *simple ointment,* ℥j. Chiefly used as a dressing for burns.

Unguen'tum Plum'bi Superaceta'tis, *U. aceta'tis plum'bi* seu *saturni'num* seu *nutri'tum* seu *cerus'sæ aceta'tæ, Bal'samum universa'lē, Oint'ment of sugar* or *acetate of lead, Sat'urnine oint'ment.* (*Acetate of lead,* in fine powder, gr. xij., *Benzoated lard,* ℥j. Mix thoroughly. Ph. B., 1867.) Cooling, desiccative. Called, also, *Bal'samum saturni'num, Buty'rum satur'ni, Linimen'tum plumba'tum, Poma'tum satur'ni, Ung. triphar'macum.*

Unguen'tum Plum'bici Carbona'tis, Unguentum plumbi subcarbonatis.

Unguen'tum Popule'um, *A'deps papav'erē, hyoscy'amo et belladon'nâ medica'tus,* (F.) *Pommade* ou *Onguent Populéum.* (Fresh buds of the *Populus nigra,* 500 p., macerated in *Adeps suillus præp.* melted, 1500 p., for 24 hours. Preserve this. Take *Black poppy leaves, Belladonna, Hyoscyamus, Black nightshade,* āā 128 p.; bruise in a mortar with the former preparation; boil until all the humidity is evaporated, and strain. Ph. P.) Anodyne. Applied to local inflammations, hemorrhoids, sore nipples, cancer, &c. Green elder ointment is often sold for this. See also Populus.

Unguen'tum Potas'sæ Hydrioda'tis, *U. potas'sii io'didi,* (Ph.U. S.,) *Oint'ment of hydri'odate of potassa, O. of iodide of potassium,* (F.) *Pommade d'Iodure de Potassium.* (*Potassii Iodid.* in pulv. subtiliss., gr. lx., *Aquæ,* f℥ss., *Adipis,* gr. cccexx. Dissolve the iodide in the water boiling hot, in a warm mortar, add the lard gradually, and thoroughly mix. Ph. U. S., 1873.)

In the Ph. B. (1867) it is made by mixing *Iodide of potassium,* gr. lxiv., *Carbonate of potash,* gr. iv., *Distilled water,* f℥j., *Prepared lard,* ℥j. — Half a drachm of this ointment is rubbed on scrofulous glands, goître, &c.

Unguen'tum Potas'sæ Sulphura'tæ, *Oint'ment of Sul'phurated Pot'ash.* (*Potassæ sulphurat.,* gr. xxx., *Adipis Præparat.,* ℥j. Rub together. Ph. B., 1867.)

Unguen'tum Potas'sii Io'didi, Unguentum potassæ hydriodatis — u. Pulveris meloës vesicatorii, Cerate of cantharides.

Unguen'tum Resi'næ. (*Resin.,* ℥viij., *Ceræ flavæ,* ℥iv., *Unguent. simpl.,* ℥xvj. Melt with a gentle heat, strain the mixture while hot, through flannel, and stir constantly while it cools. Ph. B., 1867.) It is the Ceratum resinæ, Ph. L.

Unguen'tum Resi'næ Fla'væ, Ceratum resinæ flavæ.

Unguen'tum Resi'næ Ni'græ. *U. resi'næ ni'grum* seu *basil'icon ni'grum* seu *Pi'cis ni'græ* seu *Pi'cis tetraphar'macum, Black basil'icon, Black res'in oint'ment, Oint'ment of pitch, Oint'ment of black pitch.* (*Resin. nigr., Ceræ flavæ, Resinæ flav.,* āā ℥ix., *Olei olivæ,* Oj. Ph. L.) Uses, the same as those of *Ceratum resinæ* or *Yellow basilicon.*

Unguen'tum Resi'næ Pi'ni Sylves'tris Compos'itum, Unguentum de althæâ — u. Resinosum, Ceratum resinæ flavæ — u. Resumptivum, Unguentum de althæâ — u. Sabinæ, Ceratum sabinæ.

Unguen'tum Sambu'ci, *U. sambuci'num* seu *nervi'num, Green oint'ment, El'der oint'ment,* (F.) *Onguent de sureau.* (*Sambuci flor.,* ℔ij., *Adipis præp.,* ℔ij. Boil. Ph. L.) Emollient.

Unguen'tum Saturni'num, Unguentum plumbi superacetatis — u. ad Scabiem Zelleri, Unguentum hydrargyri præcipitati albi — u. Simplex, Ceratum Galeni, Unguentum ceræ — u. Solidum de cicutâ, Emplastrum cicutæ — u. Spermatis ceti, Unguentum cetacei.

Unguen'tum Stramo'nii, *Oint'ment of Stramo'nium, Stramo'nium Oint'ment.* (*Ext. stramon.,* ℥j., *Aq.,* f℥ss., *Adipis,* gr. cccexx. Rub the extract with water until uniformly soft, and then add the lard. Ph. U. S., 1873.) An anodyne ointment to irritable ulcers, hemorrhoids, &c.

Unguen'tum Subaceta'tis Cu'pri, *U. cu'pri subaceta'tis* seu *deter'gens* seu *basil'icum vir'idē* seu *æru'ginis, Bal'samum* seu *Cera'tum* seu *Unguen'tum vir'idē, Oint'ment of subac"etate of cop'per, Ver'digris oint'ment.* (*Cupri subacet.* in pulv. subtiliss., ℥j., *Ung. simpl.,* ℥xv. Add the subacetate to the ointment previously melted with a moderate heat, and stir till cold.) Detergent and escharotic.

Unguen'tum Sulphura'tum ad Sca'biem, *A'deps sul'phurē et ammo'niæ muria'tē medica'tus.* (*Adipis,* 120 p., *Sulph. lot.,* 60 p., *Ammoniæ muriat., Aluminæ sulphat.,* āā 4 p.; fiat unguentum. Ph. P.) Antipsoric.

Bail'ey's Itch Oint'ment is composed of *olive oil, lard, nitre, alum, sulphate of zinc,* and *cinnabar;* scented with *oil of aniseed, oil of origanum,* and *oil of spike,* and colored with *alkanet root.*

Unguen'tum Sulphura'tum Alcali'num ad Sca'biem, *A'deps sul'phurē et carbona'tē potas'sæ medica'tus, Hel'merich's Al'caline Sulphura'ted Itch Oint'ment,* (F.) *Pommade antipsorique de Helmerich, Pommade de Helmerich.* (*Adip. præp.,* 800 p., *Sulphur. lot.,* 200 p., *Carbonat. potass. pur.,* 100 p.; fiat ung. Ph. P.) Use, same as the last.

Bate'man's Itch Oint'ment resembles this. It is colored with *cinnabar,* and scented with *essence of bergamot.*

Unguen'tum Sul'phuris. *U. e sul'phurē, Sulphur. oint'ment.* (*Sulph.,* ℥j., *Adip.,* ℥ij. Ph. U. S., 1873. Rub together until thoroughly mixed.—In the Ph. B. (1867) *Sulphur,* ℥j., *Lard,* ℥iv.) Used chiefly in itch, and some herpetic affections.

Unguen'tum Sul'phuris Compos'itum, *U. Antipso'ricum, Com'pound Sul'phur Oint'ment, Itch Oint'ment, Jack'son's Itch Oint'ment,* (F.) *Pommade Antipsorique de Jasser.* (*Sulph. sublim.,* ℔ss., *Veratri rad.* contus., ℥ij., *Potassæ nitrat.,* ℥j., *Saponis mollis,* ℔ss., *Adipis,* ℔jss., *Ol. bergamot.,* ♏xxx. Ph. L.) The Unguentum Sulphuris Compositum of the older Ph.U. S.was made as follows: — *Sulphur.,* ℥j., *Hydrargyri ammoniat., Acid. benzoic.,* āā ℥j., *Ol. bergamot., Acid. sulphuric.,* āā f℥j., *Potassæ nitrat.,* ℥ij., *Adipis,* ℔ss. To the melted lard add the other ingredients, and stir till cold. Use, the same as the last; but it is more stimulating.

Unguen'tum Sul'phuris Io'didi, *Oint'ment of Iodide of Sul'phur.* (*Sulphur. iodid.* in pulv. subtiliss., ℥ss., *Adipis,* ℥j. Rub the iodide with the lard gradually added until mixed. Ph. U. S., 1873.) In the Ph. B. (1867) it is made by rubbing together *Iodide of sulphur,* gr. xxx., and *Prepared lard,* ℥j. An excellent application in chronic cutaneous affections.

Unguen'tum Susi'num, Crinomyron.

Unguen'tum Taba'ci, *Tobac'co Oint'ment.* (*Tabac.* in pulv., ℥ss., *Adipis,* ℥viij., *Aquæ,* q. s. Moisten the tobacco with water, and, by percolation, pass water through it until four fluidounces are obtained. Evaporate to the consistence of a soft extract, and mix with the lard. Ph. U. S., 1873.) Applied to irritable ulcers, tinea capitis, &c.

Unguen'tum Tar'tari Emet'ici, U. antimonii — u. Tartari stibiati, U. antimonii — u. e Tartaro potassæ stibiati, U. antimonii — u. Tartratis potassæ stibiati, U. antimonii.

Unguen'tum Terebin'thinæ, *Oint'ment of Tur'pentine.* (*Oil of Turpentine,* f℥j., *Resin,* in coarse powder, gr. lx., *Yellow wax, Prepared lard,* āā ℥ss. Melt together. Ph. B., 1867.) Uses, the same as *Ceratum Resinæ* or *Yellow Basilicon.*

Unguen'tum de Terebin'thinâ et adip'ibus, U. clemi compositum — u. de Terebinthinâ et cerâ, U. de althææ — u. Terebinthinæ et ovorum vitelli, U. digestivum simplex—u. Tetrapharmacum, Basilicon, U. resinæ nigræ — u. Tripharmacum, U. plumbi superacetatis — u. Tutiæ, U. oxidi zinci impuri.

Unguen'tum Vera'tri, *U. Vera'tri al'bi* seu *helleb'ori al'bi, White helle'bore oint'ment.* (*Veratr.* pulv., ℥ij., *Adipis,* ℥viij., *Olei limon.,* ♏xx.) Used in cases of itch, where sulphur is objected to. It is not equally efficacious.

The principal ingredients in the Ointment of Veratrum, Ph. E., were *white hellebore* and *muriate of ammonia.*

Unguen'tum Vera'trinæ, *Oint'ment of Vera'tria, Vera'tria Oint'ment.* (*Veratr.,* gr. xx., *Adipis,* ℥j. Mix. Ph. U. S., 1873.) In the British Pharmacopœia (1867) it is directed to be made of *Veratria,* gr. viij., *Prepared lard,* ℥j., *Olive oil.,* f℥ss., well mixed together. To be rubbed on the part in neuralgic and other pains.

Unguen'tum ad Vesica'ta, U. lyttæ — u. ad Vesicatoria, Cerate of cantharides — u. Vesicatorium, Unguentum lyttæ — u. Viride, Unguentum subacetatis cupri.

Unguen'tum Zin'ci, *U. ox'idi zin'ci* seu *zin'ci ox'idi,* (Ph. U. S.,) *Zinc oint'ment, Oint'ment of Ox'ide of Zinc.* (*Zinci oxid.,* gr. lxxx., *Unguent. benzoin.,* gr. cccc.; mix. Ph. U. S., 1873.) In the Ph. B. (1867) it is made by adding *Oxide of Zinc,* gr. lxxx. to *Benzoated lard,* ℥j. Use, the same as that of the *Unguentum tutiæ.*

Unguen'tum Zin'ci Ox'idi, U. zinci.

Un'gues Adun'ci, 'hooked nails,' see Onychogryphosis.

Un'gues Fibro'si. A condition of the nails in which they appear to have a fibrous structure.

Un'guis, 'a nail,' Hippocampus minor, Nail, Onyx, Pterygion — u. Avis, Hippocampus minor — u. Halleri, Hippocampus minor—u. Involutus, Onyxis — u. Odoratus, Blatta bysantia.

Un'guis Os, *Os lacryma'lē, Lach'rymal bone.* A small, quadrilateral, very thin, and semitransparent bone, which has been compared to a human *nail,* and is situate at the anterior and inner part of the orbit. It aids in the formation of the lachrymal gutter and the nasal duct. It is articulated with the frontal, superior maxillary, ethmoid, and inferior spongy bones, and is developed by a single *punctum ossificationis.*

Un'gula Caballi'na, 'horse's hoof,' Tussilago.

Un'gulæ Palpebra'rum, 'hoofs of the eyelids,' see Tarsus.

Unhealth'y, Sickly.

U'nicornroot, Aletris farinosa, Chamælirium luteum.

Uniloc'ular, *Uniloculā'ris,* (*unus,* 'one,' and *loculus,* [diminutive of *locus,*] 'a cell.') Having one cell or cavity; as *biloc'ular* means having two cells or cavities; *multiloc'ular,* having many.

U'nio, gen. *Unio'nis,* Pearl.

Unioc'ulus, (*unus,* 'one,' and *oculus,* 'eye,') Cyclops, Monoculus.

U'nion by the First and Sec'ond Inten'tions, see Intention.

Unipa'riens, Uniparous.

Unip'arous, *Unipa'rient, Unipa'riens,* (*unus,* 'one,' and *pario,* 'I bring forth.') Producing one at a birth.

Unip'olar, (*unus,* 'one,' and *polus,* 'pole,') see Neurine.

Unise'ma Deltifo'lia, (*unus,* 'one,' and *semen,* 'seed' [?],) *Pontede'ria cordā'ta, Shovel Pick'erelweed, Pond Shovel, Shovelleaf, Water Plantain.* An indigenous plant, *Ord.* Pontederiaceæ, *Sex. Syst.* Hexandria Monogynia, which grows in water, and flowers from June to August. The root is emollient and astringent.

U'nit of Heat, see Heat.

Unitaires (Monstres) (F.), (from *unitas,* 'oneness.') A class of monsters in which are found only the complete or incomplete elements of a single individual; in contradistinction to *Componnd monsters,* (F.) *Monstres composés,* in which there are the complete or incomplete elements of more than one.

Unité de Chaleur, see Heat.

Uni'ting Ban'dage, (from *unire, unitum,* — *unus,* 'one,' — 'to join into one,') (F.) *Bandage unissant.* A bandage for bringing the edges of a wound into approximation. The arrangement of such a bandage differs according as the wound is transverse or longitudinal.

Univ'ocal Genera'tion, (*unus,* 'one,' and *vox,* gen. *vocis,* 'voice,') see Generation.

Unoc'ulus, (*unus,* 'one,' and *oculus,* 'eye,') Borgne, Cyclops, Monoculus.

Uno'na Folycar'pa, Cœlocline polycarpa.

Unor'ganized, Inorganic.

Un'striped Mus'cular Fi'bre, see Muscular fibre.

Un'well, see Indisposition. 'To be unwell,'— and, in Scotland, 'to alter,' — is, popularly, to menstruate.

U'pas. A word used in the Archipelagos of Molucca and Sunda, and signifying *Veg"etable Poi'son; I'po, Bo'hon, Po'hon,* or *Boa* or *Bo'on U'pas, Po'hon Antiar, Upas Antiar, Ants'jar.* A substance used by the natives of those places for poisoning their arrows. The smallest quantity is capable of destroying the largest animal. The tree which produces it is said to be the *Antia'ris* seu *Ipo Toxica'ria, Toxicaria Macassarien'sis.* Another species of upas, *U. Tieuté, Tshettik* or *Tjettek,* is the produce of a *Strychnos, S. Tienté. Upas antiar,* like corroval and vao, the South American arrow poisons, appears to kill by paralyzing the heart; while *U. tieuté* causes the most violent convulsions. Many idle stories are told regarding the upas tree, most of which are fabulous.

U'rachus, (*U'racus. Urinac'ulum, curon,* and ἐχω, 'I contain,') (F.) *Ouraque.* The urachus, in certain animals, is a long membranous canal, which arises from the bladder, makes its exit from the abdomen by the umbilicus, and terminates in the pouch called *allantois.* According to Sabatier, this is the arrangement of the urachus in the human fœtus; but Bichat and other anatomists consider, that when the canal exists in it, it is a malformation. They regard it as a kind of suspensory ligament of the bladder, *Ligamen'tum suspenso'rium u'rachi* seu *vesicæ,* extending from the top of that organ to the umbilicus; and, at the umbilicus, confounded with the abdominal aponeurosis.

Uracrati'a, (*uron, a,* priv., and κρατος, 'power,') Enuresis.

U'racus, Urachus.

Uræ'mia, *Urhæ'mia,* (F.) *Urémie, Uroémie,* (*uron,* and ἁιμα, 'blood.') A condition of the blood in which it contains, or is presumed to contain, urea, and to give rise to sundry morbid phenomena implicating the nervous centres more especially.

Uræ'mic, *Uræ'micus,* (F.) *Urémique.* Relating or appertaining to uræmia.

Ura'li, Curare.

U'rana, (from *uron,*) Ureter.

U'ranē, (*ουρανη,*) Urinal.

Ura'rin, Curarin.

Uranisconi'tis, (*uraniscus,* and *itis,*) *Palati'tis,* (F.) *Palatite.* Inflammation of the palate.

Uranis'coplas'ty, *Uraniscoplas'ticē,* (*uraniscus,*

and πλαστικος, 'forming.') The operation of engrafting in case of deficiency of the soft palate.

Uraniscorra'phia, (*uraniscus*, and ῥαφη, 'a suture,') Staphylorraphy.

Uranis'cus, (ουρανισκος, 'a round ceiling or canopy,') Palate.

U'ranoplasty, Staphyloplasty.

Uranorra'phia, Staphylorraphy.

U'ranus, (ουρανος, 'heaven,') Palate.

Uraposte'ma, gen. *Uraposte'matis, Absces'sus urino'sus* seu *urina'lis, Urœde'ma,* (*uron,* and αποστημα, 'an abscess.') A tumefaction produced by the escape of urine. An abscess containing urine.

Ura'ri, Curare.

U'ras, gen. *Ura'tis,* Urate.

U'rate, *U'ras, Lith'ate, Li'thas,* (from *uron.*) A generic name for salts, formed by the combination of uric or lithic acid with different bases. *U'rate* or *Lith'ate of So'da,* for example, is found in arthritic and certain urinary concretions; *U'rate* or *Lith'ate of Ammo'nia* in certain urinary deposits. The lateritious deposits are formed of amorphous urates. The *U'rate of Ammo'nia, Ammoniæ U'ras,* is used externally as an ointment in chronic cutaneous affections. The *Urate of Quinia,* a soluble yellow salt, has been employed in intermittents.

Ure'a or **U'rea,** *Ure'um, U'ren, Uren'ium, U'ricum, Mate'ria urino'sa, Princip'ium* seu *Sal urino'sum, Neph'rin,* (F.) *Urée,* (from *uron.*) A white, pearly, brilliant substance, in transparent plates, inodorous, and of a cool taste; very soluble in water; deliquescent, and soluble in alcohol. It exists, in great quantity, in the urine; and is an essential part of it. It has been used as a diuretic. Dose, gr. xv. to ℈j. *Nitrate of Urea* has been used in like cases, in doses of 2 to 10 grains in the day, in solution or in pill.

Ure'al or **U'real,** *Urea'lis.* Relating or appertaining to urea.

Urec'chysis, *Urech'ysis,* (*uron,* and εκχυσις, 'effusion.') Effusion of urine into the areolar membrane.

Ure'do, gen. *Ure'dinis,* (*urere,* 'to burn,') Urticaria.

Urée, Urea.

Ure'ma, gen. *Ure'matis,* (ουρημα,) Urine.

Urémie, Uræmia.

Urémique, Uræmic.

U'ren, Urea.

Uren'ium, Urea.

U'rens, (from *urere,* 'to burn,') Caustic.

Ureorrhœ'a, (*uron,* and ῥεω, 'I flow,') Diabetes.

Uresiæsthe'sis, (*uresis,* and αισθησις, 'feeling,') Diuresiæsthesis.

Ure'sis, (ουρησις,) Micturition.

Ure'ter, gen. *Urete'ris,* (ουρητηρ,) *U'rana, Ve'na al'ba re'num, Cana'lis ner'veus fistulo'sus re'num, Duc'tus* seu *Duc'tor Uri'næ, Vas urina'rium,* (F.) *Urétère.* A long, excretory canal — membranous and cylindrical — which conveys the urine from the kidney to the bladder. It extends, obliquely, between the pelvis of the kidney, with which it is continuous, and the *bas-fond* of the bladder, into which it opens. It enters at the posterior and inferior part, for some distance between the coats, and opens into the cavity of the bladder, at the posterior angle of the *Trigone vésical.* The ureter is formed of an exterior, white, opaque, and fibrous membrane; and of an inner, which is mucous.

Ureteral'gia, (*ureter,* and αλγος, 'pain.') Pain in the course of the ureter, — as from calculus, *Ureteral'gia calculo'sa.*

Ureteral'gia Calculo'sa, see Ureteralgia — a. Inflammatoria, Ureteritis.

Urétère, Ureter.

Ureter'icus, (from *ureter.*) An epithet for ischury, &c., arising from an affection of the ureter.

Ureteri'tis, gen. *Ureteri'tidis, Ureteral'gia inflammato'ria, Ureterophlegma'sia,* (*ureter,* and *itis.*) Inflammation of the ureter; generally caused by calculus.

Ureterolith'icus, (*ureter,* and λιθος, 'a stone.') An epithet applied to ischury or other affection caused by a stone in the ureter.

Ureterol'ithus. (Same etymon.) Calculus in the ureter.

Ureterophlegma'sia, (*ureter,* and *phlegmasia,* 'inflammation,') Ureteritis.

Ureterophlegmat'icus, (*ureter,* and φλεγμα, 'phlegm or mucus.') Any affection caused by mucus accumulated in the ureter.

Ureteropy'icus, (*ureter,* and πυον, 'pus.') An epithet applied to affections caused by the presence of pus in the ureter.

Ureterorrhag''ia, (*ureter,* and ῥαγη, 'rupture.') Hemorrhage from the ureter.

Ureterostomat'icus, (*ureter,* and στομα, 'orifice.') That which is dependent upon obstruction of the orifice of the ureter.

Ureterothromboï'des, (*ureter,* θρομβος, 'grumous blood,' and ειδος, 'resemblance.') Ischury from grumous blood in the ureter.

Ure'thra, (ουρηθρα, from ουρεω, 'I pass the urine,') *Cana'lis* seu *Mea'tus* seu *Duc'tus urina'rius, U'rias, Ure'tra, Fis'tula urina'ria, I'ter urina'rium* seu *uri'næ,* (F.) *Urèthre, Urètre.* The excretory ducts for the urine in both sexes; and for the sperm in man. In the latter, it is 8 or 10 inches long; and extends from the neck of the bladder, *os'tium vesica'lē,* to the extremity of the penis, in which its external aperture, *os'tium cuta'neum,* is situate. In the male urethra, three portions are distinguished: 1. A *prostat'ic por'tion, Pars prostat'ica,* near the bladder, about an inch and a quarter in length, which traverses the prostate gland. 2. A *mem'branous por'tion, Isth'mus ure'thræ, Pars ure'thræ membrana'cea, Pars muscula'ris* seu *interfascia'lis* seu *pelvi'na* seu *nu'da,* (F.) *Portion symphysaire,* from 8 to 10 lines long, which is separated from the rectum by the areolar tissue only. 3. A *spon'gy por'tion, Pars spongio'sa* seu *carernosa,* (F.) *Portion spongiovasculaire,* which expands, anteriorly, to form the glans, and which commences at the *bulb of the urethra.* See Corpus spongiosum urethræ. Before opening externally, the canal has a dilatation, called the *Fos'sa* seu *Fo'vea* seu *Fossic'ula navicula'ris* seu *Morgagn'ii.* On the interior of the urethra two white lines are perceptible — the one above, the other below. The latter commences at the *verumontanum;* and at the surface of this, the *ejaculatory ducts* and *prostatic ducts* open. The urethra is lined, in its whole extent, by a mucous membrane; on which are seen, particularly at the bulb, the orifices of a number of follicular ducts, *Lacu'næ* or *Si'nuses* or *Foram'ina of Morgagn'i, Si'nus muco'si,* (F.) *Lacunes de Morgagni,* proceeding from or constituting the *Glands of Morgagni* or of *Littre,* (F.) *Glandes de Morgagni* ou *de Littre, Glandulæ Littria'næ.* At about an inch and a half from the opening of the meatus, one of these lacunæ is generally found, much larger than the rest, and is named *Lacu'na mag'na.* The arteries of the urethra are numerous, and proceed from the internal pudic, — the largest branches entering the bulb. The veins follow the course of the arteries. The lymphatics pass into the inguinal and hypogastric plexuses. The nerves come from the pudic and gluteal. In the *female,* the urethra is only about an inch long. It is wider than in man, and susceptible of great dilatation. It is very wide at its commencement; and descends obliquely forwards, to terminate at the top of the external aperture of the vagina by the *mea'tus urina'rius, os'tium vagina'lē ure'thræ.* In its course, it is slightly curved, the concavity being forwards.

Ure'thra, Blind Ducts of the, see Cæcus —

u. Mucous lacunæ of the, see Cæcus—u. Stricture of the, Urethrostenosis.

Ure'thra, Vas'cular Tu'mor of, *Ure'thral Hem'orrhoid* or *Pol'ypus*. A small scarlet, extremely sensitive, spongy vegetation at the opening of the female urethra. See Hæmorrhoïs.

Ure'thral or **U'rethral**, *Urethra'lis, Ure'thrieus*. Relating to the urethra.

Ure'thral Fe'ver, Fever, urethral — u. Hemorrhoids, Urethra, vascular tumor of — u. Polypus, Urethra, vascular tumor of — u. Rheumatism, Rheumatism, urethral.

Urethral'gia, (*urethra*, and *αλγος*, 'pain.') Pain in the urethra; Gonorrhœa.

Urèthre, Urethra.

Urethremphrax'is, Urethrophraxis.

Urethri'tis, (*urethra*, and *itis*.) Inflammation of the urethra; Gonorrhœa.

Ure'throblennorrhœ'a, (*urethra*, *βλεννα*, 'mucus,' and *ῥεω*, 'I flow.') Gonorrhœa; gleet.

Ure'throce'lē, (*urethra*, and *κηλη*, 'tumor,') *Ure'throcele*. A thickening of the cellular tissue surrounding the female urethra, having the appearance of a tumor, and leading at times to ulceration and vesical catarrh.

Ure'throcystauch'enotom'ia, (*urethro, cystauchen*, 'neck of the bladder,' and *τεμνειν*, 'to cut,') see Lithotomy.

Ure'throcys'teoäneurys'matotom'ia, (*urethra*, *κυστις*, 'the bladder,' *ανευρυσμα*, 'dilatation,' and *τεμνειν*, 'to cut,') see Lithotomy.

Ure'throcys'teotrache'lotom'ia, (*urethra*, *κυστις*, 'the bladder,' *τραχηλος*, 'neck,' and *τεμνειν*, 'to cut,') see Lithotomy.

Ure'throhæmorrhag'ia, (*urethra*, *αιμα*, 'blood,' and *ῥηγνυμι*, 'I break forth,') Urethrorrhagia.

Urethrophrax'is, *Urethremphrax'is*, (*urethra*, and *φρασσω*, 'I obstruct.') Obstruction of the urethra.

Ure'throplas'tic, *Ure'throplas'ticus*, (*urethra*, and *πλασσω*, 'I form.') An epithet given to the operation, *Ure'throplasty*, which supplies defects in the canal of the urethra.

Ure'throplasty, see Urethroplastic.

Urethror'aphy, Urethrorrhaphy.

Urethrorrhag''ia, *Urethrohæmorrhag''ia, Caulorrha'gia* seu *Hæmatu'ria stillatit''ia*, (*urethra*, and *ῥηγνυμι*, 'I break out.') Hemorrhage from the urethra.

Urethror'rhaphy, *Urethrorrhaph'ia, Urethroraphy*, (*urethra*, and *ῥαφη*, 'a suture,') 'suture of the urethra.' The operation of closing a urethral fistula by suture.

Urethrorrhœ'a, (*urethra*, and *ῥεω*, 'I flow.') A discharge of any kind from the urethra.

Ure'throscope, *Urethroscop'ium*, (*urethra*, and *σκοπεω*, 'I examine.') An instrument on the principle of the ophthalmoscope, laryngoscope, &c., for inspecting the interior of the urethra.

Ure'throscopy, (F.) *Uréthroscopie*. Inspection of the interior of the urethra.

Ure'throsteno'sis, *Strictu'ra urethræ, Urosteno'sis, Urethrosten'ia*, (F.) *Uréthrosténie, Rétrécissement de l'Urèthre*, (*urethra*, and *στενωσις*, 'narrowness.') Stricture of the urethra. This may be *spasmodic*, or *organic*, requiring dilatation or cutting. Organic stricture is caused by the contraction of inflammatory deposit upon, within, or beneath the mucous membrane, or of the cicatrix of a ruptured or injured urethra; the former being *simple organic stricture*, the latter *traumatic* or *cicatricial stricture*. Other varieties are described according to the nature of the obstruction, as *whipcord, ring, bridle* and *ribbon strictures*.

Ure'throtome, *Urethrot'omus*, (F.) *Uréthrotome*, (*urethra*, and *τεμνω*, 'I cut.') An instrument so called by Le Cat, with which he divided the skin and urethra, in lithotomy. An instrument for dividing strictures of the urethra.

Urethrot'omy, *Urethrotom'ia, Stricturot'omy*. An operation, which consists in opening the urethra with the *Urethrotome*, for the removal of stricture. See Boutonnière.

Ure'throvag''inal. Relating to the urethra and vagina, as *Urethrovaginal fistula*.

Urethrymeno'des, (*urethra*, *ὑμην*, 'a membrane,' and *odes*.) That which is caused by a membrane formed in the urethra.

Uret'ics, (from *uron*.) Medicines which influence the urinary secretion.

Ure'ticus, (*ουρητικος*,) Diuretic, Urinary.

Ure'tra, Urethra.

Urètre, Urethra.

Ure'tris, gen. *Ure'tridis*, (*ουρητρις*,) Urinal.

Ure'um, Urea.

Urgin'ea Scil'la, Scilla.

Urhæ'mia, Uræmia.

Uriage, Min'eral Wa'ters of. Sulphurous springs in the department of Isère, France.

U'rias, gen. *Uri'adis*, (from *uron*,) Fistula (urinary), Urethra.

Uri'asis, (from *uron*,) Lithia, Uresis.

U'ric Ac''id, *Ac''idum u'ricum* seu *urolith'icum* seu *lith'icum, Lith'ic, Uryl'ic, Cal'culous, Bezoärdic, Lithia'sic* or *Lithen'ic Acid*, (F.) *Acide urique* ou *lithique* ou *lithénique* ou *lithiasique* ou *de l'urine*. An acid which exists in human urine, chiefly, if not wholly, in the form of urate of soda or urate of ammonia, and which in combination constitutes the greater part of urinary calculi. It is very sparingly soluble, and often deposited in combination from the urine in health. See Calculi.

U'ric Ox'ide, *Ox'idum u'ricum, Xan'thic ox'ide, Xan'thine, U'rous ac''id*. A substance not discovered in healthy urine, although probably bearing some relation to the yellow coloring matter. It is a very rare ingredient of calculous concretions, whose history is little known.

Uricæ'mia, (*uric* [*acid*], and *αιμα*, 'blood.') A term proposed by Professor Flint for the condition of the blood in which there is presumed to be an excess of uric acid.

U'ricum, Urea.

U'ricus, (from *uron*,) Urinary.

Uridro'sis, (*uron*, and *ἱδρως*, 'sweat.') Urinous sweating, (F.) *Sueur urineuse*.

Uri'na, Urine — u. Cerebella, see Cerebella — u. Chyli, see Urine — u. Cibi, see Urine — u. Diabetica, Urine, diabetic—u. Febrilis, Urine, febrile —u. Furfuracea, see Furfuraceous—u. Galactodes, see Galactodes — u. Genitalis, Sperm — u. Jumentosa seu Jumentaria, Urine, jumentous — u. Mucosa, Cystirrhœa — u. Nephelodes, see Nepheloid — u. Uroboides seu Orobodes, see Oroboides — u. Pericardii, see Pericardium — u. Potûs, see Urine — u. Sanguinis, see Urine — u. Vaccæ, Urine, cows'.

Urinac'ulum, Urachus, Urinal.

Uri'næ Profu'vium, 'a flux of urine,' Diabetes—u. Stillicidium, Strangury—u. Substillum, Strangury — u. Suppressio, Ischuria.

Urinaire, Urinary.

U'rinal, *Urinato'rium, Chernib'ium, U'ranē, Ure'tris, Urinac'ulum, Urodochi'um, Urod'ochē, Urodoche'um, Matra'cium, Mat'ula, Matel'la*, (from *urina*.) A name given — 1. To certain vessels, used to pass the urine into. 2. To reservoirs, of different shapes and character, which are adapted to the penis, in cases of incontinence of urine, and which are intended to receive the urine as it flows off.

Urina'lis, Diuretic, Urinary.

Urina'ria, Antirhinum linaria, Leontodon taraxacum.

U'rinary, *Urina'rius, Urina'lis, Urino'sus, U'ricus, Uret'icus*, (F.) *Urinaire*, (from *urina*.) That which relates to the urine.

U'rinary Appara'tus, Urinary organs.

U'rinary Blad'der, the *Blad'der, Vesi'ca Urina'ria, Cys'tis, Urocys'tis*, (F.) *Vessie*. A musculomembranous reservoir, intended for the

reception of the urine, until the accumulation of a certain quantity solicits its excretion. The bladder is situate in the hypogastric region, between the rectum and pubis in man, and between the pubis and vagina in the female. Its upper region is not covered, except by the peritoneum, posteriorly. From its centre arises the *u'rachus*. Its lower region is bounded, anteriorly, by the prostate, in man; and rests on the vesiculæ seminales and rectum. In the female, it corresponds to the vagina. The lowest portion of this region bears the name *Bas-fond*. The anterior surface of the organ is not covered by peritoneum. It is attached to the symphysis pubis by a fibrocellular expansion called the *anterior ligament*. The *poste'rior lig'aments* or *rectoves'ical folds* — *pli'cæ semiluna're*s — are duplicatures of the peritoneum on its posterior surface, which extend from this surface to the rectum in the male, and to the uterus in the female. The bladder is composed of a serous membrane, formed by the peritoneum; of a muscular membrane; of a somewhat thick layer of areolar tissue; and is lined on its inner surface by a mucous membrane, which is sometimes raised up, here and there, in long prominences or *columns* by the muscular fibres beneath. To this condition, the French anatomists give the term *vessie à colonnes*. In the *bas-fond* the two ureters open, and the urethra commences; and the triangular space, which the apertures of these three canals leave between them, is termed, by the French, the *Trigone vésical* or *Ves'ical tri'angle*, *Trigo'nus* seu *Trigo'num vesi'cæ* seu *Lieutaud'i*, *Cor'pus trigo'num*. In the orifice of the urethra, which is also called the neck of the bladder, there is, at its lower part, a more or less prominent tubercle, which is formed by the anterior angle of the *Trigone vésical*, and is called the *Ves'ical u'vula*, *U'vula vesi'cæ*, *Val'vula vesico-uretra'lis* seu *pylo'rica*, (F.) *Luette vésicale*.

The arteries of the bladder proceed from the hypogastric, umbilical, sciatic, middle hemorrhoidal, and internal pudic. Its veins, which are more numerous than the arteries, open into the hypogastric venous plexus. Its nerves emanate from the sciatic and hypogastric plexus; and its lymphatic vessels pass into the hypogastric ganglia.

U'RINARY CAL'CULI. The calculi which form in the urinary passages. See Calculi, urinary.

U'RINARY FEVER, Fever urethral.

U'RINARY FIS'TULA. An abnormal communication between the urinary passages and the external surface, as the perinæum and scrotum. Urine, in greater or less quantity, sometimes finds an outlet through it. The fistula may be simple or attended with induration and loss of substance.

U'RINARY OR'GANS, *Urinary appara'tus*, *Or'gana uropoët'ica*, *Appara'tus uropoët'icus*. The organs concerned in the formation of urine — the kidneys. The common acceptation includes, also, the bladder and urinary passages.

U'RINARY PAS'SAGES, (F.) *Voies urinaires*. The aggregate of canals and cavities intended to contain the urine and convey it externally. These *ways* are composed of excretory ducts, which form the tubular portion of the kidney; of calices; pelvis; ureters; bladder; and urethra.

Urina'tion, (from *urina*,) Micturition. M. Béraud elaborately defines it after Ch. Robin, — a function, the result of which is the expulsion of matters principally solid, but held in solution, which have become improper for nutrition.

Urinato'rium, (from *urina*,) Urinal.

U'rine, *Uri'na*, *U'ron*, (ουρον,) *Ure'ma*, *Lo'tium*, *Lot*, *La'pis aur'eus*, *Omich'ma*, *Recremen'ta* seu *Retrimen'ta vesi'cæ*, *A'qua pe'dum*, *A'qua*, *Water*, (old Eng.) *Stale*, *Lee*, *Chamber-lie*, (Prov.) *Herrin*, *Netting*, *Saag*. An excrementitial fluid; secreted by the cortical part of the kidney, filtered through the tubular portion, poured *guttatim* from the apices of the tubular papillæ into the pelvis of the kidney, and transmitted by it to the ureters, which convey it slowly, but in a continuous manner, into the bladder, where it remains deposited, until its accumulation excites a desire to void it. The excretion of the fluid takes place through the urethra, and is caused by the action of the abdominal muscles and diaphragm and the contraction of the fibrous coat of the bladder. Urine is transparent; of a citron-yellow color; of a peculiar odor, and of an acid, saline, and slightly bitter taste. That which is passed some time after taking fluid is less colored, and less odorous and dense than that which is voided several hours after eating. The first is the *Uri'na po'tûs*, (F.) *Urine de la Boisson* ou *des Boissons*, *U'rine of drink*; the latter, *Uri'na san'guinis*, (F.) *Urine de la digestion*, *Urine de la coction*, *Urine cuite* ou *du Chyle*, *Coc'ted u'rine*, *U'rine of diges'tion*. Three distinct varieties of urine may, according to Dr. Golding Bird, be recognized: *First*. That passed some little time after drinking freely of fluids, which is generally pale, and of low specific gravity—1·003 to 1·009— *Uri'na po'tûs*. *Secondly*. That secreted after the digestion of a full meal; s. g. 1·020 to 1·028, or even 1·030 — *Urina chy'li* seu *ci'bi*. *Thirdly*. That secreted independently of the immediate stimulus of food and drink, as after a night's rest, which is usually of average density—1·015 to 1·025, and presents the essential characters of urine— *Uri'na san'guinis*. The average quantity of urine secreted in the twenty-four hours in health is estimated by Dr. Parkes to amount to 52½ fluid-ounces.

The following are the ordinary constituents of healthy human urine:—urea, uric acid, hippuric acid; extractive matters, embracing alcohol extract, spirit extract, and water extract, with their respective constituents; mucus; brown coloring matter of the urine, (hæmaphæin;) red coloring matter of the urine, (uroërythrin;) carbonic, lactic, hydrochloric, sulphuric, phosphoric, silicic, and hydrofluoric acids; soda; potassa; ammonia; lime; magnesia; and peroxide of iron. The proportion of solid matters in 1000 parts of urine may vary from 30 to 70 and upwards. The following table expresses the relative amounts of the different components in every 100 parts of the solid matter, according to the analysis of different observers:

	Berzelius.	Lehmann.	Simon.	Marchand.
Urea,	45·10	49·68	33·80	48·91
Uric acid,	1·50	1·61	1·40	1·59
Extractive matter, Ammonia salts, and Chloride of sodium,	36·30	28·95	42·60	32·49
Alkaline sulphates,	10·30	11·58	8·14	10·18
Alkaline phosphates,	6·88	5·96	6·50	4·57
Phosphates of lime and magnesia,	1·50	1·97	1·59	1·81

Its average specific gravity is 1·015.

Dr. Golding Bird obtained the following results on examining 1000 parts of urine passed in health after 10 hours' fasting; and after dinner in the evening.

	Urina sanguinis.	Urina cibi.
Specific gravity	1·016	1·030
Water	962·72	930·10
Solids	37·28	69·90
Urea	14·30	24·40
Uric acid	0·23	1·33
Fixed salts, chiefly chlorides, sulphates, and phosphates.	5·10	9·90
Organic matter, creatin, creatinin, coloring matter, and volatile salts.	17·80	34·27

The following table gives an analysis of the chief constituents of the urine excreted by a healthy male adult in the twenty-four hours. It must be borne in mind, however, that even in

health, each of these constituents may vary under special circumstances. It is compiled from the observations of Dr. Parkes and other authorities on the subject.—(Kirkes, *Handbook of Physiology*, Phila., 1873, p. 358.)

Water	52	fluidounces.
Urea	512·4	grains.
Uric acid	8·5	"
Hippuric acid—uncertain	10 to 15	" (probably.)
Sulphuric acid	31·11	"
Phosphoric acid	45·	"
Chlorine	105·	"
Chloride of ammonium	35·25	"
Potash	58·	"
Soda	125·	"
Lime	3·5	"
Magnesia	3·	"
Mucus	7·	"
Extractives: —Creatin, Creatinin, Pigment, Xanthin, Hypoxanthin, Resinous matter, &c.	154	"

The urine, when first passed, is generally acid, and this has been ascribed to uric acid, hippuric acid or lactic acid. It is, doubtless, however, owing to the acid phosphates present.

Sometimes, the urine, in health and disease, exhibits appearances that have received special names. Thus, that which is characterized by a deficiency of solid matters generally, has been called *Hydru'ria*, (ὕδωρ, 'water;') by a deficiency of urea, *Anazotu'ria*, (ἀν, privative, and *azote;*) by a superabundance of urea, *Azotu'ria;* by the presence of albumen, *Albuminu'ria;* by greater density, *Baru'ria*. Urine in which the deposit consists of lithic acid, and the lithates, has been termed *Lithu'ria;* and that in which the deposit consists of the earthy and earthy alkaline phosphates, *Phosphu'ria, Ceramu'ria*, (κεραμος, 'potters' earth,') &c., &c. At times, a *pellicle* forms on the surface, (*Cre'mor uri'næ,*) which consists of mucus and some salts: at others, there is a *cloud*, (*Nubec'ula, Nubes,*) towards its upper part, which is called *Enæore'ma* when it is suspended, as it were, about the middle of the liquid. Occasionally, there is a sediment, to which the names *Hypostasis, Sedimen'tum*, &c., have been given. (See these various words.) The urine is deserving of attention in disease; but it has often been considered a matter of more importance than it merits. Some empirics have presumed to pronounce on the nature of disease by simply inspecting the urine. See Uroscopy. (For the various tests employed in the detection of foreign bodies in the urine, as bile, sugar, albumen, &c., see appropriate works on the subject.)

Human urine was, at one time, considered aperient; and was given in jaundice, in the dose of one or two ounces. Cows' urine, *Uri'na vac'æ, All'flower wa'ter*, was once used, warm from the cow, as a purge, in the dose of 8ss.

Urine has been variously designated by pathologists, according to its appearance, &c.; for example:

U'RINE, ANÆ'MIC, *Uri'na anæ'mica*. A term used, but not felicitously, for the form of urine that occurs in anæmia, chlorosis, &c.

Urine Ardente, Ardent urine — u. Black, Melanuria—u. Bloody, Hæmaturia—*u. de la Boisson,* Urine, hysterical, see Urine—*u. Briqueté*, see Lateritious—u. Chylous, Chyluria—*u. de la Coction,* see Urine.

U'RINE, CRUDE, (F.) *Urine crue*. Urine that is thin, transparent, and but little colored, affording neither cloud nor deposit.

Urine Crue, Urine, crude—*u. Cuite*, see Urine.

U'RINE, CYSTIN'IC, *Cystinu'ria*, (F.) *Cystinurie*. Urine containing cystine or cystic oxide in solution, or as a deposit.

U'RINE, DIABE'TIC, *Uri'na diabe'tica, Saccharine urine*. Urine passed in *Diabe'tes melli'tus, Melitu'ria*. It contains a large quantity of sugar analogous to that of the grape, which may be separated in the form of crystals. In other respects the urine is very abundant and very limpid in that affection. See Urine.

Urine de la Digestion, see Urine.

U'RINE, DROP'SICAL, is an ammoniacal urine, often containing much albumen and scarcely any urea.

U'RINE, DYSPEP'TIC, has been found to precipitate tannin abundantly, and to putrefy soon.

Urine Épaisse, Urine, mucilaginous — u. Extravasation of, see Extravasation.

U'RINE, FE'BRILE, *Uri'na febri'lis*. Urine discharged in inflammation and inflammatory fever.

U'RINE, FILAMEN'TOUS, see Filamentous.

U'RINE, FLOC'CULENT, (F.) *Urine floconneuse*, is when it is troubled by flocculi suspended in it.

Urine Floconneuse, Urine, flocculent — *u. des Goutteux,* Urine, gouty — u. Furfuraccous, see Furfuraceous.

U'RINE, GOUT'Y, (F.) *Urine des Goutteux*, contains much phosphate of lime, and, after severe attacks of gout, precipitates a mixture of the uric and rosacic acids.

Urine Huileuse, Urine, oily.

U'RINE, HYSTER'ICAL, is clear, colorless, and similar to the *Urine de la Boisson*.

U'RINE, ICTER'ICAL, contains bile.

U'RINE, INCON'TINENCE OF, Enuresis.

U'RINE OF INFLAM'MATORY DISEASES. This is generally small in quantity, and very high-colored.

U'RINE, INVOL'UNTARY DISCHARGE' OF, Enuresis.

U'RINE, JUMEN'TOUS, *Uri'na jumento'sa* seu *jumentu'ria*, (F.) *Urine Jumenteuse*. A term sometimes used for ammoniacal urine, rendered turbid by a substance similar to small grains of dust, which causes it to resemble the urine of herbivorous animals.

Urine Lactescente, U. milky — *u. Laiteuse,* Urine, milky.

U'RINE, MILK'Y, (F.) *Urine lactescente* ou *laiteuse*. White and troubled urine.

U'RINE, MUCILAG''INOUS, (F.) *Urine épaisse*. Urine containing much mucus.

U'RINE, NER'VOUS. Thin and very liquid urine; such as is passed shortly after the attack of nervous diseases.

U'RINE OF NER'VOUS FE'VERS is generally very thin, and often deposits a mixture of uric and rosacic acids.

U'RINE, OIL'Y, (F.) *Urine huileuse*, is that which pours like oil, or which has an oily pellicle at its surface.

U'RINE, OXAL'IC, *Oxalu'ria*. Urine containing a salt of the oxalic acid. See Oxalatic.

U'RINE, PHOSPHORES'CENT, *Phosphoru'ria, Phosphu'ria*. Urine which is luminous or phosphorescent.

U'RINE, PURPU'RIC, see Porphyruria — u. Retention of, see Retention of urine.

U'RINE, RICK'ETY, contains much phosphate of lime.

U'RINE, SAC'CHARINE, Urine, diabetic — u. Salt of, Ammoniæ carbonas — u. Sandy, Arenosa urina — u. Stoppage of, Ischuria — *u. Ténue,* Urine, thin.

U'RINE, THIN, (F.) *Urine ténue*. Urine that is transparent, slightly colored, and of but little density.

Urineux, Urinous.

Urinif'erous, *U'rinifer,* (F.) *Urinifère,* (from *urina*, and *fero*, 'I carry.') That which carries urine.

URINIF'EROUS SUB'STANCE OF THE KID'NEY, see Kidney.

URINIF'EROUS TUBES or DUCTS OF BELLI'NI, *Tu'buli* seu *duc'tus urinif'eri Belli'ni, vel Bellinia'ni, Tu'buli Belli'ni* seu *rec'ti, Bellinia'ni Duc'-*

tus, Bellinia'næ Fis'tulæ. The collection of small tubes, converging from the cortical part of the kidney to the apices of the papillæ. The tortuous uriniferous ducts are called *Tubes of Ferrein, Tu'buli contor'ti* seu *Ferrein'i.*

Urinip'arous, (F.) *Urinipare,* (*urina,* and *parere,* 'to produce.') An epithet for tubes in the cortical portion of the kidney, which prepare the urine.

Urino'des, (from *urina,* and *odes,*) Urinous.

Urinom'eter, (from *urina,* and *μετρον,* 'measure,') *Urom'eter, Urogravim'eter.* A small hydrometer for taking the specific gravity of urine. The urinometer suggested by Dr. Prout is divided into 60 degrees, the zero being the point at which it floats in distilled water. The numbers on the scale added to 1000, the specific gravity of water, give the particular specific gravity.

U'rinous, *Urino'sus, Urino'des,* (F.) *Urineux,* (from *urina.*) Having the character of urine. Similar to urine.

Urinovag''inal, Vesicovaginal.

Uri'tis, (*uro,* 'I burn,' and *itis.*) Inflammation consequent on a burn.

Uroce'lē, *Œde'ma scro'ti urino'sum, Uroscheoce'lē, Oscheoce'lē urina'lis, U'rocele,* (*uron,* and *κηλη,* 'a rupture.') A tumor of the scrotum, owing to the effusion of urine into the same, and into the areolar tissue.

Uroches'ia, *Urochez'ia,* (*uron,* and *χεζειν,* 'to go to stool.') A discharge of urine by the bowels.

U'rochrome, (*uron,* and *χρωμα,* 'color.') The coloring matter of the urine, so called by Thudichum. It is a yellowish amorphous substance, yielding by decomposition a dark material called *Uromel'anin.*

Urocris'ia, (*uron,* and *κρινω,* 'I judge,') *Urocrite'rion.* A judgment formed either of the urine or of disease, after inspecting the urine. Also, the crisis of a disease by uresis. *Urocriterion* is the symptom by which such judgment is formed.

Urocrite'rion, (*uron,* and *κριτηριον,* 'criterion,') see Urocrisia.

Urocyan'ogen, (*uron,* and *κυανος,* 'blue,') *Urocy'anose.* A blue sediment seen especially in the urine of cholera patients.

Urocy'anose, Urocyanogen.

Urocys'tis, gen. *Urocys'tidis,* (*uron,* and *κυστις,* 'a bladder,') Urinary bladder.

Urocysti'tis, gen. *Urocysti'tidis,* (*urocystis,* and *itis,*) Cystitis.

Urocystocatar'rhus, Cystirrhœa.

Urodial'ysis, (*uron,* and *διαλυσις,* 'dissolution, loss of strength.') A partial and temporary suspension of the function of the kidney, such as occurs in the course of most acute diseases. A condition of the function of the kidney and of the urine, similar to that observed in acute diseases, but without local mischief or preceding inflammatory fever, has been termed, when occurring in children, *Urodial'ysis Neonato'rum;* in the aged, *Urodial'ysis Se'num.*

Urodochi'um, (*ουροδοχιον, ουροδοχειον,* from *urine,* and *δεχομαι,* 'I receive,') Urinal.

Urodyn'ia, (*uron,* and *οδυνη,* 'pain.') Pain during the excretion of the urine.

Urœde'ma, gen. *Urœde'matis,* (*uron,* and *οιδημα,* 'a swelling,') Urapostema.

Uroëmie, Uræmia.

Uroër'ythrin, (*uron,* and *ερυθρος,* 'red,') see Porphyruria.

Urogen'ital, *Urogenita'lis, Gen'itoü'rinary, Gen'itoürina'rius.* Relating or appertaining to the urinary and genital apparatus — as the 'urogenital organs,' *Or'gana urogenita'lia.*

Urogen'ital Si'nus, *Sinus urogenita'lis.* A cavity or canal in the embryo of the mammalia opening externally, in which the excretory ducts of the Wolffian bodies, the ureters and the efferent parts of the generative apparatus, terminate internally. It is prolonged into the urachus. Subsequently it becomes separated by a process of division into a *pars urina'ria* and a *pars genita'lis.* The former, extending towards the urachus, is converted into the urinary bladder; while from the latter are formed the vesiculæ seminales in the male, and the middle portion of the uterus in the female.

Uroglauc'in, (*uron,* and *γλαυκος,* 'blue,') see Uroxanthin.

Urogravim'eter, (*uron, gravis,* 'heavy,' and *μετρον,* 'measure,') Urinometer.

Urohæ'matin, Hæmaphæin.

Urol'ithi, (*uron,* and *λιθος,* 'a stone,') Calculi, urinary.

Urolithi'asis, Lithia.

Urolitholog''ia, (*uron, λιθος,* 'a stone,' and *λογος,* 'a description.') A description of, or treatise on, urinary calculi.

Urolithotom'ia, Lithotomy.

Urol'ogy, Uronology.

U'romancy, *Uromanti'a,* (from *uron,* and *μαντεια,* 'divination.') The art of divining diseases by simple inspection of the urine, *Uroscop'ia, U'roscopy, Ouroscop'ia, Ou'roscopy.* One professing to be able to do this is called *Uroman'tes.* Vulgarly, a *water-doctor, water-caster.*

Uromel'anin, see Urochrome.

Urom'eles, (F.) *Uromèle,* (*ουρα,* 'a tail,' and *μελος,* 'a limb.') A genus of monsters in which the two lower limbs are united, very incomplete, and terminated by a single foot, which is almost always imperfect, the sole being turned forwards.

Urom'eter, (*uron,* and *μετρον,* 'measure,') Urinometer.

Urom'phalus, (*uron,* and *ομφαλος,* 'navel,') *Her'nia U'rachi.* A monstrosity, which consists in the protrusion of the urachus at the umbilicus.

U'ron, (*ουρον,*) Urine.

Uron'cus, (*uron,* and *ογκος,* 'a swelling.') A urinary swelling.

Uronol'ogy, *Uronolog''ia, Ourolog''ia, Ourol''ogy, Urol'ogy. Urolog''ia,* (*uron,* and *λογος,* 'a discourse.') The part of medicine which treats of the urine.

Urophthi'sis, (*uron,* and *phthisis,*) Diabetes mellitus.

Uropla'nia, (*uron,* and *πλανη,* 'wandering.') The presence of urine in other parts than the urinary organs.

Uropoë'sis, *Uropoë'sis,* (*uron,* and *ποιεω,* 'I make,') *Secre'tio uri'næ* seu *lo'tii.* The secretion of urine by the kidney.

Uropoët'ic, *Uropoët'icus,* (F.) *Uropoétique.* Concerning or favoring the production of urine.

Uropoie'sis, Uropoesis.

Uropyg''ii Glan'dulæ, (*ουρα,* 'tail,' and *πυγη,* 'rump.') A caudal sebaceous gland in birds, supplying the fatty secretion with which they anoint their feathers.

Uropyg'ion, Coccyx.

Uropyg'iun, Croupion.

Urorrhag''ia, (*uron,* and *ῥαγη,* 'a breaking forth,') Diabetes.

Uror'rhodin, (*uron,* and *ῥοδον,* 'a rose,') see Porphyruria.

Urorrhœ'a, (*uron,* and *ῥεω,* 'I flow,') Enuresis, Diabetes.

Uros'acin, (*uron,* and *rosa,*) see Porphyruria.

Uroscheoce'lē, (*uron, σχεον,* 'scrotum,' and *κηλη,* 'rupture,') Urocele.

Uros'copy and **Uroscop'ia,** (*uron,* and *σκοπεω,* 'I examine,') see Uromantia.

Uro'ses, (from *uron,* and *osis.*) Diseases of the urinary organs.

Uros'tealith, *Urosteal'ithus, Urosteato'ma,* (*uron, στεαρ,* gen. *στεατος,* 'suet,' and *λιθος,* 'stone.') A peculiar fatty ingredient of urinary calculi, discovered by Heller.

Urosteato'ma, (*uron,* and στεαρ, gen. στεατος, 'fat,') Urostealith.

Urosteno'sis, Urethrostenosis.

U'rous Ac''id, Uric oxide.

Uroxan'thin, *Uroxan'thine,* (*uron,* and ξανθος, 'yellow.') A yellow coloring matter found in the urine by Heller, which is decomposable into a red coloring matter, *ur'rhodin,* and a blue, *uroglauc'in,* — the former having the same composition as *indigo red,* the latter as *indigo blue.*

Uroze'mia, (*uron,* and ζημια, 'loss,') Diabetes — u. Albuminosa, Kidney, Bright's disease of the — u. Mellita, Diabetes mellitus.

Ur'rhodin, (*uron,* and ῥοδον, 'rose,') see Porphyruria.

Urros'acin, (*uron,* and *rosa,* 'rose,') see Porphyruria.

Urti'ca, (from *urere,* 'to burn,') *U. divi'ca* seu *ma'jor* seu *his'pida, Cni'dē, Pyr'ethrum, Ad'icē, Com'mon sting'ing net'tle,* (Prov.) *Et'tle,* (F.) *Ortie. Ord.* Urticaceæ. *Sex. Syst.* Monœcia Tetrandria. This plant has been long used for medical and culinary purposes. The young shoots, in the spring, are considered to possess diuretic and antiscorbutic properties. The pain produced by its sting is well known, but it is not to be compared to the torture occasioned by *Urti'ca stim'ulans,* and *U. crenula'ta* of India; and still less, to *Urti'ca urentis'sima* of Timor, which is called by the natives *Daonn Setan, 'Devil's leaf,'* on account of the persistence and severity of the pain Nettles have been used as stimulants to paralytic limbs.

Urti'ca Balea'rica, U. pilulifera — u. Crenulata, see Urtica — u. Dioica, Urtica — u. Hispida, Urtica — u. Iners magna fœtidissima, Galeopsis — u. Major, U. dioica — u. Minor, U. urens — u. Mortua, Lamium album.

Urti'ca Pilulif'era, *U. Pilulo'sa* seu *Roma'na* seu *Balea'rica, Pillbearing Net'tle,* (F.) *Ortie Romaine.* The seed was formerly given in diseases of the chest.

Urti'ca Pilulo'sa, U. pilulifera — u. Romana, U. pilulifera — u. Stimulans, see Urtica.

Urti'ca U'rens, *U. mi'nor, Dwarf net'tle,* (F.) *Ortie brulante.* A lesser variety of the nettle, possessing similar virtues. It is said to check hemorrhage, when prescribed internally.

Urti'ca Urentis'sima, see Urtica.

Urticaire, Urticaria — *u. Maritime,* Urticaria maritima.

Urtica'ria, *Enanthe'sis urtica'ria, Ure'do, Scarlati'na* seu *Fe'bris* seu *Pur'pura urtica'ta, Cnido'sis, Urtica'ria porcel'lana, Exanthe'ma urtica'tum, Epinyc'tis prurigino'sa, Fe'bris ru'bra prurigino'sa, Sal'tans ro'sa,* (F.) *Urticaire, Fièvre Ortie, Porcelaine; Nettlerash,* (Prov.) *Nettlespringe;* vulgarly *Hives, Bold Hives;* (from *urtica,* because the eruption resembles that produced by the stings of a nettle.) A disease distinguished by those elevations of the cuticle called *wheals.* They have a white top, and are often surrounded by a diffuse redness. They excite intolerable itching, especially when the person is warm in bed. The eruption frequently goes and comes once or more in the 24 hours, and is generally dependent upon gastric derangement. In some people, nettlerash is induced by eating shellfish, eggs, nuts, &c., *Urtica'ria ab inges'tis.* It is not usually a disease of any consequence, and its treatment is limited to the use of absorbent laxatives, and simple general means. Willan has described six varieties of the complaint: — *Urtica'ria febri'lis, U. evan'ida, U. per'stans, U. confer'ta, U. subcuta'nea* and *U. tubero'sa.* Other names are also given to some of these varieties, as *Urticaria acu'ta, U. chron'ica, U. tubercula'ta,* and *U. œdemato'sa.* Gull has described a *factitious urticaria,* which has also been called *Myode'ma.*

Urtica'ria Marit'ima, (F.) *Urticaire Maritime.* An eruption of a salutary character produced by sea-bathing.

Urtica'ria Porcel'lana, Essera, Urticaria.

Urtica'tio, *Cnido'sis, Urtica'tion,* (from *urtica.*) A sort of flagellation with nettles; — used with the intention of exciting the skin.

Urucu, Terra Orleana.

Uryl'ic Ac''id, Uric acid.

Usne'a Cra'nii Huma'ni, Lichen saxatilis — u. Florida hirta, Lichen plicatus — u. Hirta, Lichen plicatus — u. Plicata, Lichen plicatus.

Us'quebaugh, Whisky, see Spirit.

Ussacu, Ilura Brasiliensis.

Ussat, Min'eral Wa'ters of. These springs, in the department of the Ariége, in the Pyrenees, are acidulous thermal waters, containing sulphates and carbonates of lime and magnesia, and chloride of sodium, with traces of arsenic. They are chiefly used as baths in hysteria, chorea, neuralgia, and many other nervous affections.

Ustila'go, gen. *Ustilag' inis,* (same etymon as Ustio,) Ergot.

Ustilag''inous, *Ustilagin'ea,* (F.) *Ustilagineux.* Relating or belonging to ergot, as Gangræna ustilaginea; see Ergotism.

Us'tio, (*urere, ustum,* 'to burn,') Burn, Ustion.

Us'tion, *Us'tio, Caus'is.* The act of burning or of applying the actual cautery. Also, the effect of cauterization; a burn.

Ustula'tio, *Ustula'tion,* (dim. of *ustio.*) A pharmaceutical operation by which a substance is dried by heat. It is often restricted to the roasting of ores to drive off the volatile matters, as in the case of arsenic.

Usua'lia, (pl. of *usualis,* 'usual, ordinary,' from *usus,* 'use,') see Officinal.

Usure des Dents, ('wearing out of the teeth' from use,) Odontotripsis.

U'sus, 'use,' Habit.

U'ta. A local affection — perhaps a form of epithelial cancer — seen in certain districts of Peru.

Utah, Min'eral Wa'ters of. There are thermal sulphureous waters, the *Hot Springs,* at Salt Lake City, which are said to be useful in cutaneous affections, chronic rheumatism, &c.

U'ter, gen. *U'tris,* 'a leather bottle,' Uterus.

Uteral'gia. A hybrid word, (from *uterus,* and αλγος, 'pain,') Metralgia.

U'teri Adscen'sus, Hysteria — u. Anteversio, Hysteroloxia anterior — u. Carcinoma, Metrocarcinoma — u. Convulsivus morbus, Lorind matricis — u. Coryza, Leucorrhœa — u. Exulceratio, Hysterelcosis — u. Flexio, Hysteroloxia — u. Inclinatio, Hysteroloxia — u. Obliquitas, Hysteroloxia — u. Pronatio, Hysteroloxia anterior — u. Pruritus, Nymphomania — u. Reflexio completa, Hysteroloxia posterior — u. Retroversio, Hysteroloxia posterior — u. Rheuma, Leucorrhœa — u. Ulcus, Hysterelcosis — u. Versio incompleta, Hysteroloxia.

U'terine, *Uteri'nus,* (F.) *Utérin,* (from *uterus.*) That which belongs or relates to the womb.

U'terine Appen'dages, Inflamma'tion of, see Parametritis.

U'terine Ar'tery, *Arte'ria uteri'na hypogas'trica.* Its size is always in a ratio with the greater or less state of development of the uterus. It arises from the hypogastric, either separately or with the umbilical, or from the internal pudic; passes upon the lateral parts of the vagina, to which it gives branches; and afterwards ascends on the sides of the uterus, and divides into a considerable number of very tortuous branches, which enter the tissue of the organ.

U'terine Bougie', Sound, uterine.

U'TERINE BROTH'ER, *Uteri'nus fra'ter*. One born of the same mother, but of a different father.

U'TERINE EL'EVATOR. A modification of Prof. Simpson's intraüterine pessary, under this name, for rectifying malpositions of the uterus, was proposed by Dr. J. Marion Sims, of New York. See Pessary, intraüterine.

U'TERINE GLANDS, Utricular glands — u. Hemorrhoid, see Hæmorrhoïs—u. Murmur, Bruit placentaire.

U'TERINE MUS'CLE OF RUYSCH consists of some fleshy fibres at the fundus of the uterus, which he regarded as forming a particular muscle.

U'TERINE RUSH, Bruit placentaire — u. Sound, Sound, uterine.

Uteri'nus Fra'ter, Uterine brother.

Uteroäbdom'inal Suppor'ter, see Belt, Russian.

Uterogesta'tion, (*uterus*, and *gestare*, 'to carry,') Pregnancy.

Uteroma'nia, Nymphomania.

Uteroöva'rian Ar'tery, see Spermatic artery.

U'terotome, (badly compounded from *uterus*, and τομη, 'incision,') Hysterotome.

Uterot'omy, Hysterotomy.

U'terus, (ὑστερα,) *U'ter Utric'ulus*, *Vul'va*, *Lo'ci*, *L. muli'ebres*, *Ven'ter*, *Vis'cera*, *Conceptac'ulum*, *Ma'trix*, *Ar'vum* seu *A'ger natu'ræ*, *Hys'tera*, *Me'tra*, *Eugi'um*, *Eugi'on*, *An'gus*, *Del'phys*, *Al'vus*, *Epompha'lion*, *Gas'ter*, *Ma'ter*, *Me'ter*, *Ne'dys*, the *Womb*, (Sc. and Prov.) *Wayme*, *Wame*, *Weam*, *Wem*, (F.) *Matrice*, *Sein*. The uterus, destined to lodge the fœtus from the commencement of conception till birth, is a hollow symmetrical organ, having the shape of a truncated conoid: it is situate in the pelvis, between the bladder and the rectum, above the vagina, and below the convolutions of the small intestine. The uterus is flattened from before to behind, and is nearly an inch in thickness. It is two inches broad at its highest part, and becomes narrower towards the vagina; terminating in a contracted portion, called the *cer'vix* or *neck*, to distinguish it from the rest of the organ, called the *bod'y*, *Cor'pus u'teri*. From its *fun'dus*, *basis*, or upper portion, the Fallopian tubes pass off. The mouth is called *Os u'teri*, *Os tin'cæ*, *Os u'teri exter'num*, *Orific''ium vagina'lē*. See Os uteri. At the point where the body of the uterus is continuous, below, with the neck, the cavity is slightly constricted, forming what is sometimes named the *inter'nal or'ifice*, *Os u'teri inter'num*, *Os inter'num*, *Isth'mus* seu *os'tium u'teri supe'rius* seu *inter'num*, *Orific''ium uteri'num cana'lis cervi'cis u'teri*. Between these is the *Cana'lis cervi'cis*.

The cavity of the uterus is very small, and its parietes are thick. The portion of the cavity corresponding with the body is triangular and flattened. Its superior angles present the extremely fine orifices of the Fallopian tubes. The cavity of the neck is slightly dilated before opening into the vagina. The uterus is composed — 1. Of a *serous membrane*. This is external, and furnished by the peritoneum; which is reflected upon the uterus from the posterior surface of the bladder and the anterior surface of the rectum. These folds of the peritoneum are sometimes called, respectively, the *anterior* and the *posterior* ligaments. The former are also named the *vesicoüterine*, and the latter the *rectoüterine* folds or *pli'cæ semiluna're*, (F.) *Plis de Douglas*, — the *pouch*, thus formed, being termed *Douglas's cul-de-sac* or *space*. The serous membrane forms, also, the *broad lig'aments of the u'terus*, *Ligamen'ta la'ta*, *A'læ vespertilio'nis*, *Re'tia U'teri*. These contain, above, the Fallopian tube; beneath and anteriorly, the round ligaments: and behind, the ovary. They are two membranous productions or duplicatures of the peritoneum, sent from the edges of the uterus and posterior extremity of the vagina, in a transverse direction, to be fixed to, and to line, the side of the pelvis. 2. Of a *mucous membrane*, which is a prolongation of that of the vagina, and extends into the tubes. 3. Of a *proper tissue*, whose thickness is considerable. It is of a close texture; is grayish and elastic; and resists the instrument that divides it. Its fibres belong to the muscular tissue of organic life. During gestation it becomes markedly muscular. The arteries of the uterus proceed from the spermatic and hypogastric. Its veins follow the same course, and bear the same name as the arteries. They are very tortuous, and form large sinuses in the parietes of the organ, called *U'terine Si'nuses*. The nerves of the uterus proceed from the sciatic and hypogastric plexuses. Its lymphatic vessels are very multiplied; and during pregnancy acquire enormous dimensions. The changes experienced by the uterus during gestation, and after delivery, are very numerous and important to be known. They regard its situation, direction, size, shape, texture, connections, vital properties, &c.

The uterus is said to be *one-horned*, *U. unicor'nis*, when only half of the organ is developed; a second rudimentary horn may, however, be present. It is said to be *two-horned*, *U. bicor'nis*, when, in consequence of the incomplete coalescence of Müller's ducts, the horns of the organ diverge.

U'TERUS, Abdomen — u. Anteversion of the, Hysteroloxia anterior — u. Bicornis, see Uterus.

U'TERUS BIF'IDUS, 'a bifid uterus.' A double uterus. One separated into two cavities.

U'TERUS, CATARRH' OF, Leucorrhœa.

U'TERUS DIADEL'PHYS, (*di*, and ἀδελφος, 'a brother.') A uterus in which there has been separate development and non-coalescence of the ducts of Müller. It is not strictly a double uterus.

U'TERUS DU'PLEX, 'a double uterus,' Dihysteria — u. Epistaxis of, Metrostaxis — u. Hernia of, Hysterocele — u. Hourglass contraction of the, Chaton — u. Inclinatus, Hysteroloxia.

U'TERUS, INVER'SION OF THE, *Inver'sio U'teri*, *Metranas'trophē*, *Ædopto'sis Uteri inver'sa*, (F.) *Inversion* ou *Renversement de la Matrice*. The uterus displaced and turned inside out. This can only happen through want of caution on the part of the medical practitioner. It is a fatal accident, unless speedily reduced. This must be done by gradually returning the superior part by grasping it with the hand, and making the rest follow.

U'TERUS, INVOLU'TION OF, see Involution.

U'TERUS, IR'RITABLE, *Neural'gia of the Uterus*. A disease characterized by deep-seated pain in the lower part of the abdomen and in the back and loins, generally diminished by lying down and increased by exercise, and more severe for a few days preceding and during menstruation. On examination *per vaginam*, the uterus is found to be tender on pressure, *Metryperæsthe'sis*; and the cervix and body slightly swollen, but not usually indurated. It is an obstinate affection, but frequently ends of itself after years of suffering. The treatment must be, — the horizontal posture; local bloodletting to the uterus; emollients; soothing injections; narcotics, warm bath, &c. See Hysteralgia.

U'TERUS MASCULI'NUS. see Ejaculatory ducts—u. Neuralgia of the, Uterus, irritable—u. Obliquus, Hysteroloxia — u. One-horned, see Uterus — u. Retroversion of the, Hysteroloxia posterior.

U'TERUS, RUP'TURE OF THE, *Metrorrhex'is*, *Hysterorrhex'is*, *Ruptu'ra* seu *Perfora'tio U'teri*, *Lacera'tion of the Womb*, (F.) *Rupture* ou *Déchirure de la Matrice*. This dreadful accident occurs during labor, and is known to have taken place, when the child's head suddenly recedes during a pain, with vomiting, sinking of the pulse, cold sweats, &c. When it is evident that this has occurred, the hand must be passed into the uterus, and the feet of the child be brought down.

Cases are on record, in which partial lacera-

tions of the uterus have healed, and the patient has done well. This is a rare event, and not to be anticipated.

U'TERUS, SUBINVOLU'TION OF, see Subinvolution.

U'tricle, *Utric'ulus,* (dim. of *uter,* gen. *utris,* 'a small bag or bottle,') see Ejaculatory ducts, Semicircular canals, Uterus.

U'TRICLE, PRIMOR'DIAL, *Utric'ulus primordia'lis.* A delicate membrane, of protein composition, which lines the cell wall of vegetable structures, and from the exterior of which the layer of cellulose is secreted.

Utric'ular, *Utricula'ris.* Relating to or resembling a small bag or bottle.

UTRIC'ULAR GLANDS, *Glan'dulæ utricula'res* seu *uteri'næ.* The glands or follicles in the interior of the uterus, which are concerned in the formation of the decidua.

Utric'ulus, Utricle, see Ejaculatory ducts, Semicircular canals, Uterus — u. Communis, see Semicircular canals — u. Lacteus, Receptaculum chyli — u. Primordialis, Utricle, primordial — u. Prostaticus, see Ejaculatory ducts.

U'va, 'a grape, or a bunch of grapes,' Uvula, see Vitis vinifera—u. Inversa, Paris—u. Lupina, Paris — u. Passa, see Vitis vinifera — u. Ursi, see Arbutus uva ursi — u. Vulpina, Paris.

U'væ, see Vitis vinifera — u. Corinthiacæ, see Vitis Corinthiaca.

U'VÆ PAS'SÆ, 'dried grapes,' *Rha'ges, Raisins,* see Vitis vinifera.

U'VÆ PAS'SÆ MAJO'RES, see Vitis vinifera — u. Passæ minores, see Vitis Corinthiaca — u. Passæ sole siccatæ, see Vitis vinifera—u. Ursæ folia, see Arbutus uva ursi.

Uva'ria Tril'oba, (from *uva,* 'a grape,') see Carica papaya.

Uva'tio, (from *uva,* 'a grape,') Ceratocele, Staphyloma.

U'vea, (from *uva,* 'a grape,') *Tu'nica acino'sa* seu *acinifor'mis* seu *uva'lis* seu *acina'lis* seu *uvifor'mis* seu *rhagoï'des* seu *u'vea* seu *perfora'ta, Membra'na u'vea, Rhagoï'des, Rhox,* (F.) *Uvée.* Some anatomists have given this name to the choroid coat of the eye; others, to the posterior layer of the iris, on account of the black and very thick varnish that covers it. See Iris.

U'VEA, COM'MISSURE OF THE, Ciliary ligament.

Uvée, Uvea.

Uveï'tis, gen. *Uveï'tidis,* (F.) *Uvéite,* (*uvea,* and *itis,*) properly, *Rhagoideï'tis.* Inflammation of the uvea. See Iritis.

Uvig''ena, Uvula.

Uvig''era, Uvula.

U'vula, (dim. of *uva,* 'a grape,') *Pinnac'ulum for'nicis guttura'lis, U'va, Staph'ylē, Tintinnab'ulum, Columel'la, Ci'on, Ci'onis, Garga'reon, Colum'na o'ris, Gurgu'lio, Intersep'tum, Proces'sus* scu *Cartila'go U'vifer, Uvig''ena, Uvig''era, Hi'mas, Plec'trum, Sublin'gua, Sublin'guium, Pap of the Throat,* (Sc.) *Pap of the Hass,* (F.) *Luette.* A fleshy appendix or prolongation, which hangs from the middle or free edge of the velum palati. The uvula has a conical shape, and is of a greater or less size in individuals. It is formed, especially, by the mucous membrane of the velum palati; and contains within it the azygos uvulæ musele. Its use is not clear.

Also, a small prominence or lobule in the portion of the cerebellum that forms the posterior boundary of the fourth ventricle, *U'vula cerebel'li.* It is on the median line, and behind the nodulus. See Vermiform process, inferior.

U'VULA CEREBEL'LI, see Uvula — u. Decidua, Staphylœdema — u. Elongata, Staphylœdema — u. Relaxata, Staphylœdema — u. Vesicæ, see Urinary bladder — u. Vesical, see Urinary bladder.

U'vular, *Uvula'ris,* (F.) *Uvulaire,* (from *uvula.*) That which belongs to the uvula.

U'VULAR GLANDS are small follicles, belonging to the mucous membrane covering the uvula.

Uvula'ria, (so called from the flowers hanging like the uvula [?],) Ruscus hypoglossum.

UVULA'RIA PERFOLIA'TA, *Small'er Bell'wort;* indigenous; *Order,* Melanthaceæ; flowering in May and June. The root, when fresh, is subaerid and mucilaginous. A decoction of the plant is used in sore mouth. It is said to cure the bites of rattlesnakes.

UVULA'RIA GRANDIFLO'RA and U. SESSILIFO'LIA have similar properties.

Uvuli'tis, gen. *Uvuli'tidis,* (*uvula,* and *itis,*) *Angi'na uvula'ris, Staphyli'tis, Cioni'tis, Inflamma'tio u'vulæ,* (F.) *Inflammation de la Luette, Falling down of the Palate.* Inflammation of the uvula. When to a slight degree, *Hypostaphyli'tis.*

Uzaidella [P.], Chenopodium ambrosioïdes.

V.

Vaccin, see Vaccina.

Vacci'na, *V. primig''ena* seu *vaccinato'ria* seu *antivariolo'sa, Vaccin'ia, Vari'ola vacci'na, V. vaccin'ica* seu *tuto'ria* seu *tu'trix, Exanthe'ma vacci'na* seu *antivariolo'sum, Syn'ocha vacci'na, Em'phlysis vacci'na inser'ta, Vacci'ola, V. scutella'ta, V. ve'ra, Vari'olæ tuto'riæ, Cowpox, Cowpock, Kinepock, Inoc'ulated Cowpox,* (from *vacca,* 'a cow,') (F.) *Vaccine.* The cowpox is a disease of the cow, arising spontaneously, or perhaps from the small-pox contagion of man, or from the matter of grease in horses conveyed by the milkers, which, if transmitted to man by means of inoculation, may preserve him from small-pox contagion. The promulgation of this valuable property of the vaccine virus is due to Dr. Jenner. When inoculating for small-pox in Gloucestershire, England, in 1775, he was surprised to meet with a number of persons in the same district, on whom the insertion of the virus produced no effect, although they had never passed through small-pox. On investigation he found that all these persons had previously been affected by a pustular eruption of the cow, which they had taken by milking the animal; and which eruption they called *Cowpox.* This discovery induced him to institute experiments, and he found that such preservative effect actually existed. The *Vac'cine Vi'rus, Vi'rus Vacci'num,* (F.) *Vaccin,* the fluid of the eruption, is not now usually taken immediately from the cow; experience having demonstrated that it is perhaps as efficacious when obtained from the human vesicle. The characteristic of cowpox eruption is a semitransparent, pearl-colored vesicle, with a circular or somewhat oval base; its upper surface, until the end of the 8th day, being more elevated at the margin than in the centre: and the margin itself being turgid, shining, and rounded, so as often to extend a little over the line of the base. This vesicle is filled with clear lymph, contained in numerous little cells, that communicate with each other. After

the 8th or 9th day from the insertion of the virus, it is surrounded by a bright-red, circumscribed areola, which varies in its diameter, in different cases, from a quarter of an inch to two inches; and is usually attended with a considerable tumor and hardness of the adjoining areolar membrane. This areola declines on the 11th or 12th day; the surface of the vesicle then becomes brown in the centre; and the fluid in the cells gradually concretes into a hard, rounded scab or crust, of a reddish-brown color, which at length becomes darker, contracted, and dry, but is not detached till three weeks after vaccination. It leaves a permanent, circular cicatrix, about five lines in diameter, and a little depressed; the surface being marked with very minute pits or indentations, denoting the number of cells of which the vesicle had been composed. This is the progress of the *gen'uine cowpox*. At times fever, *Vac'cinal fe'ver*, occurs about the 9th or 11th day; but, at others, not the slightest indisposition is felt. Aberrations from this progress occur, which must be attended to; as the same preservative influence is not exerted by *irreg'ular* or *spu'rious cowpox*. If the eruption runs speedily to a height, has an areola too early, is irregular at its edges, and contains pus instead of a limpid fluid, it cannot at all be depended upon. In addition to the vesicle which develops itself at the seat of vaccination, an eruption of a similar kind, *Vaccini'olæ*, sometimes occurs in other parts of the body, running its course at times with the other. It resembles, and perhaps is, varicella.

Small-pox occurs occasionally as an epidemic after vaccination. For awhile the enthusiastic advocates of vaccination would not admit the affection to be small-pox; and accordingly they gave it the name Varioloid. It is unquestionably small-pox, but modified, and greatly divested of its terrors by previous vaccination; and it is said to happen less frequently after vaccination than after *small-pox inocula'tion*. Vaccination is now practised everywhere, except among those in whom ignorance and prejudice exclude the lights of reason and philanthropy. There is ground, however, for the belief that for full protection, *revaccina'tion* may be occasionally necessary.

Vacci'na Antivariolo'sa, Vaccina—v. Primigena, Vaccina — v. Tutoria, Vaccina — v. Tutrix, Vaccina — v. Vaccinatoria, Vaccina.

Vaccinal, Vaccine — v. Fever, see Vaccina.

Vaccina'tion, *Vaccina'tio,* (from *vacca,* 'a cow,') *Cowpox inocula'tion, Jenne'rian inocula'tion.* An operation which consists in inserting the vaccine virus under the cuticle, so that it may enter into the absorbents. It is extremely simple, and requires merely that the point of the lancet should be held under the cuticle for a short time. The best time for taking the matter from the *Cowpox vesicle,* for vaccination, is about the 7th or 8th day, before the appearance of the areola, when it ought to be limpid and transparent. The most certain method is to pass it from arm to arm; but this is not always convenient; and hence it is taken upon *points* or pieces of quill, or between glasses. It must, of course, be softened for use. This is done by means of a little water, which does not destroy its efficiency. The scab, too, which falls off about the end of three weeks — sooner or later — is capable of communicating the affection, if dissolved in water; and this is the most common method of transmitting the vaccine virus in some countries.

Vac'cinator, *Vac'cinist.* One who inoculates for the cowpox. Also, an instrument employed for this purpose.

Vac'cine, *Vacci'nus, Vaccina'lis,* (F.) *Vaccinal,* (same etymon as Vaccination.) Relating or appertaining to vaccination; as the '*vaccine* vesicle,' '*a vaccine* physician.'

Vaccine, Vaccina — v. Lichen, Roseola vaccinia.

Vaccinel'la, (dim. of *vaccina.*) A term employed by some to designate spurious cowpox, *Vaccin'oïs, Vacci'ola spu'ria* seu *lepro'sa,* (F.) *Vaccinelle, Vaccinoïde.*

Vaccin'ia, Vaccina — v. Palustris, Vaccinium oxycoccos.

Vaccin'ifer, (*vaccina,* and *fero,* 'I carry.') An instrument intended as a substitute for the lancet in vaccination.

Vac'cinine. A term proposed by Dr. William Farr for the specific zymotic principle by which cowpox is propagated.

Vaccini'olæ, (dim. of *vaccina,*) see Vaccina.

Vac'cinist, Vaccinator.

Vaccin'ium Macrocar'pon, see Vaccinium oxycoccos.

Vaccin'ium Myrtyl'lus, (either corrupted from *hyacinthus,* or, more probably, from *baccinium,* from *baccæ,* 'berries,' in allusion to its fruit,) *Vi'tis idæ'a myrtil'lus, Vaccin'ia myrtil'lus, Vaccin'ium ui'grum, Myr'tleber'ry, Bil'berry, Blea'berry, Whor'tleberry, Black Whorts,* (Sc.) *Blae'berry,* (Prov.) *Hur'tleberry, Whim'berry,* (F.) *Airelle Anguleuse, Raisin de Bois. Ord.* Vaccinieæ. *Sex. Syst.* Octandria Monogynia. The berries — *Baccæ Myrtillo'rum* — are esteemed to be anti-scorbutic, when prepared with vinegar. They are also said to possess antiseptic and subastringent properties when dried. They are not used in medicine; but are frequently eaten with milk and sugar.

Vaccin'ium Ni'grum, V. myrtillus.

Vaccin'ium Oxycoc'cos, *Oxycoc'cos, O. palus'tris, Schollera oxycoc'cos, Vaccin'ia palus'tris, Vi'tis Idæ'a palus'tris, Moor'berry, Cran'berry, Moss'berry, Swamp Red'berry, Sour'berry,* (F.) *Canneberge.* The berries are pleasantly acid and cooling. They make an agreeable preserve. The common American cranberry is from *Vaccinium macrocarpon, Oxycoccos macrocarpus.*

Vaccin'ium Pennsylva'nicum, *Low Blue'berry.* The leaves and bark of the root are astringent.

Vaccin'ium Puncta'tum, V. vitis idæa — v. Resinosum, Gaylussacia resinosa.

Vaccin'ium Stamin'eum, *Buck'berry, Squaw Huck'leberry, Deer'berry.* The leaves of these plants are astringent.

Vaccin'ium Vi'tis Idæ'a, *V. puncta'tum, Vi'tis Idæ'a puncta'ta, Am'pelos Idæ'a, Red Bil'berry,* (Sc.) *Braw'lins, Al'pine Cran'berry, Whor'tleberry, Cow'berry,* (F.) *Airelle* ou *Canneberge ponctuée.* A decoction of the leaves has been used in calculous affections. They are astringent. The ripe berries are pleasantly acid, and refrigerant. *Whortleberries* are furnished by different species of Vaccinium.

Vaccinoïde, (*vaccina,* and *εἶδος,* 'resemblance,') Vaccinella.

Vaccin'oïs, Vaccinella.

Vac'cino-syph'ilis, *Vac'cinal Syph'ilis.* A syphilitic inoculation by means of vaccine virus.

Vacci'nus, Vaccine.

Vacci'ola, Vaccina — v. Leprosa, Vaccinella — v. Scutellata, Vaccina — v. Spuria, Vaccinella — v. Vera, Vaccina.

Vacilla'tio, *Tituba'tio,* (from *vaccilare, vacci'latum,* 'to waver.') Staggering; waddling — *claudica'tio anat'ica.*

Vacilla'tio Den'tium, Odontoseisis.

Vac'uo Vac'uas, see Irregular practitioner.

Vacuole, (dim. of [L.] *vacuus,* 'empty,') Areola.

Vagin, Vagina.

Vagi'na, 'a sheath,' *V. muli'ebris* seu *uteri'na* seu *U'teri* seu *Pe'uis, Si'nus muli'ebris* seu *Pudo'ris* seu *Puden'di, Co'leus, Pe'ris, Pe'rin, Col'pus,*

Vulvoū'terine canal, (F.) *Vagin, Conduit* ou *Canal de la pudeur*. A cylindrical canal, five or six inches long; situate within the pelvis, between the bladder and rectum. It communicates by one extremity, *Aul'us* seu *intro'itus* seu *os'tium* seu *orific''ium vagi'næ* vel *hyme'nis, Os exter'num vagi'næ*, with the vulva; by the other, *For'nix* seu *Fun'dus* seu *La'quear*, with the womb, the *Pars* seu *Por'tio vagina'lis u'teri*, the neck of which it embraces. The vagina is lined, internally, by a mucous membrane, which presents, along the anterior and posterior walls, a longitudinal ridge, called the *col'umns of the vagina, colum'næ ruga'rum*, and is partly closed, in young females, by the hymen, and carunculæ myrtiformes. Around the mucous membrane is a layer of spongy, erectile tissue; and a cellulovascular membrane. A constrictor muscle; numerous vessels furnished by the vaginal artery, particularly; veins and nerves, proceeding from the sciatic plexus, also enter into the composition of the organ.

Vagi'na, 'a sheath,' *The'ca*, (F.) *Gaîne*. A term extended to many parts, which serve as envelopes to others. Thus, it is sometimes applied to the fascia enveloping the limbs; to areolar membrane enveloping the muscles, and entering between their fibres; to that which surrounds the bloodvessels; to the synovial membranes surrounding tendons, and lining the gutters of bones, &c.

Vagi'na Cor'dis, Pericardium — v. Femoris, Fascia lata aponeurosis—v. Funiculi umbilicalis, see Funiculus umbilicalis — v. Glissonii, Capsule of Glisson — v. Hernia of, see Cystocele — v. Malleolaris externa, Retinaculum tendinum perinæorum — v. Masculina, see Ejaculatory ducts — v. Muliebris, Vagina—v. Muscularis, Perimysium — v. Nervorum, Neurilemma — v. Penis, Vagina — v. Pili, see Hair — v. Polypus of, see Polypus — v. Portæ, Capsule of Glisson — v. Uterina, Vagina.

Vagi'na of the Ve'na Por'ta, *Sheath of the Vena Porta*, (F.) *Gaîne de la Veine-porte*, is the areolar membrane that accompanies the divisions of the vena porta into the substance of the liver.

Vagi'næ Muco'sæ, see Bursæ mucosæ — v. Synoviales, 'synovial sheaths,' Bursæ mucosæ.

Vag''inal or **Vagi'nal**, *Vagina'lis*, (from *vagina*, 'a sheath.') Relating or pertaining to the vagina or to a sheath.

Vag''inal Ar'tery. This exists, as a matter of course, only in the female. It arises from the hypogastric, or from the uterine, vesical, internal pudic, umbilical, &c., and sends its branches, first to the lateral parts of the vagina, and afterwards to the anterior and posterior surfaces.

Vag''inal Bil'iary Plex'us. A plexus of ramifications of the hepatic duct through the capsule of Glisson.

Vag''inal Branch'es of the Ve'na Por'ta are those which have to pass through the sheath of the capsule of Glisson, previous to entering the interlobular spaces. In this course, they form the *vaginal plex'us*. There are, also, *vaginal branches*, and a *vaginal plexus* formed by the hepatic artery.

Vag''inal Coat of the Eye, see Eye.

Vag''inal Coat of the Tes'ticle, *Tu'nica Vagina'lis* seu *elytroï'des* seu *elytro'des*, *Tu'nica vagina'lis commu'nis testis* et *funic'uli spermat'ici*, *Fas'cia infundib'uliformis* of Hyrtl, *Tu'nica fibro'sa commu'nis*, is the serous membrane which envelops the testicle. Before the descent of the testicle, the tunica vaginalis does not exist. It is formed by a prolongation, furnished by the peritoneum to the testicle when it issues from the abdomen. The tunica vaginalis forms a close sac, investing the testicle and epididymis, without containing them in its cavity, and reflected so as to form a bag around the circumference of the testis; hence it is divided into *Tu'nica vagina'lis pro'pria* and *Tu'nica vagina'lis reflex'a*. Between the two layers, the inner surface is smooth, and lubricated by a serous fluid.

Inflammation of the tunica vaginalis has been called *Vaginali'tis*, (F.) *Vaginalite*.

Vag''inal Gan'glia, see Spermatic ganglion — v. Plexus, see Vaginal branches of the vena porta.

Vag''inal Proc''ess of the Tem'poral Bone, (F.) *Apophyse vaginale* ou *engaînante, Gaîne de l'apophyse styloïde, Chaton*, is a bony crista, which embraces the base of the styloid process.

Vag''inal Pulse, Pulse, vaginal—v. Respiration, Respiration, vaginal — v. Suppositories, see Suppositories and Pessary.

Vaginali'tis, gen. *Vaginali'tidis*, see Vaginal coat of the testicle.

Vaginis'mus. A name given by Dr. J. Marion Sims to spasm of the sphincter muscle of the vagina, with hyperæsthesia of the surrounding parts, and altered structure, which may require division by the knife.

Vagini'tis, gen. *Vagini'tidis*, (*vagina*, and *itis*.) Inflammation of the vagina. When occurring during childbirth, it is called *puer'peral vagini'tis*, and is generally due to the pressure of the fœtal head. When accompanied with leucorrhœa, and the growth of papillary projections on the surface of the membrane, it is called, from its granular appearance, *Vagini'tis granulo'sa*, *Gran'ular vaginitis*, (F.) *Psorelytrie*. See Leucorrhœa (vaginal).

Vaginodyn'ia, (*vagina*, and *ὀδυνη*, 'pain,') Colpalgia.

Vaginoves'ical, Vesicovaginal.

Vagissement, (from *vagitus*,) Cry, Vagitus.

Vagi'tus, gen. *Vagi'tûs*, (*vagire, vagitum*, 'to cry,') (F.) *Vagissement*. The cry of the newborn child; *Squall'ing*.

Vagi'tus Uteri'nus. The cry of the child in utero.

Va'grant Cells, see Amœboid.

Va'gus (**Ner'vus**), 'wandering (nerve'), Pneumogastric.

Vairon (F.), (from *varius*, 'of different colors,') *Dis'par oc'ulus*. One who has eyes of different colors. It also means a *wall-eyed* animal, or one whose iris is surrounded by a whitish circle.

Vaisseau, (from *vas*, dim. *vasculum*,) Vessel — *v. Sanguin*, Bloodvessel.

Vaisseaux (pl. of *vaisseau*) *Capillaires*, Capillary vessels—*v. Chylifères*, Chyliferous vessels — *v. Courts*, Brevia vasa — *v. Droits*, see Rete testis — *v. Efférents*, see Efferent — *v. Lactés*, Chyliferous vessels — *v. Lactifères*, Lactiferous vessels — *v. Ombilicaux*, Umbilical vessels—*v. Tourbillonnés*, Vasa vorticosa—*v. des Vaisseaux*, Vasa vasorum.

Valan'ida, Fagus sylvatica.

Valan'tia Apari'nē, (after S. Vaillant, a French botanist,) Galium aparine.

Valentin'ian Ves'icles, (after Valentin, the German physiologist,) see Molecule.

Vale'rian, Amer'ican, (from *valere*, 'to have efficacy' [?],) Cypripedium luteum, Valeriana pauciflora — v. Garden, Valeriana phu—v. Greek, Polemonium reptans — v. Officinal, Valeriana — v. Wild, Senecio aureus, Valeriana, V. pauciflora.

Valeria'na, *V. officina'lis* seu *mi'nor*, *Leucolach'anum*, *Wild* or *Offic''inal Vale'rian*, (F.) *Valériane*. *Ord.* Valerianaceæ. *Sex. Syst.* Triandria Monogynia. The root, *Valeria'na*, (Ph. U. S., 1873,) *Valerianæ Radix*, (Ph. B., 1867,) has been long extolled as an efficacious remedy in epilepsy, and in a variety of nervous complaints. It has been also advised as a tonic, antispasmodic, and emmenagogue. It has a strong, fetid odor; bitterish, subacrid, and warm taste; and its virtues are extracted by water and alcohol. The dis-

tilled oil is officinal in the Pharmacopœia of the United States.

The *Kooyah root* or *Kooyahs* of the Indians in Oregon, used by them for making a bread called *Supale*, is said to be that of *Valeriana officinalis* or *Valeriana edu'lis*, probably the same as that sometimes written *Kous*. It is frequently called *Tobac'co root*. It has to be buried in the ground for two days to deprive it of its noxious properties. The bread has an offensive taste to those not accustomed to it.

Valeria'na Capen'sis, a South African species, has similar virtues.

Valeria'na Celt'ica, *V. Saxat'ilis*, *Spi'ca Cel'tica* seu *Cel'tica Dioscor'idis* seu *Alpi'na*, *Nar'dus Cel'tica*, *Saliun'ca*, *Nar'dum Gal'licum*, *Cel'tic Nard*, (F.) *Nard Celtique*. The roots of this Alpine plant have been recommended as a stomachic, carminative, and diuretic. It has a moderately strong smell, and a warm, bitterish, subacrid taste.

Valeria'na Denta'ta, *A. locus'ta*, *Corn Sal'ad*. A wholesome, succulent plant, cultivated in Europe as a salad. It is antiscorbutic and gently aperient.

Valeria'na Edu'lis, see Valeriana — v. Locusta, V. dentata — v. Major, V. phu — v. Minor, Valeriana — v. Officinalis, Valeriana.

Valeria'na Pauciflo'ra, *Amer'ican* or *Wild Vale'rian*, and *V. sylvat'ica*, have the properties of other Valerians.

Valeria'na Phu, *V. ma'jor*, *Gar'den Vale'rian*, (F.) *Grande Valériane*. The root has been recommended in rheumatism; especially in sciatica, and in epilepsy.

Valeria'na Saxat'ilis, V. Celtica — v. Spica, Nardus Indica — v. Sylvatica, see V. pauciflora.

Valériane, Grande, Valeriana phu.

Valerian'ic Ac''id, Acidum valerianicum.

Vale'ric Ac''id, Acidum valerianicum.

Valet à Patin (F.), *Volsel'la Pati'ni*. The common ligature-forceps is a modification of this instrument invented by one Patin. It consists of two branches, united at the middle by a hinge, which may be separated or approximated by means of a screw or running ring. It is used for seizing hold of vessels that are to be tied.

Valétudinaire, Valetudinary.

Valetudina'rium, (from *valetudo*,) Hospital.

Valetudina'rius, Sickly, Valetudinary.

Valetu'dinary, *Valetudina'rian*, *Valetudina'rius*, *Inval'idus*, (F.) *Valétudinaire*. One of delicate health. One subject to frequent diseases. An *Invalid*.

Valetu'do, gen. *Valetu'dinis*, 'health, whether good or bad,' Sanitas — v. Adversa, Disease — v. Bona, Sanitas—v. Commoda, Sanitas—v. Secunda, Sanitas.

Val'gus, 'bowlegged,' see Cnemoscoliosis and Kyllosis — v. Spurius, see Kyllosis.

Vali'ga, Tinctura jalapii.

Valitu'do, gen. *Valitu'dinis*, Sanitas.

Vallec'ula, (dim. of *vallis*,) Valley—v. Unguis, see Nail.

Val'ley, *Vallis*, dim. *Vallec'ula*, *V. Reil'ii*, (F.) *Grand Scissure Médiane du Cervelet*. The deep fissure on the inferior part of the cerebellum, which divides it into two symmetrical portions, and receives the medulla oblongata.

Val'lis, Valley — v. Alarum, 'valley of the armpits,' Axilla — v. Femorum, Vulva.

Val'lum, 'a palisaded rampart.' The eyebrow or supercilium. Also, a species of bandage.

Vals, Min'eral Wa'ters of. A French acidulous chalybeate at Vals, six leagues from Viviers, in the department of Ardèche. There are five springs, containing carbonic acid, sulphate of iron and alum. The waters are employed in passive hemorrhages, leucorrhœa, &c. Season, from the 1st of June to the 15th of September.

Valsal'va, Si'nuses of, (after Valsalva, the celebrated Italian anatomist,) see Sinuses.

Valsal'vian Experiment. This consists in inflating the Eustachian tube by closing the nose and mouth and employing a forcible expiration.

Val'va, Valve.

Valve, *Valva*, dim. *Val'vula*, *Di'clis*, (F.) *Valvule*, (*valvæ*, 'folding-doors,' itself from *volvo*, 'I fold up.') A small door. Any membrane or duplicature of a membrane which prevents a reflux of humors or other matters in the vessels and canals of the animal body. There are some valves whose functions appear to be to retard or to modify the course of substances along canals, &c. See Mitral, Sigmoid, Tricuspid, Ileocœcal valve, &c.

Valve of Amussat, see Gall-bladder—v. Coronary, see Coronary—v. of Eustachius, Eustachian valve—v. of Fallopius or Fallopia, Bauhin, valve of—v. Ileocœcal, Bauhin, valve of—v. Ileocolic, Bauhin, valve of — v. Pyloric, see Pylorus — v. of Tulpius, Bauhin, valve of— v. of Varolius, Bauhin, valve of — v. of Vieussens, Valvula Vieussenii.

Valves of the Heart, see Heart and Mitral, Coronary, &c. — v. Kerkringian, Valvulæ conniventes — v. Semilunar, Sigmoid valves.

Val'vula, pl. *val'vulæ*, (dim. of *valva*,) Valve —v. Bauhini, Bauhin, valve of—v. Cæci, Bauhin, valve of — v. Cerebelli, Valvula Vieussenii — v. Coli, Bauhin, valve of — v. Eustachii, Eustachian valve — v. Foraminis ovalis, Ovalis fossa — v. Guiffartiana, see Thebesius, veins of—v. Heisteri, see Gall-bladder — v. Ilei, Bauhin, valve of — v. Magna cerebri, V. Vieussenii — v. Pylorica, see Urinary bladder.

Val'vula Semiluna'ris, *Pli'ca Semiluna'ris* seu *luna'ta*, *Membran'ula semiluna'ris conjuncti'væ*. A small doubling of the tunica conjunctiva, which lies between the caruncula lacrymalis and the ball of the eye. In birds, this is large, and called *Membra'na nic'titans* seu *Pal'pebra ter'tia*.

Val'vula Tari'ni, Velum medullare posterius —v. Thebesii, see Thebesius, veins of—v. Tulpii, Bauhin, valve of—v. Vaginæ, Hymen— v. Venæ magnæ, see Thebesius, valve of — v. Vesico-uretralis, see Urinary bladder.

Val'vula Vieusse'nii, *V. cerebel'li* seu *Willisia'na* seu *mag'na cer'ebri*, *Ve'lum Vieusse'nii* seu *interjec'tum cerebel'li*, *V. apoph'ysi vermifor'mi obten'tum*, *V. medulla'rē* seu *medulla'rē anti'cum* seu *ante'rius*, *Lacu'nar ventric'uli quar'ti supe'rior*, (F.) *Valvule de Vieussens*, *Voile médullaire supérieure*. A thin, medullary lamina, over the under end of the aquæductus Sylvii and upper part of the fourth ventricle. At the sides of the valves are two medullary tracts, called *Proces'sus ad Testes*, *Colum'næ Val'vulæ Vieussenii* or *Oblique intercer'ebral Com'missure*.

Val'vula Willisia'na, Valvula Vieussenii.

Val'vulæ, pl. of *valvula*, V. Bicuspidales, Mitral valves.

Val'vulæ Conniven'tes, 'self-closing valvulæ,' *V. Conniventes Kerkrin'gii*, *Pli'cæ conniven'tes*, *Kerkrin'gian valves* or *Valves of Kerk'ring*. Numerous circular folds in the intestinal canal from the pyloric orifice through the greater part of the small intestine. They are folds of the mucous membrane; and their chief use appears to be to retard the course of the alimentary mass, and to afford a larger surface for the origin of chyliferous vessels.

Val'vulæ Cor'dis, Ostiola cordis — v. Cordis mitrales, Mitral valves—v. Semilunares, Sigmoid valves—v. Triglochines, Tricuspid valves—v. Trisulcæ, Tricuspid valves.

Valvule, Valve — *v. d'Eustache,* Eustachian valve—*v. de Pylore,* see Pylorus—*v. de Vieussens,* Valvula Vieussenii.

Valvules Épiscopales, Mitral valves — *v. Sigmoïdes* ou *Semilunaires,* Sigmoid valves.

Vandel'lia Diffu'sa, (after *Vandelli,* professor of botany at Coimbra.) A native of Brazil, Guiana, and Isle of France: *Order,* Scrophulariaceæ; is used as an antibilious emetic and antiperiodic; and is regarded as an efficacious remedy in malignant fever and dysentery, especially in cases connected with a disordered state of the liver.

Vanel'loe, Vanilla.

Vanil'la, *Banil'ia, Banil'as, Banil'loes, Banil'la, Benzo'enil, Ar'acus aromat'icus,* (F.) *Vanille, Baume de Vanille,* ([S.] *vainilla,* dim. of *vaina,* 'a sheath, a pod.') The *Vanel'loe — Sil'iqua vanil'læ* seu *banil'læ* seu *vanigliæ* seu *vanil'liæ* seu *ar'aci aromat'ici* — is a long, flattish pod; containing, under a wrinkled, brittle shell, a reddish-brown pulp, with small, shining, black seeds. The parasitic plant which affords this pod is the *Epiden'drum Vanil'la, Vanil'la aromat'ica* seu *Mexica'na,* and other species. *Family,* Orchidaceæ. *Sex. Syst.* Gynandria Monandria. Vanelloes have an unctuous, aromatic taste, and a fragant smell, like that of some of the finer balsams, heightened with musk. Although chiefly used as perfumes, they are reputed to possess aphrodisiac virtues.

Vanil'la Aromat'ica, see Vanilla.

Vao, see Curare.

Vapeurs, 'vapors,' Hypochondriasis, Hysteria — *v. de Rate,* Hypochondriasis.

Va'por. The Ph. B. (1867) has several preparations for inhalation under this head.

Va'por Ac''idi Hydrocyan'ici, *Inhala'tion of Hydrocyan'ic Ac''id.* (*Acid. hydrocyanic. dilut.,* ♏x.–xv., *Aquæ frigid.,* fʒj. Mix in a suitable apparatus, and let the vapor that arises be inhaled. Ph. B., 1867.)

Va'por Chlo'ri, *Inhala'tion of Chlo'rine.* (*Calcis chlorinat.,* ʒij., *Aquæ frigid.,* q. s. Put the powder in a suitable apparatus, moisten it with the water, and let the vapor be inhaled. Ph. B., 1867.)

Va'por Coni'æ, *Inhala'tion of Coni'a.* (*Extract. conii,* gr. lx., *Liquor. potassæ,* fʒj., *Aquæ destillat.,* fʒx. M. Put 20 minims of the mixture on a sponge, in a suitable apparatus, so that the vapor of hot water passing over it may be inhaled. Ph. B., 1867.)

Va'por Creaso'ti, *Inhala'tion of Creasote.* (*Creasot.,* ♏xij., *Aquæ bullient.,* fʒviij. Mix the creasote and water in an apparatus so arranged that air may be made to pass through the solution, and may afterwards be inhaled. Ph. B., 1867.)

Va'por I'odi, *Inhala'tion of I'odine.* (*Tinct. iodi,* fʒj., *Aquæ,* fʒj. Mix in a suitable apparatus, and, having applied a gentle heat, let the vapor that arises be inhaled. Ph. B., 1867.)

Va'por San'guinis, 'vapor of the blood,' Gaz sanguinis.

Vapora'rium, *Atmiste'rion, Atmolu'tron, Lacon'icum, Bal'neum vapo'ris, Va'por bath,* (F.) *Bain de vapeur,* (from *vapor,* 'steam.') A remedy in rheumatic and cutaneous affections; and wherever it is important to impress the cutaneous surface. In the *Rus'sian Va'por Bath,* the vapor is produced by throwing water over hot stones, and the bather passes, at once, from the heated condition to cool or cold water, not only with impunity, but with positive pleasure. Its temperature is from 122° to 145°.

Trousseau has suggested, in the treatment of phthisis, *Vaporarium*—a room filled with steam—in which the patient always remains, — thus imitating the atmosphere of a moist, warm climate.

Vapora'rium, Hypocaustum, see Stove.

Vapora'tio, (*vaporare, vaporatum,* 'to emit steam or vapor,') Evaporation.

Vapo'res Uteri'ni, Hysteria.

Va'por, Flatulence — v. Bath, Vaporarium.

Va'porish, Hypochondriac, Hysterical.

Va'porous, Windy.

Va'pors, Hypochondriasis, Hysteria.

Va'pory, Hypochondriacal, Hysterical.

Vara, Barre.

Varaire, Veratrum album.

Varec', 'wrack,' Kelp, see Soda—*v. Vésiculeux,* Fucus vesiculosus.

Vare'ni, Ambuloflatulentus, Gout (wandering).

Varice, Varix.

Varicel'la, (dim. of *Variola,*) *Em'phlysis* seu *Exanthe'ma* seu *Syn'ochus varicel'la, Vari'ola lymphat'ica,* seu *spu'ria* seu *sylves'tris, Vari'olæ no'thæ* seu *illegit'imæ* seu *volat'icæ* seu *pucel'læ, Pseudovari'olæ, Æol'lion, Æol'lium, Chick'enpox,* (F.) *Varicelle, Pétite vérole volante, Vérolette, Vérette, Fausse variole.* A disease characterized by vesicles scattered over the body, which are glabrous, transparent, and about the size of peas. They appear in successive crops, are covered by a thin pellicle, and, about the third, fourth, or fifth day from their appearance, burst at the top, and concrete into small, puckered scabs, which rarely leave a pit in the skin. Three varieties have, sometimes, been designated. 1. The *V. lentifor'mes* or *lentic'ular chick'enpox,* which are irregularly circular, and flattened on the top; the fluid being at first whitish, and afterward straw-colored. This is the *common chickenpox.* 2. The *Varicella conifor'mis, Pem'phigus variolo'des, Vari'ola lymphat'ica, Crystal'li, Hydrach'nis, Varicel'la verruco'sa, Vari'olæ verruco'sæ, Conoid'al Chick'enpox, Glass'pox, Wind'pox, Sheep'pox, Swinepox, Waterpox, Waterjays,* in which the vesicles are generally acuminated, and the fluid pellucid throughout. 3. The *Varicel'la globula'ris* or *Hives,* in which the vesicles are globular and larger: the fluid being, at first, wheycolored, and afterwards yellowish. These divisions are, however, very arbitrary, for they are generally confounded.

Hornpox is a papular variety of varicella.

Variola has been, sometimes, mistaken for this disease, and conversely. A little attention to the history of the eruption in the two affections will prevent error. Varicella is not contagious. At times, it prevails epidemically. It cannot be propagated by inoculation. The treatment is extremely simple; rest, abstinence, and the antiphlogistic regimen being all that is generally required. See Varioloid.

Varicel'la Varioloide'a, Varioloid—v. Verrucosa, see Varicella.

Varicel'lar Fever, see Varioloid.

Varicifor'mes Paras'tatæ, (*varix,* pl. *varices,* and *forma,* 'form.') With some authors, the duets of the epididymis, because they seem knotty and varicose.

Varicobleph'aron, (*varix,* and *βλεφαρον,* 'eyelid.') A varicose tumor of the eyelid.

Varicoce'lê, (*varix,* and *κηλη,* 'a tumor,') *Var'icocele, Oscheoce'lē varico'sa, Her'nia varico'sa, Ra'mex varico'sus, Spermatoce'lē, Cirsoce'lē.* A varicose dilatation of the veins of the scrotum and spermatic cord; usually, by English and American writers, restricted to the latter, like Cirsocele. This latter variety of the disease is more common on the left side than the right. It appears under the form of a soft, doughy, unequal, knotty, compressible, and indolent tumor, situate in the course of the cord, and increasing from below upwards. It is less when the individual is in the recumbent posture, and increases when he is erect. It is, ordinarily, an affection of no moment, and is very common, requiring merely the use of a proper suspensory bandage. It has been advised, in bad cases, to tie the enlarged vein, but the operation is not free from danger induced by phlebitis. Sir A. Cooper has proposed the removal of a portion

of the scrotum, so as to render the remainder of it a natural bandage. This plan has been found effectual.

Varicom'phalus, (*varix*, and *ομφαλος*, 'the umbilicus.') Varicose tumor of the umbilicus; cirsomphalus.

Var'icose, *Varico'sus, Var'icous,* (F.) *Varique'ux,* (from *varix.*) Affected with varix: or belonging to, or connected with, varix; — as a *varicose vein;* a *varicose ulcer,* one kept up by *varices.*

Varicos'itas, see Varix — v. Conjunctivæ, Cirsophthalmia.

Varicos'ity, see Varix.

Varic'ula, dim. of *Varix.* Also, a varicose swelling of the veins of the tunica conjunctiva.

Vari'ola, *Vari'olæ, V. ve'ræ, Vari'oli, Empye'sis Vari'ola, Pes'tis* seu *Fe'bris variolo'sa, Æolec'thyma, Small-pox, Pox* (North of England), (from *varius,* 'spotted,' or from *vari,* 'pimples,') (F.) *Variole, Petite Vérole, Picote.* A disease, now of somewhat less interest than before the discovery of vaccination. It is of a very contagious nature, and is supposed to have been introduced into Europe from Asia, at an early period of the middle ages. It is characterized by fever, with pustules appearing from the third to the fifth day, and suppurating from the eighth to the tenth, and it possesses all the distinctive properties of the major exanthemata. It is capable of being produced by inoculation, but this *inoculated small-pox* — *Vari'ola inser'ta*—communicates the disease as readily through the air as the *natural small-pox,* or that received without inoculation.

Small-pox is distinguished into two classes, according to the character of the eruption, the *discrete'* or *distinct',* and the *con'fluent.* 1. In Variola Discre'ta, *Empye'sis vari'ola discre'ta, Vari'ola discre'ta benig'na, Vari'olæ regula'res* seu *discre'tæ, Distinct' small-pox,* the pustules are usually of the size of peas; distinct, distended, and circular; the intervening spaces being red; the fever inflammatory throughout, and ceasing when the eruption is complete. 2. In Vari'ola Con'fluens, *Empye'sis vari'ola con'fluens, Vari'olæ regula'res confluen'tes, Vesic'ulæ Di'væ Barbaræ, Con'fluent Small-pox,* (F.) *Variole confluente, Vésicules de Sainte-Barbe,* the pustules are confluent, or run together; flaccid and irregularly circumscribed; the intervening spaces being pale, and the accompanying fever typhoid. In children, diarrhœa, and, in adults, ptyalism, with swelling of the hands and feet, generally appear, towards the period of the *sec'ondary fe'ver, sta'dium suppuratio'nis,* which occurs from the tenth to the thirteenth day. The fever that precedes and accompanies the eruption is called the *Erup'tive fe'ver.* The prognosis is favorable in the distinct kind, if properly managed. The confluent is always dangerous, the unfavorable symptoms being — flattening of the pustules, or subsidence of the eruption; the breathing becoming much obstructed or oppressed; or marks of inflammatory and congestive affections occurring in the different viscera. The treatment of the distinct kind is very simple: the antiphlogistic regimen being all that is necessary. The confluent kind requires the same management as typhus fever.

When the pimples are confluent in patches, the patches being, however, separated by intervals of unaffected skin, it constitutes the clustered, coherent, or corymbose variety — *Vari'ola corymbo'sa.* When there are comparatively few pustules, and the general eruption scarcely passes beyond the vesicular stage, the term *Varicel'loid small-pox, Variola curta,* has been applied to it. Other forms of variolæ have been mentioned, such as the *petechial* and *hemorrhagic; V. cruenta,* or black pox; *V. gangrænosa,* &c.

Vari'ola Amboinen'sis, Frambœsia — v. Confluens, see Variola — v. Corymbosa, see Variola — V. curta, Varicelloid — v. Discreta, see Variola — v. Inserta, Variola (by inoculation) — v. Lymphatica, Varicella—v. Mitigata, Varioloid— v. Modificata, Varioloid.

Vari'ola, O'vine. A disease of sheep resembling, but not identical with, small-pox in man.

Vari'ola Semicon'fluens. Variola in which the pustules touch each other without coalescing.

Vari'ola Spu'ria, Varicella—v. Vaccina, Vaccina — v. Vaccinatorum, Varioloid — v. Varicelliformis, see Variola.

Vari'ola sine Vari'olis, *Vari'olous Fe'ver.* These terms are applied to cases occasionally observed during the prevalence of variola, in which the constitutional phenomena are present without the cutaneous eruption.

Vari'olæ, Variola — v. Equinæ, see Grease — v. Illegitimæ, Varicella — v. Modificatæ, Varioloid — v. Nothæ, Varicella — v. Pucellæ, Varicella — v. Sylvestris, Varicella — v. Tutoriæ, Vaccina — v. Veræ, Variola — v. Verrucosæ, see Variola — v. Volaticæ, Varicella.

Var'iolation, Inoculation (Small-pox).

Variole, Variola.

Varioleux, Variolous.

Vari'oli, Variola.

Vari'olic, Variolous.

Var'ioline, (from *variola.*) A term proposed by Dr. Wm. Farr for the specific zymotic principle by which small-pox is propagated.

Variolique, Variolous.

Var'ioloid, *Abort'ive Small-pox, Var'iolois, Variolo'ides, Vari'ola modifica'ta* seu *mitiga'ta* seu *vaccinato'rum, Varicel'la* (of some), *Varicel'la variolo'ide'a,* (*variola,* 'small-pox,' and *ειδος,* 'form,') (F.) *Variole modifiée,* — resembling small-pox. This is, really, small-pox, modified by previous inoculation or vaccination; and hence it has been properly called *modified small-pox.* That it is small-pox is proved by the fact, that matter, taken from a varioloid pustule, will communicate small-pox to one who has never been vaccinated. It is, almost always, a milder disease than small-pox; and this circumstance, with its shorter duration, exhibits the salutary effects of previous vaccination or inoculation. It has appeared epidemically.

Occasionally, when varioloid is epidemic, *varioloid* or *varicel'lar fe'ver* occurs without the eruption. This is the *varicel'læ sine varicel'lis* of Mr. Erasmus Wilson, who calls varioloid, *varicella.*

Var'ioloid Fe'ver, see Varioloid.

Var'iolois, Varioloid.

Vari'olous, *Variolo'sus, Vari'olic,* (F.) *Varioleux, Variolique.* Relating or belonging to variola.

Vari'olovaccina'tion. Inoculation with variolo-vaccine lymph.

Variqueux, (from *varix,*) Varicose.

Va'rix, gen. *Var'icis, Phlebeurys'ma, Phlebec'tasis, Her'nia* seu *Ecta'sia vena'rum, Angiecta'sia veno'sa, Ix'ia, Cir'sus, Ced'ma, Var'icose Vein,* (F.) *Varice,* is considered, by some, to come from the verb *variare,* 'to turn,' 'to twist,' — on account of the sinuosities of varicose veins. Dilatation of a vein; *Varicos'itas, Varicos'ity.* Varices are owing to local retardation of the venous circulation; and, in some cases, to relaxation of the parietes of the veins. They are very common in the superficial veins of the lower limbs, especially of pregnant females. The tumor or tumors formed by varices are soft, knotty, unequal, indolent, and livid; without pulsation, and yielding readily to the impression of the finger, but returning as soon as the compression is discontinued. Sometimes the vein bursts and gives rise to hemorrhage. The treatment is usually palliative, and consists in exerting a uniform and constant pressure upon the part, by means of an

appropriate bandage. The radical cure has, also, been obtained by extirpation, division of the vein or ligature. The second course is apt to be followed by phlebitis.

Va'rix, Aneuris'mal, see Aneurism, arterio-venous—v. Aneurysmicus, see Aneurism, arterio-venous — v. Arterial, see Aneurism.

Varo'li, Bridge of, Pons Varolii.

Va'rus, (*varius,* 'spotted.') A spot or pimple on the face; Acne, Ianthus. Also, Entogonyancon and Kyllosis, (from *varus,* 'having the legs bent.')

Va'rus Men'tagra, Sycosis — v. Punctatus, see Acne.

Vas, gen. *Va'sis,* Vessel, Penis — v. Aberrans Halleri, Vasculum aberrans — v. Deferens, see Deferens—v. Deferens mulieris, Tuba Fallopiana.

Vas Spira'lē. A small vein imbedded in the membrana basilaris of the cochlea, connected with the vessels of the lamina spiralis ossea.

Vas Urina'rium, Ureter.

Va'sa (pl. of *vas*) **Aberran'tia.** Peculiar ramifications of the biliary duct in the liver are so called by E. H. Weber. The term is also applied to long, slender vessels, which sometimes connect the brachial or capillary arteries with one of the arteries of the forearm.

Va'sa Absorben'tia, Absorbent vessels — v. Afferentia, see Afferent and Efferent — v. Brevia, see Brevia vasa — v. Capillaria, Capillary vessels —v. Chylifera seu Chylofera, Chyliferous vessels.

Va'sa Chylopoët'ica Urinifera. Bloodvessels, which, according to Lippi, convey drinks from the chyliferous vessels to the renal veins.

Va'sa Efferen'tia, see Afferent and Efferent — v. Excretoria testis, see Efferent — v. Exhalantia, Exhalant vessels — v. Graafiana, see Efferent — v. Hydragoga, Lymphatic vessels — v. Inferentia, see Afferent and Efferent.

Va'sa Intesti'ni Tenuis. Branches of the superior mesenteric artery distributed to the jejunum and ileum.

Va'sa Lac'tea, Chyliferous vessels, Lactiferous vessels — v. Lymphatica, Lymphatic vessels —v. Meningea, Meningeal vessels—v. Nutrientia, Vasa vasorum — v. Nutritia, Vasa vasorum — v. Recta, see Rete testis — v. Resorbentia, Absorbent vessels, Lymphatic vessels—v. Sedalia, Hæmorrhoidal vessels—v. Serosa, see Capillary vessels.

Va'sa Vaso'rum, 'vessels of vessels,' *V. nutrit''ia* seu *nutrien'tia,* (F.) *Vaisseaux des Vaisseaux.* Small vessels that supply larger ones with blood for their nutrition. The cardiac or coronary arteries and veins may be regarded as the vasa vasorum of the heart. However minutely a vessel is traced, its parietes will be found supplied with blood for their nutrition by a smaller vessel.

Va'sa Vortico'sa, *Ve'næ vortico'sæ,* (*vortex,* 'a whirlpool,') (F.) *Vaisseaux tourbillonnés, Tourbillon vasculaire.* The contorted vessels which creep on the choroid coat of the eye; ciliary veins.

Va'sal, (from *vas,* 'a vessel,') Vascular.

Vasco'a Amplexicaul'is, (after Vasco de Gama.) A South African shrub, *Nat. Ord.* Leguminosæ, the roots of which taste like liquorice. They are used, in decoction, in catarrh and phthisis, and are a good substitute for liquorice.

Vas'cula (pl. of *vasculum*) **Serpenti'na,** see Testicle.

Vas'cular, *Vascula'ris, Vasculo'sus, Angei'al, Va'sal,* (F.) *Vasculaire, Vasculeux,* (from *vas,* 'a vessel,' *vasculum,* 'a little vessel.') That which belongs or relates to vessels; — arterial, venous, or lymphatic; but generally restricted to blood-vessels only. Full of vessels. Bichat gave the name *Vas'cular sys'tem, Syste'ma vaso'rum, Hæmataul'ica,* to the bloodvessels, and of this he made two divisions. 1. The *Arte'rial sys'tem,* or *Sys'tem of red blood,* (F.) *Système vasculaire à sang rouge,* which commences with the radicles of the pulmonary veins; and includes the pulmonary veins, the left cavities of the heart, and the aorta with all its ramifications. The blood, in this system, is distributed to the general capillary system, where it loses its arterial quality and becomes venous. 2. The *Ve'nous sys'tem* or *Vas'cular sys'tem of black blood,* (F.) *Système vasculaire à sang noir,* carries the blood from every part of the system to the lungs. It takes its origin in the general capillary system; continues in the veins, right auricle and ventricle of the heart, and the pulmonary artery and its branches, and is finally lost in the capillary system of the lungs. See Circulation.

Vas'cular Glands, see Ganglion — v. Layer, see Tache embryonnaire — v. Radicles, Radical vessels — v. Substance of the kidney, see Kidney — v. System, see Vascular — v. System, intermediate, Capillary system — v. System, peripheral, Capillary system — v. Tumor, see Hæmorrhois— v. Tumor of the urethra, see Urethra.

Vascular'ity, *Vascular'itas,* (F.) *Vascularité.* The state of being vascular, or largely supplied with vessels.

Vas'cularization. A condition of bone associated with fungating ostitis, in which the tissue becomes canaliculated, and is said by some observers to be occupied by capillary vessels. It is due to the greater influx of fluid pabulum to the bone.

Vasculeux, Vascular.

Vas'culomo'tor, Vasomotor.

Vasculo'sa, (from *vasculum,*) Choroidea tunica.

Vas'culum, (dim. of *vas,* 'a vessel,') Penis, Vessel.

Vas'culum Aber'rans, (*aberrare,* 'to wander from,') *Vas aber'rans Halleri, Duc'tus aber'rans, Aber'rant duct, Appen'dix to the Epidid'ymis.* A small convoluted duct, of variable length, generally connected with the duct of the epididymis, immediately before the commencement of the vas deferens.

Vase à Saigner, 'bleeding vessel,' Cup.

Vasoden'tine, (*vasum,* 'a vessel,' and *dens,* gen. *dentis,* 'a tooth.') A modification of the dentine by the permanent distribution of red blood to it through vascular canals. (Owen.)

Vasomo'tor, *Vas'culomo'tor,* (F.) *Vaso-moteur, Vasculo-moteur,* (from *vas,* 'a vessel,' and *motor,* 'mover.') That which causes movement in the vessels. Fibres of the great sympathetic are 'vasomotor.'

Vas'tus. That which is *vast,* or has a great extent, as —

Vas'tus Exter'nus and Vas'tus Inter'nus. Two considerable fleshy masses, which form part of the triceps cruris. See Triceps.

Va'sum, Vessel.

Va'ter, Ampul'la of, (F.) *Ampoule de Vater,* (called after Vater, a German anatomist.) An ampulla formed by the orifice of the pancreatic duct in the duodenum.

Va'ter, Cor'puscles of, Corpuscles, Pacinian.

Vate'ria In'dica, (after Abraham Vater, a physician and botanist of Wittenberg,) see Copal.

Vaticin'ium Chiroman'ticum, (*vaticinor,* 'I foretell,') Chiromancy.

Vault, ([old F.] *Voulte,* 'a round or turn,' from *volvere, volutum,* 'to turn,') *For'nix, Cam'era,* (F.) *Voûte.* A name given by anatomists to several parts which are rounded superiorly; concave and arched inferiorly, — as the *Vault of the cranium* or the upper part of the skull,—the *Palatine vault* or *roof of the mouth,* &c.

Vault'ing of the Chest, Voussure précordiale — v. Precordial, Voussure précordiale.

Vauque'line, (after Vauquelin, the French chemist,) Strychnia.

Veal Broth, Veal tea.

Veal Tea, *Veal Broth.* This may be made in the same manner as beef tea, by using a pound

of fillet of *veal*, free from fat and sliced, and a pint and a half of *boiling water;* and boiling for half an hour. It may also be made with the same quantity of the fleshy part of a knuckle of veal.

Vecor'dia, 'want of reason,' Idiotism.

Vec'tis, (*vehere, vectum,* 'to carry,') Lever — v. Elevatorius, Elevator — v. Triploides, Elevator, triploid.

Vec'tor Canal', (*vehere, vectum,* 'to carry,') Tube, Fallopian.

Veg''etable, *Vegetab'ilis,* (F.) *Végétal,* (from *vegetus,* 'lively,' and *vegeo* or *vigeo,* 'I flourish.') Appertaining or relating to plants. A vegetable, *Phyton,* (φυτον,) is an organized being devoid of sensation and voluntary motion, which receives its nutriment, essentially, by the roots. The study of vegetables is *Phytol'ogy, Phytolog''ia.*

Végétal, Vegetable.

Vegetal'ity, *Vegetal'itas,* (F.) *Végétalité,* (from *vegeo* or *vigeo,* 'I am active.') The aggregate of physiological phenomena, which exist alone in the vegetable, but are common to both plants and animals. See Animality.

Vegeta'rian, see Vegetarianism.

Vegeta'rianism, (same etymon as Vegetation.) A modern term, employed to designate the view, that man, for his full mental and corporeal development, ought to subsist on the direct productions of the vegetable kingdom, and totally abstain from flesh and blood. An embracer and practiser of this doctrine is called a *vegetarian.*

Végétatif, Vegetative.

Vegeta'tion, *Vegeta'tio,* 'growing like a plant,' (from *vegeo* or *vigeo,* 'I am active.') A morbid production, which rises as an excrescence on an organ or part, as on the valves of the heart. The term is also applied to the fleshy granulation, *Hypersarcosis,* which sometimes arises at the surfaces of wounds or ulcers.

Vegeta'tion, Dendrit'ic, Cancer, villous.

Veg''etative, *Vegetati'vus, Phy'ticus,* (F.) *Végétatif.* Having relation to growth or nutrition; hence, the *vegetative* or nutritive functions.

Veg''etative Lay'er, see Tache embryonnaire.

Vegetati'vus, Vegetative.

Ve'hicle, *Vehic'ulum,* 'a carriage,' *Oche'ma, Constit'uens,* (F.) *Véhicule,* (from *vehere,* 'to carry.') Anything which serves to carry; thus air is the *vehicle* of sound; the arteries are the *vehicles* of the blood, &c. In Pharmacy, the name *vehicle* is given to any excipient, or to substances which serve as the media of administration for any medicine.

Véhicule, Vehicle.

Veiled Puff, see Cavernous respiration.

Vein, *Ve'na,* dim. *Ve'nula, Phlebs, Phleps,* (F.) *Veine.* The veins are vessels for the conveyance of blood from every part of the body to the heart. They are found wherever there are arteries, and altogether form the *venous system,* which may be subdivided into two distinct secondary systems. 1. The *Gen'eral ve'nous sys'tem,* which commences in all the organs by very minute radicles, and terminates in the heart by the cava and the coronary vein. 2. The *Abdom'inal ve'nous sys'tem,* which is limited to the abdominal cavity; commences, also, by a great number of branches, and terminates in the liver by a single trunk, which subdivides in that organ. It is called, also, the *Sys'tem of the Ve'na Por'ta* or the *Por'tal Sys'tem.* See Porta. The veins form two sets, one *deep-seat'ed, Ve'næ satel'lites, V. com'ites, V. concom'ites,* which accompany the arteries; the other *superfic''ial* or *subcuta'neous.* Their parietes, which are thinner than those of the arteries, are composed of three coats; the outermost, of areolar tissue interwoven with elastic fibres or a muscular stratum in the larger veins; the middle coat elastic, with muscular fibres, longitudinal as well as transverse — the *proper membrane;* the other, the *common* or *inner membrane,* which is thin, polished, and has numerous duplicatures or folds forming parabolic valves. These valves are most numerous in the veins of the lower extremities. The coats of the veins are supplied with small arteries or *vasa vasorum,* veins, and lymphatics. They have not as many nervous filaments as the arteries. These filaments — vasomotor — are from the great sympathetic.

TABLE OF THE VEINS.

1. VEINS WHICH FORM THE SUPERIOR VENA CAVA.

- 1. Subclavians, which receive the
  - 1. Axillary.
    - 1. Basilic, formed of the
      - 1. Posterior ulnar.
      - 2. Anterior ulnar.
      - 3. Median basilic.
    - 2. Cephalic, forming the
      - 1. Superficial radial.
      - 2. Median cephalic.
    - 3. Circumflex veins.
    - 4. Inferior scapular.
    - 5. Long thoracic.
    - 6. Superior thoracic.
    - 7. Acromial veins.
  - 2. External Jugular.
    - 1. Internal maxillary, composed of the
      - 1. Pterygoid.
      - 2. Sphenopalatine.
      - 3. Alveolar.
      - 4. Infraörbitar.
      - 5. Mental.
      - 6. Inferior dental.
      - 7. Deep temporal.
    - 2. Superficial temporal, composed of the
      - 1. Middle temporal.
      - 2. Anterior auriculars.
      - 3. Transverse of the face.
    - 3. Posterior auricular. The trunk then takes the name of External jugular, and in its course along the neck, receives —
    - 4. Cervical cutaneous.
    - 5. Trachelo-scapular, &c.
  - 3. Internal Jugular.
    - 1. Superior cerebral veins.
    - 2. Veins of the corpus striatum.
    - 3. Veins of the choroid plexus.
    - 4. Superior cerebellar veins.
    - 5. Inferior cerebellar veins.
    - 6. Lateral and inferior cerebral veins.
    - 7. Ophthalmic vein, composed of the
      - 1. Lachrymal.
      - 2. Central of the retina.
      - 3. Infraörbitar.
      - 4. Ciliary.
      - 5. Ethmoidal.
      - 6. Palpebral, and
      - 7. Nasal veins.
    - 8. Facial vein, called angular, near the eye, receiving the
      - 1. Palpebral, and
      - 2. Superciliary veins.
      - 3. Dorsals of the nose.
      - 4. Superior { Coronaries
      - 5. Inferior { of the lip.
      - 6. Several buccal, and
      - 7. Masseteric veins.
      - 8. Ranine.
      - 9. Submental, and
      - 10. Inferior palatine.
    - 9. Lingual and pharyngeal veins.
    - 10. Superior thyroid.
    - 11. Occipital, and
    - 12. Veins of the diploë.
- 2. Right internal mammary vein.
- 3. Inferior thyroid vein, opening into the vena cava, between the two subclavians.
- 4. Vena azygos, which receives the
  - 1. Right bronchial.
  - 2. Intercostal veins.
  - 3. Semiäzygos.

2. VEINS WHICH FORM THE INFERIOR VENA CAVA.

- 1. Common Iliacs.
  - 1. External iliacs, formed by the —
    - 1. Femoral or Crural, which is a continuation of the
    - 2. Popliteal, commencing by 3. veins which accompany the fibular arteries, and receiving the —
      - 1. External saphena and
      - 2. Internal saphena, which receive —
        - 1. Several abdominal veins.
        - 2. Circumflex iliac, and
        - 3. External pudic veins.
  - 2. Internal iliacs, which receive the —
    - 1. Vesical veins commencing with the
      - 1. Dorsal veins of the penis in the male.
      - 2. Veins of the clitoris in the female.
    - 2. Sacrolateral veins.

1. Common Iliacs.
   3. Middle sacral vein.
   4. Lumbar veins — four in number on each side, commencing by — 1. An abdominal branch. 2. A dorsal branch.
   5. Spermatic veins, commencing with — 1. The spermatic plexus in the male. 2. The veins of the ovarium, Fallopian tube, &c., in the female.
   6. Renal veins.
   7. Capsular and adipose veins.
   8. Hepatic veins.
   9. Middle, 10. Left, and 11. Right, hepatic veins.
   12. Inferior diaphragmatic veins, two in number.

3. VEINS OF THE HEART.

1. Great right coronary.
2. Small right coronary.
3. Left coronary veins.

4. VEINS WHICH FORM THE VENA PORTA.

1. Splenic vein.
   1. Veins which correspond to the vasa brevia.
   2. Right and left gastroëpiploic.
   3. Duodenal, and
   4. Pancreatic veins.
   5. Coronary vein of the stomach, and
   6. Small mesenteric vein.
2. Superior mesenteric vein.

VEIN OF BRESCHET, see Diploic — v. Bronchial, left, see Azygous — v. Coronary, Cardiac veins — v. Demiazygous, see Azygous — v. Diploetic, see Diploic — v. Frontal, see Facial vein — v. of Galen, see Cardiac veins and Choroides venæ — v. Intralobular, Hepatic veins — v. Palatolabial, Facial vein — v. Peroneomalleolar, Saphena minor — v. Saphenous, see Saphena — v. Semiazygous, see Azygous vein — v. Superior intercostal, left, see Azygous vein — v. Suprahepatic, Hepatic veins — v. Tibiomalleolar, Saphena, great — v. Varicose, Varix.

(For other Veins not here mentioned, as *Ulnar Vein, Radial Vein,* &c., see *Ulnar, Radial,* &c., and Table of Veins above-mentioned.)

Veine, Vein — *v. Cave,* Cava vena — *v. Céphalique,* Jugular vein, internal — *v. Céphalique du pouce,* Cephalic vein of the thumb — *v. Cubitale cutanée,* Basilic vein — *v. Fessière,* Gluteal vein — *v. Hypogastrique,* Hypogastric vein — *v. de Médine,* Dracunculus — *v. Porte,* Porta vena — *v. Prélombo-thoracique,* Azygous vein — *v. Préparate,* Facial vein — *v. Radiale Cutanée,* Cephalic vein — *v. sans Paire,* Azygous vein — *v. Trachélo-sous-cutanée,* Jugular vein, external.

Veines Artérielles, Arterial veins — *v. Ciliaires,* Ciliary veins — *v. Sous-clavières,* Subclavian veins — *v. Sus-hépatiques,* Hepatic veins.

Veineux, Venous.

Vein'stone, Phlebolite.

Veinule, (dim. of *veine,*) Venula.

Vejuco de Mavacure, see Curare.

Vela'men (gen. *Velam'inis*) **Nati'vum,** 'a native covering,' Integument.

Velamen'ta (pl. of *velamentum,* 'a covering') **Bombyc''ina,** Villous membranes — v. Cerebralia, Meninges — v. Infantis, Membranes of the fœtus.

Velamen'tum Abdomina'le, 'an abdominal covering,' Peritonæum — v. Corporis commune, Integument — v. Linguæ, Glossoëpiglottic ligament — v. Nativum, Integument.

Vélar, Erysimum.

Vellari'na. A pale yellow oil from the hydrocotyle Asiatica, — from *Vellarai,* the native name of this East Indian plant. It has a reputation in the treatment of leprous affections.

Vellica'tion, (*vellicare, vellicatum,* 'to twitch,') Tic.

Velosyn'thesis, (*velum,* and συνθεσις, 'a putting together,') Staphylorraphy.

Ve'lum, 'a veil, a cover,' Velum pendulum palati — v. Apophysi vermiformi obtentum, Valvula Vieussenii — v. Interjectum cerebelli, Valvula Vieussenii.

VE'LUM INTERPOS'ITUM. A vascular membrane, reflected from the pia mater into the interior of the brain through the transverse fissure. It separates the under surface of the body of the fornix from the cavity of the third ventricle.

VE'LUM MEDULLA'RE ANTI'CUM, Valvula Vieussenii.

VE'LUM MEDULLA'RĒ INFE'RIUS, (F.) *Voile médullaire inférieur.* A name given, by Reil, to the medullary band or strip, by which the cerebellum communicates with the medulla.

VE'LUM MEDULLA'RĒ POSTE'RIUS seu POSTI'CUS seu SEMILUNA'RĒ, *Val'vula Tari'ni.* The small posterior valve of the cerebellum; a thin medullary plate, situate between the medulla oblongata and vermis inferior, in front of the nodulus.

VE'LUM PALA'TI, Velum pendulum palati — v. Palatinum, Velum pendulum palati.

VE'LUM PEN'DULUM PALA'TI, 'pendulous veil of the palate,' *Ve'lum, V. Palati'num* seu *Pala'ti* seu *Pen'dulum* seu *Staphyli'num, Pala'tum pen'dulum* seu *mol'lē* seu *mob'ilē, Pen'dulum* seu *Claus'trum Pala'ti, Pala'tum Mol'lē, Soft Pal'ate,* (F.) *Septum Staphylin* (Ch.), *Voile du Palais.* A movable, soft, and broad septum, attached to the posterior extremity of the palatine arch, and separating the mouth from the pharynx. Its form is nearly quadrilateral. Its *anterior surface* corresponds to the mouth; the *posterior* to the pharynx. Its *superior edge* is fixed to the palatine arch; the inferior is free, floating, and has an appendix at its middle — the *uvula.* The lateral margins of the velum are held down by two folds, separated from each other by a triangular space; these are called the *pillars;* the anterior passes to the base of the tongue, the posterior to the sides of the pharynx. The velum palati is formed of a mucous coat, which contains numerous follicles, and of a muscular stratum, in which are the peristaphylini interni and p. externi muscles, the glossostaphylini, the pharyngostaphylini, and the palatostaphylinus. The arteries of the velum palati are furnished by the internal maxillary, the labial and the superior pharyngeal. Its veins open into the internal jugular. Its nerves are sent off from the ganglion of Meckel, and come from the palatine branches. The glossopharyngeal nerve, likewise, sends it some filaments.

VE'LUM PUPIL'LÆ, Pupillary membrane — v. Staphylinum, Velum pendulum palati — v. Vieussenii, Valvula Vieussenii.

Vel'vet Leaf, Abutilon Avicennæ, Pareira.

Ve'na, Vein, Penis — v. Alba renum, Ureter — v. Alba thoracis, Thoracic duct — v. Apoplectica, Jugular vein, internal — v. Arteriosa, Porta vena, Pulmonary artery — v. Azygos, see Azygos — v. Capitis, Cephalic vein — v. Cava, Cava vena — v. Cubiti interior, Basilic vein.

VE'NA COR'PORIS STRIA'TI. One of the two veins forming the venæ Galeni or deep cerebral veins.

VE'NA DEMIAZ'YGOS, see Azygos — v. Diploëticæ, see Diploic — v. Falcis cerebri, Sinus longitudinalis inferior — v. Galeni, see Cardiac veins and Choroideæ venæ — v. Hemiazyga, see Azygous vein — v. Lactea, Porta vena — v. Lienalis, Splenic vein — v. Magna, Porta vena — v. Medina Arabum, Dracunculus — v. Medinensis, Dracunculus — v. Ostiaria, Porta vena — v. Pari carens, Azygos (vena) — v. sine Pari, Azygos (vena) — v. Portalis, Porta vena — v. Portarum, Porta vena — v. ad Portas, Porta vena — v. quæ ad Portas est, Porta vena — v. Præparata, Facial vein — v. Ramalis, Porta vena.

VE'NA SALVATEL'LA. The vein of the little finger, situate over the fourth metacarpal space.

VE'NA SPLE'NICA, Splenic vein — v. Stelechiæa,

Porta vena—v. Subalaris, Vena axillaris—v. Terminalis, Circulus venosus.

Ve'næ (pl. of *vena*) **Apoplec'ticæ,** Jugular veins — v. Cavæ hepatis, Hepatic veins — v. Centrales, Intralobular veins — v. Comites, see Vein — v. Concomites, see Vein — v. Galeni, Choroid (veins) — v. Innominatæ, see Innominatum — v. Intralobulares, Intralobular veins — v. Lacteæ, Chyliferous vessels — v. Lymphaticæ, Lymphatic vessels — v. Micantes, see Artery — v. Minimæ Cordis, see Foramina Thebesii — v. Pulsatiles, see Artery — v. Satellites, see Vein — v. Soporales, Jugular veins — v. Spermaticæ, Spermatic veins — v. Sphagitides, Jugular veins — v. Vorticosæ, Vasa varticosa.

Venæsec'tio, (*vena,* 'a vein,' and *secare, sectum,* 'to cut,') see Bloodletting — v. Revulsoria, see Bloodletting.

Ve'nal, Venous.

Venefic''ium, (*venenum,* and *facere,* 'to make,') Poisoning.

Venena'tion, (from *venenum,*) Poison, Poisoning, Venom.

Venena'tus, Venomous.

Vénéneux, Poisonous.

Ven'enose, Venomous.

Vene'num, Poison, Venom.

Vene'real, *Vene'reus, Aphrodisi'acus Vene'rean,* (F.) *Vénérien,* (from *Venus,* gen. *Ven'eris,* 'the goddess of pleasure.') That which relates to the pleasures of love. In a more restricted sense, the word *vene'real*—as well as *aphrodit'ic*—is synonymous with *syphilit'ic,* and also with *syphilis.* Some authors have proposed that those diseases which are produced by excess in venery should be called *vene'real;* and that *syphilit'ic* should be limited to those which are the result of impure connection. It is, also, used in the same sense as aphrodisiac, — adapted to excite venereal desire.

Vene'real Desire', Libido — v. Diseases, Syphilis.

Vénérien, Venereal. Also, one laboring under syphilis; as *Hôpital des vénériens.*

Veneriv'agus, (*venus,* gen. *veneris,* 'the pleasures of love,' and *vagare,* 'to wander,') Libidinous.

Ven'ery, (from *venus,* gen. *veneris.*) The pleasures of love. Sexual communication. Coition.

Venesec'tion, (*vena,* 'a vein,' and *secare, sectum,* 'to cut,') see Bloodletting.

Venimeux, Venomous.

Venin, (from *venenum,*) Venom.

Venivel (Ceyl.), Pereiria medica.

Veno Beno, see Falsifications, table of.

Ven'om, *Vene'num, Tox'icum, Venena'tion,* (F.) *Venin.* A poisonous fluid secreted by certain animals, as the viper, in a state of health, and which they preserve in a particular reservoir, to use as a means of attack or defence. It differs, according to some, from *virus,* as the latter is always the result of a morbid process, which may be produced by the individuals who receive it, in their turn, and be transmitted to others.

Ven'om, Quick'ening, Sperm—v. Vital, Sperm.

Ven'omous, *Venena'tus, Ven'enose,* (F.) *Venimeux.* An epithet applied to animals which have a secretion of venom, as the viper, rattlesnake, &c., as well as to the venom itself; and, by some, to liquids in the animal body, which have been so perverted by previous disease, that their contact occasions serious mischief in sound individuals; as happens in hydrophobia. Virus is more commonly used in this case.

Venos'itas, (from *vena,* 'a vein,') Venosity—v. Sanguinis, Prædominium sanguinis venosi.

Venos'ity, *Venos'itas, Ve'nousness, Ve'nous state* or *cachex'ia, Malana'mia, Melano'sis universa'lis,* (F.) *Mélanémie,* (from *vena,* 'a vein.') A condition in which, it has been supposed, the blood is moved slowly; is more venous; and the venous blood itself in greater quantity. This state is said to be chiefly observed in hemorrhoids, gout, hypochondriasis, melancholia, &c. In general, it signifies abundance of veins in a part; afflux of blood into the veins.

Ve'nous, *Ve'nal, Veno'sus,* (F.) *Veineux,* (from *vena,* 'a vein.') Appertaining to a vein, or to the blood of the veins; as *venous* cachexia, *venous* pulse.

Ve'nous Cachex'ia, Venosity — v. Hum, Bruit de Diable — v. Pulsation or Pulse, Pulsus venarum — v. State, Venosity—v. System, see Vascular — v. System, abdominal, Porta vena.

Ve'nous Sys'tem of Ja'cobson. A system of vessels in the three classes of vertebrated animals other than the mammalia, which forms a communication between the vena porta and the vena cava.

Ve'nousness, Venosity.

Vent, ([L.] *ventus,*) Wind.

Ven'ter, gen. *Ven'tris,* Abdomen, Belly, Uterus. In law, venter designates the maternal parentage of children. Thus, if A were B's child by his first wife, he would be described in law as 'by the first *venter.*' 'A died seised, leaving two infant daughters by different *venters.*' In anatomy, the term is applied to a broad surface of a muscle or a bone, as *venter* of the ilium.

Ven'ter I'mus, 'lowest belly,' Abdomen, Hypogastrium—v. Inferius, Abdomen—v. Infimus, Abdomen — v. Magnus, Ingluvies — v. Medius, Thorax — v. Musculi, see Muscle — v. Parvus, Hypogastrium — v. Propendens, Hysteroloxia anterior — v. Renum, Pelvis of the kidney — v. Supremus, Cavum cranii.

Venteaux, (from *ventus,* 'wind,') Windy.

Ventila'tion, *Ventila'tio,* (from *ventilare, ventilatum,* 'to fan,') (F.) *Ventilation, Aérage, Aération.* The act of renewing the air of vessels, hospitals, and apartments, or of situations where many people are collected together. The utility of such renewal must be evident, when it is considered that atmospheric air loses its oxygen during respiration, and carbonic acid supplies its place. Stagnant air, also, becomes loaded with numerous impurities, and where numbers are crowded together, a large amount of zymotic or fermentable matter is exhaled from the lungs, and taken in again during respiration. This is, indeed, a great cause of the mortality which occurs in camps and cities, and hence one of the greatest hygienic improvements of modern times has been a proper attention to circulation of air, and various arrangements have been made for this purpose in hospitals and similar establishments. They are almost all, however, based on the renewal of air by suction, forcing, or both.

Ventilation is one of the most valuable additions to our stock of therapeutical agencies in many diseases. Instruments used for the purpose of renewing the air, in ships, apartments, &c., have been called *ventilators.* The term has, also, been applied to the free exposure of wounds and ulcers to the air; as well as to the act of directing a current of air upon them,—by the common bellows, for example.

Ventosité, Flatulence.

Ventos'ity, (from *ventus,* 'wind,') Flatulence.

Ventouses Scarifiées, (from *ventosus,* 'full of wind,') Cupping with the scarificator.

Ventouses Sèches, Cupping, dry.

Ven'tral, (from *venter,* 'the belly.') Abdominal.

Ven'tral Her'nia, *Her'nia ventra'lis.* Direct hernia occurring in any part of the abdomen. It is most frequently found between the recti muscles. When the hernia takes place below the xiphoid cartilage, it is called *epigas'tric her'nia,*

hernia epigas'trica; when in the loins, *lum'bar her'nia, her'nia lumba'ris.*

Ventra'lê, 'a belly band,' Belt (Russian).

VENTRA'LĒ CUTA'NEUM, 'cutaneous apron,' (F.) *Tablier.* An elongation of the nymphæ in the Bosjesman female, which hangs down before the vulva like an apron.

Ventre, (*venter,* 'the belly,') Abdomen — *v. Inférieur,* Abdomen—*v. Relâché,* see Diarrhœa—*v. Resserré,* Constipation.

Ven'trê Inspicien'do, Dê, see De ventre inspiciendo.

Ven'tricle, *Ventric'ulus,* (dim. of *venter,* 'a belly,') (F.) *Ventricule.* Literally, a *little belly.* A name given, in anatomy, to various parts.

VEN'TRICLE OF ARAN'TIUS, *V.* or *Cav'ity of Aranzi,* (F.) *Ventricule d'Arantius* ou *d'Aranzi.* A small cavity, lined with gray substance, at the point of the calamus scriptorius.

VEN'TRICLE OF THE CEREBELLUM. see Ventricles of the brain — v. Fourth, see Ventricles of the brain—v. Fifth, see Ventricles of the brain—v. Pulmonary, V. right — v. of the Septum, see Ventricles of the brain — v. Sylvian, see Ventricles of the brain — v. Third, see Ventricles of the brain.

Ven'tricles of the Brain, *Ventric'uli* seu *Cavita'tes* seu *Si'nus Cer'ebri,* (F.) *Ventricules du cerveau,* are five cavities in the interior of that organ, which are distinguished into the *lat'eral ven'tricles, mid'dle ven'tricle, fourth ven'tricle* or *ven'tricle of the cerebel'lum,* and *fifth ven'tricle.* The *mid'dle ven'tricle* or *third ven'tricle,* (F.) *Ventricule moyen du cerveau,* is situate in front of the pineal gland. It is bounded, *above,* by the tela choroidea and the fornix; *below,* by a portion of cerebral substance, which separates it from the base of the cranium; *laterally,* by the thalami nervorum opticorum; *anteriorly,* by a medullary cord, called the *anterior commissure;* and, *posteriorly,* by another medullary cord, called the *posterior commissure.* It communicates with the lateral ventricles by two openings, situate behind the anterior pillar or crus of the fornix. The *Lat'eral ven'tricles, Ventric'uli latera'les* seu *mag'ni* seu *majo'res* seu *prio'res* seu *superio'res* seu *tricor'nes,* (F.) *Ventricules latéraux,* are two in number. They are large, and, owing to their considerable curvature, occupy a great part of the cerebral centre. They are bounded, *above,* by the inferior surface of the corpus callosum; *anteriorly,* by the curved portion of the same body; *posteriorly,* by a considerable mass of cerebral substance; and, *internally,* they are separated from each other by the septum of the ventricles, — a medullary plate, which is given off from the lower part of the corpus callosum. The lateral ventricles have, in their upper and anterior portion, the *Cor'pora stria'ta, Thal'ami op'tici,* and *Tæ'nia semicircula'ris:* — their inferior portion contains the *Cor'pus fimbria'tum, Cor'nu Ammo'nis,* &c. Each of the ventricles has a *body* or *centre* —*cella me'dia*—and *horns,* or *cornua.* The *Fourth ventricle, Ventric'ulus cerebel'li* seu *quar'tus* seu *Aran'tii, Si'nus rhomboï'deus,* (F.) *Quatrième ventricule,* is situate beneath the *aqueduct of Sylvius,* by which it communicates with the third ventricle. It extends from this aqueduct to the upper part of the medulla; and is seated in the substance of the tuber annulare. The *Fifth ven'tricle, Ventric'ulus sep'ti pellu'cidi, Incisu'ra sep'ti, Ven'tricle of the sep'tum, Syl'vian ven'tricle,* (F.) *Cinquième ventricule,* is the small serous cavity between the laminæ of the septum lucidum; called, also, *Sinus of the septum lu'cidum, S. of the median septum* (Ch.).

VEN'TRICLES OF THE HEART, *Ventric'uli cor'dis, Spe'cus cor'dis,* (F.) *Ventricules du cœur,* are two in number. The *Right ven'tricle, Pul'monary ven'tricle, Ventric'ulus ante'rior* seu *pri'mus* seu *pulmona'lis,* (F.) *Ventricule droit* ou *pulmonaire,* is situate at the forepart of the heart, the base and apex corresponding to those of the heart. In it are seen the *Colum'næ car'neæ* and *Chor'dæ tendineæ.* The right ventriele communieates with the right auricle by the *Os'tium veno'sum,* and from it the *Pul'monary ar'tery* arises. Around the auricular orifice is a tendinous margin or ring, from which the tricuspid valve is given off. The use of the ventricle is to send the blood, by its contraction, along the pulmonary artery to the lungs. The *Left ven'tricle, Ventric'ulus aör'ticus* seu *poste'rior* seu *secun'dus,* (F.) *Ventricule gauche* ou *aortique,* is situate at the posterior and left part of the heart. Its parietes are thrice thieker and stronger than those of the right, owing to its having to send the blood over the whole system. The inner surface has the same general appearance as that of the right. The *Colum'næ car'neæ* and *Chor'dæ tendin'eæ* are, however, mueh stronger. It communicates with the left auricle by means of the *Mi'tral valve;* and from it proceeds the largest bloodvessel of the body — the aorta.

VEN'TRICLES OF THE LAR'YNX, *Ventric'uli* seu *Sac'culi laryngæ'i, Ventric'uli Morgagn'ii, Alve'oli* seu *Si'nus laryngei* seu *Morgagnii, Si'nuses of the lar'ynx,* (F.) *Ventricules* ou *Sinus du larynx,* are two depressions in the larynx, comprised between the superior and inferior ligaments.

VEN'TRICLES, LAT'ERAL, see Ventricles of the brain — v. Left, see Ventricles of the heart — v. Middle, see Ventricles of the brain — v. Pulmonary, see Ventricles of the heart — v. Right, see Ventricles of the heart.

Ven'tricose, Abdominous.

Ven'tricous, *Ven'tricose, Ventrico'sus,* (F.) *Ventru.* Bellied. Having a large belly. See Abdominous.

Ventric'ular, *Ventricula'ris,* (F.) *Ventriculaire.* Relating to a ventricle.

Ventricule, Ventricle — *v. Aortique,* Ventricle, left — *v. d'Arantius* ou *d'Aranzi,* Ventriele of Arantius—*v. Cinquième,* Ventricle, fifth—*v. Droit,* Ventricle, right — *v. Gauche,* Ventricle, left — *v. Moyen du Cerveau,* Ventricle, middle, of the brain — *v. Pulmonaire,* Ventricle, right — *v. Quatrième,* Ventricle, fourth.

Ventricules du Cerveau, Ventricles of the brain — *v. du Cœur,* Ventricles of the heart — *v. Latéraux,* Ventricles, lateral.

Ventric'uli (pl. of *ventriculus*) **Cor'dis,** Ventricles of the heart — v. Dilatatio, Gastrectasis — v. Dissolutio, Gastromalacia — v. Duræ matris, Sinuses of the dura mater — v. Emollitio, Gastromalacia—v. Exulceratio, Gastrelcosis—v. Fluxus, Gastrorrhœa — v. Inflammatio, Gastritis — v. Laryngei, Ventricles of the larynx — v. Laterales, see Ventricles, lateral, of the brain — v. Magni, Ventricles, lateral, of the brain — v. Majores, Ventricles, lateral — v. Metamorphosis gelatiniformis, Gastromalacia — v. Morgagnii, Ventricles of the larynx — v. Perforatio, Gastrobrosis — v. Priores, Ventricles, lateral — v. Pseudophlogosis resolutiva et colliquativa, Gastromalacia — v. Superiores, Ventricles, lateral — v. Tricornes, Ventricles, lateral — v. Ulceratio, Gastrelcosis.

Ventric'ulus, (dim. of *Venter,* 'belly,') Stomach, Ventricle — v. Anterior, Ventricle, right — v. Aorticus, Ventricle, left — v. Arantii, see Ventricles of the brain — v. Bulbosus, V. callosus.

VENTRIC'ULUS CALLO'SUS, *V. Bulbo'sus,* 'callous stomach.' The *gizzard* or *third stomach* of the gallinaceous bird, (F.) *Gésier.* It consists of a double-bellied or *digastric* muscle; is lined by a firm cuticle, and forms a kind of pouch, depending from the alimentary tube, in which the second stomach terminates, and from which the duodenum or *Ventriculus succenturia'tus* issues.

In the interior of the gizzard numerous pebbles are found, which seem to be destined to aid in the trituration of the food. The gizzard is an organ of mastication, and is possessed of great muscular power.

Ventric'ulus Cerebel'li, see Ventricles of the brain — v. Intestinalis, Abomasus — v. Perforatus, Gastrobrosis — v. Posterior, Ventricle, left—v. Primus, Ventricle, right—v. Pulmonalis, Ventricle, right — v. Quartus, see Ventricles of the brain — v. Secundus, Ventricle, left—v. Septi pellucidi, see Ventricles of the brain — v. Succenturiatus, Duodenum; see Ventriculus callosus.

Ven'tricus, Abdominous.

Véntrière, (from *venter,* 'belly, uterus,') Midwife.

Ventrilocu'tion, see Engastrimyth.

Ventriloque, (*venter,* 'belly,' and *loquor,* 'I speak,') Engastrimythus.

Ventril'oquism, see Engastrimyth.

Ventril'oquist, Engastrimyth.

Ventril'oquy, see Engastrimyth.

Ventrio'sus, Abdominous.

Ventrip'otent, (*venter,* and *potens,* 'powerful,') Abdominous.

Ven'troïn'guinal, *Ventroïnguina'lis,* (from *venter,* 'belly,' and *inguen,* 'groin.') Relating or appertaining to the abdomen and groin; as '*ventroinguinal* hernia.' See Hernia (inguinal).

Ventros'itas, (from *venter,*) Physconia.

Ventro'sus, Abdominous.

Vents, (pl. of *vent,* [L.] *ventus,* 'wind,') Flatulence.

Ven'tus, gen. *Ven'ti,* Wind.

Ve'nula, (dim. of *vena,*) *Phleb'ion,* (F.) *Veinule, Vénule.* A small vein. Hippocrates seems to use it in the same sense as *Arteria.* See Vein.

Ve'nulæ Centra'les, Intralobular veins — v. Intralobulares, Intralobular veins.

Vénule, Venula.

Ve'nus, gen. *Ven'eris,* 'the goddess of love,' Clitoris, Coition, Cuprum, Venery — v. Crystals of, Cupri subacetas — *v. Crystaux de,* Cupri subacetas.

Ver, (from *vermis,*) Worm — *v. Cucurbitin,* Tænia solium — *v. Cutane,* Dracunculus — *v. Filaire,* Dracunculus—*v. de Guinée,* Dracunculus — *v. Luisant,* Cicindela — *v. de Médine,* Dracunculus — *v. Sanguin,* Hæmatozoon — *v. Solitaire,* Bothriocephalus latus, Tænia solium.

Véraire Blanc, Veratrum album.

Vératre Blanc, Veratrum album.

Vera'tria, Veratrina.

Veratri'na, *Vera'tria, Veratri'num, Ver'atrin, Ver'atrine,* (from *veratrum.*) A vegetable alkali, found in the seeds of *Vera'trum sabadil'la, V. officina'lē, Helo'nias officina'lis,* and *Asagræ'a officina'lis,* which are known in commeree under the names *Cebadil'la, Cevadilla,* and *Sebadilla,* and are imported from Mexico. They usually occur, in commerce, mixed with the fruit of the plant, are two or three lines long, of a black color, and are shining, flat, shrivelled, winged, and elastic seeds. *Veratrine* is solid, white, pulverulent, and inodorous; of a very acrid taste; decomposable by heat; very soluble in water, and soluble in alcohol. When prepared in the usual manner, it still contains other substances,—*Sabadil'lin, Virid'ia, Veratroid'ia,* gum resin of the sabadilla, and black greasy matter. It is extremely poisonous, and but little used internally in medicine. Magendie gave it as an emetic and drastic in very small doses. It has been recommended to be applied in the way of friction, or endermically, (from gr. v. to xx. to ℥j. of lard or cerate,) in various neuralgic affections. The two alkaloids, *Virid'ia* and *Veratroid'a,* which are obtained from veratria, are depressants of the circulation. Viridia produces death, however, by paralysis of the respiratory nervous system; Veratroidia, by asphyxia. Viridia is soluble, Veratroidia insoluble, in ether.

The following is the formula for the preparation of Veratria in the Ph. U. S., 1873: Take of *Cevadilla,* ℥xxiv., *Alcohol, Sulphuric acid, Water of ammonia, Purified animal charcoal, Magnesia* and *water,* each a sufficient quantity. Digest the cevadilla with eight pints of alcohol, for four hours, in a distillatory apparatus, with a heat approaching to boiling, and pour off the liquid. To the residue add another gallon of the alcohol, mixed with the portion distilled; digest for an hour, and pour off the liquid. Digest for a third time with the same quantity of alcohol, together with the portion last distilled, and again pour off. Press the remains of the cevadilla, mix and strain the liquids, and, by means of a water-bath, distil off the alcohol. Boil the residue three or four times in water acidulated with sulphuric acid, mix and strain the liquids and evaporate to the consistence of syrup. Add magnesia in slight excess, shake the mixture frequently, then express, and wash what remains. Repeat the expression and washing two or three times, and having dried the residue, digest it with a gentle heat several times in alcohol, and strain after each digestion. Distil off the alcohol from the mixed liquid, boil the residue for fifteen minutes in water mixed with a little sulphuric acid and purified animal charcoal, and strain. Having thoroughly washed what remains, mix the washings with the strained liquid, evaporate with a moderate heat to the consistence of thin syrup, and drop in sufficient water of ammonia to precipitate the veratria. Lastly, wash the alkaloid with water, and dry it with a gentle heat.

An analogous form is given in the British Pharmacopœia for 1867.

Ver'atrine, Veratrina.

Ver'atrine or Vera'tria, Sul'phate of, *Vera'triæ sul'phas,* (F.) *Sulfate de Vératrine,* possesses the same virtues as veratrine. A solution of one grain in two ounces of distilled water has been suggested as a substitute for the *Eau médicinale d'Husson* — a celebrated gout remedy — in the dose of f℥j. to f℥ij.

Veratri'num, Veratrina.

Veratroid'ia, see Veratrina.

Vera'trum Al'bum, (*verē atrum,* 'truly black,' from the color of the roots [?],) *Helleb'orus al'bus, Elleb'orum al'bum, Elleb'orus al'bus, Cher'bachem, White hel'lebore, Lang'wort,* (F.) *Vératre blanc, Hellébore* ou *Ellébore blanc, Véraire blanc, Varaire, Tue-chien. Sex. Syst.* Polygamia Monœcia. *Nat. Ord.* Melanthaceæ (Lindley).

The root or rhizoma of this common European plant is indebted to the veratrine for its properties. It is inodorous; has a bitterish, acrid, nauseous taste, and is violently emetic and purgative, even when applied to an ulcerated surface. It is, also, possessed of errhine properties, and acts, externally, as a stimulant. It is rarely exhibited internally. Sometimes it is given as a *sneezing powder;* but it operates with great violence. It forms, also, an itch ointment. See Unguentum veratriæ.

Vera'trum Lu'teum, Chamælirium luteum.

Vera'trum Sabadil'la, *Sabadil'la, Sabatil'la, Cebadil'la, Ca'nis interfec'tor, Cans'ticum America'num, Cevadil'la, C. Hispano'rum, Sevadil'la, Hor'deum cans'ticum,* (F.) *Cévadille.* The seed—dried fruit — of this plant, *Cevadil'la, Sabadil'la,* (Ph. U. S. and Ph. B.,) have been used mostly as anthelmintics. Dose, gr. ij. to a child four years old. It possesses the same general properties as the veratrum album.

Powdered sabadilla, under the name *Poudre des Capuchins,* was formerly employed for destroying lice and vermin.

Vera'trum Viri'de, *Amer'ican* or *Green Hel'-*

lebore, Swamp hel'lebore, In'dian poke, In'dian Un'cas, Poke'weed, Bear'weed, Itch'weed, Tickleweed, Earth'gall, Dev'ilbit, Wolf'bane, Pup'pet root, is indigenous in the swampy districts of almost every part of the United States. The properties of the rhizoma are like those of the genus. It has been brought forward, however, in recent times, in the Southern States, as a powerful sedative in inflammatory diseases. Dose, eight drops of a saturated tincture every three hours, until its sedative effects are induced.

Verbas'culum, Primula veris.

Verbas'cum Ala'tum, (supposed to be a corruption from *barbascum,* 'bearded,' owing to its hairy coat; *barba,* 'a beard' [?],) V. thapsus — v. Album, V. thapsus — v. Collinum, V. thapsus — v. Crassifolium, V. thapsus — v. Elongatum, V. thapsus — v. Lychnitis, V. thapsus — v. Montanum, V. thapsus.

Verbas'cum Ni'grum, *Cande'la re'gia, Thap'sus barba'tus, Tap'sus barba'tus, Candela'ria, Lana'ria, Black Mul'lein;* and Verbas'cum Thap'sus, *V. thapsoï'des* seu *ala'tum* seu *colli'num* seu *al'bum* seu *crassifo'lium* seu *elonga'tum* seu *lychni'tis* seu *monta'num* seu *sim'plex, Phlog'mus, Phlo'mus, Phlox, Great broadleaved* or *yellow Mul'lein, High Taper, Cow's Lung'wort,* (F.) *Molène, Bouillon blanc, Bonhomme, Cierge de notre dame, Herbe Sainte - Fiacre. Ord.* Scrophulariaceæ. *Sex. Syst.* Pentandria Monogynia, — especially the latter, — have been used as emollients, applied externally in the form of fomentation. The large leaves have been chosen for this purpose. Occasionally, the mucilage which they contain has been extracted by decoction or infusion, and administered in pectoral affections.

Verbas'cum Sim'plex, V. thapsus — v. Thapsoides, see V. nigrum — v. Thapsus, see V. nigrum.

Verbe'na Hasta'ta, *V. panicula'ta, Blue ver'vain, Sim'pler's Joy,* an American species, is more bitter than the European, and said to be emetic.

Verbe'na Officina'lis, *Verbe'na, Dichro'mus, Verbe'naca, Periste'rium, Hierobot'anē, Her'ba sa'cra, Ver'vain, Pur'vain,* (Prov.) *Ber'bine, Juno's Tears,* (F.) *Verveine, Herbe à tous les maux. Ord.* Verbenaceæ. *Sex. Syst.* Diandria Monogynia. A plant formerly held sacred; used in sacrifices, and suspended round the neck as an amulet. In the form of cataplasm, it is said to have relieved obstinate headaches, and to have been of service in scrofula. It is not used.

Verbe'na Panicula'ta, V. hastata.

Verbe'na Urticifo'lia, an indigenous species, has been used in poisoning from Rhus toxicodendron.

Verbe'naca, Verbena officinalis.

Verbesi'na Acmel'la, (changed from *verbena* [?],) Spilanthus acmella.

Verbesi'na Virgin'ica, *Crown Beard.* Indigenous. *Order,* Compositæ. A decoction of the roots is used by the Indians as a diaphoretic and depurative.

Vercoquin, (*ver,* 'a worm,' and *coquin,* 'a rascal,') *Phreni'tis vermino'sa.* A form of phrenitis, attributed to the presence of a worm in the brain.

Verdet, (from *verd,* [L.] *viridis,* 'green.') Cupri subacetas.

Ver'digris, (from [F.] *verd,* [L.] *viridis,* 'green,' and *gris,* 'gray,') Cupri subacetas.

Verdjus, Verjuice.

Veren'da, (from *vereor,* 'I reverence,') Genital organs.

Ver'etrum, (from *vereor* [?],) Penis.

Vérette, Varicella.

Verge, (from [L.] *virga,* 'a rod,') Penis — v. *d'Or,* Solidago virgaurea — v. *Racines de la,* see Cavernous bodies.

Vergerette de Philadelphie, Erigeron Philadelphicum.

Vergettures, (from *virga,* 'a rod,') Vibices.

Vérificateurs de Décès, 'verifiers of death,' see Bodysearcher.

Ver'juice, *Om'phacē, Ompha'cion, Ompha'cium,* (F.) *Verjus, Verdjus,* (*verd,* 'green,' and *jus,* 'juice.') 'The juice of green fruits.' A sour kind of grape. Also, an acid liquor, prepared from very sour grapes or crabapples. It is principally used in culinary preparations; although occasionally an ingredient in medicinal compounds. See Vitis vinifera.

Verjus, Verjuice.

Ver'mes, pl. of *vermis,* Worms — v. Cerebri, Choroid plexus — v. Intestini seu Intestinales, see Worms.

Vermicel'li (I.), (from [L.] *vermiculus,* dim. of *vermis,* 'a worm,' from its resemblance,) see Turundæ Italicæ.

Vermiculaire Brûlante, Sedum.

Vermic'ular, dim. of *vermis,* 'a worm,' *Ver'miform.* Wormlike; as the *vermicular* or wormlike motion of peristole.

Vermicula'ris, Lumbricalis, Sedum.

Vermic'uli Spermat'ici, (pl. of *vermiculus,* dim. of *vermis,* 'a worm,') Spermatozoa.

Vermic'ulum, *Vermyc'ilum.* An elixir; a tincture according to Ruland and Johnson.

Vermic'ulus Capilla'ris, 'hair-worm,' Dracunculus.

Ver'miform, *Vermic'ular, Vermicula'ris, Vermifor'mis,* (F.) *Vermiculaire, Vermiforme,* (*vermis,* 'a worm,' and *forma,* 'form.') That which resembles a worm.

Ver'miform Proc''esses, *Proces'sus* seu *Protuberan'tiæ* seu *appen'dices vermifor'mes, Ver'mes, Montic'uli cerebel'li, Worms,* (F.) *Éminences vermiformes du cervelet,* are two medullary projections at the surface of the cerebellum. The *supe'rior ver'miform proc''ess, Ver'mis supe'rior cerebel'li,* is an elongated projection at the anterior and middle part of the superior surface of the cerebellum; and the *infe'rior ver'miform proc''ess, Ver'mis infe'rior cerebel'li, Pyr'amid of Malacarne',* is a somewhat larger projection, situate in the depression at the inferior surface of the same organ. The inferior vermiform process is usually described as consisting of three portions, — the *pyramid,* the *uvula,* and the *nodulus.* The anterior portion of the superior vermiform process is elevated, and termed *Montic'ulus.* In front of this process is a notch, which encircles the corpora quadrigemina posteriorly, called *Incisu'ra cerebel'li ante'rior;* and behind the isthmus is another notch, called *Incisu'ra cerebel'li poste'rior.*

Ver'mifuge, (*vermis,* 'a worm,' and *fugare,* 'to drive away,') Anthelmintic.

Ver'mifuge, Mathieu's. This consisted of two distinct electuaries; the one for killing, the other for expelling tapeworm. The former is made of an ounce of *tin filings,* and six drachms of *fern root.*

Vermif'ugus, (Vermifuge,) Anthelmintic.

Vermil'ion, (from *ver,* 'a worm,' the color being like that from the cochineal insect; it also means cochineal,) Hydrargyri sulphuretum rubrum.

Vermillon de Provence, Antimonii sulphuretum rubrum.

Vermina'tio, (from *vermis,* 'a worm,') Helminthiasis, Vermination.

Vermina'tion, Helminthiasis — v. Cutaneous, Malis.

Vermineux, Verminous.

Ver'minous, *Vermino'sus,* (F.) *Verminenx,* (from *vermis,* 'a worm.') That which is caused by worms; as '*a verminous affection.*'

Ver'mis, (from *vertere,* 'to wind about' [?],) see Vermiform processes — v. Bombycinus, Cornu Ammonis — v. Cerebelli, Vermiform process — v.

Cerebri, Fever, Hungary—v. Cucurbitinus, Tænia solium — v. Digiti, Paronychia.

Vermit''io, (from *vermis,* 'a worm,') Helminthiasis.

Vermont', Min'eral Wa'ters of. *Missisquoi Springs,* at Sheldon, in this State, about ten miles in a northeasterly direction from St. Albans, have been much extolled of late years as eutrophics. They are said to contain *chlorides of sodium, magnesium,* and *calcium; carbonates of soda, magnesia, manganese,* and *iron; alumina* and *silica.* There are several other springs in the same vicinity. The *Alburg Springs,* in Grand Isle Co., are sulphurous waters. There are calcic waters, containing free nitrogen gas, at Clarendon, Rutland Co.; sulphur waters at Highgate, Franklin Co., and Newbury, Orange Co.; and alkaline waters — the *Welden Spring* — at St. Albans, Franklin Co.

Vernet les Bains. These are thermal sulphurous waters at Vernet, in the Eastern Pyrenees, and are useful as baths in cases in which a long course of weak sulphur waters is needed.

Ver'nix Caseo'sa, 'cheesy varnish,' (F.) *Vernis Caséeux.* The fatty varnish or deposit, often found on the fœtus, which is secreted by the sebaceous follicles of the skin.

Ver'nix Sic'ca, 'dry varnish,' Sandarac.

Verno'nia Anthelmin'tica, (after William Vernon, an English botanist and traveller in North America,) *Ascarici'da anthelmin'tica, Calagi'rah, Calage'ri.* A plant which is indigenous in India. *Ord.* Compositæ. *Sex. Syst.* Syngenesia Polygamia Superflua. It has great celebrity in the East Indies, and is a bitter tonic; but the seeds are chiefly used as an anthelmintic in cases of ascarides and lumbrici in children.

Verno'nia Noveboracen'sis, *Iron weed, Flat top;* an indigenous plant, whose purple flowers appear in August and September, is reported to possess cathartic properties.

Vérole, (from *varius,* 'spotted' [?],) Syphilis — *v. Grande,* Syphilis — *v. Grosse,* Syphilis — *v. Petite,* Variola — *v. Petite volante,* Varicella.

Vérolé, Syphilitic.

Vérolette, (dim. of *vérole,*) Varicella.

Vérolique, Syphilitic.

Veroni'ca or **Veron'ica,** (after St. Veronica,) *V. officina'lis* seu *Tournefor'tii* seu *mas, The'a German'ica, Beton'ica Pau'li, Chamæ'drys, Male Veronica, Pluel'lin, Offic''inal Speed'well, Eye'bright, Paul's Bet'ony,* (F.) *Véronique, Thé d'Europe, Herbe aux ladres. Ord.* Scrophulariaceæ. *Sex. Syst.* Diandria Monogynia. This plant was once used as a pectoral.

Veroni'ca Aquat'ica, V. beccabunga.

Veroni'ca Beccabun'ga, *Beccabun'ga, Anagal'lis* seu *Veronica aquat'ica, La'ver German'icum, Cepæ'a, Wa'ter Pim'pernel, Brook'lime, Brook'lime Speed'well, Wa'ter Speed'well, Neck'weed, Wa'ter Pur'slain,* (Sc.) *Wa'terpur'pie,* (F.) *Véronique cressonée.* This plant was formerly used in a variety of diseases. It is, however, almost insipid and inodorous, and has been long banished from practice.

Veroni'ca Mas, Veronica — v. Officinalis, Veronica.

Veroni'ca Peregri'na, *Neck'weed, Pur'slain, Speed'well;* indigenous; flowering from April to June, has been given internally in scrofulosis, and is applied as a wash to scrofulous tumors.

Veroni'ca Purpu'rea, Betonica officinalis.

Veroni'ca Quinquefo'lia. An East Indian remedy for leprosy. The root is the part employed.

Veroni'ca Tournefort'ii, Veronica — v. Virginica, Leptandra Virginica.

Véronique, Veronica — *v. Cressonée,* Veronica beccabunga.

Ver'pa, Penis.

Ver'pus, Circumcisus, Medius digitus.

Verre, Vitrum — *v. d'Antimoine,* Antimonii vitrum.

Verres à Double Foyer, see Spectacles.

Verru'ca, dim. *Verru'cula, Ecphy'ma verru'ca, Phymato'sis verruco'sa,* an *Excrescence,* a *Wart,* (Prov.) *Wret,* (F.) *Verrue, Poireau.* A small, hard, mammillary tumor, which forms at the surface of the skin, and particularly on that of the hands and face. Warts are generally rugous at the surface, and broad at the base; their roots being implanted in the derma by whitish filaments, which are dense, semifibrous, and very numerous. The flat wart is called *Verruca simplex;* the pedunculated, *Verruca digitata.*

Warts may be destroyed by caustic, or removed by excision. Their vitality is, generally, not great.

Verru'ca Carno'sa, Condyloma — v. Digitata, see Verruca—v. Formicaria, Formica—v. Minor, Thymion.

Verru'ca Necrogen'ica, *Anatom'ical Tu'bercle.* A name proposed for productions of morbid epithelium, caused, in dissecting, by the acrid fluids of the dead body.

Verru'ca Palpebra'rum, see Hydatid — v. Pensilis, Acrochordon — v. Rhagoïdea, Thymion — v. Simplex, see Verruca.

Verru'cæ A'ni, see Condyloma.

Verruca'ria, (from *verruca,*) Calendula officinalis, Heliotropium Europæum.

Ver'rucose, Warty.

Ver'rucous, Warty.

Verru'cula, see Verruca.

Verrue, Verruca.

Verruqueux, Warty.

Vers, pl. of *ver,* Worms.

Verse Charms, see Charm.

Ver'sio, (*vertere, versum,* 'to turn,') Turning — v. Fœtûs, Turning — v. Spontanea, Evolution, spontaneous — v. Uteri, Hysteroloxia.

Version, Turning—v. Cephalic, see Turning—v. Podalic, see Turning.

Vert-de-gris, ([F.] *vert,* 'green,' and *gris,* 'gray,') Cupri subacetas.

Ver'tebra Denta'ta, 'toothed vertebra,' Axis — v. Dorsi prima, Lophia—v. Lumborum prima, Asphaltites—v. Magna, Sacrum—v. Proëminens seu Prominens, see Vertebræ.

Ver'tebræ, pl. of *vertebra, Spon'dyli, Spon'dles, Whet'tlebones,* (F.) *Vertèbres,* (from *vertere,* 'to turn.') This name has been given to the bones which by their union form the vertebral or spinal column. The vertebræ are short, thick, very angular bones, twenty-four in number, and situate one above another. The *body* — *centrum,* of Owen—of the vertebra is the middle and anterior portion. Above and below it is articulated, by means of a fibrocartilage, with the contiguous vertebræ. The *Proc''esses,* (F.) *Masses apophysaires,* of each vertebra are: 1. The *spi'nous proc''ess,* situate behind, and in the median line. 2. The two *trans'verse proc''esses,* standing off from each side. 3. The four *artic'ular* or *oblique' proc''esses*—*zygapophyses,* of Owen—two *supe'rior* and two *infe'rior* — which serve to unite the vertebræ with each other. These transverse and articulating processes are made continuous with the lateral and posterior parts of the body of the vertebra by narrow bony portions or pedicles, on each of which are notches. These, by their union with similar notches in the contiguous vertebra, form the lateral foramina, (F.) *Trous de conjugaison,* through which the spinal nerves leave the vertebral canal. The different processes are united with each other, so as to form a kind of *ring* of the lateral and posterior parts of the vertebra; and the foramen within this,— that is, between the body and processes, *fora'men vertebra'lē rachid'ium,*—concurs in forming the verte-

bral canal. The *arch* or *lam'ina* of a vertebra, *neurapoph'ysis*, is the part from which the several processes project. The vertebræ have particular characters, according to the regions they occupy. They are divided into seven *cer'vical*, twelve *dor'sal*, and five *lum'bar*. The first cervical is called *at'las;* the second, *ax'is* or *ver'tebra denta'ta;* and the seventh, *ver'tebra proëm'inens* seu *prom'inens*. The vertebræ are articulated with each other. Those of the back are joined, moreover, to the ribs by their articulating surfaces — *parapoph'yses*. The first or atlas is articulated with the occipital bone; and the last lumbar vertebra with the sacrum. The cervical vertebræ are developed by nine points of ossification; the dorsal and lumbar by eight.

Ver'tebral, *Vertebra'lis*. That which relates or belongs to the vertebræ.

Ver'tebral Ar'tery, *Poste'rior cer'ebral ar'tery* (Ch.), is the largest of the branches of the subclavian. It arises from the posterior part of that vessel; is lodged in a canal, (F.) *Petit canal vertébral*, formed by the foramina in the transverse processes; enters the cranium, and proceeds to anastomose with its fellow of the opposite side, and to form the *Bas'ilary ar'tery*. Besides the branches sent to the neck, the vertebral artery gives off the *ante'rior* and *poste'rior spi'nal ar'teries*, and the *infe'rior cerebel'lous*, in the cavity of the cranium.

Ver'tebral Canal', see Vertebral column.

Ver'tebral Col'umn, *Rac'his, Rha'chis, No'tus, Acnes'tis, Cari'na, C. hom'inis, Spi'na, S. dor'si* seu *vertebra'lis, Colum'na spina'lis* seu *vertebra'lis* seu *dor'si, Dor'sum, Ter'gum, Compa'ges Vertebra'rum, Acan'tha, Sa'cra fis'tula, Hi'era Sy'rinx, Spine, Backbone*, (Sc.) *Backsprent*, (F.) *Colonne vertébrale, Épine du dos, Échine*. A kind of bony column, situate at the posterior and central part of the trunk; extending from the head to the sacrum; flexible in every direction, yet very solid, and hollowed by a *canal* called *ver'tebral*, which gives it lightness without diminishing its strength, and runs through its whole length. The vertebral column is formed by the superposition of the vertebræ. It represents a pyramid, whose base is below. Anteriorly, it is convex in the neck; concave in the back, and convex, again, in the loins. Behind, the curvatures are of course the reverse of these. There is also in the dorsal region a lateral curvature, the concavity of which is towards the left side. Considered as a whole, the vertebral column has an *ante'rior* or *prespi'nal* surface; a *poste'rior* or *spi'nal;* two *lat'eral;* a *base;* and an *a'pex* or top. In the nomenclature of Chaussier, the anterior surface, in the neck, is called *trache'lian;* in the back, *predor'sal;* and in the loins, *prelum'bar*. The dorsal surface has at its middle the spinous processes; and at its sides the *ver'tebral gut'ters*, (F.) *Gouttières vertébrales*, formed by the union of the *ver'tebral plates*, (F.) *Lames vertébrales*, which, by their junction, constitute the spinous processes. These are filled by the sacrospinalis muscle. The sides or lateral surfaces present the foramina resulting from the union of the *ver'tebral vot'ches*, (F.) *Échancrures vertébrales*. These are called *ver'tebral foram'ina*, (F.) *Trous de conjugaison*, and give passage to the *ver'tebral nerves*. The base of the vertebral column is oblique, to unite with the sacrum, and forms with it an angle called *sa'crover'tebral an'gle* or *prom'ontory*. The *a'pex* or *top* of the vertebral column is articulated with the occipital bone. Sometimes the term *ver'tebral col'umn* includes the whole of the column from the occipital bone to the extremity of the coccyx. The *Ver'tebral* or *spi'nal* or *rachid'ian canal', So'len, Cana'lis vertebra'lis* seu *medul'lâ spina'lis, Spe'cus pro medul'lâ spina'li* seu *vertebra'lis*, exists through the whole of the vertebral column, whose curvatures it follows. It is continuous, above, with the cranium; below, with the sacral canal, if we consider the vertebræ to terminate at the sacrum. It is lined by a prolongation of the meninges, forming the *The'ca vertebra'lis*, and lodges the spinal marrow.

The vertebral column, which unites lightness with solidity, serves to support the head and chest. It is the seat of all the movements of the trunk, the weight of which it transmits to the pelvis. It lodges and protects the spinal marrow, and gives passage to the vertebral nerves, and to numerous vessels.

Ver'tebral Disease', *Rachial'gia* (of some), *Ca'ries of the Ver'tebræ, Spondylarthroc'acē, Spondyloc'acē, Kypho'sis inflammato'ria* seu *paralyt'ica, Gibbos'itas cario'sa, Ca'ries vertebra'rum, Spondylal'gia, Spondylopyo'sis, Tuberculo'sis Vertebra'rum*. The spinal column is liable to distortion (see Hump), at times, without the vertebræ being much, if at all, diseased. At other times, a more formidable affection is induced; the vertebræ becoming carious, and the intervertebral cartilages ulcerated; followed by a more or less complete loss of power over the lower extremities. In such case, on examining the spine, one or more of the spinous processes is found to project beyond the rest. The disease was first well described by Mr. Percival Pott; and hence it has been called by the French, *Maladie de Pott, Malum* seu *Gib'bus Pott'ii, Pott's disease* or *boss* or *cur'vature*. It usually occurs in scrofulous subjects, and the treatment consists in establishing a counterirritation by blisters, issues, or the moxa, opposite the transvere processes of the diseased vertebræ. The sore must be suffered to remain open, and the patient kept in the horizontal posture until the use of the limbs is recovered; employing tonics, the free admission of fresh air, &c., at the same time.

Ver'tebral Fora'men. See Vertebræ.

Ver'tebral Lig'aments, (F.) *Ligaments vertébraux, Surtouts ligamenteux de la colonne vertébrale*, are distinguished into *anterior* and *posterior*. They consist of long, ligamentous coverings; the *anterior* occupying the anterior part of the vertebral column; and the *posterior* seeming to arise from the occipitoäxoid ligament, and seated behind the bodies of the vertebræ, from the axis to the sacrum.

Ver'tebral Nerve, Trisplanchnic.

Ver'tebral Nerves, *Spi'nal Nerves*, (F.) *Nerfs rachidiens*, spring successively from the spinal marrow, from its origin to its termination. These nerves — 30 pairs in all — arise by two roots; one *ante'rior*, from the *an'terior* or *an'terolat'eral column* of the spinal marrow, and the other *poste'rior*, from the *poste'rior* or *pos'terolat'eral column*, and afterwards issue by the vertebral and sacral foramina. Each of these roots seems to have a distinct function; the *posterior* being destined to convey sensation to parts; the *anterior*, motion. The posterior root, however, gives occasion, by its influence on the anterior, to reflex movements; while the anterior, by reacting on the posterior, induces the phenomena of *recur'rent sensibil'ity*. On the posterior root, before its junction with the anterior, there is a ganglion, *Inter'vertebral gan'glion*. Of the 30 pairs of nerves, 7 are *cervical*, 12 *dorsal*, 5 *lumbar*, and 6 *sacral*. See Nerves.

Ver'tebral Polyarthri'tis, see Polyarthritis.

Ver'tebrated, *Vertebra'tus*, (F.) *Vertébré*. Provided with vertebræ.

Vertèbres, Vertebræ.

Vertebrodym'ia, (*vertebra*, and *δυειν*, 'to mingle,') see Somatodymia.

Vertebroïl'iac Lig'ament, Ileolumbar ligament.

Ver'tex, gen. *Ver'ticis, Cor'yphē, Corys, Acro-*

ri'a, Spon'dylus. The top or highest part or *crown* of the head, (F.) *Sommet;* (Sc.) *Can'tel, Now, Pal'lat, Pal'ad.* See Sinciput.

VER'TEX COR'DIS, Mucro cordis — v. Cubiti, Olecranon — v. Palpitans, Fontanella — v. Presentation, see Presentation.

Vertib'ulum, (from *vertere,* 'to turn.') The rounded head of a bone, as of the humerus; a joint; trepan.

Vertic'ula, (from *vertere,* 'to turn,') Articulation.

Vertic'ulum, Articulation.

Vertic'ulus, Articulation.

Vertige, Vertigo — *v. Stomacale,* Vertigo a stomacho læso.

Vertig''inous, *Vertigino'sus,* (old Eng. and Prov.) *Totty,* (F.) *Vertigineux.* Relating or pertaining to vertigo; *Gid'dy, Diz'zy.*

Verti'go, gen. *Vertig''inis,* (from *vertere,* 'to turn,') *Di'nos, Ilin'gos, Di'nus* seu *Hallucina'tio* seu *Autal'gia verti'go, Circumgyra'tio, Gid'diness, Diz'ziness, Swim'ming of the head,* (Prov.) *Swee, Swin'nying,* (F.) *Vertige, Étourdissement.* A state in which it seems that all objects are turning round, or that the individual himself is performing a movement of gyration, *Verti'go gyro'sa.* Two varieties have been designated: — *sim'ple verti'go,* where the objects are seen; and *scotodyn'ia,* in which the sight is obscured, and the individual often falls. Vertigo is dependent upon the condition of the brain as affected by the circulation, and often announces an attack of apoplexy or epilepsy.

VERTI'GO A STOM'ACHO LÆ'SO, *Abdom'inal Diz'ziness,* (F.) *Vertige Stomacale.* Vertigo dependent on or associated with well-marked gastric symptoms.

VERTI'GO GYRO'SA, see Vertigo—v. Tenebricosa, Scotodynia.

Veru'gas (S.), (from *verruca,* 'a wart.') A peculiar disease, affecting certain localities of Peru, which manifests itself by sorethroat, pains in the bones, and other febrile symptoms. In the course of a few days, an eruption of red pimples or boils appears. These sometimes increase in magnitude till they become nearly as large as an egg, and discharge blood copiously. It is ascribed to the water of certain springs in the valleys, and especially in that of Surea, called *Aqua de Veruga.*

Ve'ru Monta'num, 'a mountain spit,' Gallinaginis caput.

Ver'vain, Verbena officinalis—v. Blue, Verbena hastata.

Verveine, Verbena officinalis.

Vesa'lius, Fora'men of. A small aperture in the sphenoid bone, at the inner side of the foramen ovale.

Vesa'nia, *Vesa'niæ,* (from *ve,* negative, and *sanus,* 'sound,') 'madness.' Derangement of the intellectual and moral faculties, without coma or fever. Many nosologists have used this as a generic term, under which they have included the different species of mental alienation, hypochondriasis, somnambulism, and some even hydrophobia. See Nosology.

VESA'NIA MA'NIA, Mania.

Vesa'niæ, Insanity, Vesania.

Vesi'ca, 'a bladder,' Urinary bladder—v. Bilinaria, Gall-bladder—v. Cordis, see Pericardium—v. Fellea, Gall-bladder—v. Intestinalis, Vesicula umbilicalis—v. Natatoria, Airbladder—v. Prostatica, see Ejaculatory ducts.

VESI'CA RUP'TA. Rupture of the urinary bladder.

VESI'CA SACCA'TA, Cystostenochoria—v. Sacculata, Bladder, sacculated, Cystostenochoria — v. Urinaria, Urinary bladder.

Vesi'cæ Irritabil'itas, Cysterethismus — v. Unguinosæ tendinum, Bursæ mucosæ.

Ves'ical, *Vesica'lis,* (F.) *Vésical,* (from *vesica.*) That which belongs or relates to the bladder.

VES'ICAL AR'TERIES vary in number and origin. The umbilical artery always sends off two or three: the middle hemorrhoidal, internal pudic, and obturator furnish others, which ramify and anastomose in the parietes of the bladder; the hypogastric furnishes one which is somewhat larger, the *Vesieoprostatic* (Ch.), and proceeds to the *bas-fond* of the bladder, sending numerous ramifications to it as well as to the surrounding parts.

VES'ICAL GAN'GLIA, see Spermatic ganglion — v. Ligaments, see Urinary bladder — v. Oxide, Oxide, cystic — v. Triangle, see Urinary bladder.

VES'ICAL VEINS, much more numerous than the arteries, open into the hypogastric plexus.

Ves'icant, (from *vesica,*) Blister.

Vesica'rium, Ovarium.

Vesica'tion, *Vesica'tio,* (from *vesica.*) The action of a vesicant. The formation of blisters.

Vésication Volante (F.), 'a flying vesication.' A temporary vesication produced by art.

Vésicatoire, Blister — *v. Magistral,* Blister, magistral — *v. Volant,* see Blister.

Vesicato'rium, Blister.

Ves'icle, (dim. of *vesica,*) Vesicula — v. Allantoid, Allantois — v. Blastodermic, see Molecule — v. Cowpox, see Vaccination.

VES'ICLE OF BAER, *Vesic'ula Baerii,* (F.) *Vésicule de Baer.* The ovule in the follicle of De Graaf; which was well described by Baer in 1827.

VES'ICLE OF DEVEL'OPMENT, *V. of Evolu'tion.* A vesicle or cyst concerned in histogeny.

VES'ICLE OF EVOLU'TION, V. of development — v. Germinal, see Molecule — v. Malignant, Anthrax — v. Purkinjean, see Molecule — v. Umbilical, Vesicula umbilicalis — v. Valentinian, see Molecule — v. Wagner's, see Molecule — v. Weberian, see Ejaculatory ducts.

Ves'icles, Ascherso'nian. When fluid fat and fluid albumen are shaken together, the resulting fat globules become surrounded by an albuminous layer. The vesicles, thus formed, are called after Ascherson, their describer.

VES'ICLES OF DE GRAAF, Folliculi Graafiani — v. Lung, see Pulmo — v. Malpighian, Cellules, bronchic, see Pulmo—v. Seminal, Vesiculæ seminales.

Vesicoce'lē, (*vesica,* 'a bladder,' and *κηλη,* 'a rupture,') Cystocele.

Vesicoprostat'ic, see Vesical.

Ves'icoü'rachal, *Vesi'coüracha'lis.* Relating or appertaining to the bladder and urachus, — as a 'vesicoürachal fistula.'

Ves'icoü'terine, *Vesi'coüteri'nus.* Appertaining or relating to the bladder and uterus.

VESICOÜ'TERINE FOLDS, see Uterus.

Ves'ico-u'tero-vag''inal. Relating to the bladder, uterus, and vagina, — as *vesico-utero-vaginal* hernia.

Ves'icovag''inal, *Vesi'covagina'lis, Vag''inoves'ical, U'rinovag''inal.* Relating to the bladder and the vagina, — as *vesicovaginal fistula.*

VES'ICOVAG''INAL HER'NIA, see Cystocele.

Vesic'ula, *Cyst'inx, Ves'icle, Blis'ter,* (F.) *Vésicule,* (dim. of *vesica.*) A small bladder or cyst.

VESIC'ULA, *Ves'icle, Ec'phlyis, Cyst'inx, Pomphus,* in Pathology, means a small orbicular elevation of the cuticle containing lymph, which is sometimes clear and colorless, but often opaque and whitish or pearlcolored. It is succeeded either by a scurf or by a laminated scab.

VESIC'ULA ÆNIGMATO'SA, Vesicula umbilicalis — v. Alba, Vesicula umbilicalis — v. Bilis, Gall-bladder — v. Blastodermatica, see Molecule — v. Blastodermica, see Molecule — v. Chyli, Receptaculum chyli — v. Erythroidea, Erythroid vesicle — v. Fellis, Gall-bladder—v. Gangrænescens, see Anthrax—v. Germinativa, see Molecule—v. Om-

phalomesenterica, Vesicula umbilicalis — v. Ovalis, Vesicula umbilicalis — v. Prolifera, see Molecule — v. Prostatica, see Ejaculatory ducts — v. Spermatica spuria, see Ejaculatory ducts.

Vesic'ula Umbilica'lis, *V. al'ba* seu *om'phalomesenter'ica* seu *ænigmato'sa* seu *ova'lis, Vesi'ca intestina'lis, Vitellic'ulus, Umbil'ical* or *Intes'tinal Ves'icle, Vit'elline Pouch, Vitel'licle,* (F.) *Vésicule ombilicale.* A small, pyriform, round, or spheroidal sac, which, about the fifteenth or twentieth day after fecundation, is of the size of a common pea, and probably acquires its greatest dimensions in the course of the third or fourth week. After the seventh week, it becomes shrivelled and disappears insensibly. It seems to be situate between the chorion and amnion, and is commonly adherent either to the outer surface of the amnion or to the inner surface of the chorion, but at times is loose between them. The *vit'elline ped'icle,* which attaches the vesicle to the embryo, is continuous with the intestinal canal; and, up to twenty or thirty days of embryonic life, is hollow,—*Duc'tus om'phalomesenter'icus* seu *vitellointestina'lis* seu *vitella'rius, Vit'elline Duct.* Its arteries are the omphalomesenteric. The *Vit'elline flu'id,* contained in the vesicle—in the *Vit'elline* or *Yolk mem'brane* — has been compared, from analogy, to the *vitel'lus* or *yolk* of birds; and, like it, is an oleaginous and albuminous substance, which is inservient to the nutrition of the embryo.

Vesic'ulæ, pl. of *vesicula,* constitute the 6th order of Bateman's classification of *Cutaneous Diseases.*

Vesic'ulæ, see Villous membranes, Vesiculæ aereæ, Cellules, bronchic—v. Bronchicæ, Cellules, bronchic—v. Divæ Barbaræ, Variola confluens—v. Gingivarum, Aphthæ — v. Graafianæ, Folliculi Graafiani — v. Griseæ, see Spleen — v. Malpighianæ, Cellules, bronchic — v. Membranaceæ, Cellules, bronchic—v. Pulmonales, Cellules, bronchic — v. Rotundæ cervicis uteri, Nabothi glandulæ — v. Sanguinis, Globules of the blood.

Vesic'ulæ Semina'les, *V. semina'riæ* seu *spermat'icæ, Cap'sulæ semina'les, Conceptac'ula semina'ria, Gonecyst'ides, Spermatocyst'ides, Sem'inal ves'icles,* (F.) *Vésicules séminales, Gardouches, Greuiers,* are two small membranous sacs, which serve as reservoirs for the sperm, and probably secrete a fluid to be mixed with it. They are situate beneath the bladder, and above the rectum, behind the prostate and to the outer side of the vasa deferentia. They are of an irregular conoidal shape; flattened from above to below; embossed on their surface, and of a grayish tint. Their *posterior extremity* or *fundus* terminates by a round cul-de-sac. Their *anterior extremity* or *neck* is narrow and elongated, and is continuous with the excretory duct of the vesicula. This duct joins the vas deferens, and forms with it the ejaculatory duct. The interior of the vesiculæ exhibits several cells, which communicate with each other, and are lined by a very thin mucous membrane.

Vesic'ulæ Semina'les Muli'erum, Nabothi glandulæ — v. Spermaticæ, see Vesiculæ seminales.

Vesic'ular, *Vesicula'ris,* (F.) *Vésiculaire.* Of or belonging to a vesicle; full of or containing small vesicles or cells. The cortical or gray matter of the brain is sometimes termed *vesicular.* See Cortex cerebri and Neurine.

Vesic'ular Fe'ver, Pemphigus.

Vésicule, Vesicula — *v. Biliaire,* Gall-bladder — *v. du Fiel,* Gall-bladder — *v. Germinative,* see Molecule — *v. Ombilicale,* Vesicula umbilicalis — *v. Ovulifère,* see Folliculi Graafiani — *v. Webérienne,* see Ejaculatory ducts.

Vésicules de De Graaf, Folliculi Graafiani— *v. de Naboth,* Nabothi glandulæ — *v. de Sainte Barbe,* Variola confluens — *v. Séminales,* Vesiculæ seminales.

Vesic'ulous, *Vesiculo'sus,* (F.) *Vésiculeux,* (from *vesica.*) Shaped like or characterized by vesicles.

Vesic'ulotympanit'ic, *Vesic'ulotympanit'icus.* An epithet for a sound or resonance heard on percussion, which consists of the vesicular and tympanitic sounds combined. It occurs, according to Dr. Flint, when the parenchyma of the lungs is incompletely solidified.

Ves'pa, Wasp.

Vespertilio'nis A'la, 'bat's wing.' A triangular portion of the broad ligament of the uterus, formed by the ligament of the ovary and the ovary itself. See Uterus.

Ves'sel, *Vas, Va'sum,* dim. *Vas'culum; Augei'on, An'gus, Conceptac'ulum,* ([L.] *vas, vasculum,*) (F.) *Vaisseau.* A canal, more or less elastic, formed by the superposition of membranes, and distinguished, according to its uses and general arrangement, into *Artery, Vein,* and *Lymphatic.* See, also, Vascular.

Vesseloup, 'wolf fizzle,' Lycoperdon.

Vessie, (from *vesica,* 'a bladder,') Urinary bladder — *v. Col de la,* Collum vesicæ — *v. à Colonnes,* see Urinary bladder — *v. Natatoire,* Air-bladder.

Vestib'ular, *Vestibula'ris,* (F.) *Vestibulaire,* Relating or appertaining to a vestibule.

Vestib'ular Nerve, see Auditory nerve.

Ves'tibule, *Vestib'ulum,* (from *vestio,* 'I clothe or cover.') The porch or entrance to a house; hence —

Ves'tibule, *Vestib'ulum, V. vagi'næ, Prona'us, A'trium vagi'næ, Am'bitus genita'lis muli'ebris, Canal vulvaire,* is a smooth cavity between the perinæum and nymphæ in the female, which leads to two passages — to the urethra above and to the vagina below. Henle includes the labia pudendi also.

Ves'tibule of the Ear, *Vestib'ulum, V. os'seum, V. labyrin'thi,* (F.) *Vestibule.* A cavity of an irregular shape, which forms part of the labyrinth or internal ear. The vestibule is situate on the inner side of the tympanum; on the outer side of the meatus auditorius internus; before the semicircular canals and behind the cochlea. It is lined by a particular membrane, and contains the liquor of Cotunnius and branches of the auditory nerve. There is also another membrane, constituting the *mem'branous ves'tibule,* but it is not an exact imitation of the osseous cavity. It is composed of two distinct sacs, which open into each other — the *sac'culus vestib'uli* and the *sac'culus.* There are three contiguous *cavities* in the vestibule; one of which, the *semiö'val,* is situate above; another, the *hemispher'ical,* below; and the third, or *sul'ciform,* which is the orifice of the aquæductus vestibuli, behind.

Vestib'ulum Labyrin'thi, Vestibule of the ear — v. Nasi, see Nares — v. Oris, see Mouth — v. Osseum, Vestibule of the ear — v. Vaginæ, Vestibule.

Vestige (F.), *Vestig''ium,* 'a vestige,' 'a trace.' A kind of fracture of flat bones, consisting of a simple incision having the mark of the instrument that caused it. The term is also applied to a part of the body, which may have no evident use in man, and yet may be greatly employed in animals. For example, the muscles of the external ear in man are almost devoid of use, or are *vestiges* of what they are in certain animals.

Vestig''ium, Sole, Vestige—v. Foraminis ovalis, Ovalis fossa — v. Pedis, Metatarsus.

Vestimen'tum, Vestitus.

Vesti'tus, gen. *Vesti'tûs, Vestimen'tum, Esthe'ma, Esthe'sis, Res vestia'ria, Vest'ment, Clo'thing, Dress, Ves'ture,* (F.) *Vêtement,* (from *vestire, vestitum,* 'to clothe.') Any substance used for the

purpose of covering nakedness, or preserving from atmospheric temperature by being worn on the body. The best clothing in winter is composed of articles that are bad conductors of caloric, and do not admit of ready evaporation of the matter of perspiration. In this respect, woollen vestments deserve the first place, and cotton the second. Color has likewise to be regarded — the darkest hues transmitting solar heat most readily through them. It has been found that the same rule applies to odors — the darker colors retaining a greater amount of odorous particles than the lighter. Hence the necessity of white walls, white bedclothes, &c., in hospitals; for it is probable that the law applies to contagious miasms.

Vest'ment, Vestitus.

Ves'ture, Vestitus.

Ve'ta, Puna.

Vêtement, ([L.] *Vestimentum,*) Vestitus.

Vetera'na, Rubcola.

Veterina'rius, see Hippiater and Veterinary.

Vet'erinary, *Veterina'rius,* (F.) *Vétérinaire,* (from *veterinus,* 'that which bears burdens;' itself, perhaps, from *vehiterinus,* from *vehere,* 'to carry.') That which appertains to beasts of burden; hence, *veterinary surgeon,* (see Farrier,) *veterinary college, veterinary medicine,* &c.

VET'ERINARY ANAT'OMY, see Anatomy.

VET'ERINARY ART, *Ars* seu *Medici'na veterina'ria, Zoöi'asis, Zoiatri'a, Theriat'rica, Mul'omedici'na, Zoötherapi'a, Zoötherapeu'ticē, Ars zoiat'rica, Far'riery.* The art of treating the diseases, &c., of cattle.

Veternos'itas, (from *veternus,* 'aged;' because old persons are subject to somnolency,) Coma vigil.

Veter'nus, see Coma vigil.

Vétiver, Andropogon muricatus.

Vetive'ria Odora'ta, Andropogon muricatus.

Vettivert, Andropogon muricatus.

Vetton'ica, (after the *Vettones* of Spain,) Betonica officinalis.

Vet'ula, Sacrum.

Vet'yver, Andropogon muricatus.

Vexil'la (pl. of *vexillum*) **Tuba'rum Fallo'pii,** see Tube, Fallopian.

Vexil'lum, 'a flag,' Drapeau.

Vi'a, Way — v. Curandi, Ratio medendi — v. Stomachi et Ventris, Œsophagus.

Viabil'ity, see Viable.

Vi'able, *Viab'ilis,* (from *vita,* [F.] *vie,* 'life,' and *habilis,* 'able.') A word introduced with great advantage from the French into our language. It is an epithet applied to a fœtus whose organs are properly formed, and so developed as to permit its continued existence. Every fœtus is not *viable.* Anencephali have lived ten or twelve days, yet they are not viable. The older the fœtus, the more viable it is. It is an idle prejudice that a child, born at the end of eight months, is less likely to live than one born at the end of seven. The signs of *viability* are drawn from the weight, length, external conformation, &c., of the fœtus. It may be laid down as a general rule, that no fœtus born before the end of the seventh month is viable.

Vi'æ (pl. of *via*) **Chylif'eræ,** Chyliferous vessels.

VI'Æ CLANDESTI'NÆ, *Clandes'tine Pas'sages.* Supposititious secret ways or passages or 'royal roads,' to account, for example, for the rapid transmission of substances taken into the stomach to the kidneys or bladder.

VI'Æ EXTRAORDINA'RIÆ LAC'TIS, Galactoplania — v. Lacrymales, Lachrymal passages — v. Primæ, Ways, digestive — v. Secundæ, Ways, second.

Vi'al, Phiala.

Viandes Faisandées, ([L.] *vivenda,* from *vivere,* 'to live,') see Hyposaprus.

Viber'num, see Viburnum.

Vibi'ces, (pl. of *vibex,* 'the mark of a stripe,') *Mol'opes, Stri'æ,* (F.) *Vergettures.* Large purple spots, like the marks produced by the strokes of a whip, which appear under the skin in certain malignant fevers. They are unfavorable indications, as they denote great prostration.

Vibra'men, gen. *Vibra'minis,* (*vibrare,* 'to quiver,') Oscillation.

Vi'brans, Vibratory.

Vibratile, (from *vibrare, vibratum,* 'to quiver,') Vibratory.

Vibratil'ity, *Vibratil'itas,* (F.) *Vibratilité.* Capability of being thrown into vibration.

Vibra'tio, Oscillation, Vibration — v. Cardiaca, Palpitation — v. Cordis, Palpitation.

Vibra'tion, Vibratio — v. Pectoral, see Fremitus — v. Tactile, see Fremitus — v. Tussive, see Tussive.

Vibra'tions of Sound, see Sound.

Vibra'tor, Deferens vas.

Vi'bratory, *Vi'bratus, Vi'brative,* (F.) *Vibratile, Vibratoire.* An epithet applied to the pain that accompanies some neuralgiæ, which seems to the patient to vibrate among the nerves.

VI'BRATORY MO'TION, see Cilia.

Vibra'tus, gen. *Vibra'tûs,* Oscillation.

Vib'rio, gen. *Vibrio'nis,* (from *vibrare,* 'to quiver.') A genus of infusory animalcules, of which different species are met with, — for example, *Vib'rio pro'lifer,* in almost all putrescent fluids containing protein, and in the pus of chancres; in which last the *V. liue'ola* has likewise been found. *Bacteria* are considered by many synonymous with *Vibriones;* both indicate the existence of organic substances associated with putrefaction. See Micrococci.

Vibris'sæ, (from *vibrare,* 'to quiver.') The hairs which grow at the entrance of the nostrils and of other apertures. In the feline tribe, the whiskers.

Vibur'num seu **Viber'num Acerifo'lium,** *Ma'pleleaved Ar'row Wood,* (from *viere,* 'to bind;' several species having long flexible twigs,) *Dockmackie; Ord.* Caprifoliaceæ. A plant used by the Indians, and afterwards by the Dutch, as an external application to tumors.

VIBUR'NUM CASSINOÏ'DES, Ilex Paraguensis.

VIBUR'NUM DENTA'TUM, *Ar'row Wood, Meal'y Tree, Til'y* of the Indians. *Ord.* Caprifoliaceæ. A high indigenous shrub, of the same family as V. lentago; the bark of which has been used by the Indians as a diuretic.

VIBUR'NUM EDU'LĒ flourishes in the Hudson's Bay territory. The fruit has an orange color, and is less acid, more fleshy, and more agreeable to the taste than the cranberry.

VIBUR'NUM LÆVIGA'TUM, Ilex Paraguensis.

VIBUR'NUM LENTA'GO, *Sweet Vibur'num, Nann'yberry.* A handsome indigenous tree, which flowers in May and June; used as an antiperiodic.

VIBUR'NUM PRUNIFO'LIUM, *Black Haw, Sloeleaved Viburnum, Sloe.* Indigenous; flowering in May. The leaves have been used as tea. It has been supposed to be a valuable remedial agent in the nervous disorders of pregnancy and uterine diseases, and to prevent abortion! — all of which may well be questioned.

VIBUR'NUM SLOE'LEAVED, V. prunifolium — v. Sweet, V. lentago.

Vic-le-Compte, Min'eral Wa'ters of. Vic-le-Compte is a small village in the department of Puy-de-Dôme, three leagues from Issoire; where there is an acidulous chalybeate, which is aperient.

Vica'rious, *Vica'rius,* (from *vicis,* 'change.') Taking the place of another, — as 'vicarious secretion,' *Secre'tio vica'ria;* a secretion which takes place in one part instead of another.

Vicar's Bray, Min'eral Wa'ters of. This spring is situate in Perthshire, Scotland, about two miles from Dollor, and near to Blarngone.

The water is one of the strongest chalybeates known.

Vice, (*vitium,* 'a defect,' 'a fault,') Cacosis—v. Seeret, Masturbation.

Vice de Conformation. Faulty formation of a part of the body.

Vich'y, Min'eral Wa'ters of. Carbonated alkaline chalybeates, the sources of which are at Vichy, six leagues from Moulins, in the department of Allier. The springs are seven in number. Almost all are thermal; give off bubbles of carbonic acid gas, have a slightly sulphureous odor, and contain a very large amount of alkali. They range in temperature from 53° to 110° Fah. They deposit carbonates of lime and magnesia, and a little oxide of iron. They afford on analysis, in one pint of the water, 106° Fah., carbonate of potassa, 2·04 gr.; carbonate of soda, 26·00; carbonate of magnesia, 1·38; carbonate of iron, 0·02; carbonate of lime, 2·31; carbonate of strontia, 0·01; chloride of sodium, 4·10; sulphate of soda, 2·29; phosphate of soda, 0·78; carbonic acid gas, 14·74 cubic inches. They are employed as tonics, particularly in chronic affections of the liver and abdominal viscera generally, in old catarrhs, diseases of the joints, diabetes, &c., and wherever the use of strongly alkaline waters is indicated. The season is from the 15th of May to the 15th of September.

Vich'y Wa'ter, Factit''ious, *A'qua Vicien'sis,* (F.) *Eau de Vichy,* is made of simple *Acidulous water,* ℥xxss., impregnated with twice its bulk of *Carbonic acid, Subcarbonate of soda,* gr. xxxij., *Sulphate of soda,* gr. xvj., *Chloride of sodium,* gr. iv., *Subcarbonate of magnesia,* gr. ss., *Chloride of iron,* gr. ¼. Mix. Ph. P. The French Codex (1866) has an *Eau Alcaline Gazeuse, A'qua Alcali'na Efferves'cens,* which may be employed as a substitute for Vichy and similar waters.

A Vich'y Wa'ter Pow'der, (F.) *Poudre pour Eau de Vichy,* is made as follows: *Sodæ bicarb.,* 5 gram., *Sodii chlorid.,* 20 centigram., *Sodæ sulph.,* 50 centigram., *Magnes. sulph.,* 15 centigram., *Ferri sulph.,* 1 centigram., *Aquæ,* 625 gram. Mix. To render it gascous, add *Acid. citric,* 3 gram.

Vic''ia Ervil'ia, Ervum.

Vic''ia Fa'ba, *Fa'ba, F. ma'jor* seu *vulga'ris, Or'obus fa'ba, Common gar'den bean,* (F.) *Fève* ou *Fève des marais. Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. A native of Egypt. There are many varieties of beans, none of which are easy of digestion. They are proverbially flatulent, especially when old. When young, they are more digestible and wholesome. Bean meal was one of the four resolvent meals of the ancients.

Vicinitrac'tus, gen. *Vicinitractûs,* (*vicinus,* 'near,' and *trahere, tractum,* 'to draw,') Erysipelas.

Vicinit'raha, Erysipelas.

Vicis'situde, *Vicissitu'do,* (from *vicis,* 'change.') Constant change. The vicissitudes of the atmosphere, as regards its barometric, thermometric, and hygrometric condition, have to be guarded against by the delicate, and yet, by the new impressions they produce, they are probably a cause of the greater mental and corporeal activity of the inhabitants of the temperate regions of the globe.

Victoria'lis Femin'ea, Gladiolus vulgaris — v. Longa, Allium victoriale — v. Rotunda, Gladiolus vulgaris.

Vic'tûs Ra'tio, 'order of victuals,' (from *vivere, victum,* 'to live.') Dictary.

Vidanges, (from *vider,* 'to empty,') Lochia.

Vid'ian Ar'tery. A branch of the sphenomaxillary portion of the inferior maxillary artery, accompanying the Vidian nerve, and distributed to the pharynx and Eustachian tubes.

Vid'ian Canal', (after Vidus Vidius,) Pterygoid canal — v. Nerve, Pterygoid nerve.

Vie, (from *vita,*) Life — *v. Durée de la,* see Longevity — *v. Moyenne,* see Longevity.

Vieillesse, (from [L.] *vetulus,* 'an old person,') Senectus.

Viellotte, Colchicum autumnale.

Vien'na Paste and Pow'der, see Powder, Vienna.

Vierge, ([L.] *virgo,*) Virgin — v. Isthmus of, Isthmus of the fossa ovalis.

Vieus'sens, Valve of, Valvula Vieussenii.

Vif Argent, 'quicksilver,' Hydrargyrum.

Vig''ilance, Insomnia.

Vigilan'tia, (from *vigil,* 'on the watch,') Egregorsis.

Vigila'tio, Egregorsis.

Vigil'ia, Egregorsis.

Vigil'iæ, Egregorsis — v. Nimiæ, Coma vigil.

Vigil'ium, Egregorsis.

Vigne, ([L.] *vinea,*) Vitis vinifera — *v. Blanche,* Bryonia alba — *v. de Judée,* Solanum dulcamara — *v. du Nord,* Humulus lupulus — *v. Vierge,* Bryonia alba.

Vignette, (dim. of *vigne,*) Spiræa ulmaria.

Vignoble, ([L.] *vinea,* 'vine,') Mercurialis.

Vi'gor, gen. *Vigo'ris,* 'activity, force,' Acme.

Vil'la Fran'ca, Cli'mate of. This little town is situate immediately to the eastward of Montalbano, which separates the bay of Villa Franca from that of Nice. It is on the southern declivity of a steep and lofty range of mountains, and is more effectually sheltered from the north and northwest winds than Nice, with the climate of which that of Villa Franca closely corresponds.

Villate, Liq'uor of, Liquor of Villate.

Vil'li, (pl. of *villus,* 'a tuft of hair,') see Villous membranes.

Villosités, see Villous membranes.

Vil'lous, *Villo'sus,* (F.) *Villeux,* (from *villus,* 'a tuft of hair.') Furnished with villi.

Vil'lous Mem'branes or Coats, *Velamen'ta Bombyc''ina,* (F.) *Membranes villeuses, Membranes veloutés,* are such as are covered with fine delicate prolongations, *Papillæ* or *Vil'li, Floc'ci, Floc'culi, Vesic'ulæ, Cylin'dri, Tu'bi Membrana'cei,* (F.) *Villosités,* constituted of bloodvessels, nerves, and absorbents, or such as are covered with fine down, so as to cause them to feel soft and velvety. The term is, however, chiefly restricted to the former. Chaussier gives the name *simple villous membranes* to the serous membranes, and that of *com'plicated* or *follic'ular villous membranes* to the mucous membranes.

Vin, ([L.] *vinum,*) Wine — *v. d'Absinthe,* Vinum absinthites — *v. Antiscorbutique,* Vinum antiscorbuticum — *v. Aromatique,* Vinum aromaticum — *v. de Bordeaux,* Claret — *v. Chalybé,* Vinum ferri — *v. Diurétique,* Wine, diuretic — *v. Emétique,* Vinum antimonii — *v. Ferrugineux,* Vinum ferri—*v. de Gentiane,* Vinum gentianæ—*v. d'Opium composé,* Vinum opii — *v. de Poulet,* see Poulet — *v. de Quinquina composé,* Vinum de kinâ kinâ compositum — *v. Rouge d'Oporto,* Vinum Portugallicum — *v. Sec,* Sack.

Vi'na Medica'ta, 'medicated wines,' see Vinum medicinale.

Vinaigre, (*vin,* 'wine,' and *aigre,* 'sharp or sour,') Acetum, see Aceticum acidum — *v. Antiseptique,* Acetum aromaticum — *v. Aromatique,* Acetum aromaticum — *v. de Bois,* Pyroligneous acid — *v. Distillé,* see Aceticum acidum — *v. Phénique,* Carbolic acid — *v. des Quatre voleurs,* Acetum aromaticum — *v. Radical,* Aceticum acidum — *v. Scillitique,* Acetum scillæ.

Vinaigres Médicinaux, Acetica.

Vin'ca Mi'nor, *V. pervin'ca,* (from *vincio,* 'I bind,' because of its usefulness in making bands [?],) *Clem'atis daphnoï'des ma'jor, Less'er periwinkle,* (F.) *Pervenche, Violette des Sorciers.* It has bitter and astringent properties, and has been used in gargles and diseases of the chest.

Vincetox'icum, (*vincere,* 'to overcome,' and *toxicum,* 'poison,') Asclepias vincetoxicum.

Vinctu'ra, (*vincire, vinctum,* 'to bind,') Fascia.

Vin'cula (pl. of *vinculum*) **Accesso'ria.** On the thecæ of the fingers several small tendinous fasciculi are seen, which pass between the phalanges and the edges of the tendons, and are so called.

Vin'culum, (*vincire, vinctum,* 'to bind,') Bandage, Fascia, Lien — v. Caninum, Frænum penis — v. Linguæ, Frænum linguæ — v. Præputii, Frænum penis — v. Umbilicale, Funiculus umbilicalis.

Vine, ([L.] *vinea,*) Vitis vinifera — v. Grape, Vitis vinifera — v. Poison, Rhus radicans — v. Wild, Pareira.

Vin'egar, (F.) *Vinaigre,* (itself from *vin,* [L.] *vinum,* 'wine,' and *aigre,* [L.] *acris,* 'sharp or sour,') Acetum — v. Aromatic spirit of, see Aceticum acidum — v. of Bloodroot, Acetum sanguinariæ — v. of Cantharides, Acetum cantharidis — v. of Colchicum, Acetum colchici—v. Common, Acetum — v. Distilled, see Aceticum acidum — v. Estragon, see Artemisia dracunculus — v. of Lobelia, Acetum lobeliæ — v. Marseilles, Acetum aromaticum—v. of Meadow saffron, Acetum colchici — v. of Opium, Guttæ nigræ — v. Radical, Aceticum acidum — v. of Squills, Acetum scillæ — v. of the Four Thieves, Acetum aromaticum — v. Thieves', (so called, because, under its use, four thieves, it was said, plundered with impunity the bodies of those dead of the plague in London [?],) Acetum aromaticum — v. Whey, see Acetum — v. of Wood, see Aceticum acidum.

Vineti'na, see Oxyacantha Galeni.

Vinette, Rumex acetosa.

Vinettier, Oxyacantha Galeni.

Vineux, Vinous.

Vinolen'ta, (from *vinum,*) see Temulentia.

Vinolen'tia, Temulentia.

Vino'sus, Vinous.

Vi'nous, *Vino'sus, Œno'des, Œnoï'des,* (F.) *Vineux,* (from *vinum.*) Relating to wine. Having the character of or resembling wine. Made of wine.

Vi'num, (οἶνος,) Wine, Sherry wine. See Wine. A medicinal wine, (F.) *Vin médicinal, Onolé, Onolature.* See Vina medicata.

Vi'num Absinthi'tes, *Wine of Worm'wood,* (F.) *Vin d'Absinthe.* (*Fol. absinth. exsicc., Absinth. Pontic.,* āā ℥vj., *Vini albi,* Oiv. Macerate for 24 hours, and strain. Ph. P.) Stimulant, tonic, febrifuge, vermifuge.

Vi'num Adus'tum, Brandy — v. Album, Sherry wine, (Ph. U. S., 1851,) see Wine — v. Album Hispanicum, see Wine — v. Album Montanum, see Wine.

Vi'num Al'oës, *V. aloës Socotri'næ* seu *aloët'icum* seu *aro'moäloët'icum, Tinctu'ra hi'era, Tinctu'ra sa'cra, Wine of Aloes.* (*Aloës Socot.* in pulv. subtil., ℥j., *Cardam.* pulv., *Zingib.* pulv., āā ℥j., *Vini alb.,* Oj. Macerate for 7 days, with occasional agitation, and filter. Ph. U. S., 1873.) Purgative and stomachic, according to the dose. Dose, f℥j. to f℥ij.

Vi'num Ama'rum, V. gentianæ comp.—v. Amarum scilliticum, &c., V. diureticum amarum — v. Amarum cum spiritû vini, V. gentianæ compositum — v. Aminæum, Aminæum vinum — v. Antimoniale, V. antimonii tartarizati—v. Antimoniatum Huxhami, V. antimonii tartarizati—v. Antimonii potassiotartratis, V. antimonii tartarizati.

Vi'num Antimo'nii, *V. antimo'nii tartariza'ti* seu *tartra'tis antimonii* seu *antimo'nii potas'siotartra'tis* seu *benedic'tum* seu *stibia'tum* seu *stibiatum Huxha'mi* seu *antimonia'tum* seu *antimonia'tum Huxha'mi* seu *antimonia'lē* seu *emet'icum, Essen'tia antimonii* seu *stib'ii, A'qua benedic'ta Rulan'di, Solu'tion of tar'tarized ant'imony, Antimo'nial wine,* (F.) *Vin Émétique.* (*Ant. et Potass. tart.,* gr. xxxij., *Aq. destillat. bullient.,* f℥j., *Vini albi,* q. s. Dissolve the salt in the distilled water, and while hot add sufficient wine to make a pint. Ph. U. S., 1873.) Each fluidounce contains two grains of the tartrate.

The ordinary *Antimonial wine* was formerly made with *Glass of antimony,* ℥j., *Sherry,* Ojss.

Ward's Red Drop consists of a strong vinous solution of *tartarized antimony.*

Vi'num Antiscorbu'ticum, *Antiscorbu'tic wine,* (F.) *Vin Antiscorbutique.* (*Rad. armoraciæ recent.,* ℥j., *Fol. cochleariæ recent., Nasturtii aquatic., Trifol. aquatic., Semin. sinap.,* āā ℥ss., *Ammoniæ muriat.,* ℥ij., *Vin. albi,* Oij. Macerate for 36 hours; filter, and add *Tincturæ cochlear.,* ℥ss. Ph. P.) Stimulant and tonic. Dose, f℥ss. to f℥ij.

Vi'num Aromat'icum, *Aromat'ic wine,* (F.) *Vin Aromatique.* (*Species aromatic.,* ℥iv., *Vin. rubr.,* Oij. Macerate for 6 days, and filter. Ph. P.) Stimulant and tonic. Used, externally, in fomentations, embrocations, &c.

Vi'num Aro'moaloet'icum, V. aloës.

Vi'num Auran'tii, (Ph. B., 1867,) *Or'ange wine.* Wine made in Great Britain by fermentation of a saccharine solution to which the fresh peel of the bitter orange has been added.

Vi'num Benedic'tum, V. antimonii tartarizati.

Vi'num Campa'num, *V. Campana'ceum.* Champagne wine. A well-known sparkling wine of France. See Wine.

Vi'num Canari'num, see Wine — v. Chalybeatum, V. ferri — v. Cinchonæ compositum, V. de kinâ kinâ comp. — v. Cinchoniæ, see Vinum quiniæ.

Vi'num Col'chici, *V. Col'chici Radi'cis, Wine of Col'chicum, W. of Colchicum Root, Want's Eau d'Husson.* (*Colchic. rad.* pulv., ℥xij., *Vini alb.,* q.s. Moisten the powder with f℥iv. of the wine, pack firmly in a conical percolator, and gradually pour wine upon it until Oij. of filtered liquid are obtained. Ph. U. S., 1873.) Diuretic, sedative, and purgative. Chiefly used in gout. Dose, gtt. 40 to f℥j.

Reyn'olds's Specif'ic for gout and rheumatism consisted of the fresh bulb of *Colchicum,* ℥viij., *Sherry wine,* f℥xvj. The colchicum was macerated for eight or ten days in the wine, at a gentle heat; colored with *Syrup of poppies,* and flavored with *Rum.* Reynolds is said to have killed himself by taking an overdose of it.

Vi'num Col'chici Radi'cis, V. colchici.

Vi'num Col'chici Sem'inis, *Wine of Col'chicum seed.* (*Colchic. sem.* pulv., ℥iv., *Vini alb.,* Oij. Macerate for 7 days, with occasional agitation, then express and filter. Ph. U. S., 1873.) Dose, f℥j. to f℥ij.

Vi'num Crema'tum, Brandy.

Vi'num Diuret'icum Ama'rum, *V. ama'rum scillit'icum compos'itum in Charita'tis Nosocomi'o usurpa'tum, Bit'ter diuret'ic wine.* (*Cort. cinchon., C. Winteran., Limon.,* āā ℥ij., *Rhi toxicodendr., Scillæ cacumin., Angelicæ,* āā ℥ss., *Fol. absinth., Melissæ,* āā ℥j.. *Baccar. junip., Macis,* āā ℥ss., *Vin. alb.,* Oviij. Macerate and filter. Ph. P.) Stimulant, tonic, and diuretic. Dose, f℥ss. to f℥jss.

Vi'num Emet'icum, V. antimonii tartarizati.

Vi'num Er'gotæ, *Wine of Er'got.* (*Extract. ergotæ fluid.,* f℥iv., *Vin. alb.,* f℥xxviij. Mix and filter. Ph. U. S., 1873.) Dose, ♏xx. to f℥j. to produce the peculiar effects of ergot.

Vi'num Ferra'tum, V. ferri.

Vi'num Fer'ri, *V. Chalybea'tum* seu *ferra'tum* seu *Martia'tum* seu *Mar'tis, Tinctu'ra Mar'tis vino'sa* seu *Mar'tis cum vi'no, Steel wine, Wine of Iron,* (F.) *Vin Chalybé, V. Ferrugineux.* (*Iron wire,* ℥j., *Sherry wine,* Oj. Macerate for thirty days, and filter. Ph. B., 1867.) Tonic. Dose, f℥j. to f℥iv.

Vi'num Fer'ri Citra'tis, *Wine of Cit'rate of Iron.* (*Ferri et Ammoniæ Citrat.*, gr. clx., *Vin. aurant.*, Oj. Dissolve, let it remain three days in a closed vessel, shaking occasionally, and filter.) Dose, fʒj.–iv.

Vi'num Gentia'næ, *V. Gentianæ Compos'itum* seu *Ama'rum* seu *Ama'rum cum spir'itu Vi'ni, Infu'sum ama'rum vino'sum, Com'pound wine of gen'tian, Wine bit'ters,* (F.) *Vin de Gentiane.* (*Rad. gentian. luteæ*, ʒss., *Cort. cinchon. offic.*, ʒj., *Cort. aurant.*, ʒij., *Canellæ alb.*, ʒj., *Alcohol. dilut.*, fʒiv., *Vini alb. Hispanic.*, Oijss. Ph. E.) Dose, fʒj. to fʒvj.

Vi'num Hippocrat'icum, Claret — v. Hispanicum, Vinum, see Wine—v. Hordeaccum, Cerevisia — v. Hydatodes, see Hydatoid.

Vi'num Ipecacuan'hæ. *Ipecacuan'ha Wine.* (*Extract. ipecac. fluid.*, fʒij., *Vin. alb.*, fʒxxx. Mix and filter. Ph. U. S., 1873.) Emetic and diaphoretic. Dose, as an emetic, fʒiv. to fʒx.; as an expectorant, ♏v.–xl.

Vi'num de Ki'nâ Ki'nâ Compos'itum, *V. cincho'næ compos'itum, Com'pound bark wine,* (F.) *Vin de quinquina composé.* (*Cort. cinchon.* pulv., ℔ss., *Quassiæ, Cort. Winteran., Cort. aurant.* sicc., āā ʒss., *Alcohol.* [12° to 22° Beaumé], Oj. Macerate for 24 hours; and add *Vini albi*, Ovj. Macerate for four days, and filter. Ph. P.) Tonic, febrifuge, and stomachic. Dose, fʒss. to fʒij.

Vi'num Martia'tum, V. ferri — v. Martis, V. ferri — v. Medicatum, see Claret.

Vi'num Medicina'lē, *V. Medicatum, Med'icated Wine.* Wine, holding in solution one or more medicines. Medicinal wines are obtained by macerating or digesting medicinal substances in wine. They differ, of course, according to the nature of the medicines employed, the strength of the wine, &c. In the Pharmacopœia of the London College, all the wines were changed into weak tinctures, but old names were left unaltered. Few officinal wines — *Vi'na medica'ta* — are retained in the Pharmacopœias, on account of their proneness to decomposition, and their consequent inferiority to tinctures. Sherry wine is adopted in the U. S. Pharmacopœia as the menstruum. See Vinum.

Vi'num Me'rum, Aëratum—v. Nicotianæ tabaci, V. tabaci—v. Opiatum fermentatione paratum, Laudanum abbatis Rousseau.

Vi'num O'pii, *V. de Opio compos'itum, Laud'anum liq'uidum Sydenha'mi* seu *Hoffman'ni, Tinctu'ra Theba'ica, Wine of O'pium, Syd'enham's Laud'anum, Ford's Laud'anum,* (F.) *Vin d'Opium Composé.* (*Opii* in pulv., ʒij., *Cinnam.* pulv., *Caryophyll.* pulv., āā ʒj., *Vini albi*, q. s. Mix the powders with fʒxv. of wine, macerate for seven days, with occasional agitation. Transfer the mixture to a conical percolator, and when the liquid has passed the surface, gradually pour on wine until Oj. of filtered liquid is obtained. Ph. U. S., 1873.) Narcotic. Dose, fifteen drops to fʒj.

In the Ph. B. (1867) it is made by macerating for seven days in a closed vessel, with occasional agitation, and filtration, *Extract. opii*, ʒj., *Cinnamom. cort., Caryophyll.* contus., āā gr. lxxv., *Vin. Xeric.*, Oj. Dose, ♏x.–xl.

Vi'num de O'pio Compos'itum, V. opii — v. Picatum, Pissites.

Vi'num Portugal'icum, *V. ru'brum,* (Ph. U. S., 1851,) *V. Porten'sē,* (Ph. U. S., 1873,) (F.) *Vin rouge d'Oporto.* Wine of Portugal or of Oporto. Port wine. A strong astringent wine, not much drunk in the United States, but greatly used in England.

Vi'num Qui'niæ, *Wine of Qui'nia, Quinine Wine.* (*Quiniæ sulph.*, gr. xx., *Acid. citric.*, gr. xxx., *Vin. aurant.*, Oj. Made like the Vinum ferri citratis. Ph. B., 1867.) Dose, fʒss. to fʒj. or more; according as it is used as a stomachic, or to arrest ague. A *Vinum Cincho'niæ* may be made in the same way.

Vi'num Rhabar'bari, V. rhei palmati.

Vi'num Rhe'i, *V. Rhei palma'ti, V. Rhabar'bari, Tinctu'ra Rhabar'bari Vino'sa, Elix'ir Rhe'i dul'cē, E. Rhei Compos'itum, Rhu'barb Wine, Wine of Rhubarb.* (*Rhei* pulv., ʒij., *Canellæ* pulv., ʒj., *Alcohol. dilut.*, q. s., *Vini albi*, fʒxiv. Mix fʒij. of diluted alcohol with the wine, and moisten the powders, previously rubbed together, with fʒss. of the mixture. Transfer to a conical percolator, and gradually pour upon them the remainder of the mixture, and afterwards diluted alcohol, until a pint of filtered liquid is obtained. Ph. U. S., 1873.) Laxative and stimulant. Dose, fʒiv. to fʒjss.

Vi'num Rhe'i Palma'ti, V. rhei — v. Rhenanum, see Wine—v. Rubrum, V. Portugallicum — v. Rubrum Portugallicum, see Wine — v. Stibiatum, V. antimonii.

Vi'num Taba'ci, *Vi'num Nicotia'næ Taba'ci, Tobac'co Wine.* (*Tabac.* in pulv., ʒj., *Vini albi*, Oj. Macerate for 7 days, with occasional agitation, express and filter. Ph. U. S., 1873.) Narcotic, diuretic, and antispasmodic. In dropsical cases, colica pictonum, and ileus. Not much used. Dose, gtt. xx. to xxxvj.

Vi'num Vera'tri, *V. Veratri al'bi, Wine of White Hel'lebore.* (*Veratri cont.*, ʒiv., *Vini albi*, Oj. Macerate for 14 days, express and filter.) In cutaneous affections, and in gout. Dose, ten minims.

Vi'num Vera'tri Al'bi, V. veratri — v. Xericum, see Vinum.

Viol, (from *violare,*— itself from *vis,* 'force,'— 'to force,' 'to defile,') Stuprum.

Vi'ola, (after *Ion, ιον,* 'the violet,') *Vi'ola odora'ta* seu *mar'tia, I'on, Matrona'lis, Viola'ria, Sweet Vi'olet,* (F.) *Violette à bouquets, V. odorante. Ord.* Violaceæ. The flowers of the sweet violet have a pleasant, peculiar odor, and scarcely any taste. They are slightly laxative, but are seldom employed.

Vi'ola Cani'na, *V. sylves'tris, Dog Vi'olet.* The root of this plant is emetic and cathartic. Dose, ℈j.

Vi'ola Ipecacuan'ha, see Ipecacuanha — v. Lutea, Cheiranthus cheiri — v. Martia, Viola — v. Odorata, Viola — v. Palustris, Pinguicola vulgaris.

Vi'ola Peda'ta, *Vi'ola,* (Ph. U. S.) This indigenous violet, which grows from New England to Carolina, is regarded by some as a useful demulcent in pectoral affections.

Vi'ola Sylves'tris, V. canina.

Vi'ola Tri'color, *Jace'a tri'color, Her'ba* seu *Flos Trinita'tis, Heart's-ease, Pan'sy, Pen'sy, Johnny Jump-up, Johnny Jumper,* (Prov.) *Beedy's eyes, Biddy's eyes,* (F.) *Pensée, P. sauvage.* A decoction of this beautiful little plant has been recommended in diseases of the skin, &c. Its roots are also emetic and cathartic.

Viola'ria, Viola.

Viola'tion, (from *violare, violatum,*—itself from *vis,* 'force,'—'to force,' 'to defile,') *Viola'tio,* see Stuprum.

Vi'olet, Viola—v. Dog, Viola canina—v. Dog's tooth, Erythronium Americanum.

Vi'olet, Sweet, Viola.

Vi'oletbloom, Solanum dulcamara.

Violette à Bouquets, Viola — *v. Odorante,* Viola — *v. des Sorciers,* Vinca minor.

Violier Jaune, Cheiranthus cheiri.

Vior'na, Clematis vitalba.

Vi'per, Egyp'tian, (see Vipera,) Aspis — v. Ten inch long, Echidna ocellata.

Vi'pergrass, Scorzonera.

Vi'pera, ([L.] *vipera,* for *vivip'ara,* from *virus,* 'alive,' and *pario,* 'I bring forth,') Coluber berus.

Vipera'ria, (from *vipera,*) Aristolochia serpentaria, Scorzonera.

Viperi'na Virginia'na, (from *vipera,*) Aristolochia serpentaria.

Vi'perine, *Echid'nine.* A peculiar principle contained in the poison of venomous snakes.

Vipérine de Virginie, Aristolochia serpentaria.

Vi'per's Dance, Chorea.

Vir, gen. *Vi'ris,* 'a man,' Aner, Penis — v. Effœminatus, Gynæcaner.

Vi'ra, Woman.

Vira'go, gen. *Virag''inis,* (from *vir,* 'a man,') see Pogeniasis.

Vireux, Virous.

Vir'ga, 'a rod,' Penis — v. Cerea, Bougie — v. Cerebri, Pineal gland.

Virgil'ia, (after the poet Virgil,) Cladrastis tinctoria.

Vir'gin, *Vir'go,* gen. *Vir'ginis, Par'thenus, Ex'pers nuptia'rum,* (F.) *Vierge, Pucelle.* A female who has never had sexual intercourse. Applied, also, occasionally to the male so circumstanced.

Vir'gin Mary This'tle, Centaurea benedicta.

Vir'ginal, (from *virgo.*) The external genital organs, of the virgin especially. Also, relating or appertaining to a virgin, *Virgina'lis.*

Vir'ginal Genera'tion, Parthenogenesis — v. Membrane, Hymen.

Virgina'lē Claus'trum, 'a virginal fence,' Hymen.

Virgin'ia, Min'eral Wa'ters of. There are several celebrated mineral springs in Virginia, on the western side of the Blue Ridge. Two *Thermal* springs are in Bath Co. The *Warm Spring,* as it is called, issues with a bold stream, sufficient to turn a mill, and to keep the waters of its basin at the temperature of 91°. It is estimated that six thousand gallons flow from it a minute. The water is unctuous and sedative in rheumatism, gout, neuralgia, nephritic diseases, &c. The *Hot Spring* is a few miles from the warm. There are several springs at temperatures varying from 76° to 106° Fah., which are used for bathing purposes in chronic rheumatism, gout, congestion of the liver, &c. They are slightly sulphureous.

The *Rock'bridge Al'um Springs* are situate 17 miles west of Lexington, and are in much favor. One pint contains sulphate of lime, 0·413 gr., sulphate of magnesia, 0·552, protoxide of iron, 0·587, alumina, 3·011, crenate of ammonia, 0·153, chloride of sodium, 0·055, free silicic acid, 0·213, free sulphuric acid, 0·689, free carbonic acid, 1·100 cubic in. They are used in dyspepsia, scrofula, chronic diarrhœa, and cutaneous affections. The *Bath Alum Springs* are about 17 miles west of the Rockbridge Springs, in Bath Co. A pint contains sulphate of potassa, 0·032 gr., sulphate of magnesia, 0·160, sulphate of lime, 0·317, protoxide of iron, 2·722, alumina, 1·536, crenate of ammonia, 0·222, silicate of soda, 0·394, free sulphuric acid, 0·985, carbonic acid gas, 1. They are more chalybeate than the last.

About 15 miles from Staunton are *Strib'ling's Springs,* alum and chalybeate; and near *Warrenton,* in Fauquier Co., there is a sulphureous water, called *Lee's Springs,* which is much frequented. The *Alleghany Springs,* in Montgomery Co., are purgative and diuretic, the chief constituents being the sulphates of lime and magnesia. *Bedford Alum Springs,* in Bedford Co., are chalybeate waters. *Jordan's White Sulphur Springs,* in Frederick Co., are mildly aperient. *Pulaski Alum Springs* resemble the waters of the Rockbridge Alum. *Rawley Springs,* in Rockingham Co., are said to be the purest chalybeate waters in the State. The *Red Sweet Springs,* now called the *Sweet Chalybeate Springs,* are at the eastern foot of the Alleghany, in Alleghany Co. They are also slightly purgative; containing the sulphates of magnesia and soda, chloride of magnesium, &c., with sesquioxide of iron. The *Yellow Sulphur Springs,* of Montgomery Co., contain, also, preparations of lime, &c., and several purging sulphates. The *Healing Springs,* of Bath Co., are thermal waters, which are said to be efficacious in various ulcerated conditions, in secondary and tertiary syphilis, &c. The *Variety Springs,* in Augusta Co., are so named because they include sulphur, chalybeate, and other waters. See, also, West Virginia.

Vir'ginis Vitia'tio, 'violation of a virgin,' Defloration.

Virgin'ity, *Virgin'itas, Partheni'a, Integ'ritas, Maid'enhood, Maid'enhead,* (F.) *Virginité, Pucélage,* (from *virgo.*) The state of one who has never had carnal commerce.

Vir'gin's Bow'er, Com'mon, Clematis vitalba, Clematis virginica — v. Bower, upright, Clematis recta — v. Sweetscented, Clematis flammula.

Vir'gin's Milk, *Lac Vir'ginis* seu *Virgina'lē* seu *Virgin'eum,* (F.) *Lait virginal.* A tincture of benjamin or of any other balsam, precipitated by the addition of water, which gives it a milky appearance. Also, subacetate of lead precipitated by water. It has been used as a cosmetic, to remove freckles, &c.

Virgin'itas, Virginity — v. Deflorata, Defloration.

Vir'go, gen. *Vir'ginis,* Virgin—v. Aurea, Solidago virgaurea.

Vir'gula, (dim. of *virga,* 'a rod,') Penis.

Viri'de Æ'ris, 'green of brass,' Cupri subacetas — v. Montanum, Cuprum.

Virid'ia, see Veratrum viride.

Viri'le, (from *vir,* 'a man,') Penis.

Vir'ile, *Viri'lis,* (from *vir,* 'a man.') Relating or appertaining to the adult age.

Vir'ile Age, see Age.

Viriles'cence, (from *virilis,* — *vir,* 'a man.' — 'manly.') The state of the aged female in which she assumes some of the characteristics of the male.

Viril'ia, (from *vir,* 'a man,') Pudibilia.

Viril'itas, gen. *Virilita'tis,* Adult age, see Age.

Virilita'tis Ino'pia, see Impotence.

Virilité, see Age.

Viril'ity, Adult age, see Age.

Vi'rose, Virous.

Vi'rous, *Vi'rose, Viro'sus,* (F.) *Vireux,* (from *virus.*) Possessed of noxious properties. Also, substances having a peculiar nauseous taste and odor.

Viro'sus, Virous.

Vir'tue, Faculty.

Vir'tus, gen. *Virtu'tis,* 'power,' (allied to *vir,* 'a man,') Faculty, Property—v. Formatrix, Plastic force — v. Plastica, Plastic force.

Vir'ulent, *Virulen'tus,* (from *virus.*) That which is of the nature of a virus or which is caused by a virus. Highly noxious.

Vi'rus. A Latin word, which signifies poison, but which, in medicine, has a somewhat different acceptation. By it is understood a principle, unknown in its nature and inappreciable by the senses, which is the agent for the transmission of infectious diseases. Thus we speak of the *variolic,* the *vaccine,* and the *syphilitic viruses. Virus* differs from *venom* in the latter being a secretion natural to certain animals, while the former is always the result of a morbid process, — a *morbid poison.*

Vi'rus, Ichor, Poison, Sanies — v. Vaccine, see Vaccina — v. Vitale, Sperm.

Vis, gen. *Vi'ris,* (allied to *vir,* 'a man,') Force — v. Adhæsionis, Cohesion (force of)—v. Attractionis, Cohesion (force of)—v. Aucta, Sthenia—v. Cohæsionis, Cohesion (force of)—v. Conservatrix,

V. medicatrix naturæ—v. Elastica, Elasticity—v. Essentialis, Plastic force.

Vis Expul'trix. The organic force by which, it was supposed, useless and effete materials were removed from the body.

Vis Formati'va, Plastic force.

Vis a Fron'tē, 'force from the front.' An action which is exerted from before; as that of the capillaries in the circulation of the blood.

Vis Genera'trix, Potentia generandi—v. Imminuta, Asthenia—v. Insita, Irritability—v. Irritabilitatis, Irritability.

Vis Medica'trix Natu'ræ, *V. conserva'trix, Autocrati'a, Autonom'ia, Autocrato'ria, Anthygian'sis, Autotherapei'a, Physiat'ricē, Physioautocrati'a, Physiautocrati'a, Physiautotherapi'a,* (F.) *Force médicatrice.* A term, employed by some, to express that instinctive healing power, in an animal or vegetable, by virtue of which it can repair injuries inflicted upon it, or remove disease.

Vis Metabol'ica, Metabolic force.

Vis Mor'tua. Under this name Haller included the mechanical properties of membrane, —flexibility, extensibility, elasticity, &c.—which are totally independent of the vital properties. They remain some time after the complete extinction of life in all its functions; seem to be connected with the mechanical arrangement of particles and the chemical composition of the substance in which they reside, and not to be affected until the progress of decomposition has become sensible.

Vis Muscula'ris, Myodynamia—v. Nervorum, Nervous power—v. Nervosa, Nervous power — v. Plastica, Plastic force — v. Reproductiva, Plastic force.

Vis a Ter'go, 'force from behind.' An action of impulsion or propulsion, as that of the heart in the circulation of the blood.

Vis Vi'tæ, Irritability, Vis vitalis.

Vis Vita'lis, *Vis Vi'tæ, Vis* seu *Fac'ultas Zo'tica,* (F.) *Force vitale.* The *vital force—Bi'od* of Von Reichenbach — which distinguishes living matter from the dead. Also, Irritability.

Vis Zo'tica, Vis vitalis.

Visage, (from [L.] *videre, visum,* 'to see,') Countenance.

Visca'go (gen. *Viscag''inis*) **Beh'en,** (*viscum,* 'birdlime,') Cucubalus behen.

Vis'cera, (pl. of *viscus,*) Entrails, Uterus, see Viscus.

Vis'ceral, Splanchnic.

Vis'ceral Cav'ity. One of the two great cavities which may be said to be inclosed in the arrangement of the segments of the skelcton. See Neural cavity.

Vis'ceral Plates. The lateral parts of the middle layer of the embryo lying beyond the chorda dorsalis, which afterwards unite to form the *mesial plate.*

Viscera'lis, Splanchnic, Stomachal.

Viscera'tion, Exenterismus.

Viscères, ([L.] *viscera,*) Entrails.

Visco'nia, Physconia.

Vis'cum Al'bum, *Ix'us, Ix'ia, Da'bach, Mis'tletoe,* (F.) *Gui, Gui de Chêne, Gillon.* A parasitic plant, which grows on a number of trees. *Order,* Loranthaceæ. *Sex. Syst.* Dicœcia Tetrandria. That of the oak—*Vis'cum querci'num*—has been most celebrated, but it does not differ from the others. It was, at one time, much used in epilepsy and other neuroses; the wood or leaves being given in powder, in the dose of ʒss. or ʒj. The berries, also called *Pommes hémorrhoïdales,* from their supposed virtues, are drastic; and, when applied externally, are maturative.

Vis'cum Capen'sē. A South African parasitic shrub, which grows on the stems of several species of Rhus and Euclea.

Vis'cum Flaves'cens, *V. verticilla'tum, Yel'low or Yel'lowish Mis'tletoe,* indigenous, has been given in the same cases as the *Viscum album.*

Vis'cum Verticilla'tum, V. flavescens.

Vis'cus, gen. *Vis'ceris.* Any internal organ of the body.

Vis'io, Pupil, Vision.

Vis'ion, *Sight, Vis'io, Vi'sus,* (from *videre, visum,* 'to see,') *Op'sis, Om'ma,* (F.) *Vue.* The action of seeing. The sight is one of the five senses, and the eye is its organ. By it we distinguish colors, and appreciate most of the physical qualities of external objects. The eye is composed of different transparent media, whose curvatures and refractive powers are so combined as to render insensible the aberrations of sphericity and refrangibility, and to concentrate the numerous rays proceeding from more or less distant objects. These rays traverse, successively, the transparent cornea, the aqueous humor, the crystalline, the vitreous humor, and strike upon the retina, on which they impress the figure of the object whence they have proceeded; and, in order that no obscurity may arise from the reflections, which might otherwise occur, the anterior of the eye is lined by a membrane — the choroid — which is itself covered internally by a dark pigment. This absorbs the light, like the dark pigment in the interior of telescopes, and thus obviates confusion. As the rays proceeding from an object must cross each other in their course to the retina, it follows that those proceeding from the upper part of an object must fall upon the lower part of the retina, and conversely, so that the object must be impressed upon the retina in an inverted position; yet experience teaches us to appreciate the position accurately.

Vis'ion, Binoc'ular, see Binocular—v. Colored, Chromopsia — v. Dichromic, Dichromism and Achromatopsia—v. Double, Diplopia —v. Iridescent, Chromopsia — v. Manifold, Polyopsia — v. Multiple, Polyopsia — v. Phantasmatum, Metamorphopsia — v. Single, see Binocular.

Vism'ia Guianen'sis, (after Visme, a merchant and botanist of Lisbon,) Hypericum Guianense.

Vis'nomy, Physiognomy.

Viso'rium Or'ganum, (from *videre, visum,* 'to see,') Eye.

Viso'rius, Visual.

Vis'ual, *Visua'lis, Viso'rius,* (F.) *Visuel.* That which concerns the sight or belongs to vision.

Vis'ual An'gle is the angle formed by the crossing of two rays, proceeding from opposite points of any body, in their passage through the pupil. It is by the size of this angle that we judge, to a certain extent, of the dimensions of objects.

Visuel, Visual.

Vi'sus, gen. *Vi'sûs,* (from *videre, visum,* 'to see,') Vision — v. Acrior, Nyctalopia — v. Acris, Oxydercia — v. Brevior, Myopia — v. Coloratus, Chromopsia — v. Debilitas, Asthenopia — v. Decolor, Achromatopsia — v. Defiguratus, Metamorphopsia — v. Dimidiatus, Hemiopia — v. Diurnus, Hemeralopia — v. Duplicatus, Diplopia — v. Hebetudo, Amblyopia—v. Juvenum, Myopia— v. Longior, Presbytia — v. Lucidus, Photopsia — v. Muscarum, see Metamorphopsia — v. Nebulosus, Nebula—v. Nocturnus, Nyctalopia—v. Senilis, Presbytia.

Vi'ta, Life — v. Propria, Irritability.

Vi'tal, *Vita'lis, Biot'ic, Biot'icus,* (F.) *Vital,* (from *vita.*) Relating or appertaining to life.

Vi'tal Capac''ity, *Pulmon'ic* or *Lung* or *Breath'ing capac''ity.* A term employed by Dr. Hutchinson to designate the number of cubic inches of air which a person can forcibly expire after a full inspiration. He found that for every inch of height — from five feet to six — eight additional cubic inches of air can be given out by a forced expiration. The quantity, however, is influenced, also, by weight and age. See Respiration.

Vi'tal Cen'tre, Centrum vitale—v. Dynamics, see Dynamic — v. Force, Vis vitalis — v. Point, see Centrum vitale.

Vi'tal Prin'ciple, *Flam'mula* seu *An'ra vita'lis, Microcosme'tor, Vital Flame,* (F.) *Flamme vitale.* The principle which, in association with matter, as in organized bodies, controls its manifestations and properties, and distinguishes organized matter from the inorganic. We know nothing of this principle, except as a force in connection with organization.

Vi'tal Prop'erties, see Properties, vital — v. Statistics, Statistics, medical — v. Vortex, Life.

Vital'ba, (*vitis,* 'vine,' and *albus,* 'white,') Clematis vitalba.

Vi'talism, *Vitalis'mus,* (from *vita.*) The doctrine of the *vitalist* — *vitalis'ta* — who ascribes every function of the organism to the direct agency of a vital principle or force.

Vi'talist, see Vitalism.

Vital'ity, *Vital'itas,* (F.) *Vitalité.* The vital principle or force; also, used in the sense of vital action or movement. Vitality is said to be *dormant,* when the actions or movements of an organized body are so obscure as not to be perceptible unless it be placed under circumstances favorable for their manifestation.

Vi'talize. To endow with life.

Vi'tals, *Vita'lia.* Parts that are necessary for life — the heart, lungs, and nervous centres more especially.

Vi'tarob'orant, Palm'er's, (*vita,* and *roborare,* 'to strengthen.') A farinaceous preparation, which appears to consist of a mixture of the red or Arabian lentil and wheat flour, the latter in considerable amount, sweetened with sugar. It bears some resemblance to Revalenta.

Vit'ellary, Vitelline — v. Membrane, Zona pellucida.

Vitelline, Zona pellucida.

Vit'elline, *Vitel'linus, Vit'ellary, Lecitho'des,* (from *vitellus,* 'the yolk of an egg.') Appertaining to or resembling the vitellus or yolk. Also, the yolk membrane. A modification of albumen found in the yolk of egg. See Vesicula umbilicalis.

Vit'elline Cav'ity, Latebra — v. Disk, Proligerous disk — v. Duct, see Vesicula umbilicalis — v. Fluid, see Vesicula umbilicalis.

Vit'elline Ped'icle or Apoph'ysis is the pedicle which attaches the umbilical vesicle to the embryo. See Vesicula umbilicalis.

Vit'elline Pouch, Vesicula umbilicalis — v. Vessels, Omphalomesenteric.

Vit'ellomesenter'ic, Omphalomesenteric.

Vitel'lum O'vi, 'the yolk of an egg,' see Ovum.

Vitel'lus Ovi, see Ovum.

Vi'tex, gen. *Vi'ticis,* (from *vieo,* 'I bind' [?],) *V. Ag'nus cas'tus* seu *verticilla'tus,* (F.) *Gattilier, Petit Poivre, Poivre de moine* ou *sauvage. Ord.* Verbenaceæ. *Sex. Syst.* Didynamia Angiospermia. The *Chaste Tree.* The seeds, when fresh, have a fragrant smell, and an acrid, aromatic taste. Formerly, they were celebrated as antaphrodisiacs.

Vi'ti Sal'tus, 'Vitus's dance,' Chorea.

Vit''ia (pl. of *vitium*) **Pri'mæ Conformatio'nis,** see Monster.

Vitia'tio, (*vitiare, vitiatum,* 'to violate,') Stuprum.

Vitilig''ines, (pl. of *vitiligo,*) Ephelides, Lineæ albicantes.

Vitili'go, gen. *Vitilig''inis,* (from *vitulus,* 'a calf;' hence 'calfskin,') Achroma, Herpes exedens, Lepra, Porrigo decalvans — v. Alphus, Lepra alphoides — v. Melas, Lepra nigricans — v. Nigra, Lepra nigricans.

Vitiligoï'dea, (*vitiligo,* and εἶδος, 'resemblance.') A disease of the skin, so called from its resembling the vitiligo of Willan. It appears under two forms: either as tubercles — *V. tuberosa* — varying from the size of a pin's head to that of a large pea, isolated or confluent; or as yellow patches of irregular outline, slightly elevated, and with but little hardness — *V. pla'na, Xanthelas'ma pla'num, Xantho'ma.*

Vi'tis Al'ba Sylves'tris, Bryonia alba — v. Apyrena, see V. Corinthiaca.

Vi'tis Corinthi'aca. *Ord.* Vitaceæ. *Sex. Syst.* Pentandria Monogynia. This plant affords the *U'væ Corinthi'acæ pas'sæ mino'res, Pas'sæ Corinthi'acæ, Pas'sulæ mino'res, Corinthi'acæ, Cur'rants,* (Prov.) *Curn'berries,* (F.) *Raisins de Corinthe;* which are the dried fruit of the *Vitis Corinthi'aca* or *Vitis apyre'na;* and are similar, in their properties, to the raisin.

Vi'tis Idæ'a Myrtil'lus, Vaccinium myrtillus — v. Idæa palustris, Vaccinium oxycoccos — v. Idæa punctata, Vaccinium vitis idæa — v. Sativa, V. vinifera.

Vi'tis Vinif'era, *V. sati'va, Am'pelos, A. Oinoph'orus, Grapevine, Vine,* (F.) *Vigne.* Vine leaves and the tendrils have an astringent taste, and were formerly used in diarrhœa, hemorrhage, &c. The juice or sap, called *Lac'ryma,* has been recommended in calculous disorders and in cases of chronic ophthalmia. The juice of the unripe fruit is called *Ver'juice.* The *Grape, U'va, Bo'trys, Staph'ylē, Rhax,* (F.) *Raisin,* when ripe, is a wholesome, delicious fruit; and, when dried, forms the *U'væ pas'sæ majo'res, Pass'ulæ majo'res, U'væ pas'sæ so'lē sicca'tæ, U'va pas'sa,* (Ph. U. S., 1873,) *Uvæ,* (Ph. B., 1867,) *Zibebæ, Raisins.* These are inodorous; and to the taste, subacidulous, sweet, and mucilaginous. They are demulcent and nutritive.

Vit''ium, Disease — v. Caducum, Epilepsy.

Vit''ium Conformatio'nis. A disease or fault of conformation.

Vit'ium Divi'num, Epilepsy — v. Herculeum, Epilepsy — v. Scrophulosum, Scrofula.

Vitra'ria, Parietaria.

Vitrē, (from *vitrum,*) Hyaline.

Vit'reocapsuli'tis, (*vitreo,* 'appertaining to the vitreous humor,' and *capsulitis,* 'inflammation of a capsule,') Hyalitis.

Vit'reous, (from *vitrum,*) Hyaline — v. Body, Corpus vitreum — v. Humor, Corpus vitreum — v. Humor of the ear, Vitrine auditive — v. Table of the skull, see Table.

Vi'treus, Hyaline.

Vitreux, Hyaline.

Vitri'na Audito'ria, Vitrine auditive — v. Ocularis, Corpus vitreum.

Vitrine Auditive (F.), *Humeur vitrée,* (from *vitrum,*) *Aqu'ula vit'rea auditi'va, Vitri'na audito'ria, A'qua labyrin'thi membrana'cei, Endolymph'a, End'olymph, Li'quor Scar'pæ, Liq'uor* or *Flu'id of Scar'pa, Vit'reous Hu'mor of the Ear.* The fluid contained in the *membranous labyrinth* of the ear, so called from its resemblance to the *vitreous* humor of the eye.

Vit'riol, (from *vitrum,* 'glass,') Ferri sulphas — *v. Blanc,* Zinci sulphas — v. Blue, Cupri sulphas — v. Green, Ferri sulphas — v. Roman, Cupri sulphas — *v. Vert,* Ferri sulphas — v. White, Zinci sulphas.

Vitri'olum Al'bum, Zinci sulphas — v. Ammoniacale, Ammoniæ sulphas — v. Cæruleum, Cupri sulphas — v. Cupri, Cupri sulphas — v. Cyprium, Cupri sulphas — v. Ferri, Ferri sulphas — v. Goslariense, Zinci sulphas — v. Martis, Ferri sulphas — v. Romanum, Cupri sulphas — v. Veneris, Cupri sulphas — v. Viride, Ferri sulphas — v. Zinci, Zinci sulphas.

Vitroden'tine, (*vitrum,* and *dens,* gen. *dentis,* 'a tooth.') The superficial layer of the true dentine in fishes, taking the place of the enamel.

Vi'trum, *Hy'alos, Glass, Bran'cia,* (F.) *Verre.* Glass, coarsely powdered, has been sometimes used to remove speeks of the cornea.

Powdered glass has been regarded, but erroneously, as a poison. It acts only mechanically.

The saline scum which swims on glass when first made has been used in toothpowders. It is called *San'diver, Sel de verre, Glass yall, Fel vi'tri,* &c.

Vi'trum Antimo'nii, see Antimonii vitrum—v. Hypoclepticum, Separatorium — v. Oculare, see Spectacles — v. Sublimatorium, Aludel.

Vit'ta, Bandelette, Caul.

Vitta'ria Cet'erach, (*vitta,* 'a band, a fillet,') Asplenium ceterach.

Vit'tie Vayr, Andropogon muricatus.

Vit'ulary Fe'ver, *Partu'rient A'poplexy, Partu'rient fever,* (F.) *Fièvre vitulaire.* A fatal disease occurring in connection with parturition in cows, characterized by tendency to congestion of the brain, apoplexy, &c.

Vivace, (from *vivax,* gen. *vivacis,*—from *vivere,* 'to live,'—'living long, tenacious of life.') An epithet given by Levret to uterine polypi, which he considers to be, commonly, vegetations of some ulcer in the interior of the uterus, and incurable.

Viver'ra Civet'ta, see Civetta.

Vivipare, Viviparous.

Viviparité, see Viviparous.

Vivip'arous, (F.) *Vivipare,* (*vivus,* 'alive,' and *pario,* 'I bring forth.') An epithet applied to animals whose young are brought forth detached, without requiring to be hatched, as in the *Oviparous.* The condition may be termed *Vivip'arousness.* (F.) *Viviparité.* See Generation.

Vivip'arousness, see Viviparous.

Vivisec'tio, (*vivus,* 'alive,' and *secare, sectum,* 'to cut,') Vivisection.

Vivisec'tion, *Vivisec'tio, Vivæsec'tio, Biotom'ia,* (*vivus,* 'alive,' and *secare, sectum,* 'to cut.') The act of opening or dissecting living animals. One who performs vivisections is a *Vivisec'tor.*

Vleminckx, Solu'tion of, see Calcis sulphuretum.

Vo'cal, (from *vox,*) Oral — v. Cords, see Cords, vocal—v. Ligaments, see Cords, vocal—v. Tube, see Tube, vocal.

Voca'lis, Vowel.

Voce di Petto, 'chest voice,' see Voice — *v. di Testa,* 'head voice,' see Voice.

Vocifera'tio, Anaphonesis.

Voice, *Vox, Au'dē, Pho'nē,* (F.) *Voix,* (from *vocare,* 'to name, to call.') An appreciable sound produced by the air, when driven from the lungs, throwing the inferior ligaments of the glottis into vibration. The function by which this is effected has been called *Phona'tion.* It is a function of *animal* life; and, in animals, is limited to the production of the *simple* or *instinct'ive voice,* as well as in the idiot; but, in intellectual man, becomes much more complicated and articulated,—an evidence of his intellectual superiority.

Voice, Artic'ulated, *Speech, Loque'la, Glos'sa, Glot'ta, La'lia, Phra'sis,* (F.) *Parole, Voix articulée,* is the voice as produced by the glottis, modified by the motions of the tongue, lips, and other parts of the vocal tube. Most physiologists agree in regarding the glottis, or the space between the thyroärytenoid ligaments plus the ligaments themselves, as the part where vocal sounds are formed; but the mechanism of this formation is a matter of dispute. The greater part of individuals regard the glottis and its ligaments, with the *vocal tube,* or the space which the sound has to traverse after it is produced in the glottis, as a reed instrument, like the clarionet, the inferior ligaments of the glottis constituting the reed. In speech, as ordinarily effected, the tongue, lips, teeth, &c., are concerned, but there are some authentic cases on record, where it has been accomplished after the tongue has been removed. In such cases, the articulated voice must have been produced in the glottis alone, or in it aided by an obscure action of the parts above it.

The singing voice is not limited to the larynx; the pharynx would seem to be concerned also. The notes that are produced in the latter have been termed *supralaryngе'al,* or *notes of the sec'ond reg''ister.* They constitute the *pharyngе'al voice, falset'to* or *fauccette* voice or *voce di testa* (I.), *Voix de tête, Voix de fausset* (F.). The *laryngе'al voice* or *voice of the first reg''ister, Chest voice,* is the *Voce di Petto* (I.), *Voix de Poitrine* (F.). The laryngeal voice, which is always more elevated, by an octave, in the female than in the male, furnishes the types called *Sopra'no, Al'to* or *Contral'to, Tenore,* and *Basso.* The first two belong to the female voice; the last two to the male. The *Bar'itone* is between the bass and tenor.

Voice, Bleat'ing, Egophony — v. Cavernous, Pectoriloquy — v. Chest, see Voice, articulated.

Voice, Chol'eric, *Vox choler'ica, Choleropho'nē, Cholerapho'nia.* The peculiar husky voice of those affected with cholera.

Voice, Convul'sive, *Vox convulsi'va,* (F.) *Voix convulsive.* A neurosis of the voice, consisting in the production of discordant sounds—acute and grave—which cannot be brought to the natural tones by any effort of volition. It seems to be caused by disordered contraction of the muscles of the larynx.

Voice, Falset'to, see Voice — v. Goat's, Egophony — v. Laryngeal, Laryngophony, see Voice —v. Pharyngeal, see Voice — v. Tracheal, Laryngophony.

Voie, ([L.] *via,*) Way.

Voies Aëriennes, Air-passages — *v. Aërifères,* Air-passages — *v. Digestives,* Ways, digestive — *v. Lacrymales,* Lachrymal passages — *v. Premières,* Ways, digestive — *v. Secondes,* Ways, second — *v. Urinaires,* Urinary passages.

Voile ([L.] *velum*) *du Palais,* Velum pendulum palati — *v. Médullaire inférieure,* Velum medullare inferius — *v. Médullaire supérieure,* Valvula Vieussenii.

Voix, ([L.] *vox,*) Voice — *v. Aigre,* see Acid — *v. Articulée,* Voice, articulated, Pectoriloquy — *v. Bourdonnante,* see Resonance — *v. Bronchique,* Resonance — *v. Caverneuse,* Pectoriloquy — v. *Chévrotante,* Egophony—*v. Égophonique,* Egophony — *v. de Fausset,* see Voice, articulated — *v. de Poitrine,* see Voice, articulated — *v. de Polichinelle,* Egophony — *v. Sénile,* Egophony — *v. de Tête,* see Voice, articulated—*v. Tubaire,* see Resonance.

Vo'la, Palm — v. Manûs, Palm — v. Pedis, Sole.

Volant d'Eau, Nymphæa alba.

Volat'ica, (*volare,* 'to fly,') Lichen.

Volatiliza'tion, *Volatilisa'tio, Volatisa'tio,* (from *volare,* 'to fly.') The operation of reducing volatilizable substances into gas or vapor.

Volatisa'tio, (*volare,* 'to fly.') Volatilization.

Volcanisation, see Vulcanite.

Volit''ion, *Volit''io,* (from *volo,* 'I will.') The act of willing. Hence:

Volit''ional. Relating to volition. Thus the muscles may be moved by a *volitional* or by an *emotional* impulse.

Vol'nus, gen. *Vol'neris,* Wound.

Volontaire, Voluntary.

Volonté, Voluntas.

Volsel'la, (*vellere,* 'to pluck,') Acanthabolus, Forceps, Madisterium — v. Patini, Valet à Patin.

Vol'taism, (after Volta,) Galvanism.

Vol'tus, Countenance. Faec.

Volumet'ric, *Volumet'ricus,* (F.) *Volumétrique,* (from *volume,* and *meter.*) Relating to the measurement of volumes; as the *volumet'ric* method of analysis for the urine, the principle of which

consists in adding to a known quantity of urine the exact amount of a test liquid required to precipitate the whole of any one ingredient contained in it. It is frequently employed for the determination of the chlorine, urea, phosphoric and sulphuric acids, and sugar, of the urine.

The British Pharmacopœia (1867) contains numerous test solutions for volumetric estimations of various substances, with full directions as to apparatus, &c.

Vol'untary, *Hecu'sius, Volunta'rius,* (F.) *Volontaire,* (from *voluntas,* 'will.') Relating to the will; as '*voluntary* muscles,' muscles which act in obedience to the will, and produce *voluntary movements,* (F.) *Mouvements conscients* ou *volontaires.*

Volun'tas, gen. *Volunta'tis, Volen'tia, Arbit''rium, Cupid'itas, Boule'sis, Bule'sis, Thele'ma,* (F.) *Volonté,* (from *volo,* 'I will.') Will or desire.

Volun'tas seu Cupid'itas Deseden'di, *Lubi'do intesti'ni.* Desire to go to stool.

Vol'va, Vulva.

Vol'vulus, (from *volvere,* 'to roll,') Ileus — v. Intestinorum, Intussusceptio.

Vomen'di Cona'men Ina'nē, 'vain effort at vomiting,' Vomiturition.

Vo'mer, gen. *Vo'meris,* 'a ploughshare,' *Os vo'meris, Os maxill'æ superio'ris undec''imum, Ara'trum, Plough'share bone.* One of the bones of the face, so called from its resemblance. It is an azygous bone, forming the posterior part of the septum narium. It is thin, flat, and quadrilateral; and is articulated, below, to the superior maxillary and palatine bones; and above, to the sphenoid, ethmoid, and cornets of Bertin. It is developed by a single point of ossification. Also, the penis.

Vom'ica, gen. *Vom'icæ, Pyocys'tis,* (from *vomere,* 'to vomit,' 'to cast up,') (F.) *Vomique, Crachement de pus.* A term used by some authors for any encysted collection of purulent matter in the interior of a viscus. It is commonly, however, restricted to a purulent collection in the lungs, encysted or not, which may be discharged by the mouth, by breaking into the bronchial tubes. Two kinds of vomicæ are distinguished: the one caused by the softening or breaking down of pulmonary tubercles; the other, of much more rare occurrence, formed by a circumscribed abscess of the lungs. Instead of opening into the bronchia, the abscess is sometimes discharged into the cavity of the pleura, causing empyema.

Vom'icine, Brucine.

Vomique, Vomica.

Vomiquier, Strychnos nux vomica.

Vomissement, (from *vomir,* [L.] *vomere,* 'to vomit,') Vomiting — *v. de Sang,* Hæmatemesis.

Vom'it, (*vomere, vomitum,* 'to vomit,') Emetic — v. Black, Fever, yellow, Melæna.

Vom'it, Dry, of Mar'riott. A once celebrated emetic, called 'dry,' from its having been given without solution. It consisted of equal portions of tartrate of antimony and potassa, and sulphate of copper.

Vomitif, Emetic.

Vom'itine, Emetine.

Vom'iting, *Vom'itus, Vomit''io, Vomit''ium, Vom'itum, Evomit''io, Ana'tropē, Em'esis, Em'etus, Pal'mus vom'itus, Ægritu'do ventric'uli, Spew'ing, Pu'king, Sick'ness of the Stom'ach,* (old Eng.) *Par'breaking,* (Sc.) *Bok'king, Bock'ing, Bra'king, Brocht,* (Prov.) *Hull'uping,* (vulg.) *Casca'ding, Cast'ing,* (F.) *Vomissement.* The act by which solids and liquids, contained in the stomach, are ejected by the mouth. Vomiting is the effect of some special irritation of the nerves of the stomach, calling, by reflex action, on the appropriate muscles to expel the contents of the viscus. It is not accomplished solely by the contraction of the stomach, as was for a long time believed. That organ, indeed, assists in the process; but the main cause is the compression exerted upon the parietes of the viscus by the diaphragm and abdominal muscles. Vomiting is a symptom common to numerous diseases. At times, it is sympathetic, as in affections of the kidney, uterus, brain, &c.; at others, it is symptomatic, as in gastritis, peritonitis, &c. When very troublesome, it may often be palliated by effervescent draughts, aromatics, sinapisms, or blisters to the epigastric region, &c.

Vom'iting at Pleas'ure, Regurgitation — v. of Blood, Hæmatemesis — v. Stercoraceous, Copremesis.

Vomit''io, gen. *Vomitio'nis,* Vomiting — v. Sanguinis, Hæmatemesis.

Vomit''ium, Vomiting.

Vomito Negro, 'black vomit,' Fever, yellow — *v. Prieto,* Fever, yellow.

Vomitoire, Émétique.

Vomito'rium, Emetic.

Vom'itory, Emetic.

Vom'itum, Vomiting.

Vomiturit''ion, *Vomiturit''io, Emes'ia, Dysemes'ia, Subver'sio stom'achi;* ineffectual efforts to vomit; *Vomeu'di cona'men ina'nē, Retch'ing, Reach'ing, Heav'ing,* (old Eng.) *Bolke,* (Sc.) *Bok, Bock, Brakiug.* Some authors mean, by this term, a vomiting of but little matter, or that which is effected almost without effort. The first acceptation is the most general.

Vom'itus, gen. *Vomitûs,* (from *vomere, vomitum,* 'to vomit,') Vomiting — v. Cruentus, Hæmatemesis — v. Fæculentus, Copremesis — v. Marinus, Nausea marina — v. Navigantium, Nausea marina — v. Niger, Fever, yellow — v. Pituitosus, Blennemesis — v. Profusus, Hyperemesis — v. Purulentus, Pyemesis — v. Sanguinis, Hæmatemesis — v. Stercoris, Copremesis.

Voora'ra, Curare.

Vor'tex of the Heart. A peculiar arrangement of the superficial muscular fibres of the ventricle, consisting of a coiling inwards at the apex of the heart, around which they are arranged in a whorl-like form or vortex.

Vor'tex, Vi'tal, 'vital whirlpool,' (from *vortere, vertere,* 'to turn,') Life.

Vor'tices Len'tis. A penniform or whorled appearance presented by the peculiar arrangement of the radiated fibres of the crystalline lens.

Vo'tive Tab'let, (from *votum,* 'a vow,') Tabula votiva.

Vouacapoua America'na, Geoffræa inermis.

Voussure Précordiale, *Precor'dial vault'ing, Vault'ing of the chest,* (*vouter,* 'to arch,' from [L.] *volvere, volutum,* 'to curve,') 'præcordial arching, vaulting, or prominence.' The elevation or arching of the parietes of the thorax, as witnessed in the newborn child, when air has been received into the lungs, and in certain thoracic affections, as in hypertrophy of the heart.

Voûte, (from [L.] *volvere, volutum,* 'to curve,') Vault — *v. Médullaire,* Corpus callosum — *v. à Trois Piliers,* Fornix.

Vow'el, *Voca'lis,* (from *vox,* gen. *vo'cis,* 'the voice,') (F.) *Voyelle.* Physiologically, a continuous breath or sound, produced in the glottis; but more or less modified by the form of the vocal tube, through which it has to pass. In the English language, *a, e, i, o, u, w,* and *y* are vowels.

Vox, gen. *Vo'cis,* Voice — v. Cholerica, Voice, choleric — v. Clandestina, Whispering — v. Clangosa, Oxyphonia — v. Convulsiva, Voix convulsive — v. Nasalis, Rhinophonia — v. Rauca, Raucedo, Raucous voice — v. Raucisona, Raucous voice.

Voyelle, Vowel.

Vraic, see Soda.

Vue, (*voir,* 'to see,' *vu,* 'seen,') Vision — *v. Basse,* Myopia — *v. Courte,* Myopia — *v. Diurne,* Hemeralopia — *v. Faible,* Amblyopia — *v. Longue,* Presbytia — *v. Louche,* Strabismus — *v. Nocturne,* Nyctalopia.

Vul'canite, Den'tal, (from *Vulca'nus, Vulcan,* 'the god of fire.') A compound of caoutchouc and sulphur or sulphur compounds, used in the formation of plates for artificial teeth, &c. The formation of vulcanite is termed *Vul'canization,* (F.) *Volcanisation, Sulfuration.*

Vul'ga, Vulva.

Vul'nera Sclopeta'ria, pl. of *vulnus,* and *sclopetum,* 'a gun,' see Sclopetarius and Wound—v. Sclopetica, see Sclopetarius and Wound — v. à Sclopetis, see Sclopetarius and Wound.

Vulnéraire, Vulnerary — *v. Suisse,* see Falltranck.

Vulnera'rius, Traumatic.

Vul'nerary, *Vulnera'rius, Traumat'icus, Traumat'ic,* (from *vulnus,* gen. *vul'neris,* 'a wound.') (F.) *Vulnéraire.* A name applied by the ancients to medicines, which they considered capable of favoring the consolidation of wounds. The property has been ascribed to various plants. The French Codex (1866) has an *Eau Vulneraire Rouge,* composed of 19 different articles, most of which are the fresh leaves of plants.

Vulnera'tio Ner'vi, (*vulnerare, vulneratum,* 'to wound,') Neurotrosis.

Vul'nerum Vinctu'ra, 'binding of wounds,' Deligation.

Vul'nus, gen. *Vul'neris,* (from *vellere,* 'to pluck or tear,') Wound — v. Laceratum, see Laceration — v. Selopetarium, Wound, gunshot —v. Sclopeticum, Wound, gunshot — v. Simplex, Cut.

Vulnus'culum, (dim. of *vulnus,*) Wound.

Vul'pis Mor'bus, 'disease of the fox,' Alopecia.

Vulsel'lum For'ceps, (from *vellere, vulsum,* 'to pluck,') see Forceps (vulsellum).

Vultueux (F.), *Vultuo'sus,* 'full of expression,' (from *vultus.*) Corvisart has used the expression, *Face vultueuse, Fa'cies vultuo'sa,* for the face when it is more florid and swollen than in the natural state. This appearance, which is observed in active aneurism of the heart, according to Corvisart, is owing to the afflux of blood into the arterial capillaries, and hence differs from the livid and swollen appearance caused by the accumulation of blood in the venous capillaries, constituting *Face injectée.*

Vul'tus, gen. *Vultûs,* Countenance, Face — v. Tetricus et Mœstus, Scythropasmus.

Vul'va, (from *volvere,* 'to enfold,' or from *valvæ,* 'folding doors' [?],) Uterus, especially of animals; see Vulva.

VUL'VA, *Volva, Hor'tus, Cun'uus, Puden'dum muli'ebrē, Pudenda mulieb'ria, Si'nus pudo'ris, Ic'tar, Chærus, Ar'vum, Buc'ca, Bul'ga, Cadur'cus, Cus'tos, Fe'men, An'nulus, Fe'mur sum'mum, Follic'ulus, Fun'dus, Gre'minm, Hia'tus, Lanu'vium, Navis, Oppid'ulum, Spe'cus, Vulga, Cym'ba, Cys'thus, Sal'tus, Clitor'ium, Os'tinm, Sul'cus, Cou'cha, Por'cus, Por'ta, Fores* (of virgins), *Interfemin'eum, Mulieb'ria, Fos'sa mag'na muli'ebris, Episci'on, Es'chara, Tre'ma, Hor'tulus cupid'inis, Byssos, Ca'va, Caver'na, Del'phys, Del'ta, Fo'vea, Gynæce'um, Secess'us, Vallis fem'orum, Eugi'um, Eugi'on, Lo'ci muli'ebres, Fe'male puden'dum, Fe'male or'gans of genera'tion, Fe'male parts, Shape,* (F.) *Vulve.* A longitudinal opening between the projecting parts of the external organs of generation in the female, extending from the mons veneris to the perinæum, and which is called, also, *Fossa magna.* Some anatomists mean, by this term, the whole of the external genital organs of the female: — mons veneris; labia majora, and the cleft or vestibule separating them; the clitoris; nymphæ; meatus urinarius; entrance of the vagina; with the hymen or the carunculæ myrtiformes, fossa navicularis, and fourchette.

VUL'VA, *Fora'men commu'nē ante'rius, I'ter* seu *Ad'itus ad infundib'ulum, Iter* seu *Ad'itus ad ter'tium ventric'ulum, Ri'ma ad infundib'ulum, Apertu'ra ante'rior ventric'uli ter'tii cer'ebri.* An opening situate at the junction of the optic thalami, in the third ventricle of the brain, and immediately beneath the anterior crus of the fornix.

Vulvaire, Chenopodium vulvaria, Vulvar.

Vul'var, *Vulva'ris,* (F.) *Vulvaire,* (from *vulva.*) That which relates to the vulva. Chaussier gives this name to the external pudic arteries, because they are distributed to the vulva.

VUL'VAR HER'NIA, Pudendal hernia.

Vulva'ria, (from its use in diseases of the vulva [?],) Chenopodium vulvaria.

Vulve, Vulva.

Vulvi'tis, gen. *Vulvi'tidis,* (*vulva,* and *itis.*) Inflammation of the vulva.

Vulvoü'terine, *Vulvoüteri'nus,* (F.) *Vulvoutérin.* Relating or appertaining to the vulva and uterus.

VULVOÜ'TERINE CANAL', Vagina.

Vulvovag''inal, *Vulvovagina'lis.* Relating or appertaining to the vulva and vagina.

VULVOVAG''INAL GLANDS, Cowper's glands in the female.

W.

Wa'bran or **Way'bread,** ([Sax.] pægbpæde,) Plantago.

Wad, ([Sax.] pad,) Graphites.

Wa'fertree, Ptelea trifoliata.

Wag'ner, Cor'puscles of, Corpuscula tactûs — W. Vesicles of, see Molecule.

Wagne'rian Spot, see Molecule.

Wahoo', see Euonymus.

Wair, see Pila marina.

Waist'coat, Strait, *Indu'cula,* (F.) *Camisole, Gilet de force.* A dress, used for restraining maniacs, or those laboring under violent delirium. It has long sleeves, which are tied behind the body, so that the arms cannot be extricated from them. It ought, of course, to be made of very resisting materials.

Wake'robin, Arum maculatum, Trillium latifolium.

Wal'cheren Fe'ver. A form of remittent fever which at one time prevailed in Walcheren, the most western of the islands of the Netherlands.

Wale, ([Sax.] palan, 'marks of stripes,') Wheal.

Walk'ing, *Gres'sus, Inces'sus, Deambula'tio, Ambula'tio, Bad'isis,* (F.) *La Marche, Progression,* ([Sax.] pealcan, 'to walk.') The action by which we change place, by means of a succession of steps in the same direction. In walking forwards, the centre of gravity is constantly altered; and a series of small, parabolic curves is described on the heads of the thighbones, the ex-

tent of which is regulated by volition, under the guidance of vision.

Walla'chia, Min'eral Wa'ters of. There are many excellent sulphureous springs in this country, especially those at Bobotsch, Finceschti, Sibitschiudi Suz, Bräsa, Otschin, Serboneschte, Kimpalungi, Kosia, and Oloneschti. Chalybeate and saline springs have, also, been found at Sibitschiudi Suz.

Wall'eyed, (of uncertain etymology.) Applied to a horse, not perfectly white or cream-colored, which has a white iris. (Prov.) Having eyes with too much white. In the north of England, persons having the white of the eye very large and to one side, are so called. Applied also to an eye with little or no sight, "all white like a plastered wall."

Wall'flower, (probably *Gaulflower,*) Cheiranthus cheiri.

Wall'rue, Asplenium ruta muraria.

Wall'teeth, Molar teeth.

Wal'nut, (probably *Gaulnut,*) Juglans regia — w. Black, Juglans regia — w. White, Juglans cinerea.

Wal'nut Oil, Belgaum, see Aleurites triloba — w. Oil, Spanish, see Aleurites triloba.

Wal'ther, Duct of, see Sublingual gland.

Walthe'ria Douradin'ha, (after A. F. Walther, medical professor at Leipsic.) A plant of Brazil, *Order* Sterculiaceæ, which is used there in diseases of the chest, and in venereal affections. It is a demulcent.

Wal'ton, Min'eral Waters of. A mineral spring near Tewkesbury, in Gloucestershire, England. It is an acidulous chalybeate.

Wame, (womb,) Belly, Uterus.

Wampee, Peltandra Virginica.

Wan'dering Cells, see Amœboid.

Wang, ([Sax.] ƿanȝ, ƿenȝ, 'the cheek,') Gena.

Wang Teeth, Molar teeth.

Want, (from past participle of Sax. ƿanian, 'to wane,' 'to fall away,') 'need of that which is necessary,' (F.) *Besoin.* This word is sometimes used to express the imperious necessity which impels us to take food, drink, &c. (See Hunger and Thirst.) In a more general sense, it means the impressions transmitted by the organs to the brain, when it is necessary that they should act. These wants are called *instinctive desires* and *internal sensations* or *stimuli.* Such are the desires or wants to eat, drink, void the urine, breathe, (*besoin de respirer,*) &c.

Want, in the sense of indigence, (L.) *Eges'tas, Indigen'tia,* is the cause of a number of diseases.

Waps, Wasp.

War'bles, Wournils.

War'burg's Fe'ver Drops, see Bebeeru —W.'s Tincture, see Bebeeru.

Ward's Es'sence for the Head'ache, Linimentum camphoræ compositum—W.'s White Drops, see Hydrargyri nitras.

Ware, see Pila marina.

Wark, ([Sax.] ƿæɼc,) Pain.

Warm'brunn, Min'eral Waters of. Much frequented springs in Silesia, about a league from Hirschberg. They are thermal, 95° to 100° Fah., and are chiefly used as baths. The impregnating materials are carbonate of soda, sulphate of soda, sulphate of lime, chloride of sodium, carbonate of magnesia, and sulphohydric acid gas.

Warm Springs, see Georgia, mineral waters of, and Virginia, mineral waters of.

Warne'ra Canaden'sis, (after Mr. Richard Warner, of Woodford, England,) Hydrastis Canadensis.

War'renton Springs, see Virginia, mineral waters of.

Wart, ([Sax.] ƿeaɼt,) Verruca — w. Corneous, Cornu — w. Fig, Ficus — w. Moist, Acrothymion.

Wart Pock. A term sometimes employed for Varicella verrucosa.

Warts of the A'nus, see Condyloma.

Wart'y, *Ver'rucose, Ver'rucous, Verruco'sus,* (F.) *Verruqueux.* Full of warts. Resembling, relating or belonging to warts.

Wart'y Tu'mor of Cic'atrices. A name given by Mr. Howship to the tumor which sometimes appears on an old scar, many years, perhaps, after the injury that caused it. The ulcer formed under such circumstances has been called the *warty ulcer of Marjolin,* having been well described by that surgeon.

Wash, Black, see Hydrargyri submurias — w. Phagedenic, see Hydrargyri submurias — w. Preventive, Lotion, Hannay's — w. Red, Lotio rubra, and Lotion, camphorated, of Bates — w. White, Liquor plumbi subacetatis dilutus — w. Yellow, see Hydrargyri oxymurias.

Wash'erwoman's Scall or **Itch,** see Psoriasis.

Wash'itaw Springs, see Arkansas.

Wasp, *Waps,* ([Sax.] ƿæɼp, ƿæpɼ,) (Prov.) *Whamp, Ves'pa, Sphex, Crabo,* (F.) *Guêpe.* A genus of gregarious insects like the bee and ant. They are armed with a sting, which pours a poisonous fluid into the puncture made by it. (See Poisons, table of.) The best application is the sp. ammoniæ aromaticus, or some preparation of ammonia.

Was'serburg, Min'eral Waters of. Wasserburg is a town of Bavaria, seated on the Inn, 28 miles east of Munich. The water, called also *Aqua Aga'tii,* contains carbonic acid, carbonates of lime and magnesia, sulphates of lime and magnesia, chloride of sodium, carbonate of soda, and oxide of iron.

Wasserkur (G.), 'water cure,' Hydrosudotherapeia.

Wast'ing, ([Sax.] ƿeɼtan, 'to waste,') Consumption, Tabes.

Wasserschlag (G.), 'water stroke,' see Hydrocephalus internus.

Wa'ter, ([Sax.] ƿæteɼ, [G.] Wasser, *A'qua, Hy'dor, Protoxide of Hydrogen,* (F.) *Eau.* Water was at one time regarded as a simple element. It is now known to consist of eight parts by weight of oxygen and one of hydrogen. It freezes at 32°, and boils at 212° of Fahrenheit, and is taken as the unit in all tables of specific gravity of solid and liquid substances. Water, as we meet with it, is very different in its state of purity; generally, it contains small quantities of saline matter; at other times, as in sea-water and mineral waters, it is largely impregnated. The characters of water, as met with under ordinary circumstances, are well compared by Celsus, "*Aqua levissima pluvialis est; deinde fontana; tum ex flumine; tum ex puteo; post hæc ex nive, aut glacie: gravior his ex lacu; gravissima ex palude.*" Pure water — *A'qua pu'ra* — is one of the best diluents that can be used. When cold, and especially when iced, it is one of the most useful refrigerants, and, in the form of the cold, tepid, and warm bath, it is serviceable in numerous diseases. See Aqua, Eau, Bath, &c.

Wa'ter, Urine — w. Acidulous, simple, see Acidulous water, simple — w. of Aix-la-Chapelle, see Aix-la-Chapelle — w. Allflower, Urine, cows' — w. Wa'ter, Distilled, *A'qua destilla'ta, Ho'ly Water*, (F.) *Eau distillée, Hydrolat*, is generally ordered in extemporaneous prescriptions, but is rarely used. In some cases, however, it is absolutely necessary; the water, containing any saline impregnation—hard water, for example—decomposing certain substances. Distilled water has been recommended as a diet drink in cancerous affections; and it is used in the religious ceremonies of the Catholic Church. In the Pharmacopœia of the United States, it is directed to be made as follows: Take of *water*, ten gallons. First distil two pints, and throw them away; then distil eight gallons. Keep the distilled water in glass bottles.

Distilled wa'ters, (F.) *Hydrolats*, consist of common water, charged by distillation with the volatile principles of medicinal agents. See Aquæ destillatæ.

Wa'ter, Elder, see Sambucus — w. Epileptic, of Langius, Langii aqua epileptica — w. Fennel, Aqua fœniculi.

Wa'ter, Flor'ida, — a celebrated perfume, — may be made of *Ol. bergami*, f℥iv., *Tinct. benzoin. comp.*, f℥ij., *Alcohol.*, cong.

Wa'ter, Gou'lard, Liquor plumbi subacetatis dilutus.

Wa'ter, Hard. Common water, which decomposes and curdles soap; in contradistinction to *soft water*, which is readily miscible with soap. The hardness of water depends upon the presence in it of earthy salts, the most common of which is sulphate of lime.

Wa'ter, Hell, see Toddy — w. Holy, Water, distilled — w. Honey, see Mel — w. Hungary, Spiritus rosmarini.

Wa'ter, Lake, *A'qua ex la'cu*, (F.) *Eau de lac*, is apt to be impure, from decayed animal and vegetable matters. A great deal will, however, depend upon the magnitude of the collection, and the degree of stagnation.

Wa'ter, Laur'el, see Prunus laurocerasus — w. Lavender, Spiritus lavandulæ — w. Lead, Liquor plumbi subacetatis dilutus — w. Lemonpeel, see Lemonpeel tea — w. Lime, Liquor calcis — w. Lime, compound, Liquor calcis compositus — w. Lithia, aërated, see Lithia, carbonate of — w. Magnesia, aërated, Magnesia, fluid — w. Magnesia, carbonated, Magnesia, fluid.

Wa'ter, Marsh, *A'qua paludo'sa*, (F.) *Eau de Marais*, is the most impure of all. It is generally stagnant, and of course loaded with decomposing animal and vegetable matters.

Wa'ter, Med'icated, see Aquæ medicatæ.

Wa'ter, Min'eral, *A'qua minera'lis* seu *salu'bris* seu *medica'ta* seu *sote'ria, Fons saluta'ris* seu *medica'tus* seu *sote'rius*, (F.) *Eau minérale* ou *médicinale naturelle*. Water, holding in solution different saline and gaseous substances in sufficient quantity to be possessed of medicinal properties, or of a temperature different from that of the ordinary springs of the country.

Various mineral waters are referred to under their appropriate heads; as Saratoga, Wisbaden, &c. The mineral springs of the several States of the Union are referred to under each State; as New York, Vermont, &c. A table of the fixed constituents which enter into the composition of some of the more celebrated springs abroad is given by Dr. Pereira, in his "Elements of Materia Medica and Therapeutics." There is, also, a "Table of some of the principal Mineral Waters," at home and abroad, in the Author's "General Therapeutics and Materia Medica," vol. ii. p. 460, 6th edit., Philadelphia, 1857. One or two useful works have been recently published on this subject.

Mineral waters may be divided into four classes: 1. *Ga'seous* or *Acid'ulous*. 2. *Chalyb'eate* or *Ferru'ginous*. 3. *Saline'*. 4. *Sulphu'reous*. These may be *ther'mal* or *cold, nat'ural* or *artific''ial*. Many of these divisions, however, run into each other; some of the substances, which they hold dissolved, belonging to one class as well as to others. Other classifications of a more minute character have been suggested by writers on the subject of mineral waters.

1. *Ga'seous, Acid'ulous* or *Car'bonated Min'eral Wa'ters, So'da* or *Beer Springs, A'quæ minera'les acid'ulæ*, (F.) *Eaux minérales gazeuses* ou *acidules*. The waters referred to this class are those that contain carbonic acid gas in such quantity as to communicate to them certain sensible qualities. Waters impregnated with free carbonic acid sparkle when drawn from the spring, or when poured into a glass. They have a sharp, acidulous taste; but become vapid from exposure to the air. Along with the carbonic acid there are generally present portions of saline, earthy or metallic matter, chiefly carbonates of lime, magnesia, and iron. Waters highly impregnated with carbonic acid gas are grateful to the stomach, increase the appetite, and are diuretic; hence their utility in dyspepsia, hypochondriasis, and gout. Their properties are, of course, modified by the saline matter that may be also contained in them. The most celebrated among the acidulous waters are those of Bar, Chateldon, St. Myon, Mont d'Or, Langeac, Seltzer, Schlangenbad, Sultzmatt, Pyrmont, Spa, Carlsbad, Cheltenham, Scarborough, Saratoga, Ballston, and the Sweet Springs of Virginia.

2. *Chalyb'eate* or *Ferru'ginous Min'eral Wa'ters, A'quæ minera'les ferrugino'sæ* seu *chalybea'tæ* seu *martia'les* seu *ferro'sæ, Chalybope'gæ, Chalybokre'næ, Siderope'gæ, Siderokre'næ*, (F.) *Eaux minérales ferrugineuses*, contain iron — sulphate, chloride or carbonate, generally the latter — held in solution by an excess of acid. Chalybeate waters have a peculiar styptic taste. They are transparent when taken from the spring; but, when exposed for some time to the air, a pellicle forms on the surface, and a deposit of the iron takes place. Chalybeate waters are used as tonics in debility of all kinds; in all cases, in fact, where iron is considered to be indicated. They are the most numerous of all the classes of mineral waters. In this dictionary those only are specified which have some celebrity; yet there are about one hundred, more than sixty of these being saline, and forty sulphureous. The most celebrated chalybeates are those of Tunbridge, Scarborough, Spa, Bussang, Forges, Vichy, Pyrmont, Passy, Provins, and Vals.

3. *Saline' Min'eral Wa'ters, A'quæ minera'les sali'næ, Am'na alcaliza'ta* (Paracelsus), *Hydral'mæ*, (F.) *Eaux minérales salines*. Waters holding in solution different saline substances in greater quantity than the acidulous waters. They differ in properties, according to the salts contained in them. The salts usually present are sulphates, chlorides, and carbonates; and the bases, with which the acids forming these are combined, are soda, magnesia, and lime. Saline mineral waters are usually aperient; and the most noted are those of Seltzer, Sedlitz, Balaruc, Bourbonne-les-Bains, Baden, Epsom, Cheltenham, &c.

To this class may also be added *Sea Water*.

4. *Sulphu'reous Min'eral Wa'ters, A'quæ minera'les sulphu'reæ;* when warm, termed *Theiother'mæ, Theiope'gæ, Thiother'mæ, Fon'tes sulphu'-*

rei cal'idi, (F.) *Eaux minérales sulfureuses* ou *sulfurées* ou *sulfureuses* ou *hépatiques*, &c. These waters owe their distinguishing character to an impregnation of sulphuretted hydrogen, and are at once recognized by their peculiar fetid smell, resembling that of rotten eggs. They usually contain saline substances, which modify their powers. From the action of the sulphuretted hydrogen, they are useful in cutaneous affections; and, from the combined action of this and the saline matter, they are valuable agents in diseases of the digestive organs. They are also employed in cutaneous eruptions; and the warm sulphur baths have been especially celebrated in such cases, as well as in rheumatic affections. The most renowned sulphureous waters are those of Barèges, Bagnères-de-Luchon, Cauterets, Bonnes, Aix in Savoy, Aix-la-Chapelle, Enghien, Harrowgate, Moffat, Virginia Springs, &c.

Some springs, as those of Bath, Buxton, Dax, Matlock, Warm and Hot Springs of Virginia, &c., are almost pure *Ther'mal Min'eral Wa'ters*. They are valuable agents in rheumatic affections, the warmth being equable during the whole period the individual is immersed in them; which cannot be the case in the artificial thermal bath.

Artific''ial Min'eral Wat'ers, (F.) *Eaux minérales artificielles* ou *factices*, are imitations of the natural; and some of them — as the factitious Cheltenham water, and Sedlitz water — answer the purpose of the natural water tolerably well. The acidulous and chalybeate waters are, however, most easily imitated.

Wa'ter, Min'eral, Acidulous water, simple — w. Nutmeg, Spiritus myristicæ — w. Orange flower, see Citrus aurantium — w. Oxygenated, Hydrogen, peroxide of — w. Pennyroyal, Spirituous, Spiritus pulegii — w. Peppermint, Aqua menthæ piperitæ — w. Pimento, see Myrtus pimenta — w. Potash, Liquor potassæ effervescens — w. Protoxide of Nitrogen, Aqua nitrogenii protoxydi.

Wa'ter, Rain, *A'qua pluvia'lis* seu *plu'via* seu *im'brium*, (F.) *Eau de pluie*, when collected at a distance from houses or other elevated objects, is the purest natural water, and has the least specific gravity. The only bodies which it usually holds in solution are carbonic acid, and minute traces of carbonate of lime and chloride of calcium.

Wa'ter, Rice, see Oryza.

Wa'ter, Riv'er, *A'qua fluviat'ilis*, is derived from the conflux of numerous springs and rain water. It is, generally, pretty pure.

Wa'ter, Rose, Aqua rosæ.

Wa'ter, Sea, *A'qua Mari'na, Alma, Hu'mor Do'ridis*, (F.) *Eau de Mer, Eau salée*. This contains chlorides of sodium, magnesium, and potassium, bromide of magnesium, sulphate of lime, carbonate of lime, and sulphate of magnesia. It is cathartic, and forms the usual glyster at sea. It makes an excellent tonic bath; superior in most cases — especially in scrofula — to the fresh-water bath.

Wa'ter, Searle's Pat'ent Oxyg''enous Aër'ated, Aqua nitrogenii protoxydi — w. Seydschütz, Sedlitz water.

Wa'ter, Snow, *A'qua niva'ta*, (F.) *Eau de neige*, has usually been deemed unwholesome. It exactly resembles rain water in composition, and is equally salubrious.

Wa'ter, So'da, Acidulous water, simple — w. Soft, see Water, hard — w. Spearmint, Aqua menthæ viridis.

Wa'ter, Spring, *A'qua fonta'na, Hydrope'gē*, (F.) *Eau de fontaine*, contains, in addition to the substances detected in rain water, more or less sulphate of lime. When this is to such an extent as to curdle soap, the water is said to be *hard*; if not, *soft*. Hard water is, of course, inferior to soft, for domestic and medicinal purposes.

Wa'ter, Styp'tic, Syd'enham's, Solutio sulphatis cupri composita — w. Tar, see Pinus sylvestris — w. Toast, see Toast water.

Wa'ter, Well, *A'qua putea'lis* seu *putea'na* seu *ex pu'teo*, (F.) *Eau de puit* ou *de source*, is the same as spring water, but liable to impregnation, owing to the land springs filtering into the wells, and conveying impurities into them.

Wa'ter Bed, *Hydrostat'ic Bed*. A bed contrived by Dr. Arnott, which, in consequence of its being placed on water, is well adapted for the bedridden.

Wa'ter Blebs, Pemphigus.

Wa'ter Brash, Pyrosis.

Wa'ter on the Brain, Hydrocephalus — w. Brain fever, Hydrocephalus internus.

Wa'ter Brax'y. A blood-disorder of some animals, as the sheep, characterized by tendency to coagulation in the circulatory apparatus.

Wa'ter Can'cer, Cancer aquaticus.

Wa'ter Can'ker, Cancer aquaticus.

Wa'ter-cas'ter, see Uromantia.

Wa'tercress, Sisymbrium nasturtium.

Wa'tercure, Hydrosudotherapeia.

Wa'ter-doc'tor, see Uromantia.

Wa'ter-dress'ing. The treatment of wounds and ulcers by the application of water. It generally consists in dipping folds of lint in water, and placing them on the part: — the whole being covered with oiled silk, elastic gum, or spongiopiline. *Wa'ter strap'ping* or *wet strap'ping* means the treatment of ulcers, and certain cutaneous affections of the extremities, &c., with strips of linen or cotton saturated with water.

Wa'ter-flag, Yel'low, Iris pseudacorus.

Wa'terfright, Hydrophobia.

Wa'ter-gru'el, see Avena and Grits.

Wa'ter Hem'lock, Cicuta aquatica.

Wa'ter of the Head, Hydrocephalus.

Water-jags, see Varicella.

Wa'ter Lil'y, Nymphæa odorata.

Wa'ter-pang, Pyrosis.

Wa'ter-pars'nep, Creep'ing, Sium.

Wa'ter-pep'per, Polygonum hydropiper.

Wa'ter-pox, see Varicella.

Wa'ter-pur'pie, Veronica beccabunga.

Wa'ter-qualm, Pyrosis.

Wa'ter-rad'ish, Sisymbrium nasturtium.

Wa'ter-shield, Brasenia hydropeltis.

Wa'ter Strap'ping, see Water-dressing.

Wa'ter Stroke, see Hydrocephalus internus.

Wa'ter-tar'get, Brasenia hydropeltis.

Wa'ters, The, Liquor amnii — w. Bag of, see Liquor amnii — w. Discharged or broken, Profusio aquæ — w. Distilled, Aquæ destillatæ — w. First, Primitiæ — w. Green, see Lochia.

Wa'tery Eye, Epiphora.

Wattweil'er, Min'eral Wa'ters of. Wattweiler is a small town in the department of Haut-Rhin, at the foot of the Vosges. The waters are acidulous chalybeates, and contain carbonates of iron, lime, and soda, chloride of sodium, and free carbonic acid.

Wax, ([Sax.] pæxe,) Cera — w. Ear, Cerumen.

Wax, Japan'. Obtained from *Rhus succeda'nea* of Japan. It is of a medium quality between beeswax and the ordinary vegetable tallows.

Wax, Myr'tle, *Bayberry tallow*. A wax obtained from the fruit of *Myri'ca cerif'era, Wax myrtle, Candleberry myrtle*; an indigenous plant, which yields the *bayberry bark*, possessing tonic, stimulant, and astringent properties. It has been prescribed in dysentery.

Wax, Veg''etable, see Cera flava — w. Yellow and White, Cera flava et alba.

Wax'ing Ker'nels, *Wax'enkernels, Crescen'-*

tiæ, (F.) *Croissances, Croissants, Glandes de croissance.* A popular term for small tumors, formed by an enlargement of the lymphatic glands — in the groins of children particularly. They have been looked upon as connected with the growth of the body, — hence their name.

Wax'y Degenera'tion, see Lardaceous — w. Liver, see Lardaceous — w. Spleen, see Lardaceous.

Way, ([Sax.] pæȝ,) *O'dos, Vi'a, Passage,* (F.) *Voie.* A name given to different canals.

Way'bread, ([Sax.] pæȝ bpæde,) Plantago major.

Wayme, Womb, Belly, Uterus.

Ways, Diges'tive, *Diges'tive Pas'sages, Pri'mæ Vi'æ,* (F.) *Voies digestives, Premières voies,* are the series of hollow organs of digestion, composed of mouth, œsophagus, stomach, and small and large intestines. The term is often restricted to the first three of these.

Ways, Sec'ond, *Second Pas'sages, Secun'dæ vi'æ,* (F.) *Secondes voies,* comprise the chyliferous vessels, the lymphatics, and the bloodvessels.

Weak, (from [Sax.] pican, 'to yield, to totter,') Infirm.

Weak'ness, Debility — w. Spinal, see Spinal.

Weaksight'edness, Asthenopia.

Weal, ([Sax.] palan, 'marks of stripes,') Wheal.

Weam, (Womb,) Belly, Uterus.

Weam Ill, Colic.

Wean'ing, (from [Saxon] penan, 'to wean,') *Ablacta'tio, Apogalactis'mus,* (Prov.) *Spa'ning,* (F.) *Sévrage.* The act of depriving the infant, permanently, of the breast, in order to feed it on other and more solid nourishment.

Wean'ing Brash, see Brash, weaning.

Wearing, (from [Sax.] pepan, 'to wear,') Consumption.

Weas'and, ([Sax.] pæpanð,) Trachea.

Weath'ercocks, Impatiens.

Weav'ers' Bot'tom. Chronic inflammation of a bursa over the tuberosity of the ischium, occasionally observed in weavers, and due to pressure of the part.

Web, ([Sax.] peb,) Caligo, Pterygium — w. Muscular, Panniculus carnosus.

Web'eye, Caligo, Pterygium.

Webbed Fin'gers, Dactylion.

Webe'rian Cor'puscles, (after Weber, a German anatomist,) see Ejaculatory ducts—w. Organ, see Ejaculatory ducts.

Wedged, ([Sax.] pæcȝ, 'a wedge,') *Inclu'sus, Inhæ'rens,* (F.) *Enclavé.* The head of the fœtus is said to be *wedged, locked* or *impacted* in the pelvis, when it remains fixed, notwithstanding the uterine efforts.

The condition is called *Incunea'tio* seu *Inclava'tio fœ'tûs, Spheno'sis,* (F.) *Enclavement.* See Paragomphosis.

Weebo, Senecio Jacobæa.

Weed, (from [Sax.] peðan, 'to rage,') see Mastitis and Ephemera, puerperal.

Weed, Ar'row, ([Sax. peoð,) Sagittaria variabilis — w. Beetle, Galax aphylla — w. Breast, Saururus cernuus—w. in the Breast, see Mastitis — w. Butter, Erigeron Canadense — w. Cancer, Goodyera pubescens — w. Dyer's, Reseda luteola —w. Field, Anthemis cotula—w. Horse, Erigeron Canadense — w. Horsefly, Sophora tinctoria — w. Milk, Apocynum androsæmifolium — w. Phthisis, Ludwigia palustris — w. Pride, Erigeron Canadense — w. Red, Phytolacca decandra—w. Silver, Potentilla anserina — w. Soldiers', Matico — w. Thimble, Rudbeckia laciniata — w. Wind, Asclepias tuberosa.

Weep'ing, (from [Sax.] peopan, 'to weep,') Fletus — w. Tear, Tear.

Wee'sel, Trachea.

Weid, (Weed,) see Mastitis.

Weight, (from [Sax.] pæȝan, 'to weigh,') (F.) *Pesanteur,* see Stature. A sensation of heaviness or pressure over the whole body, or over a part—the stomach or head, for example.

Weight of Or'gans. The average weight of each organ in the adult is, according to Quain, as follows:

Heart, male	11	Ounces.
" female	9	"
Brain, male	49½	"
" female	44	"
Spinal cord	1 to 1¾	"
Liver	50 to 60	"
Pancreas	2¼ to 3½	"
Spleen	5 to 7	"
Lungs, male	45	"
" female	32	"
Thyroid cartilage	1 to 2	"
Thymus (at birth)	½	"
Kidney	4½	"
Suprarenal capsules	2 drachms.	
Prostate	6	"
Testes	¾ to 1 ounce.	
Unimpregnated uterus	7 to 12 drachms.	

Weights and Meas'ures, *Pon'dera* et *Mensu'ræ,* (F.) *Poids et Mésures.* The importance of possessing a uniform system of weights and measures has impressed the scientific of all countries, and numerous endeavors have been made to accomplish the object. It is, however, a matter of considerable difficulty, and one not likely to be attained. The more modern French measures are upon decidedly the best footing, but they are not yet generally adopted. The greatest diversity, indeed, prevails in the measures, both of weight and capacity. Some of the following tables will show that every subdivision of the pound, as well as the pound itself, differs in England and in France.

Weights. (Ph. U. S., 1873.)

Troy Weight,—Pondus pharmaceuticum seu *medicinale.*

The weights employed by physicians and apothecaries in the United States in prescribing and dispensing medicines are those derived from the *Troy pound.* The scale is as follows:

One Pound,	℔	=	12 Ounces	= 5760 Grains.
One Ounce,	℥	=	8 Drachms	= 480 Grains.
One Drachm,	ʒ	=	3 Scruples	= 60 Grains.
One Scruple,	℈			= 20 Grains.
One Grain,	gr.			= 1 Grain.

This table may be differently stated as follows:

lb.	*oz.*	*Drachms.*	*Scrup.*	*Grs.*
1 =	12 =	96 =	288 =	5760
	1 =	8 =	24 =	480
		1 =	3 =	60
			1 =	20

These, and the signs by which they are denoted, were the same in all the British Pharmacopœias until 1864, as well as in the American.

Measures of Capacity. (Ph. U. S., 1873.)

One Gallon (Congius),	C.	= 8 Pints	= 61,440 M.
One Pint (Octarius),	O.	= 16 Fluidounces	= 7,680 M.
One Fluidounce,	fʒ	= 8 Fluidrachms	= 480 M.
One Fluidrachm,	fʒ		= 60 M.
One Minim,	♏		= 1 M.

To avoid the danger of mistakes by confounding the Troy and the avoirdupois pounds, the term *pound* has been discontinued in the formulæ of the United States Pharmacopœia—the desired weight being expressed in ounces, each containing 480 grains. The ounce is always written *Troyounce;* and the *drachm* and *scruple* are disused, their equivalents being expressed in grains. On the other hand, the General Medical Council of Great Britain resolved (1863) that "the weights used in the British Pharmacopœia shall be the Imperial or avoirdupois pound, ounce, and grain;

and that the terms *drachm* and *scruple*, as designating specific weights, shall be discontinued;" and the same system is adopted in the edition of 1867. The following are the weights and measures of that Pharmacopœia, with their symbols:

WEIGHTS. (Ph. B., 1867.)

Avoirdupois Weight.

Pound.		*Ounces.*		*Drachms.*		*Troy grains.*
1	=	16	=	256	=	7000
		1	=	16	=	437·5
				1	=	27·34375

The drachm is sometimes divided into three scruples, and the scruples into ten grains. The pound of 7680 grains avoirdupois = 7000 grains Troy, and hence 1 grain Troy = ·97 grains avoirdupois.

The Avoirdupois Weight was used by the Dublin College.

MEASURES OF CAPACITY. (Ph. B., 1867.)

1 Gallon, C.	=	8 Pints.
1 Pint, O.	=	20 Fluidounces.
1 Fluidounce, fl. oz.	=	8 Fluidrachms.
1 Fluidrachm, fl. dr.	=	60 Minims.
1 Minim, ℥.		

The gallon holds 10 lbs. avoirdupois of distilled water, at a temperature of 60° Fahrenheit.

MEASURES OF LENGTH. (Ph. B., 1867.)

1 Line	=	$\frac{1}{12}$ inch.
1 Inch	=	$\frac{1}{39 \cdot 1393}$ seconds pendulum.
12 Inches	=	1 foot.
36 "	=	3 feet = 1 yard.

Length of pendulum vibrating seconds of mean time in the latitude of London, in a vacuum at the level of the sea ..... } 39·1393 inches.

RELATION OF MEASURES TO WEIGHTS. (Ph. B., 1867.)

			Grs. of water.
1 Minim is the measure of			0·91 "
1 Fluidrachm is the measure of			54·68 "
1 Fluidounce	"	"	1 oz. or 437·5 "
1 Pint	"	"	1·25 lbs. or 8750· "
1 Gallon	"	"	10 lbs. or 70,000· "

The measures in the Ph. U. S. (1873) have the same names as in the British, but their value is different; the pint weighing 16 oz. 291·2 grs. avoirdupois, and the fluidounce 455·7 grs. In the formulæ, the Acids and the Oils are ordered by weight; other liquids by measure. The gallon is not used, that measure being always expressed in pints. In Continental Europe, all medicines are weighed, and the gramme is becoming universally used.

POIDS DE MARC.

The *Poids de Marc* is that employed by the French *Pharmaciens*, when the new weights are not;

One Pound, One Ounce, One Drachm, One Scruple, One Grain } contains { 16 Ounces. 8 Drachms. 3 Scruples. 24 Grains.

(For the relative values of the old French and English weights, see p. 1118.)

WEIGHTS AND MEASURES OF THE METRICAL SYSTEM.

The French *Metrical* or *Metric System* of Weights and measures is decimal and founded on the *Metre*, which is the *unit of length*, based on the measurement of the quadrant of a meridian of the earth. The *unit of surface* is the *Are*, which is the square of 10 metres. The *unit of capacity* is the *Litre*, the cube of $\frac{1}{10}$ of a metre. The *unit of weight* is the *Gramme*, the weight of distilled water, of maximum density, which fills a cube of $\frac{1}{100}$ of a metre. Multiples of each of these are expressed by *Deka* or *Deca*, ten, as Decagramme; *Hecto*, a hundred, as Hectolitre; *Kilo*, a thousand, as Kilometre, &c. Fractional quantities are denoted by *Deci*, one-tenth, as Decigramme; *Centi*, one-hundredth, as Centimetre; *Milli*, one-thousandth, as *Millilitre*, &c.

MEASURES OF LENGTH. (Metrical System.)

One Myriametre	= 10,000 Metres.
One Kilometre	= 1,000 Metres.
One Hectometre	= 100 Metres.
One Decametre	= 10 Metres.
One Metre	= The ten millionth part of a quarter of the meridian of the earth.
One Decimetre	= The tenth part of one Metre, or 0·1 Metre.
One Centimetre	= The hundredth part of one Metre, or 0·01 Metre.
One Millimetre	= The thousandth part of one Metre, or 0·001 Metre.

The value of these measures may be expressed in the ordinary scale of measures in use in the United States and England as follows:

	English inches.		*yd.*	*ft.*	*inch.*
Myriametre	393710·	=	10936·	1·	2·
Kilometre	39371·	=	1093·	1·	10·
Hectometre	3937·1	=	109·	1·	1·
Decametre	393·71	=	10·	2·	9·7
Metre	39·371	=	1·	0·	3·37
Decimetre	3·937				
Centimetre	0·393				
Millimetre	0·039				

WEIGHTS. (Metrical System.)

One Myriagramme	= 10,000 Grammes.
One Kilogramme	= 1,000 Grammes.
One Hectogramme	= 100 Grammes.
One Decagramme	= 10 Grammes.
One Gramme	= The weight of a cubic Centimetre of Water at 4° C.
One Decigramme	= The tenth part of one Gramme, or 0·1 Gramme.
One Centigramme	= The hundredth part of one Gramme, or 0·01 Gramme.
One Milligramme	= The thousandth part of one Gramme, or 0·001 Gramme.

The value of these weights may be expressed in the Troy scale as follows:

		Troy grains.		*lb.*	*oz.*	*dr.*	*gr.*
Myriagramme	=	154340·2344	=	26	9	6	0
Kilogramme	=	15434·0234	=	2	8	1	24
Hectogramme	=	1543·4023	=	0	3	1	44·4
Decagramme	=	154·3402	=	0	0	2	34·4
Gramme	=	15·4340					
Decigramme	=	1·5434					
Centigramme	=	·1543					
Milligramme	=	·0154					

MEASURES OF CAPACITY. (Metrical System.)

One Myrialitre	= 10 cubic Metres, or the measure of 10 Milliers of Water.
One Kilolitre	= 1 cubic Metre, or the measure of 1 Millier of water.
One Hectolitre	= 100 cubic Decimetres, or the measure of 1 Quintal of Water.
One Decalitre	= 10 cubic Decimetres, or the measure of 1 Myriagramme of Water.
One Litre	= 1 cubic Decimetre, or the measure of 1 Kilogramme of Water.
One Decilitre	= 100 cubic Centimetres, or the measure of 1 Hectogramme of Water.
One Centilitre	= 10 cubic Centimetres, or the measure of 1 Decagramme of Water.
One Millilitre	= 1 cubic Centimetre, or the measure of 1 Gramme of Water.

The following tables, from the U. S. Phar., 1873, and British Phar., 1867, give an accurate view of the relations between the weights and measures adopted by them and those of the metrical system, with many items of statistical interest in connection with this subject, not previously published:

RELATION OF MEASURES OF THE U. S. PHARMACOPŒIA TO CUBIC MEASURE.

One Gallon	=	231·0 Cubic Inches.
One Pint	=	28·875 Cubic Inches.
One Fluidounce	=	1·80468 Cubic Inches.
One Fluidrachm	=	0·22558 Cubic Inch.
One Minim	=	0·00375 Cubic Inch.

Relation of Weights and Measures of U. S. Pharmacopœia to each other.

In distilled water at the temperature of 60°.

To convert French grains into Troy, divide by 1·2189.
" Troy grains into French, multiply by "
" French ounces into Troy, divide by 1·015734
" Troy ounces into French, multiply by "
" French pounds (*poids de marc*) into Troy, multiply by 1·31268
" Troy pounds into French, divide by "

The *French medicinal pound* (*Livre médicinal*) of the same scale has a value of three-fourths of the *poid de marc*, or 6612 French grains, equivalent to 5670·5 Troy grains. The *poids de marc* was in use prior to the revolution of 1789, and was succeeded by the decimal system. In 1812, the old pound was made equal to half a kilogramme — 500 grains; and this was taken as the unit. The French grain then became equivalent to ·8365 Troy grain, or ·0542 gramme. This modification was not made absolute until 1827, but so much confusion resulted that the decimal system was in 1837 made obligatory.

Measures of Capacity.

The measures of capacity adopted by the United States and British Pharmacopœias have been already given. The following tables give the relative values of the measures of capacity employed in different countries, and also of different measures of capacity in the same country — the wine and imperial gallons, for example.

Proportions of the Apothecaries' and Wine Gallon.

Gal.		*Pints.*		*Fluidoz.*		*Fluidr.*		*Minims.*		*Cub. Inches.*
1	=	8	=	128	=	1024	=	61440	=	231

Measures of Length.

	Inches.
1 *line*, the 12th part of an inch.	
3 *barleycorns*	1·000
A *palm* or *hand's breadth* (Scripture measure)	3·648
A *hand* (horse measure)	4·000
A *span* (Scripture measure)	10·944
A *foot*	12·000
A *cubit* (Scripture measure for common purposes)	18·000
A *cubit* (Scripture measure for sacred purposes)	21·888
A *Flemish ell*	27·000
A *yard*	3 ft. 00
An *English ell*	3 " 09
A *fathom* or *toise*	6 " 00

Values of the Grecian, Roman, and Arabian Weights and Measures in Poids de Marc.

1. *Weights of the Ancient Greeks.*

	lbs.	*oz.*	*dr.*	*gr.*
The *talent* (ταλαντον)	54	2	5	24
The *mna* (μνᾶ)		14	3	40
The *drachm* (δραχμη)			1	11
The *obolus* (οβολος)				13
The *ceration* (κερατιον)				4
The *chalcus* (χαλκους)				2
The *septon* (σεπτον)				⅓

2. *Weights of the Ancient Romans.*

	oz.	dr.	gr.
The *pound* (*libra*)	10	6	48
The *ounce* (*uncia*)		7	16
The *duella*		2	29
The *sicilicus*		1	58
The *sextula*		1	14
The *consular denier*, *denarius*		1	2
The *imperial denier* or *drachm*, *drachma*			65
The *victoriatus*			37
The *scriptulum* or *scruple*			21
The *obolus*			11
The *siliqua*			4

The Greeks divided their obolus into *chalci* and *lepta:* some divided it into 6 *chalci*, and each *chalcus* into 7 lepta; others into 8 chalci, and every chalcus into 8 lepta or *minuta*.

Dr. Milligan, in his edition of Celsus, gives the following table, exhibiting the Troy weight of measures of capacity and of weight in use among the Romans:

	Urna.	*Libra.*	*Uncia.*	*Denarius.*	*Scrupulus.*	*Sextans.*	*Chalcus.*	*Grana.*
Amphora	2 =	80 =	960 =	6720 =	20160 =	40320 =	403200 =	420480
Urna	1 =	40 =	480 =	3360 =	10080 =	26160 =	210600 =	210240
Congius	¼ =	10 =	120 =	840 =	2540 =	5040 =	50400 =	52920
Sextarius		1⅔ =	20 =	140 =	420 =	840 =	8400 =	8760
Libra		1 =	12 =	84 =	252 =	504 =	5040 =	5256
Hemina			84-7 =	60 =	180 =	360 =	3600 =	3759
Acetabulum			21-7 =	15 =	45 =	90 =	900 =	939
Sesqui-cyathus			21-7 =	15 =	45 =	90 =	900 =	939
Cyathus			13-7 =	10 =	30 =	60 =	600 =	626
Sescuncia			1½ =	10½ =	31½ =	63 =	630 =	657
Uncia			1 =	7 =	21 =	42 =	420 =	438
Cochleare				2½ =	7½ =	15 =	150 =	156
Drachma				1 =	3 =	6 =	60 =	62 4-7
Denarius				1 =	3 =	6 =	60 =	62 4-7
Scrupulus					1 =	2 =	20 =	20⅔
Scrupulus dimidiatus					½ =	1 =	10 =	10⅓
Obolus						1 =	10 =	10⅓
Sextans						1 =	10 =	10⅓
Chalcus							1 =	1 1-30

He gives also the following '*Carmen Mnemonicum*,' which exhibits the analogies of the Roman and British Imperial weights.

To the congius and gallon, each, ten pounds allow,
On the bushel and amphora eighty bestow;
Rome's pound, as in Troy weight, twelve ounces obtains,
But her ounce is Avoirdupois, strictly, in grains:
Denarii drams, scruples scrupli define,
Sextarius answers to our bottle of wine,
And the mina's a short pint — fourteen ounces in fine.

3. *Weights said to be of the Arabians, Modern Greeks, and Latins of the barbarous periods of the Middle Ages.*

A good section on weights and measures is contained in the edition of "The Seven Books of Paulus Ægineta," by Mr. Francis Adams, published by the Sydenham Society of London, vol. iii. p. 609, London, 1847.

Approximative Weights and Measures.

Besides the weights and measures above mentioned, employed by the moderns, there are modes of estimating the quantities of substances by approximation. For example:

A *glassful* or *cupful*, ([F.] *Verre*,) is reckoned to contain 4 or 5 fluidounces.
A *wineglassful*, 1½ ounce or 2 fluidounces.
A *tablespoonful*, ([F.] *Cuiller à bouche*,) about half a fluidounce.
A *coffee* or *dessertspoonful*, about 2 fluidrachms.
A *teaspoonful*, a fluidrachm.
A *handful*, *manipulus*, ([F.] *Poignée*,) as much as can be held in the hand.
The *Pugillus*, ([F.] *Pincée*,) as much as can be held by the three fingers.

These last quantities are occasionally prescribed by the French practitioners. Their weights must, of course, vary, according to the article. The authors of the Parisian Codex have valued them, as regards certain substances:

	French. oz.	dr.
A *Manipulus* of barley weighs	3	2½
" linseed	1	4
" linseed meal	3	3
" dried mallow leaves	1	3
" dried chicory leaves	1	0
" dried flowers of the tilia	1	2½

	dr.	gr.
A *Pugillus* of chamomile flowers weighs	2	
" arnica	1	48
" marshmallow	1	24
" mallow		60
" fennel seeds	1	60
" aniseed	1	12

A *hen's egg*, newly laid, weighs about 2 ounces and 2 drachms; when deprived of its shell, 2 ounces. The *white* weighs 1 ounce 2 drachms and 57 grains; the *yolk*, 5 drachms and 15 grains.

Weil'bach, Min'eral Wa'ters of. The village of Weilbach is in the plain between the Maine and the southern extremity of the Taunus hills. It has in its neighborhood a cold, sulphurous, alkaline spring, the water of which is bottled and exported, although not of great efficacy. Its use is at times combined with that of the saline springs of Nassau and of Baden-Baden in various chronic abdominal and thoracic affections.

Weintraubenkur, Grape cure.

Weit'brecht, Lig'ament of, Ligament of Weitbrecht.

Wel'come to Our House, Euphorbia cyparissias.

Weld, Reseda luteola.

Welk, *Whelk*, (like *Wheal.*) An inequality; a protuberance; a cutaneous eruption of this character. Acne.

Welt'er's Bit'ter, Acid, carbazotic.

Wemb, (Womb,) Belly, Uterus.

Wem'ding, Min'eral Wa'ters of. These waters are situate about four leagues from Donauwörth, in Bavaria. They contain sulphuretted hydrogen, carbonates of lime, magnesia, and soda, sulphates of lime and magnesia, a little chloride of calcium, and oxide of iron, and are much used in asthenic diseases.

Wen, ([Sax.] pen,) *Lu'pia*, (F.) *Loup.* A name given to circumscribed, indolent tumors, without inflammation or change of color of the skin. They may be met with in almost every part of the body. Their magnitude, as well as nature, is very variable. The term is sometimes given to an encysted tumor, and to bronchocele.

West'ern Islands, see Azores.

West In'dies, Cli'mate of. The climate of the West Indies has long been regarded as favorable to the consumptive. In confirmed consumption, it appears, however, to be positively injurious. As a prophylactic for those predisposed to consumption, it is generally favorable. The nature of the patient's constitution, in regard to the effects of elevated temperature, has always to be taken into account. In diseases that are benefited by warm climates, the West Indies afford an appropriate residence. The islands in which the invalid can best obtain all the advantages of the climate are Jamaica, Barbadoes, St. Vincents, Antigua, St. Kitts, and Santa Cruz.

West's Spring, see South Carolina, mineral waters of.

West Virgin'ia, Min'eral Wa'ters of. Several popular places of resort and celebrated springs are situate in this State. *Berkeley Springs*, in Morgan Co., are thermal calcic waters, chiefly employed for bathing purposes. *Capon Springs*, in Hampshire Co., contain carbonates of soda and magnesia, iodine, bromine, silicic acid, &c., but no definite analysis has been made. The *White Sulphur Springs*, in Greenbrier Co., are widely known and much frequented. They have a reputation for their aperient and alterative qualities, and contain the unusual combination of purgative sulphates, sulphuretted hydrogen, and salts of lime. An analysis by Prof. W. B. Rogers gives, in a pint of the water, the following ingredients: Carbonate of magnesia, 0·146 gr.; carbonate of lime, 0·441; chloride of sodium, 0·065; chloride of magnesium, 0·020; chloride of calcium, 0·003; sulphate of soda, 1·169; sulphate of magnesia, 2·379; sulphate of lime, 9·148; sulphate of alumina, 0·003; protosulphate of iron, 0·019; earthy phosphates, a trace; organic matter, 0·001; carbonic acid, 1·06 cubic in.; sulphuretted hydrogen, 0·37; oxygen, 0·05; nitrogen, 0·54.

The *Sweet Springs*, in Monroe Co., are thermal calcic waters, diaphoretic and diuretic, and said to be efficacious in gravel, atonic dyspepsia, &c. The *Red Sulphur Springs*, in Monroe Co., are affirmed to exert a sedative influence on the pulse, diminishing the number of its beats; and also to allay irritation of the pulmonary mucous membrane. The water is cathartic in small quantities, diuretic in large. It possesses only a small proportion of saline ingredients. It contains chiefly an organic matter, or sulphur-compound, as it has been called, which is separated in the form of a jelly by air, acids, &c. The *Salt Sulphur Springs*, in the same county, are alkaline sulphurous waters; and there is also an iodine spring, containing bromine. The former is employed in hepatic engorgements, herpetic diseases, &c., the latter in scrofula and syphilis.

Wet Brain. Excessive serosity of the brain or its membranes, as observed in delirium tremens.

Wet Strap'ping, see Water-dressing.

Whahoo, see Euonymus.

Whamp, Wasp.

Whar'ton's Duct, (after Dr. Thomas Wharton, an English anatomist,) see Ductus salivalis.

Wharto'nian Jel'ly, Gelatin of Wharton.

Wheal, ([Sax.] palan, 'marks of stripes,') *Weal, Wale, Pom'phus.* A ridge, or elevation of the skin, produced by a rod or whip, or as if produced in that manner. Such elevations are seen in urticaria.

Wheal'worm. The Acorus autumnalis, or Harvest-bug.

Wheat, ([Sax.] hpeaτe,) Triticum — w. Indian, Zea mays — w. Turkey, Zea mays.

Wheat Phos'phates. The organized phosphates of the bran — usually discarded — are said to assist assimilation. A decoction of bran should be evaporated, mixed with sugar, and reduced to powder.

Wheeze, ([Sax.] hpeoȝan,) (Prov.) *Rez'zle*, (formed probably, like *whiz* and *whisper*, from the sound it expresses.) To breathe with difficulty and noise, as in asthma.

Whelk, (like *wheal*,) Acne, Welk — w. Chin, Sycosis — w. Rosy, Gutta rosea.

Whet'tlebones, Vertebræ.

Whey, ([Sax.] hpæȝ,) Serum lactis.

Whey Cure, (G.) Molkenkur, (F.) *Cure de petit lait.* In the Kursaal of many of the German watering places, a space is set apart for whey drinkers. The whey is a pleasant diluent, and the saccharine matter it contains may act as a eutrophic; but the main effect on the valetudinarian is probably produced by the new impressions made upon him by his visit to the watering place.

Whey, Mus'tard, see Sinapis — w. Rennet, see Serum lactis — w. Sack, Wine-whey — w. Tamarind, see Tamarindus — w. Vinegar, see Acetum — w. Wine, Wine-whey.

Whick'flaw, Whitlow.

Whif'fing Mur'mur, see Murmur, respiratory.

Whig, ([Sax.] hpæʒ,) Buttermilk, Serum lactis.

Whim'berry, Vaccinium myrtillus.

Whip'worm, Trichocephalus dispar.

Whirl'ing Chair, see Chair.

Whis'ky, see Spirit.

Whis'ky Liv'er, Liver, nutmeg.

Whis'per, Cav'ernous, see Cavernous.

Whis'pering, *Vox claudesti'na,* (from [Sax.] hpιppian, 'to whisper.') An example of onomatopœia; *Susurra'tio, Susurra'tion.* Articulation of the air sent through the vocal tube without any action of the glottis.

Whis'pering Souf'fle, see Souffle.

Whist'ling, (a case of onomatopœia, from [Sax.] hpιrtlan, 'to whistle,') *Sifflement.* See Râle sibilant.

White A'trophy of the Op'tic Nerve. A form of atrophy due to some disease beyond the eye, as of cerebral origin.

White Ball, Cephalanthus occidentalis — w. Blisters, Rupia escharotica — w. Cream of tartar, see Potassæ supertartras — w. of Egg, Albumen ovi — w. Flake, Plumbi subcarbonas.

White Gum, Lichen strophulus.

White Leaf, Pyrola maculata, Spiræa tomentosa — w. Leg, Phlegmatia dolens — w. Matter of the brain, see Cerebrum — w. Root, Angelica lucida, Asclepias tuberosa, Ligusticum actæifolium.

White, Span'ish, Bismuth, subnitrate of.

White Sub'stance of Schwann, see Nerve fibre — w. Sulphur, see West Virginia, mineral waters of — w. Swelling, Hydrarthrus — w. Swelling of lying-in women, Phlegmatia dolens — w. Weed, Chrysanthemum leucanthemum —w. Wood, Liriodendron, Tilia Americana.

White'ness of Complex'ion, Paleness.

Whites, The, Leucorrhœa.

Whitley'a Stramonifo'lia, (after Whitley, an English botanist,) Anisodus luridus.

Whit'low, ([Sax.] hpιt, 'white,' and *low,* 'a flame,') Paronychia.

Whoop'ingcough, (from the attendant *whoop,*) Pertussis.

Whor'lywort, Leptandria purpurea.

Whor'tleberry, Vaccinium myrtillus, Vaccinium vitis idæa — w. Bears', Arbutus uva ursi.

Whorts, Black, Vaccinium myrtillus.

Whytt's Disease, (after Dr. Robt. Whytt, of Edinburgh,) Hydrocephalus internus.

Wid'owwail, Cneorum tricoccum, Daphne Alpina.

Wiesba'den, Min'eral Wa'ters of, see Wisbaden.

Wies'sau, Min'eral Wa'ters of. These waters are situate about four leagues from the convent of Waldsassen, in Bavaria. They contain carbonic acid, carbonates of lime and magnesia, chlorides of calcium, magnesium, and aluminium, carbonate of soda, and much oxide of iron. The Bavarians consider them to resemble the waters of Pyrmont.

Wild, ([Sax.] pιld.) An epithet given to the countenance, when not in harmony with the condition of the individual, and indicating strong mental emotion; — a *wild look,* (F.) *Physioguomie égarée.*

Wild'bad, Min'eral Wa'ters of. Wildbad is a small town of Wurtemberg, not far from Baden-Baden. The water is thermal, from 95° to 100° of Fah., and is chiefly employed externally in cases in which thermal waters are indicated, as chronic paralysis, rheumatism, &c. It is seldom used internally, a pint containing only about three grains of solid ingredients, which consist of salts of soda, potash, magnesia, and lime. The proportion of carbonic acid gas is very small.

Wildegg, Wa'ters of. This iodated and bromated spa near Schinznach, in Switzerland, has some celebrity in strumous diseases and chronic glandular swellings. It contains chloride of sodium, chloride of magnesium, sulphate of lime, iodide of sodium, bromide of sodium, &c.

Wild'fire, Erysipelas.

Wild'fire Rash, Ignis sylvaticus.

Wildungen, Min'eral Wa'ters of. Wildungen is situate a few miles from Cassel, in Germany. In its neighborhood are several mineral springs, which have been found to be efficacious in gravel, lithic acid diathesis, vesical catarrh, &c.

Wil'kinson's Salve or **Oint'ment.** An ointment for scabies, composed of the following ingredients: *Flor. sulphur., Ol. fagi,* āā ℥vj., *Cretæ alb.,* ℥iv., *Saponis virid., Axung. porci,* āā ℔j. M. Hebra.

Will, ([Sax.] pılla,) Voluntas.

Wil'lan, Salix.

Wil'lis, Cir'cle of, see Circulus.

Wil'low, ([Sax.] pelıʒ,) Salix — w. Bedford, Salix fragilis—w. Broadleaved, Salix latifolia—w. Crack, Salix fragilis—w. Great roundleaved, Salix caprea — w. Herb, common, Lythrum salicaria — w. Herb, great, Epilobium angustifolium — w. Herb, purple, Lythrum salicaria — w. Herb, purple veined, Epilobium coloratum.

Wil'low, Low Bush, Salix humilis — w. Red, Cornus sericea — w. Rose, Cornus sericea — w. Speckled, Salix humilis — w. Sweet, Myrica gale — w. White, Salix alba.

Wind, ([Sax.] pınd,) (an example of onomatopœia — *ooind,*) *Ven'tus, An'emos,* (F.) *Vent.* Winds exert considerable influence on the animal economy; acting by their temperature, which necessarily modifies that of the circumambient air, as well as by their moisture or dryness, and by the emanations of different kinds which they transport to greater or less distances. The winds which blow over a considerable extent of country are dry and serene: those which come from the ocean are moist and chilly.

Wind, Breath, see Flatulence.

Wind of a Ball or Shot; sometimes, improperly termed *Wind'age.* A term applied to the compression of air, supposed to be produced by the passage of a ball near a part of the body, so as to occasion what has been called a *wind contusion.*

Wind Contu'sion, see Wind of a ball — w. Dropsy, Emphysema, Tympanites — w. Flower, Anemone—w. Pipe, Trachea — w. Pox, see Varicella — w. Root, Asclepias tuberosa — w. Weed, Asclepias tuberosa.

Wind'age, see Wind of a ball.

Wind'iness, Flatulence.

Wind'y, *Flatulen'tus, Flat'ulent, Va'porous,* (F.) *Venteux, Flatueux.* That which causes wind or flatulenee; also, that which is caused by wind or flatulence; as *windy food, windy colic,* &c. Also, one affected with flatulence, or who is 'troubled with the wind.'

Wine, ([Sax.] pın, [G.] Wein, originally, perhaps, from οινος,) *Œ'nos, Vi'num, Meth'u,* (F.) *Vin.* A name given by chemists to all liquors that have become spirituous by fermentation. The term is generally, however, restricted to the fermented juice of the grape, or of fruits, the product of whose fermentation resembles, in almost all respects, that of the juice of the grape. Wine is composed of alcohol, œnanthic ether, saccharine matter, malic acid, tartaric acid, bitartrate of potassa, acetic acid, an extractive coloring matter more or less bitter and partly resinous, and an aromatic substance. The extractive coloring matter is chiefly met with in red wines. All these constituents, except the alcohol, are found ready formed in the grape. The alcohol proceeds from

the decomposition of the saccharine matter. A part of the acetic acid is also formed during fermentation. In all wines, too, there is more or less of an odorous principle, partly derived directly from the grape, and partly formed during fermentation, which has the characters of an essential oil, constitutes the perfume or *bouquet* of the wine, and is said not to exceed the forty-thousandth part of the wine. It is regarded as a true ether—a combination of oxide of ethyl with œnanthic acid.

The following table, drawn up by Mr. Brande, exhibits the quantity of spirit in different kinds of wine and liquors. It is proper, however, to remark that many of these wines are prepared for the London market, and are more brandied or "reinforced" than the same varieties sold in the United States. This is strikingly the case with port. Dr. Henderson, too, has observed that some of the wines analyzed by Mr. Brande were mixed with a considerable quantity of adventitious alcohol. Dr. Henderson's additions and corrections have the letter H. affixed.

The only wine recommended in some pharmacopœias is *Sher'ry, Vi'num, V. al'bum, V. al'bum Hispan'icum, V. Xer'icum, Leucæ'nus.* It is a *dry wine;* the least variable in its properties, and agrees best with the dyspeptic. The *brown* sherries differ from the *pale* in the addition of a coloring liquid to the former, termed *Arrope,* which is prepared by boiling sherry down to a syrup; but they frequently owe their hue to burnt sugar or caramel. Other wines used officinally are: *Cana'ry* or *Sack wine, Vi'num Canari'num; Moun'tain wine, Vi'num al'bum monta'num; Tent wine, Vinum tinto; Rhen'ish wine, Vi'num Rhena'num;* and *Port wine, Vi'num ru'brum, V. ru'brum Portugal'licum, V. Porten'sĕ.* A rich, sweet wine called *Paxarete,* a form of sherry, is made near Xeres, and occasionally prescribed.

The wines habitually drunk are almost innumerable. Those that are sweet, or contain a large portion of free saccharine matter, are decidedly the least wholesome to the dyspeptic.

When wine is good and of a proper age, it is tonic and nutritive; when new, flatulent and cathartic, disagreeing with the stomach and bowels. In medicine it is a valuable tonic in the last stage of typhus, when the skin is not too hot and dry. Its use, however, requires great caution; and when once commenced under proper circumstances, it cannot be suddenly dropped without mischief. It is, perhaps, the best permanent stimulus in the catalogue of the materia medica.

Mulled Wine is made as follows: Take of bruised *Cinnamon,* ℥¼, half a *Nutmeg,* grated, and ten bruised *Cloves.* Infuse in *boiling Water,* Oss., for an hour; strain, and add *Sugar,* ℥j. Pour the whole into a pint of hot *Port* or *Sherry.* Useful in adynamic conditions.

WINE, AMINÆ'AN, Aminæum vinum—w. of Aloes, Vinum aloës—w. Antimonial, Vinum an-

timonii—w. Antiscorbutic, Vinum antiscorbuticum — w. Aromatic, Vinum aromaticum — w. Bark, compound, Vinum de kinâ kinâ compositum—w. Barley, Cerevisia — w. Bitter, diuretic, Vinum diureticum amarum.

Wine, Ce'dar, Cedrinum vinum — w. Champagne, Vinum campanum — w. Chian, Chium vinum — w. of Colchicum, Vinum colchici — w. of Colchicum seed, Vinum colchici seminis.

Wine, Diuret'ic, *Vi'num Diuret'icum*, (F.) *Vin diurétique*. A wine recommended by Trousseau as a hydragogue in organic affections of the heart, especially such as are accompanied with dropsy. It is made as follows: *Vin. albi*, 750 grammes, *Scillæ corm.*, 5 grammes, *Bacc. junip.*, 50 grammes, *Digitalis* fol., 10 grammes. Macerate together for four days; add *Potass. acetat.*, 15 grammes, and filter. See Vinum diureticum amarum.

Wine of Er'got, Vinum ergotæ—w. of Gentian, compound, Vinum gentianæ compositum — w. of Hellebore, white, Vinum veratri — w. of Ipecacuanha, Vinum ipecacuanhæ — w. of Iron, Vinum ferri — w. of Iron, citrate of, Vinum ferri citratis — w. Medicated, Vinum medicinale — w. Mulled, see Wine—w. of Opium, Vinum opii—w. Orange, Vinum aurantii — w. Port, Vinum Portugallicum —w. Pullet, Poulet, vin de—w. of Quinia, Vinum quiniæ — w. Rhubarb, Vinum rhei — w. Sherry, Vinum — w. Steel, Vinum ferri — w. Tar, see Pinus sylvestris — w. Tobacco, Vinum tabaci — w. White, see Wine — w. of Wormwood, Vinum absinthites.

Wine-bit'ters, *Vi'num gentia'næ compos'itum.* The formulæ for these may be various. The following is as good and as agreeable as any: *Rad. gentian.*, ℔j., *Cort. aurant.*, ℥x., *Sem. cardam.* cont., ℥iv., *Cinnam. cort.*, ℥iv., *Wine*, foreign or domestic, three gallons and a half. Tonic and stomachic.

Wine-whey, *White-wine whey*, (Prov.) *Sack'-whey.* Take of good *milk*, two-thirds of a pint, and add *water* to make a pint. Take of *sherry*, or any other good white *wine*, two glasses, and of *sugar*, a dessertspoonful. Place the milk and water in a deep pan on the fire, and the moment it boils, pour into it the wine and sugar. Stir assiduously for 12 or 15 minutes, while it boils. Lastly, strain through a sieve.

It is a good mode of giving wine in adynamic states.

Wing'seed, Ptelea trifoliata.

Wink'ers, Cilia.

Wink'ing, ([Sax.] pincian, 'to wink,') Nictation, Scardamygmus.

Wins'low, Fora'men of, Hiatus of Winslow—W. Ligament of, see Genu.

Win'terberry, Smooth, Prinos lævigatus — w. Virginia, Prinos — w. Whorled, Prinos.

Win'terbloom, Hamamelis Virginiana.

Win'terclover, Mitchella repens.

Win'ter Cough, Bronchitis, chronic.

Win'tergreen, Gaultheria — w. Roundleaved, Pyrola — w. Spotted, Pyrola maculata.

Win'ter's Bark Tree, Wintera aromatica.

Winte'ra, (after Captain Winter, who first carried it to Europe,) see Wintera aromatica.

Winte'ra Aromat'ica, *Dri'mys Winteri, Wintera'na aromat'ica, Win'ter's bark Tree; Ord.* Magnoliaceæ. The bark, *Wintera, Cortex Wintera'nus seu Wintera'nus Magellan'icus, C. Magellan'icus, Cinnamo'mum Magellan'icum*, (F.) *Écorce de Winter, Cannelle poivrée*, is very much allied in its properties to Canella alba.

Wintera'na Aromat'ica, Wintera aromatica.

Wir'sung's Duct, see Pancreas.

Wirt'springs, Hangnails.

Wisba'den or **Wies'baden, Min'eral Wa'ters of.** Wisbaden is a town of Nassau, about 6 miles north of Mainz, and 22 west of Frankfort. It has been long celebrated for its hot springs, and is the most frequented of all the German watering places. There are 18 or 20 thermal springs, the principal of which contains chloride of sodium, with small quantities of salts of potash, lime, iron, magnesia, arseniate of lime, bromide of magnesium, carbonic acid, &c. These waters are valuable in chronic gout and rheumatism, hepatic congestion with hemorrhoids, and chronic skin diseases connected with abdominal plethora. The temperature of the hot spring varies from 150°–160° Fah.

Wiscon'sin, Min'eral Wa'ters of. There are calcic waters at Waukesha, the *Bethesda Springs*, which are diuretic and employed in diabetes, gravel, albuminuria, &c.

Wis'dom Tooth, see Dentition.

Wismu'thum, Bismuth.

Wis'tar, Pyr'amids of, (after Professor Wistar of the University of Pennsylvania,) Sphenoidal cornua.

Witch'en, Sorbus aucuparia.

Witchha'zel, Hamamelis Virginiana, Sorbus aucuparia.

Witch'meal, Lycopodium.

Witch'wood, Sorbus aucuparia.

Wit Teeth, see Dentition.

Wit'ter, (corr. from *guttur*,) Throat.

Wiz'en, (Weasand,) Trachea.

Woad, ([Sax.] paad,) Isatis tinctoria.

Wod, ([Sax.] pod,) Insane.

Wod'nes, Insanity, Mania.

Wolf'bane, Veratrum viride.

Wolffian Bod'ies, see Corpus Wolffianum.

Wolfs'bane, Aconitum—w. Wholesome, Aconitum anthora.

Wolfs'claw, Lycopodium.

Wolfs'jaw, see Harelip.

Wom'an, pl. *women*, *Gy'nē*, *Mu'lier*, *Fœ'mina*, *Vi'ra*, (F.) *Femme*, (Sax. pipman, 'wifeman,' 'woofman.') The adult female of the human race.

Wom'anhood, Mulieritas.

Womb, ([Sax.] pamb,) Uterus — w. Falling down of the, Prolapsus uteri — w. Laceration of the, Uterus, rupture of the—w. Tympany of the, Physometra.

Womb Grain, Ergot.

Wom'ival (Ceyl.), Pereiria medica.

Wonge, ([Sax.] pænge,) Cheek.

Wood, Brazil', Cæsalpinia echinata — w. Elk, Andromeda arborea.

Wood E'vil. Inflammation of the intestines or stomach and intestines of cattle.

Wood Lice, Onisci aselli—w. March, Sanicle—w. Naphtha, Acetone — w. Nicaragua, see Cæsalpinia — w. Peach, see Cæsalpinia — w. Pernambuco, Cæsalpinia echinata — w. Sampfen, Cæsalpinia sappan — w. Sappan, Cæsalpinia sappan.

Wood, Sour, Andromeda arboria — w. Waxen, Genista tinctoria — w. Witch, Sorbus aucuparia.

Wood'bine, Com'mon, Lonicera periclymenum.

Wood'hall Spa, Min'eral Wa'ters of. This spa, in Lincolnshire, England, contains a larger quantity of bromine and iodine than any other English water. It is therefore valuable in cases of scrofula, chronic rheumatism, cutaneous affections, &c.

Wood Oil, see Dipterocarpus.

Wood'roof, Sweetscent'ed, Asperula odorata.

Wood'soot, Salt of, Ammoniæ carbonas.

Woodsor'rel, Oxalis acetosella—w. Yellow, Oxalis stricta.

Wood'wex, Genista tinctoria.

Woods, Sudorif'ic, (F.) *Bois sudorifiques.* This term is applied, collectively, to guaiacum, sassafras, china, and sarsaparilla, which are often used together to form the sudorific decoction.

Woora'li, Curare.

Woora'ra, Curare.

Worm, see Alembic, Vermiform process and

Worms — w. Disease, Helminthiasis — w. Guinea, Dracunculus.

Worm Loz'enges, Ching's. Empirical preparations, which consist of yellow and brown lozenges. The former are directed to be taken in the evening; the latter on the following morning. The *Yellow Lozenges.* (*Saffron,* ℥ss., *Water,* Oj.; boil, and strain; and add of *White panacea of mercury,* [calomel washed in spirit of wine,] ℔j., *White sugar,* 28℔s., *Mucilage of gum tragacanth,* q. s. to make a mass. Divide, so that each lozenge may contain a grain of the panacea.) The *Brown Lozenges.* (*Panacea,* ℥vij., *Resin of Jalap,* ℔iijss., *White sugar,* ℔ix., *Mucilage of gum tragac.,* q. s. Each lozenge to contain gr. ss. of the panacea.)

Sher'man's Worm Loz'enges are said to be composed of *calomel, gamboge,* and *sugar.*

Pe'ters's Worm Lozenges are said to be composed in a similar manner.

Worm'bark Tree, Geoffræa inermis.

Worm'cakes, Story's, see Cakes, worm, Story's.

Worm'grass, Peren'nial, Spigelia Marilandica.

Wormia'na Os'sa seu **Ossic'ula,** *O. epacta'lia* seu *raphogeminan'tia* seu *triq'uetra* seu *triangula'ria Bla'sii* seu *sutura'rum, Cla'ves calva'riæ, Worm'ian bones,* (F.) *Os Wormiens* ou *épactaux* ou *complementaires* ou *surnuméraires* (Ch.) ou *intercalés* ou *triangulaires, Clefs du crâne.* Small bones, which are sometimes observable in the sutures of the bones of the cranium, of which they form a part. They are called *Wormia'na,* from Olaus Wormius, who is said to have first described them. They had been previously, however, mentioned by G. Andernach, a physician at Strasburg. The Ossa Wormiana exist more commonly in the sutures of the vault of the skull; especially in the lambdoidal, sagittal, and squamous. They are uncommon at the base of the skull. Their size is very variable, and shape irregular. Their structure and development are similar to those of the other bones of the cranium; and, like them, they are bounded by sutures.

Wormit, Artemisia absinthium.

Worm'root, Spigelia Marilandica.

Worms, originally from (L.) *Vermes, Helminthes,* (F.) *Vers; Entozo'a, Entozoa'ria, Enterozo'a, Endozo'a, Entelminth'a, Enthelminth'es, Tin'eæ, Helminth'i, Entopar'asites,* (F.) *Entozoaires.* Animals whose common character is that of existing only in other animals; (hence their name *entozoa,* from ἐντος, 'within,' and ξωον, 'animal.') They are met with, not only in the natural cavities, but even in the tissue of the organs, but chiefly in the intestines — *Ver'mes intesti'ni* seu *intestina'les, Helmin'thia al'vi* seu *pod'icis, Splanchnelminth'ia, Intes'tinal worms,* (F.) *Vers intestinaux, Angibromelminthie* of Piorry. Cuvier, Rudolphi, Brera, Bremser, Laënnec, Küchenmeister, and others, have endeavored to classify them, — some according to their shape; others, according to their anatomical characters.

Worms form the second class of the first group of Animal Parasites according to the classification of Küchenmeister. They are subdivided by him as follows:

Ver'mes, Helmin'tha.

A. Platyel'mia, Flat worms, (πλατυς, 'flat,' and ἑλμινς, 'a worm.')

First Subclass. — Cestoid'ea, cestode or tape worms, (κεστος, 'a band or girdle,' and ειδος, 'resemblance.')

First Order — Bothriocephali; Bothriocephalus latus.

Second Order — Tæniæ.

I. Tæniæ, which occur in the mature state. — 1. Tænia solium; 2. Tænia mediocancellata; 3. Tænia nana.

II. Immature Tæniæ. — 1. Cysticercus cellulosæ; 2. Cysticercus tenuicollis; 3. Echinococci; Appendix, — Acephalocysts; 4. Cysticercus vesicæ hominis.

Second Subclass. — Trematoda,—worms endowed with suckers for adhesion and imbibition, (τρημα, 'a hole.')

Family I. Monostoma. — 1. Monostoma lentis.

Family II. Distoma. — 1. Distoma hepaticum; 2. Distoma lanceolatum; 3. Distomum heterophyes; 4. Distomum hæmatobium; 5. Distomum ophthalmobium.

B. Nematel'mia, Round or thread worms, (νημα, 'a thread,' and ἑλμινς, 'a worm.')

1. Tricocephalus dispar — Trichina spiralis; 2. Oxyuris vermicularis; 3. Strongylus gigas; 4. S. longevaginatus; 5. Anchylostomum duodenale; 6. Ascaris lumbricoïdes.

(For further information as to these and other parasites and their usual habitats, see Parasites.)

The most common of these are: — the Oxyuris vermicularis, Ascaris lumbricoïdes, and Tæniæ, which are found in the intestines. The origin of these worms is extremely singular, and more favorable than any other fact to the hypothesis of spontaneous generation in the lowest tribes of animated nature. They are certainly not identical with any worms out of the body. They are most commonly met with in children improperly fed; but their presence cannot be positively detected by any symptoms, except that of the discharge of the worms themselves in the evacuations. They may, of course, give rise to every kind of irritation in the intestinal tube, and to sympathetic disturbance in most of the functions; but all these signs may be produced by intestinal irritation resulting from other causes. See Anthelmintics.

Worms, see Acne — w. Erratic, see Erratic.

Worm'seed, Artemisia santonica, Chenopodium anthelminticum — w. Levant, Artemisia santonica.

Worm'seed Goose'foot, Chenopodium anthelminticum.

Worm'weed, Cors'ican, Corallina Corsicana, Polanisia graveolens — w. White, Corallina.

Worm'wood, Bien'nial, Artemisia biennis — w. Canada, Artemisia Canadensis — w. Common, Artemisia absinthium — w. Creeping, Artemisia rupestris — w. Lesser, Artemisia Pontica — w. Roman, Artemisia Pontica — w. Sea, Artemisia maritima — w. Silky, Artemisia glacialis.

Wor'sum, (from [Sax.] þýþ, 'pus,') Pus.

Wort, *Must'um, Infu'sum By'nes* seu *Bra'sii* seu *Malt'i,* (F.) *Moût de la Bière.* An infusion of malt. This has been recommended in scurvy. One measure of ground malt is added to three equal measures of boiling water. The mixture must be well stirred, and left to stand covered three or four hours. Dose, one to four pints, daily. It has, also, been recommended in other cases, where a strong putrescent disposition appeared to prevail in the fluids, as in cancerous and phagedenic ulcers. It is not now employed.

Wort, ([Sax.] þýpt,) Herb.

Wort'wale, Hangnail.

Wo'sen, (Weasand,) Trachea.

Wound, ([Sax.] punð,) *Vul'nus,* (diminutive *Vulnus'culum*), *Vol'nus, Pla'ga, Traum'a, Tro'ma, Tre'sis, Tre'sis Vul'nus, Bla'bē, Tym'ma,* (F.) *Plaie, Blessure.* A solution of continuity in the soft parts, produced by some mechanical agent. Wounds present innumerable differences, as regards their situation; the parts interested; their direction; size; shape; the nature of the instrument or agent by which they are produced; their

more or less simple or complex character, duration, &c. A wound is called *incised*, (F.) *Coupure, Incision*, when made by a cutting instrument; — *punc'tured, Nyg'ma*, (F.) *Piqure*, when made by a pointed instrument;—*lac''erated*, (F.) *Déchirure, Plaie par arrachement*, when the parts are lacerated or torn by the wounded body;—*poi'soned, Celluli'tis venena'ta, Necu'sia*, (F.) *Plaie envenimée*, when some virulent or venomous substance has been introduced; — and *contu'sed*, (F.) *Plaie contuse*, when produced by a blunt body. *Gun'shot wounds, Sclopetopla'gæ, Vul'nera sclopeta'ria* seu *à sclopet'tis* seu *Sclopet'ica*, (F.) *Plaies d'armes à feu* ou *d'arquebusade* ou *d'arquebuse, Coup de feu*, belong to the last division. Lesions produced in battle are classed by Dr. Farr under *Polem'ici* (*morbi*).

Woura'li, Curare.

Woura'ri, Curare.

Woura'ru, Curare.

Wour'nils, *War'bles*. Irritation of the skin of horses and cattle produced by the œstrus bovis, causing inflammation from deposits of lymph from the development of larvæ from the egg, suppuration, &c.

Wour'sum (Sc.), (from [Sax.] þýþ, 'pus,') Pus.

Wrack Blad'der, Yel'low, (F.) *Varec*, Fucus vesiculosus—w. Sea, Fucus vesiculosus, Pila marina.

Wramp, Sprain.

Wrap'ping Up, (of the hydropathists,) Émaillottage.

Wrat'ack, Nanus.

Wrench, (from [Sax.] þpinȝan, 'to wring,') Sprain.

Wret, 'wart,' Verruca.

Wret'weed, Euphorbia palustris.

Wrick, Sprain.

Wright'ia Antidysenter'ica, (after Dr. Wright, a physician and botanist of Jamaica,) Nerium antidysentericum.

Wrink'le, ([Sax.] þpincle,) *Ru'ga, Rhy'tis, Ry'tis, Rha'cus, Rha'chus, Rha'gus, Rhysse'ma, Corruga'tio cu'tis, Ruelles*, (Sc.) *Run'kle, Run'kill*, (Prov.) *Crin'klecran'kle*, (F.) *Ride*. A furrow or fold in the skin of the face, forehead, vagina, &c. See Corrugation.

Wrink'led, *Rugo'sus, Ru'gous, Ru'gose*, (F.) *Ridé*. Full of wrinkles.

Wris'berg, Abdom'inal Brain of. The solar plexus.

Wris'berg, Car'tilages of, Cuneiform cartilages of the larynx — W. Ganglion of, Cardiac ganglion — W. Nerve of, see Cutaneous nerves.

Wrist, ([Sax.] pýpt, from þpæȝtan, 'to wrest,') Carpus.

Wrist'drop. Paralysis of the muscles of the forearm, induced by the poison of lead.

Wri'ters' Spasm, see Spasm, writers'.

Wrong Heir, Cancellus.

Wry'neck, Torticollis.

Wura'li, Curare.

Wurstgift, 'sausage poison,' Allantotoxicum.

X.

X Leg, Entogonyancon.

Xalap'pa, Convolvulus jalapa.

Xanthelas'ma Palpebra'rum. A condition like Vitiligoidea favosa, near the inner angle of the eyelids, usually associated with or dependent upon hepatic derangement.

Xanthelas'ma Pla'num, (*xanthos*, and ἐλασμα, 'lamina,') see Vitiligoïdea.

Xan'thic Ox'ide, Uric oxide.

Xan'thine, Uric oxide.

Xan'thium, *X. Struma'rium* seu *Orienta'lē* seu *Vulga'rē, Barda'na mi'nor, Lap'pa mi'nor, Less'er Bur'dock, Bur'weed, Bur'thistle, Clot'bur, Cock'lebur*, (F.) *Lampourde, Petit Glouteron, Petite Bardane*, (from *xanthos*, because of the color the plant yields.) This herb, as one of its names imports, was once esteemed for the cure of scrofula. The seeds have been administered in cutaneous affections.

Xanthiu'ria, Xanthuria.

Xanthochro'ïa, (*xanthos*, and *chroa*,) Xanthopathia.

Xanthoder'ma, (*xanthos*, and *derma*,) Xanthopathia.

Xantho'ma, (*xanthos*, and *oma*,) Xanthopathia. See Vitiligoïdea.

Xanthomel'anous, *Xanthomelano'sus*, (*xanthos*, and μελας, gen. μελανος, 'black.') An epithet applied to people of yellow, brown, or olive skin, and black hair.

Xanthopathi'a, (*xanthos*, and παθος, 'affection,') *Xanthoder'ma, Xanthochro'ïa, Xantho'ma*. The yellow coloration of the skin—*flave'do cutis*—produced by pigmentary change. Mr. Erasmus Wilson considers, under this head, Lentigo and Chloasma.

Xanthopi'crin and **Xanthopi'crite**, (πικρος, 'bitter,') see Xanthoxylum clava Herculis. The term *Xanthopicrite* is also applied to a bitter yellow principle obtained from several other plants.

Xanthop'sia, (from *xanthos*, and οψις, 'vision.') Yellow vision,—as sometimes occurs in jaundice.

Xanthorrhi'za, (*xanthos*, and ῥιζα, 'root,') Xanthorrhiza apiifolia.

Xanthorrhi'za Apiifo'lia, *Xanthorrhi'za, X. simplicis'sima* seu *Marbo'ica, Xanthorrhi'za tincto'ria, Yel'lowroot, Par'sley-leaved Yelloworoot, Yel'lowwort, Shrub yel'lowroot*. The root of this American plant — *Xanthorrhi'za*, (Ph. U. S.) — is a strong and pleasant bitter; and, in the dose of two scruples, sits easy upon the stomach.

Xanthorrhœ'a, (*xanthos*, and ῥεω, 'I flow,' from its yellow resin,) *Grasstree*. A genus of trees in Australia, *Nat. Order*, Liliaceæ, of which there are several species. Two resins are obtained from them: one, the *Yel'low resin of Xanthorrhœ'a* or of *New Hol'land, Resi'na lu'tea No'vi Bel'gii, Bot'any Bay res'in* or *gum, Ac'aroid res'in* or *gum, Resi'na* vel *Gum'mi acaroï'des*, which probably resembles tolu and storax in medicinal properties; the other the *red resin of Xanthorrhœa, Blackboy gum*.

Xan'thos, (ξανθος,) Yellow.

Xantho'sis, *Xan'those*, (from *xanthos*, and *osis*.) A term applied to the yellow discoloration often observed in cancerous tumors — especially in encephaloid of the testicle.

Xanthox'ylin, see Xanthoxylum clava Herculis.

Xanthox'ylum, (*xanthos*, and ξυλον, 'wood,') *X. Fraxin'eum, X. America'num, X. fraxinifo'lium, X. ramiflo'rum, X. tricar'pum, Prick'ly ash, Shrub'by prick'ly ash, Tooth'ache bush, Tooth'ache*

tree, Pell'itory, Yel'lowwood, Su'terberry. Ord. Xanthoxylaceæ. A spirituous infusion of the bark—*Xanthox'ylum*—Ph. U. S.—has been highly recommended in cases of violent colic. The fresh juice, expressed from the root of xanthoxylum, is said to afford relief in the dry bellyache of the West Indies. A decoction of the bark is sometimes used as a wash to foul ulcers.

XANTHOX'YLUM CAROLINIA'NUM has similar properties; but is more acrid.

XANTHOX'YLUM CLA'VA HER'CULIS of the West Indies, (F.) *Clavalier à feuilles de frêne, Frêne épineux*, is a very strong stimulant and powerful sialagogue; and has been given internally in rheumatism. A neutral, very bitter, and astringent substance has been obtained from it, called *Xanthopi'crin, Xanthopi'crite*, and *Xanthox'ylin*.

XANTHOXY'LUM FRAXIN'EUM, Xanthoxylum — x: Fraxinifolium, Xanthoxylum — x. Octandra, Fagara octandra — x. Piperitum, Fagara piperita — x. Ramiflorum, Xanthoxylum — x. Tricarpum, Xanthoxylum.

Xanthu'ria, *Xanthiu'ria*, (from *xanthos*, and *ουρον*, 'urine.') A condition of the system and of the urine, in which xanthic oxide is deposited from the urine.

Xantoli'na, Artemisia santonica.

Xenodoce'um, (*ξενοδοκειον*, from *ξενος*, 'a stranger,' and *δεχομαι*, 'I receive,') Hospital.

Xenodoche'um, (*ξενοδοχειον*,) Hospital.

Xeran'sis, (*ξηρανσις*, from *ξηρος*, 'dry.') Arefaction, Drying.

Xeran'tia, (from *ξηρος*, 'dry,') Siccantia.

Xera'sia, (from *ξηρος*, 'dry,') *Xera'sia cap'itis*. A disease of the hairs, which become dry, cease to grow, and resemble down covered with dust.

XERA'SIA CAP'ITIS, Xerasia.

XERA'SIA SAURIOÏ'DES. An accumulation of sebaceous substance on the surface of the skin, desiccating in scales or spines.

Xe'rion, (from *ξηρος*, 'dry,') Catapasma.

Xe'ro, (from *ξηρος*, 'dry,') in composition, dry.

Xerocollyr'ium, (*xero*, and *κολλουριον*, 'a collyrium,') *Collyr'ium sic'cum*. A dry collyrium.

Xeroder'ma, gen. *Xeroder'matis, Dermatoxera'sia*, (*xero*, and *δερμα*, 'skin.') Diminution of secretion of the sebaceous glands.

XERODER'MA ICHTHYO'DES, Ichthyosis.

Xero'ma, gen. *Xero'matis*, (*xero*, and *oma*,) Xerophthalmia — x. Conjunctival, Xerophthalmia.

XERO'MA, LACH'RYMAL. Suppression of the lachrymal secretion. See Xerophthalmia.

Xeromyc'ter, gen. *Xeromycte'ris*, Xeromycteria.

Xeromycte'ria, *Xeromyc'ter*, (*xero*, and *μυκτηρ*, 'the nose.') Dryness of the nose.

Xerom'yron, *Unguen'tum sic'cum*, (from *xero*, and *μυρον*, 'an ointment.') A dry ointment.

Xeropha'gia, (*xero*, and *φαγω*, 'I eat.') Excessive use of dry aliment. A kind of regimen to which the ancient athletæ subjected themselves, with the view of increasing their strength.

Xerophthal'mia, *Ophthal'mia sic'ca, Ophthalmoxero'sis, Xero'ma*, (*xero*, and *οφθαλμια*, 'inflammation of the eye.') An inflammation of the eye, without discharge. The term — as well as *Conjuncti'val* and *Lach'rymal Xeroma*, and *Cutic'ular Conjuncti'va* — has been given to cases in which the conjunctiva is so changed, that it presents more of the characters of skin than of mucous membrane. It is incapable of radical cure. Also, lippitudo.

Xerotrib'ia, (*xero*, and *τριβω*, 'I rub,') see Friction.

Xerotrip'sis, Friction, dry.

Xime'nia. An African plant, the leaves of which are anthelmintic. See Agiahalid.

Xiphister'num, (*xipho*, and *sternum*,) Xiphoid.

Xiph'o, (from *ξιφος*, 'a sword,') in composition, the ensiform cartilage.

Xipho'des, Xiphoid.

Xiphod'ymus, (*xipho*, and *δυειν*, 'to mingle,') Thoracogastrodidymus.

Xiph'oid, *Xiphoï'des, Xipho'des, Ensifor'mis*, (*xipho*, and *ειδος*, 'shape,') Sword-shaped. *Cartila'go Xiphoïdes* seu *Xiphoïdea* seu *Scuta'lis* seu *Ensiformis* seu *Pelta'lis* seu *Pelta'tus, Furcel'la infe'rior, Mucrona'tum os, Mucrona'ta Cartila'go, Chon'drus, Proces'sus xiphosterna'lis* seu *xiphoï'des* seu *Ster'ni xiphoïdeus, Xiphister'num, En'siform car'tilage*, (F.) *Appendice* ou *cartilage xiphoïde, C. mucroné, Appendice sous-sternale, Palette*. The name of the appendix which terminates the sternum beneath.

XIPH'OID LIG'AMENT, *Costoxiphoid Ligament*, (F.) *Ligament xiphoïdien* ou *costo-xiphoïdien*, is a small, very thin ligamentous fasciculus, which passes from the cartilage of prolongation of the 7th rib to the anterior surface of the xiphoid cartilage, into which it is inserted by its fibres decussating with those of the opposite ligament.

Xiphopa'ges, *Did'ymus Symphyoëpigas'trius*, (*xipho*, and *πηγνυμι*, 'I fix.') A monstrosity, in which twins are united by the epigastrium, as in the case of the Siamese twins.

Xy'lene, Xylol.

Xyloäl'oes, (*ξυλον*, 'wood,' and *aloes*,) Agallochum.

Xylobal'samum, see Amyris opobalsamum.

Xylocas'sia, Laurus cassia.

Xylocinnamo'mum, Laurus cinnamomum.

Xy'lol, *Xy'lene*, (*ξυλον*, 'wood.') A new colorless hydrocarbon derived from coal naphtha by distillation, mixture with sulphuric acid and dry distillation, and subsequent purification. It has been employed in variola, but its remedial powers are not yet known. It is given in doses of 10 to 15 drops to adults, 3 to 5 drops to children, every hour or two, in that disease.

Xympathi'a, Sympathy.

Xy'ris, (from *ξυρον*, 'a razor,' from the shape of its leaves,) Iris fœtidissima.

XY'RIS BULBO'SA, *X. In'dica* seu *Carolinia'na, Yel'low-eyed Grass*; indigenous; *Ord.* Xyridaceæ; flowering from July to September. The roots and leaves are said to be used by the Hindoos in lepra and chronic cutaneous diseases in general.

Xy'rum, (*ξυρον*,) Novacula.

Xy'rus, (*ξυρος*,) Novacula.

Xys'ma, gen. *Xys'matis*, (*ξυσμα*,) Linteum, Rasura, Scobs.

Xys'mus, (from *ξυω*, 'I scrape,') Rasura.

Xys'ter, gen. *Xyste'ris*, (*ξυστηρ*,) Raspatorium.

Xys'tos, (*ξυστος*, 'scraped,') Linteum.

Xys'trum, (*ξυστρον*,) Raspatorium — x. Ophthalmicum, Ophthalmoxyster.

Y.

Yam. This esculent root is principally obtained from three species of *Dioscore'a, — ala'ta, bulbif'era,* and *sati'va.* They grow spontaneously in both the Indies, and their roots are eaten promiscuously, as the potato is with us. Their taste is somewhat like that of the potato.

Yam Root, Wild, Dioscorea villosa.

Yard, ([Sax.] ȝȳrd,) Penis.

Yar'row, Com'mon, ([Sax.] ȝearpe,) Achillea millefolium.

Yaup'on, Ilex vomitoria.

Ya'va Skin, Elephantiasis Arabum.

Yawn'ing, (from [Sax.] ȝeonan, 'to yawn,') *Chas'mē, Chas'mus, Hia'tus, Ric'tus, Osce'do, Oscita'tio, Clo'nus pandicula'tio maxilla'rum, Ga'ping,* (F.) *Baillement.* Yawning consists of a deep inspiration, with considerable separation of the jaws, executed slowly and in an involuntary manner, and followed by a prolonged and more or less sonorous expiration. This respiratory movement is preceded by a feeling of oppression in the epigastric region, and in the muscles of respiration and mastication. Yawning has been conceived to be owing to torpor in the pulmonary circulation; the causes producing it being commonly *ennui,* fatigue, sleepiness, monotonous sounds, hunger, sympathy, &c. Yawning often precedes the invasion of certain intermittents, attacks of hysteria, &c., and it may, by its frequency and obstinacy, become a true disease.

Yaw'root, Stillingia.

Yaws, Framboesia.

Yeast, *Yest,* ([Sax.] ȝeȝt, from ȳȝt, 'a storm,' ȳȝtiȝ, 'stormy,') *Fermen'tum Cerevis'iæ, Spu'ma Cerevis'iæ, Barm,* (F.) *Levûre, Levûre de la Bière.* A peculiar product which collects on the surface of beer while fermenting. Yeast is antiseptic and tonic. It has been much extolled in putrid fevers, — a tablespoonful being given as a dose, in porter, wine, &c. It is also applied in the form of cataplasm to foul ulcers. In all these cases it acts by virtue of the generation of carbonic acid gas.

Yeast Plant, Torula cerevisiæ.

Yeble, (from *Ebulus,*) Sambucus ebulus.

Yecke, (Yuke,) Psora.

Yelk, ([Sax.] ȝealep, 'yellow,') see Ovum.

Yel'lot, (Yellow,) Icterus.

Yel'low, ([Sax.] ȝealep,) *Fla'vus, Lu'teus, Xan'thus,* (from past participle of Sax. ȝeælan, 'to burn.') One of the seven primitive colors.

Yel'low Ash, Cladrastis tinctoria — y. Berry, Podophyllum montanum—y. Dye Tree, Cœlocline Polycarpa—y. Fever, see Fever, yellow—y. Fever, mild, see Relapse — y. Jack, Fever, yellow — y. Ladies' bedstraw, Galium verum.

Yel'low Lig'aments, (F.) *Ligaments jaunes,* occupy the spaces between the *vertebral plates,* from the interval which separates the second vertebra from the third to that which separates the last vertebra from the sacrum. They are so called in consequence of their color.

Yel'low Paint, Hydrastis Canadensis—y. Parilla, Menispermum Canadense — y. Root, Jeffersonia Bartoni—y. Root, parsley-leaved, Xanthorrhiza apiifolia — y. Root, shrub, Xanthorrhiza apiifolia.

Yel'low Star, Helenium autumnale—y. Weed, Ranunculus acris—y. Wood, Xanthoxylum fraxineum — y. Wort, parsley-leaved, Xanthorrhiza apiifolia.

Yel'low Spring, see Ohio, mineral waters of.

Yel'low Springs. These are in Chester county, Pennsylvania. The temperature of the chief spring is 52° Fah. The water contains no marked impregnation.

Yel'lows, Cypripedium luteum, Icterus, see Leucorrhœa, Ranunculus acris.

Ye'men Ul'cer, see Beriberi.

Yerba del Soldada, 'soldier's herb,' Matico — *y. de Huaca,* Datura sanguinea.

Yer'nin, Rennet.

Yest, Yeast.

Yeux Ardens, Ardent eyes — *y. d'Écrevisse,* Cancrorum chelæ.

Yew'er, see Mamma.

Yew'tree, ([Sax.] ıp,) Taxus baccata — y. American, Taxus Canadensis.

Yex, (by onomatopœia,) Singultus.

Y'lech, Ilech.

Ylia'ter, Ilech.

Yoke, (by onomatopœia,) Singultus.

Yolk, (Yelk,) see Ovum and Vesicula umbilicalis — y. Membrane, see Vesicula umbilicalis.

Yo'pon, Ilex vomitoria.

York Springs. These are in Adams county, Pennsylvania. One of them — a saline, containing sulphates of magnesia and lime, and chloride of sodium — is a mild cathartic and diuretic; the other is a strong chalybeate.

Youk, ([G.] jucken, 'to itch,') Itching, Psora.

Young, Mr. James, Disinfect'ant of, see Manganese, sulphate of.

Youth, ([Sax.] ȳeoguð,) Adolescence.

Yp'seloglos'sus, Basioglossus.

Y'rides, Orpiment.

Ysam'bra, *Pedigam'bra.* An ancient Spanish poison, of which hellebore formed the greatest part.

Ys'ope, Hyssopus.

Yuc'ca, (Peruvian name,) Jatropha manihot.

Yuc'ca Filamento'sa, *Bear's Grass, Silkgrass.* Indigenous. A tincture of the root has been used in gonorrhœa.

Yuke, ([G.] jucken, 'to itch,') Itching, Psora.

Yux, (by onomatopœia,) Singultus.

Y-wer-a, see Spirit.

Z.

Zac'charum, Saccharum.

Za'el, Borosail.

Zaf'fran, Crocus.

Zaf'fre, Smalt.

Zam'bo, see Mulatto and Sambo.

Za'mia Integrifo'lia, see Arrowroot — z. Pumila, see Arrowroot.

Zan'na. A kind of Armenian bole, used by the ancients as a desiccative. It was also called *Zarnacha.*

Zanthorrhi'za Apiifo'lia, Xanthorrhiza apiifolia.

Zanthox'ylum, Xanthoxylum.

Zappa'nia Nodiflo'ra, (after P. A. Zappa, an Italian botanist,) Anacoluppa.

Zar. A variety of hysteria among the Abyssinian women.

Zarnacha, Zanna.

Zar'sa, Smilax sarsaparilla.

Zarzaparil'la, Smilax sarsaparilla.

Zea Mays, (ζεα or ζειa, was the ancient name of a sort of corn, from ζαεω, 'to live,') *Z. vulga'ris, Mays, M. ze'a* seu *America'na, A'dor, Indian Corn, Corn, Turkey* or *Indian Wheat, Maize, Mayz,* (F.) *Maïs, Graine de Turquie, Blé d'Inde* ou *d'Espagne* ou *d'Italie* ou *de Turquie. Ord.* Gramineæ. A native of America, and much used over the whole of the continent as an article of diet. It is ground for the same purposes as wheat, and forms an excellent bread. The fecula or starch — *corn starch, maize'na* — makes an agreeable aliment: four tablespoonfuls of the starch to a quart of milk, boiled for a few minutes. It may be sweetened and flavored, and eaten like *blancmanger.*

Zédoaire Rond, Kæmpferia rotunda.

Zedoa'ria, Kæmpferia rotunda — z. Longa, see Kæmpferia — z. Rotunda, see Kæmpferia.

Zed'oary, Kæmpferia rotunda.

Zelo'sis, (ζηλωσις,) Zelotypia.

Zelotyp'ia, (from ζελος, 'love,' and τυπος, 'form,' 'model,') *Zelo'sis.* It has been proposed to apply this name to the violent mental affection produced by the acknowledged or presumed infidelity of a beloved object, and to the consequences of such affection — melancholy, mania, &c.

Ze'ma, gen. *Zem'atis,* (ζεμα,) Decoction.

Zen'icon, (ζενικον.) Ancient name of a Celtic poison used for poisoning arrows.

Zeoc'riton Dis'tichum, (ζεα, 'corn,' and κριθη, 'barley,') Hordeum.

Ze'phach, Peritonæum.

Zer'ma, Zerna.

Zer'na, *Zer'ma.* Among the barbarous Latin writers it signified ulcerated impetigo, *Impeti'go ulcera'ta.*

Zerum'bet, Cassumuniar.

Ze'sis, (ζεσις,) Effervescence, Decoction.

Zest, see Citrus medica.

Zestolu'sia, (ζεστολουσια, from ζεστος, 'hot,' and λουω, 'I wash,') Bath, hot.

Zibebæ, see Vitis vinifera.

Zib'ethum, Civetta.

Zigni'tes, Zingrites.

Zinc, *Zink, Zin'cum, Zin'kum, Spel'trum, Speau'ter, Tu'tenag, Zin'chum, Zint, Stan'num In'dicum.* (Perhaps formed etymologically from [G.] Zinn, 'tin.') A metal obtained from calamine and blende. Its color is bluish-white; lustre of the fresh surface considerable, but soon dulled, from the facility with which it oxidates; hard; texture striated; s. g. 6·8. Melts at 700° Fah., burns with a bright flame in a higher temperature, and is volatilized in the form of a white, flocculent oxide. Its use in medicine is in the formation of the preparations to be presently mentioned.

The Ph. B. (1867) has a *granulated Zinc, Zincum granulatum,* made by fusing commercial zinc and pouring it into cold water, and afterwards removing the granulated zinc from the water and drying it.

Zinc, Acetate of, Zinci acetas — z. Butter of, Zinci chloridum — z. Carbonate of, Zinci carbonas præcipitatus — z. Carbonate of, impure, Calamina — z. Chloride of, Zinci chloridum — z. *Chlorure de,* Zinci chloridum — z. Cyanide of, Zinci cyanuretum — z. *Cyanure de,* Zinci cyanuretum — z. Ferrocyanide of, Zinci ferrohydrocyanas — z. Ferrohydrocyanate of, Zinci cyanuretum — z. Flowers of, Zinci oxidum — z. Granulated, see Zinc — z. Hydrocyanate of, Zinci cyanuretum — z. Iodide of, Zinci iodidum — z. Ioduret of, Zinci iodidum — z. Lactate of, Zinci lactas.

Zinc Col'ic, see Zinci oxidum.

Zinc and Morph'ia, Double I'odide of, (F.) *Iodure double de Zinc et de Morphine.* (This salt is prepared by boiling *iodide of iodhydrate of morphia* with *water* and *zinc,* after they have acted on each other for some days, filtering and crystallizing.) It is considered to combine the properties of morphia and the salts of zinc, and has been prescribed as an anodyne and antispasmodic. Dose, a quarter of a grain.

Zinc, Oxide de, Zinci oxidum — z. Oxide of, Zinci oxidum — z. Oxide of, commercial, Zinci oxidum venale — z. Oxide of, impure, Tutia.

Zinc, Oxychlo'ride of. A preparation of zinc employed by the dentist for temporary filling, and in the treatment of sensitive dentine; made by mixing a concentrated solution of the chloride with oxide of zinc recently prepared by burning zinc.

Zinc, Phos'phate of, Zinci phosphas.

Zinc and Strych'nia, Double Iodide of. This salt is prepared by digesting for several days, in hot water, *iodide of iodhydrate of strychnia* and *zinc,* filtering and crystallizing. It has been proposed in the same cases as strychnia.

Zinc, Sulfate de, Zinci sulphas — z. Sulphate of, Zinci sulphas — z. Sulphocarbolate of, see Sulphocarbolate — z. *Valérate de,* Zinci valerianas — z. Valerianate of, Zinci valerianas.

Zin'chum, Zincum.

Zin'ci Ace'tas, *Ac''etate of Zinc,* (F.) *Acétate de Zinc. (Zinci oxid. venal.,* ℥ij., *Acid. acetic.,* f℥viiijss., *Aquæ destillat.,* f℥v. Mix the acid and water, and digest the oxide of zinc in the mixture for half an hour, heat to the boiling point, filter while hot, and set aside to crystallize. Drain the crystals in a funnel, and dry on bibulous paper. An additional quantity of crystals may be obtained by evaporating the mother-liquor to one-half, slightly acidulating with acetic acid, and crystallizing. Ph. U. S., 1873.)

Frequently used to form a gently astringent wash in ophthalmia and other local inflammations; and as an injection in gonorrhœa.

Zin'ci Carbo'nas Impu'rus, Calamina.

Zin'ci Carbo'nas Præcipita'tus, *Z. Carbo'nas Præcipita'ta,* (Ph. U. S., 1873,) *Precip'itated car'bonate of Zinc. (Zinci sulphat., Sodii carbonat.,* āā ℔j., *Aq. bullient.,* cong. Dissolve the sulphate of zinc and carbonate of soda respectively in Oiv. of water. Mix the solutions; stir, and set the mixture by, that the precipitate may subside. Having poured off the supernatant liquid, wash the precipitate with hot water, until the washings are nearly tasteless, and dry with a gentle heat. Ph. U. S., 1873.) Used to prepare the Zinci oxidum.

Zin'ci Carbo'nas Præpara'tus, Calamina præparata — z. Chloridi liquor, see Burnett's disinfecting liquid — z. Chloretum, Zinci chloridum.

Zin'ci Chlo'ridum, *Z. chlorure'tum* seu *chlore'tum, Zin'cum chlora'tum* seu *muriat'icum, Chlo'ride* or *Chlo'ruret of Zinc,* (F.) *Chlorure de Zinc. (Liq. zinci chlorid.,* q. s. Evaporate to dryness in an evaporating dish, fuse the dry mass, pour the liquid on a flat stone, and when congealed break the mass in pieces, and keep in a well-stopped bottle. Ph. U. S., 1873.) It is very deliquescent in the air, forming the *But'ter of Zinc, Buty'rum Zin'ci.*

Chloride of zinc is a powerful escharotic, and is the basis of different caustic applications. See Pasta zinci chloridi. It is, also, much employed as an effective antiseptic. See Burnett's-disinfecting liquid.

Zin'ci Chlorure'tum, Z. chloridum.

Zin'ci Cyanure'tum, *Z. Cyan'idum* seu *Hydrocy'anas* seu *Prus'sias, Zin'cum Cyanogena'tum* seu *Borus'sicum* seu *Zoöt'icum, Cyanide* or *Hydrocy'anate of Zinc,* (F.) *Cyanure de Zinc.* (This salt

is formed by adding *sulphate of zinc* to *hydrocyanate of potassa* so long as any precipitate is thrown down. When dried and calcined at a low heat, the product is a mixture of cyanuret of zinc and of potassium.) It has been recommended in nervous cardialgia. Dose, from one-sixteenth to one-twelfth of a grain.

It is chiefly used as a caustic; one part of the chloride being mixed with four, three, or two parts of flour, according to the desired strength, and a few drops of water being added to form a paste.

Zin'ci Ferrohydrocy'anas, *Zin'ci ferrocyanure'tum, Cyanure'tum Ferroziu'cicum, Zin'cum Ferrohydrocyan'icum, Ferrocy'anide* or *Ferrohydrocy'anate of Zinc.* (Made by the mutual decomposition of boiling-hot solutions of *sulphate of zinc* and *ferrocyanate of potassa.*) It has been recommended in the same cases as the last preparation.

Zin'ci Hydrocy'anas, Zinci cyanuretum.

Zin'ci Io'didum, *Z. Iodure'tum, Zin'cum Ioda'tum, Iode'tum Zin'ci* seu *Zin'cicum, Protoïodure'tum Zin'ci, I'odide* or *Iod'uret of Zinc*, (F.) *Iodure de Zinc.* (This salt is made by boiling together *iodine* and *zinc* to dryness, and subliming.) An ointment, composed of a drachm to an ounce of lard, has been used in cases where the external use of iodide of potassium is indicated.

Zin'ci Iodure'tum, Z. iodidum.

Zin'ci Lac'tas, *Lac'tate of Zinc.* A white soluble salt, given in epilepsy, in doses of two grains, gradually increased to ten.

Zin'ci Nix, Zinci oxidum.

Zin'ci Ox'idum seu **Ox'ydum**, *Zin'cum calcina'tum, Ni'hil Al'bum, La'na Philosopho'rum* seu *Philosoph'ica, Nix Zin'ci, Ni'hil Gri'seum, Pom'pholyx, Ox'ide of Zinc, Flow'ers of Zinc*, (F.) *Oxide* ou *Blanc de Zinc, Fleurs de Zinc.* (Procured by exposing *precipitated carbonate of zinc* to a low-red heat, so as to drive off the carbonic acid and water. Ph. U. S., 1873.) It is said to be tonic and antispasmodic; externally detergent and desiccative. Employed in epilepsy, chorea, &c. Usual dose, gr. ij. to x.; but it is probably inert. For its external use, see Ung. zinci. This oxide is said to be capable of producing a colic resembling that caused by lead, and called *Zinc Colic.*

Zin'ci Ox'idum Impu'rum, Tutia.

Zin'ci Ox'idum Vena'le, (Ph. U. S., 1873,) *Commer'cial Ox'ide of Zinc.* A pure oxide of zinc, employed for making Zinci acetas.

Zin'ci Phos'phas, *Phos'phate of Zinc.* A white insoluble salt, which has been employed in insanity occurring in convalescence from fevers, epilepsy, &c. Dose, in pill, one to three grains.

Zin'ci Prus'sias, Zinci cyanuretum.

Zin'ci Sul'phas, (Ph. U. S., 1873,) *Sul'phate of Zinc, Zin'cum Vitriola'tum, Vitri'olum Al'bum* seu *Goslarien'sē* seu *Zin'ci, Sul'phas Zin'cicum, Gil'la Vitri'oli* seu *Theophras'ti, Sal Vitri'oli* seu *Vomito'rium Vitri'oli, Chalcan'thum Al'bum, White Vit'riol, White Cop'peras*, (F.) *Sulfate de Zinc, Couperose blanche, Sulfate zincique, Vitriol blanc.* (*Zinc.* in frustulis, ℥iv., *Acid. sulphuric.*, ℥vj., *Aquæ destillat.*, Oiv. To the zinc and water, previously introduced into a glass vessel, add by degrees the sulphuric acid, and, when the effervescence shall have ceased, filter the solution through paper; then boil it down till a pellicle begins to form, and set aside to crystallize. Sulphate of zinc is inodorous; taste, styptic. It is in white, semitransparent, efflorescent crystals; soluble in three parts of water at 60°. It is emetic, tonic, antispasmodic, and, externally, astringent. A nostrum, sold under the name *Antipertus'sis*, and, as its title imports, given in hooping-cough, contains this salt as its chief ingredient. Dose of the sulphate as an emetic, gr. x. to ℥ss.; as a tonic, gr. j. to ij. Used externally as a collyrium, gr. j. to water f℥j. A solution of the salt, to which a little sulphate of copper has been added, is said to constitute the *Disinfecting Liquid of Larnaudès.*

Zin'ci Valeria'nas, *Zin'cum valerian'icum, Vale'rianate* or *Vale'rate of Zinc.* (A salt formed by saturating *valerianic acid* with freshly prepared *carbonate of zinc*, or by the double decomposition of *valerianate of soda* and *sulphate of zinc.* Ph. B., 1867.) It is in pure white, pearly scales, and has been recommended as a tonic in neuralgic diseases, epilepsy, &c. The dose is one or two grains several times a day.

Zin'cum, Zinc — z. Borussicum, Zinci cyanuretum — z. Calcinatum, Zinci oxidum — z. Chloratum, Zinci chloridum — z. Cyanogenatum, Zinci cyanuretum — z. Ferrohydrocyanicum, Zinci ferrohydrocyanas — z. Granulatum, see Zinc — z. Iodatum, Zinci iodidum — z. Muriaticum, Zinci chloridum — z. Valerianicum, Zinci valerianas — z. Vitriolatum, Zinci sulphas — z. Zoöticum, Zinci cyanuretum.

Zin'giber, gen. *Zingib'eris*, (ζιγγιβερ,) Amomum zingiber — z. Album, Amomum zingiber — z. Cassumuniar, see Cassumuniar — z. Commune, Amomum zingiber — z. Fuscum, Amomum zingiber — z. Germanicum, Arum maculatum — z. Nigrum, Amomum zingiber — z. Officinale, Amomum zingiber — z. Purpureum, see Cassumuniar — z. Spurium, see Cassumuniar — z. Zerumbet, see Cassumuniar.

Zin'giberin, Piperoid.

Zingib'eris Ra'dix Con'dita, see Amomum zingiber — z. Radix condita ex Indiâ allata, see Amomum zingiber.

Zingri'tes, *Zigni'tes.* A stone, resembling glass; to which the ancients attributed marvellous properties.

Zink, Zinc.

Zin'kum, Zinc.

Zint, Zincum.

Zin'ziber, (ζιγγιβερ,) Amomum zingiber.

Zi'phac, Peritonæum.

Zir'bus, Epiploon — z. Adipinus, Epiploon, gastrocolic.

Zitt'man's Decoc'tion, Decoctum Zittmanni.

Ziza'nia Aquat'ica, (Ζιζανιον was the ancient name of some wild grain,) *Wild Rice, Can'ada Rice, Water Oats; Ord.* Gramineæ; called by the Indians, *Menomene;* grows abundantly on the marshy margins of the northern lakes and waters of the upper branches of the Mississippi. The grain resembles oats. It furnishes the northern savages and the Canadian traders and hunters with their annual supplies of grain.

Ziz'yphum (Arab.), Jujube.

Ziz'yphus Ju'juba, see Jujube — z. Nitida, see Jujube.

Ziz'yphus Œnop'lia, *Z. Nape'ca; Ord.* Rhamnaceæ; common all over India. The fruit is eaten by the natives. It is of a pleasant acid taste. A decoction of the bark of the fresh root is used to promote the healing of fresh wounds.

Ziz'yphus Sati'va, see Jujube — z. Sylvestris, see Jujube.

Zoa'gria, (ζωη, 'life,' and αγρεω, 'I catch up.') The saving and preservation of life, *Zoö'sis.* A reward for preserving life, *Sos'trum.* A votive offering hung up in the temples for a life saved.

Zoanthro'pia, *Melancholi'a zoänthro'pia*, (*zoon*, and ανθρωπος, 'a man.') A species of monomania, in which the patient believes himself transformed into an animal. Lycanthropia and Cynanthropia belong to this species of monomania.

Zoara, Insomnia.

Zo'ë, (ζωη,) Life.

Zograph'ia, Zoographia.

Zoïatri'a, (*zoon*, and ιατρεια, 'medical treatment,') Veterinary art.

Zoïa'trus, (*zoon,* and *ιατρος,* 'a physician,') Hippiater.

Zoïs'mus, (from *zoon,*) Animality.

Zomid'ium, (*ζωμιδιων,* dim. of *ζωμος,*) Jus.

Zo'mos, (*ζωμος,*) Consommé, Jus. See Broth.

Zo'na, (*ζωνη,* 'a girdle,') Herpes zoster—z. Cartilaginea, see Lamina spiralis — z. Castitatis, Hymen — z. Choriacea, see Lamina spiralis — z. Ciliaris, Ciliary zone — z. Cochleæ, see Lamina spiralis — z. Coriacea, see Lamina spiralis — z. Denticulata, Lamina denticulata—z. Fasciculata, see Zona reticularis — z. Glomerulosa, see Zona reticularis — z. Ignea, Herpes zoster — z. Mediana, see Lamina spiralis — z. Membranacea, see Lamina spiralis — z. Mollis, see Lamina spiralis — z. Nervea, see Lamina spiralis — z. Ossea, see Lamina spiralis — z. Pectinata, see Lamina spiralis — z. Vesicularis, see Lamina spiralis.

Zo'na Pellu'cida, *Oölem'ma pellu'cidum, Vitellary mem'brane, Cho'rion* (of some), (F.) *Vitelline, Membrane vitelline, Enveloppe ovarique, Coque, Membrane coquillière.* The membrane that surrounds the yolk in the mammalia is so called on account of its breadth and peculiar transparency.

Zo'na Reticula'ris. This term has been applied by J. Arnold to the inner layer, as *Zona glomerulosa* has been to the outer layer, of the stroma of the cortical part of the suprarenal capsule. The main portion he calls *Zo'na fasciculata.*

Zo'na Serpigino'sa, Herpes zoster.

Zo'na Tendino'sa. The whitish circle around each auriculoventricular orifice of the heart. See Circulus callosus Halleri.

Zo'na Virgnita'tis, Hymen.

Zone, Cingulum — z. of Haller, Ciliary zone — z. Sclerotic, Sclerotic zone.

Zo'nula (dim. of *zona*) **Cilia'ris,** see Ciliary and Ciliary zone — z. Cochleæ, see Lamina spiralis—z. Hildani, Cingulum Hildani — z. Zinnii, see Ciliary zone.

Zoöam'ylin, (*zoon,* and *amylum,* 'starch,') Glycogenic matter.

Zoöbiolog''ia, (*zoon, βιος,* 'life,' and *λογος,* 'a treatise,') see Physiology.

Zoöchemi'a, Chemistry, animal.

Zoöchem'ical, *Zoöchym'ical, Zoöchem'icus, Zoöchym'icus.* Appertaining or having relation to animal chemistry.

Zoö'chemy, Chemistry, animal.

Zoö'chymy, Chemistry, animal.

Zoö'des, (*ζωωδης,* from *zoon,* and *odes,*) Animal.

Zoogénies, see Zoögeny. Bouchut has applied the term *Zoogénies* to animal parasites infesting the body.

Zoög''eny, *Zoögen'ia, Zoögen'esis,* (*zoon,* and *γενναω,* 'I beget.') The doctrine of animal formation.

Zoög'raphy, *Zoögraph'ia, Zograph'ia,* (*zoon,* and *γραφη,* 'a description.') A description of animals. The natural history of animals.

Zoöhem'atine, Hæmatine.

Zoöhy'las, (*zoon,* and *ὑλη,* 'matter.') Animal matter.

Zoöhy'lica Concremen'ta. Concretions formed of animal matter.

Zoöi'asis, (*zoon,* and *ιασις,* 'curation,') Veterinary art.

Zo'oid, *Zoöi'des,* (*ζωοειδης,* from *zoon,* and *ειδος,* 'resemblance.') Resembling or belonging to an animal. Every living cell may be regarded as a Zooid.

Zoölog''ical, *Zoölog''icus,* (F.) *Zoölogique,* (*zoon,* and *λογος,* 'a description.') Relating or appertaining to the natural history of animals.

Zoöl'ogist, *Zoölogis'ta, Zoöl'ogus.* One skilled in the natural history of animals.

Zoöl'ogy, *Zoölog''ia.* The natural history of animals.

Zoömagnetis'mus, Magnetism, animal.

Zoöm'ycus, (*zoon,* and *μυκος,* 'mucus,') Mucus.

Zoömyx'a, (*zoon,* and *μυξα,* 'mucus,') Mucus.

Zo'ön, (*ζωον,*) Animal.

Zoönom'ia, *Organozoönom'ia, Zoön'omy,* (*zoon,* and *νομος,* 'law.') The law which governs the organic actions of animals in general — *Animal Physiol'ogy, Zoöphysiolog''ia.*

Zoöno'ses, (*zoon,* and *νοσος,* 'disease.') Diseases produced by morbid animal poisons; as hydrophobia, glanders, &c.

Zoönosol'ogy, *Zoönosolog''ia,* (*zoon, νοσος,* 'a disease,' and *λογος,* 'a description.') The nosology of animals.

Zoöpathol'ogy, *Zoöpatholog''ia,* (*zoon, παθος,* 'a disease,' and *λογος,* 'a description.') The pathology of animals.

Zoöph'agous, *Zoöph'agus,* (F.) *Zoöphage,* (*ζωοφαγος,* from *zoon,* and *φαγω,* 'I eat.') Feeding on animals. Carnivorous.

Zoöphthal'mus, (*ζωοφθαλμος,*) Hydrophthalmia.

Zoöphysiol'ogy, *Zoöphysiolog''ia,* (*zoon,* and *physiologia,*) Physiology, animal, Zoonomia.

Zo'öphyte, *Zoöph'ytum,* (*zoon,* and *φυτον,* 'a plant,') *Phytozo'ön,* (F.) *Phytozoaire, An'imal plant.* A name given to the lowest class of animals, which seem to form the transition between the animal and the vegetable kingdoms.

Zoö'sis, (from *zoon,*) Animation, Zoagria.

Zoösper'mata, Spermatozoa.

Zoöspermes, Spermatozoa.

Zo'ösperms, Spermatozoa.

Zoöthap'sis, (*ζωη,* 'life,' and *θαπτω,* 'I inter.') Burial alive. Premature interment.

Zoöt'ic Ac''id, (from *zoon.*) A term sometimes applied synonymously with prussic acid.

Zoöt'omist, *Zootom'icus,* (*zoon,* and *τεμνω,* 'I cut.') One who dissects animals.

Zoöt'omy, *Zoötom'ia, Anatom'ia anima'lis* seu *comparati'va* seu *compara'ta, Theriot'omy, Compar'ative Anat'omy.* The anatomy of animals. Animal anatomy.

Zoötroph'ic, (*zoon,* and *τροφη,* 'nourishment.') Relating to the nourishment of an animal; as *Zootrophic powders,* which are intended to improve the general nutrition.

Zopis'sa, (*ζωπισσα,* from *ζωος,* 'living,' and *πισσα,* 'pitch,') see Pinus sylvestris.

Zo'pyron, (*ζωπυρον,* from *ζαω,* 'I am alive,' and *πυρ,* 'fire,') Fomites.

Zos'ter, gen. *Zoste'ris,* (*ζωστηρ,* 'a girth,') Herpes zoster.

Zoste'ra Mari'na, Pila marina — z. Maritima, Pila marina.

Zostère, Pila marina.

Zoster'ic, *Zoster'icus.* Relating or appertaining to Herpes zoster.

Zouzinette, Narcissus pseudonarcissus.

Zo'zar, Saccharum.

Zuc'aro, Saccharum.

Zuc'carum, Saccharum.

Zu'char, Saccharum.

Zu'charum, Saccharum.

Zu'chra, Saccharum.

Zula'pium, Julep.

Zygapoph'yses, (*ζυγον,* 'a yoke,' and *apophysis,*) see Vertebræ.

Zygo'ma, gen. *Zygo'matis,* (*ζυγωμα,* from *ζυγον,* 'a yoke.') Malæ os; see Zygomatic process.

Zygomat'ic, *Zygomat'icus, Juga'lis, Ju'gal,* (F.) *Zygomatique.* That which relates to the *zygoma* or cheekbone.

Zygomat'ic Arch, see Zygomatic process — z. Bone, Malæ os.

Zygomat'ic Fos'sa is the space included between the posterior margin of the outer ala of the pterygoid process and the crista which descends from the malar tuberosity to the superior alveolar margin.

Zygomat'ic Mus'cles are two in number. 1.

Zygomat'icus ma'jor, Distort'or o'ris, (F.) *Zygomato-labial* (Ch.), *Muscle grand zygomatique,* which is situate obliquely at the forepart and sides of the face. It is a small, rounded muscle; arises from the outer surface of the os malæ, and is inserted at the commissure of the lips, which it raises and draws outwards. It acts principally in laughing. 2. *Zygomat'icus mi'nor,* (F.) *Petit Zygomato-labial* (Ch.), *Petit Zygomatique,* does not always exist. It is situate on the inner side of the last; arises from the outer surface of the os malæ, and is inserted at the corner of the mouth, or rather into the upper lip, which it raises and draws outwards.

Zygomat'ic Proc''ess, *Proces'sus zygomat'icus, Apoph'ysis zygomat'ica, An'sa cap'itis, Ma'lar* or *Ju'gal proc''ess,* (F.) *Apophyse zygomatique, Anse de la Tête,* arises from the outer surface of the temporal bone by two roots, one of which is transverse, *Condyle du temporal* (Ch.), and the other longitudinal: between them is the glenoid cavity. The process passes forwards, and is articulated with the posterior angle of the os malæ, with which it forms a bony bridge, called the *Zygomat'ic arch, Ar'cus* seu *Pons zygomat'icus,* (F.) *Arcade zygomatique.* The cavity beneath the bridge is sometimes called *Zygoma.*

Zygomat'ic Su'ture is placed between the zygomatic parts of the temporal and cheek bones; and slants obliquely downwards and backwards.

Zygomat'icus, Zygomatic.

Zygomatique, Zygomatic — *z. Grand,* Zygomaticus major — *z. Petit,* Zygomaticus minor.

Zygomato-auriculaire, Anterior auris — *z. Labial,* Zygomaticus major — *z. Labial, petit,* Zygomaticus major — *z. Maxillaire,* Masseter — *z. Orieulaire,* Anterior auris.

Zygophyl'lum Faba'go, (ζυγος, 'a yoke, a pair,' and φυλλον, 'a leaf,') (F.) *Fabagelle. Ord.* Zygophyllaceæ. A Syrian and Mauritanic plant, possessed of an acrid and bitter taste. It has vermifuge properties. The Arabs believe that the recently expressed juice of *Zygophyl'lum sim'plex* is capable of removing specks from the cornea.

Zy'mē, (ζυμη,) Ferment.

Zymo'ma, gen. *Zymo'matis,* (ζυμωμα,) Ferment.

Zymo'sis, (ζυμωσις, from *zyma,* and *osis,*) Fermentation, see Zymotic.

Zymot'ic, *Zymoticus,* (F.) *Zymotique,* (from *zyma.*) Relating or appertaining to fermentation. A *zymotic disease* is any epidemic, endemic, contagious, or sporadic affection, which is produced by some morbific principle acting on the organism similar to a ferment — as the major exanthemata. *Zymoses* has been used by some to signify such affections. In the classification of Dr. Wm. Farr, *Zymot'ic diseases, Zymot'ici mor'bi,* comprise diseases which are epidemic, endemic, communicable, inoculable, capable of propagation from existing foci, or of generation; induced by a specific material or poison, or by the want or bad quality of food. This class includes four orders: — miasmatic, enthetic, dietic, and parasitic diseases.

Zymot'ic Prin'ciples. Certain matters which, of themselves or by their transformation, propagate zymotic diseases, as variola, typhus, syphilis, &c. Taking their names from the diseases which they produce, they are called, by Dr. Wm. Farr, *Varioline, Typhine, Syphiline,* &c.

Zymot'ic The'ory of Dis'ease, see Fermentation theory.

Zythog'ala, *(zythus,* and γαλα, 'milk,') Posset.

Zy'thum, Cerevisia.

Zy'thus, (ζυθος,) Cerevisia.

THE END.

HENRY C. LEA'S

(LATE LEA & BLANCHARD'S)

CATALOGUE OF MEDICAL AND SURGICAL PUBLICATIONS.

In asking the attention of the profession to the works advertised in the following pages, the publisher would state that no pains are spared to secure a continuance of the confidence earned for the publications of the house by their careful selection and accuracy and finish of execution.

The printed prices are those at which books can generally be supplied by booksellers, who can readily procure for their customers any works not kept in stock. Where access to bookstores is not convenient, books will be sent by mail, with U. S. postage paid, on receipt of the prices, but no risks are assumed either on the money or the books, and no publications but my own are supplied. Gentlemen will therefore in most cases find it more convenient to deal with the nearest bookseller.

*** No discounts or deductions are made from catalogue prices to buyers at retail.

An ILLUSTRATED CATALOGUE, of 64 octavo pages, handsomely printed, will be forwarded by mail, postpaid, on receipt of ten cents.

HENRY C. LEA.

Nos. 706 and 708 SANSOM ST., PHILADELPHIA, April, 1876.

ADDITIONAL INDUCEMENT FOR SUBSCRIBERS TO

THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES
FOR THE CENTENNIAL YEAR 1876.

THREE MEDICAL JOURNALS, containing over 2000 LARGE PAGES,
Free of Postage, for SIX DOLLARS Per Annum.

TERMS FOR 1876:

THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES, and THE MEDICAL NEWS AND LIBRARY, both free of postage, } Five Dollars per annum, in advance.

OR

THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES, published quarterly (1150 pages per annum), with THE MEDICAL NEWS AND LIBRARY, monthly (384 pp. per annum), and THE MONTHLY ABSTRACT OF MEDICAL SCIENCE (592 pages per annum), } Six Dollars per annum, in advance.

*** Advance-paying subscribers for the current year can obtain cloth covers for each volume of the Journal (two annually), and of the Abstract (one annually), free by mail, on receipt of six cents in postage stamps for each cover.

SEPARATE SUBSCRIPTIONS TO

THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES, when not paid for in advance, Five Dollars.

THE MEDICAL NEWS AND LIBRARY, free of postage, in advance, One Dollar.

THE MONTHLY ABSTRACT OF MEDICAL SCIENCE, free of postage, in advance, Two Dollars and a Half.

It is manifest that only a very wide circulation can enable so vast an amount of valuable practical matter to be supplied at a price so unprecedentedly low. The publisher, therefore, has much gratification in acknowledging the valuable assistance spontaneously rendered by so many of the old subscribers to the "JOURNAL," who have kindly made known among their friends the advantages thus offered, and have induced them to subscribe. Relying upon a continuance of these friendly exertions, he hopes to succeed in his endeavor to place upon the table of every reading practitioner in the United States the equivalent of three or four large octavo volumes, at the comparatively trifling cost of SIX DOLLARS *per annum*.

These periodicals are universally known for their high professional standing in their several spheres.

I.

THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES,
EDITED BY ISAAC HAYS, M.D.,

is published Quarterly, on the first of January, April, July, and October. Each number contains nearly three hundred large octavo pages, appropriately illustrated wherever necessary. It has now been issued regularly for over FIFTY years, during

(For OBSTETRICAL JOURNAL, *see* p. 8.)

nearly the whole of which time it has been under the control of the present editor. Throughout this long period, among its Collaborators will be found a large number of the most distinguished names of the profession in every section of the United States, rendering the department devoted to

ORIGINAL COMMUNICATIONS

full of varied and important matter, of great interest to all practitioners. Thus, during 1875, articles have appeared in its pages from nearly one hundred gentlemen of the highest standing in the profession throughout the United States.*

Following this is the "REVIEW DEPARTMENT," containing extended and impartial reviews of all important new works, together with numerous elaborate "ANALYTICAL AND BIBLIOGRAPHICAL NOTICES" of nearly all the medical publications of the day.

This is followed by the "QUARTERLY SUMMARY OF IMPROVEMENTS AND DISCOVERIES IN THE MEDICAL SCIENCES," classified and arranged under different heads, presenting a very complete digest of all that is new and interesting to the physician, abroad as well as at home.

Thus, during the year 1875, the "JOURNAL" furnished to its subscribers 98 Original Communications, 95 Reviews and Bibliographical Notices, and 283 articles in the Quarterly Summaries making a total of about FIVE HUNDRED articles emanating from the best professional minds in America and Europe.

For the coming year a feature of special interest and value will be found in a series of CENTENNIAL REPORTS on the Progress of Medical Science in the United States since 1776. Of these there will be four prepared by gentlemen of the highest eminence in their several departments, as follows:—

ON PRACTICAL MEDICINE, by EDWARD H. CLARKE, M.D., A.A.S., late Prof. of Mat. Med. in Harv. Univ.; and H. J. BIGELOW, M.D., Prof. of Surg. in Harv. Univ.

On SURGERY, by S. D. GROSS, M.D., D.C.L. Oxon., Professor of Surgery in Jefferson Med. College, Philadelphia.

On OBSTETRICS AND GYNÆCOLOGY, by T. GAILLARD THOMAS, M.D., Professor of Obstetrics, &c., in the Coll. Phys. and Surgeons, New York.

On MEDICAL LITERATURE, by J. S. BILLINGS, M.D., Asst. Surg. U.S.A., Librarian National Medical Library.

The permanent value of these records of the labors of the American medical profession during the last hundred years will be apparent to all.

That the efforts thus made to maintain the high reputation of the "JOURNAL" are successful, is shown by the position accorded to it in both America and Europe as a national exponent of medical progress:—

America continues to take a great place in this class of journals (quarterlies), at the head of which the great work of Dr. Hays, the *American Journal of the Medical Sciences*, still holds its ground, as our quotations have often proved.—*Dublin Med. Press and Circular*, Jan. 31, 1872.

Of English periodicals the *Lancet*, and of American the *Am. Journal of the Medical Sciences*, are to be regarded as necessities to the reading practitioner.—*N. Y. Medical Gazette*, Jan. 7, 1871.

The *American Journal of the Medical Sciences* yields to none in the amount of original and borrowed matter it contains, and has established for itself a reputation in every country where medicine is cultivated as a science.—*Brit. and For. Med.-Chirurg Review*, April, 1871.

This, if not the best, is one of the best-conducted medical quarterlies in the English language, and the present number is not by any means inferior to its predecessors.—*London Lancet*, Aug. 23, 1873.

Almost the only one that circulates everywhere, all over the Union and in Europe.—*London Medical Times*, Sept. 5, 1868.

And that it was specifically included in the award of a medal of merit to the Publisher in the Vienna Exhibition in 1873.

The subscription price of the "AMERICAN JOURNAL OF THE MEDICAL SCIENCES" has never been raised during its long career. It is still FIVE DOLLARS per annum; and when paid for in advance, the subscriber receives in addition the "MEDICAL NEWS AND LIBRARY," making in all about 1500 large octavo pages per annum, free of postage.

II.

THE MEDICAL NEWS AND LIBRARY

is a monthly periodical of Thirty-two large octavo pages, making 384 pages per annum. Its "NEWS DEPARTMENT" presents the current information of the day, with Clinical Lectures and Hospital Gleanings; while the "LIBRARY DEPARTMENT" is devoted to publishing standard works on the various branches of medical science, paged separately, so that they can be removed and bound on completion. In this manner subscribers have received, without expense, such works as "WATSON'S PRACTICE,"

* Communications are invited from gentlemen in all parts of the country. Elaborate articles inserted by the Editor are paid for by the Publisher.

"TODD AND BOWMAN'S PHYSIOLOGY," "WEST ON CHILDREN," "MALGAIGNE'S SURGERY," &c. &c. With Jan. 1875, was commenced the publication of Dr. WILLIAM STOKES's new work on FEVER (see p. 7), which will be continued to completion during 1876. New subscribers commencing with Jan. 1876 can obtain the portion printed in 1875 by remitting One Dollar to the publisher.

As stated above, the subscription price of the "MEDICAL NEWS AND LIBRARY" is ONE DOLLAR per annum in advance; and it is furnished without charge to all advance paying subscribers to the "AMERICAN JOURNAL OF THE MEDICAL SCIENCES."

III.

THE MONTHLY ABSTRACT OF MEDICAL SCIENCE.

The "MONTHLY ABSTRACT" is issued on the first of every month, each number containing forty-eight large octavo pages, thus furnishing in the course of the year about six hundred pages. The aim of the ABSTRACT will be to present a careful condensation of all that is new and important in the medical journalism of the world, and all the prominent professional periodicals of both hemispheres will be at the disposal of the Editors. To show the manner in which this plan has been carried out, a condensed summary of the contents of the numbers for the last half of the year 1875, will be found subjoined. In all, during 1875, it has contained—

42	*Articles on*	*Anatomy and Physiology.*
56	"	" *Materia Medica and Therapeutics.*
204	"	" *Medicine.*
183	"	" *Surgery.*
118	"	" *Midwifery and Gynæcology.*
18	"	" *Medical Jurisprudence and Toxicology.*
8	"	" *Hygiene—*

making in all SIX HUNDRED AND TWENTY-NINE articles per annum.

The subscription to the "MONTHLY ABSTRACT," free of postage, is TWO DOLLARS AND A HALF a year, in advance.

As stated above, however, it will be supplied in conjunction with the "AMERICAN JOURNAL OF THE MEDICAL SCIENCES" and the "MEDICAL NEWS AND LIBRARY," making in all more than TWENTY-ONE HUNDRED pages per annum, the whole *free of postage*, for SIX DOLLARS a year, in advance.

Those who desire to have complete sets, can still procure Vol. I. July to December, 1874, 1 vol. 8vo., cloth, of about 300 pages, for $1 50, and Vol. II. for 1875, 1 vol. 8vo. of about 600 pages, cloth, for $3 00.

In this effort to bring so large an amount of practical information within the reach of every member of the profession, the publisher confidently anticipates the friendly aid of all who are interested in the dissemination of sound medical literature. He trusts, especially, that the subscribers to the "AMERICAN MEDICAL JOURNAL" will call the attention of their acquaintances to the advantages thus offered, and that he will be sustained in the endeavor to permanently establish medical periodical literature on a footing of cheapness never heretofore attempted.

PREMIUMS OFFERED TO SUBSCRIBERS.

Any gentleman who will remit the amount for two subscriptions for 1876, one of which must be for a *new subscriber*, will receive as a PREMIUM, free by mail, a copy of "FLINT'S ESSAYS ON CONSERVATIVE MEDICINE" (for advertisement of which see p. 17), or of "STURGES'S CLINICAL MEDICINE" (see p. 28), or of the new edition of "SWAYNE'S OBSTETRIC APHORISMS" (see p. 27), or of "TANNER'S CLINICAL MANUAL" (see p. 30), or of "CHAMBERS'S RESTORATIVE MEDICINE" (see p 13), or of "WEST ON NERVOUS DISORDERS OF CHILDREN" (see page 31).

*** Gentlemen desiring to avail themselves of the advantages thus offered will do well to forward their subscriptions at an early day, in order to insure the receipt of complete sets for the year 1876, as the constant increase in the subscription list almost always exhausts the quantity printed shortly after publication.

☞ The safest mode of remittance is by bank check or postal money order drawn to the order of the undersigned. Where these are not accessible, remittances for the "JOURNAL" may be made at the risk of the publisher, by forwarding in REGISTERED letters. Address

HENRY C. LEA,

Nos. 706 and 708 SANSOM ST., PHILADELPHIA, PA.

CONTENTS

OF THE

MONTHLY ABSTRACT OF MEDICAL SCIENCE,

FOR SIX MONTHS, FROM JULY TO DECEMBER, 1875.

Anatomy and Physiology.

On a Pharyngeal Diverticulum. By Prof. Watson 289
On the Consequences of Section of the Optic Nerve in the Frog. By W. Krenchel . . 289
On Heart-Sounds. By M. Dezautière . . 290
Ligature of the Bile-duct, and on the Blood in Diffuse Hepatitis. By Messrs. Feltz and Ritter 290
Atmospheric Pressure on the Joints. By Prof. Ch. Aeby and Dr. Fr. Schmid . . . 337
Anomalies of the Infraorbital Canal and Nerve. By Prof. Luigi Calori 337
Case of Twin Monstrosity. By Prof. von Buhl. 338
On some Bursæ Mucosæ corresponding to the Trachea, Larynx, and certain Adjacent Parts. By Prof. Luigi Calori 385
Bilateral Irritation of the Pneumogastrics in Man. By Dr. Thanhoffer 386
On the Canals which are supposed to connect the Bloodvessels with the Lymphatics. By J. Tarchanoff 433
Experiments on the Brains of Monkeys, with especial reference to the Localization of Sensory Centres in the Convolutions. By Dr. David Ferrier 433
The Chemistry of the Blood. By M. Gauthier 434
On the Distribution of the Fibres of the Optic Nerve in the Human Retina By Prof. Michel. 481
A Case of Apparent Hermaphrodism. By Dr Schœneberg 481
Complete Transposition of the Viscera. By Dr. Schule 482
On the Migrations and Metamorphoses of the White Corpuscles of the Blood. By Ch. Rouget 482
Absence of the Clavicle. By O. Kappeler . 529
The Lymphatics of the Lung By Dr. Klein . 529
Anatomy and Physiology of the Liver. By Mons. G. Asp 531

Materia Medica and Therapeutics.

The Local Use of Chloral Hydrate. By Charles A. Peabody 291
Conium and its Use in Diseases of the Eye. By Dr. Edward Curtis 292
Chloroform and Nitrite of Amyl. By Dr. F. A. Burrall 293
On the Hemp and Gypsum Splint. By Dr. Beely 294
The Action of Ammonia on the Animal Organism. By Lange 339
Therapeutic Action of the Oleum Aleuritis Triloba. By Dr. Calixto Oxamendi . . . 339
Thymol an Antiseptic and Antifermentative Substance. By Prof. Lewin 340
Impermeable Caoutchouc Dressings. By Dr. Besnier 341
The Continued and the Frequent Dose. By Dr. Edward H. Clarke 387
Jaborandi. By Dr. Ambrosoli 389
Action of Aconitina upon the Heart. By Lewin 390
Damiana—a powerful Aphrodisiac. By Drs. J. J. Caldwell and Charles McQuestin . . 391
The Action of Certain Drugs on the Secretion of Bile. By Prof. Rutherford 435
Diuretics 435
Raw Onion as a Diuretic. By Dr. G. W. Balfour 438
Bromide of Camphor. By M. Pathault . . 439
Nitric Acid as a Caustic in Uterine Practice, and its superiority as such to Nitrate of Silver. By Dr. James Braithwaite 439
On the Action of Salicylic Acid. By Dr. Winter 482
On the Phenate and Salicylate of Quinia. By M. Maury 483
Cucurbitaceos Anthelmintics. By M. Heckel . 483
The Actual Cautery; its Uses and Powers. By Dr. C. E. Brown-Séquard 484
Physiological and Therapeutic Properties of Nitrite of Amyl. By M. Bourneville . . 531
Salicylic Acid as an Antiseptic. By Mr. Callender 532

Medicine.

On Two Interesting Cases of Variola. By Dr. Emmanuel Kramer 295
On Eserine as a Remedy for Chorea. By M. Bouchut 295
The Pathology of Progressive Muscular Atrophy. By Dr. Troisier 296
On a Case of Atrophy of the Right Thenar Eminence with Lesion of the Spinal Cord. By J. L. Prevost and C. David 297
On Auditory Vertigo. By Drs. Brown-Séquard and Labadie-Lagrave 298
On Unilateral Paralysis of the Velum Palati of Central Origin. By Dr. Dumenil . . . 300
On Ipecacuanha Spray in Winter Cough and Bronchitic Asthma By Dr. Sydney Ringer and Mr Wm. Murrell 301
Jaborandi in Pleuritic Effusion. By M. Créquy 302
A Case of Paracentesis of the Pleura, Abdomen, and Pericardium. By MM. Ferari-Bravo and Valtosta 302
A Case of Dilated Heart from Valvular Lesion, in which the Right Ventricle was Tapped by Error, not only without Harm, but with Relief of Symptoms. By Dr. George Evans . 304
On the Mode in which the Circulation of Fecal Matters is Re-established after Ligature of Intestine. By Sales-Girons 305
Paroxysmal Hæmaturia. By Drs. Legg and Warburton Begbie 306
Electricity in the Asphyxia of New-Born Infants. By Dr. Zaunschirm 307
A New Test for Waxy Degeneration. By M. Cornil 307
On Diabetes. By C. Bock and F. A. Hoffmann 342
Treatment of Diabetes Insipidus by Ergot. By Dr. J. M. Da Costa 342
On Melanæmia. By Dr. W. Kornmuller . . 344
Cholera treated with Subcutaneous Injection of Morphia. By Dr. F. Milford . . . 345
The Sensibility of the Skin in Acute Rheumatism. By Dr. V. Drosdoff 346
Gout in some of its Surgical Relations. By Sir James Paget 347
The Treatment of Typhoid Fever by Quinine. By Dr. Corral 350
Gangrene of the Lower Extremity after Diphtheria. By Dr. Moroni 350
The Condition of the Spinal Cord in a Case of Talipes Equinus. By M. Dejerine . . 351
The Influence of Amyl-Nitrite in Melancholia. By Dr. Schramm 352
On the Use of Chloral in the Treatment of Whooping-Cough. By Dr. Greslon . . 352
On the Nature, Varieties, and Etiology of Pulmonary Consumption in the Army. By Mr. Welch 353
Pathogeny of Spontaneous Aneurism. By Prof. Köster 354
Phlebitis following the Hypodermic Use of Ergot in the Treatment of a Fibroid Tumour of the Uterus. By Dr E. P. Allen . . . 355
Sudden Death from Puncture of a Hydatid Cyst. By M. Martineau 535
Intestinal obstruction successfully treated by Gaseous Enemata Dr. Bernardino Torres . 355
On Herpes Zoster. By M. Bucquoy . . . 356
The Cause of some of the Eruptions which have been classed as Hydroa. By Mr. Hutchinson 356
Pernicious Progressive Anæmia By Prof. Immermann 393
A Typhoid Epidemic, apparently arising from Infected Milk. By Dr. Alexander Ogston . 393
Modus Operandi of the Yellow Fever Poison. By Dr. George M. Sternberg 394
Bromide of Potassium in the Treatment of Epilepsy. By Dr. J. Warburton Begbie . . 394

Contents of Monthly Abstract of Med. Science, July—Dec. 1875—(Continued.)

Intermittent Spinal Paralysis. By H. Hartwig 395
Thoracentesis in the Pneumothorax incident to Empyema. By Dr. Austin Flint . . . 395
On a Case of Unusually Rapid Action of the Heart. By Dr. Robert Farquharson . . 396
Remarkable Retardation of Pulse. By Mr. Pugin Thoruton and M. Cornil . . . 399
Hyperidrosis excited by change of Posture By Dr. David Inglis 401
Three Cases of Dilatation of Lymphatic Radicles. By Mr. C. Handfield Jones . . . 402
Kameela as a Remedy for Tapeworms By M. Blondeau 406
Congenital Deficiency of the Peritoneum resulting in Intestinal Obstruction, and simulating an Abdominal Tumour. By Mr. Lawson Tait 407
Molluscum Contagiosum. By Dr. C. Boeck . 407
Nasal Lupus. By Mr. Gay 408
On the Cure of Splenic Leukhæmia by means of Phosphorus. By Dr. Wilson Fox . . . 410
Treatment of Sea-sickness by Chloral. By Dr. L. C. Obet 410
Nitrite of Amyl in Sea-sickness. By Mr. Crochley Clapham 411
Successful Treatment of Locomotor Ataxy. By Dr. G. W. Balfour 412
Peripheric Traumatic Epilepsy. By Dr. Briand 412
Hystero-Epilepsy with Anuria. By M. Bourneville 412
Case of Abnormal Disposition to Sleep alternated with Choreic Movements. By Dr. W. T. Gairdner 413
Electrical Chorea. By Dr. Stefanini . . 414
On an Imperfectly Recognized Combination of Spinal Symptoms. By Dr. Erb . . . 415
Case of Hysteria in a Male. By Dr. Bonnemaison 416
Ménière's Disease. By Dr. Ladreit de Lacharrière 417
Autumnal Catarrh. By Dr. Morrill Wyman . 418
Tracheotomy and Croup in Diphtheria. By Prof. Syme 420
Tincture of Eucalyptus in Gangrene of the Lungs. By M. Bucquoy 421
The Presystolic Murmur 421
Unusually Rapid Action of the Heart. By Dr. John Cavafy 422
Case of Dissecting Aneurism of the Thoracic Aorta. By P. Hedenius 423
Embolic Aneurisms and their analogy to Acute Cardiac Aneurism. By Prof. Ponfick . . 424
A Remarkable Case of Periodical Venesection. By Dr. E. Warren Sawyer 424
Tabetic Arthritis. By M. Charcot . . . 425
Hydrophobia treated by Chloral By Dr. V. Grazi 426
On the Successful Use of Jaborandi in Diabetes Insipidus. By Dr. Laycock 427
On the Use of Tepid Baths in the Febrile Disorders of Infants. By Dr. Meyer . . . 428
Treatment of Acute Rheumatism by Tincture of the Perchloride of Iron. By Dr. J. Russell Reynolds 429
On the Use of Cold Baths in Cerebral Rheumatism By M. Féréol 432
Alterations in the Brain in Typhoid and Typhus Fever. By Dr. Leo Popoff 433
Intra-Cranial Aneurism diagnosticated during Life. By Dr William E. Humble . . 433
On Hypodermic Injection of Ergotine in Certain Cases of Acute Mania. By Dr. A. H. Van Andel 435
On Some Points in the Diagnosis of Sclerosis of the Nervous System. By M. Molière . 436
Nitrite of Amyl in Facial Neuralgia. By Dr. George H. Evans 437
On the Relation between Exophthalmic Goitre and Vitiligo. By Dr. Raynaud . . . 438
Auscultation of the Œsophagus. By Dr. Clifford Allbutt 438
On the Significance of Prolonged Expiration, and on Tenderness on Percussion. By Dr. Solger 440
On Whooping-Cough. By Dr. Nöel Gueneau de Mussy 441
On a Case of Pulsating Empyema. By Dr. Lorenzo Lorenzatti 441
Large Pleuritic Effusions in Phthisis. By M. Leudet 443
On a Case of Puncture of the Pericardium. By M. Villeneuve 444
Chronic Aortitis. By M. Jousset . . . 445
Treatment of Chronic Dysentery. By Dr. Handfield Jones 445
Differential Diagnosis of Intestinal Invagination. By Dr. O. Lachenstein 446
Intestinal Diseases healed by Introduction into the Intestinal Tract of large quantities of Fluid. By Prof. Mosler 447
Presence of a Bruit of Fluctuation and Metallic Tinkling in Abdominal Tumours. By M. Laboulbène 448
Amyloid Disease of the Liver without preceding Purulent Discharge. By Dr. Hayden . 449
Splenic Tumours treated by Injection. By Prof. Mosler 449
On Recurrent Zona. By Dr. Kaposi . . 451
Veruca Senilis. By Dr. I. Neumann . . 452
Papular Erythema related to Rheumatism. By M. Coulard 452
Malarial Hematuria. By Mr. C. R. Francis . 453
Paralysis Agitans and Insular Sclerosis . 454
Case of Paralysis of the Serratus Magnus. By Dr. Samuel Woodman 454
On the Morbid Changes in the Sympathetic in Constitutional Syphilis. By Dr. P. Petrow 455
Disease of the Sympathetic Nerve in the Neck. By Dr. Paul Guttman 456
A New Method of treating Strictures of the Larynx. By Dr. Michael Grossmann . . 457
Rheumatoid Disease in Dilatation of the Bronchi. By C. Gerhardt 457
Gelseminum Sempervirens as a Remedy for Cough. By Dr. J. Roberts Thomson . . 458
On a Case of Suppurative Pneumonia successfully treated by Carbolic Acid and Essential Oil of Turpentine. By Dr. Angelo Cianciosi 458
Treatment of Aneurism of the Arch of the Aorta by means of Galvano-Puncture. By Dr. T. McCall Anderson 458
On a Case of Perforating Ulcer of the Duodenum. By Levertin and Axel Key 460
Treatment of Intestinal Obstruction by Electricity. By Dr. Fleuriot 461
On a Case of Embolism and Disintegrated Thrombus of the Portal System. By G. Bolling 461
Primary Cancer of the Gall-Bladder. By M. Lamètine 462
Treatment of Catarrh of the Urinary Organs accompanied by Ammoniacal Fermentation of the Urine. By Gosselin and Robin . . 463

Surgery.

The Least Sacrifice of Parts as a Principle of Surgical Practice. By Mr. Bryant . . 308
Acute Tetanus treated by Nitrite of Amyl. By Dr. William S. Forbes 309
On a Case of Encephalitis and Interstitial Myelitis with Ulceration of both Corneæ. By Dr. Jacusiel 310
On Sympathetic Ophthalmia. By Dr. Grossman 310
Extirpation of the Tongue. By Dr. Von Langenbeck 311
Removal of a Growth from the Larynx with the Aid of Local Anæsthesia. By Dr. Massei . 311
Intestinal Obstruction; Laparotomy. By Dr. Erskine Mason 312
Removal of the Os Coccygis for Coccyodynia. By Dr. J. C. Irish 312
Statistics of Amputations performed in the Glasgow Royal Infirmary during the Twenty-five Years ending 31st December, 1873. By Dr. Moses Thomas 313
Monstrosity by Inclusion; Successful Excision. By Dr. W. W. Miner 314
Dumreicher's Method of treating Ununited Fracture. By Dr. Carl Nicoladoni . . 315
Treatment of Ununited Fracture by Transplantation of Bone. By Prof. Nussbaum . . 316
The Treatment of False Joint. By Dr. Volkmann 318
Fracture of the Clavicle. By M. Delens . . 318
Sequel to a Paper on Excision of the Ankle-Joint. By Mr. Lee 319
Excessive and Long-maintained High Temperature after Injury to the Spine; Recovery. By Mr. J. W. Teale 320
On a Case of Ligature of the Internal Iliac Artery for Wound of a Branch of the Gluteal. By Dr. Landi 323

Contents of Monthly Abstract of Med. Science, July—Dec. 1875—(Continued.)

Precocious Secondary Traumatisms. By Prof. Verneuil 324
New Forceps for keeping the Eustachian Catheter in position. By Dr. Delstanche-Sohn 325
Transplantation of Skin. By Dr. Clemens . 358
Conjunctival Grafting. By Dr. Masselon . 358
Gonorrhœal Ophthalmia. By Prof. Hirschberg 359
Imperfect Teeth and Zonular Cataract. By Mr. Jonathan Hutchinson 360
On Disease of the Choroid consequent on the Use of Chloral Hydrate. By Dr. Steinheim . 361
On Nystagmus as the Result of Hemeralopia. By Dr. Nieden 362
On Phthisical Otitis. By M. Bellière . . 364
On Anthrax and Furunculus of the Face. By Dr. J. Labattu 364
On Adenoid Vegetations in the Pharyngeal Space. By Prof. Politzer 365
Laparotomy for Intussusception. By Mr. Jos. Bell 365
The Proper Time for Aspiratory Puncture in the Treatment of Strangulated Hernia. By Dr. Bouisson 365
Extirpation of a Tumour of the Bladder. By Dr. Carl Gussenbauer 366
Chylocele. By Dr. C. H. Mastin . . . 367
Arthritis Deformans. By Dr. Duplay . . 368
Five Cases of Resection of the Sternum and Ribs. By Prof. Mazzoni 369
Resection of the Knee after Gunshot Wound. By Dr. Meusel 370
Fracture of Spine; Compression of the Cord; Removal of the Depressed Bone. By Dr H. A. Clark 371
On the Use of Adhesive Plaster in Fracture of the Patella. By Dr. John Neill . . . 372
Histogenesis of Cancer. By Dr. Creighton . 409
Mr. Teale's Case of High Temperature . . 410
On Extraction of Cataract by a Median Section through the Cornea By Dr. Vicente Chiralt 411
An Improved Method of treating certain Cases of Cataract requiring Extraction. By Mr. J. Vose Solomon 411
On Concussion of the Retina, and on Foreign Bodies in the Eyeball. Ry Dr. Hirschberg . 412
Chronic Inflammation of the Lachrymal Sac. By Dr. Sigmund Bacher 413
On a Case of nearly complete Deafness of one Ear after an Apoplectic Seizure. By Dr. J. Hughlings-Jackson 413
On a Slight Modification of the Operation for Closing Fissures of the Soft Palate. By Mr. Edward Bellamy 414
Cyst of the Thyroid Gland cured by Electrolysis after Injections had failed. By Dr. Andrew H. Smith 415
Lithotrity 416
Strangulated Hernia reduced by Taxis through the Colon. By Dr. Alexander Hadden . 417
A Combination of the Cutaneous and Musculo-Cutaneous Plans of Amputation. By Dr. D. Hayes Agnew 418
A New Operation for the Cure of certain cases of Aggravated "Knock-knee." By Mr. Thomas Annandale 419
Duration of Bloodless Operations. By Prof. Langenbeck 420
An Antiphlogistic Method of Dressing Operation Wounds. By Mr. Jonathan Hutchinson 455
The Subperiosteal Method. By Prof. Spence . 455
On a new Operation for the Obliteration of Depressed Cicatrices after Glandular Abscesses or Exfoliation of Bone. By Mr. William Adams 458
On the Origin and Treatment of Purulent Ophthalmia. By Prof. Arlt 459
On Iridectomy as an Aid to the Extraction of Cataract. By Dr. Dezanneau 460
Statistical Review of Operations for Tumours of the Superior Maxilla. By Dr. Ohlemann 461
Excision of the Thyroid Gland. By Dr. P. Heron Watson 461
Case of Recovery after Complete Division of the Larynx and Œsophagus. By S Henschen . 463
A Century of Operations for Stone. By Prof. Dittel 464
Treatment of Ununited Fractures. By Prof. Spence 466
On the Treatment of Club-Foot. By Dr. W. J. Little 466
Removal of Tumours. By Mr. Jas. Spence . 513
Coexistence of Lupus and Carcinoma. By Prof. E. Lang 51

Publishing in the "Medical News and Library" for 1875-1876.

Stokes (William), M.D., D.C.L., F.R.S.,

Regius Professor of Physic in the Univ. of Dublin, etc.

LECTURES ON FEVER, delivered in the Theatre of the Meath Hospital and County of Dublin Infirmary. Edited by JOHN WILLIAM MOORE, M D., Assistant Physician to the Cork St. Fever Hospital. To form one neat octavo volume.

The publication of this work was commenced in the "MEDICAL NEWS AND LIBRARY" for Jan. 1875. It can thus be obtained from the commencement by subscribers to the Am. Journ. Med. Sciences. (See p. 3.)

The great value of Dr. Stokes's lectures lies in the fact that they embody the views which have been formed by a physician acute in observation, and unsurpassed in reflective power—after looking on during half a century at the various visitations of epidemic disease which have passed over this country.—*Dublin Journ. of Med. Science*, June, 1874.

The lectures on treatment ought to be studied by every practitioner of medicine. They teem with practical instructions, which could only emanate from an acute and observant physician, who has had a lifelong experience of fever on the largest scale. We would particularly direct attention to the rules which Dr. Stokes lays down for the feeding of fever patients, and the indications for the use of stimulants derived from those morbid phenomena of the heart and arteries in fever, to which he was the first to call attention. Altogether, the volume is one which will further enhance the great reputation of its author, as well as that of the Dublin School of Medicine.—*British Med. Journ.*, Aug. 29, 1874.

The Obstetrical Journal. (*Free of postage for* 1876.)

THE OBSTETRICAL JOURNAL of Great Britain and Ireland; Including MIDWIFERY, and the DISEASES OF WOMEN AND INFANTS. With an American Supplement, edited by J. V. INGHAM, M.D. A monthly of ninety-six octavo pages, very handsomely printed. Subscription, Five Dollars per annum. Single numbers, 50 cents each.

Commencing with April, 1873, the "OBSTETRICAL JOURNAL" consists of Original Papers and Lectures by British and Foreign Contributors; Transactions of the Obstetrical Societies in Great Britain and abroad; Reports of Hospital Practice; Reviews and Bibliographical Notices; Selections from Journals; Correspondence; Editorial Articles and Notes, Historical, Forensic, and Miscellaneous. The leading representatives of British Obstetrics and Gynæcology have pledged to it their support, and it numbers among its contributors such men as LOMBE ATTHILL, J. H. AVELING, ROBERT BARNES, J. HENRY BENNET, THOMAS CHAMBERS, FLEETWOOD CHURCHILL, CHARLES CLAY, JOHN CLAY, J. MATTHEWS DUNCAN, ARTHUR FARRE, ROBERT GREENHALGH, W. M. GRAILY HEWITT, J. BRAXTON HICKS, WILLIAM LEISHMAN, ALFRED MEADOWS, ALEX. SIMPSON, J. G. SWAYNE, LAWSON TAIT, EDWARD J. TILT, T. SPENCER WELLS, and many other distinguished practitioners. Under such auspices it has amply fulfilled its object of presenting to the physician all that is new and interesting in the rapid development of obstetrical and gynæcological science.

In order to render the "OBSTETRICAL JOURNAL" fully adequate to the wants of the profession in this country, each number contains an "AMERICAN SUPPLEMENT." This portion is under the charge of Dr. J V. INGHAM, to whom all communications, Exchanges, Books for Review, &c., may be addressed, to the care of the undersigned. Articles have appeared in it from Professors R. A. F. PENROSE, D. WARREN BRICKELL, WILLIAM GOODELL, ALBERT H. SMITH, WILLIAM F. JENKS, and other distinguished American obstetricians, and others of equal eminence have promised it their support in the future.

The "OBSTETRICAL JOURNAL," with the "SUPPLEMENT," during the past year has contained over **One Thousand Pages**, very handsomely printed, with numerous wood-cuts and plates, plain, and colored. Its contents have consisted of—

	Articles.
ORIGINAL COMMUNICATIONS	34
REPORTS OF HOSPITAL PRACTICE	14

IN ALL	352

Thus presenting an amount and variety of valuable practical information which it would be difficult to find elsewhere in so convenient and accessible a form.

Subscriptions can commence with January, 1876, but sets for 1875 can no longer be supplied.

We cannot withhold the expression of the admiration this elegant journal excites.—*Western Lancet*, March, 1875.

This is certainly a very excellent journal. It gives us the best obstetrical literature from across the water, while the Supplement supplies the latest of interest in this country.—*Indiana Journ. of Med.*, Nov. 1874.

Ashhurst (John, Jr.), M.D.,

Surgeon to the Episcopal Hospital, Philadelphia.

THE PRINCIPLES AND PRACTICE OF SURGERY. In one very large and handsome octavo volume of about 1000 pages, with nearly 550 illustrations, cloth, $6 50; leather, raised bands, $7 50. (*Lately Published.*)

The object of the author has been to present, within as condensed a compass as possible, a complete treatise on Surgery in all its branches, suitable both as a text-book for the student and a work of reference for the practitioner. So much has of late years been done for the advancement of Surgical Art and Science, that there seemed to be a want of a work which should present the latest aspects of every subject, and which, by its American character, should render accessible to the profession at large the experience of the practitioners of both hemispheres. This has been the aim of the author, and it is hoped that the volume will be found to fulfil its purpose satisfactorily.

Its author has evidently tested the writings and experiences of the past and present in the crucible of a careful, analytic, and honorable mind, and faithfully endeavored to bring his work up to the level of the highest standard of practical surgery. He is frank and definite, and gives us opinions, and generally sound ones, instead of a mere *résumé* of the opinions of others. He is conservative, but not hide-bound by authority. His style is clear, elegant, and scholarly The work is an admirable text-book, and a useful book of reference. It is a credit to American professional literature, and one of the first ripe fruits of the soil fertilized by the blood of our late unhappy war. —*N. Y. Med. Record*, Feb. 1 1872.

Indeed, the work as a whole must be regarded as an excellent and concise exponent of modern surgery, and as such it will be found a valuable text-book for the student, and a useful book of reference for the general practitioner —*N Y. Med. Journal*, Feb 1872.

It gives us great pleasure to call the attention of the profession to this excellent work. Our knowledge of its talented and accomplished author led us to expect from him a very valuable treatise upon subjects to which he has repeatedly given evidence of having profitably devoted much time and labor, and we are in no way disappointed.—*Philadelphia Med. Times*, Feb. 1, 1872.

Attfield (John), Ph.D.,

Professor of Practical Chemistry to the Pharmaceutical Society of Great Britain, &c.

CHEMISTRY, GENERAL, MEDICAL, AND PHARMACEUTICAL; including the Chemistry of the U. S. Pharmacopœia. A Manual of the General Principles of the Science, and their application to Medicine and Pharmacy Fifth Edition, revised by the author. In one handsome royal 12mo. volume; cloth, $2 75; leather, $3 25; (*Lately Issued.*)

No other American publication with which we are acquainted covers the same ground, or does it so well. In addition to an admirable exposé of the facts and principles of general elementary chemistry, the author has presented us with a condensed mass of practical matter, just such as the medical student and practitioner needs.—*Cincinnati Lancet*, Mar. 1874.

This work is characterized as much by its rich contents and its great originality, as by its simple intelligibleness and the skilful manner in which theory and practice are combined.—*Neues Repertorium, für Pharmacie.*

We commend the work heartily as one of the best text-books extant for the medical student.—*Detroit Rev. of Med. and Pharm.*, Feb. 1872.

The best work of the kind in the English language.—*N. Y. Psychological Journal*, Jan. 1872.

The work is constructed with direct reference to the wants of medical and pharmaceutical students; and, although an English work, the points of difference between the British and United States Pharmacopœias are indicated, making it as useful here as in England. Altogether, the book is one we can heartily recommend to practitioners as well as students.—*N. Y. Med. Journal*, Dec. 1871.

It differs from other text books in the following particulars: first, in the exclusion of matter relating to compounds which, at present, are only of interest to the scientific chemist; secondly, in containing the chemistry of every substance recognized officially or in general, as a remedial agent. It will be found a most valuable book for pupils, assistants, and others engaged in medicine and pharmacy, and we heartily commend it to our readers.—*Canada Lancet*, Oct. 1871.

When the original English edition of this work was published, we had occasion to express our high appreciation of its worth, and also to review, in considerable detail, the main features of the book. As the arrangement of subjects, and the main part of the text of the present edition are similar to the former publication, it will be needless for us to go over the ground a second time; we may, however, call attention to a marked advantage possessed by the American work—we allude to the introduction of the chemistry of the preparations of the United States Pharmacopœia, as well as that relating to the British authority.—*Canadian Pharm. Journ.*, Nov. 1871.

Chemistry has borne the name of being a hard subject to master by the student of medicine, and chiefly because so much of it consists of compounds only of interest to the scientific chemist; in this work such portions are modified or altogether left out, and in the arrangement of the subject-matter of the work, practical utility is sought after, and we think fully attained. We commend it for its clearness and order to both teacher and pupil.—*Oregon Med. and Surg. Reporter*, Oct. 1871.

Anderson (McCall), M.D.,

Physician to the Dispensary for Skin Diseases, Glasgow, &c.

ON THE TREATMENT OF DISEASES OF THE SKIN. With an Analysis of Eleven Thousand Consecutive Cases. In one vol. 8vo. $1. (*Lately Published.*)

Ashton (T. J.).

ON THE DISEASES, INJURIES, AND MALFORMATIONS OF THE RECTUM AND ANUS; with remarks on Habitual Constipation. Second American, from the fourth and enlarged London edition. With handsome illustrations. In one very beautifully printed octavo volume of about 300 pages, cloth, $3 25.

ANATOMICAL ATLAS.—SMITH AND HORNER. (See p. 27.)

ASHWELL'S PRACTICAL TREATISE ON THE DISEASES PECULIAR TO WOMEN. Third American, from the Third and revised London edition. 1 vol. 8vo., pp. 528, cloth, $3 50.

BARLOW'S MANUAL OF THE PRACTICE OF MEDICINE. With Additions by D. F. Condie, M.D. 1 vol. 8vo., pp. 600, cloth, $2 50.

Bellamy (E.), F.R.C.S.

THE STUDENT'S GUIDE TO SURGICAL ANATOMY; a Text-Book for Students preparing for their Pass Examination. With Engravings on wood. In one handsome royal 12mo. volume. Cloth, $2 25. (*Just Issued.*)

We welcome Mr. Bellamy's work, as a contribution to the study of regional anatomy, of equal value to the student and the surgeon. It is written in a clear and concise style, and its practical suggestions add largely to the interest attaching to its technical details.—*Chicago Med. Examiner*, March 1, 1874.

We cordially congratulate Mr. Bellamy upon having produced it.—*Med. Times and Gaz.*

We cannot too highly recommend it.—*Student's Journal.*

Mr. Bellamy has spared no pains to produce a really reliable student's guide to surgical anatomy—one which all candidates for surgical degrees may consult with advantage, and which possesses much original matter.—*Med. Press and Circular.*

Blandford (G. Fielding), M.D., F.R.C.P.,

Lecturer on Psychological Medicine at the School of St. George's Hospital, etc.

INSANITY AND ITS TREATMENT; Lectures on the Treatment, Medical and Legal, of Insane Patients. With a Summary of the Laws in force in the United States on the Confinement of the Insane. By Isaac Ray, M.D. In one very handsome octavo volume of 471 pages: cloth, $3 25.

This volume is presented to meet the want, so frequently expressed, of a comprehensive treatise, in moderate compass, on the pathology, diagnosis, and treatment of insanity. To render it of more value to the practitioner in this country, Dr. Ray has added an appendix which affords information, not elsewhere to be found in so accessible a form, to physicians who may at any moment be called upon to take action in relation to patients.

Barnes (Robert), M.D., F.R.C.P.,

Obstetric Physician to St. Thomas's Hospital, &c.

A CLINICAL EXPOSITION OF THE MEDICAL AND SURGICAL DISEASES OF WOMEN.

In one handsome octavo volume of about 800 pages, with 169 illustrations. Cloth, $5 00; leather, $6 00. (*Just Issued.*)

Embodying the long experience and personal observation of one of the greatest of living teachers in diseases of women, it seems pervaded by the presence of the author, who speaks directly to the reader, and speaks, too, as one having authority. And yet, notwithstanding this distinct personality, there is nothing narrow as to time, place, or individuals, in the views presented, and in the instructions given; Dr. Barnes has been an attentive student, not only of European, but also of American literature, pertaining to diseases of females, and enriched his own experience by treasures thence gathered; he seems as familiar, for example, with the writings of Sims, Emmet, Thomas, and Peaslee, as if these eminent men were his countrymen and colleagues, and gives them a credit which must be gratifying to every American physician. — *Am. Journ. Med. Sci.*, April, 1874.

Throughout the whole book it is impossible not to feel that the author has spontaneously, conscientiously, and fearlessly performed his task. He goes direct to the point, and does not loiter on the way to gossip or quarrel with other authors. Dr. Barnes's book will be eagerly read all over the world, and will everywhere be admired for its comprehensiveness, honesty of purpose, and ability.—*The Obstet. Journ. of Great Britain and Ireland*, March, 1874.

Dr. Barnes is not only a practitioner of exceptionally large opportunities, which he has used well, but he has kept himself informed of what has been said and done by others; and he has in the present volume judiciously used this knowledge. We can strongly recommend Dr. Barnes's work to the gynæcological student and practitioner. — *N. Y. Med Record*, June 15, 1874.

There has seldom appeared in the English language a more complete, thorough, and exhaustive treatise on any medical subject than the one now under notice. Dr. Barnes had already established for himself, by his writings and his practice, a position second to none as an obstetric authority. He has had probably the largest operative midwifery experience of any living practitioner, and his name is associated with some of the most important improvements in midwifery practice. The work which has just issued from his pen will go far to establish him as an equal authority in the special department of practice of which he treats. We can only repeat that, as a thoroughly sound, practical, clinical treatise, we know of no English work which can compare to this of Dr. Barnes. To the so-called specialist, as well as to the general practitioner, it will prove a most useful guide.—*London Lancet*, Jan. 10, 1874.

In conclusion, we must express our conviction that, in view of the wide range of subjects compressed into a single volume, this book is admirable for the conciseness and clearness with which practical points are treated, and evidently from a large experience. For students, and, indeed, for a good many of those who for want of time cannot, or for want of inclination will not, be students, it is a safe and satisfactory guide, and no one who attempts to treat the diseases peculiar to women can afford to be without it. The volume is profusely illustrated; many of the cuts are new to gynæcological literature, and most of them are essential adjuncts to the text. —*Boston Med. and Surg. Journ.*, April 17, 1874.

Dr. Barnes's present work is a magnificent contribution to the literature of that branch of the profession with which his name has so long been honorably connected. To attempt, however, an exhaustive analysis of so voluminous a treatise would carry us far beyond all reasonable bounds.—*Glasgow Med. Journ.*, July, 1874.

Bryant (Thomas), F.R.C.S.,

Surgeon to Guy's Hospital.

THE PRACTICE OF SURGERY.

With over Five Hundred Engravings on Wood. In one large and very handsome octavo volume of nearly 1000 pages, cloth, $6 25; leather, raised bands, $7 25. (*Lately Published.*)

Again, the author gives us his own practice, his own beliefs, and illustrates by his own cases, or those treated in Guy's Hospital. This feature adds joint emphasis, and a solidity to his statements that inspire confidence. One feels himself almost by the side of the surgeon, seeing his work and hearing his living words. The views, etc., of other surgeons are considered calmly and fairly, but Mr. Bryant's are adopted. Thus the work is not a compilation of other writings; it is not an encyclopædia, but the plain statements, on practical points, of a man who has lived and breathed and had his being in the richest surgical experience. The whole profession owe a debt of gratitude to Mr. Bryant, for his work in their behalf. We are confident that the American profession will give substantial testimonial of their feelings towards both author and publisher, by speedily exhausting this edition. We cordially and heartily commend it to our friends, and think that no live surgeon can afford to be without it.—*Detroit Review of Med. and Pharmacy*, August, 1873.

As a manual of the practice of surgery for the use of the student, we do not hesitate to pronounce Mr. Bryant's book a first-rate work. Mr. Bryant has a good deal of the dogmatic energy which goes with the clear, pronounced opinions of a man whose reflections and experience have moulded a character not wanting in firmness and decision. At the same time he teaches with the enthusiasm of one who has faith in his teaching; he speaks as one having authority, and herein lies the charm and excellence of his work. He states the opinions of others freely and fairly, yet it is no mere compilation. The book combines much of the merit of the manual with the merit of the monograph. One may recognize in almost every chapter of the ninety-four of which the work is made up the acuteness of a surgeon who has seen much, and observed closely, and who gives forth the results of actual experience. In conclusion we repeat what we stated at first, that Mr. Bryant's book is one which we can conscientiously recommend both to practitioners and students as an admirable work. —*Dublin Journ. of Med Science*, August, 1873.

This is, as the preface states, an entirely new book, and contains in a moderately condensed form all the surgical information necessary to a general practitioner. It is written in a spirit consistent with the present improved standard of medical and surgical science.—*American Journal of Obstetrics*, August, 1873.

Bigelow (Henry J.), M.D.,

Professor of Surgery in the Massachusetts Med. College.

ON THE MECHANISM OF DISLOCATION AND FRACTURE OF THE HIP

With the Reduction of the Dislocation by the Flexion Method. With numerous original illustrations. In one very handsome octavo volume. Cloth, $2 50.

Bumstead (Freeman J.), M.D.,

Professor of Venereal Diseases at the Coll. of Phys. and Surg., New York, etc.

THE PATHOLOGY AND TREATMENT OF VENEREAL DISEASES. Including the results of recent investigations upon the subject. Third edition, revised and enlarged, with illustrations. In one large and handsome octavo volume of over 700 pages, cloth, $5 00; leather, $6 00.

In preparing this standard work again for the press, the author has subjected it to a very thorough revision. Many portions have been rewritten, and much new matter added, in order to bring it completely on a level with the most advanced condition of syphilography, but by careful compression of the text of previous editions, the work has been increased by only sixty-four pages. The labor thus bestowed upon it, it is hoped, will insure for it a continuance of its position as a complete and trustworthy guide for the practitioner.

It is the most complete book with which we are acquainted in the language. The latest views of the best authorities are put forward, and the information is well arranged—a great point for the student, and still more for the practitioner. The subjects of visceral syphilis, syphilitic affections of the eyes, and the treatment of syphilis by repeated inoculations, are very fully discussed.—*Lond. Lancet*, Jan. 7, 1871.

Dr. Bumstead's work is already so universally known as the best treatise in the English language on venereal diseases, that it may seem almost superfluous to say more of it than that a new edition has been issued. But the author's industry has rendered this new edition virtually a new work, and so merits as much special commendation as if its predecessors had not been published. As a thoroughly practical book on a class of diseases which form a large share of nearly every physician's practice, the volume before us is by far the best of which we have knowledge.—*N. Y. Med. Gazette*, Jan. 28, 1871.

It is rare in the history of medicine to find any one book which contains all that a practitioner needs to know; while the possessor of "Bumstead on Venereal" has no occasion to look outside of its covers for anything practical connected with the diagnosis, history, or treatment of these affections.—*N. Y. Med. Journal*, March, 1871.

Cullerier (A.), and Bumstead (Freeman J.),

Surgeon to the Hôpital du Midi.

Professor of Venereal Diseases in the College of Physicians and Surgeons, N. Y.

AN ATLAS OF VENEREAL DISEASES. Translated and Edited by Freeman J. Bumstead. In one large imperial 4to. volume of 328 pages, double-columns, with 26 plates, containing about 150 figures, beautifully colored, many of them the size of life; strongly bound in cloth, $17 00; also, in five parts, stout wrappers for mailing, at $3 per part.

Anticipating a very large sale for this work, it is offered at the very low price of Three Dollars a Part, thus placing it within the reach of all who are interested in this department of practice. Gentlemen desiring early impressions of the plates would do well to order it without delay.

A specimen of the plates and text sent free by mail, on receipt of 25 cents.

We wish for once that our province was not restricted to methods of treatment, that we might say something of the exquisite colored plates in this volume.—*London Practitioner*, May, 1869.

As a whole, it teaches all that can be taught by means of plates and print.—*London Lancet*, March 13, 1869.

Superior to anything of the kind ever before issued on this continent.—*Canada Med. Journ.*, March, '69.

The practitioner who desires to understand this branch of medicine thoroughly should obtain this, the most complete and best work ever published.—*Dominion Med. Journ.*, May, 1869.

This is a work of master hands on both sides. M. Cullerier is scarcely second to, we think we may truly say is a peer of the illustrious and venerable Ricord, while in this country we do not hesitate to say that Dr. Bumstead, as an authority, is without a rival. Assuring our readers that these illustrations tell the whole history of venereal disease, from its inception to its end, we do not know a single medical work which for its kind is more *necessary* for them to have.—*California Med. Gaz.*, March, 1869.

The most splendidly illustrated work in the language, and in our opinion far more useful than the French original.—*Am. Journ. Med. Sci.*, Jan. 1869.

The fifth and concluding number of this magnificent work has reached us, and we have no hesitation in saying that its illustrations surpass those of previous numbers.—*Boston Med. and Surg. Journ.*, Jan. 14, 1869.

Other writers besides M. Cullerier have given us a good acconnt of the diseases of which he treats, but no one has furnished us with such a complete series of illustrations of the venereal diseases. There is, however, an additional interest and value possessed by the volume before us; for it is an American reprint and translation of M. Cullerier's work, with incidental remarks by one of the most eminent American syphilographers, Mr. Bumstead.—*Brit. and For. Med.-Chir. Rev.*, July, 1869.

Bowman (John E.), M.D.

PRACTICAL HANDBOOK OF MEDICAL CHEMISTRY. Edited by C. L. Bloxam, Professor of Practical Chemistry in King's College, London. Sixth American, from the fourth and revised English Edition. In one neat volume, royal 12mo., pp. 351, with numerous illustrations: cloth, $2 25.

By the same Author. (*Lately Issued.*)

INTRODUCTION TO PRACTICAL CHEMISTRY, INCLUDING ANALYSIS. Sixth American, from the sixth and revised London edition. Edited by C. L. Bloxam, Prof. of Practical Chemistry in King's College, London. With numerous illustrations. In one neat vol., royal 12mo., cloth, $2 25.

Basham (W. R.), M.D.,

Senior Physician to the Westminster Hospital, etc.

RENAL DISEASES: a Clinical Guide to their Diagnosis and Treatment. With illustrations. In one neat royal 12mo. volume of 304 pages: cloth, $2 00.

Bloxam (C. L.),

Professor of Chemistry in King's College, London.

CHEMISTRY, INORGANIC AND ORGANIC. From the Second London Edition. In one very handsome octavo volume, of 700 pages, with about 300 illustrations. Cloth, $4 00; leather, $5 00. (*Lately Issued.*)

It has been the author's endeavor to produce a Treatise on Chemistry sufficiently comprehensive for those studying the science as a branch of general education, and one which students may use with advantage in pursuing their chemical studies in the colleges or medical schools. The special attention devoted to Metallurgy and some other branches of Applied Chemistry renders the work especially useful to those who are being educated for employment in manufacture.

We have spoken of the work as admirably adapted to the wants of students; it is quite as well suited to the wants of practitioners who wish to review their chemistry, or have occasion to refresh their memories on any point relating to it. In a word, it is a book to be read by all who wish to know what is the chemistry of the present day.—*Am. Practitioner*, Nov. 1873.

We cordially welcome this American reprint of a work which has already won for itself so substantial a reputation in England. Professor Bloxam has condensed into a wonderfully small compass all the important principles and facts of chemical science. The details of illustrative experiment have been worked up with especial care, and many of the experiments described are both new and striking.—*Detroit Rev. of Med. and Pharm.*, Nov. 1873.

It would be difficult for a practical chemist and teacher to find any material fault with this most admirable treatise. The author has given us almost a cyclopedia within the limits of a convenient volume, and has done so without penning the *useless* paragraphs too commonly making up a great part of the bulk of many cumbrous works. Altogether, it is seldom you see a text book so nearly faultless.—*Cincinnati Lancet*, Nov. 1873.

Professor Bloxam has given us a most excellent and useful practical treatise. His 666 pages are crowded with facts and experiments, nearly all well chosen, and many quite new, even to scientific men. . . . It is astonishing how much information he often conveys in a few paragraphs. We might quote fifty instances of this.—*Lond. Chemical News*

Brinton (William), M.D., F.R.S.

LECTURES ON THE DISEASES OF THE STOMACH; with an Introduction on its Anatomy and Physiology. From the second and enlarged London edition. With illustrations on wood. In one handsome octavo volume of about 300 pages: cloth, $3 25.

Bristowe (John Syer) M.D., F.R.C.P.,

Physician and Joint Lecturer on Medicine, St. Thomas's Hospital.

A MANUAL OF THE PRACTICE OF MEDICINE. Edited, with Additions, by JAMES H. HUTCHINSON, M.D., Physician to the Penna. Hospital. In one handsome octavo volume. (*Nearly Ready.*)

Carter (R. Brudenell), F.R.C.S.,

Ophthalmic Surgeon to St George's Hospital, etc.

A PRACTICAL TREATISE ON DISEASES OF THE EYE. Edited, with Additions, by JOHN GREEN, M.D. (of St. Louis, Mo). With test-types and numerous illustrations In one handsome octavo volume. (*Nearly Ready.*)

The object of the author has been to produce, within a moderate compass, a work which should serve the purposes of the general practitioner by giving, "in a concise and readable form, a general view of the present state of knowledge with regard to the nature and treatment of the more important diseases of the eye." That he has fully succeeded in his effort is shown by the commendation which the volume has received wherever its merits have become known.

It would be difficult for Mr. Carter to write an uninstructive book, and impossible for him to write an uninteresting one. Even on subjects with which he is not bound to be familiar, he can discourse with a rare degree of clearness and effect. Our readers will therefore not be surprised to learn that a work by him on the Diseases of the Eye makes a very valuable addition to ophthalmic literature. . . . The book will remain one useful alike to the general and the special practitioner. Not the least valuable result which we expect from it is that it will to some considerable extent despecialize this brilliant department of medicine —*London Lancet*, Oct. 30, 1875.

It is with great pleasure that we can endorse the work as a most valuable contribution to practical ophthalmology. Mr. Carter never deviates from the end he has in view, and presents the subject in a clear and concise manner, easy of comprehension, and hence the more valuable. We would especially commend, however, as worthy of high praise, the manner in which the therapeutics of disease of the eye is elaborated, for here the author is particularly clear and practical, where other writers are unfortunately too often deficient. The final chapter is devoted to a discussion of the uses and selection of spectacles, and is admirably compact, plain, and useful, especially the paragraphs on the treatment of presbyopia and myopia. In conclusion, our thanks are due the author for many useful hints in the great subject of ophthalmic surgery and therapeutics, a field where of late years we glean but a few grains of sound wheat from a mass of chaff.—*N. Y. Med. Record*, Oct. 23, 1875.

Condie (D. Francis), M.D.

A PRACTICAL TREATISE ON THE DISEASES OF CHILDREN. Sixth edition, revised and augmented. In one large octavo volume of nearly 800 closely printed pages, cloth, $5 25; leather, $6 25.

Chambers (T. K.), M.D.,

Consulting Physician to St. Mary's Hospital, London, &c.

A MANUAL OF DIET IN HEALTH AND DISEASE. In one handsome octavo volume, cloth, $2 75. (*Now Ready.*)

The aims of this handbook are purely practical, and therefore it has not been thought right to increase its size by the addition of the chemical, botanical, and industrial learning which rapidly collects round the nucleus of every article interesting as an eatable. Space has been thus gained for a full discussion of many matters connecting food and drink with the daily current of social life, which the position of the author as a practising physician has led him to believe highly important to the present and future of our race.—(*Preface.*)

In compiling this small but comprehensive manual Dr. Chambers has laid the profession under a debt of gratitude to him. He writes on the subject like one who has given his mind to it, and therefore is entitled to speak with authority. As a pioneer Dr. Chambers deserves much credit; he has opened up a new field of which others will no doubt avail themselves. Taken altogether this work is one which gives, in an agreeable form, much valuable information on a most important subject, and ought to have a large sale both in the profession and out of it.—*London Med. Record*, May 19, 1875.

In thorough mastery of the subjects upon which he writes, and in the happy command of language to convey his meaning in the fewest possible words, he is certainly unexcelled and rarely equalled by any writer in the English language. It is altogether a work of rare excellence, and should, as it doubtless will, speedily find a place on the table of every physician.—*The N. Y. Sanitarian*, June, 1875.

This work is a substantial addition to our standard works, and not only should the neat little volume find a place in the most restricted libraries, but its contents ought to be read, marked, learned, and inwardly digested by each practitioner, until they have become woven into the web of the ordinary every day thought of all medical men who truly love their profession.—*Lond. Practitioner*, June, '75.

By the same Author. (*Lately Published.*)

RESTORATIVE MEDICINE. An Harveian Annual Oration. With Two Sequels. In one very handsome volume, small 12mo., cloth, $1 00.

Cullerier (A.), and Bumstead (Freeman J.)

AN ATLAS OF VENEREAL DISEASES. (*See* p 11.)

Carpenter (William B.), M.D., F.R.S.,

Examiner in Physiology and Comparative Anatomy in the University of London.

PRINCIPLES OF HUMAN PHYSIOLOGY; with their chief applications to Psychology, Pathology, Therapeutics, Hygiene, and Forensic Medicine. A new American, from the last and revised London edition. With nearly three hundred illustrations. Edited, with additions, by Francis Gurney Smith, M.D., Professor of the Institutes of Medicine in the University of Pennsylvania, &c. In one very large and beautiful octavo volume, of about 900 large pages, handsomely printed; cloth, $5 50; leather, raised bands, $6 50.

CARPENTER'S PRIZE ESSAY ON THE USE OF Alcoholic Liquors in Health and Disease. New edition, with a Preface by D. F. Condie, M.D., and explanations of scientific words. In one neat 12mo. volume, pp. 178, cloth. 60 cents.

COOPER'S LECTURES ON THE PRINCIPLES AND Practice of Surgery. In 1 vol. 8vo., cloth, 750 pp., $200.

CHURCHILL'S ESSAYS ON THE PUERPERAL FEVER, AND OTHER DISEASES PECULIAR TO WOMEN. 1 vol. 8vo., of 450 pages. Cloth, $2 50

CHURCHILL ON THE THEORY AND PRACTICE OF MEDICINE. A new American, from the fourth revised and enlarged London edition. With notes and additions by D. Francis Condie, M.D. With one hundred and ninety-four illustrations. In one very handsome octavo volume of nearly 700 pages. Cloth, 4 00; leather, $5 00.

CHRISTISON'S DISPENSATORY. With copious additions, and 213 large wood engravings. By R. Egleseld Griffith, M.D. One vol. 8vo., pp. 1000; cloth, $4 00.

Davis (Nathan S.),

Prof. of Principles and Practice of Medicine, etc., in Chicago Med. College.

CLINICAL LECTURES ON VARIOUS IMPORTANT DISEASES. Being a Collection of the Clinical Lectures delivered in the Medical Wards of Mercy Hospital, Chicago. Edited by Frank H. Davis, M.D. Second Edition, enlarged. In one handsome royal 12mo. volume: cloth, $1 75. (*Now Ready.*)

Chicago is such a wonderful place that we are prepared to hear almost anything of it, but we were scarcely prepared to receive from it such an excellent little volume of clinical lectures as we have here, and which we commend to all clinical students and practitioners. We commend Dr. Davis's lectures to the attention of our readers. The whole book, we repeat, is valuable as the outcome of thirty years of intelligent practice.—*London Lancet*, May 29, 1875.

Dunglison, Forbes, Tweedie, and Conolly.

THE CYCLOPÆDIA OF PRACTICAL MEDICINE: comprising Treatises on the Nature and Treatment of Diseases, Materia Medica and Therapeutics, Diseases of Women and Children, Medical Jurisprudence, etc. etc. In four super-royal octavo volumes, of 3254 double-columned pages, strongly and handsomely bound in leather, $15; cloth, $11.

Dunglison (Robley), M.D.,

Late Professor of Institutes of Medicine in Jefferson Medical College, Philadelphia.

MEDICAL LEXICON; A DICTIONARY OF MEDICAL SCIENCE; Containing a concise explanation of the various Subjects and Terms of Anatomy, Physiology, Pathology, Hygiene, Therapeutics, Pharmacology, Pharmacy, Surgery, Obstetrics, Medical Jurisprudence, and Dentistry. Notices of Climate and of Mineral Waters; Formulæ for Officinal, Empirical, and Dietetic Preparations; with the Accentuation and Etymology of the Terms, and the French and other Synonymes; so as to constitute a French as well as English Medical Lexicon. A New Edition. Thoroughly Revised, and very greatly Modified and Augmented. By RICHARD J. DUNGLISON, M.D. In one very large and handsome royal octavo volume of over 1100 pages. Cloth, $6 50; leather, raised bands, $7 50. (*Just Issued.*)

The object of the author from the outset has not been to make the work a mere lexicon or dictionary of terms, but to afford, under each, a condensed view of its various medical relations, and thus to render the work an epitome of the existing condition of medical science. Starting with this view, the immense demand which has existed for the work has enabled him, in repeated revisions, to augment its completeness and usefulness, until at length it has attained the position of a recognized and standard authority wherever the language is spoken.

Special pains have been taken in the preparation of the present edition to maintain this enviable reputation. During the ten years which have elapsed since the last revision, the additions to the nomenclature of the medical sciences have been greater than perhaps in any similar period of the past, and up to the time of his death the author labored assiduously to incorporate everything requiring the attention of the student or practitioner. Since then, the editor has been equally industrious, so that the additions to the vocabulary are more numerous than in any previous revision. Especial attention has been bestowed on the accentuation, which will be found marked on every word. The typographical arrangement has been much improved, rendering reference much more easy, and every care has been taken with the mechanical execution. The work has been printed on new type, small but exceedingly clear, with an enlarged page, so that the additions have been incorporated with an increase of but little over a hundred pages, and the volume now contains the matter of at least four ordinary octavos.

A book well known to our readers, and of which every American ought to be proud. When the learned author of the work passed away, probably all of us feared lest the book should not maintain its place in the advancing science whose terms it defines. Fortunately, Dr. Richard J. Dunglison, having assisted his father in the revision of several editions of the work, and having been, therefore, trained in the methods and imbued with the spirit of the book, has been able to edit it, not in the patchwork manner so dear to the heart of book editors, so repulsive to the taste of intelligent book readers, but to edit it as a work of the kind should be edited—to carry it on steadily, without jar or interruption, along the grooves of thought it has travelled during its lifetime. To show the magnitude of the task which Dr. Dunglison has assumed and carried through, it is only necessary to state that more than six thousand new subjects have been added in the present edition. Without occupying more space with the theme, we congratulate the editor on the successful completion of his labors, and hope he may reap the well-earned reward of profit and honor.—*Phila. Med. Times*, Jan. 3, 1874.

A work to which there is no equal in the English language.—*Edinburgh Med. Journal.*

About the first book purchased by the medical student is the Medical Dictionary. The lexicon explanatory of technical terms is simply a *sine qua non*. In a science so extensive, and with such collaterals as medicine, it is as much a necessity also to the practising physician. To meet the wants of students and most physicians, the dictionary must be condensed while comprehensive, and practical while perspicacious. It was because Dunglison's met these indications that it became at once the dictionary of general use wherever medicine was studied in the English language. In no former revision have the alterations and additions been so great. More than six thousand new subjects and terms have been added. The chief terms have been set in black letter, while the derivatives follow in small caps; an arrangement which greatly facilitates reference. We may safely confirm the hope ventured by the editor "that the work, which possesses for him a filial as well as an individual interest, will be found worthy a continuance of the position so long accorded to it as a standard authority."—*Cincinnati Clinic*, Jan. 10, 1874.

With a history of forty years of unexampled success and universal indorsement by the medical profession of the western continent, it would be presumption in any living medical American to essay its review. No reviewer, however able, can add to its fame; no captious critic, however caustic, can remove a single stone from its firm and enduring foundation. It is destined, as a colossal monument, to perpetuate the solid and richly deserved fame of Robley Dunglison to coming generations. The large additions made to the vocabulary, we think, will be welcomed by the profession as supplying the want of a lexicon fully up with the march of science, which has been increasingly felt for some years past. The accentuation of terms is very complete, and, as far as we have been able to examine it, very excellent. We hope it may be the means of securing greater uniformity of pronunciation among medical men.—*Atlanta Med. and Surg. Journ.*, Feb. 1874.

Few works of the class exhibit a grander monument of patient research and of scientific lore. The extent of the sale of this lexicon is sufficient to testify to its usefulness, and to the great service conferred by Dr. Robley Dunglison on the profession, and indeed on others, by its issue.—*London Lancet.*

It has the rare merit that it certainly has no rival in the English language for accuracy and extent of references.—*London Medical Gazette.*

By the same Author.

HUMAN PHYSIOLOGY. Eighth edition. Thoroughly revised and extensively modified and enlarged, with five hundred and thirty-two illustrations. In two large and handsomely printed octavo volumes of about 1500 pages: cloth, $7 00.

By the same Author.

NEW REMEDIES: WITH FORMULÆ FOR THEIR PREPARATION AND ADMINISTRATION. Seventh edition, with extensive additions. 1 vol. 8vo., pp. 770: cloth, $4 00.

Dalton (J. C.), M.D.,

Professor of Physiology in the College of Physicians and Surgeons, New York, etc.

A TREATISE ON HUMAN PHYSIOLOGY. Designed for the use of Students and Practitioners of Medicine. Sixth Edition, thoroughly revised and enlarged. In one very beautiful octavo volume of 830 pages. With 316 illustrations on wood. cloth, $5 50; leather, $6 50. (*Now Ready*)

In the preparation of this edition the author has spared no pains to render it worthy a continuance of the very remarkable favor which it has thus far enjoyed. Every portion has been subjected to a careful revision for the purpose of making it a clear and accurate exposition of the most advanced condition of scientific knowledge in so far as its results can be stated with certainty. To accomplish this has required a considerable increase in the amount of the text, resulting, in spite of the author's efforts at condensation, in an enlargement equivalent to fully one-half of the previous edition. A change in the typographical arrangement, however, has accommodated these extensive additions without rendering the volume unwieldy in size The series of illustrations has also been very greatly improved, not only by the introduction of additional figures, but by the substitution of new and more perfect ones for others which were deemed unsatisfactory. Every care has been taken in the mechanical execution of the volume, and it is confidently presented as one of the handsomest productions of the American press.

During the past few years several new works on physiology, and the new editions of old works, have appeared, competing for the favor of the medical student, but none will rival this new edition of Dalton. As now enlarged, it will be found also to be, in general, a satisfactory work of reference for the practitioner.—*Chicago Med. Journ. and Examiner*, Jan. 1876

Prof. Dalton has discussed conflicting theories and conclusions regarding physiological questions with a fairness, a fulness, and a conciseness which lend freshness and vigor to the entire book. But his discussions have been so guarded by a refusal of admission to those speculative and theoretical explanations, which at best exist in the minds of observers themselves as only probabilities, that none of his readers need be led into grave errors while making them a study.—*The Medical Record*, Feb. 19, 1876.

The revision of this great work has brought it forward with the physiological advances of the day, and renders it, as it has ever been, the finest work for students extant.—*Nashville Journ. of Med. and Surg.*, Jan. 1876.

For clearness and perspicuity, Dalton's Physiology commended itself to the student years ago, and was a pleasant relief from the verbose productions which it supplanted. Physiology has, however, made many advances since then—and while the style has been preserved intact, the work in the present edition has been brought up fully abreast of the times. The new chemical notation and nomenclature have also been introduced into the present edition. Notwithstanding the multiplicity of text-books on physiology, this will lose none of its old time popularity. The mechanical execution of the work is all that could be desired.—*Peninsular Journ. of Med.*, Dec. 1875.

This popular text-book on physiology comes to us in its sixth edition with the addition of about fifty per cent. of new matter, chiefly in the departments of pathological chemistry and the nervous system, where the principal advances have been realized With so thorough revision and additions, that keep the work well up to the times, its continued popularity may be confidently predicted, notwithstanding the competition it may encounter The publisher's work is admirably done.—*St. Louis Med. and Surg. Journ.*, Dec. 1875

We heartily welcome this, the sixth edition of this admirable text-book, than which there are none of equal brevity more valuable. It is cordially recommended by the Professor of Physiology in the University of Louisiana, as by all competent teachers in the United States and wherever the English language is read, this book has been appreciated. The present edition, with its 316 admirably executed illustrations, has been carefully revised and very much enlarged, although its bulk does not seem perceptibly increased.—*New Orleans Medical and Surgical Journal*, March, 1876.

The present edition is very much superior to every other, not only in that it brings the subject up to the times, but that it does so more fully and satisfactorily than any previous edition. Take it altogether, it remains in our humble opinion the best text-book on physiology in any land or language.—*The Clinic*, Nov 6, 1875.

Druitt (Robert), M.R.C.S., &c.

THE PRINCIPLES AND PRACTICE OF MODERN SURGERY. From the eighth enlarged and improved London edition. Illustrated with four hundred and thirty-two wood engravings. In one very handsome octavo volume of nearly 700 large and closely printed pages: cloth, $4 00; leather, $5 00.

All that the surgical student or practitioner could desire.—*Dublin Quarterly Journal.*

It is a most admirable book. We do not know when we have examined one with more pleasure.—*Boston Med. and Surg. Journal.*

In Mr. Druitt's book, though containing only some seven hundred pages, both the principles and the practice of surgery are treated, and so clearly and perspicuously, as to elucidate every important topic. We have examined the book most thoroughly, and can say that this success is well merited. His book, moreover, possesses the inestimable advantages of having the subjects perfectly well arranged and classified, and of being written in a style at once clear and succinct.—*Am. Journ. of Med. Sciences.*

DEWEES ON THE PHYSICAL AND MEDICAL TREATMENT OF CHILDREN. Eleventh edition. 1 vol. 8vo of 548 pages. Cloth, $2 80

DE JONGH ON THE THREE KINDS OF COD-LIVER OIL, with their Chemical and Therapeutic Properties, 1 vol. 12mo., cloth. 75 cents.

DEWEES'S TREATISE ON THE DISEASES OF FEMALES. With illustrations. Eleventh Edition, with the Author's last improvements and corrections In one octavo volume of 536 pages, with plates, cloth. $3 00.

Ellis (Benjamin), M.D.

THE MEDICAL FORMULARY; being a Collection of Prescriptions derived from the writings and practice of many of the most eminent physicians of America and Europe. Together with the usual Dietetic Preparations and Antidotes for Poisons. The whole accompanied with a few brief Pharmaceutic and Medical Observations. Twelfth edition, carefully revised and much improved by ALBERT H. SMITH, M.D. In one volume 8vo. of 376 pages: cloth, $3 00.

Erichsen (John E.),

Professor of Surgery in University College, London, etc.

THE SCIENCE AND ART OF SURGERY; being a Treatise on Surgical Injuries, Diseases, and Operations. Revised by the author from the Sixth and enlarged English Edition. Illustrated by over seven hundred engravings on wood. In two large and beautiful octavo volumes of over 1700 pages: cloth, $9; leather, $11. (*Lately Issued.*)

From the Author's Preface to the New American Edition.

"The favorable reception with which the 'Science and Art of Surgery' has been honored by the Surgical Profession in the United States of America has been not only a source of deep gratification and of just pride to me, but has laid the foundation of many professional friendships that are amongst the most agreeable and valued recollections of my life.

"I have endeavored to make the present edition of this work more deserving than its predecessors of the favor that has been accorded to them. In consequence of the delays that have unavoidably occurred in the publication of the Sixth British Edition, time has been afforded to me to add to this one several paragraphs which I trust will be found to increase the practical value of the work."

LONDON, Oct. 1872.

On no former edition of this work has the author bestowed more pains to render it a complete and satisfactory exposition of British Surgery in its modern aspects. Every portion has been sedulously revised, and a large number of new illustrations have been introduced. In addition to the material thus added to the English edition, the author has furnished for the American edition such material as has accumulated since the passage of the sheets through the press in London, so that the work, as now presented to the American profession, contains his latest views and experience.

The increase in the size of the work has seemed to render necessary its division into two volumes. Great care has been exercised in its typographical execution, and it is confidently presented as in every respect worthy to maintain the high reputation which has rendered it a standard authority on this department of medical science.

These are only a few of the points in which the present edition of Mr. Erichsen's work surpasses its predecessors. Throughout there is evidence of a laborious care and solicitude in seizing the passing knowledge of the day, which reflects the greatest credit on the author, and much enhances the value of his work. We can only admire the industry which has enabled Mr. Erichsen thus to succeed, amid the distractions of active practice, in producing emphatically THE book of reference and study for British practitioners of surgery.—*London Lancet*, Oct. 26, 1872.

The entire work, complete, as the great English treatise on Surgery of our own time, is, we can assure our readers, equally well adapted for the most junior student, and, as a book of reference, for the advanced practitioner.—*Dublin Quarterly Journal.*

This excellent standard work on surgery has for many years deservedly been the favorite text-book with the vast mass of American as well as English medical students. The present is a thoroughly revised and enlarged edition. No effort has been spared to make it a complete exposition of the Science and Art of Surgery, and no work on the subject is better adapted, either for a text-book for students, or work of reference for practitioners.—*St. Louis Med. Archives*, May, 1873.

For years past American students have regarded "Erichsen" as *the* surgical text-book *par excellence*. To the general practitioner the present edition is decidedly more valuable than its predecessors, although its main features of course are the same.—*Cincinnati Clinic*, March 22, 1873.

The present edition places the work fully abreast of the times in all improvements in modern surgery. Many chapters are rewritten and re-arranged, and much useful matter has been added. The work has always been held in high estimation in the past, and the present edition fully entitles it to the confidence and support of the profession as a work of reference. —*Chicago Med. Examiner*, April 15, 1873.

Fownes (George), Ph.D.

A MANUAL OF ELEMENTARY CHEMISTRY; Theoretical and Practical. With one hundred and ninety-seven illustrations, A new American, from the tenth and revised London edition. Edited by ROBERT BRIDGES, M.D. In one large royal 12mo. volume, of about 850 pages: cloth, $2 75; leather, $3 25. (*Lately Issued.*)

This work is so well known that it seems almost superfluous for us to speak about it. It has been a favorite text-book with medical students for years, and its popularity has in no respect diminished. Whenever we have been consulted by medical students, as has frequently occurred, what treatise on chemistry they should procure, we have always recommended Fownes', for we regarded it as the best. There is no work that combines so many excellences. It is of convenient size, not prolix, of plain, perspicuous diction, contains all the most recent discoveries, and is of moderate price.—*Cincinnati Med. Repertory*, Aug. 1869.

Large additions have been made, especially in the department of organic chemistry, and we know of no other work that has greater claims on the physician, pharmaceutist, or student, than this. We cheerfully recommend it as the best text-book on elementary chemistry, and bespeak for it the careful attention of students of pharmacy.—*Chicago Pharmacist*, Aug. 1869.

Here is a new edition which has been long watched for by eager teachers of chemistry. In its new garb, and under the editorship of Mr. Watts, it has resumed its old place as the most successful of text-books.—*Indian Medical Gazette*, Jan. 1, 1869.

It will continue, as heretofore, to hold the first rank as a text-book for students of medicine.—*Chicago Med. Examiner*, Aug. 1869.

Fox (Wilson), M.D.,

Holme Prof. of Clinical Med., University Coll., London.

THE DISEASES OF THE STOMACH: Being the Third Edition of the "Diagnosis and Treatment of the Varieties of Dyspepsia." Revised and Enlarged. With Illustrations. In one handsome octavo volume: cloth, $2 00. (*Now Ready*)

Dr. Fox has put forth a volume of uncommon excellence, which we feel very sure will take a high rank among works that treat of the stomach.—*Am. Practitioner*, March, 1873.

Flint (Austin), M.D.,

Professor of the Principles and Practice of Medicine in Bellevue Med. College, N. Y.

A TREATISE ON THE PRINCIPLES AND PRACTICE OF MEDICINE; designed for the use of Students and Practitioners of Medicine. Fourth edition, revised and enlarged. In one large and closely printed octavo volume of about 1100 pages: cloth, $6 00; or strongly bound in leather, with raised bands, $7 00. (*Just Issued.*)

By common consent of the English and American medical press, this work has been assigned to the highest position as a complete and compendious text-book on the most advanced condition of medical science. At the very moderate price at which it is offered it will be found one of the cheapest volumes now before the profession.

This excellent treatise on medicine has acquired for itself in the United States a reputation similar to that enjoyed in England by the admirable lectures of Sir Thomas Watson. It may not possess the same charm of style, but it has like solidity, the fruit of long and patient observation, and presents kindred moderation and eclecticism. We have referred to many of the most important chapters, and find the revision spoken of in the preface is a genuine one, and that the author has very fairly brought up his matter to the level of the knowledge of the present day. The work has this great recommendation, that it is in one volume, and therefore will not be so terrifying to the student as the bulky volumes which several of our English text-books of medicine have developed into. —*British and For. Med.-Chir. Rev.*, Jan. 1875.

It is of course unnecessary to introduce or eulogize this now standard treatise. All the colleges recommend it as a text-book, and there are few libraries in which one of its editions is not to be found. The present edition has been enlarged and revised to bring it up to the author's present level of experience and reading. His own clinical studies and the latest contributions to medical literature both in this country and in Europe, have received careful attention, so that some portions have been entirely rewritten, and about seventy pages of new matter have been added. —*Chicago Med. Journ.*, June, 1873.

Has never been surpassed as a text-book for students and a book of ready reference for practitioners. The force of its logic, its simple and practical teachings, have left it without a rival in the field.—*N. Y. Med. Record*, Sept. 15, 1874.

Flint's Practice of Medicine has become so fixed in its position as an American text-book that little need be said beyond the announcement of a new edition. It may, however, be proper to say that the author has improved the occasion to introduce the latest contributions of medical literature together with the results of his own continued clinical observations. Not so extended as many of the standard works on practice, it still is sufficiently complete for all ordinary reference, and we do not know of a more convenient work for the busy general practitioner.—*Cincinnati Lancet and Observer*, June, 1873.

Prof. Flint, in the fourth edition of his great work, has performed a labor reflecting much credit upon himself, and conferring a lasting benefit upon the profession. The whole work shows evidence of thorough revision, so that it appears like a new book written expressly for the times. For the general practitioner and student of medicine, we cannot recommend the book in too strong terms.—*N. Y. Med. Journ.*, Sept. 1873.

It is given to very few men to tread in the steps of Austin Flint, whose single volume on medicine, though here and there defective, is a masterpiece of lucid condensation and of general grasp of an enormously wide subject. —*London Practitioner*, Dec. 1873.

By the same Author. (*Just Issued.*)

PHTHISIS: ITS MORBID ANATOMY, ETIOLOGY, SYMPTOMATIC EVENTS AND COMPLICATIONS, FATALITY, AND PROGNOSIS, TREATMENT AND PHYSICAL DIAGNOSIS: in a series of Clinical Studies. In one handsome octavo volume. $3 50.

This book contains an analysis, in the author's lucid style, of the notes which he has made in several hundred cases in hospital and private practice. We commend the book to the perusal of all interested in the study of this disease.—*Boston Med. and Surg. Journ.*, Feb. 10, 1876.

It is a rich contribution to the study of the most destructive of diseases, and should be in the hands of every medical practitioner.—*Pacific Med. and Surg. Journ.*, Feb 1876.

The name of the author is a sufficient guarantee that this book is of practical value to both student and practitioner. While the author takes issue with many of the leading minds of the day on important questions arising in the study of phthisis, the strong testimony of experience and authority will have great weight with the seeker after truth. As the result of clinical study, the work is unequalled.—*St. Louis Med. and Surg. Journ.*, March, 1876.

By the same Author.

ESSAYS ON CONSERVATIVE MEDICINE AND KINDRED TOPICS. In one very handsome royal 12mo. volume. Cloth, $1 38. (*Just Issued.*)

By the same Author.

A PRACTICAL TREATISE ON THE DIAGNOSIS, PATHOLOGY, AND TREATMENT OF DISEASES OF THE HEART. Second revised and enlarged edition. In one octavo volume of 550 pages, with a plate; cloth, $4 00.

The author has sedulously improved the opportunity afforded him of revising this work. Portions of it have been rewritten, and the whole brought up to a level with the most advanced condition of science. It must, therefore, continue to maintain its position as the standard treatise on the subject.

By the same Author.

A PRACTICAL TREATISE ON THE PHYSICAL EXPLORATION OF THE CHEST AND THE DIAGNOSIS OF DISEASES AFFECTING THE RESPIRATORY ORGANS. Second and Revised Edition. In one handsome octavo volume of 595 pages: cloth, $4 50.

Dr. Flint's treatise is one of the most trustworthy guides which we can consult. The style is clear and distinct, and is also concise, being free from that tendency to over-refinement and unnecessary minuteness which characterizes many works on the same subject.—*Dublin Medical Press*, Feb. 6, 1867.

Fenwick (Samuel), M.D.,

Assistant Physician to the London Hospital.

THE STUDENT'S GUIDE TO MEDICAL DIAGNOSIS From the Third Revised and Enlarged English Edition. With eighty-four illustrations on wood. In one very handsome volume, royal 12mo., cloth, $2 25. (*Just Issued.*)

The very great success which this work has obtained in England, shows that it has supplied an admitted want among elementary books for the guidance of students and junior practitioners. Taking up in order each portion of the body or class of disease, the author has endeavored to present in simple language the value of symptoms, so as to lead the student to a correct appreciation of the pathological changes indicated by them. The latest investigations have been carefully introduced into the present edition, so that it may fairly be considered as on a level with the most advanced condition of medical science.

Of the many guide-books on medical diagnosis, claimed to be written for the special instruction of students, this is the best. The author is evidently a well-read and accomplished physician, and he knows how to teach practical medicine. The charm of simplicity is not the least interesting feature in the manner in which Dr. Fenwick conveys instruction. There are few books of this size on practical medicine that contain so much and convey it so well as the volume before us It is a book we can sincerely recommend to the student for direct instruction and to the practitioner as a ready and useful aid to his memory.—*Am. Journ. of Syphilography*, Jan. 1874.

It covers the ground of medical diagnosis in a concise, practical manner, well calculated to assist the student in forming a correct, thorough, and systematic method of examination and diagnosis of disease. The illustrations are numerous and finely executed. Those illustrative of the microscopic appearance of morbid tissue, &c., are especially clear and distinct.—*Chicago Med. Examiner*, Nov. 1873.

So far superior to any offered to students, that the colleges of this country should recommend it to their respective classes.—*N. O. Med. and Surg. Journ.*, March, 1874.

This little book ought to be in the possession of every medical student.—*Boston Med. and Surgical Journ.*, Jan. 15, 1874.

Fuller (Henry William), M.D.,

Physician to St. George's Hospital, London.

ON DISEASES OF THE LUNGS AND AIR-PASSAGES. Their Pathology, Physical Diagnosis, Symptoms, and Treatment. From the second and revised English edition. In one handsome octavo volume of about 500 pages: cloth, $3 50.

Gray (Henry), F.R S.,

Lecturer on Anatomy at St. George's Hospital, London.

ANATOMY, DESCRIPTIVE AND SURGICAL. The Drawings by H. V. Carter, M.D., late Demonstrator of Anatomy at St. George's Hospital; the Dissections jointly by the Author and Dr Carter A New American, from the fifth enlarged and improved London edition. In one magnificent imperial octavo volume, of nearly 900 pages, with 465 large and elaborate engravings on wood. Price in cloth, $6 00; leather, raised bands, $7 00. (*Just Issued.*)

The author has endeavored in this work to cover a more extended range of subjects than is customary in the ordinary text-books, by giving not only the details necessary for the student, but also the application of those details in the practice of medicine and surgery, thus rendering it both a guide for the learner, and an admirable work of reference for the active practitioner. The engravings form a special feature in the work, many of them being the size of nature, nearly all original, and having the names of the various parts printed on the body of the cut, in place of figures of reference, with descriptions at the foot. They thus form a complete and splendid series, which will greatly assist the student in obtaining a clear idea of Anatomy, and will also serve to refresh the memory of those who may find in the exigencies of practice the necessity of recalling the details of the dissecting room; while combining, as it does, a complete Atlas of Anatomy, with a thorough treatise on systematic, descriptive, and applied Anatomy, the work will be found of essential use to all physicians who receive students in their offices, relieving both preceptor and pupil of much labor in laying the groundwork of a thorough medical education.

Notwithstanding the enlargement of this edition, it has been kept at its former very moderate price, rendering it one of the cheapest works now before the profession.

The illustrations are beautifully executed, and render this work an indispensable adjunct to the library of the surgeon This remark applies with great force to those surgeons practising at a distance from our large cities, as the opportunity of refreshing their memory by actual dissection is not always attainable.—*Canada Med. Journal*, Aug. 1870.

To commend Gray's Anatomy to the medical profession is almost as much a work of supererogation as it would be to give a favorable notice of the Bible in the religious press. To say that it is the most complete and conveniently arranged text-book of its kind, is to repeat what each generation of students has learned as a tradition of the elders, and verified by personal experience.—*N Y. Med Gazette*, Dec. 17, 1870.

The new edition of this very valuable treatise is in many respects an improvement upon the editions which have preceded it. Those already familiar with the work will be struck at a glance with the more systematic arrangement of the subjects embraced in it. General Anatomy, for instance, has been isolated from the departments of Descriptive and Surgical Anatomy, with which it had been previously incorporated, and now occupies an important position in an elaborate and instructive introductory chapter of eighty-three pages. Much labor has evidently been expended in the preparation of the very recent English edition, of which this is a transcript, and new cuts and a large amount of matter have been added, to keep this useful work thoroughly up to the requirements of the day, and to preserve its reputation as the best exponent of the present state of anatomical science, which the student can consult. The advantages presented in the method of copious illustration by large cuts, abundantly lettered on the block itself, on the very point of interest described in the text, whether it be process, muscle, tendon, artery, or nerve, have long since been recognized by teacher and student alike, and have contributed largely to the wide-spread popularity which this anatomical text book has attained on both sides of the Atlantic.—*Am. Journ. Med. Sci.*, July, 1870.

Gross (Samuel D.), M.D.,

Professor of Surgery in the Jefferson Medical College of Philadelphia.

A SYSTEM OF SURGERY: Pathological, Diagnostic, Therapeutic, and Operative. Illustrated by upwards of Fourteen Hundred Engravings. Fifth edition, carefully revised, and improved In two large and beautifully printed imperial octavo volumes of about 2300 pages, strongly bound in leather, with raised bands, $15. (*Just Issued.*)

The continued favor, shown by the exhaustion of repeated large editions of this great work, proves that it has successfully supplied a want felt by American practitioners and students. In the present revision no pains have been spared by the author to bring it in every respect fully up to the day. To effect this a large part of the work has been re-written, and the whole enlarged by nearly one-fourth, notwithstanding which the price has been kept at its former very moderate rate. By the use of a close, though very legible type, an unusually large amount of matter is condensed in its pages, the two volumes containing as much as four or five ordinary octavos. This, combined with the most careful mechanical execution, and its very durable binding, renders it one of the cheapest works accessible to the profession. Every subject properly belonging to the domain of surgery is treated in detail, so that the student who possesses this work may be said to have in it a surgical library.

We have now brought our task to a conclusion, and have seldom read a work with the practical value of which we have been more impressed. Every chapter is so concisely put together, that the busy practitioner, when in difficulty, can at once find the information he requires. His work, on the contrary, is cosmopolitan, the surgery of the world being fully represented in it. The work, in fact, is so historically unprejudiced, and so eminently practical, that it is almost a false compliment to say that we believe it to be destined to occupy a foremost place as a work of reference, while a system of surgery like the present system of surgery is the practice of surgeons. The printing and binding of the work is unexceptionable; indeed, it contrasts, in the latter respect, remarkably with English medical and surgical cloth-bound publications, which are generally so wretchedly stitched as to require re-binding before they are any time in use.—*Dublin Journ. of Med Sci.*, March, 1874.

Dr. Gross's Surgery, a great work, has become still greater, both in size and merit, in its most recent form. The difference in actual number of pages is not more than 130, but, the size of the page having been increased to what we believe is technically termed "elephant," there has been room for considerable additions, which, together with the alterations, are improvements.—*Lond. Lancet*, Nov. 16, 1872.

A complete system of Surgery—not a mere text-book of operations but a scientific account of surgical theory and practice in all its departments.—*Brit. and For. Med-Chir. Review*, Jan 1873.

It combines, as perfectly as possible, the qualities of a text book and work of reference We think this last edition of Gross's "Surgery" will confirm his title of "*Primus inter Pares.*" It is learned, scholar-like, methodical, precise, and exhaustive. We scarcely think any living man could write so complete and faultless a treatise, or comprehend more solid, instructive matter, in the given number of pages. The labor must have been immense, and the work gives evidence of great powers of mind, and the highest order of intellectual discipline and methodical disposition, and arrangement of acquired knowledge and personal experience.—*N. Y. Med. Journ.*, Feb. 1873.

As a whole, we regard the work as the representative "System of Surgery" in the English language.—*St. Louis Medical and Surg. Journ.*, Oct. 1872.

Among the many valuable medical works which the American press has been freely issuing in the last five years, there is none that can compare with the last edition of Gross's Surgery for completeness of details, comprehensiveness of facts, and general usefulness of subject matter. The first edition has proven so invaluable to practitioners and students that they will not be satisfied without this one — *Va. Clinical Record*, Nov. 1872.

The two magnificent volumes before us afford a very complete view of the surgical knowledge of the day. Some years ago we had the pleasure of presenting the first edition of Gross's Surgery to the profession as a work of unrivalled excellence; and now we have the result of years of experience, labor, and study, all condensed upon the great work before us. And to students or practitioners desirous of enriching their library with a treasure of reference, we can simply commend the purchase of these two volumes of immense research.—*Cincinnati Lancet and Observer*, Sept. 1872.

By the same Author.

A PRACTICAL TREATISE ON FOREIGN BODIES IN THE AIR-PASSAGES. In 1 vol. 8vo., with illustrations, pp. 468, cloth, $2 75.

Green (T. Henry), M.D.,

Lecturer on Pathology and Morbid Anatomy at Charing-Cross Hospital Medical School.

PATHOLOGY AND MORBID ANATOMY. Second American, from the Third and Enlarged English Edition. With numerous illustrations. In one very handsome octavo volume. (*Nearly Ready.*)

This useful and convenient manual has already reached a third edition, and we are glad to find that, although it has grown somewhat larger, it still remains a little book, and we are inclined to forgive the increase in size on account of the valuable additions which the author has made both to the printed matter and to the illustrations. The new illustrations, drawn by Mr. Collings from preparations by Dr. Green himself, are very good, and the care and trouble expended by the author in the preparation of this edition will no doubt increase the popularity of his book, great though it already is — *The London Practitioner*, Feb. 1876.

We observe that the whole has been carefully revised, that a considerable addition has been made to the illustrations, and that much new matter has been added. We have not space for noting each of the additions that have been made, and it is quite unnecessary to attempt this, for a work which has already gained a deservedly solid reputation. It is enough to say that it has been brought thoroughly up to the knowledge of the present day, and that the student can have no better or safer guide to pathology and morbid anatomy than Dr. Green's book.—*Lond. Times and Gaz.*, Sept. 1875.

Galloway (Robert), F.C.S.,

Prof. of Applied Chemistry in the Royal College of Science for Ireland etc.

A MANUAL OF QUANTITATIVE ANALYSIS. From the Fifth London Edition. In one neat royal 12mo. volume, with illustrations: cloth, $2 50. (*Just Issued.*)

Griffith (Robert E.), M.D.

A UNIVERSAL FORMULARY, Containing the Methods of Preparing and Administering Officinal and other Medicines. The whole adapted to Physicians and Pharmaceutists. Third edition, thoroughly revised, with numerous additions, by JOHN M MAISCH, Professor of Materia Medica in the Philadelphia College of Pharmacy. In one large and handsome octavo volume of about 800 pp., cloth, $4 50; leather, $5 50. (*Just Issued.*)

This work has long been known for the vast amount of information which it presents in a condensed form, arranged for easy reference. The new edition has received the most careful revision at the competent hands of Professor Maisch, who has brought the whole up to the standard of the most recent authorities. More than eighty new headings of remedies have been introduced, the entire work has been thoroughly remodelled, and whatever has seemed to be obsolete has been omitted As a comparative view of the United States, the British, the German, and the French Pharmacopœias, together with an immense amount of unofficinal formulas, it affords to the practitioner and pharmaceutist an aid in their daily avocations not to be found elsewhere, while three indexes, one of "Diseases and their Remedies," one of Pharmaceutical Names, and a General Index, afford an easy key to the alphabetical arrangement adopted in the text.

The young practitioner will find the work invaluable in suggesting eligible modes of administering many remedies.—*Am. Journ. of Pharm*, Feb. 1874.

Our copy of Griffith's Formulary, after long use, first in the dispensing shop, and afterwards in our medical practice, had gradually fallen behind in the onward march of materia medica, pharmacy, and therapeutics, until we had ceased to consult it as a daily book of reference. So completely has Prof. Maisch reformed, remodelled, and rejuvenated it in the new edition, we shall gladly welcome it back to our table again beside Dunglison, Webster, and Wood & Bache. The publisher could not have been more fortunate in the selection of an editor. Prof. Maisch is eminently the man for the work, and he has done it thoroughly and ably. To enumerate the alterations, amendments, and additions, would be an endless task; everywhere we are greeted with the evidences of his labor. Following the Formulary, is an addendum of useful Recipes, Dietetic Preparations, List of Incompatibles, Posological table, table of Pharmaceutical Names, Officinal Preparations and Directions, Poisons, Antidotes and Treatment, and copious indices, which afford ready access to all parts of the work. We unhesitatingly commend the book as being the best of its kind within our knowledge. —*Atlanta Med. and Surg. Journ.*, Feb. 1874.

GIBSON'S INSTITUTES AND PRACTICE OF SURGERY. Eighth edition, improved and altered. With thirty-four plates. In two handsome octavo volumes, about 1000 pp.: leather, raised bands, $6 50.

GLUGE'S ATLAS OF PATHOLOGICAL HISTOLOGY. Translated, with Notes and Additions, by JOSEPH LEIDY, M.D. In one volume, very large imperial quarto, with 320 copper-plate figures, plain and colored: cloth, $4 00.

HILLIER'S HANDBOOK OF SKIN DISEASES, for Students and Practitioners. Second American Edition. In 1 royal 12mo. vol. of 358 pp. With Illustrations. Cloth, $2 25.

HORNER'S SPECIAL ANATOMY AND HISTOLOGY. Eighth edition, extensively revised and modified. In 2 vols., 8vo., of over 1000 pages, with more than 300 wood-cuts: cloth, $6 00.

HUDSON'S LECTURES ON THE STUDY OF FEVER. 1 vol. 8vo., cloth, $2 50

HOLLAND'S MEDICAL NOTES AND REFLECTIONS. 1 vol. 8vo., pp. 500, cloth, $3 50.

Hamilton (Frank H.), M.D.,

Surgeon to Bellevue Hospital, New York.

A PRACTICAL TREATISE ON FRACTURES AND DISLOCATIONS. Fifth edition, revised and improved. Illustrated with 344 wood-cuts. In one large and handsome octavo volume of 831 pages: cloth, $5 75; leather, $6 75. (*Just Issued.*)

This work is well known, abroad as well as at home, as the highest authority on its important subject—an authority recognized in the courts as well as in the schools and in practice—and again manifested, not only by the demand for a fifth edition, but by arrangements now in progress for the speedy appearance of a translation in Germany. The repeated revisions which the author has thus had the opportunity of making have enabled him to give the most careful consideration to every portion of the volume, and he has sedulously endeavored, in the present issue, to perfect the work by the aid of his own enlarged experience and to incorporate in it whatever of value has been added in this department since the issue of the fourth edition. It will therefore be found considerably improved in matter, while the most careful attention has been paid to the typographical execution, and the volume is presented to the profession in the confident hope that it will more than maintain its very distinguished reputation.

There is no better work on the subject in existence than that of Dr. Hamilton. It should be in the possession of every general practitioner and surgeon.—*The Am. Journ. of Obstetrics*, Feb. 1876.

The value of a work like this to the practical physician and surgeon can hardly be over-estimated, and the necessity of having such a book revised to the latest dates, not merely on account of the practical importance of its teachings, but also by reason of the medico-legal bearings of the cases of which it treats, and which have recently been the subject of useful papers by Dr. Hamilton and others, is sufficiently obvious to every one. The present volume seems to amply fill all the requisites. We can safely recommend it as the best of its kind in the English language, and not excelled in any other.—*Journ. of Nervous and Mental Disease*, Jan. 1876.

Hoblyn (Richard D.), M.D.

A DICTIONARY OF THE TERMS USED IN MEDICINE AND THE COLLATERAL SCIENCES. Revised, with numerous additions, by ISAAC HAYS, M.D., Editor of the "American Journal of the Medical Sciences." In one large royal 12mo. volume of over 500 double-columned pages: cloth, $1 50; leather, $2.

It is the best book of definitions we have, and ought always to be upon the student's table —*Southern Med. and Surg. Journal.*

Holmes (Timothy),

Surgeon to St. George's Hospital, London.

SURGERY, ITS PRINCIPLES AND PRACTICE. In one large and handsome octavo volume of nearly 1000 pages, with 411 illustrations on wood. Cloth, $6; leather, $7. (*Now Ready.*)

The distinguished position of Mr. Holmes, his large practical experience, and his familiarity with surgical literature, have enabled him to condense within a moderate compass a complete view of all the departments of surgery in their most modern aspect. The labors of American surgeons will be found fully represented in its pages, and it is presented as a compact and convenient manual for the use of both student and practitioner.

From Robert Reyburn, M.D., Prof. of Principles of Surgery and Microscopic Anat., Medical Dept. Georgetown Univ.

"I believe it to be the best epitome of surgery for the use of the student and busy practitioner of medicine that I have yet seen."

From Hunter McGuire, M.D., Prof. of Surgery in the Medical College of Va., Richmond.

"It is an admirable book, and one which I can conscientiously recommend both to students and practitioners."

From T. R. Brown, M.D., Prof. of Surgery, College of Physicians and Surgeons, Baltimore.

"I have made a cursory examination only, but enough to satisfy me it is a most excellent work. I have made up my mind sufficiently as to its especial adaptation to students to warrant me in placing it in a foremost place among the text-books."

We believe it to be by far the best surgical text-book that we have, insomuch as it is the completest, and the one most thoroughly brought up to the knowledge of the present day. All who will give this book the careful perusal that it deserves and requires, whether student or practitioner, will agree with us that from the happy way in which justice is done, both to the principles and practice of surgery, from the care with which its pages are brought up to modern date, from the respect which is paid all along to the opinions of others, it deserves to take the first place among the text-books on surgery. — *British Med. Journ.*, Dec. 25, 1875.

Mr. Holmes, in the work before us, seems to have exactly hit the happy mean, and to have produced, in a convenient form, a most complete and accurate text-book. It is also necessary in such a work to give an impartial judgment upon many disputed questions and opposed methods of treatment; and no one is more competent to do this than Mr. Holmes, whose writings are notably distinguished by their clearness of thought and judicial accuracy. The book is an extremely fair exposition of British surgery, and its illustrations are, of course, largely drawn from the case books and museum of St. George's Hospital; but it exhibits, also, a thorough knowledge of, and gives abundant references to, the works of American and Continental surgeons. We have no hesitation in recommending this as by far the best of existing surgical text-books: it is well up to the time; it exhibits a thorough acquaintance with surgical literature and practice; is characterized by the most impartial fairness, and written in excellent English.—*Lond. Med. Times and Gaz.*, Jan. 8, 1876.

Taken as a whole, the work of Mr. Holmes gives very high promise. If he can only prevent it from getting too large in successive editions, it seems a work which, from its completeness, generally admirable arrangement, judicious illustrations, and copious index, will prove a most useful one, containing, as it does, accounts of special branches—eye, ear, syphilis, operative surgery, and bandaging—it will be useful for the type of student who may be described as *homo unius libri*, at least during his first year of surgery. If Mr. Holmes succeeds in getting over all the ground he travels in this work, during a winter course of systematic lectures, all we can say is, he is a fortunate and wonderful man.—*Edin. Med. Journ.*, March, 1876.

Hodge (Hugh L.), M.D.,

Emeritus Professor of Midwifery, &c., in the University of Pennsylvania, &c.

THE PRINCIPLES AND PRACTICE OF OBSTETRICS. Illustrated with large lithographic plates containing one hundred and fifty-nine figures from original photographs, and with numerous wood-cuts. In one large and beautifully printed quarto volume of 550 double-columned pages, strongly bound in cloth, $14.

The work of Dr. Hodge is something more than a simple presentation of his particular views in the department of Obstetrics; it is something more than an ordinary treatise on midwifery; it is, in fact, a cyclopædia of midwifery. He has aimed to embody in a single volume the whole science and art of Obstetrics. An elaborate text is combined with accurate and varied pictorial illustrations, so that no fact or principle is left unstated or unexplained.—*Am. Med. Times*, Sept. 3, 1864.

It is very large, profusely and elegantly illustrated, and is fitted to take its place near the works of great obstetricians. Of the American works on the subject it is decidedly the best.—*Edin. Medical Journ.*, Dec. 1864.

*** Specimens of the plates and letter-press will be forwarded to any address free, by mail, on receipt of six cents in postage stamps.

By the same Author.

ON DISEASES PECULIAR TO WOMEN; including Displacements of the Uterus. With original illustrations. Second edition, revised and enlarged. In one beautifully printed octavo volume of 531 pages, cloth, $4 50.

Heath (Christopher), F.R.C.S.,

Teacher of Operative Surgery in University College, London.

PRACTICAL ANATOMY: A Manual of Dissections. From the Second revised and improved London edition. Edited, with additions, by W. W. Keen, M.D., Lecturer on Pathological Anatomy in the Jefferson Medical College, Philadelphia. In one handsome royal 12mo. volume of 578 pages, with 247 illustrations. Cloth, $3 50; leather, $4 00. (*Lately Published.*)

HODGE'S PRACTICAL DISSECTIONS. 2d edition, thoroughly revised. In 1 royal 12mo. vol., half bound, $2.

HILL ON SYPHILIS AND LOCAL CONTAGIOUS DISORDERS. In 1 handsome 8vo vol. Cloth, $3 25.

Hartshorne (Henry), M.D.,

Professor of Hygiene in the University of Pennsylvania.

ESSENTIALS OF THE PRINCIPLES AND PRACTICE OF MEDICINE. A handy-book for Students and Practitioners. Fourth edition, revised and improved. With about one hundred illustrations. In one handsome royal 12mo. volume, of about 550 pages: cloth, $2 63; half bound, $2 88. (*Just Issued.*)

The thorough manner in which the author has labored to fully represent in this favorite handbook the most advanced condition of practical medicine is shown by the fact that the present edition contains more than 250 additions, representing the investigations of 172 authors not referred to in previous editions. Notwithstanding an enlargement of the page, the size has been increased by sixty pages. A number of illustrations have been introduced, which it is hoped will facilitate the comprehension of details by the reader, and no effort has been spared to make the volume worthy a continuance of the very great favor with which it has hitherto been received.

The work is brought fully up with all the recent advances in medicine, is admirably condensed, and yet sufficiently explicit for all the purposes intended, thus making it by far the best work of its character ever published.—*Cincinnati Clinic*, Oct. 24, 1874.

We have already had occasion to notice the previous editions of this work. It is excellent of its kind. The author has given a very careful revision, in view of the rapid progress of medical science.—*N. Y. Med. Journ.*, Nov. 1874.

Without doubt the best book of the kind published in the English language.—*St. Louis Med. and Surg. Journ.*, Nov. 1874.

As a handbook, which clearly sets forth the ESSENTIALS of the PRINCIPLES AND PRACTICE OF MEDICINE, we do not know of its equal.—*Va. Med. Monthly.*

By the same Author.

A CONSPECTUS OF THE MEDICAL SCIENCES; containing Handbooks on Anatomy, Physiology, Chemistry, Materia Medica, Practical Medicine, Surgery, and Obstetrics. Second Edition, thoroughly revised and improved. In one large royal 12mo. volume of more than 1000 closely printed pages, with 477 illustrations on wood. Cloth, $4 25; leather, $5 00. (*Lately Issued.*)

The favor with which this work has been received has stimulated the author in its revision to render it in every way fitted to meet the wants of the student, or of the practitioner desirous to refresh his acquaintance with the various departments of medical science. The various sections have been brought up to a level with the existing knowledge of the day, while preserving the condensation of form by which so vast an accumulation of facts has been brought within so narrow a compass. The series of illustrations has been much improved, while by the use of a smaller type the additions have been incorporated without increasing unduly the size of the volume.

The work before us has already successfully asserted its claim to the confidence and favor of the profession; it but remains for us to say that in the present edition the whole work has been fully overhauled and brought up to the present status of the science. —*Atlanta Med. and Surg. Journ.*, Sept. 1874.

This work is intended as an aid to the medical student, and as such appears to admirably fulfil its object by its excellent arrangement, the full compilation of facts, the perspicuity and terseness of language, and the clear and instructive illustrations in some parts of the work.—*Am. Journ. of Pharm.*, Philadelphia, July, 1874.

The volume will be found useful, not only to students, but to many others who may desire to refresh their memories with the smallest possible expenditure of time.—*N. Y. Med. Journ.*, Sept. 1874.

The student will find this the most convenient and useful book of the kind on which he can lay his hand.—*Pacific Med. and Surg. Journ.*, Aug. 1874.

By the same Author.

HANDBOOK OF ANATOMY AND PHYSIOLOGY. Second Edition, revised. In one royal 12mo. volume, with 220 wood-cuts; cloth, $1 75. (*Just Issued.*)

Jones (C. Handfield), M.D.,

Physician to St. Mary's Hospital, &c.

CLINICAL OBSERVATIONS ON FUNCTIONAL NERVOUS DISORDERS. Second American Edition. In one handsome octavo volume of 348 pages; cloth, $3 25.

Kirkes (William Senhouse), M.D.

A MANUAL OF PHYSIOLOGY. Edited by W. MORRANT BAKER, M.D., F.R.C.S. A new American from the eighth and improved London edition. With about two hundred and fifty illustrations. In one large and handsome royal 12mo. volume: cloth, $3 25; leather, $3 75. (*Lately Issued.*)

On the whole, there is very little in the book which either the student or practitioner will not find of practical value and consistent with our present knowledge of this rapidly changing science; and we have no hesitation in expressing our opinion that this eighth edition is one of the best handbooks on physiology which we have in our language.—*N. Y. Med. Record*, April 15, 1873.

This volume might well be used to replace many of the physiological text-books in use in this country. It represents more accurately than the works of Dalton or Flint, the present state of our knowledge of most physiological questions, while it is much less bulky and far more readable than the larger text-books of Carpenter or Marshall. The book is admirably adapted to be placed in the hands of students.—*Boston Med. and Surg. Journ.*, Apr. 10, '73.

In its enlarged form it is, in our opinion, still the best book on physiology, most useful to the student. —*Philadelphia Med. Times*, Aug. 30, 1873.

This is undoubtedly the best work for students of physiology extant.—*Cincin. Med. News*, Sept. '73.

It more nearly represents the present condition of physiology than any other text-book on the subject. —*Detroit Review of Med. and Pharm.*, Nov. 1873.

KNAPP'S TECHNOLOGY; or Chemistry Applied to the Arts, and to Manufactures. With American additions, by Prof. WALTER R. JOHNSON. In two very handsome octavo volumes, with five hundred wood engravings; cloth, $6.

Leishman (William), M.D.,

Regius Professor of Midwifery in the University of Glasgow, etc.

A SYSTEM OF MIDWIFERY, INCLUDING THE DISEASES OF PREGNANCY AND THE PUERPERAL STATE.

Second American, from the Second and revised English Edition, with additions by J. S. Parry, M.D., Obstetrician to the Phila. Hospital. In one large and very handsome octavo volume of nearly 800 pages, with about 200 illustrations: cloth, $5; leather, $6. (*Just Ready.*)

From the Preface of the American Editor.—In preparing for the press the Second American Edition of Dr. Leishman's System of Midwifery, the Editor has added such notes only as he believed would make the book more useful to the profession in this country. The additions are distinguished from the text by being inclosed in brackets [—P.], and will be found chiefly in the chapters on the Use of the Forceps, Lactation, and the Puerperal Diseases. A chapter on Diphtheria of Puerperal Wounds has been added, and a few new illustrations have been introduced, representing the principal modifications of obstetrical instruments generally employed in this country. The Editor trusts that these additions will increase the usefulness of a work of which the value is attested by the simultaneous exhaustion of both the English and American Editions.

But the most valuable additions to the volume are those made by the American editor. One of the best tests of a man's ability is for him to take a standard work in our profession, like this of Dr. Leishman, and materially improve it. Many a one, with more ambition than wisdom, has attempted it with other books and failed. But Dr. Parry has succeeded most admirably. We know no obstetrical work that has anything better on the use of the forceps than that which Dr. Parry has given in this, and no work that has the rational and intelligent views upon lactation with which he has enriched this. Having used "Leishman" for two years, as a text-book for students we can cordially commend it, and are quite satisfied to continue such use now.—*Am. Practitioner*, Mar. '76.

This new edition decidedly confirms the opinion which we expressed of the first edition of the work, in the May, 1874, number of this Journal, that this is "the best modern work on the subject in the English language." The excellent practical notes contributed by Dr. Parry refer principally to the use of the forceps, lactation, and the puerperal diseases, and are intended to increase the usefulness of the work in this country. An entirely new chapter on diphtheria of puerperal wounds has been added (Dr. P has had unusual experience in this form of puerperal fever), and also a number of illustrations of the principal obstetrical instruments in use in America. We have no hesitation in saying that the work, in its present shape, is a great improvement on its predecessor, and in recommending it as the one obstetrical text book which we should advise every English-speaking practitioner and student to buy.—*Am. Journ. of Obstetrics*, Feb. 1876.

Perhaps the most useful one the student can procure. Some important additions have been made by the editor, in order to adapt the work to the profession in this country, and some new illustrations have been introduced, to represent the obstetrical instruments generally employed in American practice. In its present form, it is an exceedingly valuable book for both the student and practitioner. —*New York Med. Journ.*, Jan. 1876.

In about two years after the issue of this excellent treatise a second edition has been called for. We regard the treatise as thoroughly sound and practical, and one which may with confidence be consulted in any emergency.—*The London Lancet*, Dec. 11, 1875.

The appearance of a second edition of this System is the fulfilment of the prophecy which we made in a former review, that the book was destined to "become a favorite." The additions by Dr. Parry are usually not abundant, but certain places which are pointed out as the weak part of Dr. Leishman's handicraft have been greatly strengthened by abundant and very judicious addenda.—*Phila. Med. Times*, Dec. 25, 1875.

Lincoln (D. F.), M.D.,

Physician to the Department of Nervous Diseases, Boston Dispensary.

ELECTRO-THERAPEUTICS; A Concise Manual of Medical Electricity

In one very neat royal 12mo. volume; cloth, with illustrations, $1 50. (*Just Issued.*)

The work is convenient in size, its descriptions of methods and appliances are sufficiently complete for the general practitioner, and the chapters on Electro-physiology and diagnosis are well written and readable. For those who wish a handy-book of directions for the employment of galvanism in medicine, this will serve as a very good and reliable guide —*New Remedies*, Oct 1874.

Eminently practical in character. It will amply repay any one for a careful perusal.—*Leavenworth Med. Herald*, Oct. 1874.

This little book is, considering its size, one of the very best of the English treatises on its subject that has come to our notice, possessing, among others, the rare merit of dealing avowedly and actually with principles, mainly, rather than with practical details, thereby supplying a real want, instead of helping merely to flood the literary market. Dr. Lincoln's style is usually remarkably clear, and the whole book is readable and interesting —*Boston Medical and Surgical Journal*, July 23, 1874.

Lee (Henry),

Prof. of Surgery at the Royal College of Surgeons of England, &c.

LECTURES ON SYPHILIS AND ON SOME FORMS OF LOCAL DISEASE, AFFECTING PRINCIPALLY THE ORGANS OF GENERATION.

In one handsome octavo volume of 246 pages: cloth, $2 25. (*Now Ready.*)

The long-established reputation of this eminent surgeon as an author on venereal diseases, and the easy style of his writings make anything from his pen on the subjects indicated by the title of this book, eagerly sought after and read. The present work consists principally of a collection and revision of the author's numerous papers and lectures on venereal diseases, which have been published in various medical journals, through which channels his views have already become familiar to the medical world. It will be remembered that he is a dualist, and is an earnest advocate of the mercurial plan of treatment of syphilis—the treatment being carried out preferably by means of calomel vapor baths Indeed, were demonstrative facts asked to establish the value of mercury in syphilis, they would not be called for a second time after perusal of the fourth chapter (*Treatment of Syphilis*). The other portion of the work is alike interesting, instructive, and authoritative. We are compelled to abbreviate our notice; but we cannot lay our pen aside without commending this book to physicians who propose to practise on venereal diseases—whether or not they already have the more systematic works of Van Buren and Keyes or of Bumstead, of our own country.—*Va. Med. Monthly*, Nov. 1875.

Mr. Henry Lee's Hunterian Lectures attracted much attention when they first appeared in the English journals, and will be widely read, now that they are published entire in book form. No man in England has a higher or wider reputation as a syphilographer than the author, and his views are the matured fruit of years of study and very extensive observation. John Hunter could have had no abler nor more conscientious reviewer of his doctrines as tested by the experience of medical men during more than three-quarters of a century.—*The Clinic*, Nov. 6, 1875.

Lea (Henry C.).

SUPERSTITION AND FORCE: ESSAYS ON THE WAGER OF LAW, THE WAGER OF BATTLE, THE ORDEAL, AND TORTURE.

Second Edition, Enlarged. In one handsome volume, royal 12mo., of nearly 500 pages: cloth, $2 75. (*Lately Published.*)

We know of no single work which contains, in so small a compass, so much illustrative of the strangest operations of the human mind. Foot-notes give the authority for each statement, showing vast research and wonderful industry. We advise our *confrères* to read this book and ponder its teachings.—*Chicago Med. Journal*, Aug. 1870.

As a work of curious inquiry on certain outlying points of obsolete law, "Superstition and Force" is one of the most remarkable books we have met with. —*London Athenæum*, Nov. 3, 1866.

He has thrown a great deal of light upon what must be regarded as one of the most instructive as well as interesting phases of human society and progress. . . The fulness and breadth with which he has carried out his comparative survey of this repulsive field of history [Torture], are such as to preclude our doing justice to the work within our present limits. But here, as throughout the volume, there will be found a wealth of illustration and a critical grasp of the philosophical import of facts which will render Mr. Lea's labors of sterling value to the historical student.—*London Saturday Review*, Oct. 8, 1870.

As a book of ready reference on the subject, it is of the highest value.—*Westminster Review*, Oct. 1867.

By the same Author. (*Lately Published.*)

STUDIES IN CHURCH HISTORY—THE RISE OF THE TEMPORAL POWER—BENEFIT OF CLERGY—EXCOMMUNICATION.

In one large royal 12mo. volume of 516 pp.: cloth, $2 75.

The story was never told more calmly or with greater learning or wiser thought. We doubt, indeed, if any other study of this field can be compared with this for clearness, accuracy, and power.—*Chicago Examiner*, Dec. 1870.

Mr. Lea's latest work, "Studies in Church History," fully sustains the promise of the first. It deals with three subjects—the Temporal Power, Benefit of Clergy, and Excommunication, the record of which has a peculiar importance for the English student, and is a chapter on Ancient Law likely to be regarded as final We can hardly pass from our mention of such works as these—with which that on "Sacerdotal Celibacy" should be included—without noting the literary phenomenon that the head of one of the first American houses is also the writer of some of its most original books.—*London Athenæum*, Jan. 7, 1871.

Mr Lea has done great honor to himself and this country by the admirable works he has written on ecclesiological and cognate subjects. We have already had occasion to commend his "Superstition and Force" and his "History of Sacerdotal Celibacy." The present volume is fully as admirable in its method of dealing with topics and in the thoroughness—a quality so frequently lacking in American authors—with which they are investigated.—*N. Y. Journal of Psychol. Medicine*, July, 1870.

By the same Author. (*Lately Published.*)

AN HISTORICAL SKETCH OF SACERDOTAL CELIBACY IN THE CHRISTIAN CHURCH.

In one handsome octavo volume of 600 pages: extra cloth, $3 75.

In freshness and exactness of detail, in conscientious citation of authorities, in the impartiality with which all possible sources of information have been searched, in learning and scholarly finish, it is absolutely unapproached by any similar treatise which has issued from the American press. Indeed, the number of foreign historical works which have equalled it in these particulars might be readily counted on the fingers.—*Quarterly Journ. of Psychological Medicine*, Oct. 1867.

Thus his chapter on the Anglican church is perhaps the most accurate and most satisfactory account of our own Reformation, as to the question of celibacy or marriage, that could be found.—*Quarterly Review*, London, Oct. 1867.

Laurence (John Z.), F.R.C.S.,

Editor of the Ophthalmic Review, &c.

A HANDY-BOOK OF OPHTHALMIC SURGERY,

for the use of Practitioners. Second edition, revised and enlarged. With numerous illustrations. In one very handsome octavo volume, cloth, $3 00.

Lawson (George), F.R.C.S. Engl.,

Assistant Surgeon to the Royal London Ophthalmic Hospital, Moorfields, &c.

INJURIES OF THE EYE, ORBIT, AND EYELIDS: their Immediate and Remote Effects.

With about one hundred illustrations. In one very handsome octavo volume, cloth, $3 50.

It is an admirable practical book in the highest and best sense of the phrase.—*London Medical Times and Gazette*, May 18, 1867.

LA ROCHE ON YELLOW FEVER, considered in its Historical, Pathological, Etiological, and Therapeutical Relations. In two large and handsome octavo volumes of nearly 1300 pages, cloth, $7 00.

LA ROCHE ON PNEUMONIA. 1 vol. 8vo., cloth, of 500 pages. Price $3 00.

LAYCOCK'S LECTURES ON THE PRINCIPLES AND METHODS OF MEDICAL OBSERVATION AND RESEARCH. For the use of advanced students and junior practitioners. In one very neat royal 12mo. volume, cloth, $1 00.

LEHMANN'S PHYSIOLOGICAL CHEMISTRY. Translated from the second edition by GEORGE E. DAY, M.D., F.R.S., &c; edited by R. E. ROGERS, M.D. Complete in two large and handsome octavo volumes, containing 1200 pages, with nearly two hundred illustrations: cloth, $6

LEHMANN'S MANUAL OF CHEMICAL PHYSIOLOGY. Translated from the German, with Notes and Additions, by J. CHESTON MORRIS, M.D With illustrations on wood. In one very handsome octavo volume of 336 pages; cloth, $2 25.

LYONS'S TREATISE ON FEVER. In one octavo volume of 362 pages; cloth, $2 25.

Ludlow (J. L.), M.D.

A MANUAL OF EXAMINATIONS upon Anatomy, Physiology, Surgery, Practice of Medicine, Obstetrics, Materia Medica, Chemistry, Pharmacy, and Therapeutics. To which is added a Medical Formulary. Third edition, thoroughly revised and greatly extended and enlarged. With 370 illustrations. In one handsome royal 12mo. volume of 816 large pages: cloth, $3 25; leather, $3 75.

Maclise (Joseph).

SURGICAL ANATOMY. By JOSEPH MACLISE, Surgeon. In one volume, very large imperial quarto; with 68 large and splendid plates, drawn in the best style and beautifully colored, containing 190 figures, many of them the size of life; together with copious explanatory letter-press. Strongly and handsomely bound in cloth. Price $14 00.

Marshall (John), F.R.S.,

Professor of Surgery in University College, London, &c.

OUTLINES OF PHYSIOLOGY, HUMAN AND COMPARATIVE. With Additions by FRANCIS GURNEY SMITH, M.D., Professor of the Institutes of Medicine in the University of Pennsylvania, &c. With numerous illustrations. In one large and handsome octavo volume, of 1026 pages, cloth, $6 50; leather, raised bands, $7 50.

MEIGS ON THE NATURE, SIGNS, AND TREATMENT OF CHILDBED FEVER. 1 vol. 8vo., pp. 365, cloth, $2 00.

MILLER'S PRINCIPLES OF SURGERY. Fourth American, from the third and revised Edinburgh edition. In one vol. of 700 pages, with 240 cuts: cloth, $3 75.

MILLER'S PRACTICE OF SURGERY. Fourth American, from the last Edinburgh edition. In one vol. 8vo., of nearly 700 pages, cloth, with 364 cuts: $3 75.

MONTGOMERY'S EXPOSITION OF THE SIGNS AND SYMPTOMS OF PREGNANCY. With two exquisite colored plates, and numerous wood-cuts. In 1 vol. 8vo., of nearly 600 pp., cloth, $3 75.

Neill (John), M.D., and Smith (Francis G.), M.D.,

Prof of the Institutes of Med. in the Univ. of Penna.

AN ANALYTICAL COMPENDIUM OF THE VARIOUS BRANCHES OF MEDICAL SCIENCE; for the Use and Examination of Students. A new edition, revised and improved. In one very large and handsomely printed royal 12mo. volume, of about one thousand pages, with 374 wood cuts, cloth, $4; strongly bound in leather, with raised bands, $4 75.

The Compend of Drs. Neill and Smith is incomparably the most valuable work of its class ever published in this country. Attempts have been made in various quarters to squeeze Anatomy, Physiology, Surgery, the Practice of Medicine, Obstetrics, Materia Medica, and Chemistry into a single manual; but the operation has signally failed in the hands of all up to the advent of "Neill and Smith's" volume, which is quite a miracle of success. The outlines of the whole are admirably drawn and illustrated, and the authors are eminently entitled to the grateful consideration of the student of every class.—*N. O. Med. and Surg. Journal.*

There are but few students or practitioners of medicine unacquainted with the former editions of this unassuming, though highly instructive work. The whole science of medicine appears to have been sifted, as the gold bearing sands of El Dorado, and the precious facts treasured up in this little volume. A complete portable library so condensed that the student may make it his constant pocket companion.—*Western Lancet.*

Neligan (J. Moore), M.D., M.R.I.A.

ATLAS OF CUTANEOUS DISEASES. In one beautiful quarto volume, with exquisitely colored plates, &c., presenting about one hundred varieties of disease. Cloth, $5 50.

Odling (William),

Lecturer on Chemistry at St. Bartholomew's Hospital, &c.

A COURSE OF PRACTICAL CHEMISTRY, arranged for the Use of Medical Students. With Illustrations. From the Fourth and Revised London Edition. In one neat royal 12mo. volume, cloth, $2.

Playfair (W. S.), M.D., F.R.C.P.,

Professor of Obstetric Medicine in King's College, etc. etc.

A TREATISE ON THE SCIENCE AND PRACTICE OF MIDWIFERY. In one handsome octavo volume, with several hundred illustrations. (*In Press.*)

Pirrie (William), F.R.S.E.,

Professor of Surgery in the University of Aberdeen.

THE PRINCIPLES AND PRACTICE OF SURGERY. Edited by JOHN NEILL, M.D., Professor of Surgery in the Penna. Medical College, Surgeon to the Pennsylvania Hospital, &c. In one very handsome octavo volume of 780 pages, with 316 illustrations, cloth, $3 75.

Parry (John S.), M.D.,

Late Obstetrician to the Phila. Hospital, Vice-Prest. of the Obstet Society of Philadelphia.

EXTRA-UTERINE PREGNANCY: ITS CLINICAL HISTORY, DIAGNOSIS, PROGNOSIS, AND TREATMENT.

In one handsome octavo volume of 274 pages: cloth, $2 50. (*Just Ready.*)

It is with genuine satisfaction, therefore, that we read the work before us, which is far in advance of any monograph upon the subject in the English language, and exceeding very much, in the number of cases upon which it is based, we believe, any work of the kind ever published. The author has given great care and study to the work, and has handled his statistics with judgment; so that, whatever was to be gained from them, he has gained and added to our knowledge on the subject. We owe the author much for giving us a clear, readable book upon this topic. He has, so far as it is at present possible, removed the obscurity attending certain points of the subject He has brought order out of something very like chaos.—*Philadelphia Med. Times*, Feb. 19, 1876.

In this work Dr. Parry has added a most valuable contribution to obstetric literature, and one which meets a want long felt by those of the profession who have ever been called upon to deal with this class of cases.—*Boston Med. and Surg. Journal*, March 9, 1876.

This work, being as near as possible a collection of the experiences of many persons, will afford a most useful guide, both in diagnosis and treatment, for this most interesting and fatal malady. We think it should be in the hands of all physicians practising midwifery.—*Cincinnati Clinic*, Feb. 5, 1876.

This work is based upon an analysis of five hundred cases of misplaced pregnancy, and the author has succeeded in giving a most interesting and valuable work as the result of this labor.—*Med. and Surg. Reporter*, Jan. 29, 1876.

We scarcely know which most to admire in this work, the labor and industry exhibited in the collection from the medical literature of the world, of 500 cases of extra-uterine pregnancy, or the ingenuity and skill with which the cases are appropriated to the illustration of various points in the diagnostic and clinical relations of the subject. The work is a most important addition to American medical literature.—*Pacific Med. and Surg. Journal*, Feb. 1876.

Parrish (Edward),

Late Professor of Materia Medica in the Philadelphia College of Pharmacy.

A TREATISE ON PHARMACY.

Designed as a Text-Book for the Student, and as a Guide for the Physician and Pharmaceutist. With many Formulæ and Prescriptions. Fourth Edition, thoroughly revised, by THOMAS S. WIEGAND. In one handsome octavo volume of 977 pages, with 280 illustrations: cloth, $5 50; leather, $6 50. (*Just Issued.*)

Of Dr. Parrish's great work on pharmacy it only remains to be said that the editor has accomplished his work so well as to maintain, in this fourth edition, the high standard of excellence which it had attained in previous editions, under the editorship of its accomplished author. This has not been accomplished without much labor, and many additions and improvements, involving changes in the arrangement of the several parts of the work, and the addition of much new matter. With the modifications thus effected, it constitutes, as now presented, a compendium of the science and art indispensable to the pharmacist, and of the utmost value to every practitioner of medicine desirous of familiarizing himself with the pharmaceutical preparation of the articles which he prescribes for his patients.—*Chicago Med. Journ.*, July, 1874.

The work is eminently practical, and has the rare merit of being readable and interesting, while it preserves a strictly scientific character. The whole work reflects the greatest credit on author, editor, and publisher. It will convey some idea of the liberality which has been bestowed upon its production when we mention that there are no less than 280 carefully executed illustrations. In conclusion, we heartily recommend the work, not only to pharmacists, but also to the multitude of medical practitioners who are obliged to compound their own medicines. It will ever hold an honored place on our own bookshelves.—*Dublin Med Press and Circular*, Aug. 12, 1874.

With these few remarks we heartily commend the work, and have no doubt that it will maintain its old reputation as a text-book for the student, and a work of reference for the more experienced physician and pharmacist —*Chicago Med. Examiner*, June 15, 1874.

Perhaps one, if not the most important book upon pharmacy, which has appeared in the English language, has emanated from the transatlantic press. "Parrish's Pharmacy" is a well-known work on this side of the water, and the fact shows us that a really useful work never becomes merely local in its fame. Thanks to the judicious editing of Mr. Wiegand, the posthumous edition of "Parrish" has been saved to the public with all the mature experience of its author, and perhaps none the worse for a dash of new blood.—*London Pharm. Journ.*, Oct. 17, 1874.

Pavy (F. W.), M.D., F.R.S.,

Senior Asst. Physician to, and Lecturer on Physiology at, Guy's Hospital, etc.

A TREATISE ON FOOD AND DIETETICS, PHYSIOLOGICALLY AND THERAPEUTICALLY CONSIDERED.

In one handsome octavo volume of nearly 600 pages: cloth, $4 75. (*Just Ready.*)

The present book is a result of his work in this direction, and is well calculated to do credit to his perseverance in collecting facts, and his judgment in arranging them in an entertaining, as well as a practical form. It is but rarely that we have had offered us so much practical information in so agreeable a manner as is done by Dr. Pavy in the present instance.—*New Remedies*, July, 1874.

No modern treatise on this subject having existed in the English language, Dr. Pavy's work supplies a want which has been very seriously felt, and in a manner which shows that the author is an extensive reader and has judiciously arranged the numerous facts and theories, together with the most striking experiments and the deductions drawn therefrom. It seems to us that he has truly conferred a great benefit upon all interested in the subject-matter of his work, and that nobody will study its pages without having derived valuable instruction therefrom, and without considering it not only useful, but next to indispensable.—*Amer. Journ. of Pharmacy*, Aug. 1874.

By the same Author.

A TREATISE ON THE FUNCTION OF DIGESTION; ITS DISORDERS AND TREATMENT.

From the Second London Edition. In one handsome volume, small octavo; cloth, $2 00

Roberts (William), M.D.,

Lecturer on Medicine in the Manchester School of Medicine, etc.

A PRACTICAL TREATISE ON URINARY AND RENAL DISEASES, including Urinary Deposits.

Illustrated by numerous cases and engravings. Second American, from the Second Revised and Enlarged London Edition. In one large and handsome octavo volume of 616 pages, with a colored plate: cloth, $4 50. (*Lately Published.*)

The plan, it will thus be seen, is very complete, and the manner in which it has been carried out is in the highest degree satisfactory. The characters of the different deposits are very well described, and the microscopic appearances they present are illustrated by numerous well-executed engravings. It only remains to us to strongly recommend to our readers Dr Roberts's work, as containing an admirable *résumé* of the present state of knowledge of urinary diseases, and as a safe and reliable guide to the clinical observer —*Edin. Med. Jour.*

The most complete and practical treatise upon renal diseases we have examined. It is peculiarly adapted to the wants of the majority of American practitioners from its clearness and simple announcement of the facts in relation to diagnosis and treatment of urinary disorders, and contains in condensed form the investigations of Bence Jones, Bird, Beale, Hassall, Prout, and a host of other well known writers upon this subject. The characters of urine, physiological and pathological, as indicated to the naked eye as well as by microscopical and chemical investigations, are concisely represented both by description and by well-executed engravings.—*Cincinnati Journ. of Med.*

Ramsbotham (Francis H.), M.D.

THE PRINCIPLES AND PRACTICE OF OBSTETRIC MEDICINE and Surgery, in reference to the Process of Parturition

A new and enlarged edition, thoroughly revised by the author. With additions by W. V. Keating, M.D., Professor of Obstetrics, etc., in the Jefferson Medical College, Philadelphia. In one large and handsome imperial octavo volume of 650 pages, strongly bound in leather, with raised bands; with sixty four beautiful plates, and numerous wood-cuts in the text, containing in all nearly 200 large and beautiful figures: leather, $7 00.

RIGBY'S SYSTEM OF MIDWIFERY. With Notes and Additional Illustrations. Second American edition. One volume octavo, cloth, 422 pages, $2 50.

SHARPEY AND QUAIN'S HUMAN ANATOMY. Revised, with Notes and Additions, by Joseph Leidy, M.D., Professor of Anatomy in the University of Pennsylvania. Complete in two large octavo volumes, of about 1300 pages, with 511 illustrations: cloth, $6 00.

Smith (J. Lewis), M.D.,

Physician to Infants' Hospital, Ward's Island, New York, etc.

A PRACTICAL TREATISE ON THE DISEASES OF INFANCY AND CHILDHOOD.

Third Edition, enlarged and thoroughly revised. With illustrations on wood. In one handsome 8vo. volume of 726 pages: cloth, $5; leather, $6. (*Just Ready.*)

The eminent success which this work has achieved has encouraged the author, in preparing this third edition, to render it even more worthy than heretofore of the favor of the profession. It has been thoroughly revised, and very considerable additions have been made throughout. To accommodate these the volume has been printed in a smaller type, so as to prevent any notable increase in its size, and it is presented in the hope that it may attain the position of the American text-book on this important department of medical science.

This work took a stand as an authority from its first appearance, and every one interested in studying the diseases of which it treats is desirous of knowing what improvements are apparent in the successive editions. The principal additions to which we refer and which will be the distinguishing features of the third edition, are chapters on diphtheria, cerebro-spinal meningitis, and rötheln. The former disease is considered much more in detail than formerly, and a great amount of very practical information is added, and altogether it is one of the most comprehensive and one of the best written chapters of the subject we have thus far read. His description of cerebro-spinal meningitis, founded also for the most part on personal experience, is admirably clear and exhaustive.—*The Med. Record*, Feb. 19, 1876.

In presenting this deservedly popular treatise for the third time to the profession, Dr. Smith has given it a careful preparation, which will make it of decided superiority to either of the former editions. The position of the author, as physician and consultant to several large children's hospitals in New York city, has furnished him with constant occasions to put his treatment to the test, and his work has at once that practical and thoughtful tone which is a marked characteristic of the best productions of the American medical press.—*Med. and Surg. Reporter*, Feb. 1876

There is now no work on the diseases of infancy and childhood better adapted to the uses of the profession in this country than this one of Dr. Smith's as regards either its completeness, reliability, practical nature, or style of composition —*New Remedies*, March, 1876.

The former editions of this book have given it the highest rank among works of its class, and the present edition will confirm and add to its reputation. Having been brought up to the present mark in the rapid advance of medical science, it is the best work in our language, on its range of topics, for the American practitioner.—*Pacific Med. and Surg. Journ.*, Feb. 1876

Dr. Smith's Diseases of Children is certainly the most valuable work on the subjects treated that the practitioner can provide himself with. It is fully abreast with every advance: it should be in the hands of practitioners generally, while, because of the conciseness and clearness of style of the writing of the author, every professor of diseases of children, if he has not already done so, should adopt this as his text-book.—*Va. Med. Monthly*, Feb. 1876.

We can cordially recommend the work to students and practitioners as one of the very best with which we are acquainted —*Cincin. Med. News*, Feb 1876.

The third edition of this really valuable work is now before us, with a hundred pages of additional matter, an altered size of page, new illustrations, and new type. Of the diseases treated of for the first time, we notice rötheln and cerebro-spinal fever, which lately prevailed in epidemic form in some parts of the country. The article upon diphtheria, containing the latest developments in the pathology and treatment of that dread disease which so lately ravaged our country, is peculiarly interesting to every practitioner. We gladly welcome this standard work, and cheerfully recommend it to our readers as the best on this subject in the English language.—*Nashville Journ of Med. and Surg.*, March, 1876.

Stillé (Alfred), M.D.,

Professor of Theory and Practice of Medicine in the University of Penna.

THERAPEUTICS AND MATERIA MEDICA; a Systematic Treatise on the Action and Uses of Medicinal Agents, including their Description and History. Fourth Edition, Revised and Enlarged. In two large and handsome 8vo. vols. of about 2000 pages: cloth, $10 00; leather, $12 00. (*Just Issued.*)

The care bestowed by the author on the revision of this edition has kept the work out of the market for nearly two years, and has increased its size about two hundred and fifty pages. Notwithstanding this enlargement, the price has been kept at the former very moderate rate.

The prominent feature of Dr. Stillé's great work is sound, good sense. It is learned, but its learning is of inferior value compared with the discriminating judgment which is shown by its author in the discussion o his subjects, and which renders it a trustworthy guide in the sick-room. This treatise, if it has not already taken the place of Pereira's learned volumes on materia medica, must ultimately supersede that elaborate work, as having all its learning and being at the same time more practical and more fully up with the therapeutics of the day It constitutes a sort of encyclopedia on the subject, and is issued in a style as to paper and binding, suitable for a book likely to be so constantly referred to.—*Am. Practitioner*, Jan. 1875.

We can hardly admit that it has a rival in the multitude of its citations and the fulness of its research into clinical histories, and we must assign it a place in the physician's library; not, indeed, as fully representing the present state of knowledge in pharmacodynamics, but as by far the most complete treatise upon the clinical and practical side of the question.—*Boston Med. and Surgical Journ.*, Nov. 5, 1874.

For all who desire a complete work on therapeutics and materia medica for reference, in cases involving medico-legal questions, as well as for information concerning remedial agents, Dr. Stillé's is "*par excellence*" the work. The work being out of print, by the exhaustion of former editions, the author has laid the profession under renewed obligations, by the careful revision, important additions, and timely re-issuing a work not exactly supplemented by any other in the English language, if in any language. The mechanical execution handsomely sustains the well-known skill and good taste of the publisher.—*St. Louis Med. and Surg. Journ.*, Dec. 1874.

We need not dwell on the merits of the third edition of this magnificently conceived work. It is the work on Materia Medica, in which Therapeutics are primarily considered—the mere natural history of drugs being briefly disposed of. To medical practitioners this is a very valuable conception. It is wonderful how much of the riches of the literature of Materia Medica has been condensed into this book. The references alone would make it worth possessing. But it is not a mere compilation. The writer exercises a good judgment of his own on the great doctrines and points of Therapeutics. For purposes of practice, Stillé's book is almost unique as a repertory of information, empirical and scientific, on the actions and uses of medicines.—*London Lancet*, Oct. 31, 1868.

Swayne (Joseph Griffiths), M.D.,

Physician-Accoucheur to the British General Hospital, &c.

OBSTETRIC APHORISMS FOR THE USE OF STUDENTS COMMENCING MIDWIFERY PRACTICE. Second American, from the Fifth and Revised London Edition, with Additions by E. R. Hutchins, M.D. With Illustrations. In one neat 12mo. volume. Cloth, $1 25. (*Lately Issued.*)

Stokes (William), M.D., D.C.L., F.R.S.

LECTURES ON FEVER. (*See* p. 7.)

SMITH'S PRACTICAL TREATISE ON THE WASTING DISEASES OF INFANCY AND CHILDHOOD. In one 8vo. volume, cloth, $2 50.

STURGES' INTRODUCTION TO CLINICAL MEDICINE. In one volume 12mo., cloth, $1 25.

SKEY'S OPERATIVE SURGERY. In 1 vol. 8vo., cloth, of over 600 pages; with about 100 woodcuts. $3 25.

SARGENT ON BANDAGING AND OTHER OPERATIONS OF MINOR SURGERY. In one 12mo. volume of 383 pp., with 184 illustrations, cloth, $1 75.

SLADE ON DIPHTHERIA. In one 12mo. volume, cloth, $1 25.

SMITH ON CONSUMPTION; ITS EARLY AND REMEDIABLE STAGES. 1 vol. 8vo., pp. 254. $2 25.

Smith (Henry H.), M.D., and Horner (William E.), M.D.,

Prof. of Surgery in the Univ. of Penna., &c. *Late Prof. of Anatomy in the Univ. of Pa., &c.*

AN ANATOMICAL ATLAS, illustrative of the Structure of the Human Body. In one volume, large imperial octavo, cloth, with about six hundred and fifty beautiful figures. $4 50.

Tuke (Daniel Hack), M.D.,

Joint author of "The Manual of Psychological Medicine," &c.

ILLUSTRATIONS OF THE INFLUENCE OF THE MIND UPON THE BODY IN HEALTH AND DISEASE. Designed to illustrate the Action of the Imagination. In one handsome octavo volume of 416 pages, cloth, $3 25. (*Just Issued.*)

The object of the author in this work has been to show not only the effect of the mind in causing and intensifying disease, but also its curative influence. and the use which may be made of the imagination and the emotions as therapeutic agents. Scattered facts bearing upon this subject have long been familiar to the profession, but no attempt has hitherto been made to collect and systematize them so as to render them available to the practitioner, by establishing the several phenomena upon a scientific basis. In the endeavor thus to convert to the use of legitimate medicine the means which have been employed so successfully in many systems of quackery, the author has produced a work of the highest freshness and interest as well as of permanent value.

Thomas (T. Gaillard), M.D.,

Professor of Obstetrics, etc., in the College of Physicians and Surgeons, N. Y., etc.

A PRACTICAL TREATISE ON THE DISEASES OF WOMEN.

Fourth Edition, enlarged and thoroughly Revised. In one large and handsome octavo volume of 800 pages, with 191 illustrations. Cloth, $5 00; leather, $6 00. (*Just Issued.*)

The author has taken advantage of the opportunity afforded by the call for another edition of this work to render it worthy a continuance of the very remarkable favor with which it has been received. Every portion has been subjected to a conscientious revision, and no labor has been spared to make it a complete treatise on the most advanced condition of its important subject.

This volume of Prof. Thomas in its revised form is classical without being pedantic, full in the details of anatomy and pathology, without ponderous translations of pages of German literature, describes distinctly the details and difficulties of each operation, without wearying and useless minutiæ, and is in all respects a work worthy of confidence, justifying the high regard in which its distinguished author is held by the profession.—*Am. Supplement, Obstet. Journ.*, Oct. 1874.

Reluctantly we are obliged to close this unsatisfactory notice of so excellent a work, and in conclusion would remark that, as a teacher of gynæcology, both didactic and clinical, Prof. Thomas has certainly taken the lead far ahead of his *confrères*, and as an author he certainly has met with unusual and merited success —*Am. Journ. of Obstetrics*, Nov. 1874.

The latest edition of this well-known text-book retains the essential characters which rendered the earliest so deservedly popular. It is still pre-eminently a practical manual intended to convey to students in a clear and forcible manner a sufficiently complete outline of gynæcology. In a word, we should say that any one who intended to make a special study of gynæcology could hardly do better than to begin with a minute perusal of this book, and that any one who intended to keep gynæcology subordinate to general practice, should hardly fail to have it on hand for future reference.—*N. Y. Med. Journ.*, Jan. 1875.

Thomas's Diseases of Women is one of the few books regarded by American physicians with feelings of national pride. Few works in the English language equal it, none surpass it, as a text-book for students or a reference book for practitioners. No medical book ever published in this country has a wider European reputation. — *Cincinnati Clinic*, Nov. 7, 1874.

A standard and almost classical work on the subject by an eminent American obstetrician It well deserves its popularity.—*British Med. Journ.*, Oct. 31, 1874.

Thompson (Sir Henry),

Surgeon and Professor of Clinical Surgery to University College Hospital.

LECTURES ON DISEASES OF THE URINARY ORGANS.

With illustrations on wood. Second American, from the Third English Edition. In one neat octavo volume: cloth, $2 25. (*Now Ready.*)

By a change in the typographic arrangement, the very considerable additions of the author have been accommodated with but little increase of size, and the work has been kept at its former very moderate price.

The author is well known as one of the best and most esteemed authorities on diseases of the urinary organs. Those who read this book cannot fail to admire him also as a teacher and a writer, for in one hundred and ninety-five well leaded pages he gives us a perfectly clear and readable treatise upon the diseases peculiar to this portion of the system, sufficiently comprehensive in its extent to serve the purposes of most physicians, and show them the way to gain a practical knowledge of the subject.—*New Remedies*, Jan. 1875.

By the same Author.

ON THE PATHOLOGY AND TREATMENT OF STRICTURE OF THE URETHRA AND URINARY FISTULÆ.

With plates and wood-cuts. From the third and revised English Edition. In one very handsome octavo volume: cloth, $3 50. (*Lately Published.*)

This classical work has so long been recognized as a standard authority on its perplexing subjects that it should be rendered accessible to the American profession. Having enjoyed the advantage of a recent revision at the hands of the author, it will be found to present his latest views, and to be on a level with the most recent advance of surgical science.

With a work accepted as *the* authority upon the subjects of which it treats, an extended notice would be a work of supererogation. The simple announcement of another edition of a work so well and favorably known by the profession as this before us, must create a demand for it from those who would keep themselves well up in this department of surgery.—*St. Louis Med. Archives*, Feb. 1870.

The subjects are treated with the precision of a teacher and the authority of a master, of one who learned his art, and never subordinates practica experience to theory. One of the chief merits of the book is its brevity; what the author has to say is said well and concisely, the volume of less than two hundred pages containing more than in many instances would be diluted with five or six hundred of words.—*Chicago Med. Journ.*, April, 1875.

By the same Author. (*Just Issued.*)

THE DISEASES OF THE PROSTATE, THEIR PATHOLOGY AND TREATMENT.

Fourth Edition, Revised. In one very handsome octavo volume of 355 pages, with thirteen plates, plain and colored, and illustrations on wood. Cloth, $3 75.

This work is recognized in England as the leading authority on its subject, and in presenting it to the American profession, it is hoped that it will be found a trustworthy and satisfactory guide in the treatment of an obscure and important class of affections.

TODD'S CLINICAL LECTURES ON CERTAIN ACUTE DISEASES. In one neat octavo volume of 305 pages: cloth, $2 50.

Taylor (Alfred S.), M.D.,

Lecturer on Med. Jurisp. and Chemistry in Guy's Hospital.

POISONS IN RELATION TO MEDICAL JURISPRUDENCE AND MEDICINE. Third American, from the Third Revised English Edition. In one large octavo volume of 788 pages, and 104 illustrations: cloth, $5 50; leather, $6 50. (*Now Ready.*)

From the Preface to the Third Edition.

But few words are required to introduce this volume. It is based on the two previous editions; but the complete revision, rendered necessary by time, has converted it into a new work. As a rule, I have omitted a description of those poisonous substances which have not hitherto given rise to investigations before our legal tribunals, and which are otherwise of little interest to the profession. In short, as the reader will perceive, the subject of poisons has been treated only in relation to Medical Jurisprudence and Medicine, and as fully as the space at my disposal would permit.

The present is based upon the two previous editions; "but the complete revision rendered necessary by time has converted it into a new work." This statement from the preface contains all that it is desired to know in reference to the new edition. The works of this author are already in the library of every physician who is liable to be called upon for medico-legal testimony (and what one is not?), so that all that is required to be known about the present book is that the author has kept it abreast with the times. What makes it now, as always, especially valuable to the practitioner is its conciseness and practical character, only those poisonous substances being described which give rise to legal investigations.—*The Clinic*, Nov. 6, 1875.

Prof. Taylor's work on Poisons has been so long before the profession, and is so universally recognized as a classic, that we do not think it worth while to do more than announce the appearance of a new edition, and to state that an examination of it has shown that its learned author has honestly and successfully endeavored to bring his book fully up to the most recent progress in toxicology.—*Phila. Med. Times*, Oct. 2, 875.

Dr. Taylor has brought to bear on the compilation of this volume stores of learning, experience, and practical acquaintance with his subject, probably far beyond what any other living authority on toxicology could have amassed or utilized. He has fully sustained his reputation by the consummate skill and legal acumen he has displayed in the arrangement of the subject-matter, and the result is a work on Poisons which will be indispensable to every student or practitioner in law and medicine.—*The Dublin Journ. of Med. Sci.*, Oct. 1875.

By the same Author. (*Just Issued.*)

THE PRINCIPLES AND PRACTICE OF MEDICAL JURISPRUDENCE. Second Edition, Revised, with numerous Illustrations. In two large octavo volumes: cloth, $10; leather, $12.

This great work is now recognized in England as the fullest and most authoritative treatise on every department of its important subject. In laying it, in its improved form, before the American profession, the publisher trusts that it will assume the same position in this country.

By the same Author. (*Lately Published.*)

MEDICAL JURISPRUDENCE. Seventh American Edition. Edited by JOHN J. REESE, M.D., Prof. of Med. Jurisp. in the Univ. of Penna. In one large octavo volume of nearly 900 pages. Cloth, $5 00; leather, $6 00.

To the members of the legal and medical profession it is unnecessary to say anything commendatory of Taylor's Medical Jurisprudence. We might as well undertake to speak of the merit of Chitty's Pleadings.—*Chicago Legal News*, Oct. 16, 1873.

Little can be added to what has already been said of this standard work of Dr. Taylor's. As a manual it is doubtless the most comprehensive extant, meeting fully the demands of the student of medicine and law.—*Western Lancet*, Nov. 1873.

It is beyond question the most attractive as well as most reliable manual of medical jurisprudence published in the English language.—*Amer. Journal of Syphilography*, Oct. 1873.

It is altogether superfluous for us to offer anything in behalf of a work on medical jurisprudence by an author who is almost universally esteemed to be the best authority on this specialty in our language. On this point, however, we will say that we consider Dr. Taylor to be the safest medico-legal authority to follow, in general, with which we are acquainted in any language.—*Va. Clin. Record*, Nov. 1873.

This last edition of the Manual is probably the best of all, as it contains more material and is worked up to the latest views of the author as expressed in the last edition of the Principles. Dr. Reese, the editor of the Manual, has done everything to make his work acceptable to his medical countrymen.—*N. Y. Med. Record*, Jan. 15, 1874.

Tanner (Thomas H.), M.D.,

Physician to the Skin Department in University College Hospital, &c.

ON THE SIGNS AND DISEASES OF PREGNANCY. First American from the second and enlarged English edition. With four colored plates and illustrations on wood. In one handsome octavo volume of about 500 pages, cloth, $4 25.

By the same Author.

A MANUAL OF CLINICAL MEDICINE AND PHYSICAL DIAGNOSIS. Third American from the second London edition. In one neat volume small 12mo., of about 375 pages, cloth, $1 50.

*** By reference to the "Prospectus of Journal" on page 3, it will be seen that this work is offered as a premium for procuring new subscribers to the "AMERICAN JOURNAL OF THE MEDICAL SCIENCES."

Watson (Thomas), M.D., etc.

LECTURES ON THE PRINCIPLES AND PRACTICE OF PHYSIC.

Delivered at King's College, London. A new American, from the Fifth revised and enlarged English edition Edited, with additions, and several hundred illustrations, by HENRY HARTSHORNE, M.D., Professor of Hygiene in the University of Pennsylvania. In two large and handsome 8vo. vols. Cloth, $9 00; leather, $11 00. (*Lately Published.*)

It is a subject for congratulation and for thankfulness that Sir Thomas Watson, during a period of comparative leisure, after a long, laborious, and most honorable professional career, while retaining full possession of his high mental faculties, should have employed the opportunity to submit his Lectures to a more thorough revision than was possible during the earlier and busier period of his life Carefully passing in review some of the most intricate and important pathological and practical questions, the results of his clear insight and his calm judgment are now recorded for the benefit of mankind, in language which, for precision, vigor, and classical elegance, has rarely been equalled, and never surpassed. The revision has evidently been most carefully done, and the results appear in almost every page.—*Brit. Med. Journ.*, Oct 14, 1871.

The lectures are so well known and so justly appreciated, that it is scarcely necessary to do more than call attention to the special advantages of the last over previous editions The author's rare combination of great scientific attainments combined with wonderful forensic eloquence has exerted extraordinary influence over the last two generations of physicians. His clinical descriptions of most diseases have never been equalled; and on this score at least his work will live long in the future. The work will be sought by all who appreciate a great book.—*Am. Journ. of Syphilography*, July, 1872.

Wells (J. Soelberg),

Professor of Ophthalmology in King's College Hospital, &c.

A TREATISE ON DISEASES OF THE EYE.

Second American, from the Third and Revised London Edition, with additions; illustrated with numerous engravings on wood, and six colored plates. Together with selections from the Test-types of Jaeger and Snellen. In one large and very handsome octavo volume of nearly 800 pages: cloth, $5 00; leather, $6 00. (*Lately Published.*)

The continued demand for this work, both in England and this country, is sufficient evidence that the author has succeeded in his effort to supply within a reasonable compass a full practical digest of ophthalmology in its most modern aspects, while the call for repeated editions has enabled him in his revisions to maintain its position abreast of the most recent investigations and improvements. In again reprinting it, every effort has been made to adapt it thoroughly to the wants of the American practitioner. Such additions as seemed desirable have been introduced by the editor, Dr. I. Minis Hays, and the number of illustrations has been largely increased. The importance of test-types as an aid to diagnosis is so universally acknowledged at the present day that it seemed essential to the completeness of the work that they should be added, and as the author recommends the use of those both of Jaeger and of Snellen for different purposes, selections have been made from each, so that the practitioner may have at command all the assistance necessary. Although enlarged by one hundred pages, it has been retained at the former very moderate price, rendering it one of the cheapest volumes before the profession.

Of all the numerous treatises on the eye which exist, this possesses qualities which must specially recommend it to the general practitioner who wishes to know something of the cases he certainly will be called on to give an opinion about, if not to treat, or as a text-book for the student. The style is clear, simple, and straightforward; the manner in which the different subjects are treated is eminently practical, and the discussion of varying views as to details, which, valuable as it might be to the specialist, would only embarrass the physician, who has neither time nor opportunity to study the subject at length, is as much as possible avoided.—*Boston Med. and Surg. Journ.*, April 30, 1874.

West (Charles), M.D.,

Physician to the Hospital for Sick Children, &c

LECTURES ON THE DISEASES OF INFANCY AND CHILDHOOD.

Fifth American from the sixth revised and enlarged English edition. In one large and handsome octavo volume of 678 pages. Cloth, $4 50; leather, $5 50. (*Just Issued.*)

The continued demand for this work on both sides of the Atlantic, and its translation into German, French, Italian, Danish, Dutch, and Russian, show that it fills satisfactorily a want extensively felt by the profession. There is probably no man living who can speak with the authority derived from a more extended experience than Dr. West, and his work now presents the results of nearly 2000 recorded cases, and 600 post-mortem examinations selected from among nearly 40,000 cases which have passed under his care. In the preparation of the present edition he has omitted much that appeared of minor importance, in order to find room for the introduction of additional matter, and the volume, while thoroughly revised, is therefore not increased materially in size.

By the same Author.

LECTURES ON THE DISEASES OF WOMEN.

Third American, from the third London edition. In one neat octavo volume of about 550 pages, cloth, $3 75; leather, $4 75.

We have to say of it, briefly and decidedly, that it is the best work on the subject in any language and that it stamps Dr. West as the *facile princeps* of British obstetric authors.—*Edin. Med Journal.*

By the same Author.

ON SOME DISORDERS OF THE NERVOUS SYSTEM IN CHILDHOOD;

being the Lumleian Lectures delivered at the Royal College of Physicians of London, in March, 1871. In one volume, small 12mo., cloth, $1 00.

Winckel (F.),

Professor and Director of the Gynæcological Clinic in the University of Rostock.

THE PATHOLOGY AND TREATMENT OF CHILDBED. A Treatise for Physicians and Students. From the Second German Edition, with additions by the author. Translated by JAMES READ CHADWICK, M.D., Clinical Lecturer on Diseases of Women in Harvard University. In one handsome octavo volume. (*In Press.*)

Williams (C. J. B.), M.D.,

Senior Consulting Physician to the Hospital for Consumption, Brompton, and

Williams (Charles T.), M.D.,

Physician to the Hospital for Consumption.

PULMONARY CONSUMPTION; Its Nature, Varieties, and Treatment. With an Analysis of One Thousand Cases to exemplify its duration. In one neat octavo volume of about 350 pages: cloth, $2 50. (*Lately Published.*)

He can still speak from a more enormous experience, and a closer study of the morbid processes involved in tuberculosis, than most living men. He owed it to himself, and to the importance of the subject, to embody his views in a separate work, and we are glad that he has accomplished this duty. After all, the grand teaching which Dr. Williams has for the profession is to be found in his therapeutical chapters, and in the history of individual cases extended, by dint of care, over ten, twenty, thirty, and even forty years.—*London Lancet*, Oct. 21, 1871.

Wilson (Erasmus), F.R.S.

ON DISEASES OF THE SKIN. With Illustrations on wood. Seventh American, from the sixth and enlarged English edition. In one large octavo volume of over 800 pages, $5 00.

A SERIES OF PLATES ILLUSTRATING "WILSON ON DISEASES OF THE SKIN:" consisting of twenty beautifully executed plates, of which thirteen are exquisitely colored, presenting the Normal Anatomy and Pathology of the Skin, and embracing accurate representations of about one hundred varieties of disease, most of them the size of nature. Price in extra cloth, $5 50.

Also, the Text and Plates, bound in one handsome volume. Cloth, $10 00.

By the same Author.

A SYSTEM OF ANATOMY, General and Special. Edited by W. H. GOBRECHT, M.D., Professor of General and Surgical Anatomy in the Medical College of Ohio. Illustrated with three hundred and ninety-seven engravings on wood. In one large and handsome octavo volume of over 600 large pages: cloth, $4 00; leather, $5 00.

By the same Author.

THE STUDENT'S BOOK OF CUTANEOUS MEDICINE and Diseases OF THE SKIN. In one very handsome royal 12mo. volume. $3 50.

Wöhler and Fittig.

OUTLINES OF ORGANIC CHEMISTRY. Translated with Additions from the Eighth German Edition. By IRA REMSEN, M.D., Ph.D., Professor of Chemistry and Physics in Williams College, Mass. In one handsome volume, royal 12mo., of 550 pages: cloth, $3 00.

Winslow (Forbes), M.D., D.C.L., etc.

ON OBSCURE DISEASES OF THE BRAIN AND DISORDERS OF THE MIND; their incipient Symptoms, Pathology, Diagnosis, Treatment, and Prophylaxis. Second American, from the third and revised English edition. In one handsome octavo volume of nearly 600 pages: cloth, $4 25.

WALSHE ON THE DISEASES OF THE HEART AND GREAT VESSELS. Third American edition. In 1 vol. 8vo., 420 pages: cloth. $3 00.

WHAT TO OBSERVE AT THE BEDSIDE AND AFTER DEATH IN MEDICAL CASES. Published under the authority of the London Society for Medical Observation From the second London edition. 1 vol. royal 12mo., cloth. $1 00.

Zeissl (H.), M.D.

A COMPLETE TREATISE ON VENEREAL DISEASES. Translated from the Second Enlarged German Edition, by FREDERIC R. STURGIS, M.D. In one octavo volume, with illustrations. (*Preparing.*)
